"'(f) Promptly after receipt of written notice that any portion of any building is being rented or operated in violation of any provision of this section or of any rule or regulation lawfully issued thereunder, the Commissioner shall investigate the existence of the facts alleged in the written notice and shall order such violation, if found to exist, to cease forthwith.

"'(g) If such violation does not cease in accordance with such order, the Commissioner shall forward the complaint to the Attorney General of the United States for prosecution of such civil or criminal action, if any, which the Attorney General may find to be involved in such violation.

"'(h) Whenever he finds a violation of any provision of this section has occurred or is about to occur, the Attorney General shall petition the district court of the United States or the district court of any Territory or other place subject to United States jurisdiction within whose jurisdictional limits the person doing or committing the acts or practices constituting the alleged violation of this section shall be found, for an order enjoining such acts or practices, and upon a showing by the Attorney General that such acts or practices constituting such violation have been engaged in or are about to be engaged in, a permanent or temporary injunction, restraining order, or other order, with or without such injunction or restraining order, shall be granted without bond.

"'(i) Any person owning or operating a hotel within a radius of fifty miles of a place where a violation of any provision of this section has occurred or is about to occur, or any group or association of hotel owners or operators within said fifty-mile radius, at his or their sole charge or cost, may petition any district court of the United States or the district court of any Territory or other place subject to United States jurisdiction within whose jurisdictional limits the person doing or committing the acts or practices constituting the alleged violation of this section shall be found, for an order enjoining such acts or practices, and, upon a showing that such acts or practices constituting such violation have been engaged in or are about to be engaged in, a permanent or temporary injunction, restraining order, or other order, with or without such injunction or restraining order, shall be granted.

"'(j) The several district courts of the United States and the several district courts of the Territories of the United States or other place subject to United States jurisdiction, within whose jurisdictional limits the person doing or committing the acts or practices constituting the alleged violation shall be found, shall, wheresoever such acts or practices may have been done or committed, have full power and jurisdiction to hear, try, and determine such matter under subsections (h) and (i) of this section.'

"TITLE II—FEDERAL NATIONAL MORTGAGE ASSOCIATION

"SEC. 201. Title III of the National Housing Act, as amended, is hereby amended to read as follows:

"'TITLE III—FEDERAL NATIONAL MORTGAGE ASSOCIATION

"'*Purposes*

"'SEC. 301. The Congress hereby declares that the purposes of this title are to establish in the Federal Government a secondary market facility for home mortgages, to provide that the operations of such facility shall be financed by private capital to the maximum extent feasible, and to authorize such facility to—

"'(a) provide supplementary assistance to the secondary market for home mortgages by providing a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing;

"'(b) provide special assistance (when, and to the extent that, the President has determined that it is in the public interest) for the financing of (1) selected types of home mortgages (pending the establishment of their marketability) originated under special housing programs designed to provide housing of acceptable standards at full economic costs for segments of the national population which are unable to obtain adequate housing under established home financing programs, and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage lending and home building activities which threatens materially the stability of a high level national economy; and

"'(c) manage and liquidate the existing mortgage portfolio of the Federal National Mortgage Association in an orderly manner, with a minimum of adverse effect upon the home mortgage market and minimum loss to the Federal Government.

"'*Creation of Association*

"'SEC. 302. (a) There is hereby created a body corporate to be known as the "Federal National Mortgage Association" (hereinafter referred to as the "Association"), which shall be a constituent agency of the Housing and Home Finance Agency. The Association shall have succession until dissolved by Act of Congress. It shall maintain its principal office in the District of Columbia and shall be deemed, for purposes of venue in civil actions, to be a resident thereof. Agencies or offices may be established by the Association in such other place or places as it may deem necessary or appropriate in the conduct of its business.

"'(b) For the purposes set forth in section 301 and subject to the limitations and restrictions of this title, the Association is authorized to make commitments to purchase and to purchase, service, or sell, any residential or home mortgages (or participations therein) which are insured under this Act, as amended, or which are insured or guaranteed under the Servicemen's Readjustment Act of 1944, as amended: *Provided*, That (1) no mortgage may be purchased at a price exceeding 100 per centum of the unpaid principal amount thereof at the time of purchase, with adjustments for interest and any comparable items; and (2) the Association may not purchase any mortgage if (i) it is offered by, or covers property held by, a Federal, State, territorial, or municipal instrumentality or (ii) the original principal obligation thereof exceeds or exceeded $15,000 for each family residence or dwelling unit covered by the mortgage.

"'*Capitalization*

"'SEC. 303. (a) The Association shall have nonvoting common stock; and initially shall also have nonvoting preferred stock to which the Secretary of the Treasury shall subscribe as provided in subsections (d) and (e) of this section. All stock of the Association shall have a par value of $100 per share, and shall not be transferable except on the books of the Association. At the option of the Association all such stock shall be retirable at par value at any time, except that retirements of common stock shall not be made if, as a consequence, the amount thereof remaining outstanding would be less than $100,000,000. With respect to the preferred stock held by him, the Secretary of the Treasury shall be entitled to cumulative dividends for each fiscal year or portion thereof, from the date or dates the capital represented by such preferred stock is initially utilized until such preferred stock is retired, at rates determined by him at the beginning of each such fiscal year, taking into consideration the current average interest rate on outstanding marketable obligations of the United States as of the last day of the preceding fiscal year. The Secretary of the Treasury shall permit the retirement of the preferred stock held by him in the manner provided in this section. Funds of the capital surplus and the general surplus accounts of the Association shall be available to retire the preferred stock held by the Secretary of the Treasury as rapidly as the Association shall deem feasible. Concurrently with the retirement of the last of such outstanding shares of preferred stock, the Association shall pay to the Secretary of the Treasury for covering into miscellaneous receipts an amount equal to that part of the general surplus and reserves of the Association (other than reserves established to provide for any depreciation in value of its assets, including mortgages) which shall be deemed to have been earned through the use of the capital represented by the shares held by him from time to time. The amount of such payment shall be determined by applying to such surplus and reserves that percentage which is equivalent to the proportion borne by the employed capital represented by the Secretary's stock to the total employed capital of the Association, computed monthly for the period from the cutoff date determined pursuant to section 303 (d) of this title to the aforesaid retirement of the last of the outstanding shares of preferred stock of the Association.

"'(b) The Association shall accumulate funds for its capital surplus account from private sources by requiring each mortgage seller to make payments of nonrefundable capital contributions equal to not less than 3 per centum of the unpaid principal amount of mortgages therein involved in purchases or contracts for purchases between such seller and the Association, or such greater percentage as may from time to time be determined by the Association. In addition, the Association may impose charges or fees for its services with the objective that all costs and expenses of its operations should be within its income derived from such operations and that such operations should be fully self-supporting. All earnings from the operations of the Association shall annually be transferred to its general surplus account. At any time, funds of the general surplus account may, in the discretion of the board of directors, be transferred to reserves. All dividends shall be charged against the general surplus account. This subsection (b) shall be subject to the exceptions set forth in section 307 of this title.

"'(c) The Association shall issue, from time to time, to each mortgage seller its common stock (only in denominations of $100 or multiples thereof) evidencing any capital contributions made by such seller pursuant to subsection (b) of this section. Such dividends as may be declared by the board of directors in its discretion shall be paid by the Association to the holders of its common stock, but in any one fiscal year the general surplus account of the Association shall not be reduced through the payment of dividends applicable to such common stock which exceed in the aggregate 5 per centum of the par value of the outstanding common stock of the Association: *Provided*, That pending the retirement of all the outstanding preferred stock of the Association such percentage with respect to any one fiscal year shall not exceed the percentage rate of the cumulative dividend applicable to the preferred stock of the Association for that fiscal year.

"'(d) Within ninety days following the effective date of the Housing Act of 1954, as of the day following a cutoff date to be determined by the Association, the Association is authorized and directed to issue and deliver to the Secretary of the Treasury, and the Secretary of the Treasury is authorized and directed to accept, preferred stock of the Association having an aggregate par value

equal to the sum of (1) the amount of $21,000,000 (being the amount of the original subscription for capital stock of $20,000,000 and paid-in surplus of $1,000,000 of the Association) and (2) an amount equal to the Association's surplus, surplus reserves, and undistributed earnings, computed as of the close of the cutoff date.

"'(e) The preferred stock of the Association delivered to the Secretary of the Treasury pursuant to subsection (d) of this section shall be in exchange for (1) the note or notes evidencing the aforesaid original $21,000,000 (upon which the accrued interest shall have been paid through the cutoff date referred to in subsection (d) of this section), and (2) the release to the Association of any and all rights or claims which the United States might otherwise have or claim in and to the Association's capital, surplus, surplus reserves, and undistributed earnings, computed as of the close of the aforesaid cutoff date.

"'(f) Notwithstanding any other provision of law, any institution, including a national bank or State member bank of the Federal Reserve System or any member of the Federal Deposit Insurance Corporation, trust company, or other banking organization, organized under any law of the United States, including the laws relating to the District of Columbia, shall be authorized to make payments to the Association of the nonrefundable capital contributions referred to in subsection (b) of this section, to receive stock of the Association evidencing such capital contributions, and to hold or dispose of such stock, subject to the provisions of this title.

"'(g) As promptly as practicable after all of the preferred stock of the Association held by the Secretary of the Treasury has been retired, the Housing and Home Finance Administrator shall transmit to the President for submission to the Congress recommendations for such legislation as may be necessary or desirable to make appropriate provisions to transfer to the owners of the outstanding common stock of the Association the assets and liabilities of the Association in connection with, and the control and management of, the secondary market operations of the Association under section 304 of this title in order that such operations may thereafter be carried out by a privately owned and privately financed corporation.

"'Secondary market operations

"'SEC. 304. (a) To carry out the purposes set forth in paragraph (a) of section 301, the operations of the Association under this section shall be confined, so far as practicable, to mortgages which are deemed by the Association to be of such quality, type, and class as to meet, generally, the purchase standards imposed by private institutional mortgage investors and the Association shall not purchase any mortgage insured or guaranteed prior to the effective date of the Housing Act of 1954. In the interest of assuring sound operation, the prices to be paid by the Association for mortgages purchased in its secondary market operations under this section, should be established, from time to time, at the market price for the particular class of mortgages involved, as determined by the Association. The volume of the Association's purchases and sales, and the establishment of the purchase prices, sale prices, and charges or fees, in its secondary market operations under this section, should be determined by the Association from time to time, and such determinations should be consistent with the objectives that such purchases and sales should be effected only at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities, and that the operations of the Association under this section should be within its income derived from such operations and that such operations should be fully self-supporting.

"'(b) For the purposes of this section, the Association is authorized to issue, upon the approval of the Secretary of the Treasury, and have outstanding at any one time obligations having such maturities and bearing such rate or rates of interest as may be determined by the Association with the approval of the Secretary of the Treasury, to be redeemable at the option of the Association before maturity in such manner as may be stipulated in such obligations; but the aggregate amount of obligations of the Association under this subsection outstanding at any one time shall not exceed ten times the sum of its capital, capital surplus, general surplus, reserves, and undistributed earnings, and in no event shall any such obligations be issued if, at the time of such proposed issuance, and as a consequence thereof, the resulting aggregate amount of its outstanding obligations under this subsection would exceed the amount of the Association's ownership pursuant to this section, free from any liens or encumbrances, of cash, mortgages, and bonds or other obligations of, or bonds or other obligations guaranteed as to principal and interest by, the United States. The Association shall insert appropriate language in all of its obligations issued under this subsection clearly indicating that such obligations, together with the interest thereon, are not guaranteed by the United States and do not constitute a debt or obligation of the United States or of any agency or instrumentality thereof other than the Association. The Association is authorized to purchase in the open market any of its obligations outstanding under this subsection at any time and at any price.

"'(c) The Secretary of the Treasury is authorized in his discretion to purchase any obligations issued pursuant to subsection (b) of this section, as now or hereafter in force, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities hereafter issued under the Second Liberty Bond Act, as now or hereafter in force, and the purposes for which securities may be issued under the Second Liberty Bond Act, as now or hereafter in force, are extended to include such purchases. The Secretary of the Treasury shall not at any time purchase any obligations under this subsection if (1) all of the preferred stock of the Association held by the Secretary of the Treasury has been retired, or (2) such purchase would increase the aggregate principal amount of his then outstanding holdings of such obligations under this subsection to an amount greater than $500,000,000 plus an amount equal to the total of such reductions in the maximum dollar amount prescribed by section 306 (c) as have theretofore been effected pursuant to that section: *Provided,* That such aggregate principal amount under this subsection (c) shall in no event exceed $1,000,000,000. Each purchase of obligations by the Secretary of the Treasury under this subsection shall be upon such terms and conditions as to yield a return at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the making of such purchase. The Secretary of the Treasury may, at any time, sell, upon such terms and conditions and at such price or prices as he shall determine, any of the obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such obligations under this subsection shall be treated as public debt transactions of the United States.

"'(d) The Association may not purchase participations or make any advance contracts or commitments to purchase mortgages for its operations under this section, except that the Association may, in the discretion of its board of directors, issue a purchase contract (which shall not be assignable or transferable except with the consent of the Association) in an amount not exceeding the amount of the sale of mortgages purchased from the Association, entitling the holder thereof to sell to the Association mortgages in the amount of the contract, upon such terms and conditions as the Association may prescribe.

"'Special assistance functions

"'SEC. 305. (a) To carry out the purposes set forth in paragraph (b) of section 301, the President, after taking into account (1) the conditions in the building industry and the national economy and (2) conditions affecting the home mortgage investment market, generally, or affecting various types or classifications of home mortgages, or both, and after determining that such action is in the public interest, may under this section authorize the Association, for such period of time and to such extent as he shall prescribe, to exercise its powers to make commitments to purchase and to purchase such types, classes, or categories of home mortgages (including participations therein) as he shall determine.

"'(b) The operations of the Association under this section shall be confined, so far as practicable, to mortgages (including participations) which are deemed by the Association to be of such quality as to meet, substantially and generally, the purchase standards imposed by private institutional mortgage investors but which, at the time of submission of the mortgages to the Association for purchase, are not necessarily readily acceptable to such investors. Subject to the provisions of this section, the prices to be paid by the Association for mortgages purchased in its operations under this section shall be established from time to time by the Association. The Association shall impose charges or fees for its services under this section with the objective that all costs and expenses of its operations under this section should be within its income derived from such operations and that such operations should be fully self-supporting.

"'(c) The total amount of purchases and commitments authorized by the President pursuant to subsection (a) of this section shall not exceed $200,000,000 outstanding at any one time: *Provided,* That, notwithstanding such limitation, the President pursuant to subsection (a) of this section may also authorize the Association to exercise its powers to enter into commitments to purchase immediate participations and to make related deferred participation agreements as hereinafter in this subsection provided, but only to the extent that the total amount of such immediate participation commitments and purchases pursuant thereto (but not including the amount of any related deferred participation agreements or purchases pursuant thereto) shall not in any event exceed $100,000,000 outstanding at any one time, and any such deferred participation agreements shall be made by the Association only on the basis of a commitment by it to purchase an immediate participation of a 20 per centum undivided interest in each mortgage and a related deferred participation agreement by the Association to purchase the remaining outstanding interest in such mortgage conditional upon the occurrence of such a default as gives rise to the right to foreclose.

"'(d) The Association may issue to the Secretary of the Treasury its obligations in an amount outstanding at any one time sufficient to enable the Association to carry out its functions under this section, such obligations to mature not more than five years from their respective dates of issue, to be redeemable at the option of the Association before maturity in such manner as may be stipulated in such obligations. Each such obligation shall bear interest at a rate determined by the Secretary of the Treasury, tak-

ing into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligation of the Association. The Secretary of the Treasury is authorized to purchase any obligations of the Association to be issued under this section, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force, and the purposes for which securities may be issued under the Second Liberty Bond Act, as now or hereafter in force, are extended to include any purchases of the Association's obligations hereunder..

"'*Management and liquidating functions*

"'SEC. 306. (a) To carry out the purposes set forth in paragraph (c) of section 301, the Association is authorized and directed, as of the close of the cutoff date determined by the Association pursuant to section 303 (d) of this title, to establish separate accountability for all of its assets and liabilities (exclusive of capital, surplus, surplus reserves, and undistributed earnings to be evidenced by preferred stock as provided in section 303 (d) hereof, but inclusive of all rights and obligations under any outstanding contracts), and to maintain such separate accountability for the management and orderly liquidation of such assets and liabilities as provided in this section.

"'(b) For the purposes of this section and to assure that, to the maximum extent, and as rapidly as possible, private financing will be substituted for Treasury borrowings otherwise required to carry mortgages held under the aforesaid separate accountability, the Association is authorized to issue, upon the approval of the Secretary of the Treasury, and have outstanding at any one time obligations having such maturities and bearing such rate or rates of interest as may be determined by the Association with the approval of the Secretary of the Treasury, to be redeemable at the option of the Association before maturity in such manner as may be stipulated in such obligations; but in no event shall any such obligations be issued if, at the time of such proposed issuance, and as a consequence thereof, the resulting aggregate amount of its outstanding obligations under this subsection would exceed the amount of the Association's ownership under the aforesaid separate accountability, free from any liens or encumbrances, of cash, mortgages, and bonds or other obligations of, or bonds or other obligations guaranteed as to principal and interest by, the United States. The proceeds of any private financing effected under this subsection shall be paid to the Secretary of the Treasury in reduction of the indebtedness of the Association to the Secretary of the Treasury under the aforesaid separate accountability. The Association shall insert appropriate language in all of its obligations issued under this subsection clearly indicating that such obligations, together with the interest thereon, are not guaranteed by the United States and do not constitute a debt or obligation of the United States or of any agency or instrumentality thereof other than the Association. The Association is authorized to purchase in the open market any of its obligations outstanding under this subsection at any time and at any price.

"'(c) No mortgage shall be purchased by the Association in its operations under this section except pursuant to and in accordance with the terms of a contract or commitment to purchase the same made prior to the cutoff date provided for in section 303 (d), which contract or commitment became a part of the aforesaid separate accountability, and the total amount of mortgages and commitments held by the Association under this section shall not, in any event, exceed $3,350,000,000: *Provided*, That such maximum amount shall be progressively reduced by the amount of cash realizations on account of principal of mortgages held under the aforesaid separate accountability and by cancellation of any commitments to purchase mortgages thereunder, as reflected by the books of the Association, with the objective that the entire aforesaid maximum amount shall be eliminated with the orderly liquidation of all mortgages held under the aforesaid separate accountability: *And provided further*, That nothing in this subsection shall preclude the Association from granting such usual and customary increases in the amounts of outstanding commitments (resulting from increased costs or otherwise) as have theretofore been covered by like increases in commitments granted by the agencies of the Federal Government insuring or guaranteeing the mortgages. There shall be excluded from the total amounts set forth in this subsection and subsection (e) of this section the amounts of any mortgages which, subsequent to May 31, 1954, are transferred by law to the Association and held under the aforesaid separate accountability.

"'(d) The Association may issue to the Secretary of the Treasury its obligations in an amount outstanding at any one time sufficient to enable the Association to carry out its functions under this section, such obligations to mature not more than five years from their respective dates of issue, to be redeemable at the option of the Association before maturity in such manner as may be stipulated in such obligations. Each such obligation shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligation of the Association. The Secretary of the Treasury is authorized to purchase any obligations of the Association to be issued under this section, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force, and the purposes for which securities may be issued under the Second Liberty Bond Act, as now or hereafter in force, are extended to include any purchases of the Association's obligations hereunder.

"'(e) Of the $3,650,000,000 total amount of investments, loans, purchases, and commitments heretofore authorized to be outstanding at any one time under this title III prior to the enactment of the Housing Act of 1954, a total of not to exceed $300,000,000 shall be applicable as provided in section 305 of this title, and a total of not to exceed $3,350,000,000 shall be applicable as provided in subsection (c) of this section.

"'*Separate accountability*

"'SEC. 307. (a) The Association shall establish and at all times maintain separate accountability for (1) its secondary market operations authorized by section 304 hereof, (2) its special assistance functions authorized by section 305 hereof, and (3) its management and liquidating functions authorized by section 306 hereof.

"'(b) With respect to the functions or operations of the Association under sections 305 and 306, respectively, of this title, (1) there shall be no recourse to the capitalization of the Association provided for by section 303 of this title, and (2) mortgage sellers shall not be required to make payment to the Association of the capital contributions provided for by section 303 (b) of this title.

"'(c) All of the benefits and burdens incident to the administration of the functions and operations of the Association under sections 305 and 306, respectively, of this title, after allowance for related obligations of the Association, its prorated expenses, and the like, including amounts required for the establishment of such reserves as the board of directors of the Association shall deem appropriate, shall inure solely to the Secretary of the Treasury, and such related earnings or other amounts as become available shall be paid annually by the Association to the Secretary of the Treasury for covering into miscellaneous receipts.

"'*Board of Directors*

"'SEC. 308 (a). The Association shall have a Board of Directors consisting of five persons, one of whom shall be the Housing and Home Finance Administrator as Chairman of the Board, and four of whom shall be appointed by said Administrator from among the officers or employees of the Association, of the immediate office of said Administrator, or (with the consent of the head of such department or agency) of any other department or agency of the Federal Government. The board of directors shall meet at the call of its chairman, who shall require it to meet not less often than once each month. Within the limitations of law, the board shall determine the general policies which shall govern the operations of the Association. The chairman of the board shall select and effect the appointment of qualified persons to fill the offices of president and vice president, and such other offices as may be provided for in the bylaws, with such executive functions, powers, and duties as may be prescribed by the bylaws or by the board of directors, and such persons shall be the executive officers of the Association and shall discharge all such executive functions, powers, and duties. The basic rate of compensation of the position of president of the Association shall be the same as the basic rate of compensation established for the heads of the constituent agencies of the Housing and Home Finance Agency. The members of the board, as such, shall not receive compensation for their services.

"'*General powers*

"'SEC. 309. (a) The Association shall have power to adopt, alter, and use a corporate seal, which shall be judicially noticed; by its board of directors, to adopt, amend, and repeal bylaws governing the performance of the powers and duties granted to or imposed upon it by law; to enter into and perform contracts, leases, cooperative agreements, or other transactions, on such terms as it may deem appropriate, with any agency or instrumentality of the United States, or with any State, territory, or possession, or the Commonwealth of Puerto Rico, or with any political subdivision thereof, or with any person, firm, association, or corporation; to execute, in accordance with its bylaws, all instruments necessary or appropriate in the exercise of any of its powers; in its corporate name, to sue and to be sued, and to complain and to defend, in any court of competent jurisdiction, State or Federal, but no attachment, injunction, or other similar process, mesne or final, shall be issued against the property of the Association or against the Association with respect to its property; to conduct its business in any State of the United States, including the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States; to lease, purchase, or acquire any property, real, personal, or mixed, or any interest therein, to hold, rent, maintain, modernize, renovate, improve, use, and operate such property, and to sell, for cash or credit, lease, or otherwise dispose of the same, at such time and in such manner as and to the extent that the Association may deem necessary or appropriate; to prescribe, repeal, and amend or modify, rules, regulations, or requirements governing the manner in which its general business may be conducted; to accept gifts or donations of services, or of property, real, personal, or mixed, tangible, or intangible, in aid of any of the purposes of the Association; and to do all things as are

necessary or incidental to the proper management of its affairs and the proper conduct of its business.

"'(b) Except as may be otherwise provided in this title, in the Government Corporation Control Act, or in other laws specifically applicable to Government corporations, the Association shall determine the necessity for and the character and amount of its obligations and expenditures and the manner in which they shall be incurred, allowed, paid, and accounted for.

"'(c) The Association, including its franchise, capital, reserves, surplus, mortgages, and income shall be exempt from all taxation now or hereafter imposed by the United States, by any territory, dependency, or possession thereof, or by any State, county, municipality, or local taxing authority, except that (1) any real property of the Association shall be subject to State, territorial, county, municipal, or local taxation to the same extent according to its value as other real property is taxed, and (2) the Association shall, with respect to its secondary market operations under section 304 after the cutoff date referred to in section 303 (d) of this title, pay annually to the Secretary of the Treasury, for covering into miscellaneous receipts, an amount equivalent to the amount of Federal income taxes for which it would be subject if it were not exempt from such taxes with respect to such secondary market operations.

"'(d) The Chairman of the Board shall have power to select and appoint or employ such officers, attorneys, employees, and agents, to vest them with such powers and duties, and to fix and to cause the Association to pay such compensation to them for their services, as he may determine, subject to the civil service and classification laws. Bonds may be required for the faithful performance of their duties, and the Association may pay the premiums therefor. With the consent of any Government corporation or Federal Reserve bank, or of any board, commission, independent establishment, or executive department of the Government, the Association may avail itself on a reimbursable basis of the use of information, services, facilities, officers, and employees thereof, including any field service thereof, in carrying out the provisions of this title.

"'(e) No individual, association, partnership, or corporation, except the body corporate created by section 302 of this title, shall hereafter use the words "Federal National Mortgage Association" or any combination of such words, as the name or a part thereof under which he or it shall do business. Every individual, partnership, association, or corporation violating this prohibition shall be guilty of a misdemeanor and shall be punished by a fine of not exceeding $100 or imprisonment not exceeding thirty days or both, for each day during which such violation is committed or repeated.

"'(f) In order that the Association may be supplied with such forms of obligations or certificates as it may need for issuance under this title, the Secretary of the Treasury is authorized, upon request of the Association, to prepare such forms as shall be suitable and approved by the Association, to be held in the Treasury subject to delivery, upon order of the Association. The engraved plates, dies, bed pieces, and other material executed in connection therewith shall remain in the custody of the Secretary of the Treasury. The Association shall reimburse the Secretary of the Treasury for any expenses incurred in the preparation, custody, and delivery of such forms.

"'(g) The Federal Reserve banks are authorized and directed to act as depositaries, custodians, and fiscal agents for the Association in the general performance of its powers, and the Association shall reimburse such Federal Reserve banks for such services in such manner as may be agreed upon.

"'*Investment of funds*

"'SEC. 310. Moneys of the Association not invested in mortgages or in operating facilities shall be kept in cash on hand or on deposit, or invested in bonds or other obligations of, or in bonds or other obligations guaranteed as to principal and interest by, the United States.

"'*Obligations of Association legal investments*

"'SEC. 311. All obligations issued by the Association shall be lawful investments, and may be accepted as security for all fiduciary, trust, and public funds, the investment or deposit of which shall be under the authority and control of the United States or any officer or officers thereof.

"'*Short title*

"'SEC. 312. This title III may be referred to as the "Federal National Mortgage Association Charter Act".'

"SEC. 202. The Federal National Mortgage Association, established pursuant to the provisions of title III of the National Housing Act as in effect prior to July 1, 1948, and named in section 101 of the Government Corporation Control Act, as amended, shall be the body corporate referred to in section 302 of title III of the National Housing Act, as amended by the Housing Act of 1954.

"SEC. 203. The penultimate sentence of paragraph Seventh of section 5136 of the Revised Statutes, as amended, is hereby amended by striking 'or obligations of national mortgage associations' and inserting 'or obligations of the Federal National Mortgage Association.'

"SEC. 204. (a) Subsection (h) of section 11 of the Federal Home Loan Bank Act, as amended, is hereby amended by inserting after 'in obligations of the United States' a comma and the following: 'in obligations of the Federal National Mortgage Association,'. The last sentence of section 16 of said Act is amended by inserting after 'in direct obligations of the United States' a comma and the following: 'in obligations of the Federal National Mortgage Association,'.

"(b) The first paragraph of subsection (c) of section 5 of the Home Owners' Loan Act of 1933, as amended, is hereby amended by inserting in the second proviso before the colon and after 'Federal Home Loan Bank' the following: 'or in the obligations of the Federal National Mortgage Association'.

"SEC. 205. Subsection (b) of section 2 of the Alaska Housing Act, as amended, is hereby repealed.

"SEC. 206. Public Law 243, Eighty-second Congress, approved October 30, 1951, as amended, is hereby repealed. Subsection (a) of section 608 of Public Law 139, Eighty-second Congress, approved September 1, 1951, is hereby repealed.

"SEC. 207. The functions of the Housing and Home Finance Administrator (including the function of making payments to the Secretary of the Treasury) under section 2 of Reorganization Plan Numbered 22 of 1950, together with the notes and capital stock of the Federal National Mortgage Association held by said Administrator thereunder, are hereby transferred to the Federal National Mortgage Association.

"TITLE III—SLUM CLEARANCE AND URBAN RENEWAL

"SEC. 301. The heading of title I of the Housing Act of 1949, as amended, is hereby amended to read 'TITLE I—SLUM CLEARANCE AND URBAN RENEWAL'.

"SEC. 302. Title I of said Act, as amended, is hereby amended by inserting the following new section immediately after the heading of title I:

"'*Urban renewal fund*

"'SEC. 100. The authorizations, funds, and appropriations available pursuant to sections 103 and 104 hereof shall constitute a fund, to be known as the "Urban Renewal Fund", and shall be available for advances, loans, and capital grants to local public agencies for urban renewal projects in accordance with the provisions of this title, and all contracts, obligations, assets, and liabilities existing under or pursuant to said sections prior to the enactment of the Housing Act of 1954 are hereby transferred to said Fund.'

"SEC. 303. Section 101 of said Act, as amended, is hereby amended to read as follows:

"'SEC. 101. (a) In entering into any contract for advances for surveys, plans, and other preliminary work for projects under this title, the Administrator shall give consideration to the extent to which appropriate local public bodies have undertaken positive programs (through the adoption, modernization, administration, and enforcement of housing, zoning, building and other local laws, codes and regulations relating to land use and adequate standards of health, sanitation, and safety for buildings, including the use and occupancy of dwellings) for (1) preventing the spread or recurrence in the community of slums and blighted areas, and (2) encouraging housing cost reductions through the use of appropriate new materials, techniques, and methods in land and residential planning, design, and construction, the increase of efficiency in residential construction, and the elimination of restrictive practices which unnecessarily increase housing costs.

"'(b) In the administration of this title, the Administrator shall encourage the operations of such local public agencies as are established on a State, or regional (within a State), or unified metropolitan basis or as are established on such other basis as permits such agencies to contribute effectively toward the solution of community development or redevelopment problems on a State, or regional (within a State), or unified metropolitan basis.

"'(c) No contract shall be entered into for any loan or capital grant under this title, or for annual contributions or capital grants pursuant to the United States Housing Act of 1937, as amended, for any project or projects not constructed or covered by a contract for annual contributions prior to the effective date of the Housing Act of 1954, and no mortgage shall be insured, and no commitment to insure a mortgage shall be issued, under section 220 or 221 of the National Housing Act, as amended, unless (1) there is presented to the Administrator by the locality a workable program (which shall include an official plan of action, as it exists from time to time, for effectively dealing with the problem of urban slums and blight within the community and for the establishment and preservation of a well-planned community with well-organized residential neighborhoods of decent homes and suitable living environment for adequate family life) for utilizing appropriate private and public resources to eliminate, and prevent the development or spread of, slums and urban blight, to encourage needed urban rehabilitation, to provide for the redevelopment of blighted, deteriorated, or slum areas, or to undertake such of the aforesaid activities or other feasible community activities as may be suitably employed to achieve the objectives of such a program, and (2) on the basis of his review of such program, the Administrator determines that such program meets the requirements of this subsection and certifies to the constituent agencies affected that the Federal assistance may be made available in such community: *Provided*, That this sentence shall not apply to the insurance of, or commitment to insure, a mortgage under section 220 of the National Housing Act, as amended, if the mortgaged property is in an area referred to in clause (A) (1) of paragraph (1) of section 220 (d), or under section 221 of the National Housing Act, as amended, if the mortgaged property

is in a community referred to in clause (2) of section 221 (a) of said Act: *And provided further*, That, notwithstanding any other provisions of law which would authorize such delegation or transfer, there shall not be delegated or transferred to any other official (except an officer or employee of the Housing and Home Finance Agency serving as Acting Administrator during the absence or disability of the Administrator or in the event of a vacancy in that office) the final authority vested in the Administrator (i) to determine whether any such workable program meets the requirements of this subsection, (ii) to make the certification that Federal assistance of the types enumerated in this subsection may be made available in such community, (iii) to make the certifications as to the maximum number of dwelling units needed for the relocation of families to be displaced as a result of governmental action in a community and who would be eligible to rent or purchase dwelling accommodations in properties covered by mortgage insurance under section 221 of the National Housing Act, as amended, or (iv) to determine that the relocation requirements of section 105 (c) of this title have been met.

"'(d) The Administrator is authorized to establish facilities (1) for furnishing to communities, at their request, an urban renewal service to assist them in the preparation of a workable program as referred to in the preceding subsection and to provide them with technical and professional assistance for planning and developing local urban renewal programs, and (2) for the assembly, analysis and reporting of information pertaining to such programs.'

"SEC. 304. Section 102 of said Act, as amended, is hereby amended—

"(1) by amending the first sentence in subsection (a) to read as follows: 'To assist local communities in the elimination of slums and blighted or deteriorated or deteriorating areas, in preventing the spread of slums, blight or deterioration, and in providing maximum opportunity for the redevelopment, rehabilitation, and conservation of such areas by private enterprise, the Administrator may make temporary and definitive loans to local public agencies in accordance with the provisions of this title for the undertaking of urban renewal projects.';

"(2) by inserting in the second sentence of subsection (a) before the word 'expenditures' the word 'estimated' and by inserting after the word 'bonds' the words 'or other obligations';

"(3) by striking out 'new uses of land in the project area' at the end of the first sentence of subsection (b) and inserting 'new uses of such land in the project area';

"(4) by striking out the words 'bear interest as such rate' in the second sentence of subsection (b) and inserting 'bear interest at such rate'; and

"(5) by amending subsection (d) to read as follows:

"'(d) The Administrator may make advances of funds to local public agencies for surveys and plans for urban renewal projects which may be assisted under this title, including, but not limited to, (i) plans for carrying out a program of voluntary repair and rehabilitation of buildings and improvements, (ii) plans for the enforcement of State and local laws, codes, and regulations relating to the use of land and the use and occupancy of buildings and improvements, and to the compulsory repair, rehabilitation, demolition, or removal of buildings and improvements, and (iii) appraisals, title searches, and other preliminary work necessary to prepare for the acquisition of land in connection with the undertaking of such projects. The contract for any such advance of funds shall be made upon the condition that such advance of funds shall be repaid, with interest at not less than the applicable going Federal rate, out of any moneys which become available to the local public agency for the undertaking of the project involved. No contract for any such advances of funds for surveys and plans for urban renewal projects which may be assisted under this title shall be made unless the governing body of the locality involved has by resolution or ordinance approved the undertaking of such surveys and plans and the submission by the local public agency of an application for such advance of funds.'

"SEC. 305. Subsection (a) of section 103 of said Act, as amended, is hereby amended to read as follows:

"'(a) The Administrator may make capital grants to local public agencies in accordance with the provisions of this title for urban renewal projects: *Provided*, That the Administrator shall not make any contract for capital grant with respect to a project which consists of open land. The aggregate of such capital grants with respect to all the projects of a local public agency on which contracts for capital grants have been made under this title shall not exceed two-thirds of the aggregate of the net project costs of such projects, and the capital grant with respect to any individual project shall not exceed the difference between the net project cost and the local grants-in-aid actually made with respect to the project.'

"SEC. 306. Section 104 of said Act, as amended, is hereby amended by striking 'section 110 (f) of land' and inserting 'section 110 (f) of the property'.

"SEC. 307. Section 105 of said Act as amended, is hereby amended—

"(1) by striking 'Contracts for financial aid' and inserting 'Contracts for loans or capital grants';

"(2) by amending subsections (a) and (b) to read as follows:

"'(a) The urban renewal plan (including any redevelopment plan constituting a part thereof) for the urban renewal area be approved by the governing body of the locality in which the project is situated, and that such approval include findings by the governing body that (i) the financial aid to be provided in the contract is necessary to enable the project to be undertaken in accordance with the urban renewal plan; (ii) the urban renewal plan will afford maximum opportunity, consistent with the sound needs of the locality as a whole, for the rehabilitation or redevelopment of the urban renewal area by private enterprise; and (iii) the urban renewal plan conforms to a general plan for the development of the locality as a whole;

"'(b) When real property acquired or held by the local public agency in connection with the project is sold or leased, the purchasers or lessees and their assignees shall be obligated (i) to devote such property to the uses specified in the urban renewal plan for the project area; (ii) to begin within a reasonable time any improvements on such property required by the urban renewal plan; and (iii) to comply with such other conditions as the Administrator finds, prior to the execution of the contract for loan or capital grant pursuant to this title, are necessary to carry out the purposes of this title: *Provided*, That clause (ii) of this subsection shall not apply to mortgagees and others who acquire an interest in such property as the result of the enforcement of any lien or claim thereon; ';

"(3) by striking the word 'project' wherever it appears in subsection (c) and inserting the term 'urban renewal'; and

"(4) by striking out the proviso at the end of subsection (c), and substituting a period for the colon preceding said proviso.

"SEC. 308. Section 106 of said Act, as amended, is hereby amended by inserting the following proviso before the period at the end of subsection (b): ': *Provided*, That necessary expenses of inspections and audits, and of providing representatives at the site, of projects being planned or undertaken by local public agencies pursuant to this title shall be compensated by such agencies by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and such expenses shall be considered nonadministrative; and for the purpose of providing such inspections and audits and of providing representatives at the sites, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such local public agencies or the Administrator, and credit such amounts to the appropriations or funds against which such charges have been made'.

"SEC. 309. Section 107 of said Act, as amended, is hereby amended by striking out the words 'redevelopment plan' and inserting 'urban renewal plan'.

"SEC. 310. Section 109 of said Act, as amended, is hereby amended to read as follows:

"'SEC. 109. In order to protect labor standards—

"'(a) any contract for loan or capital grant pursuant to this title shall contain a provision requiring that not less than the salaries prevailing in the locality, as determined or adopted (subsequent to a determination under applicable State or local law) by the Administrator, shall be paid to all architects, technical engineers, draftsmen, and technicians employed in the development of the project involved and shall also contain a provision that not less than the wages prevailing in the locality, as predetermined by the Secretary of Labor pursuant to the Davis-Bacon Act (49 Stat. 1011), shall be paid to all laborers and mechanics, except such laborers or mechanics who are employees of municipalities or other local public bodies, employed in the development of the project involved for work financed in whole or in part with funds made available pursuant to this title; and the Administrator shall require certification as to compliance with the provisions of this paragraph prior to making any payment under such contract; and

"'(b) the provisions of title 18, United States Code, section 874, and of title 40, United States Code, section 276c, shall apply to work financed in whole or in part with funds made available for the development of a project pursuant to this title.'.

"SEC. 311. Section 110 of said Act, as amended, is hereby amended to read as follows:

"'SEC. 110. The following terms shall have the meanings, respectively, ascribed to them below, and, unless the context clearly indicates otherwise, shall include the plural as well as the singular number:

"'(a) "Urban renewal area" means a slum area or a blighted, deteriorated, or deteriorating area in the locality involved which the Administrator approves as appropriate for an urban renewal project.

"'(b) "Urban renewal plan" means a plan, as it exists from time to time, for an urban renewal project, which plan (1) shall conform to the general plan of the locality as a whole and to the workable program referred to in section 101 hereof; (2) shall be sufficiently complete to indicate such land acquisition, demolition and removal of structures, redevelopment, improvements, and rehabilitation as may be proposed to be carried out in the urban renewal area, zoning and planning changes, if any, land uses, maximum densities, building requirements, and the plan's relationship to definite local objectives respecting appropriate land uses, improved traffic, public transportation, public utilities, recreational and community facilities, and other public improvements; and (3) shall include, for any part of the urban renewal area proposed to be acquired and redeveloped in accordance with clause (1) of the second sentence of subsection (c) of this section, a redevelopment plan approved by the governing body of the locality.

"'(c) "Urban renewal project" or "project" may include undertakings and activities of a local public agency in an urban renewal area for the elimination and for the prevention of the development or spread of slums and blight, and may involve slum clearance and redevelopment in an urban renewal area, or rehabilitation or conservation in an urban renewal area, or any combination or part thereof, in accordance with such urban renewal plan. For the purposes of this subsection, "slum clearance and redevelopment" may include (1) acquisition of (i) a slum area or a deteriorated or deteriorating area, or (ii) land which is predominantly open and which because of obsolete platting, diversity of ownership, deterioration of structures or of site improvements, or otherwise, substantially impairs or arrests the sound growth of the community, or (iii) open land necessary for sound community growth which is to be developed for predominantly residential uses: *Provided*, That the requirement in paragraph (a) of this section that the area be a slum area or a blighted, deteriorated, or deteriorating area shall not be applicable in the case of an open land project: *And provided further*, That financial assistance shall not be extended under this title for any project involving slum clearance and redevelopment of an area which is not clearly predominantly residential in character unless such area is to be redeveloped for predominantly residential uses, except that, where such an area which is not predominantly residential in character contains a substantial number of slum, blighted, deteriorated, or deteriorating dwellings or other living accommodations, the elimination of which would tend to promote the public health, safety and welfare in the locality involved and such area is not appropriate for redevelopment for predominantly residential uses, the Administrator may extend financial assistance for such a project, but the aggregate of the capital grants made pursuant to this title with respect to such projects shall not exceed 10 percentum of the total amount of capital grants authorized by this title; (2) demolition and removal of buildings and improvements; (3) installation, construction, or reconstruction of streets, utilities, parks, playgrounds, and other improvements necessary for carrying out in the area the urban renewal objectives of this title in accordance with the urban renewal plan; and (4) making the land available for development or redevelopment by private enterprise or public agencies (including sale, initial leasing, or retention by the local public agency itself) at its fair value for uses in accordance with the urban renewal plan. For the purposes of this subsection, "rehabilitation" or "conservation" may include the restoration and renewal of a blighted, deteriorated, or deteriorating area by (1) carrying out plans for a program of voluntary repair and rehabilitation of buildings or other improvements in accordance with the urban renewal plan; (2) acquisition of real property and demolition or removal of buildings and improvements thereon where necessary to eliminate unhealthful, insanitary or unsafe conditions, lessen density, eliminate obsolete or other uses detrimental to the public welfare, or to otherwise remove or prevent the spread of blight or deterioration, or to provide land for needed public facilities; (3) installation, construction, or reconstruction, of such improvements as are described in clause (3) of the preceding sentence; and (4) the disposition of any property acquired in such urban renewal area (including sale, initial leasing, or retention by the local public agency itself) at its fair value for uses in accordance with the urban renewal plan.

"'For the purposes of this title, the term "project" shall not include the construction or improvement of any building, and the term "redevelopment" and derivatives thereof shall mean development as well as redevelopment. For any of the purposes of section 109 hereof, the term "project" shall not include any donations or provisions made as local grants-in-aid and eligible as such pursuant to clauses (2) and (3) of section 110 (d) hereof.

"'(d) "Local grants-in-aid" shall mean assistance by a State, municipality, or other public body, or (in the case of cash grants or donations of land or other real property) any other entity, in connection with any project on which a contract for capital grant has been made under this title, in the form of (1) cash grants; (2) donations, at cash value, of land or other real property (exclusive of land in streets, alleys, and other public rights-of-way which may be vacated in connection with the project) in the urban renewal area, and demolition, removal, or other work or improvements in the urban renewal area, at the cost thereof, of the types described in clause (2) and clause (3) of either the second or third sentence of section 110 (c); and (3) the provision, at their cost, of public buildings or other public facilities (other than publicly owned housing, public facilities financed by special assessements against land in the project area, and revenue producing public utilities the capital cost of which is wholly financed with local bonds or obligations payable solely out of revenues derived from service charges) which are necessary for carrying out in the area the urban renewal objectives of this title in accordance with the urban renewal plan: *Provided*, That in any case where, in the determination of the Administrator, any park, playground, public building, or other public facility is of direct benefit both to the urban renewal area and to other areas, and the approximate degree of the benefit to such other areas is estimated by the Administrator at 20 per centum or more of the total benefits, the Administrator shall provide that, for the purpose of computing the amount of the local grants-in-aid for the project, there shall be included only such portion of the cost of such facility as the Administrator estimates to be proportionate to the approximate degree of the benefit of such facility to the urban renewal area: *And provided further*, That for the purpose of computing the amount of local grants-in-aid under this section 110 (d), the estimated cost (as determined by the Administrator) of parks, playgrounds, public buildings, or other public facilities may be deemed to be the actual cost thereof if (i) the construction or provision thereof is not completed at the time of final disposition of land in the project to be acquired and disposed of under the urban renewal plan, and (ii) the Administrator has received assurances satisfactory to him that such park, playground, public building, or other public facility will be constructed or completed when needed and within a time prescribed by him. With respect to any demolition or removal work, improvement or facility for which a State, municipality, or other public body has received or has contracted to receive any grant or subsidy from the United States, or any agency or instrumentality thereof, the portion of the cost thereof defrayed or estimated by the Administrator to be defrayed with such subsidy or grant shall not be eligible for inclusion as a local grant-in-aid.

"'(e) "Gross project cost" shall comprise (1) the amount of the expenditures by the local public agency with respect to any and all undertakings necessary to carry out the project (including the payment of carrying charges, but not beyond the point where the project is completed), and (2) the amount of such local grants-in-aid as are furnished in forms other than cash.

"'(f) "Net project cost" shall mean the difference between the gross project cost and the aggregate of (1) the total sales prices of all land or other property sold, and (2) the total capital values (i) imputed, on a basis approved by the Administrator, to all land or other property leased, and (ii) used as a basis for determining the amounts to be transferred to the project from other funds of the local public agency to compensate for any land or other property retained by it for use in accordance with the urban renewal plan.

"'(g) "Going Federal rate" means (with respect to any contract for a loan or advance entered into after the first annual rate has been specified as provided in this sentence) the annual rate of interest which the Secretary of the Treasury shall specify as applicable to the six-month period (beginning with the six-month period ending December 31, 1953) during which the contract for loan or advance is approved by the Administrator, which applicable rate for each six-month period shall be determined by the Secretary of the Treasury by estimating the average yield to maturity, on the basis of daily closing market bid quotations or prices during the month of May or the month of November, as the case may be, next preceding such six-month period, on all outstanding marketable obligations of the United States having a maturity date of fifteen or more years from the first day of such month of May or November, and by adjusting such estimated average annual yield to the nearest one-eighth of 1 per centum. Any contract for loan made may be revised or superseded by a later contract, so that the going Federal rate, on the basis of which the interest rate on the loan is fixed, shall mean the going Federal rate, as herein defined, on the date that such contract is revised or superseded by such later contract.

"'(h) "Local public agency" means any State, county, municipality, or other governmental entity or public body, or two or more such entities or bodies, authorized to undertake the project for which assistance is sought, "State" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the Territories and possessions of the United States.

"'(i) "Land" means any real property, including improved or unimproved land, structures, improvements, easements, incorporeal hereditaments, estates, and other rights in land, legal or equitable.

"'(j) "Administrator" means the Housing and Home Finance Administrator.'

"SEC. 312. Notwithstanding the amendments of this title to title I of the Housing Act of 1949, as amended, the Administrator, with respect to any project covered by any Federal aid contract executed, or prior approval granted, by him under said title I before the effective date of this Act, upon request of the local public agency, shall continue to extend financial assistance for the completion of such project in accordance with the provisions of said title I in force immediately prior to the effective date of this Act.

"SEC. 313. The provisos with respect to the appropriation for capital grants for slum clearance and urban redevelopment contained in title I of the First Independent Offices Appropriation Act, 1954 (Public Law 176, Eighty-third Congress) and in title I of the Independent Offices Appropriation Act, 1955 (Public Law 428, Eighty-third Congress) are hereby repealed.

"SEC. 314. The Housing and Home Finance Administrator is authorized to make grants, subject to such terms and conditions as he shall prescribe, to public bodies, including cities and other political subdivisions, to assist them in developing, testing, and reporting methods and techniques, and carrying out demonstrations and other activities for the prevention and the elimination of slums and urban blight. No such grant shall exceed two-thirds of the cost, as determined or estimated by said Administrator, of such activities or undertakings. In administering this section, said Administrator shall give preference to those undertakings which in his judgment can reasonably be expected to (1)

contribute most significantly to the improvement of methods and techniques for the elimination and prevention of slums and blight, and (2) best serve to guide renewal programs in other communities. Said Administrator may make advance or progress payments on account of any grant contracted to be made pursuant to this section, notwithstanding the provisions of section 3648 of the Revised Statutes, as amended. The aggregate amount of grants made under this section shall not exceed $5,000,000 and shall be payable from the capital grant funds provided under and authorized by section 103 (b) of the Housing Act of 1949, as amended.

"SEC. 315. Section 19 of the District of Columbia Redevelopment Act of 1945, as amended, is hereby amended by striking '$2,000' in subsection (a) and subsection (b) and inserting in each instance '$2,500 unless insured as provided in title I of the National Housing Act, as amended.'

"SEC. 316. Section 20 of the District of Columbia Redevelopment Act of 1945, as amended, is hereby amended—

"(1) by striking '1949' wherever it appears in said section and inserting '1949, as amended': *Provided*, That this clause (1) shall not limit or restrict any authority under said section 20; and

"(2) by adding the following new subsections at the end of said section:

"'(i) In addition to its authority under any other provision of this Act, the Agency is hereby authorized to plan and undertake urban renewal projects (as such projects are defined in title I of the Housing Act of 1949, as amended), and in connection therewith the Agency, the District Commissioners, the National Capital Planning Commission, and the other appropriate agencies operating within the District of Columbia shall have all of the rights and powers which they have with respect to a project or projects financed in accordance with the preceding subsections of this section: *Provided*, That for the purpose of this subsection the word "redevelopment" wherever found in this Act (except in section 3 (n)) shall mean "urban renewal", and the references in section 6 to the acquisition, disposition, or assembly of real property for a project shall mean the undertaking of an urban renewal project.

"'(j) The District Commissioners are hereby authorized to prepare a workable program as prescribed by section 101 (c) of the Housing Act of 1949, as amended, and are also authorized to request the necessary funds for the preparation of said workable program. The Commissioners may request the participation of the Agency in the preparation of said workable program and may include in their annual estimates of appropriations such funds as may be required by the Commissioners or the Agency, or both, for this purpose. The District Commissioners are hereby authorized, with or without reimbursement, to cooperate with the Agency in carrying out urban renewal projects and to utilize for that purpose the facilities and personnel of the District of Columbia under agreement with the Agency.'

"TITLE IV—LOW-RENT PUBLIC HOUSING

"SEC. 401. The United States Housing Act of 1937, as amended, is hereby amended—

"(1) by adding at the end of section 10 the following new subsection:

"'(i) Notwithstanding the provisions of any other law, the Public Housing Administration may, with respect to low-rent housing projects initiated after March 1, 1949, enter into new contracts, agreements, or other arrangements during the fiscal year 1955 for loans and annual contributions pursuant to the United States Housing Act of 1937, as amended, with respect to not exceeding thirty-five thousand additional units: *Provided*, That no such new contract, agreement, or other arrangement shall be made except with respect to low-rent housing projects to be undertaken in a community in which there is being carried out a slum clearance and urban redevelopment project, or a slum clearance and urban renewal project, assisted under title I of the Housing Act of 1949, as amended, and the local governing body of the community undertaking such slum clearance and urban redevelopment project, or slum clearance and urban renewal project, certifies that such low-rent housing project is necessary to assist in meeting the relocation requirements of section 105 (c) of title I of the Housing Act of 1949, as amended: *And provided further*, That the total number of dwelling units in low-rent housing projects covered by such new contracts, agreements, or other arrangements shall not exceed the total number of such dwelling units which the Administrator determines to be needed for the relocation of families to be displaced as a result of Federal, State, or local governmental action in such community.';

"(2) by striking from subsection 10 (g) the words following the colon up to and including the words 'such families' and inserting the following: "First, to families which are to be displaced by any low-rent housing project or by any public slum-clearance, redevelopment or urban renewal project, or through action of a public body or court, either through the enforcement of housing standards or through the demolition, closing, or improvement of dwelling units, or which were so displaced within three years prior to making application to such public housing agency for admission to any low-rent housing: *Provided*, That as among such projects or actions the public housing agency may from time to time extend a prior preference or preferences: *And provided further*, That, as among families within any such preference group';

"(3) by striking the words 'or was to be displaced by another low-rent housing project or by a public slum-clearance or redevelopment project' in clause (ii) of subsection 15 (8) (b) and inserting the following: 'or was to be displaced by any low-rent housing project or by any public slum-clearance, redevelopment or urban renewal project, or through action of a public body or court, either through the enforcement of housing standards or through the demolition, closing, or improvement of a dwelling unit or units'; and

"(4) by striking the words 'not later than five years after March 1, 1949' in subsection 15 (8) (b) and inserting 'not later than March 1, 1959'.

"SEC. 402. Subsection 10 (h) of said Act, as amended, is hereby amended to read as follows:

"'(h) Every contract made pursuant to this Act for annual contributions for any low-rent housing project initiated after March 1, 1949, shall provide that no annual contributions by the Authority shall be made available for such project unless such project is exempt from all real and personal property taxes levied or imposed by the State, city, county, or other political subdivisions, but such contract shall require the public housing agency to make payments in lieu of taxes equal to 10 per centum of the annual shelter rents charged in such project or such lesser amount as (i) is prescribed by State law, or (ii) is agreed to by the local governing body in its agreement for local cooperation with the public housing agency required under subsection 15 (7) (b) (i) of this Act, or (iii) is due to failure of a local public body or bodies other than the public housing agency to perform any obligation under such agreement: *Provided*, That, if at the time such agreement for local cooperation is entered into it appears that such 10 per centum payments in lieu of taxes will not result in a contribution to the project through tax exemption by the State, city, county, or other political subdivisions in which the project is situated of at least 20 per centum of the annual contributions to be paid by the Authority, the amounts of such payments in lieu of taxes shall be limited by the agreement to amounts, if any, which would not reduce the local contribution below such 20 per centum: *Provided further*, That, with respect to any such project which is not exempt from all real and personal property taxes levied or imposed by the State, city, county, or other political subdivisions, such contract shall provide, in lieu of the requirement for tax exemption and payments in lieu of taxes, that no annual contributions by the Authority shall be made available for such project unless and until the State, city, county, or other political subdivisions in which such project is situated shall contribute, in the form of cash or tax remission, an amount equal to the greater of (i) the amount by which the taxes paid with respect to the project exceed 10 per centum of the annual shelter rents charged in such project or (ii) 20 per centum of the annual contributions paid by the Authority (but not in excess of the taxes levied): *And provided further*, That, prior to execution of the contract for annual contributions the public housing agency shall, in the case of a tax-exempt project, notify the governing body of the locality of its estimate of the annual amount of such payments in lieu of taxes and of the amount of taxes which would be levied if the property were privately owned, or, in the case where the project is taxed, its estimate of the annual amount of the local cash contribution, and shall thereafter include the actual amounts in its annual reports. Contracts for annual contributions entered into prior to the effective date of the Housing Act of 1954 may be amended in accordance with the first sentence of this subsection.'

"SEC. 403. Section 10 of said Act, as amended, is hereby amended by adding the following new subsection:

"'(j) Every contract made pursuant to this Act for annual contributions for any low-rent housing project for which no such contract has been entered into prior to the enactment of the Housing Act of 1954 shall provide that—

"'(1) after payment in full of all obligations of the public housing agency in connection with the project for which any annual contributions are pledged, and until the total amount of annual contributions paid by the Authority in respect to such project has been repaid pursuant to the provisions of this subsection, (a) all receipts in connection with the project in excess of expenditures necessary for management, operation, maintenance, or financing, and for reasonable reserves therefor, shall be paid annually to the Authority and to local public bodies which have contributed to the project in the form of tax exemption or otherwise, in proportion to the aggregate contribution which the Authority and such local public bodies have made to the project, and (b) no debt in respect to the project, except for necessary expenditures for the project, shall be incurred by the public housing agency;

"'(2) if, at any time, the project or any part thereof is sold, such sale shall be to the highest responsible bidder after advertising, or at fair market value, and the proceeds of such sale together with any reserves, after application to any outstanding debt of the public housing agency in respect to such project, shall be paid to the Authority and local public bodies as provided in clause 1 (a) of this subsection: *Provided*, That the amounts to be paid to the Authority and the local public bodies shall not exceed their respective total contribution to the project.'.

"SEC. 404. Paragraph (6) of section 16 of said Act, as amended, is hereby repealed.

"SEC. 405. Section 10 of the United States Housing Act of 1937, as amended, is hereby amended by adding the following subsection:

"'(k) All expenditures of appropriations for the payment of annual contributions

shall be subject to audit and final settlement by the Comptroller General of the United States under the provisions of the Budget and Accounting Act of 1921, as amended.'

"SEC. 406. Section 10 of said Act, as amended, is hereby amended by adding the following new subsection:

"'(l) In any community, where it has been determined by resolution or ordinance, or by referendum, that a project shall be liquidated by sale thereof to private ownership, such community may negotiate with the Federal Government with respect to the sale of the project, and the Authority shall agree that sale of the project may be made after public advertisement to the highest bidder upon (1) payment and retirement of all outstanding obligations (together with any interest payable thereon and any premiums prescribed for the redemption of any bonds, notes, or other obligations prior to maturity) in connection with the project, and (2) payment of any proceeds received from the sale of the project in excess of the amounts required to comply with the requirements of the preceding clause numbered (1) to the Authority and to local public bodies in proportion to the aggregate contribution which the Authority and such local public bodies have made to the project.'

"TITLE V—HOME LOAN BANK BOARD

"SEC. 501. The National Housing Act, as amended, is hereby amended—

"(1) by amending section 402 (c) (4) to read as follows:

"'(4) To sue and be sued, complain and defend, in any court of competent jurisdiction in the United States or its Territories or possessions or the Commonwealth of Puerto Rico, and may be served by serving a copy of process on any of its agents or any agent of the Home Loan Bank Board and mailing a copy of such process by registered mail to the Corporation at Washington, District of Columbia.';

"(2) by adding the following new subsection to section 405:

"'(c) No action against the Corporation to enforce a claim for payment of insurance upon an insured account of an insured institution in default shall be brought after the expiration of three years from the date of default unless, within such three-year period, the conservator, receiver, or other legal custodian of the insured institution shall have recognized such insured account as a valid claim against the insured institution and the claim for payment of insurance shall have been presented to the Corporation and its validity denied, in which event the action may be brought within two years from the date of such denial.'; and

"(3) by striking the first four sentences of section 407 and inserting the following: 'Any insured institution other than a Federal savings and loan association may terminate its status as an insured institution by written notice to the Corporation. Whenever in the opinion of the Home Loan Bank Board any insured institution has violated its duty as such or has continued unsafe or unsound practices in conducting the business of such institution, or has knowingly or negligently permitted any of its officers or agents to violate any provision of any law or regulation to which the insured institution is subject, said Board shall first give to the authority having supervision of the institution, if any, a statement with respect to such practices or violations for the purpose of securing the correction thereof and shall give a copy thereof to the institution. In the case of an institution of a State where there is no supervisory authority the statement shall be sent directly to the institution. Unless such correction shall be made within one hundred and twenty days or such shorter period of time as the supervisory authority, if any, shall require, the Home Loan Bank Board, if it shall determine to proceed further, shall give to the institution not less than thirty days' written notice of intention to terminate the status of the institution as an insured institution, and shall fix a time and place for a hearing before the Home Loan Bank Board, a member thereof, or a person designated by the Board. The Home Loan Bank Board shall make written findings. Unless the institution shall appear at the hearing by a duly authorized representative, it shall be deemed to have consented to the termination of its status as an insured institution. If the Home Loan Bank Board shall find that any unsafe or unsound practice or violation specified in such notice has been established and has not been corrected within the time above prescribed in which to make such correction, the Home Loan Bank Board may issue its order terminating the insured status of the institution effective on a date subsequent to such finding and to the expiration of the time specified in such notice of intention. The hearing hereinabove provided for shall be held in accordance with the provisions of the Administrative Procedure Act and shall be subject to review as therein provided and the review by the court shall be upon the weight of the evidence. In the event of the termination of such status, insurance of its accounts to the extent that they were insured on the date of such notice by the institution to the Corporation or such order of termination, less any amounts thereafter withdrawn, repurchased, or redeemed which reduce the insured accounts of an insured member below the amount insured on the date of such notice or order, shall continue for a period of two years, but no investments or deposits made after the date of such notice or order of termination shall be insured. The Corporation shall have the right to examine such institution from time to time during the two-year period aforesaid. Such insured institution shall be obligated to pay, within thirty days after any such notice or order of termination, as a final insurance premium, a sum equivalent to twice the last annual insurance premium paid by it.'

"SEC. 502. The Federal Home Loan Bank Act, as amended, is hereby amended by striking '$20,000' in section 10 (b) (2) and inserting '$35,000.'

"SEC. 503. The Home Owners' Loan Act of 1933, as amended, is hereby amended—

"(1) by striking '$20,000' wherever it appears in the first paragraph of subsection (c) of section 5 and inserting '$35,000';

"(2) by amending subsection (d) of section 5 to read as follows:

"'(d) (1) The Board shall have power to enforce this section and rules and regulations made hereunder. In the enforcement of any provision of this section or rules and regulations made hereunder, or any other law or regulation, and in the administration of conservatorships and receiverships as provided in subsection (d) (2) hereof, the Board is authorized to act in its own name and through its own attorneys. The Board shall have power to sue and be sued, complain and defend in any court of competent jurisdiction in the United States or its territories or possessions or the Commonwealth of Puerto Rico. It shall by formal resolution state any alleged violation of law or regulation and give written notice to the association concerned of the facts alleged to be such violation, except that the appointment of a Supervisory Representative in Charge, a conservator or a receiver shall be exclusively as provided in subsection (d) (2) hereof. Such association shall have thirty days within which to correct the alleged violation of law or regulation and to perform any legal duty. If the association concerned does not comply with the law or regulation within such period, then the Board shall give such association twenty days' written notice of the charges against it and of a time and place at which the Board will conduct a hearing as to such alleged violation of duty. Such hearing shall be in the Federal judicial district of the association unless it consents to another place and shall be conducted by a hearing examiner as is provided by the Administrative Procedure Act. The Board or any member thereof or its designated representative shall have power to administer oaths and affirmations and shall have power to issue subpenas and subpenas duces tecum, and shall issue such at the request of any interested party, and the Board or any interested party may apply to the United States district court of the district where such hearing is designated for the enforcement of such subpena or subpena duces tecum and such courts shall have power to order and require compliance therewith. A record shall be made of such hearing and any interested party shall be entitled to a copy of such record to be furnished by the Board at its reasonable cost. After such hearing and adjudication by the Board, appeals shall lie as is provided by the Administrative Procedure Act, and the review by the court shall be upon the weight of the evidence. Upon the giving of notice of alleged violation of law or regulation as herein provided, either the Board or the association affected may, within thirty days after the service of said notice, apply to the United States district court for the district where the association is located for a declaratory judgment and an injunction or other relief with respect to such controversy, and said court shall have jurisdiction to adjudicate the same as in other cases and to enforce its orders. The Board may apply to the United States district court of the district where the association affected has its home office for the enforcement of any order of the Board and such court shall have power to enforce any such order which has become final. The Board shall be subject to suit by any Federal savings and loan association with respect to any matter under this section or regulations made thereunder, or any other law or regulation, in the United States district court for the district where the home office of such association is located, and may be served by serving a copy of process on any of its agents and mailing a copy of such process by registered mail, to the Home Loan Bank Board, Washington, District of Columbia.

"'(2) The grounds for the appointment of a conservator or receiver for a Federal savings and loan association shall be one or more of the following: (i) insolvency in that the assets of such association are less than its obligations to its creditors and others, including its members; (ii) violation of law or of a regulation; (iii) the concealment of its books, records, or assets or the refusal to submit its books, papers, records, or affairs for inspection to any examiner or lawful agent appointed by the Home Loan Bank Board; and (iv) unsafe or unsound operation. The Board shall have exclusive jurisdiction to appoint a Supervisory Representative in Charge, conservator, or receiver. If, in the opinion of the Board, a ground for the appointment of a conservator or receiver as herein provided exists and the Board determines that an emergency exists requiring immediate action, the Board is authorized to appoint ex parte and without notice a Supervisory Representative in Charge to take charge of said association and its affairs who shall have and exercise all the powers herein provided for conservators and receivers. Unless sooner removed by the Board, such Supervisory Representative in Charge shall hold office until a conservator or receiver, appointed by the Board after notice as herein provided, takes charge of the association and its affairs, or for six months, or until thirty days after the termination of the administrative hearing and final proceedings herein provided, or until sixty days after the final termination of any litigation affecting such temporary appointment, whichever is longest. The Board shall have the power to appoint a conservator or receiver but no such

appointment of a conservator or receiver shall be made except pursuant to a formal resolution of the Board stating the grounds therefor and except notice thereof is given to said association stating the grounds therefor and until an opportunity for an administrative hearing thereon is afforded to said association. Such hearing shall be held in accordance with the provisions of the Administrative Procedure Act and shall be subject to review as therein provided and the review by the court shall be upon the weight of the evidence. A conservator shall have all the powers of the members, the directors, and officers of the Federal association and shall be authorized to operate it in its own name or conserve its assets in the manner and to the extent authorized by the Board. The Board shall appoint only the Federal Savings and Loan Insurance Corporation as receiver for any Federal savings and loan association, which shall have power as receiver to buy at its own sale subject to approval by the Board. With the consent of the association expressed by a resolution of the board of directors or of its members, the Board is authorized to appoint a conservator or receiver for a Federal association without notice and without hearing. The Board shall have power to make rules and regulations for the reorganization, merger, and liquidation of Federal associations and for such associations in conservatorship and receivership and for the conduct of conservatorships and receiverships. Whenever a Supervisory Representative in Charge, conservator, or receiver, appointed by the Board pursuant to the provisions of this section, demands possession of the property, business and assets of any association, the refusal of any officer, agent, employee, or director of such association to comply with the demand shall be punishable by a fine of not more than $1,000 or by imprisonment for not more than one year or both by such fine and imprisonment.'; and

"(3) by striking out the second paragraph of subsection (c) of section 5 and inserting in lieu thereof the following new paragraph:

"'Without regard to any other provision of this subsection except the area requirement such associations are authorized to invest a sum not in excess of 15 per centum of the assets of such association in loans insured under title I of the National Housing Act, as amended, in unsecured loans insured or guaranteed under the provisions of the Servicemen's Readjustment Act of 1944, as amended, and in other loans for property alteration, repair, or improvement: *Provided*, That no such loan shall be made in excess of $2,500.'

"TITLE VI—VOLUNTARY HOME MORTGAGE CREDIT PROGRAM

"Declaration of policy

"SEC. 601. It is declared to be the policy of Congress—

"(a) to seek the constant improvement of the living conditions of all the people under a strong, free, competitive economy, and to take such action as will facilitate the operation of that economy to provide adequate housing for all the people and to meet the demands for new building;

"(b) to provide a means of financing housing within the framework of our private enterprise system and without vast expenditures of public moneys;

"(c) to encourage and facilitate the flow of funds for housing credit into remote areas and small communities, where such funds are not available in adequate supply; and

"(d) to assist in the development of a program consonant with sound underwriting principles, whereby private financing institutions engaged in mortgage lending can make a maximum contribution to the economic stability and growth of the Nation through extension of the market for insured or guaranteed mortgage loans.

"Definitions

"SEC. 602. As used in this title, the following terms shall have the meanings respectively ascribed to them below, and, unless the context clearly indicates otherwise, shall include the plural as well as the singular number:

"(a) 'Insured or guaranteed mortgage loan' means any loan made for the construction or purchase of a family dwelling or dwellings and which is (1) guaranteed or insured under the Servicemen's Readjustment Act of 1944, as amended, or (2) secured by a mortgage insured under the National Housing Act, as amended.

"(b) 'Private financing institutions' means life-insurance companies, savings banks, commercial banks, savings and loan associations (including cooperative banks, homestead association, and building and loan associations), and mortgage companies.

"(c) 'Administrator' means the Housing and Home Finance Administrator.

"(d) 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the Territories and possessions of the United States.

"National Voluntary Mortgage Credit Extension Committee

"SEC. 603. There is hereby established a National Voluntary Mortgage Credit Extension Committee, hereinafter called the 'National Committee', which shall consist of the Housing and Home Finance Administrator, who shall act as Chairman of the National Committee, and fourteen other persons appointed by the Administrator as follows:

"(a) Two representatives of each type of private financing institutions;

"(b) Two representatives of builders of residential properties; and

"(c) Two representatives of real estate boards.

"The Administrator shall also request the Board of Governors of the Federal Reserve System to designate a representative of the Board to serve on the National Committee in an advisory capacity.

"The Administrator shall also request the Administrator of Veterans' Affairs to designate a representative to serve on the National Committee in an advisory capacity.

"The Administrator shall also request the Home Loan Bank Board to designate a representative of the Board to serve on the National Committee in an advisory capacity.

"In selecting and appointing the members of the National Committee, the Administrator shall have due regard to fair representation thereon for small, medium, and large private financing institutions and for different geographical areas. Members of the National Committee appointed by the Administrator shall serve on a voluntary basis.

"Regional subcommittees

"SEC. 604. (a) As soon as practicable, the National Committee shall divide the United States into regions conforming generally to the Federal Reserve districts. The Administrator, after consultation with the other members of the National Committee, shall, for each such region, designate five or more persons representing private financing institutions and builders of residential properties in such region to serve as a regional subcommittee of the National Committee for the purpose of assisting in placing with private financing institutions insured or guaranteed mortgage loans as hereinafter set forth. In designating the members of each such regional subcommittee, the Administrator shall have due regard to fair representation thereon for small, medium, and large financing institutions and builders of residential properties and for different geographical areas within such regions. Members of each regional subcommittee shall serve on a voluntary basis.

"(b) The Administrator is authorized and directed, upon the request of a regional subcommittee, to provide such subcommittee with a suitable office and meeting place and to furnish to the subcommittee such staff assistance as may be reasonably necessary for the purpose of assisting it in the performance of the functions hereinafter set forth. In complying with these requirements, the Administrator may act through and may utilize the services of the several Federal home-loan banks.

"Function of National Committee and of regional subcommittees

"SEC. 605. It shall be the function of the National Committee and the regional subcommittees to facilitate the flow of funds for residential mortgage loans into areas or communities where there may be a shortage of local capital for, or inadequate facilities for access to, such loans, and to achieve the maximum utilization of the facilities of private financing institutions for this purpose by soliciting and obtaining the cooperation of all such private financing institutions in extending credit for insured or guaranteed mortgage loans wherever consistent with sound underwriting principles.

"SEC. 606. The National Committee shall study and review the demand and supply of funds for residential mortgage loans in all parts of the country, and shall receive reports from and correlate the activities of the regional subcommittees. It shall also periodically inform the Commissioner of the Federal Housing Administration and the Administrator of Veterans' Affairs concerning the results of the studies and of the progress of the National Committee and regional subcommittees in performing their function, and shall to the extent practicable maintain liaison with State and local Government housing officials in order that they may be fully apprized of the function and work of the National Committee and regional subcommittees. The Administrator shall, not later than April 1 in each year, make a full report of the operations of the National Committee and the regional subcommittees to the Congress.

"SEC. 607. (a) Each regional subcommittee shall study and review the demand and supply of funds for residential mortgage loans in its region, shall analyze cases of unsatisfied demand for mortgage credit, and shall report to the National Committee the results of its study and analysis. It shall also maintain liaison with officers of the Federal Housing Administration and of the Veterans' Administration within its region in order that such officers may be fully apprized of the function and work of the National Committee and regional subcommittees. It shall request such officers to supply to the subcommittee information regarding cases of unsatisfied demand for mortgage credit for loans eligible for insurance under the National Housing Act, as amended, or for insurance or guaranty under the Servicemen's Readjustment Act of 1944, as amended. Such officers are authorized to furnish such information to such subcommittee.

"(b) A regional subcommittee shall render assistance to any applicant for a loan, the proceeds of which are to be used for the construction or purchase of a family dwelling or dwellings, upon receipt of a certificate from such applicant, stating that—

"(1) application for such loan has been made to at least two private financing institutions, or in the alternative to such private financing institution or institutions as may be reasonably accessible to the applicant;

"(2) the applicant has been informed by the above-mentioned private financing institution or institutions that funds for mortgage credit on the loan are unavailable; and

"(3) the applicant is eligible for insurance or guaranty under the Servicemen's Readjustment Act of 1944, as amended, or consents that the mortgage to be issued as

security for the loan be insured under the National Housing Act, as amended.

Upon receipt of such certification from an applicant the regional subcommittee shall circularize private financing institutions in the region or elsewhere and shall use its best efforts to enable the applicant to place the loan with a private financing institution. It shall render similar assistance to any applicant for a loan, the proceeds of which are to be used for the construction or purchase of a family dwelling or dwellings, upon receipt of information from the Veterans' Administration to the effect that the applicant has applied for a direct loan, if he is eligible for such a loan, and that he is eligible for insurance or guaranty, under the Servicemen's Readjustment Act of 1944, as amended. In order to encourage small or local private financing institutions to originate insured or guaranteed mortgage loans, it may also render similar assistance to private financing institutions in locating other private financing institutions willing to repurchase such mortgage loans on a mutually satisfactory basis.

"(c) In the performance of its responsibilities under subsection (b) of this section, a regional subcommittee may at its discretion (1) request the National Committee to obtain for it the aid of other regional subcommittees in seeking sources of mortgage credit, and (2) request and obtain voluntary assurances from any one or more private financing institutions that they will make funds available for insured or guaranteed mortgage loans in any specified area or areas within its region in which the subcommittee finds that there is a lack of adequate credit facilities for such loans.

"Regulations of Administrator

"SEC. 608. The Administrator, after consultation with the National Committee, shall have power to issue general rules and procedures for the effective implementation of this title and for the functioning of the regional subcommittees, pursuant to the provisions hereof and not in conflict herewith.

"General provisions

"SEC. 609. No act pursuant to the provisions of this title and which occurs while this title is in effect shall be construed to be within the prohibitions of the antitrust laws or the Federal Trade Commission Act of the United States. Service as a member of the National Committee or of any regional subcommittee is not to be construed as holding any office or employment with the Government of the United States. The Administrator is authorized and directed, upon the request of the National Committee, to provide such Committee with a suitable office and meeting place and to furnish to the Committee such staff assistance as may be reasonably necessary for the purpose of assisting it in the performance of the functions of such Committee. Funds available to the Administrator for administrative expenses shall be available for all expenses necessary in carrying out the provisions of this title, including expenses of persons serving as members of any committee or subcommittee established pursuant to this title for communications, transportation, and not to exceed $25 per diem in lieu of subsistence when away from their homes or regular places of business in connection with the business of such committee or subcommittee.

"SEC. 610. (a) This title and all authority conferred hereunder shall terminate at the close of June 30, 1957.

"(b) Notwithstanding subsection (a), Congress, by concurrent resolution, may terminate this title prior to the termination date hereinabove provided for.

"TITLE VII—URBAN PLANNING AND RESERVE OF PLANNED PUBLIC WORKS

"Urban planning

"SEC. 701. To facilitate urban planning for smaller communities lacking adequate planning resources, the Administrator is authorized to make planning grants to State planning agencies for the provision of planning assistance (including surveys, land use studies, urban renewal plans, technical services and other planning work, but excluding plans for specific public works) to cities and other municipalities having a population of less than 25,000 according to the latest decennial census. The Administrator is further authorized to make planning grants for similar planning work in metropolitan and regional areas to official State, metropolitan, or regional planning agencies empowered under State or local laws to perform such planning. Any grant made under this section shall not exceed 50 per centum of the estimated cost of the work for which the grant is made and shall be subject to terms and conditions prescribed by the Administrator to carry out this section. The Administrator is authorized, notwithstanding the provisions of section 3648 of the Revised Statutes, as amended, to make advance or progress payments on account of any planning grant made under this section. There is hereby authorized to be appropriated not exceeding $5,000,000 to carry out the purposes of this section, and any amounts so appropriated shall remain available until expended.

"Reserve of planned public works

"SEC. 702. (a) In order (1) to encourage municipalities and other public agencies to maintain a continuing and adequate reserve of planned public works the construction of which can rapidly be commenced whenever the economic situation may make such action desirable, and (2) to attain maximum economy and efficiency in the planning and construction of local, State, and Federal public works, the Administrator is hereby authorized, during the period of three years commencing on July 1, 1954, to make advances to public agencies from funds available under this section (notwithstanding the provisions of section 3648 of the Revised Statutes, as amended) to aid in financing the cost of engineering and architectural surveys, designs, plans, working drawings, specifications, or other action preliminary to and in preparation for the construction of public works: *Provided*, That the making of advances hereunder shall not in any way commit the Congress to appropriate funds to assist in financing the construction of any public works so planned.

"(b) No advance shall be made hereunder with respect to any individual project unless it conforms to an overall State, local, or regional plan approved by a competent State, local, or regional authority, and unless the public agency formally contracts with the Federal Government to complete the plan preparation promptly and to repay such advance when due. Subsequent to approval and prior to disbursement of any Federal funds for the purpose of advance planning, the applicant shall establish a separate planning account into which all Federal and applicant funds estimated to be required for plan preparation shall be placed.

"(c) Advances under this section to any public agency shall be repaid without interest by such agency when the construction of the public works is undertaken or started: *Provided*, That in the event repayment is not made promptly such unpaid sum shall bear interest at the rate of 4 per centum per annum from the date of the Government's demand for repayment to the date of payment thereof by the public agency. All sums so repaid shall be covered into the Treasury as miscellaneous receipts.

"(d) The Administrator is authorized to prescribe rules and regulations to carry out the purposes of this section.

"(e) There is hereby authorized to be appropriated not exceeding $10,000,000 to carry out the purposes of this section, and any amounts so appropriated shall remain available until expended: *Provided*, That not to exceed 1 per centum of the funds appropriated under this section may be used for the purpose of surveying the status and current volume of advanced public works planning among the several States and their subdivisions, such surveys to be carried out by the Administrator in cooperation with the Council of Economic Advisers in the Executive Office of the President. Not more than 5 per centum of the funds so appropriated shall be expended in any one State.

"Definitions

"SEC. 703. As used in this title, (1) the term 'State' shall mean any State, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States; (2) the term 'Administrator' shall mean the Housing and Home Finance Administrator; (3) the term 'public works' shall include any public works other than housing; and (4) the term 'public agency' or 'public agencies' shall mean any State, as herein defined, or any public agency or political subdivision therein.

"TITLE VIII—MISCELLANEOUS PROVISIONS

"SEC. 801. (a) The Federal Housing Commissioner and the Administrator of Veterans' Affairs, respectively, are hereby authorized and directed to require that, in connection with any property upon which there is located a dwelling designed principally for not more than a four-family residence and which is approved for mortgage insurance or guaranty prior to the beginning of construction, the seller or builder, and such other person as may be required by the said Commissioner or Administrator to become warrantor, shall deliver to the purchaser or owner of such property a warranty that the dwelling is constructed in substantial conformity with the plans and specifications (including any amendments thereof, or changes and variations therein, which have been approved in writing by the Federal Housing Commissioner or the Administrator of Veterans' Affairs) on which the Federal Housing Commissioner or the Administrator of Veterans' Affairs based his valuation of the dwelling: *Provided*, That the Federal Housing Commissioner or the Administrator of Veterans' Affairs shall deliver to the builder, seller, or other warrantor his written approval (which shall be conclusive evidence of such approval) of any amendment of, or change or variation in, such plans and specifications which the Commissioner or the Administrator deems to be a substantial amendment thereof, or change or variation therein, and shall file a copy of such written approval with such plans and specifications: *Provided further*, That such warranty shall apply only with respect to such instances of substantial nonconformity to such approved plans and specifications (including any amendments thereof, or changes or variations therein, which have been approved in writing, as provided herein, by the Federal Housing Commissioner or the Administrator of Veterans' Affairs) as to which the purchaser or homeowner has given written notice to the warrantor within one year from the date of conveyance of title to, or initial occupancy of, the dwelling, whichever first occurs: *Provided further*, That such warranty shall be in addition to, and not in derogation of, all other rights and privileges which such purchaser or owner may have under any other law or instrument: *And provided further*, That the provisions of this section shall apply to any such property covered by a mortgage insured or guaranteed by the Federal Housing Commissioner or the Administrator of Veterans' Affairs on and after October 1, 1954, unless such mortgage is insured or guaranteed pursuant to a commitment therefor made prior to October 1, 1954.

"(b) The Federal Housing Commissioner and the Administrator of Veterans' Affairs, respectively, are further directed to permit

copies of the plans and specifications (including written approvals of any amendments thereof, or changes or variations therein, as provided herein) for dwellings in connection with which warranties are required by subsection (a) of this section to be made available in their appropriate local offices for inspection or for copying by any purchaser, homeowner, or warrantor during such hours or periods of time as the said Commissioner and Administrator may determine to be reasonable.

"SEC. 802. (a) The Housing and Home Finance Administrator shall, as soon as practicable during each calendar year, make a report to the President for submission to the Congress on all operations under the jurisdiction of the Housing and Home Finance Agency during the previous calendar year.

"(b) Section 311 of 'An Act to expedite the provision of housing in connection with national defense, and for other purposes', approved October 14, 1940, as amended; section 6 of 'An Act to provide for the advance planning of non-Federal public works', approved October 13, 1949, as amended; and sections 5 and 402 (f) of the National Housing Act, as amended, are hereby repealed.

"(c) The National Housing Act, as amended, is hereby amended—

"(1) by striking the heading 'ANNUAL REPORT' immediately after section 4 and inserting 'TAXATION'; and

"(2) by striking from subsection (e) of section 406 the word 'Congress' and inserting 'Housing and Home Finance Administrator.'

"(d) The first sentence of section 7 (b) of the United States Housing Act of 1937, as amended, is hereby amended to read as follows: "The annual report of the Housing and Home Finance Administrator to the President for submission to the Congress on the operations of the Housing and Home Finance Agency shall include a report on the operations and expenses of the Authority, including loans, contributions, and grants made or contracted for, low-rent housing and slum clearance projects undertaken, and the assets and liabilities of the Authority.'

"(e) Section 106 (a) of the Housing Act of 1949, as amended, is hereby amended by striking '; and' at the end of paragraph (3) thereof, inserting a period in lieu thereof, and striking paragraph (4).

"(f) The Federal Home Loan Bank Act, as amended, is hereby amended by striking the second sentence of section 20.

"SEC. 803. Section 501 (b) of the Servicemen's Readjustment Act of 1944, as amended, is hereby amended to read as follows:

"'(b) Any loan made to a veteran for the purposes specified in subsection (a) of this section 501 may, notwithstanding the provisions of subsection (a) of section 500 of this title relating to the percentage or aggregate amount of loan to be guaranteed, be guaranteed, if otherwise made pursuant to the provisions of this title, in an amount not exceeding 60 per centum of the loan: *Provided*, That the aggregate amount of any guaranties to a veteran under this title shall not exceed $7,500, nor shall any gratuities payable under subsection (c) of section 500 of this title exceed the amount which is payable on loans guaranteed in accordance with the maxima provided for in subsection (a) of section 500 of this title: *And provided further*, That no such loan for the repair, alteration, or improvement of property shall be insured or guaranteed under this Act unless such repair, alteration, or improvement substantially protects or improves the basic livability or utility of the property involved.'

"SEC. 804. Section 108 of the Reconstruction Finance Corporation Liquidation Act (67 Stat. 230) is amended as follows:

"(1) Strike out from subsection (a) thereof the words 'the President, through such officer or agency of the Government (other than the Reconstruction Finance Corporation) as he may designate,' and insert in lieu thereof the words 'the Housing and Home Finance Administrator'.

"(2) Strike out all of subsection (b) and insert in lieu thereof the following:

"'(b) For the purposes of this section, notwithstanding any other provision of law, the Housing and Home Finance Administrator is authorized to obtain from a revolving fund to be established in the Treasury of the United States not to exceed a total of $50,000,000 outstanding at any one time. For this purpose there is hereby authorized to be appropriated to such revolving fund in the Treasury the amount of $50,000,000. Advances from the revolving fund shall be made to the Housing and Home Finance Administrator upon his request, and such advances together with receipts under this section shall be available for all necessary expenses, including administrative expenses, under this section. The Housing and Home Finance Administrator shall pay into the Treasury as miscellaneous receipts, at the close of each fiscal year, interest on the amount of advances outstanding, at a rate determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. As the Housing and Home Finance Administrator repays principal sums advanced from the revolving fund pursuant to this section, such repayments shall be made to the revolving fund.'

"(3) Strike out from subsection (c) thereof the words 'officer or agency designated by the President' and insert in lieu thereof the words 'Housing and Home Finance Administrator'.

"(4) Strike out from subsection (d) thereof '1955' and insert in lieu thereof '1956'.

"SEC. 805. The Act entitled 'An Act to expedite the provision of housing in connection with national defense, and for other purposes', approved October 14, 1940, as amended, is hereby amended—

"(1) by adding the following at the end of section 605 (a):

"'In any city in which, on March 1, 1953, there were more than ten thousand temporary housing units held by the United States of America, or in any two contiguous cities in one of which there were on such date more than ten thousand temporary housing units so held, the Administrator may acquire, by purchase or condemnation, a fee simple title to any lands in which the Administrator holds a leasehold interest, or other interest less than a fee simple, acquired by the Federal Government for national defense or war housing or for veterans' housing where (1) the Administrator finds that the acquisition by him of a fee simple title in the land will expedite the disposal or removal of temporary housing under his jurisdiction by facilitating the availability of improved sites for privately owned housing needed to replace such temporary housing, (2) the city or a local public agency has, in accordance with authority under State law, entered into a firm agreement to purchase the land so acquired at a price determined by the Administrator to be fair, but in no event less than the estimated cost to the Federal Government of acquiring the fee simple title (including an estimated amount to cover legal and overhead expenses of such acquisition) as determined by the Administrator, (3) the city or local public agency has furnished evidence satisfactory to the Administrator that it has or will have funds available to make all agreed-upon payments to the Federal Government and to protect the Federal Government against any loss resulting from the acquisition of fee simple title, (4) the city or local public agency has furnished assurances satisfactory to the Administrator that the land will be made available to private enterprise for development, in accordance with local zoning and other laws, for predominantly residential uses, and (5) the city or local public agency has furnished assurances satisfactory to the Administrator that no individual who is employed by, or is an official of, the government of the city in which the land is located, or any agency thereof, shall be permitted, directly or indirectly, to have any financial interest in the purchase or redevelopment of such land: *Provided*, That such acquisitions by the Administrator pursuant to this sentence shall be limited to not exceeding four hundred and twenty-five acres of land in the general area in which approximately one thousand five hundred units of temporary housing held by the United States of America were unoccupied on said date.';

"(2) by adding the following new subsection at the end of section 607:

"'(g) The Administrator may dispose of any permanent war housing without regard to the preferences in subsections (b) and (c) of this section when he determines that (1) such housing, because of design or lack of amenities, is unsuitable for family dwelling use, or (2) it is being used at the time of disposition for other than dwelling purposes, or (3) it was offered, with preferences substantially similar to those provided in the Housing Act of 1950 (64 Stat. 48), to veterans and occupants prior to enactment of said Act.'; and

"(3) by adding the following new section at the end of title VI:

"'SEC. 613. Upon a certification by the Secretary of the Interior that any surplus housing, classified by the Administrator as demountable, in the area of San Diego, California, is needed to provide dwelling accommodations for members of a tribe of Indians in Riverside County or San Diego County, California, the Administrator is hereby authorized, not withstanding any other provision of law, to transfer and convey such housing without consideration to such tribe, the members thereof, or the Secretary of the Interior in trust therefor, as the Secretary may prescribe: *Provided*, That the term housing as used in this section shall not include land.'

"SEC. 806. Subsection 302 (b) of Public Law 139, 82d Congress, as amended, is hereby amended by striking the second sentence thereof and adding the following:

"'Any temporary housing constructed or acquired under this title which the Administrator determines to be no longer needed for use under this title shall, unless transferred to the Department of Defense pursuant to section 306 hereof, or reported as excess to the Administrator of the General Services Administration pursuant to the Federal Property and Administrative Services Act of 1949, as amended, be sold as soon as practicable to the highest responsible bidder after public advertising, except that if one or more of such bidders is a veteran purchasing a dwelling unit for his own occupancy the sale of such unit shall be made to the highest responsible bidder who is a veteran so purchasing: *Provided*, That the Housing and Home Finance Administrator may reject any bid for less than two-thirds of the appraised value as determined by him: *Provided further*, That the housing may be sold at fair value (as determined by the Housing and Home Finance Administrator) to a public body for public use: *And provided further*, That the housing structures shall be sold for removal from the site, except that they may be sold for use on the site if the governing body of the locality has adopted a resolution approving use of such structures on the site.'

"SEC. 807. Section 601 of the Housing Act of 1949 is hereby amended to read as follows:

"'SEC. 601. The Housing and Home Finance Administrator and the head of each constituent agency of the Housing and Home Finance Agency is hereby authorized to establish such advisory committee or committees as each may deem necessary in carrying

out any of his functions, powers, and duties under this or any other Act or authorization. Service as a member of any such committee shall not constitute any form of service, employment, or action within the provisions of sections 281, 283, 284, or 1914 of title 18, United States Code, or within the provisions of section 190 of the Revised Statutes (5 U. S. C. 99). Persons serving without compensation as members of any such committee may be paid transportation expenses and not to exceed $25 per diem in lieu of subsistence, as authorized by section 5 of the Act of August 2, 1946 (5 U. S. C. 73b-2).'

"SEC. 808. (a) Section 202 of the Act entitled 'An Act relating to the construction of school facilities in areas affected by Federal activities, and for other purposes', approved September 23, 1950, as amended, is hereby amended by adding the following new sentence at the end thereof: 'In any case where such facilities are or have been damaged or destroyed by fire or other casualty after they have become eligible for such transfer but before such transfer has been completed, the head of the Federal department or agency may assign or pay to such local educational agency, solely for use in repairing or reconstructing such facilities, all or any part of any insurance receipts in connection with such casualty which are payable or have been paid in consideration of premiums which such local educational agency has advanced for the benefit of the United States.'

"(b) The third sentence of section 401 (a) of title IV of the Housing Act of 1950, as amended, is hereby amended by striking out the word 'made' and inserting the words 'is approved by the Administrator'.

"SEC. 809. Notwithstanding the provisions of any other law, (1) the Housing and Home Finance Administrator is authorized and directed to sell to the University of California, at fair market value as determined by him, all of the properties, including land, comprising war housing projects CAL-4041 and 4042 known as Canyon Crest Homes located in Riverside County, California; (2) the Public Housing Commissioner is authorized to permit the Housing Authority of the city of Columbia, South Carolina, to sell to the University of South Carolina, at fair market value as determined by him, all of the property, including land, comprising the seventy-four-unit housing project Numbered SC-2-5 known as University Terrace, located in Columbia, South Carolina, and to use, with the approval of the said Commissioner, the proceeds of such sale as a loan for the development of other low-rent housing in the city of Columbia, South Carolina, in replacement of said project Numbered SC-2-5, under terms and conditions which will be satisfactory to the Public Housing Commissioner and which will, in his opinion, protect the interest of the United States, and the annual contributions now contracted for in respect to project Numbered SC-2-5 shall continue to be available and may be contracted for in respect to such other low-rent housing; and (3) the Housing and Home Finance Administrator is authorized and directed to convey, without monetary consideration, to the Housing Authority of Saint Louis County, Missouri, all of the right, title, and interest of the United States in and to the one hundred and fifty-six housing units in public housing project Numbered MO-V-23153.

"SEC. 810. Notwithstanding the provisions of any other law, the Housing and Home Finance Administrator is authorized to sell and convey all right, title and interest of the United States (including any off-site easements) at fair market value as determined by him, in and to war housing project CONN-6029, known as Westfield Heights, containing one hundred and thirty dwelling units on approximately twenty-three and nineteen one-hundredths acres of land in Wethersfield, Connecticut, and CONN-6125, known as Drum Hill Park, containing one hundred and twenty-five dwelling units on approximately fifty-two and thirty-three one-hundredths acres of land in Rocky Hill, Connecticut, to the housing authority of the town of Wethersfield, Connecticut, for use in providing moderate rental housing. Any sale pursuant to this section shall be on such terms and conditions as the Administrator shall determine: *Provided*, That full payment to the United States shall be required within a period of not to exceed thirty years with interest on unpaid balance at not to exceed 5 per centum per annum.

"SEC. 811. The Housing and Home Finance Agency, including its constituent agencies, and any other departments or agencies of the Federal Government having powers, functions, or duties with respect to housing under this or any other law shall exercise such powers, functions, or duties in such manner as, consistent with the requirements thereof, will facilitate progress in the reduction of the vulnerability of congested urban areas to enemy attack.

"SEC. 812. Title V of the Housing Act of 1949, as amended, is hereby amended as follows:

"(a) At the end of the first sentence of section 511 strike '$8,500,000' and insert '$100,000,000'.

"(b) In section 512, strike '$170,000' and insert '$2,000,000'.

"(c) In section 513, strike '$850,000' and insert '$10,000,000'.

"SEC. 813. Section 504 of the Housing Act of 1950, as amended, is hereby repealed.

"Records

"SEC. 814. Every contract between the Housing and Home Finance Agency (or any official or constituent thereof) and any person or local body (including any corporation or public or private agency or body) for a loan, advance, grant, or contribution under the United States Housing Act of 1937, as amended, or the Housing Act of 1949, as amended, shall provide that such person or local body shall keep such records as the Housing and Home Finance Agency (or such official or constituent thereof) shall from time to time prescribe, including records which permit a speedy and effective audit and will fully disclose the amount and the disposition by such person or local body of the proceeds of the loan, advance, grant, or contribution, or any supplement thereto, the capital cost of any construction project for which any such loan, advance, grant, or contribution is made, and the amount of any private or other non-Federal funds used or grants-in-aid made for or in connection with any such project. No mortgage covering new or rehabilitated multifamily housing (as defined in section 227 of the National Housing Act, as amended) shall be insured unless the mortgagor certifies that he will keep such records as are prescribed by the Federal Housing Commissioner at the time of the certification and that they will be kept in such form as to permit a speedy and effective audit. The Housing and Home Finance Agency or any official or constituent agency thereof shall have access to and the right to examine and audit such records. This section shall become effective on the first day after the first full calendar month following the date of approval of the Housing Act of 1954.

"Applicants for assistance required to submit specifications

"SEC. 815. Every contract for a loan, grant, or contribution under the United States Housing Act of 1937, as amended, or title I of the Housing Act of 1949, as amended, for the construction of a project shall require the submission of specifications with respect to such construction prior to the authorization for the award of the construction contract and the submission of data with respect to the acquisition of land prior to the authorization to acquire such land.

"Audits under Public Housing Act of 1937; Comptroller General

"SEC. 816. Every contract for loans or annual contributions under the United States Housing Act of 1937, as amended, shall provide that the Public Housing Commissioner and the Comptroller General of the United States, or any of their duly authorized representatives, shall, for the purpose of audit and examination, have access to any books, documents, papers, and records of the public housing agency entering into such contract that are pertinent to its operations with respect to financial assistance under the United States Housing Act of 1937, as amended.

"Report to Congress of information on housing

"SEC. 817. The annual report made by the Housing and Home Finance Administrator to the President for submission to the Congress on all operations provided for by section 802 hereof shall contain pertinent information with respect to all projects for which any loan, contribution, or grant has been made by the Housing and Home Finance Agency, including the amount of loans, contributions and grants contracted for, and shall also contain pertinent information with respect to all builders' cost certifications required by section 227 of the National Housing Act, as amended, including information as to the amounts paid by mortgagors to mortgagees for application to the reduction of the principal obligations of the mortgages pursuant to that section.

"Act controlling

"SEC. 818. Insofar as the provisions of any other law are inconsistent with the provisions of this Act, the provisions of this Act shall be controlling.

"Separability

"SEC. 819. Except as may be otherwise expressly provided in this Act, all powers and authorities conferred by this Act shall be cumulative and additional to and not in derogation of any powers and authorities otherwise existing. Notwithstanding any other evidences of the intention of Congress, it is hereby declared to be the controlling intent of Congress that if any provisions of this Act, or the application thereof to any persons or circumstances, shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this Act or its application to other persons and circumstances."

And the Senate agree to the same.

JESSE P. WOLCOTT,
RALPH A. GAMBLE,
HENRY O. TALLE,
CLARENCE E. KILBURN,
Managers on the Part of the House.

HOMER E. CAPEHART,
JOHN W. BRICKER,
WALLACE F. BENNETT,
BURNET R. MAYBANK,
A. WILLIS ROBERTSON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7839) to aid in the provision and improvement of housing, the elimination and prevention of slums, and the conservation and development of urban communities, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate struck out all of the House bill after the enacting clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the House bill and the Senate amendment.

Except for technical, clarifying, and conforming changes, the following statement explains the differences between the House bill and the substitute agreed to in conference.

GENERAL STATEMENT

Shortly after passage of the House bill, information became available with respect to alleged serious irregularities and abuses that have occurred under FHA programs, particularly the title I small property improvement insurance program and the financing of privately owned rental-housing projects insured under section 608 of the National Housing Act. As the Senate Banking and Currency Committee had not yet reported the proposed Housing Act of 1954 that committee took immediate cognizance of the allegations and made a preliminary investigation of these charges to ascertain what changes should be made in the Housing Act of 1954 to protect against the abuses which had been disclosed. Meanwhile the House Committee on Banking and Currency held a series of informal meetings with representatives of the Housing and Home Finance Agency, the FHA, and the Department of Justice to review the nature and extent of allegations made and to consider proposals made by the Agency to strengthen the National Housing Act to prevent reoccurrence of abuses. One of the purposes of these informal meetings was to acquaint the members of the House Banking and Currency Committee, who would be members of the committee of conference, with facts which had been developed and corrective proposals which were being made in order that the House conferees would be in a better position to evaluate the many corrective provisions which were added to the House bill by the Senate amendment. Some of these changes resulted from proposals made by the Senate Banking and Currency Committee in reporting the bill and others resulted from amendments made to the bill while it was under consideration by the Senate.

The committee of conference throughout its extensive deliberations has carefully weighed the changes proposed by the Senate amendment to the House passed bill. Throughout the conference there was complete agreement that while there was necessity for strengthening the housing laws to prevent the reoccurrence of past abuses, it was also imperative that the changes made not be of such a nature as to make our Federal housing laws unworkable or as seriously to impair the assistance which they should properly give to the encouragement and continuation of a high volume of housing production and housing improvements for our people.

FHA TITLE I INSURANCE OF HOME REPAIR AND IMPROVEMENT LOANS

The House bill provided that a home repair or improvement loan could be insured in an amount up to $3,000 in place of the $2,500 limitation in existing law, and provided for extension of maturity on such insured loans from the 3 years and 32 day limit of existing law to a maximum maturity of 5 years and 32 days. Under existing law FHA title I insurance may also be obtained on loans to finance the improvement or conversion of existing structures used or to be used as dwellings for two or more families. On such loans existing law limits the amount to $10,000 and the maturity to 7 years and 32 days. The House bill provided that the amount of such a loan could be either $10,000 or $1,500 per family unit, whichever is greater, and increased the permissible maturity to 10 years and 32 days. The Senate amendment struck out the provisions in the House bill extending the maturities and increasing the amounts of title I insured loans, thus in effect retaining the limitations of existing law. The conference substitute likewise leaves these provisions of existing law unchanged.

The Senate amendment contained a number of provisions, which were not contained in the House bill, with respect to FHA title I insurance of home repair and improvement loans which are designed to prevent abuses that have occurred in this program. One of these provisions would place the lender in a position of coinsuror through limiting title I insurance coverage to reimbursement of only 80 percent of the loss on any individual loan. The conference substitute retains the principle of this provision but increases the FHA insurance coverage to 90 percent of the loss on any individual loan. The committee of conference is of the opinion that limiting the coverage of losses to 80 percent on any individual loan might prove too restrictive particularly to small lenders. At the same time an insurance coverage limited to 90 percent would still retain a measure of self interest on the part of the lender in each loan in an amount sufficient to induce more careful lending operations.

Other provisions added by the Senate amendment would (1) limit the granting of FHA title I insurance to supervised lenders approved by FHA, or to such other lenders as (on the basis of their credit and their experience and facilities to make and service this type of loan) FHA approved; (2) restrict items eligible for FHA title I insurance to those which substantially protect or improve basic livability or utility of the property; (3) write into law restrictive features of present FHA title I regulations with respect to dealer approval, maintenance of dealer file, 6-day waiting period prior to disbursement, and requirements with respect to completion certificates; (4) prevent use of FHA title I loans on new homes until completed and occupied for 6 months, and (5) prevent multiple FHA title I loans on the same structure with the aggregate balance in excess of the maximum statutory dollar limitation. The conference substitute retains these provisions of the Senate amendment with the exception of the provision which would write into law restrictive features of present FHA title I regulations. The committee of conference was of the opinion that allowing such restrictive provisions to be covered by regulation rather than on a statutory basis was desirable from the standpoint of administration of the insurance program.

The conference substitute also allows a reasonable time—the first day after the first full calendar month following the date of approval of the Housing Act of 1954—for the preparation, issuance, and printing of FHA rules, regulations, forms, and instructions and their distribution to lenders operating under the title I program throughout the country.

SALES HOUSING

FHA insurance of 1-to-4-family sales housing is authorized by section 203 of the National Housing Act. Both the House bill and the Senate amendment provided changes in existing law with respect to maximum ratios of loans to values and maximum mortgage amounts. The House bill provided for a ratio of loan to value of 95 percent on the first $10,000 plus 75 percent of the excess over $8,000 (actually this $8,000 figure should be $10,000 but, through inadvertence, was not included in the amendment to these provisions adopted by the House). The Senate amendment provided for a ratio of loan to value of 95 percent of the first $8,000 plus 75 percent of the balance in excess of $8,000. Maximum mortgage amounts were also limited to $20,000 in the case of a one- or two-family dwelling, $27,500 in the case of a three-family dwelling and $35,000 in the case of a four-family dwelling under the provisions of the House bill; the Senate amendment placed these limitations at $18,000, $24,000 and $30,000 respectively. The House bill made the new ratios of loans to values applicable to both new and existing dwellings. The Senate amendment limited its loan to value ratio provision to only new construction and on existing construction retained the existing maximum mortgage ratio of 80 percent of value. The House bill provided a maximum maturity of 30 years on mortgages of 1-to-4-family homes and made such maturity applicable to both existing and new homes. The Senate amendment provided a maximum maturity on mortgages for new homes of 30 years, and required that on existing homes the mortgage maturity be reduced from 30 years by one year for each of the first 10 years of age, so that an existing dwelling which was built 10 or more years ago could not be mortgaged for a term exceeding 20 years.

With respect to new housing the conference substitute provides for a ratio of loan to value of 95 percent of the first $9,000 of value and 75 percent of the excess over $9,000, and authorizes the President to increase the $9,000 amount up to not to exceed $10,000 if, after taking into consideration the general effect of such higher dollar amounts upon conditions in the building industry and upon the national economy, he determines such action to be in the public interest. The maximum dollar mortgage limitations are the same as those provided in the House bill.

With respect to existing housing the conference substitute provides for a loan to value ratio of 90 percent of the first $9,000 of value plus 75 percent of the balance in excess of $9,000. It likewise provides for Presidential authority to increase the $9,000 figure to $10,000, and the dollar mortgage maxima are the same as those applicable to new housing.

With respect to mortgage maturities the conference substitute provided a maximum maturity of 30 years or three-quarters of the FHA Commissioner's estimate of the remaining life of the building improvements, whichever is the lesser. The committee of conference has been informed that FHA presently requires that the mortgage maturity not exceed three-quarters of the remaining economic life of the house whether new or old. In writing this limitation into the statute the Committee of Conference desires to place this safeguard in the law to make it clear that houses, especially old houses, are not to be financed for a term which would increase the Government's risk as insurer of the mortgage.

Although in most cases "mortgaging-out" is not applicable to sales housing, it is a possibility under certain circumstances where the builder of sales housing might actually become the mortgagor of the property. This could happen only when the builder, having built the homes, was unable immediately to dispose of them and had to close out the mortgage in his own name, thus becoming the mortgagor. In order to provide an effective statutory safeguard in such cases the conference substitute contains a provision limiting the maximum loan to value ratio where the builder becomes the mortgagor to not to exceed 85 percent of the mortgage loan which an owner-occupant could obtain. It is the further understanding of the committee of conference that, in such cases where a builder is constructing FHA sales housing and becomes the mortgagor because of inability to sell his houses, the FHA limits such builder in further participation under its programs. The committee of conference desires that this procedure be continued not only to assure that sales housing is constructed for sales purposes, but also as an effective method to prevent misuse of the FHA insurance system.

FHA APPRAISALS OF LONG-TERM ECONOMIC VALUE

Historically, the fundamental soundness of the whole concept of the FHA home mortgage insurance system has rested on the integrity of its appraisal system as a measurement of the long-term economic value of a

given residential property to be underwritten with an insured mortgage loan. Basically, the FHA's appraisal system, as well as many of its other principal procedures (such as its property location standards, its minimum construction requirements, and its inspection system), are obviously essential to the proper underwriting of mortgage loan risks, and therefore operate primarily for the protection of the Government and its insurance funds. Nevertheless, the Congress has consistently recognized—and intended—that, notwithstanding the fact that technically there is no legal relationship between the FHA and the individual mortgagor, these FHA procedures also operate for the benefit and protection of the individual home buyer. However, there has apparently been a strong tendency on the part of the FHA to view these procedures as operating exclusively for the protection of the Government and its insurance funds. The committee of conference does not believe such a view to be consistent with the intent of the Congress in respect of the basic legislation relating to the FHA in the past, and, as to the future, desire to make it abundantly clear that such is not the case.

In this connection, the committee of conference calls attention to two specific provisions included in the conference substitute which clearly indicate the intent of the Congress that the protections of the FHA system shall also inure to the benefit of the individual home buyers. One is the provision which requires that the builder or seller of a new home built with the assistance of an FHA-insured or VA-guaranteed mortgage must deliver to the purchaser a warranty that the home is constructed in substantial conformity with the plans and specifications (including any amendments thereof which have been approved in writing) on which the FHA or VA valuation of such home was based. The other is the provision which requires that, the seller or builder or such other person as may be designated by the FHA Commissioner shall agree to deliver, prior to the execution of a contract for the sale of the property, to the purchaser a written statement setting forth the amount of the FHA's appraised value of the property.

The committee of conference desires to point out the importance it attaches to the latter provision, especially at this particular time, in protecting the individual home buyers. Generally speaking, an appraisal of the long-term economic value of a particular residential property represents the informed judgment of a professional technician as to the dollar amount which a well-informed purchaser, acting without duress or compulsion, would be warranted in paying for such property for long-term use or investment. To a large extent, this is determined by the price at which other properties, which are comparable as to location, type of construction, size and other amenities, are being freely sold in the open market. But, irrespective of market price, the upper limit for such an appraisal would always be the estimated reproduction cost of the property. Thus, appraisal of the long-term economic value as the basis for insurance of home mortgage loans by the FHA can have two important effects in terms of consumer protection.

First, by providing the new and more liberal mortgage insurance terms contained in the conference substitute, the Congress is seeking to benefit the individual families seeking to buy homes. The committee of conference desires to assure that these terms would not have an inflationary effect upon the going market prices for homes which might be reflected in upward pressure on prices which, in turn, might be reflected in FHA valuations. An appraisal system, such as FHA's based on long-term economic value would preclude valuations in excess of carefully estimated replacement costs as an upper limit in respect to new homes, and in excess of replacement cost, less deterioration, in respect to existing homes. Therefore, any temporary cost or price rise, attributable to the new and more liberal mortgage insurance provisions continued in the conference substitute or otherwise, should not be reflected in FHA valuations to the detriment of individual home buyers.

Second, in those cases where a reasonable and careful estimate of the costs required to reproduce a fully comparable residential property may, for one reason or another, be less than the current market price for such properties, the individual consumer would obtain the benefit thereof since the FHA's appraisal of the property at such lower figure would be available to him and the maximum approvable FHA loan would be based on the lower of the two figures.

LOW-COST SUBURBAN HOUSING

Under title I, section 8, of the National Housing Act, provision is made for FHA insurance of mortgages on low-cost housing located in suburban and outlying areas. The House bill contemplated the integration of this FHA insuring operation into the FHA section 203 program and the House report made clear that in integrating the programs, underwriting procedures should be adopted to continue FHA section 8 type of insurance. The Senate amendment provides statutory authority for continuance of the section 8 program through adding a new subsection (i) to section 203 of the National Housing Act. The Senate provision also provided for an increase in the maximum mortgage amount from the $5,700 of existing law to $6,650 for a owner-occupant mortgagor and from the $5,100 of existing law to $5,950 for a builder-mortgagor. The new mortgage limits represent 95 percent and 85 percent, respectively, of a home costing $7,000. The Senate amendment further provided that this section 8 type of insurance could be made available to an owner-occupant mortgagor regardless of his credit standing, provided a person or corporation with a credit standing satisfactory to the FHA guaranteed payment of the insured mortgage. In such cases, the guarantor might also loan the owner-occupant mortgagor part or all of the required down payment on a note maturing after the last maturity date of principal due on the insured mortgage. The Senate amendment also made this section 8 type of insurance available on a farm home on a plot of 5 or more acres adjacent to a public highway with maximum insurance authorization for such loans limited to $100,000,000 outstanding at any one time. The conference substitute retains these provisions of the Senate amendment.

It is the intention of the committee of conference that this special mortgage insurance for new low-cost housing be made available in rural and small suburban or outlying communities where the suspension of the regular FHA property location requirements (as distinguished from minimum construction standards) is not likely to be detrimental to the long-term value of the housing or the general standards of the community. It is not intended that this special mortgage insurance be used to assist the financing of housing in areas which, with the proposed new construction, will constitute built-up urban communities. In such areas, the regular mortgage insurance under section 203 is available for low-cost housing meeting the usual FHA construction and location standards.

TERMS OF FHA INSURANCE FUND DEBENTURES

The House bill contained a provision which would amend section 204 (d) of the National Housing Act so as to fix the term of debentures to be issued under sections 203 and 213 of the act at 10 years. The Senate amendment contained a provision further amending section 204 of the act so that any debentures issued under the act (other than debentures issued under section 221 (g) (3)) could be replaced under certain conditions with refunding debentures maturing within a further 10-year period, thus in effect permitting the FHA Commissioner to impose a 10-year extension on debenture maturities. The conference substitute places a straight 20-year maturity on all FHA debentures issued under the act other than debentures issued under section 221 (g) (3). However, the change in debenture term does not apply in any case where the mortgage involved was insured or the commitment for such insurance was issued prior to the effective date of the Housing Act of 1954.

The Senate amendment contained a provision which was not included in the House bill under which the interest rate on FHA debentures, relating to mortgages hereafter insured, would be set at the rate in effect at the time of insurance as established by the FHA Commissioner with the approval of the Secretary of the Treasury. Such rate could not exceed the rate determined by the Secretary of the Treasury by estimating average yield to maturity on comparable marketable obligations of the United States. The conference substitute contains this provision of the Senate amendment.

REHABILITATION AND NEIGHBORHOOD CONSERVATION HOUSING INSURANCE

Both the House bill and the Senate amendment provided for the addition of two new FHA insurance programs through the addition of new sections 220 and 221 to the National Housing Act. The new section 220 insuring authority would provide a mortgage insurance program to assist in the rehabilitation of existing dwellings and the construction of new dwellings in urban renewal areas. The new section 221 insuring authority would provide a mortgage insurance program to cover suitable housing for the relocation of people displaced as a result of Governmental action in a community which has a workable program for dealing effectively with slums and blight, including the prevention of the development and spread of slums and blight as well as the elimination thereof.

FHA section 220 insurance

With respect to the new section 220 insurance program the House bill provided that before it could become operative in a community the FHA Commissioner would have to determine that there exists a redevelopment or urban renewal plan applicable to the area in which the mortgaged property is to be located and he would have to determine that necessary legal and financial authority existed to carry out such plan. The Senate amendment provided that the insuring provisions could become operative upon the Housing and Home Finance Administrator certifying to the FHA Commissioner that he had made the findings required under the slum clearance and urban renewal program. Under the slum clearance and urban renewal program the Housing and Home Finance Administrator is required to find (1) that the governing body of the locality has approved a redevelopment or renewal plan (2) that such plan conforms to the general plan for the development of the locality as a whole and (3) that necessary legal authority and financial capacity exists to carry out such plan. The Senate provision avoids unnecessary duplication of functions between the Housing and Home Finance Administrator and the Federal Housing Commissioner with reference to making FHA section 220 insurance available in the community. The conference substitute contains this provision of the Senate amendment.

In both the House bill and the Senate amendment the mortgage limitations with respect to insurance for other than large scale rental projects were consistent with the mortgage limitations which the House and Senate had imposed on insurance provided under the 1-to-4-family housing sales programs covered by section 203 of the act.

As will be noted under the previous discussion of the provisions of the conference substitute with respect to sales housing, the conference substitute represents a compromise between the provisions of the House bill and the Senate amendment and accordingly the mortgage limitations for section 220 insurance on other than large scale rental projects were modified by the committee of conference to make them consistent with the section previously agreed upon with respect to section 203 mortgage limitations.

With respect to large scale rental projects insured under section 220, the only difference (other than technical corrections) between the provisions of the House bill and the Senate amendment was that the Senate amendment added an escalator clause to the stated mortgage limitations so that the FHA Commissioner might by regulation increase the mortgage limitations by not to exceed $1,000 per room in any geographical area where he finds that cost levels so require. The conference substitute retains this provision of the Senate amendment.

FHA section 221 insurance

With respect to the new FHA section 221 insurance program the differences between the House bill and the Senate amendment are summarized in the following paragraphs.

Under the House bill provision was made that the number of units covered by the new FHA section 221 insurance could not exceed the number which the FHA Commissioner determines to be needed in a particular community for the relocation of families being displaced by governmental action. The Senate amendment provided that the Housing and Home Finance Administrator would determine the number of section 221 units needed and so certify to the FHA Commissioner. Since the Housing and Home Finance Administrator must determine relocation needs in connection with the slum clearance and urban renewal operation, the procedure provided by the Senate amendment would avoid duplication of the same work by the FHA Commissioner. The conference substitute contains this provision of the Senate amendment.

The House bill provided that the new FHA section 221 insurance could be made available in a community presently undertaking a slum clearance and urban redevelopment project without the community having to meet the new workable program requirement. The Senate amendment with respect to this provision made it clear that the FHA section 221 insurance to be made available in communities which presently have slum clearance projects would only be available for families displaced during the period that the project was being carried out and thereafter the community would have to meet the workable program requirement in order to have additional section 221 units in the community. The Senate amendment also contained a provision to make clear that the Housing and Home Finance Administrator does not have to certify dwelling units for section 221 insurance during any period when the locality fails to carry out the workable program upon which it had agreed. The conference substitute retains both of these provisions of the Senate amendment.

With respect to sales housing under the new FHA section 221 insurance program, the House bill provided that the mortgage could amount to 100 percent of the appraised value of a new or existing home provided that the owner and occupant of the property at the time of insurance made at least a $200 payment to cover settlement costs and miscellaneous charges. Under the Senate amendment mortgage limitations under the section 221 insurance program were set at not to exceed 95 percent of the appraised value on new homes and 90 percent on existing homes. The conference substitute retains these provisions of the Senate amendment with respect to mortgage limitations.

Under the provisions of the House bill a private nonprofit corporation providing rental accommodations for ten or more families eligible for occupancy could obtain FHA section 221 insurance for the rehabilitation of existing homes up to 100 percent of the Commissioner's estimate of the value of the property or project when repaired or rehabilitated. Under a provision of the Senate amendment a private nonprofit corporation providing rental accommodations for ten or more families could obtain only a 95 percent section 221 loan insurance coverage but the mortgage could cover the construction of new accommodations as well as cover the repair or rehabilitation of existing accommodations. The conference substitute retains these provisions of the Senate amendment.

Under the House bill, maximum maturities were set at 40 years for all section 221 mortgages. The Senate amendment prescribed 30 years for these maturities. The conference substitute prescribes 30 years or three-quarters of the Federal Housing Commissioner's estimate of the remaining economic life of the building improvements, whichever is the lesser.

MORTGAGE INSURANCE FOR SERVICEMEN

The conference substitute retains the new section 222 of the National Housing Act, which was added by the Senate amendment. The House bill contained no comparable provision. Section 222 of the National Housing Act would establish a new FHA mortgage insurance program for housing for servicemen in the Armed Forces of the United States and their families. This program would assist in the provision of housing for members of the active Military Establishment, who are usually not eligible for the home-loan benefits of the Servicemen's Readjustment Act of 1944 because they have not become veterans. The latter act deals, of course, with the readjustment of veterans to civilian life, and is not intended to assist in providing housing for servicemen while they remain in service.

Before a serviceman would be entitled to the benefits of the new program, the Secretary of Defense (or his designee) would have to issue to him a certificate indicating that the serviceman requires housing, that he is serving on active duty in the Armed Forces of the United States, and that he has served on active duty for more than 2 years. The serviceman would be required either to occupy the property or to certify that his failure to do so is the result of his military assignment. A certificate would not be issued by the Secretary to any person ordered to active duty for training purposes only. The Secretary could issue a new certificate to a serviceman who has already had the benefits of mortgage insurance assistance under this section only if in his judgment the additional certificate is justified.

The Senate amendment provided that a serviceman who has had the benefits of mortgage insurance assistance under this section would not be eligible for home-loan benefits under the Servicemen's Readjustment Act of 1944, and that no person who has used his entitlement for home-loan benefits under that act would be eligible for the benefits of this section. The conference substitute removes these limitations, thereby permitting an individual to avail himself of both types of benefits if he is appropriately qualified.

The mortgages insured under the new section 222 would be subject to the same limits on amounts as mortgages insured under the regular section 203 sales housing program, with certain exceptions designed to provide more liberal treatment for servicemen. The Senate amendment provided that, in the discretion of the Federal Housing Commissioner, the maximum ratio of loan to value under section 222 could exceed the maximum prescribed in section 203, up to 95 percent of the appraised value of the property, and that the maximum dollar mortgage amount could be $14,250 (that is, 95 percent of $15,000). The conference substitute increases the maximum dollar mortgage amount to $17,100 (that is 95 percent of $18,000).

Premiums on the insurance would not be payable by the mortgagee while the serviceman owns the home, but would be paid yearly by the Secretary of Defense from appropriations for the pay and allowances of persons eligible for mortgage insurance under this section. The Secretary of Defense (or such person as may be designated by him) would certify to the Federal Housing Commissioner the termination of ownership of such home by a serviceman, and future premiums would be payable in the same manner as in the case of other mortgage insurance.

Payment of insurance to the mortgagee in event of default on these mortgages would be made in accordance with the same provisions as those which govern the payment of insurance on section 203 mortgages, except that such payments would be from a separate servicemen's mortgage insurance fund established for the purposes of section 222. The Senate amendment authorized an appropriation of $1,000,000 for such fund; the conference substitute changes this provision so as to provide for the transfer of $1,000,000 from the war housing insurance fund instead of a direct appropriation.

The benefits of this section would apply to servicemen in the United States Coast Guard and their families, except that the Secretary of the Treasury would perform the functions otherwise given to the Secretary of Defense.

SALE OF GOVERNMENT-OWNED HOUSING

Both the House bill and the Senate amendment contain provisions permitting 90 percent FHA insured mortgages to finance the sale of Government-owned housing. However, the Senate amendment contained a provision which would permit a 95 percent insured mortgage to finance the sale of such housing if the mortgagor was a veteran cooperative. The conference substitute retains this provision of the Senate amendment.

It was called to the attention of the committee of conference that in some instances the FHA after acquiring a property through operation of its mortgage insuring programs, had resold the property and taken back a purchase money mortgage at a rate of interest under the rate that currently existed on insured mortgages covering similar property. While this practice undoubtedly permits the FHA to obtain a higher price for the property sold than would otherwise be the case thus limiting losses or even allowing it to move into a profit position on its liquidation operations, at the same time it leaves FHA with a long term mortgage which, if sold, could only be sold at a loss due to the unrealistic interest rate. The committee of conference is of the opinion that in any such transactions in the future, the FHA should not take back purchase money mortgages in connection with the sale of acquired properties unless the interest rate on such purchase money mortgages is comparable to the current interest rates on insured mortgages on properties of similar type. The committee of conference is further of the opinion that in cases where the Housing and Home Finance Administrator disposes of property under his control and accepts a purchase money mortgage as part of the payment such a mortgage should carry an interest rate not less than the current interest rate applicable to FHA insured mortgages on similar properties.

OPEN-END MORTGAGES

Both the House bill and the Senate amendment contained provisions permitting FHA insurance of advances pursuant to an "open-end" provision in a FHA insured mortgage.

The Senate amendment, however, contained a provision which was not contained in the House bill which would limit such open-end advances to improvements and repairs which substantially protect or improve basic livability or utility of the property and to an amount which when added to the unpaid amount of the mortgage would not make the unpaid balance exceed the amount of the original mortgage. The conference substitute retains the Senate provisions with an amendment which would permit the amount of the advance when added to the unpaid amount of the mortgage to exceed the original principal obligation of the mortgage if the mortgagor certifies that the proceeds of the advance are to be used to finance the construction of additional rooms or other enclosed space as a part of the dwelling.

The Senate amendment contained a provision making the maximum veterans' home loan guaranty entitlement of $7,500 applicable to loans for repairs, alterations, and improvements (if they would substantially protect or improve the basic livability or utility of the property involved) as well as to loans for the purchase and construction of residential property. Under existing law (the so-called "veterans' open-end mortgage" provision) a veteran who has used his guaranty entitlement in acquiring a home can have additional entitlement for repair loans only if he has used less than $4,000 of his entitlement in acquiring the home. The House bill contained no corresponding provision, although in its original form it had included a similar provision which was eliminated when title II of the reported bill (relating primarily to mortgage interest rates and terms) was stricken out on the floor of the House. The conference substitute contains the provision added by the Senate amendment.

FHA APPRAISAL AVAILABLE TO HOME BUYERS

The Senate amendment contained a provision which was not included in the House bill which would direct the FHA Commissioner to require the seller or builder of a one-or-two family residence to make available to the purchaser of a new home, prior to sale, a written statement setting forth the amount of the appraised value of the property as determined by the FHA. The conference substitute retains this provision of the Senate amendment but broadens it to include existing housing as well as new homes and to include also one-and-two family sales housing under the new servicemen's insurance program (sec. 222 of the National Housing Act), one-and-two family sales housing under the cooperative housing section (213) of the National Housing Act, and individual sale type defense housing (sec. 903 of the National Housing Act). The provision is not applicable in cases where a mortgage was insured or a commitment for insurance was issued prior to the effective date of the Housing Act of 1954.

BUILDERS COST CERTIFICATION

As noted in the opening paragraphs of this Statement of Managers, shortly after passage of the House bill disclosures were made of widespread "mortgaging out" operations under the former FHA 608 rental housing insurance program. The term "mortgaging out" means that the mortgagor was able to obtain a mortgage in an amount sufficient to equal or exceed the actual cost of the project including a normal allowance for builders profit. The Congress had recognized the possibility of such an operation as the 608 program developed and in increasing the title VI authorization in Public Law 384, 80th Congress, 1st session, approved December 27, 1947, provided that "Title VI of the National Housing Act, as amended, be employed to assist in maintaining a high volume of new residential construction without supporting unnecessary or artificial costs. In estimating necessary current cost for the purposes of said title, the FHA Commissioner shall therefore use every feasible means to assure that such estimates will approximate as closely as possible the actual cost of efficient building operations." Subsequently, continued rumors of "mortgaging out" operations led the Congress to impose builders costs certification provisions in the military housing insurance program (sec. 803) and in the rental housing section of the Defense Housing program (sec. 908). Following the disclosures of widespread "mortgaging out" operations under section 608, the Senate amendment included a provision, which was not contained in the House bill, which would require a builders cost certification with respect to all FHA mortgage insurance for new or rehabilitated multifamily and rental housing. This provision would require the builder to certify that the approved percentage of the actual cost (i. e., 80 percent under section 207, 90 percent or 95 percent under section 213, 90 percent under section 220, etc.) equaled or exceeded the proceeds of the mortgage loan or the amount by which the proceeds exceeded such approved percentage and to apply the amount of such excess to the reduction of the mortgage loan. In the computation of actual cost, the land value considered may not exceed the Commissioner's estimate of the fair market value of the land in the project prior to the construction of the improvements. There would be excluded from the computation of actual costs amounts representing any kickbacks, rebates, or trade discounts received in connection with the construction of the improvements. The conference substitute while essentially retaining this provision of the Senate amendment, makes clear that a reasonable allowance for builders profit may be included as part of the "actual cost" of a project in the case where the builder is also the mortgagor and desires to leave his profit in the corporation as equity.

NEW FHA POSITIONS

The Senate amendment contained a provision, which was not included in the House bill, which would authorize the establishment in FHA of 18 positions at grade GS–16 without regard to the civil service laws, in lieu of positions previously allocated in FHA under section 505 of the Classification Act. The committee of conference was of the opinion that allocation of all these positions at grade GS–16 would unnecessarily disrupt FHA administrative organization. Accordingly the conference substitute authorizes the FHA to establish one position in Grade GS–18, four positions in grade GS–17, and eight positions in grade GS–16, which would be subject to the civil service laws. Thus the positions would not be taken completely out from under the provisions of the civil service laws but would follow normal statutory procedures which permit such positions to be classified as schedule "C." This is consistent with the practice being followed by the Congress in establishing new positions in other agencies at these grades.

ADDITIONAL FHA PROVISIONS

The House bill contained a provision terminating the yield insurance program under title VII of the National Housing Act. The Senate amendment contained no comparable provision. The conference substitute retains the FHA title VII program.

Under existing law authority of the FHA to insure mortgages in connection with the defense housing program under title IX would expire August 1, 1954, except as to commitments issued prior to such date on loans to refinance existing insured loans. Under the House bill this authority would not be continued but the authority to insure as to commitments issued prior thereto was continued.

The Senate amendment gave the President standby authority to use title IX FHA mortgage insurance authority and the provisions of title III of the Defense Housing and Community Facilities and Services Act of 1951 for Federal aid in the provision of defense housing and community facilities and services in critical defense housing areas. The President under the Senate provision could designate periods after June 30, 1954, when either of these two programs could be used or he could designate a specific project or projects to be assisted by either of the two programs.

In addition the Housing and Home Finance Administrator would be authorized to enter into amendatory agreements after June 30, 1954, to provide additional Federal assistance with respect to defense community facilities undertaken on or before such date where he finds it necessary to do so to assure the completion of such facilities. Such amendatory agreements could not involve the expenditure of Federal funds in excess of those available on or before June 30, 1954.

The conference substitute conforms to the Senate amendment, but limits the President's standby authority to the period ending July 1, 1955.

The Senate amendment contained a provision requiring that each dwelling covered by a mortgage hereafter insured under section 903 of the National Housing Act be held for rental for at least 4 years. The House bill contained no comparable provision. The conference substitute conforms to the Senate amendment but reduces the period to three years.

The Senate amendment contained a provision making it a criminal offense to misuse "FHA" in advertising or firm or business names. The House bill contained no comparable provision. The conference substitute conforms to the Senate amendment on this point and also modifies section 709 of title 18 of the United States Code, which contains this provision, so as to prohibit similar misuse of the words "Housing and Home Finance Agency," "Federal Housing Administration," and "Federal National Mortgage Association."

Section 709 also prohibits the false advertisement or representation that any project, business, or product has been in any way endorsed, authorized, or approved by the agencies named above or the Government of the United States or any agency thereof. The conference agreement applies this prohibition to any false advertisement or representation that any housing unit, project, business, or product has been in any way endorsed, authorized, inspected, appraised, or approved, as above provided.

The Senate amendment added a new section to the National Housing Act to authorize the Federal Housing Commissioner to refuse the benefits (either directly or indirectly) of participation in FHA insurance programs to persons or firms who knowingly and willfully violate the National Housing Act or the loan guarantee title of the Servicemen's Readjustment Act of 1944 or the regulations promulgated under either of those acts. Such benefits could also be refused if the Commissioner determines that there has been a violation of Federal or State penal statutes in connection with programs under either of the two acts or that there has been material failure to carry out contractual obligations with respect to the completion of construction or repairs financed with assistance under either of the two acts. Persons or firms proposed to be denied such benefits would be afforded an opportunity for hearing and to be represented by counsel. These provisions would be applied not only to insured lenders and borrowers, but to builders, contractors, dealers, salesmen, or agents for a builder, contractor, or dealer. The House bill contains no comparable provision. The conference substitute retains the Senate provision with amendments making it clear that it applies to all the insurance titles of the act and with clarifying changes.

PROHIBITION AGAINST USE OF FHA-INSURED HOUSING FOR TRANSIENT OR HOTEL PURPOSES

The House report accompanying the House bill clearly expressed the intent of the House Banking and Currency Committee that FHA insured rental properties were never intended to be used to provide hotel accommodations and directed the FHA to take all appropriate action possible to prevent such use of FHA insured rental projects. The Senate amendment includes specific provisions relating to this problem. These provisions (1) declare that it has been the intention of Congress since enactment of the National Housing Act that housing covered by mortgage insurance is not to be used for hotel or transient purposes while insurance remains outstanding; (2) prohibit any new, existing, or rehabilitated multifamily housing from being rented for a period of less than 30 days, or operated in a manner as to offer hotel services, while such housing has mortgage insurance; (3) prohibit future mortgage insurance on multifamily housing unless mortgagor certifies under oath that as long as insurance is outstanding no part of the housing will be rented for a period of less than 30 days, and no hotel services will be offered; (4) direct the FHA Commissioner to enforce restrictions on hotel use of such properties whether insurance was issued prior or after the enactment of the Housing Act of 1954 but provides that criminal penalties shall not be retroactive; and (5) require the FHA Commissioner to investigate in 15 days any written complaint that a building is being rented or operated in violation of any provision of the National Housing Act or regulation thereunder and, if a violation is found, to order it to cease. If the alleged violation did not cease, the FHA Commissioner would be required to refer the case to the Department of Justice in 15 days for criminal prosecution. Also, in that time, the Commissioner would be required to start injunction proceedings in Federal district court. If the FHA Commissioner did not start such action in that time, any individual could bring the action in the name of the United States. The district courts of the United States would be given jurisdiction over such cases.

The conference substitute follows the Senate provisions, modified as follows:

1. Provides that multifamily housing shall not be used for transient or hotel purposes unless (a) by May 28, 1954, the FHA Commissioner had agreed in writing to rental of specified number of units for such purposes, or (b) the FHA Commissioner finds that the project is in a resort area and that prior to May 28, 1954, a specified number of the accommodations were used for transient or hotel purposes.

2. No multifamily mortgage to be insured by FHA hereafter, except under outstanding commitment, and no mortgage to be insured for an additional term, unless (a) mortgagor certifies under oath the property will not be used while insurance remains outstanding for transient or hotel purposes, and (b) the FHA Commissioner has contracted with or bought stock of mortgagor needed to enforce compliance while mortgage insurance remains in effect.

3. (a) The FHA Commissioner must define "transient or hotel purposes," but rental for less than 30 days shall in any event constitute rental for such purposes.

(b) "Multifamily housing" is defined to include property held by a mortgagor on which 5 or more single-family dwellings are located, or a two-, three-, or four-family dwelling is located, or rental-type housing is insured under sections 207, 213, 220, 221, 608, title VII, 803, and 908.

4. On written complaint, the FHA Commissioner must investigate and order violation, if found to exist, to cease. If such violation does not cease, the FHA Commissioner must send complaint to Attorney General for appropriate civil or criminal action.

5. A hotel owner, or operator, or association, within 50 miles radius of place of violation, at their own expense may apply for injunctive relief against violations upon showing cause for the issuance of such injunction.

SLUM CLEARANCE AND URBAN RENEWAL

The Senate amendment added to the House bill a provision prohibiting the delegation or transfer, to any official except a person serving as Acting Administrator, of certain final authorities vested in the Housing Administrator in connection with the slum clearance and urban renewal program. Under this provision, the Administrator could not delegate or transfer his authority (1) to determine whether the workable program provided for under section 101 (c) of the Housing Act of 1949 (compliance with which is a condition precedent to slum clearance and urban renewal assistance and to FHA assistance under section 220 or section 221 of the National Housing Act) meets the requirements of such section; (2) to make the certification that Federal assistance of the types enumerated in such section 101 (c) may be made available in a community; (3) to make the certifications with respect to the maximum number of dwelling units needed for the relocation of families who are to be displaced as a result of governmental action in a community and who would be eligible to rent or purchase dwelling accommodations in properties covered by mortgage insurance under the section 221 program; or (4) to determine whether the relocation program (which by law must be submitted to the local public agency) for the rehousing of families to be displaced by a slum clearance and urban renewal project meets the requirements of section 105 (c) of the Housing Act of 1949. The conference substitute includes the provision added by the Senate amendment.

The Senate amendment added to the House bill a provision that no contract may be made for advances of funds to local public agencies for surveys and plans for urban renewal projects unless the governing body of the locality involved has approved (by resolution or ordinance) the undertaking of the surveys and plans and the submission by the local public agency of an application for the advance of funds, thus assuring that the approval of the local governing body of the locality concerned will be obtained before any financial assistance contracts are executed. A related provision in the House bill required the governing body of the locality concerned to make the determination that an urban renewal area is blighted or deteriorated, and to designate such area as appropriate for an urban renewal project, before any contract could be made for advances of funds to the local public agency for surveys and plans in preparation of the project. The Senate amendment deleted this provision in the House bill (and substituted the provision described above) on the ground that, as a practical matter, the governing body of the locality would not have the necessary data to support such a determination until after the survey and planning stage, and on the further ground that any redevelopment plan in connection with a project must be approved by the governing body of the locality before any monies could be disbursed under a loan and grant contract. The conference substitute follows the Senate provision.

The House bill contained a provision which would have had the effect of permitting grants for urban renewal projects to be paid in connection with projects consisting of open land which is arresting the sound growth of a community, even though the land is not being redeveloped for predominantly residential purposes. The Senate amendment deleted this provision of the House bill, thereby in effect continuing the requirements of existing law. (Under existing law, capital grants may not be paid in connection with any open land project, and an open land project is not eligible even for loan assistance unless it is to be developed for predominantly residential use and is necessary to the effective carrying out of a local slum-clearance program already undertaken or specifically contemplated.) The conference substitute retains the Senate provision.

The House bill provided that mortgages and others who acquire property in an urban renewal area as a result of foreclosure need not comply with the obligation imposed upon other purchasers (1) to begin construction of improvements within a specified time, and (2) to comply with such other conditions as the Housing Administrator finds (prior to the execution of the contract for loan or capital grant) are necessary to carry out the purposes of the urban renewal project. The Senate amendment eliminated the exemption granted by the House bill from the second of these two obligations, thus permitting the Administrator to make appropriate conditions applicable to those who acquire property as a result of foreclosure as well as to other purchasers. The conference substitute retains the Senate provision.

The House bill changed the requirements established for a project in existing law and substituted provisions establishing as the general criteria of eligibility for an urban renewal project the achievement of "sound community objectives for the establishment and preservation of well-planned residential neighborhoods." Under existing law loans and capital grants may be made available for clearing a slum or blighted residential area, whether it is to be redeveloped for residential use or for commercial or industrial use or for a combination of such uses; but if the area is not already predominantly residential in character, such financial assistance may be made available only if it is to be redeveloped for predominantly residential uses. The Senate amendment deleted the House provisions and reinstated existing law by prohibiting loans and capital grants for projects involving slum clearance and redevelopment of areas not clearly predominantly residential in character unless such redevelopment is for predominantly residential uses; except that if an area contains a substantial number of slums, or blighted, deteriorated, or deteriorating dwelling, or other living accommodations, the elimination of which would tend to promote the public health, safety, and welfare in the locality, and such area is not appropriate for redevelopment for predominantly residential uses, the Administrator may extend financial assistance for such a project in that area, but the aggregate of the capital grants made with respect to such projects cannot exceed 10 percent of the total amount of capital grants authorized by title I of the Housing Act of 1949. The conference substitute follows the Senate amendment.

The House bill contained a provision which would exclude from local grants-in-aid for an urban renewal project any revenue-producing public facilities the capital cost of which is financed by service charges or special assessments. The Senate amendment did not include that provision. The conference report includes a provision which would exclude from such local grants-in-aid only those revenue-producing public utilities where the capital cost is wholly financed with local bonds and obligations payable solely out of revenues derived from service charges. The provision would not apply to utilities where the capital cost is partly financed from tax revenues or from any source other than revenue bonds. However, the provision would be broadened to cover public facilities financed by special assessments against land in the project area.

The House bill contained a provision increasing from $2,000 to $3,000 the maximum amount of any unsecured home repair and modernization loan, not insured under the FHA title I program, made by a savings and loan association in the District of Columbia. The Senate amendment provided for a lesser increase, from $2,000 to $2,500. The conference substitute follows the Senate amendment.

The House bill provided that the District Commissioners and "the other appropriate agencies operating within the District of Columbia" shall have the same rights and powers with respect to the new type "urban renewal" projects as they now have with respect to redevelopment projects. The Senate amendment adds a provision specifically designating the National Capital Planning Commission as one of the "appropriate agencies operating within the District of Columbia" for this purpose. The conference substitute contains the new language added by the Senate amendment.

The House bill provided that the "workable program" for urban renewal in the District of Columbia shall be prepared by the District of Columbia Redevelopment Land Agency with the approval of the District Commissioners. The Senate amendment provided that such workable program should be prepared by the District Commissioners, with the participation of the Redevelopment Land Agency and other agencies of the District, if requested by the Commissioners. The Senate amendment also contained a provision making it clear that any appropriations required for the preparation of the workable program for the District of Columbia shall be requested by the District Commissioners rather than by the Redevelopment Land Agency. The conference substitute retains the provisions of the Senate amendment.

The committee of conference has noted the statement of the Senate Committee on Banking and Currency, in its report accompanying the bill (Report No. 1472, at pp. 40 and 41) with respect to the coordinated administration of the undertakings authorized by the bill to enable cities to attack effectively the entire problem of urban slums and blight. The committee of conference is fully in accord with that statement and expects the Housing and Home Finance Administrator to apply firmly the unified direction to such undertakings as instructed by the Senate committee.

SECONDARY MORTGAGE MARKET

The House bill contained provisions providing for the rechartering of the Federal National Mortgage Association. The rechartered FNMA would have three principal functions, namely, (1) to provide assistance to the secondary market for FHA-insured and VA-guaranteed home mortgages in order to furnish additional liquidity for mortgage investments and thereby improve the distribution of mortgage investment funds; (2) to provide Government assistance for certain types of these mortgages, or for mortgages generally if necessary to retard or stop a decline in home building activities which threatens the stability of a high level national economy; and (3) to manage and liquidate in an orderly manner the mortgages held in the portfolio of the present FNMA. Provision was made so that the Government investment in FNMA would gradually be replaced by private investment funds and provision was also made to enable FNMA to replace an important part of its borrowings from the Government with borrowings from the private investment market.

The Senate amendment struck the provisions from the House bill relating to the rechartering of FNMA but provided that the authority of the present FNMA to make advance commitments to purchase FHA title VIII military housing mortgages be extended for one year to July 1, 1955, and also granted FNMA authority to make advance commitments to purchase FHA-insured or VA-guaranteed mortgages covering property in Guam in an aggregate amount not exceeding $15,000,000. The conference substitute retains the provisions of the House bill with respect to the rechartering of FNMA except in the following respects: (1) the users of the rechartered FNMA will receive common stock for their capital contributions in place of the convertible certificates (convertible into common stock upon retirement of Treasury stock) that had been provided for in the House bill; (2) the Treasury will receive preferred stock for its investment in place of common stock, and dividends could be paid on both the preferred and common stock out of available earnings; and (3) a formula is provided for the equitable distribution between the Secretary of the Treasury and the private stockholders of the FNMA general surplus and reserves at the time that the last of the Government's stock is retired.

VOLUNTARY HOME MORTGAGE CREDIT PROGRAM

Both the House bill and the Senate amendment contain provisions, which are essentially similar, under which there would be established a voluntary home mortgage credit program under which private financing institutions in an organized manner would undertake to make VA and FHA home mortgage credit available where needed. However, the Senate amendment, as does the conference substitute, strengthens the declaration of policy with respect to the voluntary home mortgage credit program and provides that the development of the program shall be consonant with sound underwriting policies. The conference substitute also provides, as did the Senate amendment, that a representative of the Home Loan Bank Board shall serve as an advisory member of the National Voluntary Mortgage Credit Extension Committee and that the Housing and Home Finance Administrator may act through and utilize the services of the Federal Home Loan Banks in providing regional subcommittees under this program with suitable offices and meeting places and staff assistance.

Under the provisions of the House bill, the definition of "private financing institutions" included life-insurance companies, savings banks, commercial banks, cooperative banks, homestead associations, building and loan associations, and savings and loan associations. Such definition as contained in the Senate amendment omitted homestead associations and building and loan associations but added mortgage banks. The conference substitute provides that the definition of "private financing institutions" includes life-insurance companies, savings banks, commercial banks, savings and loan associations (including cooperative banks, homestead associations, and building and loan associations), and mortgage companies.

The House bill contained a provision which would exempt members of the National Voluntary Mortgage Credit Extension Committee and regional subcommittees from the "conflict of interest" statutes applicable to Government officers and employees. This provision was stricken by the Senate amendment. The conference substitute contains a provision making clear that service as a member of the National Voluntary Mortgage Credit Extension Committee or regional subcommittees will not be construed as holding any office or employment of the Government of the United States and thus resolves any question that might otherwise arise as to the application of the "conflict of interest" of statutes.

LOW-RENT PUBLIC HOUSING

The Senate amendment contained a provision in effect repealing the provisos in the Independent Offices Appropriation Acts of 1953 and 1954 which presently limit public housing starts and prohibit the Public Housing Administration from entering into any new contracts or other arrangements for additional public housing units or projects (except with respect to those now authorized), thus restoring the provisions of the basic substantive legislation. The same provision of the Senate amendment limited annual contributions contracts for new public housing units to 35,000 units during each of the calendar years 1954, 1955, and 1956, and limited the authority to authorize the commencement of construction to 35,000 units during each of the fiscal years 1955, 1956, 1957, and 1958. The program contemplated by the Senate amendment thus would provide for the construction of 140,000 additional public housing units over a four-year period. The House bill contained no provision for additional public housing, in effect terminating the public housing program after the completion of the approximately 33,000 units still authorized under existing law.

Under the conference substitute the Public Housing Administration is authorized to enter into new contracts, agreements, or other arrangements during the fiscal year 1955 for loans and annual contributions with respect to not more than 35,000 additional public housing units. The new contracts, agreements, and other arrangements can be entered into only with respect to low-rent housing projects which are to be undertaken in communities where a slum clearance and urban redevelopment or urban renewal project is being carried out with assistance under title I of the Housing Act of 1949, as amended, and only if the local governing body of the community undertaking the project certifies that the low-rent housing project is needed to assist in meeting the relocation requirements of section 105 (c) of that Act by providing housing for persons displaced by the slum clearance operations.

The total number of dwelling units which may be contained in any low-rent housing project provided for under these new contracts, agreements, or other arrangements is further limited by the requirement, contained in the conference substitute, that it may not exceed the number of such units which the Administrator determines are needed for the relocation of families displaced as a result of Federal, State, or local governmental action in the community. It should be noted, however, that although the existence of a slum clearance and urban redevelopment or urban renewal project, in the community is a prerequisite to making any new contracts, agreements, or other arrangements for a low-rent housing project, the displacement of families as a result of governmental action other than slum clearance may be taken into consideration in determining the number of dwelling units which may be included in the project.

The net result of the conference substitute is to limit the extension of the public housing program to one additional year and 35,000 additional units, to restrict the authorization of the additional units to communities which have slum clearance and urban redevelopment or urban renewal programs and which require housing for the relocation of persons displaced by those programs, and to limit the number of dwelling units in such projects to the number required for the relocation of persons displaced by governmental action of all types.

The House bill contained a provision requiring owners of all Federally-assisted housing to agree to require from each prospective occupant or purchaser a certificate that he is not a member of any organization designated as subversive by the Attorney General. The Senate amendment eliminated this provision and repealed certain riders in recent appropriation acts which applied similar requirements to low-rent public housing, and substituted a provision requiring all tenants of low-rent pub-

lic housing to be citizens of the United States or to have made application for citizenship, except in the case of families of servicemen and veterans. The conference substitute does not contain either provision.

The Senate amendment added to the House bill a provision requiring that payments of annual contributions for low-rent public housing shall be subject to audit and final settlement by the General Accounting Office in accordance with regular procedures. The conference substitute retains the provision added by the Senate amendment.

The House bill contained a provision providing that, where a public housing project is to be liquidated pursuant to the expressed desire of the community, the project may be sold upon the agreement of the community to pay its outstanding obligations, and the Federal Government's share of the proceeds from the sale shall be covered into miscellaneous receipts. The Senate amendment changed this provision to require that the project may be sold only upon the payment and retirement of all its outstanding obligations and that the Federal Government's share of the proceeds shall be paid to the Public Housing Administration and the local public bodies which have contributed to the project. The conference substitute follows the Senate amendment.

HOME LOAN BANK BOARD

The amendments made in title V of the House bill and those contained in title V of the conference substitute differ in the following material respects—

(1) The House bill contained no amendment to section 407 of the National Housing Act relating to termination of insurance of an institution insured by the Federal Savings and Loan Insurance Corporation. The Senate amendment authorized the termination of the insured status of an institution for continuing unsafe or unsound practices in conducting its business. The conference substitute adopted the Senate amendment with changes designed to assure that the amendment would not impair the supervisory authority of State and local bodies over insured institutions other than Federal savings and loan associations. The local supervisory authority would be given an opportunity to attempt to secure a correction of the unsafe or unsound practice before further action is taken by the Home Loan Bank Board to terminate the insured status of the institution. It would make the action of the Board subject to court review as in the case of the House bill relating to the appointment of conservators and receivers for Federal savings and loan associations. The authority which would be granted by this provision is similar to the authority which the Federal Deposit Insurance Corporation now has with respect to institutions having accounts insured by it.

(2) The House bill contained an amendment to title IV of the National Housing Act changing the name of the Federal Savings and Loan Insurance Corporation to "Federal Savings Insurance Corporation." The Senate amendment struck out the House provision. The conference substitute follows the Senate provision.

(3) The House bill increases from $1,500 to $3,000 the maximum amount of an unsecured loan in which a Federal savings and loan association may invest. The Senate amendment increased such amount to $2,500. The conference substitute adopts the Senate provision.

URBAN PLANNING AND RESERVE OF PLANNED PUBLIC WORKS

The House bill authorized the Administrator to make advances to public agencies to aid in financing the costs of the preliminary planning of public works programs, in order to encourage the maintenance by municipalities and other public agencies of a continuing and adequate reserve of planned public works and to attain maximum economy and efficiency in public works planning and construction. The Senate amendment added to the House bill a provision requiring that a public agency applying for such an advance of funds must, before any Federal funds can be made available to it for such preliminary planning, establish a separate planning account in which all Federal and local funds required for plan preparation would be placed. The conference substitute includes the provision added by the Senate amendment.

BUILDER'S WARRANTY

The House bill contained a provision requiring the seller or builder of a new one- or two-family house which has a mortgage insured or guaranteed by the FHA or VA to become a warrantor that the dwelling was constructed in substantial conformity with the plans and specifications (including any amendment) on which the FHA or VA based its valuation.

The Senate amendment followed the language of the House bill with the following exceptions:

(1) The language of the House bill requiring a "warranty" of "substantial conformity" with plans and specifications was changed to a "certificate" of "conformity" with plans and specifications in the Senate amendment. The conference substitute adopts the House language.

(2) The House bill limited the warranty to single and two-family residences. The Senate amendment extended it to three- and four-family residences. The conference substitute adopts the language of the Senate amendment, and thus the warranty will be required for all new sale housing under the FHA and VA programs.

The provisions of the conference substitute which would direct the Federal Housing Commissioner and the Administrator of Veterans' Affairs to require that the builder or seller of a new home built with the assistance of an FHA-insured or VA-guaranteed mortgage deliver to the purchaser or owner a warranty that the dwelling is constructed in substantial conformity with the plans and specifications (including any amendments thereof which have been approved in writing) on which the FHA or VA valuation of such dwelling was based, are not self-executing provisions which in themselves establish or affect the legal rights of the parties. Such rights are established and governed by the laws of the particular State. The Federal Housing Commissioner and Administrator of Veterans' Affairs must require the builder or seller to enter into such agreement or take such other action as necessary under applicable State law to make the builder or seller obligated to the purchaser or owner in accordance with the provisions of the act. It is the expectation of the committee of conference that, for this purpose, the builder or seller will therefore be required to certify that there were included in the sales contract, or other agreement prescribed by regulation, provisions warranting that the dwelling was constructed in substantial conformity with the approved plans and specifications, which provisions will survive the settlement of title, the delivery of possession of the property, or other final settlement between the builder or seller and the purchaser or owner.

PUBLIC AGENCY LOANS

The Senate amendment added to the House bill a provision amending the Reconstruction Finance Corporation Liquidation Act so as to place in the Housing and Home Finance Administrator the power to make loans to public agencies for public projects. In addition, this provision appropriated $50,000,000 to a revolving fund to be established from which advances for such loans were to be made to the Administrator, and extended the termination date of the public agency loan program for an additional two years.

The Senate amendment also contained a provision granting succession to the Reconstruction Finance Corporation until it is dissolved pursuant to law, rather than only until June 30, 1954, as provided in existing law. Under existing law, the Corporation will be dissolved when the Secretary of the Treasury finds that all its legal obligations have been provided for and its continuance is no longer in the public interest; the provision added by the Senate amendment would permit the Corporation to continue to handle litigation on its behalf until it is dissolved, thus avoiding confusion and expense.

The conference substitute includes the provisions added by the Senate amendment with the following changes:

(1) The sum of $50,000,000 is authorized to be appropriated to the revolving fund to be established from which advances may be made to the Administrator for the purpose of making loans to public agencies and for all necessary expenses in connection therewith, including administrative expenses.

(2) The public agency loan program is to be terminated on June 30, 1956;

(3) The provisions relating to the termination of succession of the Reconstruction Finance Corporation are omitted since they are contained in Public Law 438, approved June 29, 1954.

DISPOSITION OF CERTAIN GOVERNMENT HOUSING

The Senate amendment added to the House bill several provisions relating to the disposition of certain Lanham Act Housing, some of which were acted upon in separate bills by the House. The first of these would authorize the Administrator to acquire, by purchase or condemnation, certain lands in which he holds a leasehold interest, in order to expedite the disposal or removal of temporary housing (particularly in Richmond, California) located on such lands. The second would permit the disposal of war housing without regard to the applicable veterans' preference in certain unusual cases where (for any one of several specified reasons) the allowance of such preference would not accomplish the real intent and purpose of the veterans' preference provisions. The third would authorize the Administrator to convey certain demountable housing (not including land) in the San Diego area, without consideration, to (or in trust for) Indian tribes in Riverside and San Diego Counties in California, if the Secretary of the Interior certifies that such housing is needed to provide dwellings for the Indians. The fourth would authorize and direct the Administrator to sell to the University of California, at fair market value, two projects known as Canyon Crest Homes in Riverside County, Calif. The fifth would authorize the Administrator to sell to the Wethersfield Housing Authority (Connecticut), at fair market value, two projects known as Westfield Heights and Drum Hill Park in Hartford County, Conn., to be used by such Authority in providing moderate rental housing. The conference substitute includes the provisions added by the Senate amendment with two amendments to the so-called Richmond, California provision, one corrective in nature and the other that would prohibit any official or employee of the city from having any financial interest directly or indirectly in the purchase or redevelopment of any land that may be sold by the Federal Government to the city or its redevelopment agency. The conference substitute also contains a provision which would authorize the conveyance of a 156 unit temporary housing project to the Housing Authority of St. Louis County, Mo., and a provision permitting

the sale to the University of South Carolina of a 74-unit public housing project in Columbia, S. C., at fair market value and the use of the proceeds of such sale and the annual contributions now contracted for with respect to that project to be used for the development and operation of a project to replace the project thus sold.

DISPOSITION OF DEFENSE HOUSING

The Senate amendment added to the House bill a provision requiring that temporary housing which was constructed or acquired under the Defense Housing and Community Facilities and Services Act of 1951, and which is no longer needed for defense purposes (unless transferred to the Department of Defense or the General Services Administration under present law), shall be sold as soon as practicable to the highest responsible bidder (or, if any of the bidders are veterans purchasing dwelling units for their own occupancy, to the highest responsible bidder who is a veteran) after public advertising, or may be sold at fair market value to a public body for public use; such housing would be sold for removal from the site unless the governing body of the locality has approved the use of such housing on the site. The conference substitute includes the provision added by the Senate amendment, along with a further provision permitting the rejection of any bid for any housing being sold if such bid is less than two-thirds of the appraised value of such housing.

ADVISORY COMMITTEES

The Senate amendment added to the House bill a provision authorizing the Administrator and the heads of the constituent agencies of the Housing and Home Finance Agency to establish advisory committees to assist them in carrying out their functions, powers, and duties. Under present law (the Housing Act of 1949) only the Administrator has this authority. The conference substitute includes the provision added by the Senate amendment.

TECHNICAL PROVISION

The Senate amendment added to the House bill a provision amending the so-called School Construction Act to authorize Federal agencies to pay local educational agencies (for repairs or reconstruction) insurance receipts covering damage to or destruction of school facilities by fire or other casualty after such facilities have become eligible for transfer to the local agency but before the transfer has been completed; this authorization would, however, be limited to insurance receipts which are payable as a result of premiums paid by the local agencies. The conference substitute includes the provision added by the Senate amendment with a further amendment to correct the provision in title IV of the Housing Act of 1950 relating to the rate of interest on loans to institutions of higher learning for student and faculty housing. Under existing law, the rate must be determined on the basis of the going Federal rate, as defined in the law, which is applicable at the time the loan is executed. This rate frequently changes between the time the loan is first approved by the Housing Administrator and the time loan documents are prepared and ready for execution thus disrupting normal processing by the Housing Agency and changing the plans of the borrower with respect to the proposed project. The amendment agreed to by the conferees would provide for the interest rate on these loans to be determined on the basis of the going Federal rate in effect at the time the loan is approved by the Housing Administrator.

CONTROL OF LENDERS' CHARGES AND FEES

The Senate amendment added to the House bill a provision repealing section 504 of the Housing Act of 1950, which directed the Federal Housing Commissioner and the Administrator of Veterans' Affairs to limit and control the fees and charges imposed by lenders upon builders and purchasers in connection with mortgages and home loans. A similar provision in the House bill was eliminated when title II of the reported bill (relating primarily to mortgage interest rates and terms) was stricken out on the floor of the House. Section 504 of the Housing Act of 1950 is no longer needed, since adequate authority for the control of these fees and charges is otherwise available. The conference substitute includes the provision added by the Senate amendment. This is intended in no way to remove any protection afforded to veterans and other purchasers against excessive fees and charges in connection with VA and FHA home loans. The VA and FHA will continue to have adequate authority under other provisions of law to control fees and charges paid by purchasers in connection with the initiation of such loans and the disbursement of loan proceeds, and it is the intention of the committee of conference that those agencies will continue to exercise their authority to protect veterans and other purchasers against excessive fees and charges.

RECORDS

The Senate amendment added to the House bill a provision designed to insure that adequate records are kept by persons and local public bodies benefiting by participation in certain programs under the jurisdiction of the Housing and Home Finance Agency or its constituent agencies. The conference substitute retains, with some changes, the provision added by the Senate amendment. Under the conference substitute every contract between the Agency (or any official or constituent thereof) and any person or local body (including a corporation or a public or private agency or body) for assistance under the United States Housing Act of 1937 or the Housing Act of 1949 must require that person or local body to keep such records as the Agency (or such official or constituent) shall from time to time prescribe, including records disclosing the amount and disposition of the proceeds of any loan, advance, grant, contribution, or supplement thereto, the capital cost of any construction project for which the assistance is made available, and the amount of any private or other non-Federal funds used or grants-in-aid made for or in connection with any such project. In addition, a mortgage covering new or rehabilitated multifamily housing (as defined in section 227 of the National Housing Act) could not be insured unless the mortgagor certifies that he will keep the records prescribed by the Commissioner. All such records shall be kept in such form as to permit a speedy and effective audit, and the Agency (or any official or constituent thereof) would have access to such records and the right to examine and audit them.

APPLICANTS FOR ASSISTANCE REQUIRED TO SUBMIT SPECIFICATIONS

The Senate amendment added to the House bill a provision requiring applicants for housing assistance to submit full specifications with respect to the proposed construction or acquisition of land. The conference substitute retains, with some changes, the provision added by the Senate amendment. Under the conference substitute, every contract for a loan, grant, or contribution under the United States Housing Act of 1937 or title I of the Housing Act of 1949 must require the submission of specifications with respect to the construction of a project prior to the authorization for the award of the construction contract, and must also require the submission of data with respect to the acquisition of land prior to the authorization to acquire such land.

PUBLIC HOUSING AUDITS

The Senate amendment added to the House bill a provision designed to assure that the appropriate officials of the Federal Government will be able to audit and examine certain records which are pertinent to operations under the United States Housing Act of 1937. The conference substitute retains, with some changes, the provisions added by the Senate amendment. Under the conference substitute, every contract for loans or annual contributions under the United States Housing Act of 1937 must provide that the Public Housing Commissioner and the Comptroller General (or any of their duly authorized representatives) shall, for the purpose of audit and examination, have access to any books, documents, papers, and records of the public housing agency entering into the contract which are pertinent to its operations with respect to financial assistance under that Act.

REPORT TO CONGRESS OF INFORMATION ON HOUSING

The Senate amendment added to the House bill a provision relating to the reporting of certain housing information to the Congress. The conference substitute retains, with some changes, the provision added by the Senate amendment. The conference substitute specifically provides that the annual report of the Housing and Home Finance Administrator (provided for by sec. 802 of the conference substitute) shall contain pertinent information with respect to all projects for which any loan, contribution, or grant has been made by the Agency, including the amount of any loans, contributions, and grants contracted for. Such report would also contain pertinent information with respect to all builders' cost certifications required by section 227 of the National Housing Act, including information as to the amounts paid by mortgagors toward the reduction of the principal obligations of mortgages under that section.

JESSE P. WOLCOTT,
RALPH A. GAMBLE,
HENRY O. TALLE,
CLARENCE E. KILBURN,
Managers on the Part of the House.

Mr. WOLCOTT. Mr. Speaker, I yield myself 15 minutes.

Mr. Speaker, the conferees on this bill were conscious, in the discussion of the many points at variance between the Senate and the House, of the tremendous interest of this bill both to Members of the Congress and to the public at large. I think in the beginning we should have in mind that almost all important legislation is a matter of compromise. I want to make the general statement that when the bill was before the House I believe I made the statement that it contained about 99 percent of the President's housing program. Since then an investigation has been made of certain irregularities in certain of the constituent agencies of the Housing and Home Finance Agency, so the conferees were confronted with many problems, most of which had to do with writing a bill which would, in the first instance, encourage the construction of homes. And, I might say parenthetically that the conference report which is before us is estimated to make it possible to build somewhere between 1,250,000 and 1,400,000 homes each year. But, being confronted with these irregularities which were brought out by the investigation, the House made a great many concessions, all with the idea that we would tighten up the procedures in such a manner that the probabilities of recurrence of these irregularities would be reduced to a minimum. That has been our objective. I think we have

been successful. The tightening up of the procedures, as we all well recognize, could not be spelled out to the last detail in legislation. We had to leave many of them to regulations, and a broad provision in the conference report is to the effect that wherein we have not spelled out these safeguards in the legislation, generally speaking the administration may, by regulation, supplement the legislation with that objective in mind.

I know that many Members of Congress are more interested in public housing than in any other feature of the bill. However, public housing, although an important part of the bill, is recognized by those who have studied this problem throughout the years to have become a symbol perhaps; but that in respect to the number of houses which would be constructed under the bill, it did not take on the significance that many Members of Congress and many people in the Nation attributed to it.

I shall try to cover some of the highlights of the conference report in the brief time permitted me. In respect to title I, modernization and repair, we gave a great deal of consideration to that, because most of the irregularities were found in the modernization and repair program. You will recall that when the House passed the bill, we provided that modernization and repair insured loans could be made for $3,000 and a period of 5 years. The Senate amendment which was passed after the investigation, provided that these repair loans should be in conformity with existing law, which is $2,500 maximum with a maturity of 3 years. We accepted that.

In respect to the improvement and conversion of existing multifamily structures under title I, the present law provides a maximum of $10,000 and a maturity of 7 years. The House bill provided for $10,000, or $1,500 per family unit, with a 10-year maturity. The Senate bill struck that out. The conferees, in effect, accepted the Senate version which in substance retains existing law. But we did something else, which is most important to prevent recurrences of irregularities in title I, modernization and repair loans. Heretofore, a financing institution had in effect 100 percent of its entire portfolio of these loans insured. If an institution had $1 million worth of title I loans, they would suffer no loss until their loans in default exceeded $100,000. Because of the very few losses relatively speaking on an individual basis, the financial institutions always had about 100 percent insurance on these loans. We have in this bill what is known as the coinsurance feature under which the lending institution now will have to assume some authority, some responsibility and risk.

Instead of the portfolio being insured in effect in full, now the lender will take 10 percent of the loss on each individual loan. That will compel the financing institution to administer these loans much more carefully or it will have to take actual losses.

In respect to the FHA insurance of houses, you will recall that the House provided for the same insurance on old houses as on new houses. The House had provided for 95 percent on the first $10,000 and 75 percent on the excess over $8,000, with a maximum on 1- and 2-family units of $20,000. The Senate provided 95 percent on the first $8,000 and 75 percent over $8,000 in the case of new houses and 80 percent for old houses. The House maximum on 1- or 2-family units was $20,000. The Senate reduced that to $18,000. The House provision on 3-family units was $27,500. The Senate reduced that to $24,000. The House provided on 4-family units a maximum of $35,000. The Senate reduced that to $30,000.

Of course we had done nothing whatever that would have applied to old houses as well as new houses, but we created a new formula for old houses which I think probably is better in the circumstances than the one we had. The problem there was, when a house was old, how was it going to be determined whether it was going to last during the period of amortization? So although the loan to value ratio is 95 percent of $9,000 plus 75 percent of the excess over $9,000 for new houses, on old houses we provided for 90 percent on the first $9,000 and 75 percent over $9,000, but the President is authorized when the general economy is such as to require it or where the condition of the building industry—I am speaking broadly now—requires it, he may increase the $9,000 figure to $10,000.

The maturities on old houses instead of being not to exceed 30 years as provided in the House bill is limited to three-fourths of what the Federal Housing Administration estimates to be the remaining economic life of the building, or 30 years, whichever is less.

A comparable situation has to do with section 221 housing, in which you will recall the House had provided for 100 percent insurance and 40-year maturities with $200 to cover closing costs. The Senate provided 95 percent of the appraised value. The 95 percent prevailed, with the same maturity provision of three-quarters of the estimate of the remaining economic life.

A very important and interesting provision is explained on page 71 of the statement, which has to do with insurance for servicemen. Under existing procedures and law if a man is a veteran or would be a veteran if he were not in the service—that is if he stays in the service and continues his service beyond the time when he might otherwise have been discharged, then we have provided that that serviceman may take advantage of these special FHA provisions in order to provide accommodations for him and his family. These provisions are contained in the new section 222 of the National Housing Act.

On the question of cost certification: We gave a great deal of study to that. In substance but not in detail, we have included provisions which will prevent mortgaging out.

Let me say that I believe anyone may vote for this conference report with the assurance that we have prevailed in 99 percent of the President's program.

I think probably I should take a few minutes to discuss public housing. You will recall when the bill left the House, it made no provision for public housing. The other body provided for 35,000 units for each of 4 years, for a total of 140,000 units of the total of 810,000 units authorized under the Housing Act of 1949. Under the language, as proposed in the other body, there was no cut-off date. They would merely postpone the authority under the Housing Act of 1949 which, as I said, authorized a total of 810,000.

Now, it will be recalled that when the House had before it this question we had the so-called Widnall amendment, in which for 1 year 35,000 units were authorized. I might say that it seemed advisable that we take a look at this program each year and determine whether it would be necessary the second year to authorize another 35,000 new units or any part of 35,000 units. That was perfectly satisfactory to the administration. I dare say that 95 percent of the people of the United States, including at least 50 percent of the Members of Congress, had always thought of public housing in connection with slum clearance, and there has not been a discussion on public housing in this Congress but what there has been a claim made that we must have public housing if we are going to have slum clearance, or slum clearance and public housing are one and the same thing. Nothing could be further from the fact than that; but, to bring these provisions within the realm of understanding of so many people, and to give the administration authority to take care of those people who are being displaced from slum clearance projects, the conferees restricted these 35,000 units for the fiscal year 1955 in this manner: We provided that after the 1955 program, which calls for 35,000 new units, the public housing program would stop as provided in language contained in the Independent Offices Appropriation Act for fiscal 1954. We also provided that within this limitation of 35,000, which were made available for fiscal 1955, the local governing body—not a local public housing authority, but the local governing body, we will say the common council, must certify that the public housing units within this limitation of 35,000 are necessary to accommodate people who are to be displaced by the slum clearance projects, and the Housing Administrator must also limit the number of public housing units to those required to accommodate the families which are to be displaced. Those who will say that public housing is necessary as an adjunct to slum clearance surely can have no objection to tying in this program with slum clearance. If a slum clearance project is not being carried out in any area, then they cannot get public housing. A slum clearance or urban renewal or redevelopment project is not being carried out until at least the final plans have been approved by the Federal Government.

Mr. WIER. Mr. Speaker, will the gentleman yield?

Mr. WOLCOTT. I am sorry, I cannot yield.

With those limitations we believe we have dealt constructively with public housing, and we are sure that the House will recognize that we have done so. We

hope the conference report will be adopted as submitted.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. WOLCOTT. Mr. Speaker, I yield 15 minutes to the gentleman from Kentucky [Mr. SPENCE].

Mr. SPENCE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, to include therein a part of the President's message with regard to low-income housing and a telegram by the president of the American Federation of Labor.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. SPENCE. Mr. Speaker, there seems to be some contrariety of opinion on the majority side as to what the President's program was and is in regard to public housing. Some of our Republican colleagues say they have had conversations with him and he has expressed an opinion on public housing other than that in his housing message.

The President wrote a carefully considered message on housing; that was the only subject that was discussed, and that message was unequivocal, definite, and certain. No man could read that message and have any doubt about the President's desires as to public housing.

That message came to the Congress, but it was also a message to the American people. It was heralded throughout the length and breadth of this land, from the Atlantic to the Pacific, from the gulf to the lakes, that the President wanted 140,000 units of public housing distributed over 4 years at 35,000 a year. How anybody can say that this conference report meets the President's views is more than I can understand. The President has expressed his views in a way they cannot be misconstrued or misunderstood, and he expressed them for a purpose. His purpose was to tell the American people what his views were on this most important subject. I assume that if he had changed his views he would have written another message. He has not done so. The gentleman from Michigan said that the most interesting part of this program is public housing.

We are spending billions of dollars in fighting the spread of communism. We are also spending a great deal of money to prevent subversive activities. I grant you that the infamous communistic conspiracies are not formulated in the slums, but the slums are where they get their proselytes and their converts. Where there is unhappiness, poverty, and disease, the people readily fall victim to subversive conspiracies. Slums are a malignant cancer not only on the city but also on the Nation. It is not solely a city problem.

The President has said what he wants. He has asked for bread and you have given him less than a stone. Yet you claim you have complied with his wishes. I do not think that low-rent public housing is solely a means of clearance of slums. But how are you going to clear the slums unless you have homes for the people that are dispossessed? Here you have a fantastic proposal. The slum dweller is given an opportunity to purchase a house costing $7,600, or in high-cost areas where most of the slums are, $8,600, and pay 5 percent down. Five percent of $8,600 is $430. Then he would have to pay the other charges, such as examination of title, survey cost, and other things which would certainly run it up to about $600. The monthly charges would be $78 a month, I am informed.

Do you believe this is an effective method of relocating people who live in the slums? If a slum dweller were able to pay these sums would he be in the slums of his own volition? So I say there is no provision in this report to help families of low income or to get them out of the slums.

The public housing program was founded on the principles of charity and justice. When you give a man the opportunity to obtain better housing so that his family may have sunlight and healthful surroundings he will have the courage and inspiration to improve his social and financial standing. That is not a bad program. It is not socialistic. There are many big interests that have had favors from the Government so great that they could let their Government subsidies pay for all the public housing units. When the poor ask for something that is socialism. I say the Democratic Party stayed in power for 20 years because of its humane and forward-looking program. If you follow your present course we will come back and stay in power for another 20 years.

There may be some features of this bill that are commendable. I am not saying they are all bad. But I do say the thing that the gentleman from Michigan said we were all interested in more than anything else, public housing to assist the people in the low-income group, is totally inadequate. This is the issue, whether you are going to do something for the people who really need it and in doing that whether you are going to do something for your country and raise the standards of our citizenship and strengthen the security of our Nation.

Nobody can justify slums in this era; nobody can justify our failure to do anything about the slums. The slums are not only a menace to our society, but are very costly. They increase the cost of your health activities; they increase the cost of your fire department; they increase the cost of your police department; they are a bad thing and we should have done something in this bill to remove them. We have not done it. That is plain and that is the issue and we are willing to meet it.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. SPENCE. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Is my understanding correct that, under the conference report, 15 States could not get 1 single unit of public housing because the laws in those States do not authorize redevelopment authorities?

Mr. SPENCE. That is true. The public-housing provision is limited to only 1 year, with 35,000 units. It is so wrapped up in redtape and obstruction that I do not believe there will be 10,000 units put into effect. How are you going to distribute a few units like that amongst the cities of the country that need them?

I have seen the effects of public housing in my own community. I have seen it convert a blighted area into a desirable residential neighborhood where people live decently. This is certainly a proper function for our Government to perform under the Constitution. The people, in the last analysis, are the Government of the United States. When you improve our people you are adding stability and strength to our Government.

When the appropriate time comes, I shall offer an amendment to instruct the managers on the part of the House to insist on the President's program as set forth in his message of January 25 of this year. If you want to follow the President, here is an opportunity to follow him with confidence and assurance that you are carrying out the program clearly expressed in his housing message to the Congress and to the people.

[From the President's message on housing of January 25, 1954]

III. HOUSING FOR LOW-INCOME FAMILIES

The continued lack of adequate housing, both new and used, for low-income families is evidence of past failures in improving the housing conditions of all of our people. Approval of my preceding recommendations will increase the opportunities of many families with low incomes to buy good older homes. But a more direct and more positive approach to this serious problem must be taken by the Government. I recommend, therefore, a new and experimental program under which the Federal Housing Administration would be authorized to insure long-term loans of modest amounts, with low initial payment, on both new and existing dwellings, for low-income families. The application of this new authority should be limited to those families who must seek other homes as a result of slum rehabilitation, conservation, and similar activities in the public interest. I recognize, as did the Advisory Committee, that this program represents a challenge to private builders and lenders. In order to assist them in meeting this challenge, a greater proportion of the risk should be underwritten by the Federal Housing Administration than it regularly insures. The successful development of this program will afford a much greater proportion of our lower-income families an opportunity to own or rent a suitable home.

Until these new programs have been fully tested and by actual performance have shown their success, we should continue at a reasonable level the public-housing program authorized by the Housing Act of 1949. I recommend, therefore, that the Congress authorize construction, during the next 4 years, of 140,000 units of new public housing, to be built in annual increments of 35,000 units. Special preference among eligible families should be given to those who must be relocated because of slum clearance, neighborhood rehabilitation, or similar public actions. The continuance of this program will be reviewed before the end of the 4-year period, when adequate evidence exists to determine the success of the other measures I have recommended. In addition to this requested extension of the public-housing program, the Housing Administrator will recommend amendments to correct various defects which experience has revealed in the present public-housing program.

WASHINGTON, D. C., *July 19, 1954.*

Hon. BRENT SPENCE,
House Office Building,
Washington, D. C.:

Action of the conferees on the proposed Housing Act of 1954 (H. R. 7839) limiting public housing authorization to 35,000 units for 1 year and restricting occupancy of public housing units to families displaced by slum clearance would kill all chances for even a minimum public housing program. The President's recommendation for 140,000 units to be built over a 4-year period represents a rockbottom minimum program. Slum clearance cannot go forward unless low-rent, public housing is available in advance of clearance operations to house displaced families. Urge you do everything possible to obtain a vote in the House of Representatives to recommit the bill to the conference committee with instructions to adopt the President's program of 140,000 units over a 4-year period with no restrictions on occupancy.

GEORGE MEANY,
President, American Federation of Labor.

Mr. WOLCOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Alabama [Mr. RAINS].

Mr. RAINS. Mr. Speaker, I must say, as I said when the housing bill was being considered in the House, there are some good features in the bill, most of which were retained in conference, and some features which are not good, about which I assume we can do very little here.

In the first place, I cannot share my good chairman's optimism about this bill being the vehicle on which we can hope to construct 1,250,000 to 1,400,000 houses. I do not want to pose as a prophet, but I am afraid that will not be the record 1 year from today.

As I said on the floor during debate, when we had this bill before us, one of the things which I think is drastically wrong with both the Senate and the House bills, is the failure to provide adequately for the necessary mortgage credit. I asked for this time—and I appreciate the chairman's giving it to me—merely to make 3 or 4 brief explanatory statements. I am not going to argue the point of public housing. Everybody here knows how he is going to vote. But I want the record to be clear. I do not want anyone to be under any delusion that this bill has the public housing program proposed by the President in it. Those who are opposed to all public housing should be pleased by this bill. Those who are not opposed to public housing should be displeased by this bill very much. The issue is clear cut.

Thirty-five thousand additional units of public housing are purported to be authorized in this conference report; but, as the chairman said, they could only be used to rehouse families displaced as the result of governmental action—local, State, or Federal—in a community carrying out slum clearance or urban renewal under authority of title I of the Housing Act of 1949.

Even though your community had complied with section 101 (c) of the Housing Act of 1949, and had "a workable program to eliminate and prevent the development or spread of slums and urban blight"—approved by the Administrator of the Housing Home and Finance Agency, it would not qualify for public housing under the public housing provision in the conference report.

Fifteen States—and I name them: Arizona, Florida, Georgia, Idaho, Iowa, Mississippi, Montana, Nevada, North Dakota, Texas, Utah, Vermont, Washington, Wisconsin, and Wyoming—do not have laws authorizing slum-clearance and urban-development projects. In Kansas, Maine, Indiana, and Nebraska authority for these projects is limited to one city.

Contracts for the public housing units under the conference report would have to be signed by June 30, 1955; and, as the chairman stated, the local governing body of a community would have to certify that public housing is necessary to relocate families displaced by a slum-clearance project.

It is my information—and I believe it to be correct—that only 214 communities in the United States have received even tentative approval—that is, HHFA reservations for capital grants—for slum clearance or urban redevelopment. And only 24 communities in the United States—those with an HHFA final loan-grant contract—have reached the stage where they could make the finding necessary to qualify for public housing under the conference report.

It is further my information that several of the communities which could qualify—Newark, N. J.; Norfolk, Va.; Kansas City, Mo.; and Nashville, Tenn.—already have well-rounded urban redevelopment programs and have all the public-housing units they can use at this time.

In other words, if your community is one that does not now have the slum clearance under title I and your community were to take action immediately to qualify, it would take a minimum of 2 years to be in position to take advantage of the public-housing provision in the conference report.

Mr. WOLCOTT. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Speaker, I noted when our very distinguished chairman called up this conference report he referred to it as "the conference report on the so-called Housing Act." I do not think he referred to it that way facetiously, I think he meant just that. It is "a so-called Housing Act." It is not a Housing Act that will produce the kind of housing that the Members of Congress have indicated the country needs.

I do not find fault with any of the conferees who I know devoted themselves sincerely and zealously to the task of bringing back a good housing bill. I do find fault with the report which brings back a bad bill. Yes, as has been said, there are some good things in the bill, but I think the bad far outweighs the good.

I daresay this may be one of the important political issues of the forthcoming congressional campaign, because when you get right down to it, whether you want public housing or low-cost housing or middle-cost housing, you are not going to get much of any of it out of this bill.

As the distinguished gentleman from Alabama [Mr. RAINS] tried to point out to you, while the bill calls for 35,000 new public housing units in the next year, and as the distinguished gentleman from Kentucky [Mr. SPENCE] also pointed out, it is certain that with these many conditions and ifs and buts and particularly the one that requires the contracts to be made not later than June 30 of 1955, you will not get a single new unit of public housing under this bill. There is not a community that can plan and consummate the negotiation of a contract for public housing in less than 2 years. Therefore, that June 30, 1955, limitation in this bill means you will get nothing by way of new public housing out of this legislation.

When the time comes for the distinguished gentleman from Kentucky [Mr. SPENCE] to offer his motion to write into this bill the President's program, I have no doubt that many of our friends in the majority party will leave their President, and I have just as little doubt that the day after we will get an announcement from the White House that the President endorses the candidacies of Republicans who will support his program. I wonder where he is going to find them. I know that in most congressional districts, the people will be looking for them in vain in November of this year.

For many years we have been pointing out other defects in the Housing Act. You have heard and read a great deal about the windfall profits that have been made by builders. Let me tell you, as I have told you before, that if there have been any windfall profits made by these builders on any part of this program the Congress is responsible for it. The Congress encouraged it and the Congress condoned it.

Despite the many warnings that have been given to you, you are writing into this bill today, if you pass it as it comes to you from conference, the right and the privilege to continue to make those windfall profits.

Oh, there is a nice little clause here that says you must get a certification of costs from the builder of the rental housing, that is, rental housing that contains more than 4 units, but on the 1-, 2-, 3-, and 4-family units no certification is required and the builder can go on his merry way reaping all the profits he can get out of the building and out of the mortgage money, with your Government insuring that he will not lose a nickel of his money, and your Government insuring that the mortgagee that advances the money will get every dollar of principal and interest back. I remember only a few days ago, publication of some of the testimony adduced in the committee of the other body, showing how in 1 project alone, over $4 million was made in a single project by an operator who constructed and sold 1-family projects—one-family houses which were built as independent units and which were not rental housing. You preserve the same very bad features in this bill which is now before you.

There are many other bad things in this bill, the worst of which is the give-away program by which Fanny Mae will be turned over to the mortgage lenders

of the country. The same people who talk about creeping socialism resent our pointing out how this bill subsidizes, with the taxpayers' money, the bankers and the builders of the country. The term "socialized credit" very aptly describes this program. The threat to the free enterprise capitalistic system will not come from helping the masses to help themselves. It will come from give-away programs like this which give the wealth of the country to the capitalists of the country, at the expense of the taxpayers.

The conference report should be rejected.

Mr. WOLCOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Speaker, I am addressing my remarks to the conscience of the House.

There are little children in the slums of our big cities. There are women, mothers of those children, and there are fathers who have the same eager longing as fathers in more comfortable circumstances to give to their wives and their children the conditions of a healthy and wholesome atmosphere. They need our help. The little children who go to bed at night hungry, and on the morrow awaken to another day of drab existence, can be helped by us if we will permit our consciences to guide our actions.

Earlier in the day the great and distinguished Speaker of this House, calling its Members to attentive quietude, said that this is one of the most important days of the 83d Congress. He spoke as always is his custom with clear and precise understanding. Today we in the 83d Congress are to make the decision by which this Congress will be judged by those who in later years will write the history of this period. There is but one question here to be answered: Will the House of Representatives of the 83d Congress ruthlessly crush the dream envisioned in the Housing Act of 1949, the dream of a United States of America free of the blight of miserable and hopeless slums?

I need not remind my colleagues on the other side of the aisle that this has been called the Congress of big business. It is true that this Congress has been lavish in the subsidies that it has given in aid of industrial and banking interests. As the great Kentuckian [Mr. SPENCE] has well said this has never been subjected to the same sort of criticism as is being leveled at the Housing Act of 1949.

My memory goes back to 1949 when there was enacted a housing act of which the late Senator Taft was one of the authors and one of the outstanding champions. Now in the year of his death, when the tributes of affection given at his bier have scarcely been silenced, there are those in this body who loved him and those who followed him with loyalty and fidelity and gave to him the proud title of "Mr. Republican," who are asked to vote for the death knell of the public-housing program which was the heart and soul of the Housing Act of 1949. How can you do it? How can you so quickly forget those words of counsel that came from the lips of your leader now fallen?

The proposal brought back to us by the conferees is for 35,000 new units of public housing, and then the end for all time of the program that the late Senator Taft thought he had assured as his greatest contribution in public service to his country. It would be bad enough if there were to be 35,000 new housing units, and then the end. But this proposal goes further than that. It is a mockery since the conditions under which these 35,000 new housing units may be contracted for are impossible to be met. The distinguished gentleman from Alabama [Mr. RAINS] has shown how fantastic is the pretense that the report of the conferees actually provides for the continuance of the public housing program on any scale even for 1 year. I have checked carefully and I can say with certainty that under the conditions imposed not one new unit of public housing will come to the city of Chicago.

It is like strapping a man to a chair, putting food on the table beyond his reach, and telling him dinner is served.

If this is what you on the other side of the aisle call saving the face of the President, I am afraid that the burning cheeks of the man in the White House will be your own only answer. He will wish from the bottom of his heart that the matter of his face treatment had been left in friendlier hands. The President asked for 140,000 new housing units. You of whom he asked it, the members of his own party, some of whom only yesterday asking his blessing and being photographed with him for purposes of a forthcoming campaign, today are asked to vote to give him not 140,000 housing units but the scant 35,000 so conditioned that there will probably come from it all not one single new housing unit.

Where are your consciences, where is your loyalty to the late Senator from Ohio whom you professed to love and whom you followed in the days when the path seemed to be leading to the power of the Presidency? Some of you followed the star of General Eisenhower in the preconvention period. All of you on the other side of the aisle were hitched to and were benefited by that star in the campaign that followed the conventions. Where now is your loyalty to your chieftain?

General Eisenhower as a candidate pledged himself to giving a helping hand to the most unfortunate of our fellow Americans, the men and the women and the children who are doomed by the destinies of their lives to the hopeless environment of the slums. As President of the United States he acknowledged his pledge, he said that he would be true to that pledge, that he might not go as far as had been charted in the Housing Act of 1949, in the enactment of which the late Senator Taft was a vital factor, but that he would use all of the influence of his own personality and the prestige of his office to see that there was provided a minimum of 140,000 new housing units.

Where are your consciences that one day you can ride on the coattails of your President, and the next day subject him to the greatest humiliation that has ever been given to the President of the United States by the members of his own party?

I shall vote with the President of the United States. When it comes to giving a helping hand to misery, to relieving as much as God has given the power to do the distresses of the less fortunate, there should be no semblance of politics. I would have preferred the full program as approved and championed by the late Senator Taft and for which I, as a member of the Banking and Currency Committee, worked and voted for in the 81st Congress.

The gentleman from Kentucky [Mr. SPENCE], the chairman of the Banking and Currency Committee in the 81st Congress, whose masterful leadership gave to the Nation the greatest housing act in the history of any nation, will move to amend the pending measure to conform with the recommendation of President Eisenhower of 140,000 new housing units.

I shall support the motion of the great Kentuckian. I hope that conscience and a sense of loyalty both to the late Senator Taft and to President Eisenhower will persuade my colleagues on the other side of the aisle to do likewise.

Mr. JAVITS. Mr. Speaker, will the gentleman yield?

Mr. O'HARA of Illinois. I am glad to yield to the distinguished gentleman from New York.

Mr. JAVITS. I will say to the gentleman that I intend to support the motion to recommit, and that I believe we should back up the President. I believe that the masterful job which has been done here is to reconcile people who are generally unfavorable to federally assisted low-rent housing. But I think those who are favorable to federally assisted low-rent housing have their last chance to vote, and must get behind it today, because I am convinced it will be a major issue in the cities, certainly, in the elections of 1954, and that the great majority of the city people want the President's program.

It is incompatible with the majestic power of Government to provide without providing. The conference report says it authorizes 35,000 federally assisted low-rent housing units for the next fiscal year but the condition tied to it reduces the figure to an estimated 10,000 units. The President has already given us a program which is so reasonable as to be on the minimum side of 35,000 of such units each year for 4 years a total of 140,000 as voted by the other body and we can understand and agree with the President's views which were designed to attract the most widespread support for the program at the same time that it met the rockbottom needs as found by the survey of a Presidential Commission. The reasonable administration program meant just 3 percent of new housing starts to be federally assisted low-rent housing designed to help one-third of our country's families, which come within the generally eligible income brackets, to meet their housing needs. Slum clearance, urban redevelopment, and community development must have advance planning. No such

opportunity is given adequately under the legislation now in the conference report.

In addition, tying federally assisted low-rent housing to relocation of eligible tenants displaced from slum clearance is impossibly restrictive as it excludes balanced community development with the aid of Federal low-rent housing. Relocation of tenants displaced due to road improvement and other municipal improvements, areas where slum clearance is impractical, the avoidance of the creation of new slums, and the use of open land with great savings is made difficult if not impossible in federally assisted low-rent housing under the conditions of the conference report. State and municipally assisted low-rent housing programs, experience has shown will not flourish unless sparked by federally assisted low-rent housing. It is significant to me that the senior Member of the other body from New York, one of the conferees refused to sign this report. Though the report has many desirable features, and my whole record shows my devotion to all measures to increase the overall supply of housing, I cannot support this report unless it carries at least a minimal amount of federally assisted low-rent housing without impossible conditions as in this way alone is it a balanced housing program for all the American people.

Mr. O'HARA of Illinois. The gentleman from New York, as usual, has spoken with clarity and realistic understanding of conditions in the large urban centers of the Nation. Those who vote to approve this proposal are giving a death blow to public housing. More than that, they are saying to the little people of America, the little people who live in miserable circumstances, the children in the slums, and the mothers and fathers of those children, that this Government has no heart for them. Those who are photographed shaking hands with the President on Monday should not permit themselves to be found on Tuesday stabbing him in the back.

Mr. Speaker, the vote today will be an issue in the congressional campaigns soon to be in full swing. In my own city of Chicago, with a growing unemployment and a greatly diminished family income, the housing shortage continuing, rents are soaring beyond the financial ability of tenants. They have got completely out of the control of the responsible real-estate bodies.

For 2 weeks there has been lying on the shelf of the Rules Committee my resolution for a select committee from this body to look into the housing and rental situation in Chicago and other urban centers. Come September tenants are faced with meeting further demands for rent increases or eviction into the streets. Their only hope is in quick action by this body, an investigation helpful both to tenants and to real-estate owners who will be ruined by a speculator's runaway spree. Nothing is being done.

It is not only the most unfortunate of all, the human beings living in misery in the slums, who receive no listening ear, no helping hand. The vote today on the motion to provide 140,000 new housing units, as proposed by President Eisenhower, will furnish to the people a true index of your intention toward all who suffer from a continuing housing shortage and for relief are given no housing program to bring decent roofs within the reasonable reach of a majority of our people.

The SPEAKER. The time of the gentleman from Illinois [Mr. O'HARA] has expired.

Mr. GARMATZ. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. GARMATZ. Mr. Speaker, this conference bill on housing has been variously described as a "compromise" or as a "partial victory" for President Eisenhower on the public housing issue.

Actually, it is death for public housing—not quite sudden death, it is true, but a lingering, agonizing, 12-month decline into a corpse.

Here is how the so-called compromise works: The 33,000 units presently committed and presently being built cannot, of course, be stopped. They will go on to completion. This bill says that an additional 35,000 units can be arranged for by the Housing and Home Finance Agency and the housing authorities of the various cities, and that is all. After those 35,000 units are committed for, the program ends.

But even while authorizing this anemic diet for the final year of public housing, the conference report puts ground glass in it by providing that only those families actually displaced from their present homes by redevelopment can be housed in the new units.

That will so limit and so restrict the practical use of these last remaining 35,000 units of public housing, that many cities will have no use for them.

So, under this bill, as I said, we are not only starving public housing to death in the next 12 months, but sticking knives into the victim and feeding it ground glass to speed its demise.

Is this, then, a compromise on the 140,000 units over 4 years that the President asked for? Certainly it is no compromise at all, but a one-sided victory for those who most bitterly oppose any and all public housing.

I have seen some news stories on this bill which indulged in this kind of arithmetic:

First. The President asked for 140,000 units over 4 years.

Second. A total of 33,000 units is now going forward.

Third. A total of 35,000 units is proposed in this bill.

Fourth. Add 33,000 and 35,000 and you get 68,000.

Fifth. Therefore, President Eisenhower is getting just about half of what he asked for, since 68,000 is about one-half of 140,000.

What the arithmetic ignores is that President Eisenhower asked for 140,000 units over and above the 33,000 units which were already in the works under previous programs. He asked for 140,000 new units. He is getting 35,000.

Actually, Mr. Speaker, we need and could use at least 100,000 units of new public housing in this country every year. The President's Council of Economic Advisers recently reported how housing starts in this country have been down every month this year, below comparable levels of the previous years when we were building well over 1 million new American homes a year. We need vast numbers of new homes for the growing population of the United States, as well as for the dwellers of slums who live in quarters unfit for human beings.

Recently, Mr Speaker, I noted for the House some comments on the housing situation by Hans Froelicher, Jr., who is generally regarded as our "Mr. Housing" in Baltimore, and is nationally known as president of the Citizens Planning and Housing Association, which has been instrumental in the rejuvenation of Baltimore's slum housing and in planning for a better-housed community generally.

Since quoting those extracts from his remarks as contained in a Baltimore Sun news story following a dinner of June 1 honoring Mr. Froelicher's 10th anniversary as president of the Citizens Planning and Housing Association, I have come into possession of the full text of the talk he delivered that night.

In view of the fact that it shows the problems of those civic-minded people in our communities trying to band together to help rid our cities of the slum blight, I think it would be appropriate to have it included in today's CONGRESSIONAL RECORD which also contains the debate on this housing bill, and so I ask unanimous consent that it be printed in full in today's RECORD.

But I should like to quote briefly from it right at this point:

> Rebuilding and renewing a city takes as long as history. In fact, it is history. It takes the greatest part of the financial substance of each citizen. This places at the door of business an immense responsibility. Businessmen, and only businessmen, can make it possible for change to pay. How long shall we wait for Baltimore businessmen boldly to plan and execute a transformation like that in Pittsburgh? * * *
>
> Bad housing is the cancer of our cities and for this cancer there are many tonics but only one specific. That specific is our acceptance of responsibility for our neighbors and ourselves with all the sense and ingenuity that we can muster.
>
> I challenge each of you that there is very much to do. This challenge goes to you who know the problems and especially to you who face these facts for the first time tonight. What you owe is to yourselves because there is no one here whose health and home, whose wages and taxes, are not affected by our negligence. There is no one here who does not sink as the waters of living seek their lowest level.

Mr. Speaker, I think the philosophy this represents, coming from a man credited with accomplishing miracles in Baltimore's housing redevelopment and rehabilitation, should impress us all with the urgency of making redevelopment more practical and more effective, and that means a real public-housing program, not the halfhearted kind the President has suggested. Certainly it means doing much more than this bill

proposes, for this is a bill to murder public housing within the year.

I wonder if the conferees who agreed to this anti-public-housing bill have ever seen and smelled and understood what slums are really like, and what they do to the human beings so unfortunate as to have to live in these wretched hovels. I do not see how anyone who has visited such neighborhoods could ever again question the need for public housing for those for whom private enterprise just cannot, as a practical matter, provide decent shelter.

As a last word, I would like to quote Hans Froelicher's recollection of his first tour of a slum area—his first introduction to a field in which he is now a nationally recognized expert. He said:

> I must have touched something because I wanted nothing except to take a bath and burn my clothes. I could not bear the thought of food because I had seen and smelled a rotting mass in a filthy, faulty outside hopper.

Mr. Speaker, it is not a pretty picture to reconstruct here in the dignity and quiet elegance of the House Chamber, but it is a picture drawn from life—and it is our job to face life as it is and do what we can about improving those things subject to our jurisdiction. This is one area where failure of the Congress to act, where unyielding opposition to public housing, would reflect the same blindness to conditions that characterized Marie Antoinette's innocent remark that if the populace was unable to get bread, why do not they eat cake? She did not know any better; she had no way of knowing the people were starving.

Is Congress similarly unaware of the tragic housing needs of large segments of the American people? Are there Members here who believe, with Marie Antoinette's innocence, that people live in slums out of choice?

They live there, Mr. Speaker, not out of choice, but out of desperation. This bill condemns them to stay where they are—in the filth and in misery—and to raise their kids as best they can to love an America which seems to forget them.

Mr. Speaker, under unanimous consent of the House during my talk today on the conference report on the housing legislation, I include a moving speech entitled "Ten Years As a Volunteer" by Hans Froelicher, Jr., at a dinner in his honor in Baltimore on June 1. Mr. Froelicher, president of the Citizens Planning and Housing Association of Baltimore, has been the sparkplug stimulating Baltimore's remarkable progress in restoring housing standards in our community. But despite all this progress and Baltimore's national wide reputation for the work it has done in this field, he notes that Baltimore still has the highest percentage of dilapidated housing of any large city and that much remains to be done.

It is very fitting, I believe, that his philosophy of combatting housing blight should go into the same CONGRESSIONAL RECORD which contains the House debate on the issue of public housing, as it has been drawn in the conference report seeking to kill public housing.

Mr. Froelicher's address is as follows:

TEN YEARS AS A VOLUNTEER

(Address by Hans Froelicher, Jr., June 1, 1954)

The days ahead will never be enough in which to thank you for your thoughtfulness. That I must do tonight. That goes double for Joyce Froelicher and me. We love people and it is in our hearts to love and to trust them. For us, this night is a renewal of our faith—a wonderful sign, outward and visible. If tomorrow's light and duties cut us down to size, it will not be the same size. We shall be, to paraphrase the words of our Park School prayer, "a little happier and a little better for your influence." You have added to our size because you have, by coming here, inspired and wrought in us a greater dedication for tomorrow. Our deepest thanks to each of you.

I had my moment of vanity when it was first suggested that I might be the guest of honor tonight. Vanity passed, and following came fear: fear lest there be some who thought that naming one volunteer would be affront of arrogance toward the so very many others. Then fear was gone because I knew a story that should be told. I tell it as your volunteer-in-common.

I shall not try to unwind all the threads which have been shuttled into the pattern woven here tonight. For each part I have had, there have been so many, many others lending their talents and their devotion that time would run out if I tried to name their names. They know, and so do I, that we are a fabric: each one a thread to make the fabric strong and each one, in his especial hour, the thread to hold the whole together. This dinner is, therefore, much deeper than an individual honor. It is a testimony that there must be the volunteer in our democracy. Where volunteers are able to make good-objectives-for-citizens into good politics for politicians, they supply the leaven which can make democracy rise to its point of greatest realization: to the point where government is made to serve its citizens. Your presence here is recognition of this fact, a fact of which I am one symbol.

My story is a story of people, first a few, then more, then many, many more. I hesitate to call it a movement because even in its ever-increasing complexity it was at first and is now and always will be the people.

CPHA began in the minds of a few who saw the desolation and the waste there is in slums. Very simply, they decided that slums should be eliminated. They set out to enroll others in their tiny Citizens Housing Council. Social workers were the nucleus, but they knew from the beginning that a broader base was needed from which to work. At that time in Baltimore there was no housing code. A sample of public housing had slipped into the city in place of slums and there it was, un-understood. Urban redevelopment was a phrase to describe the dream of planners. The odds against housing reform were tremendous.

The social workers and their friends found other friends. They found professional people: planners, architects, lawyers, educators, representatives of labor, all seeking support for a dream. The tiny council became the Citizens Planning and Housing Association. It was launched with a series of seminars at the Peale Museum. That was where this one volunteer came in. I listened, and if I listened with dismay, I learned. I learned that there is no escape from the cost of blight to me even if I move from Bolton Street to Prettyboy. My wages must depend on the city's business health—on its piers, its stores, and its factories. The foundation stone of the city's business health is the city's real estate and nothing is more vulnerable to carelessness. Let a house, let a neighborhood run down and with such slippage go tax values and then taxes. The blighted place costs more to run, more, much more, than it yields in taxes. This waste becomes the burden of our piers, our stores, and our factories. This is not all. No one has invented the bookkeeping machine which calculates the cost to me of the crime and the illness fostered by, and festering in, an overpopulated slum. But any man can tell when a slum disease moves into his family and when a slum-bred highwayman snatches his woman's purse and slugs him or slugs his peaceful neighbor. If I am impelled blithely to traipse to Prettyboy from Bolton Street, what absurdity is there if a business moves from Canton (Baltimore) to Canton (Ohio)? I cannot simply stand aghast at the cost of slums, nor can I move away when I know there is a place at which a part of this could stop. For me, myself alone, I owe what hard and commonsense I can hammer out to save my wages, my body, and my spirit.

I heard all this. On all this I pondered. And then I went to see. I took a slum tour.

For the first time I sensed a slum. I had been there before, but I had traveled with passing glance. This time my senses took them in.

I must have touched something, because I wanted nothing except to take a bath and burn my clothes. I could not bear the thought of food because I had seen and smelled a rotting mass in a filthy, faulty outside hopper. Most ominous of all was the way the neighborhood drew in its skirts. Shutters closed, children were beckoned into their houses. I was an intruder, I was resented. Here and there I saw a potted plant, a trim curtain, or a little girl in starched and spotless gingham. How come these somethings? Was there some hope in this? Was there ought a man could do?

Never was greater call for doing good. Never was a "do-gooder" more useless. Indignation was not enough. People must change. Slum dwellers, slum landlords, comfortable citizens, indignant citizens, lawmakers, officials, newspapers, and schools. Before people can change, people must know. And when they know, there must be clamor. The first job of CPHA was to set out to raise this clamor. The voice of a few must become the voice of many.

Years pass, and I visit another slum—this time with the boys and girls of my school. The conditions are similar, but the atmosphere is somehow changed. Intruders, no, nor meddlers either. We were invited into houses. We and the policeman who guided us were welcomed as friends. This was 10 years and a thousand events later. Those busy years had made a city aware of its blight. Its officials had done something. Supported and urged by a clear public voice, the city had begun to move in. The city and its people do care. "Slumming" has a new meaning now. A carnival of visitors is the forerunner of action toward something better. Those visited know this. Fifth, decrepitude, and exploitation cannot continue.

This now is a city's will.

These are not idle words. They are facts: 200 square city blocks of blighted homes have been improved under the Baltimore plan; 130 acres of slum dwellings have been cleared away to make room for something better—that is, 7,000 dwelling units of public housing and 2 private redevelopment projects; 24,000 outside toilets have been removed and we are no longer champions in this statistic. A million board feet of rotting fences have come down. A housing court is an accepted part of our judicial system. Our housing code has been rewritten with a new level of minimum standards for all. A Housing Bureau, fortified by this code and our court, has now sufficient capacity and experience to carry forward rehabilitation by neighborhoods instead of piecemeal. Directly benefited by all of this are thousands of our neighbors directly and indirectly, hundreds of thousands have had a

level up. Behind and around all this is the planning to make these many works coordinate and lasting, now coming onto blueprint paper in the form of a master plan for the land-use of an entire city. Each step a battle, in sum this progress is imposing triumph for a city, for its mayor, its city council and its people. These are the accomplishments of a city's officers. They are the experts; they are the doers, the builders, and they will sign the reports. To them all honor. Back of them the volunteer, whose place we celebrate tonight—no longer one, or few, or alone. Our 2,000 are a nucleus of many interests and with such interests we make and keep alliance. Our volunteers now are disciplined volunteers and often, if you please, professional volunteers. They have learned that good intent is by itself of little worth.

How many of you can echo, from his own experience, my unconfidence of many years ago? How many times you and I have tried to do something of worth only to have it fail because, as volunteers, we could not give the time and constancy demanded. I was unconfident because I knew that when my time was needed by my school, school would come first and slums would have to drift. My school was always first but the slums never drifted. I discovered that the professional was the necessary complement and partner of the volunteer. When I must default, the staff stepped in and found my substitute. We carried on, though I could not. That is how, working together, CPHA has been able to bring its major projects to result.

We found much more depended on our staff. They were the agencies of our discipline—our constancy and our consistency. Not only did they find us the facts, but with patience and with understanding, they made us masters of the facts.

Forgive an interruption. And, Frances, forgive a disobedience. Frances' orders were to stick to the volunteer and not to mention her.

I have been describing a technique, yes, but one which has been developed with artistry and love by an artist.

What loss there would have been if the callow social worker who wrote the Study of Wards 5 and 10 had called that her day. Fortunate are we because her courage and devotion have builded on that start of startling facts and because each of her days is lived for making new tomorrows.

I turned to William Wordsworth for a way to talk of Frances. There were two poems from which to choose, one titled "She Was a Phantom of Delight," the other "Ode to Duty." See my quandary when I read in the Ode to Duty:

"Stern Daughter of the Voice of God,
Oh Duty! if that name thou love,
Who art a light to guide, a rod
To check the erring, and reprove."

And turning back to the first poem, I read:

"I saw her upon nearer view
A Spirit, yet a Woman, too!
A creature not too bright or good
For human nature's daily food;
For transient sorrows, simple wiles.
Praise, blame, love, kisses, tears, or smiles."

* * * * *

"And yet a Spirit still, and bright
With something of angelic light."

No quandary now, I had to reach them both.

Now back to the volunteers.

Out of this has come a catalog of volunteers at the service of our city: Social workers, architects, lawyers, labor leaders, educators, businessmen, and housewives, who have trained themselves to be experts on a city's business. Many and many a time the drudgery of the office has been done by those who could afford to give us that exactly. Today, no matter what the crisis, we have those to whom we may apply. Whether it be the mailing of a thousand things, a public hearing, or the final touches on a city plan, we have those who are ready and who come. They come and they have come because they and their predecessors have been successful in bringing about community change.

Each successful volunteer has brought in more. In this way, group after group has become identified with the objectives of a city. We have reached into groups as we have needed them and they have needed us. If we started with social workers, shortly we found the social workers joined by planners.

The first triumph of the social-work group was, believe it or not, to find tenants for public housing. The first triumph of the planners was to find citizens who understood their ambitions for a city. With them came architects, educators, others. Planners and businessmen were working up the idea of redevelopment. In us they found a public to back them up.

Redevelopment legislation was put on the books, but it was long years before there was redevelopment. While it was left in ferment, CPHA had pressing problems to face. One work of 7 years was the reconstitution and reorganization of the Housing Authority to the end that it should serve its purpose. The other problem was that of furnishing a force of public opinion to back up the "Baltimore plan" in its embryo stage of law enforcement. Our natural allies here were those who worked with real estate and mortgages. Some of this group, who joined our board, picked up the torch of law enforcement. Their concentrated work advanced this program to a new frontier for Baltimore and a deeper frontier for the country at large. A Baltimore plan of neighborhood rehabilitation is now a nationally espoused purpose of the mortgage bankers, the home builders, and the real estate men.

Through the years CPHA has helped the public schools to learn that they are not helpless in this problem of their neighborhoods. They have found 100 ways to arm their children with the hope for better living and the feeling that they themselves can do something.

The latest group to join with us is the improvement associations. Today neighborhood organizations are pioneers. A Mount Royal group, for instance, invited the city to come in with its neighborhood rehabilitation program. Then, they rose as a man to hold fast to the plan for a State office building in area 12. They found that their interest was the interest of a whole city and they used our staff as their asset of education and consistency. As of now, they have borrowed a leaf from our book and have their own executive secretary.

I have told you a story of success but Baltimore is not yet successful. Baltimore has lost its leadership in outside toilets but still has the highest percentage of dilapidated housing in any large city. Slums, a city's most expensive luxury, remain a gold mine for some. This is a tough and disagreeable business. Baltimore cannot relax.

CPHA is no exclusive club. We must enlarge our circle in order to carry on and in order to bring to bear a city's conscience on its problems. We must see to it that we reach the potential volunteer of any age.

Unrealized and untapped is the strength that we must see and develop in those who by necessity live in slum neighborhoods. This means a close partnership between the schools and those who work in social welfare and church groups. CPHA must help groups in every neighborhood to make their voices heard and to make their own partnerships with the agencies of the city.

It must help those city agencies to discover and use this potential in citizen interest. Here we might cite the citizen support now building in the field of recreation.

Rebuilding and renewing a city takes as long as history. In fact, it is history. It takes the greatest part of the financial substance of each citizen. This places at the door of business an immense responsibility. Business men and only business men can make it possible for change to pay. How long shall we wait for Baltimore business men boldly to plan and execute a transformation like that in Pittsburgh?

We are proud of our sister organizations: The Citizens Planning and Housing Association of Annapolis, the Howard County Citizens Planning Association, and the representatives of Pittsburgh, Philadelphia, New York, Boston, Cincinnati, and Washington housing associations who are here tonight. We are convinced that in each community there must be a voice which is clear and confined to this specific public interest, and it is our purpose to help foster such developments elsewhere.

Bad housing is the cancer of our cities and for this cancer there are many tonics but only one specific. That specific is our acceptance of responsibility for our neighbors and ourselves with all the sense and ingenuity that we can muster.

I challenge each of you that there is very much to do. This challenge goes to you who know the problems and especially to you who face these facts for the first time tonight. What you owe is to yourselves because there is no one here whose health and home, whose wages and taxes, are not affected by our negligence. There is no one here who does not sink as the waters of living seek their lowest level. Compassion or dismay are motive power, but they are not enough. Each must make the journey of his spirit from the selfishness of self-protection or the selfishness of "doing good" to the selflessness that shouts: This can and must be done by us. There is no short, no simple way. Each first must know the facts: our city's policy, its money, and its servants and their plans. Each then must share and push—giving at each crisis his time or thought or money. This is no one-shot sale, nothing to "file and forget." This is your part, our part, in making work our urban, industrial civilization. It is setting a standard for living which is not of things, but of responsibility.

There is no they to do it for us, so the myth of them must be exposed. It is given to each generation to give new meaning to the honored phrase, "We, the people." To this end I pledge the next years of CPHA. Into this process, we invite you. Into such process the year 1954 commands you.

Mr. WOLCOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Mississippi [Mr. COLMER].

Mr. COLMER. Mr. Speaker, I am sure we were all impressed with that very eloquent and emotional appeal by the gentleman from Illinois [Mr. O'HARA]. I am not so sure that he correctly stated what the issue will be before the country this year. I am impressed with the fact that the issue before the country should be whether we are going to be able to perpetuate this glorious young republic, the last haven of refuge of the free people on the face of the earth and not permit it to be bankrupt and become a prey to communism. I think the question should be whether we are going to be able to have a balanced budget; whether we are going to be able to operate this Goverment on a sound fiscal policy.

Mr. Speaker, when this matter was under consideration before on sending the bill to conference, some of us wanted to have a showdown then on that question, and we had quite a colloquy here,

with the understanding, we thought—those of us who opposed this socialistic scheme—that we would have a direct vote on whether we are to have any new public housing. I understand now that the gentleman from Kentucky [Mr. SPENCE] will exercise his right, and I think he has it under the rules of the House, to offer a motion to recommit the bill. With instructions to bring in an authorization for 140,000 units. This will preclude the carrying out of that agreement.

Mr. SPENCE. I was not a party to any agreement.

Mr. COLMER. The gentleman was here when the agreement was made. Let me go on, if I may.

The issue is coming on a motion of the gentleman from Kentucky [Mr. SPENCE] when he wants to reinstate 140,000 units. That was the same question that we had under consideration in this House on April 2 of this year on a similar situation with which we are confronted today, a motion to recommit, made by the gentleman from Missouri [Mr. BOLLING] to put these 140,000 units in, and this House voted, by a resounding majority, against that motion and provided for the winding up of the public housing program. Here is the record showing how each of you voted. And I think it is only fair to say that this group which sits on my right, the northern Democrats, who believe in that philosophy, voted for the motion.

A large portion of the group which sits on my left, Republicans, are opposed to that philosophy. They voted their philosophy against public housing. That was on April 2.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman briefly, but I have not much time.

Mr. WOLCOTT. Mr. Speaker, I yield the gentleman 2 additional minutes.

Mr. HALLECK. The gentleman has referred to the debate that took place here at the time we sent this measure to conference. That was on June 17. I just want at this point to make my position perfectly clear. I have the copy of the CONGRESSIONAL RECORD before me and I have read all that was said by the different Members.

At that time the issue was whether or not certain people who were opposed to public housing should make a motion to instruct the conferees but would forgo that; that when the conference report came back if it included public housing then the way to get at it directly and to raise the issue, to present it, would be to make a motion to recommit to strike out public housing. I made that suggestion as far as I was concerned in good faith.

There were numerous statements made by the gentleman from Mississippi and by the gentleman from Virginia [Mr. SMITH] in line with that suggestion; and as the gentleman pointed out, as far as I can discover in the RECORD, there was no suggestion that any effort would be made to deprive the gentleman or any of his colleagues who have been in opposition to public housing of the right to make the motion to recommit.

Of course, as the gentleman points out, the rules are otherwise. If the gentleman from Kentucky insists on the motion to recommit, then, of course, the Speaker would be required to recognize him. But, again, as far as I am concerned I want to make it clear that those statements are made by me, and if there were any way now to see that that obligation that was created could be carried out I certainly would do it.

Mr. COLMER. Permit me to say in reply that the Member now addressing the House has not charged the Majority Leader with bad faith nor has he charged the gentleman from Kentucky with bad faith. All I can say is that it is a very unfortunate situation that has arisen here. Personally I would want to see the whole thing thrown out, but we have gotten ourselves into this situation and you are going to be called on now very shortly to say whether you are going to stand by your convictions of April 2 when you knew what the President's program was then as well as you do now, or whether you are going to change. That is the whole issue involved.

I might add, Mr. Speaker, that in view of the provisions of the bill and the decision of the packed Supreme Court denying segregation in these projects that it would be most difficult if not impossible for Members from my section of our common country to vote for any number of units, regardless of how small.

Mr. WOLCOTT. Mr. Speaker, I yield such time as he may desire to the gentleman from New Jersey [Mr. WIDNALL].

Mr. WIDNALL. Mr. Speaker, the housing conference report presents an overall bill to promote and encourage housing construction in the United States that should receive support in both Houses.

Since I have become a Member of the House I have been interested in providing the opportunity for homes and better housing for our people.

One of my first acts in the House was to sponsor a nationwide housing investigation which resulted in the creation and constructive work of the Rains committee. As sponsor of the investigation, I was named as a member of the committee.

That committee conducted hearings throughout the United States and as a result of its investigations and findings thousands of cases of defective home construction were corrected and the possibilities of future errors were eliminated. Inspections, plot planning, and other home construction features were improved and safeguards provided for future home purchasers.

In the conference report on the new housing bill I am particularly pleased for several reasons.

First. The possibility of continuation of a sound public housing program is provided through adoption of a conference amendment that is essentially one provided in an amendment I offered to the House on April 2, 1954, when the House bill was first debated.

At that time I offered an amendment which proposed to continue the public housing program with 35,000 units for the fiscal year 1955. If permitted 35,000 additional units in the piplines necessary to meet the problem of relocating low-income families who were to be displaced by demolition of slum areas or other governmental action.

Although defeated in the House at that time it is now substantially as originally written in the conference bill. It means the continuance of a public housing program, tied into actual slum clearance, which was the original intent of the public housing program.

Second. Section VI of the conference report incorporates almost entirely as originally written a House bill introduced by me this year to provide a voluntary home mortgage credit program. This section seeks to provide and facilitate the flow of credit in sparsely populated areas, where thousands of families have previously been unable to provide adequate, modern housing for themselves. It seeks to develop a market voluntarily, at no cost to the taxpayer or the Government that will build good homes in the outer areas of the housing market.

With this section VI a great opportunity is provided for private enterprise in home construction. It should be a great step forward.

Third. Within the new housing bill is also a provision for a certificate of compliance to be provided by the builder or seller. This is a fine provision for better building and finer construction. It is the outgrowth of the House housing investigations and should largely eliminate the previous shortcuts and frauds of defective construction, inadequate sanitation and drainage facilities. I am particularly pleased about this section because it is the direct result of the investigation of our House Housing Committee.

This bill should provide, as stated by Majority Leader HALLECK, housing starts of over 1,400,000 per year. It is an incentive to good building—toward home ownership—and the ability of the average American to provide a modern home for his family.

There is nothing you can name that will prevent and provide a better cure for communism than a well-housed America. With this bill the ability of all Americans to provide adequately for the family is envisioned. There is a real sense of pride in assisting in the formation of its provisions.

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks at this point in the RECORD and have 5 legislative days in which to revise and extend their remarks on the conference report.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mrs. BUCHANAN. Mr. Speaker, the motive behind this conference report stands stark and clear for all to see—it is to bring the public-housing program to an end as quietly and effectively as possible. Of course, it follows the pattern of all the other administration programs against the public interest. It is all tied up with pretty bows and ribbons in a desperate attempt to make the people think they are getting something.

For even the most bitter foes of public housing know that the people want an adequate program providing decent shelter for low-income groups.

The bows and ribbons in the conference report—the sugar-coating—is the authorization for 35,000 additional public-housing units during the fiscal year 1955. But this authorization is subject to the limitation that a low-rent housing project may be undertaken only where a slum-clearance program is being carried out and there is a certification that the project is needed for families displaced by the slum-clearance operations.

Now, this limitation is not only directly opposed to the program as presented by the President in his budget, but also to the recommendations of the President's Advisory Committee on Government Housing Policies and Programs. It is important to note that this 23-man committee, made up predominantly of representatives from private real-estate and financial interests, recommended the continuation of the public-housing program as contained in the Housing Act of 1949 to meet the continuing housing needs of low-income families pending demonstrated progress of other programs recommended by the Committee.

There is not the slightest evidence in the recommendations of the President's Advisory Committee that public housing should be restricted to families displaced by slum clearance activities. On the contrary, there is every indication that this committee recognized a continuing need for public housing until it becomes clear that the private housing market could take care of the problem without the need for direct subsidies.

The report of the Advisory Committee shows that 29 percent of the families in public housing were receiving public or private relief or were recipients under social security or other public pension or payment plans. Over 26 percent of the families admitted are broken families; that is, families with children but only 1 adult present. And during 1952 the average annual income of families admitted was $1,986.

Nearly half of the families admitted are families of veterans or servicemen.

During the years 1952 and 1953 only 7 percent of families admitted to public housing were families who had preference because they were displaced from title I or other public slum clearance sites.

Thus, it is clear that the great proportion of families who need public housing assistance would not be eligible under the conference committee substitute. This provision is a cruel sham and a fraud upon the millions of families who are living in crowded, unsanitary, and substandard conditions.

It would not be possible under this conference substitute to relieve overcrowded slums in planned stages. For example, if there were 3 families living in a substandard dwelling, it would be impossible to take 1 of the families out and give it public housing assistance. It would be necessary to tear the whole unit down and displace all three.

Families of low-income veterans and servicemen, making up nearly half of current admissions, could not have units planned for them unless they were to be displaced. This bill extends veterans' preference for another 5 years, a provision to be commended, but at the same time it says: "No, no, veteran, there's no housing for you unless you have been displaced."

Let us see how this program before us today will help my own district, an area which is in desperate need of housing. During 1953, in the city of McKeesport, for example, a total of 81 families were admitted to public housing units and not one—not a single one—had been displaced. And in Pittsburgh only 3 percent of all families admitted to public housing during the years 1951 through the first half of 1954 were displaced. These figures, which are typical of the rest of my district, are graphic proof of how effectively this provision will result in as few public housing units as the foes of the program could devise under a token authorization.

Is there no limit, Mr. Speaker, to the lengths this administration will go in removing the substance and leaving only the form of all legislation dedicated to the people's interest?

We all know that if the administration sincerely wants more than a token housing authorization it can get the votes to recommit this bill. We saw only a few days ago when the administration farm program was here, how effectively it could apply pressure in behalf of legislation it really wants.

Let us recommit this bill and insist that it be amended to include the bare minimum of 140,000 units over a 4-year period as recommended by the President and passed by the Senate.

Mrs. SULLIVAN. Mr. Speaker, I realize that it is impossible to have complete unity within any national political party on every issue or even on any single issue. But when it comes to the Republican Party and this issue of public housing, I must admit I am puzzled and confused.

The Eisenhower wing of the Republican Party, after first expressing uncertainty about it and studying it thoroughly and carefully, finally recommended a continuation of the public housing program. But the so-called Taft wing of the party fights savagely against any public housing, and in this bill seems to have succeeded in killing public housing by next year, unless a Democratic Congress is elected in November.

But here is why I am so puzzled: The leader during his lifetime of the Taft wing of the Republican Party, the man who gave his name to that wing of the Republican Party, was one of the great friends of the public housing program. He was a co-author of the Housing Act of 1949, the public housing provisions of which this present housing bill would repeal.

Is it a case of the Eisenhower wing of the party now following the late Senator Taft's philosophy—at least in part—on public housing, while the founder of the Taft wing of the party is deserted on this issue by his own following?

Some of our Republican colleagues, Mr. Speaker, have joined in promoting the establishment of a foundation to honor the principles which Senator Taft fought for during his lifetime. Wouldn't this issue of public housing be as good a place as any in which to honor the Senator's principles?

To me, Mr. Speaker, there is no more fitting tribute to be paid to a leader who has passed on than to build in his memory the kind of monuments that provide happiness for people. And there is nothing which is more conducive to happiness for American families than a decent home environment in which to raise children.

I respectfully suggest to my Republican colleagues, Mr. Speaker, that they forget their animosity to the public housing program, and forego the pleasure they may get out of killing the public housing program, in order to honor the late Senator Taft by continuing a program of government in which he deeply believed—a program of government which brings happiness to families now living in indescribable conditions of misery and poverty and dirt.

I shall vote to recommit the bill to conference to restore the public housing program, and I hope enough of our Republican colleagues will join us in that—as a monument to Senator Taft—to enable us to save the small portion President Eisenhower has seen fit to recommend of the broad-scale humanitarian program enacted at President Truman's request in 1949 with Senator Taft's enthusiastic assistance.

Mr. HOWELL. Mr. Speaker, every recognized expert in the field of housing and municipal planning tells us that we have it within our power to rid the United States of substandard housing and provide decent homes for all of our people and to do it without straining our economy.

But it takes planning and it takes foresight. It takes boldness. There is none of that in this housing bill. This is a bill which sets as a goal the construction of 1 million homes a year of which only 35,000 units—for only 1 year—are to be public housing.

Will that solve our problems? The answer is very definitely, "No."

Recently, Dr. William L. C. Wheaton, University of Pennsylvania authority on city planning, reported to the National Housing Conference, that at a rate of 1 million new homes a year, our substandard housing units will never be replaced and we will have more substandard housing in 1970 than we had in 1950.

And even if we double the rate to 2 million units a year, and rehabilitate 400,000 additional units a year, he says that by 1970 an estimated 5 million American families will still be living in houses which were considered slums or substandard in 1950.

Yet we argue here over the meager 140,000 units of public housing which the President has recommended be started in the next 4 years. The die-hard opposition of the Republican leadership in the House Banking Committee shows up in this conference bill, for it allows only 35,000 units altogether, as a last

and final gasp for public housing, and then it is dead.

This is the third time we have argued out the public housing issue in the House in this session. First, it was on the appropriation rider, then on the omnibus housing bill, as it first went through the House, and now on the conference report on this bill. Each previous time, public housing has lost. The record is pretty clear that a majority of the majority party here is determined to kill public housing. It has in this conference bill one last chance in this Congress to hit the "sawdust trail," repent, and back up its own President in this matter. What will the answer be?

Will the House take the initiative now and recommend this bill with instructions to reinsert the Eisenhower public housing program? Or, will we wait for the Senate to take that action?

Are we going to jockey this thing around so much over the puny public housing program the President recommended that we jeopardize passage of the other features of the housing law and let all the FHA and VA housing programs expire at the end of this month?

A housing bill which does not include reasonable provisions for public housing is an incomplete housing bill. An incomplete housing bill may very well die in the adjournment rush. If that happens, the enemies of public housing will have won a hollow victory, for they will have destroyed the very foundation for the whole private enterprise housing industry in the United States.

It seems to me a pretty serious risk to take for people who profess to be concerned about private enterprise.

Mr. GRANAHAN. Mr. Speaker, I will vote to recommit the housing bill to restore the Senate provision dealing with public housing. This would provide the 35,000 units a year for 4 years which the President recommended. That is the very least Congress could provide and still pretend it was continuing public housing.

Talk and argument will not affect the outcome at this point. It is simply a question of whether President Eisenhower has lined up, or can line up, enough Republicans in the House to join with the Democrats in recomitting this bill.

Both in the 80th Congress and in this one, Republican majorities in the House have killed and buried public housing. If this bill passes in its present form, it will no longer be possible for those Republicans who support public housing to claim that their party as a party or any substantial part of it in the Congress believes in decent housing for low-income people.

Permitting only 35,000 units to be built and limiting those units only to families displaced by redevelopment, is not a public housing program but a device to end public housing altogether.

This is an issue the Democratic candidates in every urban area of the country—and in many rural areas too—will find made to order in November for a Democratic victory. It is the 80th Congress housing performance all over again.

Mr. BARRETT. Mr. Speaker, the reason I voted to recommit the Housing Act of 1954—H. R. 7839—is because it did not contain an adequate public-housing program. The President requested authorization for construction of 140,000 public housing units over a 4-year period. The measure reported to us today by the Senate-House conferees authorized only 35,000 units of public housing. I think H. R. 7839 should have been sent back to the conferees with instructions to amend section 101 to read as passed by the Senate and recommended by the President, that is, to authorize 140,000 public housing units so that the blighted areas of our large cities such as Philadelphia can be wiped out and decent homes established for our low income families.

Many sections of H. R. 7839 are advantageous to persons with much more comfortable standards of living. These inequities should be balanced by giving the poor and needy housing commensurate with the economic development of our country.

However, in view of the failure to recommit H. R. 7839 by a vote of 156 to 234, I have reluctantly voted in favor of passage of the Housing Act of 1954 so as not to deprive the larger cities of the Nation of the meager allocation of the public housing units which they will be authorized out of the 35,000 provided in this measure. I feel confident that if the persons who opposed the 140,000 units will, in the future, take a keener interest in the slum areas of the Nation they will regret their present opposition to public housing. I feel equally confident that the public will announce its displeasure with the Housing Act at the right time in November.

Mr. BYRNE of Pennsylvania. Mr. Speaker, the conference report on the Housing Act of 1954, which is before us today, falls short of the provisions recommended and passed by the Senate before it went into conference. At that time the Senate had approved a bill providing for 35,000 public housing units per year for the next 4 years. The conferees have presented us with a measure which provides for only 35,000 public housing units for the next fiscal year. We are today asked to vote for passage of this legislation.

This act first passed the House 3 months ago with no provision for the construction of public housing units after this year. This action was taken in spite of the fact that the Committee on Banking and Currency had recommended that 20,000 units be built in the coming year, and in spite of the fact that President Eisenhower, following the pattern set by his Democratic predecessor, had asked for the approval of 35,000 units per year for the next 4 years. The Senate approved a measure which included this latter provision. The bill went to conference with no disagreement on this very important feature of the bill.

It is vitally necessary to the stable economy of the Nation that the low-rent public-housing program be continued. Healthy citizens need healthy atmospheres. Since 1923 our population has increased by almost 50 million. Obviously housing requirements have increased proportionately. But housing construction even at this time does not appear to make adequate provision for those desperately in need of housing. Furthermore, new private housing costs are extremely prohibitive to a great many people, and particularly to the people of my district. In Philadelphia alone, an average price for a new home privately constructed is in the neighborhood of $11,500. Rental costs generally start at about $80 a month in a privately owned apartment development. While these figures may seem to be reasonable to many of us, they are exorbitant to low-income families who are necessarily forced to live in old, substandard housing units in which conditions are often deplorable. Many of my constituents live in crowded dwellings, some of which have none of the sanitary facilities which you and I take for granted. There are no yards or play areas surrounding such places, and thus our youngsters are forced to amuse themselves along the streets and alleys of the city. This is a major cause of the high crime rate and the high incidence of juvenile delinquency. Surely none would deny that such an atmosphere is not conducive to a physically and emotionally stable family life.

Low-rent public-housing and the slum-clearance program go hand in hand to contribute to a better America. Good housing makes good citizens. I am proud to be able to vote for it and hope to see it a reality in the not-too-distant future.

Mr. ELLIOTT. Mr. Speaker, I shall vote to recommit the conference report on housing, with instructions to the conferees that the bill be brought back with President Eisenhower's program for at least 35,000 units of public housing written into the bill.

The bill before us speaks of public housing, but actually there is no public housing in the bill.

The public housing in the bill is housing in name only. It is so surrounded with restrictions and limitations that it amounts to no housing.

Under the Housing Act of 1949, 22 housing projects were constructed in the Seventh Congressional District of Alabama. These 22 projects are located in the following 18 towns: Bear Creek, Boston, Carbon Hill, Cordova, Cullman, Guin, Hackleburg, Haleyville, Hamilton, Jasper, Millport, Oneonta, Phil Campbell, Red Bay, Reform, Russellville, Vernon, and Winfield.

Seven hundred and thirty-eight units of housing have been constructed in these towns. They cost about $7 million.

Program reservations are pending for the building of 44 units in Aliceville, Ala.; 24 units in Berry, Ala.; 4 units in Winfield, Ala.; 12 units in Hanceville, Ala.; 4 units in Oneonta, Ala.; 16 units in Vernon, Ala.; and 8 units in Haleyville, Ala.

All activities on these programs were suspended during the fiscal year just ended, because of the restrictions which this Congress wrote into the Independent Offices Appropriation Act for the 1954 fiscal year.

Now, with the restrictions written into the bill before us, there will be no chance

to build these projects in the 1955 fiscal year.

Also, Dora, Ala., has applied for 60 units; Oakman for 60; Sulligent for 60; and Cullman for 70 additional units. Under the restrictions written into the conference report before us none of these can be approved or built.

Mr. Speaker, all across this country local communities have made their applications for public housing. The development program leading to construction has gone so far, in many cases, that the actual site for construction has been approved. If the majority party is bent on killing public housing, it should at least allow construction of all projects that have gone this far.

I think this program should go forward. The need for public housing is just about as great in America today as it ever was. We have barely scratched the surface in most of the country.

I am also disappointed that there is nothing in the bill before us carrying on the direct-loan program for veterans' housing. I understand, however, that it will come to us later in a separate bill. This Congress should not adjourn until it has provided more money for this program.

Mr. WOLCOTT. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

Mr. SPENCE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the conference report?

Mr. SPENCE. I am.

The SPEAKER. The gentleman qualifies. The Clerk will report the motion.

The Clerk read as follows:

Mr. SPENCE moves to recommit the conference report on the bill H. R. 7839 to the committee of conference with instructions to the managers on the part of the House to include in such report, in lieu of section 401 (1) thereof, a provision carrying out the 4-year program for 140,000 new public housing units as set forth in the President's housing message submitted to the Congress on January 25, 1954.

Mr. WOLCOTT. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

Mr. SPENCE. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 156, nays 234, not voting 44, as follows:

So the conference report was agreed to.

The Clerk announced the following pairs:

Mr. Simpson of Pennsylvania with Mr. Morrison.

Mr. Short with Mr. Perkins.

Mr. Hess with Mr. Herlong.

Mr. McGregor with Mr. Boykin.

Mr. Osmers with Mr. Camp.

Mr. Gwinn with Mr. Fisher.

Mr. Harrison of Wyoming with Mr. Thompson of Louisiana.

Mr. Weichel with Mr. Willis.

Mr. Bush with Mr. Thompson of Texas.

Mr. Angell with Mr. Lucas.

Mr. Kersten of Wisconsin with Mr. Patman.

Mr. Curtis of Nebraska with Mr. Lyle.

Mr. Chiperfield with Mr. Barden.

Mr. Clevenger with Mr. Regan.

Mr. Mailliard with Mr. Miller of California.

Mr. ROONEY changed his vote from "yea" to "nay."

Mr. HOLTZMAN and Mr. CANFIELD changed their votes from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SUPPLEMENTAL APPROPRIATION BILL, 1955

Mr. TABER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 9936) making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 9936, with Mr. ALLEN of Illinois in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday the Clerk had read down to and including line 16 on page 5 of the bill.

Mr. TALLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TALLE: On page 5, after line 17, insert the following new headings and new paragraphs:

"BUREAU OF THE CENSUS

"CENSUSES OF BUSINESS, MANUFACTURES AND MINERAL INDUSTRIES

"For expenses necessary for taking, compiling, and publishing the censuses of business, manufactures, and mineral industries, as authorized by law, $8,430,000."

Mr. TALLE. Mr. Chairman, my purpose in offering this amendment is to restore to the bill the amount asked by the President for the censuses of business, manufactures, and mineral industries.

I regret that the Appropriations Committee has not seen fit to recommend the appropriation of the $8,430,000 which the President requested to conduct censuses of business, manufactures, and mineral industries for 1954. These basic records of the business activities of our country are required for the efficient management of American industry and Government. This view was strongly supported by evidence provided at the recent hearings of the Subcommittee on Economic Statistics of the Joint Committee on the Economic Report. This subcommittee, which consists of Senator CARLSON, Congressman BOLLING, and myself as chairman, held hearings on July 12 and July 13. The witnesses heard included representatives of many important busines organizations and the Government agencies particularly concerned with business conditions.

The witnesses pointed out the important role played by statistics in the management of the affairs of the economy and of their particular businesses. They described the crucial role that is being played by the Census benchmarks. They pointed out that the whole structure of monthly statistics is deteriorating in quality because the basic benchmark records in the fields of manufactures, mineral industries, wholesale trade, retail trade, and services were already more than 5 years old. They indicated that recent gaps in the statistical records are impairing the ability of the Government and of business concerns to make prompt and sound decisions regarding economic policies. Major decisions are being made almost daily which involve very large sums of money, amounts which make funds actually required to provide the statistics needed for better decisions seem trivial.

Witness after witness repeated that the most urgent requirement in the Federal economic statistics program is to provide basic benchmark records, urging that Congress appropriate funds for censuses of business, manufactures, and mineral industries covering the year 1954. Persons testifying on subjects only indirectly related to these censuses went to great length to call to the attention of our committee the need for the censuses. The report of the Intensive Review Committee of the Secretary of

Commerce was frequently cited as further evidence of the very widespread demand for these censuses. The Bureau of the Budget, which submitted the request for these funds, the Council of Economic Advisers, which strongly supported the required legislation only recently passed, and other agencies of the Federal Government, including the Department of Commerce and the Department of Labor, emphasized the critical need for the census benchmarks as a basis for their own statistical requirements.

Authorizing legislation already enacted provides for censuses of business, manufactures, and mineral industries covering 1954. The next censuses provided for by this legislation would cover 1958. If funds are not appropriated for the 1954 censuses, a 10-year gap in the basic statistical record of the United States would be created. The latest of these censuses covered 1948.

Mr. Chairman, the hearings of the Subcommittee on Economic Statistics held last week attracted widespread favorable comments. The one point on which all of the witnesses were in agreement was that the censuses should be taken immediately.

Mr. Chairman, may I summarize briefly the steps leading up to my amendment. Members will recall the passage of the Reorganization Act of 1946, which was put into effect during the 80th Congress in 1947. The late Senator Taft in 1948 pointed out the need for improved statistics. On February 27, 1954, the Joint Committee on the Economic Report issued its report containing a recommendation that two subcommittees be named to carry on special studies. One of these was the Subcommittee on Statistics, and I was named chairman.

My colleagues, Senator FRANK CARLSON and Representative RICHARD BOLLING, and I proceeded to do a job. We had worked and planned for months when on July 12 and 13, Monday and Tuesday of last week, we had before us a considerable array of eminent witnesses—from the Bureau of the Budget; the Council of Economic Advisors; the Census Bureau; Agriculture; the Office of Statistical Standards; the Bureau of Labor Statistics; the Federal Reserve Board; and the Department of Commerce.

In addition we heard a panel of 12 witnesses who came from various parts of our country to speak for private business, agriculture, labor, manufacturing and processing, research—users of statistics, capable persons of great scholarship and special knowledge in this field. Our purpose was to see to it that in an important matter of this kind we might have the combined cooperative effort of the executive department, the legislative department, and private business. All of those witnesses said, "For the first time Congress is doing something to help us in our difficult field." Mr. Chairman, there is no substitute for knowledge. We need more knowledge, accurate knowledge; and up-to-date knowledge. Therefore they were exceedingly enthusiastic. There was not an empty chair in that room during those 2 days, in spite of the fact that no one will contend there is any romance in statistics.

Mr. BOLLING. Mr. Chairman, will the gentleman yield?

Mr. TALLE. I yield to the gentleman from Missouri.

Mr. BOLLING. I would like to compliment the gentleman for offering this amendment and associate myself with him, strongly feeling that this is vital not only to the executive branch but to the Congress. If we do not have the knowledge which this census and other censuses will give us, we cannot possibly make sound decisions. I congratulate the gentleman for offering the amendment.

Mr. TALLE. I thank the gentleman. The gentleman was present throughout our 2 days of hearings and is a valuable member of the subcommittee.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. TALLE. I yield to the gentleman from New York.

Mr. ROONEY. I wish to commend the gentleman from Iowa upon his statement here today, and to assure him, as I said I would yesterday, of my support of the pending amendment to restore the funds for this necessary census of business, manufactures, and mineral industries. However, I am never greatly impressed by any intensive review committee and some of the other authorities that the gentleman mentions. Also, may I say that I am not so sure that the full amount of $8 million and more should be allowed for this purpose, but I am in sympathy with the gentleman's position in proposing that this census, worthwhile and necessary, should be carried on.

Mr. JAVITS. Mr. Chairman, will the gentleman yield?

Mr. TALLE. I yield to the gentleman from New York.

Mr. JAVITS. I would like to support the gentleman's position and say that I shall support the amendment, and to point out to Members who are looking for industries in their communities, that is, communities which are underdeveloped, how vitally important this is to them to have these new censuses of this character, in showing their ability to meet their needs.

Mr. TALLE. I thank the gentleman.

The time is here for taking thought, for neither government nor private business can make intelligent decisions, without having accurate, up-to-date statistical data. I urge the adoption of my amendment.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WOLCOTT. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I will only briefly take this opportunity to confirm everything the gentleman from Iowa [Mr. TALLE] has said. It will be recalled that when we adopted the report of the Joint Committee on the Economic Report we were given a job to do by the Congress. That is in statistical research. In keeping with that report, it was my pleasure, as chairman of the Joint Committee on the Economic Report, to name the gentleman from Iowa [Mr. TALLE], as chairman of that subcommittee. We did it with the realization that it was in good hands; with the realization that without this statistical information which would be made possible by the resumption of this effort and the restoration of this amount, we could not hope to create a climate in which we could have an ever-expanding economy that we always strive for.

I am in hearty support of the gentleman's amendment, and I hope it will be adopted.

Mr. TABER. Mr. Chairman, I wonder if we could not get an agreement as to time on this amendment and all amendments thereto.

I ask unanimous consent that debate on this amendment and all amendments thereto close in 20 minutes. The gentleman from Ohio [Mr. CLEVENGER] wants 5 minutes and I want 5.

Mr. ROONEY. Mr. Chairman, reserving the right to object, I would suggest to the gentleman that he make it 10 minutes.

Mr. TABER. All right. Mr. Chairman, I modify my request and ask unanimous consent that all debate on this amendment and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentleman from Ohio [Mr. CLEVENGER] is recognized.

Mr. CLEVENGER. Mr. Chairman, I might say that this matter of censuses has received considerable attention over the years that I have been on this committee, and one of the things that has exercised us most is the long delay in making the figures available to the industries which find uses for them. It is often—and more often than not—2 years and 3 years after the taking of the census before the figures are available to the trade. We have tried every way we can think of to energize and wake up the Bureau of the Census, but it seems to have fallen into a moribund state where time seems to be of no interest to them as to when these figures are available.

We have some of the most grotesque testimonies. I have one here, a letter, addressed to the chairman of the full committee from a manufacturer of ladies' brassieres. Now, you know he says something about false economy. Well, as a long-time manager of department stores I always thought there was something false about the brassiere business. He claims the necessity for these figures in order to divide up his territory and plan for the marketing of brassieres. I thought you could maybe take the population census and multiply it by two and could perhaps tell.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. CLEVENGER. I yield.

Mr. ROONEY. I do not wish to discuss the matter the gentleman is now referring to, for I feel he knows much more about it than I, but I do want to point out that a Member just asked me where in this bill—he had a copy of it in his hand—he could find this matter of the Bureau of the Census, and I had to

inform him that he just will not find it in this bill.

Mr. CLEVENGER. That is right, Mr. Chairman. Last year we came down here and I got along with the paramount job we had to do, cutting out nonessentials and balancing the budget. We made great progress last year, but this year we seem to have no luck in the Bureau of the Budget in backing up the efforts of this committee.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield?

Mr. CLEVENGER. I cannot yield again; I have only 5 minutes.

Mr. ROONEY. I would agree to extend the gentleman's time if it were within my power.

Mr. CLEVENGER. I yield briefly.

Mr. ROONEY. I want to say that the gentleman from Ohio [Mr. CLEVENGER] is a very, very sincere Member of Congress with whom I have served on this committee for 10 years. He always says what he means. He has cut the items which are within his jurisdiction in this bill by 82 percent, and that indicates his consistent approach to appropriation requests over the years. I have disagreed with him with regard to many items as we have gone along over the years, but I do want to point out that he has been as consistent as he ever was in denying 82 percent of the funds President Eisenhower has requested in the instant bill.

Mr. CLEVENGER. I want to remind the gentleman from New York that the change of terminology from deficiency bill to supplemental came about because the word deficiency got rather unpopular. Then they began to call them supplementals. I remember well what the gentleman from Cotuit, Mass., had to say one day when he took the well of the House—Charlie Gifford. He said: "Little supplement, don't you cry; you will be a deficit by and by."

I just want to tell you that budgets are not balanced by any other method than deciding what we can live without. What would you do in your own case and in your own household in passing on this stuff when you realize that every dollar that you now spend is deficit spending and must be laid on the shoulders of generations yet unborn? We have 7,000 little new Americans every morning. You have $278 billion dollars resting on these defenseless little children. I want to see the time come soon when a man will be glorified and not subsidized, when a baby can be born without being swathed in a wet blanket of debt, deficit, and despair.

Mr. Chairman, may I say further that the recommendations of the board appointed by the President to study the census has recommended $228 million for the next 10 years.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. CLEVENGER. I yield to the gentleman from New York.

Mr. ROONEY. The distinguished gentleman from Ohio is always sincere and consistent. May I remind him of the fact that the very people who are now lobbying for this particular item are the same people who gave support to the gentleman's party who then advocated a balanced budget and the denial of many, many such items as this. Now they find they cannot do without many of these millions.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, we ought to be fair in this situation. I received a visit from a very distinguished economist. I have heard his name mentioned before this morning on the floor of the House. I asked him what he thought about this proposed business census and he told me, frankly, that it might have some historic value but as far as being of use to business—no.

Instead of taking 6 months to get this material together and having it available for business, it takes 3 years. Are we going to be so simple that we are about to start on a business census that will take 3 years to get it out and get it in shape for use of business and the trade? Those things ought to be taken care of insofar as they can be, but such things that have just historic value only have no place in the Department of Commerce appropriation bill and I hope the pending amendment will be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. TALLE].

The question was taken; and the Chair being in doubt, the Committee divided and there were—ayes 28, noes 81.

So the amendment was rejected.

The Clerk read as follows:

For an additional amount for "Land acquisition, additional Washington Airport," for payment of deficiency judgments rendered by United States District Courts, $16,297, together with such amounts as may be necessary to pay interest as specified in such judgments.

Mr. PRESTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PRESTON: On page 6, line 8, after the period, insert the following: "For carrying out the provisions of the Federal Airport Act of May 13, 1946, as amended (except sec. 5 (a)), to remain available until June 30, 1958, $22 million, of which (1) $20 million shall be for projects in the States in accordance with section 6 of said act, (2) $250,000 for projects in Puerto Rico, (3) $50,000 for projects in the Virgin Islands, (4) $225,000 for projects in the Territory of Hawaii, (5) $225,000 for projects in the Territory of Alaska, and (6) $1,250,000 shall be available as one fund for necessary planning, research, and administrative expenses (including not to exceed $125,000 for transfer to the appropriation 'Salaries and expenses, Civil Aeronautics Administration,' for necessary administrative expenses, including the maintenance and operation of aircraft): *Provided*, That the appropriation granted under this head for fiscal year 1953 is hereby merged with this appropriation and the contract authorization heretofore granted for the foregoing purposes may hereafter be accounted for under this head: *Provided further*, That the amount made available herein for administrative expenses shall be in addition to the amount made available for such purposes in the Department of Commerce Appropriation Act, 1955."

Mr. TABER. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. TABER. The amendment contains legislation on an appropriation bill and it provides for things not authorized by law and it changes existing law.

The CHAIRMAN. Does the gentleman from Georgia desire to be heard?

Mr. PRESTON. Mr. Chairman, I cannot be heard on the point of order or respond to it until the gentleman from New York is more specific in his point of order.

Mr. TABER. I thought I had been quite specific, in that it is legislation on an appropriation bill and that it changes existing law and provides for things not authorized by law. It provides specifically for the merger of an appropriation made in 1953. It provides for many other things, including language "to remain available until June 30, 1958." There are several other items that I think are very questionable.

Mr. PRESTON. Mr. Chairman, the language contained in this amendment is the language taken from the committee print. At no point in the amendment does it actually legislate. Particularly, the reference made by the gentleman from New York refers specifically to the control of the funds in the amendment. It is in complete compliance with the Federal Airport Act of 1946 and is language that has been carried in appropriation bills heretofore. It is never, in my judgment, legislation on an appropriation bill to fix the time for which the funds shall remain available. Now, the comments made by the gentleman from New York in support of his point of order are so general in nature that it is difficult to respond specifically except to the broad specification that it is legislation on an appropriation bill. I insist there is no legislation in the amendment, but the language is either of a restrictive or limiting form or of a descriptive nature which provides how the funds shall be used and for how long.

The CHAIRMAN. Does the gentleman from New York [Mr. TABER] desire to be heard further?

Mr. TABER. Mr. Chairman, simply to say that there is no question but that there is a change in the law relating to the 1953 appropriation. When the gentleman says that the item shall carry through to June 30, 1958, that is not authorized by law and is legislation.

The CHAIRMAN. Does the gentleman from Georgia [Mr. PRESTON] desire to be heard further?

Mr. PRESTON. Mr. Chairman, I fail to understand how language fixing the time for which an appropriation shall be made available is legislation. The money was authorized in 1946—$520 million. We are now making the funds available under that authorization and in so making them available we simply say that this money shall be available until that particular date.

I take the position that it is clearly not legislation, because the original act, passed in 1946, authorized the funds and placed no limitation on the length of time that the funds could be used. It is a very common practice in appropriation bills to provide that "funds appropriated herein shall be made available until expended." So that if an indefinite time can be established, such as the lan-

guage "to remain available until expended," then clearly a definite time would not be in a different category or in a different status.

Mr. EBERHARTER. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. Briefly; yes.

Mr. EBERHARTER. May we not require the gentleman from New York [Mr. TABER] to read the language in the amendment which is not authorized by law?

The CHAIRMAN. What was the question?

Mr. EBERHARTER. To require the gentleman from New York [Mr. TABER] to read the language in the amendment of the gentleman from Georgia [Mr. PRESTON] which is not the authority for the appropriation?

The CHAIRMAN. The Chair is ready to rule.

Mr. PRESTON. Mr. Chairman, I ask unanimous consent to withdraw the amendment I have offered and to offer another amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. PRESTON: On page 6, line 8, add:

"CIVIL AERONAUTICS ADMINISTRATION—FEDERAL-AID AIRPORT PROGRAM, FEDERAL AIRPORT ACT

"For carrying out the provisions of the Federal Airport Act of May 13, 1946, as amended (except section 5 (a)), $22, million, of which (1) $20 million shall be for projects in the States in accordance with section 6 of said act, (2) $250,000 for projects in Puerto Rico, (3) $50,000 for projects in the Virgin Islands, (4) $225,000 for projects in the Territory of Hawaii, (5) $225,000 for projects in the Territory of Alaska, and (6) $1,250,000 shall be available as one fund for necessary planning, research, and administrative expenses (including not to exceed $125,000 'Civil Aeronautics Administration,' for necessary administrative expenses, including the maintenance and operation of aircraft): *Provided* That the amount made available herein for administrative expenses shall be in addition to the amount made available for such purposes in the Department of Commerce Appropriation Act, 1955."

Mr. PRESTON. Mr. Chairman, it is hard to get around the gentleman from New York [Mr. TABER]. He has been here a long time. But I want to say one thing about him, he is one of the most estimable gentlemen in this House, and I am very, very fond of him.

The gentleman from New York realizes, of course, that this amendment has a great deal of popular appeal. To have him make a point of order against the amendment was not entirely unexpected. It has popular appeal because the amendment simply keeps faith with what the Congress has promised the people. It simply carries on what we have been doing since 1946, when the authorization act was passed making it in order to appropriate up to $520 million on a matching 50–50 basis with the communities for airport development.

Last year when the new administration came in the Secretary of Commerce decided that in studying his Department he should take a very careful look at this program and determine whether or not it was being administered properly and whether or not the funds were being used wisely, whether it was being carried out within the spirit of the act. Accordingly, an airport panel was appointed as a part of the Transportation Council appointed by this administration to make a very careful and exhaustive study of this program. It did so. It was composed of outstanding, very capable men. Their findings were summed up as follows:

Hence the panel concludes that the Federal Government should participate with local governments in the construction and development generally on a 50–50 basis of civil airports to the extent that these airports serve the national interest.

So that is why this amendment is here today.

After this report was filed the President of the United States, through the Bureau of the Budget, sent a request to the Congress for $22 million, a rather modest sum, as a matter of fact, when compared with the needs. The Commerce Department requested $32 million of the Bureau of the Budget but they cut it down to $22 million, the hard figure that the Bureau of the Budget decided could be used during this present fiscal year in order to carry on airport development.

The tragic thing about this 1-year delay in this program is that many communities have issued bonds and sold them, believing that funds would be available during the fiscal year 1954, just as they had in prior years, to match the proceeds from the sale of bonds. Those funds are now in the banks. Interest is being paid on the bonds. The funds cannot be used because the bonds were sold conditioned on the fact that the funds would be used to match Federal funds. So this request coming from the President as it does simply carries out the pledge the Congress made to the communities and to the airport authorities of the country in order that they might keep the airports of this country abreast of aviation development.

It is alarming to note that some of our airports at major cities cannot receive a 4-engined ship, and must confine the traffic to 2-engine ships. It is necessary to acquire land and clear rights-of-way in order that these planes can land in general, normal commerce.

Mr. BUSBEY. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield to the gentleman from Illinois.

Mr. BUSBEY. The gentleman mentioned the fact that people are paying interest on bonds that have been issued. What is the total amount of bonds that have been issued and what communities have issued those bonds?

Mr. PRESTON. I will be glad to furnish a list of the communities, but the sum is $102 million.

Mr. BUSBEY. Does the gentleman not have the list available?

Mr. PRESTON. Yes, I do. The gentleman may see it. I have it right here.

Mr. BUSBEY. Is the gentleman going to put it in the RECORD?

Mr. PRESTON. If the gentleman will come down to the well of the House, I can give it to him now so that he can look at it. I cannot ask permission to put it in the RECORD now because that permission must be obtained in the House. However, it is available for any Member to see, and I will be pleased to put it in the RECORD after the Committee rises and we go back into the House.

Mr. Chairman, this is not a giveaway program. This cannot truly be called a subsidy to any particular community. Our airports are national in nature. The airport such as the one at Atlanta, Ga., serves the entire southeastern part of the United States. The great airport at Chicago serves the Midwest, and the airports of New York City serve New England—they just do not serve the State of New York or the city of New York alone. They are national in nature.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. JUDD. I want to concur in what the gentleman is saying. The airports in the Twin Cities area of Minnesota are used to protect the whole central northern border of the United States against the major threat to our country that might come from the outside, namely, from across the North Pole. It is a national air center and must have national support.

Mr. PRESTON. There is no doubt about it. It is difficult to measure the importance of our great airports in our great cities.

Mr. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. PRESTON. I yield.

Mr. BOGGS. Is it not a fact that this program has been administered now for several years and the airports which need development now are being discriminated against, if this sum of money is not appropriated?

Mr. PRESTON. The gentleman is right. Many of the airports have received funds in the past since 1947 when $45 million were appropriated. In 1948, $32 million were appropriated. I ask that you adopt this amendment in the interest of making our country strong economically, as it should be.

Mr. JENKINS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am very glad that the distinguished gentleman from New York [Mr. TABER] raised a point of order so that we may now have clear sailing. Now, there should be no question of any issue in this case being improper from a parliamentary standpoint. It is just a simple question of are we going to do what we should do under the circumstances? Are we going to do this fairly and aboveboard or are we going to hide behind some technicality? Are we going to tell the people of these towns which have depended upon the promises of Federal officials and have gone to work and issued their bonds that we are going to do the right thing? In my section of the State of Ohio, in Scioto County, the representatives of the people came up to Washington and saw the proper authorities and got their instructions as to what to do, and then went back and voted $400,000 in bonds to build an airport. They did their part well and faithfully. The Government

authorities said, in effect, "We will match your money." These representatives at different times came to Washington to see about the matter, but they did not receive any money. They will not get it if the Congress does not give it to them, and if we do not do it in this bill today. You can hide behind excuses and say, "Oh, I want to save a lot of money," or "We have to balance the budget." But why do you not balance the budget with some of this money that we are sending somewhere else? You cannot tell the people in the town of Portsmouth to balance the budget with their $400,000. They have sold their bonds and the bonds are in the bank drawing interest, and the Government does not match the money that the Portsmouth people have put up. My friends, I think today we ought, if the Committee on Appropriations will not do it, we ought to instruct them to say to these people from Portsmouth and other places all over the country—and there are only about $80 million involved in this whole proposition—that we will meet our obligation. How are we going to look these people in the face? How am I going to go back again when I go home and give them these excuses? This airport for which I am making this appeal is not in my district, but it is very close to my district—close to where I was born and brought up. I know all about that section and I have lived much closer to it than the Member of this House who has the honor of representing that district.

What do they have in Scioto County that qualifies them for an airport? Someone might say that they live in the country. But, within 5 miles of this airport, there is the biggest atomic-energy plant in the United States employing nearly 15,000 men at the present time. I mean that the contractors who are building this gigantic plant are employing about 15,000 men in contruction work. There is a great big town springing up around the immense plant. These are great improvements plus the other improvements that are coming into that section. Those are additional reasons why this port is needed. The traffic that passes on the Ohio River in front of where this airport will be located is the heaviest traffic carried in a like distance in our whole country. While we live in the beautiful Ohio Valley we do not all live in the rural sections—we do not live in the brush. We live where an airport is needed. There are 750,000 people living within 60 miles of that proposed airport. I call upon this House now to help these people. They are not beggars. They have a right to be treated justly. When I go back among them I am going to tell them that I have appealed to the Congress of the United States not to do what the Committee on Appropriations wants to be done but what right and justice demands should be done. The gentleman from New York [Mr. TABER] is a grand man and so is the gentleman from Ohio [Mr. CLEVENGER]. I have voted with them many times for I have confidence in their honesty. This is not a matter of the honesty of these two fine men. It is a matter of their doing what should be done to fulfill the promises made by the Government officials to the effect that if the people of Scioto County, Ohio would bond themselves to the extent of $400,000 that the Government would match that amount which would then be enough to build the airport as they, the Government officials, wanted it built.

Mr. Chairman, I may appear to be a little vehement and a little loud in my expostulations, but I am so much disappointed because these people cannot get the relief to which they are entitled without some of us Congressmen who know the facts telling you about them. These people are doing right to bring their complaints to Congress. I feel it is my duty to help these people get their side of the story before the Congress. Nobody says there was not a valid understanding. In the gallery today there sit some Government officials connected with the Department of Civil Aeronautics. They know all about this problem. They have been before the Appropriations Committee and they have told their story. Mr. Chairman there is nothing else to do, but for the Government to pay up. Let us be honest and sincere, before we are too economical. We must be just. Let us pay our own debts to our own people before we are too generous to the other peoples of the world.

Mr. LOVRE. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield to the gentleman from South Dakota.

Mr. LOVRE. Mr. Chairman, I rise urging that the House consider the replacing of $22 million in this bill for the Federal-aid-to-airport program. I think it is essential that these funds be included in this supplemental appropriations bill.

I was interested in turning back to the CONGRESSIONAL RECORD of March 3, 1954, when the regular State, Justice, and Commerce Department appropriation bill was up. Those opposed to the Federal-aid-to-airport program put great faith in the fact that there was no budget request for this program. Time after time, they countered arguments with, "Well, it was not in the budget." Provision was made for this program in the supplemental budget which was submitted by the administration. I wonder what justification is now being used for the removal of this program from the budget.

For the past 2 years we have been told that this program is the subject of study and that funds would be asked when the study was completed. The study has been completed and the funds have been asked for, but the committee in its wisdom has seen fit to strike these funds from the bill.

The study mentioned brought forth what is called the National Airport Program, Report of the Airport Panel of the Transportation Council of the Department of Commerce on the Growth of the United States Airport System. This is Senate Document No. 95. I recommend the reading of this report to the Members of the House who have not had an opportunity as yet to delve into it. The report states in part:

Based on its findings, the panel is convinced that civil airports are public facilities of vital importance to the commerce and security of local communities and of the Nation as a whole. The panel is convinced also that the ability of the airplane to serve the general public varies in direct proportion to the number and functional adequacy of airports strategically located in the United States and its possessions. The studies undertaken by the panel have revealed that States, municipalities, and other local political units alone are unable to carry the capital investment burden involved in providing an adequate system of national airports. Therefore, it is the unanimous opinion of the panel that it is the responsibility of the Federal Government to give financial assistance to local governments in developing airports which are in the national interest.

The League of Municipalities of the State of South Dakota and the Aviation Advisory Committee of the State of South Dakota are both vitally interested in this bill, as are the United States Conference of Mayors and the American Municipal Association.

Referring again to Senate Document No. 95, it states that:

The panel's findings indicate that today, as in 1946, growth is inherent in the structure of United States civil air traffic. It thus appears to the panel that Federal aid in developing a system of civil airports to keep pace with the requirements of an ever-growing aviation industry continues to be in the national interest.

In addition to this, we have the statement of the United States Chamber of Commerce in their policy report of May 1953. In this report, the chamber says:

The national interest in the provision of an adequate, nationwide airport system justifies reasonable Federal aid for this purpose. The Federal Airport Act of 1946 is the basis for such participation.

Mr. Chairman, I hope that due deliberation will be given to this amendment and that the $22 million will be restored.

The CHAIRMAN. For what purpose does the gentleman from Louisiana [Mr. BOGGS] rise?

Mr. COUDERT. Mr. Chairman, a point of order.

I am a member of the committee. Am I not entitled to recognition?

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. COUDERT].

Mr. COUDERT. Mr. Chairman, I rise in opposition to the amendment, and I apologize to the gentleman from Louisiana [Mr. BOGGS], but the gentleman from Ohio [Mr. JENKINS], who has just addressed the House was so persuasive that I really felt the committee should answer him before the effect of his remarks became irrevocable. I feel very bady as do other members of the committee about all these communities who undertook to borrow money without taking the trouble to ascertain whether or not there were matching appropriations available. The fact of the matter is that it is not the responsibility of the Congress or of the Appropriations Committee of the House. If any community undertakes to commit itself on a loan, on the assumption that it will get matching funds where they have not taken the trouble to find out if the funds are available, that is their responsibility. The real objection to this item now offered

as an amendment to this bill is that it is at the wrong time and on the wrong bill. This is not the original bill for the fiscal year 1955. This is a supplemental bill. The request came in on the 8th or 9th of June. Today it is the 20th of July and the session is about to close. They have had all year to bring in this request. Now they come before us and ask for it at this time.

Mr. JENKINS. Mr. Chairman, will the gentleman yield?

Mr. COUDERT. I yield.

Mr. JENKINS. I have been before your committee when you were not there.

Mr. COUDERT. I beg your pardon. I was there.

Mr. JENKINS. Other Members were there time and time again. The gentleman cannot offer an excuse like that. Why did you not do what you should have done 2 years ago, as far as that is concerned?

Mr. COUDERT. I wish the gentleman had been right when he said I was not there. I am unhappy that I made such a little impression upon him, but I was there. As a matter of fact, the date he has reference to is subsequent to the 8th or 9th of June. I submit that an item of this sort should not be in a supplemental appropriation bill. There is no emergency involved here. There is no reason why this item could not go over to another regular fiscal year.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. COUDERT. Not now.

There is another point that is of very real importance. There is pending today, in the House Committee on Interstate and Foreign Commerce I believe, legislation sponsored by the administration that will affect and change the method of allocation and the method of subsidy, matching funds for these airport programs. I submit that until action is taken on that program, the House would be wholly out of order in appropriating funds at this time.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. COUDERT. I yield.

Mr. HINSHAW. As a member of the committee to which the gentleman has referred, permit me to announce that that bill has been tabled.

Mr. COUDERT. All the more reason for not taking any action. Now we will wait for the Senate to do something about it.

Mr. HINSHAW. The Senate cannot do anything effective when we have tabled the bill.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. COUDERT. I shall be delighted to yield to the gentleman from West Virginia.

Mr. BAILEY. The point that is being made about this airport money, it is my recollection that it was said that the supplemental bill was where it could be corrected. In my home city of Clarksburg we have been collecting funds over the years through taxes and assessments to enlarge the airport facilities, yet we have not received any Federal matching funds to take care of the needed improvement.

Mr. COUDERT. If there is such an accumulation of funds perhaps you will not need the Federal money.

Mr. BAILEY. We want to do some extensive work, we want to extend the runways. We have been collecting money from our taxpayers on the strength of getting Federal aid, yet we have so far received no Federal money.

Mr. COUDERT. I suggest that the gentleman continue with his efforts to get this in the next bill.

Mr. BAILEY. There is no time like the present, though.

Mr. COUDERT. Let me call attention to the table in the committee report and to point out that that table shows what each State will get out of this fund. It is allocated on the basis of population and area, and a very small amount is allocated to each State.

Mr. TABER. Mr. Chairman, I wonder if we can get an agreement on time for this amendment.

I see 12 Members standing indicating they wish to be heard. I ask unanimous consent that all debate on this amendment and all amendments thereto close in 40 minutes.

Mr. CANNON. I would like 5 minutes myself.

Mr. TABER. Mr. Chairman, I ask unanimous consent that the time be limited to 40 minutes, with 5 minutes reserved to the gentleman from Missouri [Mr. CANNON].

The CHAIRMAN. The gentleman from New York [Mr. TABER] asks unanimous consent that time for debate on this amendment and all amendments thereto, be limited to 40 minutes, 5 minutes to be allotted to the gentleman from Missouri [Mr. CANNON].

Is there objection?

There was no objection.

The CHAIRMAN. The Chair has listed the Members requesting time. The time will be divided equally and each Member will be recognized for approximately a minute and a quarter.

The gentleman from Louisiana is recognized.

(Mr. BAILEY, Mr. GREEN, Mr. GARMATZ, and Mr. GRANAHAN asked and were given permission to yield their time to Mr. BOGGS).

Mr. GARMATZ. Mr. Chairman, I ask unanimous consent to extend my remarks at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. GARMATZ. Mr. Chairman, I cannot begin to cover all of the things in this appropriation bill which, to my mind, are serious mistakes. Just to list some of them at random in the order they appear in the committee's report make along list, for instance:

The failure to provide sufficient funds for prompt action on bankruptcy cases in the Federal courts, even though this money does not come out of the Treasury but out of charges made to parties in these cases.

The failure to provide any of the $8,430,000 requested for renewal of the censuses of business, manufacturers, and so on, even though a task force of, I understand, about 1,000 businessmen and other experts urged this work be done as authorized by law.

The failure to provide any of the $22 million requested to renew the Federal-aid-to-airports program, even though, again, a thorough task-force study shows the previous program was an excellent one and should be continued.

The failure to provide any of the $1 million which all the economic experts of this administration insisted was necessary to bring construction statistics up to date as a means of knowing how and where and when to proceed on public works, or other types of construction, particularly in fighting against depression.

Skipping over the maritime item, which I intend to go into in some detail, the next bad mistake is to cut $1 million out of the $9,750,000 requested to hire additional revenue agents to enforce the tax laws, even though every dollar spent for this purpose comes back to the Treasury many times over in taxes which would not otherwise be collected.

The failure to appropriate the additional $119,000 requested to help returning veterans get their old jobs back, even though at the present time there is a long waiting list of cases of these boys whose rights have been violated but who cannot get action because of insufficient personnel in the Bureau of Veterans Employment Rights.

The incredible failure to provide the full $43 million additionally needed for administration of the unemployment compensation and employment-service program, recommending only $4,600,000 instead, even though the workload is rising and the cuts previously made are causing serious delays.

The failure to provide any construction funds for the new features of the Hill-Burton Hospital Construction Act, even though the bill to expand the act recently was passed as a "must" part of the administration's program.

The failure to provide construction funds for the new Old-Age and Survivors Insurance Building in Baltimore or to provide any relocation per diem benefits for the 450 employees of the Agency being moved to Washington.

The failure to provide any funds for carrying out the education bills we just passed—not that they amounted to much—or to provide the very small appropriation requested for the Children's Bureau to fight juvenile delinquency.

There are just some of the items, Mr. Chairman, where the committee has used a meat ax on reasonable appropriation requests. If anything, the Eisenhower requests were too little to begin with. The administration should never have killed off the Federal-aid to airports program, and now it finds that this committee won't even let it start up again even with a token appropriation of $22 million. The administration misjudged the need on unemployment compensation administrative funds when the budget was prepared, and Congress even cut that inadequate amount. So the administration asked for a little more and got a refusal.

What disturbs me most deeply about this bill, however, is the utter disregard

for the merchant marine of the United States represented by the committee's action.

AUTHORIZING SHIPS BUT DENYING APPROPRIATIONS

We have just had a series of bills go through the House dealing with ship construction. They did not represent any really vigorous program of the kind we need to modernize our merchant marine and to get our idle shipyards back in operation. But they were intended to be of some help.

Now we are asked to turn around and refuse to provide the appropriations necessary to carry out these small programs.

Instead of $82,600,000 to build ships, as the Congress has authorized, the committee has recommended only $11,100,000 for experimental modernization of 4 Liberty ships in the reserve fleet.

Not a cent is in here for the tanker trade-in program we just approved—under which private tanker operators would trade in 10-year-old tankers in good condition, which would go into the war reserve fleet, and get a credit toward the purchase of a fast new tanker of the kind we would need and equipped with the national defense features we would need in case of emergency. The President asked for $26 million to get this tanker trade-in program started; he got exactly nothing in this bill as it has come out of committee.

Not a cent is in here either of the $44,500,000 the President requested for construction differential subsidies to make possible the replacement of 5 overage passenger-cargo ships with 4 new high-speed vessels.

The Government used to build these ships and then sell them less the subsidy to the private lines. The present plan is for the Government to pay the subsidy and let the private lines get the ships built themselves. Whether this saves any money or not is a question, but the administration seems to think it will save on outlays that is, the amount expended in any one fiscal year.

Nevertheless—and without any explanation—the Appropriations Committee has killed this item, too. It would have meant the replacement of the *Santa Paula* and *Santa Rosa* of the Grace Lines, Inc., with 2 15,000-ton 19.4-knot vessels, and the replacement of the Maritime Administration's *Argentina, Brazil,* and *Uruguay,* operated by Moore-McCormack Lines, Inc., with 2 18,000-ton, 21-knot vessels.

There is no doubt that we need the faster ships, that we want them under the American flag, and that our shipyards desperately need the work involved in building them. But the Appropriations Committee says "not a cent."

Mr. Chairman, I will support the amendment intended to be presented to this bill by the acting chairman of the Committee on Merchant Marine and Fisheries—the committee in which decisions on the construction of merchant ships should properly be made. We on that committee spent long hours in every session of Congress investigating this whole problem of ship construction; we alone can recommend to the House floor bills authorizing such construction. We do not appreciate having the Appropriations Committee using the device of an appropriations bill to negate our work.

Mr. GRANAHAN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GRANAHAN. Mr. Chairman, the cuts made in this appropriation bill by the Committee on Appropriations represent by and large a repudiation of much of the so-called Eisenhower legislative program—that part of it, at least, which has been passed up to now.

To say that the administration asked for this kind of treatment by its attitudes last year is perhaps to make political capital out of what could very well be a serious situation for the whole country.

But when you take some of these items on which the big cuts have been made, it turns out that they are usually in programs which the administration itself said last year did not look like very important programs, but now wants to revive.

The Federal aid to airports program is a case in point. Last year, the administration asked that no appropriation be made for it, and none was made. After one of those comprehensive studies by groups of experts which was made in this field as in many others, the administration found the previous program was not only a good one but a vital one and should be reinstated. So it asked for this very small new fund of $22 million to get it started again in at least a preliminary fashion.

But unfortunately, members of the Appropriations Committee who took the administration at its word last year and agreed the program probably was not worth continuing without a searching reexamination have not included a single cent of the $22 million. I guess they are reluctant to admit now, as the administration itself has admitted, that ending the program was a mistake. I am afraid the more accurate word is "blunder."

In this connection, the testimony on this bill on behalf of the American Municipal Association, which represents many if not most of our city and county and other local jurisdictions, is very interesting.

TWO-YEAR HALT IN AIRPORT PROGRAM

Mr. R. H. Hamilton, director of the Washington office of this organization, said:

As to the specific amount of the appropriation, the American Municipal Association supports the request for $22 million, but we respectfully point out that it is at least one-third short of meeting any minimum goal. We say that for this reason: Last year the administration in its wisdom decided to cancel the Federal-aid airport program. You are very familiar with that. That means that the municipalities of this Nation in the development of a national system of airports lost a full year. We have, because of the peculiar nature of the budget process, even if this appropriation were to pass the Congress tomorrow, lost another full year because of the necessity for submitting grants, applications for grants, and so forth.

To this, Congressman CLEVENGER, of Ohio, chairman of the particular subcommittee of the Appropriations Committee which acted on this part of the supplemental appropriation bill, replied:

You understand the Secretary of Commerce made no request in the original budget to this committee for this money, do you not?

Mr. HAMILTON. I recognize that. If I am not mistaken, at the time the original request was submitted, two factors prevented the submission of the request. One, the final work of President Eisenhower's study committee, the National Airport Advisory Council group——

Mr. CLEVENGER. I will say of all the study groups and their reports to date, including the Census, and the one relating to the reciprocal trade agreements and all of that, they have all provided for a tremendous enlargement over even the extravagancies that have preceded it. I presume this is in the same line. I have not seen the report.

Mr. HAMILTON. When you say it is in the same line, the report stated, as a matter of fact, that there was a Federal interest in the development of a national system of airports.

Mr. CLEVENGER. Certainly, there is a Federal interest in the development of everything in the United States. That statement of yours is like the question of "When are you going to stop beating your wife?"

I include this exchange from the printed hearings, Mr. Chairman, because I think it sheds a lot of light on the whole situation we face in connection with this starvation appropriation bill.

The Federal aid airport program, killed last year by administration desire to review the whole program comprehensively before spending any more money on it, is again killed by the Appropriations Committee even though the administration now wants to reinstate it. I shall certainly support the amendment to restore to this bill the very modest amount the Secretary of Commerce now asks, and I am sorry we got into this mess as a result of the premature killing of the program last year.

CAA DID NOT CONTACT CITIES

To me, the most serious part of this situation is that the Commerce Department deliberately cut off any contact between the Civil Aeronautics Administration and the various municipalities of the country during the past year so at present it has no idea how much funds are really needed to get the program back in operation. That hurt the CAA in this situation, because the Appropriations Committee has made much of the fact that CAA has no clearcut schedule of projects on which to spend the $22 million it requests. I do not follow the reasoning of the Commerce Department in putting up this curtain between the CAA and the municipalities—the theory that if CAA talked to the cities about their plans and needs for airport work it might imply that the Commerce Department, which still had not made up its mind about it, actually favored renewal of this program.

So now, as a result, the CAA has difficulty explaining how it will use the money. But, as Mr. Hamilton and

other spokesmen for the municipalities and their airports pointed out, and as the CAA indicated, there is a tremendous need for new Federal funds in airport expansion and improvement, and so this $22 million would not have gone very far at all. There is no question that this amount can be wisely used if we provide it in this bill.

As an outstanding example, I have been in touch with the officials of Philadelphia on this matter, and they tell me that we urgently need an additional runway at our airport there which will cost about $8 million. This vital need is outlined in a telegram which I have received from Mr. Walter M. Phillips, director of commerce, Philadelphia, which I quote:

Rapidly increasing air traffic at Philadelphia Airport makes it imperative in near future to construct another east-west runway parallel to main instrument runway. Estimated cost of runway $8 million. This improvement vital not only to future of air transportation in Philadelphia area but in time of national emergency would be essential to national defense.

Now, Mr. Chairman, it is not only the Federal-aid airport program which has suffered so badly in this bill as a result of previous administration reexaminations. The shipbuilding program of the Maritime Administration is cut to pieces. Business and manufacturers censuses, which were knocked out last year for reexamination purposes, are again denied funds, even though the administration and leading business spokesmen, after exhaustive study now tell us they are important to our economy.

OTHER SEVERE CUTS

Unemployment compensation funds were cut too deeply in the administration's original budget estimates, as the President has since acknowledged, and when it was found they were too low and a request was made in this bill for $43 million more, all but $4,600,000 of that was refused. That $38,400,000 should be restored here today. The hospital construction program just authorized—the new program—is cut out completely, so are all the educational programs just authorized by Congress. A $165,000 item for the Children's Bureau to combat juvenile delinquency is cut out entirely. Civil defense gets a terrible cut of $35 million from the request of $60 million for stocking of emergency medical supplies and similar equipment. Money the administration says is needed to make sure veterans receive necessary help in getting their old jobs back under their reemployment rights is also denied. This is not economy so much as it is fiscal butchery.

On the other hand, Mr. Chairman, while making these criticisms which I feel deeply, I want in all fairness to express my gratitude that the committee did not go on to reduce the supplemental requests for veterans unemployment compensation payments or for veterans hospitalization, or for necessary military civil works projects such as the one at Frankford Arsenal, to cost $1,626,000 this year, to expand and improve the electrical distribution system and rehabilitate and improve the steam-generating system.

But with the exception of some items of that kind, this appropriation bill is one intended to slash the heart out of programs which not only the Democratic administrations but now this one, too, have said are vital programs of Government. I think the bill in its present form is something of an insult to the President, and at least a repudiation of much of his program, such as it is.

The CHAIRMAN. The gentleman from Louisiana is recognized.

Mr. BOGGS. Mr. Chairman——

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield.

Mr. GREEN. Mr. Chairman, I rise at this time to commend the gentleman from Georgia [Mr. PRESTON] for presenting this amendment and to state that I am supporting him in this effort to the fullest extent.

The Members from Philadelphia have been working in cooperation with the gentleman from Georgia [Mr. PRESTON] for the last week in impressing on our colleagues the importance of the Federal aid-to-airports program.

The administration in the city of Philadelphia and Mr. Walter Philips, the city representative in particular, has been in contact with all the Members and has advised us the importance of this amendment to the expanding airport facilities in the great city of Philadelphia.

It is my hope that this amendment will pass and this most important work will go forward in the interest of the national defense of our country.

Mr. BOGGS. Mr. Chairman, I rise today to support Congressman PRESTON'S amendment to this supplemental appropriation bill which has the effect of putting $22 million into the bill to restore the Federal airport program.

Last year, the leadership saw fit to delay that program by providing no funds for it. This was the first time in the history of the act that this had occurred. At the time, Members on this side of the aisle pointed out that failure to appropriate funds for the Federal airport program would result in a destruction of a national system of airports. We suggested that the Federal Government had a legitimate, constitutional interest in airport development and that States and municipalities could not carry the financial burden of airport development without Federal cooperation. Our judgment has been borne out. Statistics show a decline in airport construction plans during the past year.

Shortly after the adjournment of the first session the administration appointed a study commission to ascertain the facts about airport development in the United States. The Transportation Council of the Department of Commerce, appointed by Secretary Weeks, took a new look at the national airport program. The unanimous recommendation of that well qualified study group was that—

States and municipalities and other local political units alone are unable to carry the capital investment burden involved in providing an adequate system of national airports. Therefore, it is the unanimous opinion of the panel that it is the responsibility of the Federal Government to give financial assistance to local governments in developing airports which are in the national interest.

That is the actual quotation summing up the opinion of the Eisenhower-appointed group who took a new look at this well-established program.

President Eisenhower sought to implement the findings of his administration's study group. He sent a supplemental request to the Appropriations Committee asking for $22 million to carry out the Federal responsibility in this program. I regret to say that the committee refused to appropriate even this meager amount. They have turned thumbs down on the President's request.

I stand ready to support the President.

I know and understand the necessity for a Federal airport program. In my own city of New Orleans I know that the Federal Government has a responsibility to help develop that airport. Over 90 percent of the traffic at that airport is interstate in character. It is the air gateway to our good friends and neighbors in Latin America. The development of Moisant Airport is certainly of equal importance to the National Government as it is to the city of New Orleans. Needed and urgent repairs are being held up. The construction of a modern terminal building adequate to the needs is awaiting Federal action.

The development of Moisant Airport is a project which New Orleans' Mayor deLesseps Morrison has long planned. His vision of the airport's needs are commendable. I hope we will approve this amendment so as to continue the established partnership in the development of this facility.

Mr. Chairman, well-qualified representatives of the Nation's airport system have testified to the need of this program. At a time when we are appropriating nearly $2 billion for highway work, hundreds of millions for aids to water transportation and navigation, it makes little or no sense to neglect our Nation's system of airports. The American Municipal Association, representing 12,000 municipalities in 44 States, has pointed out that the development of the Nation's airport system has come about through Federal-local partnership. This amendment seeks to continue that partnership. If the partnership is dissolved because of one of the partners does not contribute to it, then the national system of airports will be dissolved and destroyed. I need not dwell on how tragic that would be from a standpoint of the Nation's defense, progress, economy, and business and commercial convenience.

I hope that the amendment will carry. I hope that the Federal Government will fulfill its share of the responsibility in providing a national system of airports and stand shoulder to shoulder with the local governments of the United States in providing adequate facilities for their air age. Planes without airports are useless. Airports will not be built and improved unless Uncle Sam fulfills his share of the responsibility. I urge the Members of the House to support this amendment offered by my well-informed colleague from Georgia whose leadership in aviation matters

is widely recognized. In brief, a vote for the amendment is a vote to restore the Federal airport program which we cut off last year without notice. It is also a vote in support of President Eisenhower's budget request.

SUMMARY OF SPECIFIC FINDINGS AND CONCLUSIONS, AIRPORT PANEL, TRANSPORTATION COUNCIL, UNITED STATES DEPARTMENT OF COMMERCE, 1954

I. The number and functional adequacy of present civil-airport facilities do not meet the present and future needs of civil aviation consistent with the requirements of the national interest and security.

II. States, municipalities, and local political units alone are unable to carry the entire capital investment burden attendant upon the provision of an adequate system of national airports.

III. The Federal Government should participate financially with State and local governments in the construction and development of civil airports to the extent that these airports serve the national interest.

IV. The determination of whether there is sufficient national interest to warrant Federal participation in a particular airport project should be based on a demonstration of tangible aeronautical necessity in the area served.

V. Federal aid should not be limited to any class or category of airport or landing area.

VI. The following segments of airport development should be eligible for inclusion in Federal-aid projects:

(a) Acquisition of land or easements, including all areas necessary for the public safety, such as overruns, runway approaches, and land required for the expansion of the aeronautical facilities of the airport.

(b) Land development, such as clearing, grading, fencing, and the installation of drainage, sewer, and water facilities. This should include not only the initial cost, but also the cost of any subsequent modification or addition.

(c) Construction of runways, taxiways (including leadoff taxiways, runup aprons, and ramps devoted to common public use.

(1) Hard surfacing or other paving should be provided where natural drainage will not assure all-weather service.

(2) Federal aid should normally be limited to the development of a single runway on each airport.

(d) Installation of lighting and navigational facilities (including lighting of obstacles in the approach area) for common public use for the safe operation of aircraft on the airport.

(e) Removal of obstacles on approaches to airport runways when in the interests of public safety.

(f) Nonrevenue service-type structures, such as buildings designed to house fire, crash, and maintenance equipment; control towers.

(g) Access and service roads within airport boundaries.

VII. Since terminal buildings are revenue-producing facilities, they should not receive Federal grants-in-aid. However, as a corollary, all Federal agencies should pay for all their space requirements, including cost of construction and maintenance, on a self-liquidating basis.

VIII. The Congress should study the feasibility of a plan whereby the Federal Government would guarantee the payment to private investors, such as banks and other lending agencies, of indebtedness incurred by State or local governments for the construction of terminal buildings.

IX. The Federal Government should remove reservations and restrictions contained in surplus property deeds or airport sponsors agreements which prevent the private financing of civil airport development.

X. When military requirements at an airport exceed civilian needs, the additional cost should be borne in full by the Department of Defense.

XI. A thorough revision of the national airport plan should be made. This should be based on sound criteria designed to gage the tangible aeronautical necessity of the area served or to be served by the airport.

XII. Selection of sites for airports, heliports, and seaplane bases to be included in the national airport plan should be the mutual responsibility of Federal and State officials, in cooperation with local officials.

XIII. Preparation by the Federal Government of annual or biennial airport programs and the selection of individual airport projects to be included therein should be based on the applications of State and local officials.

XIV. Except as provided in section 10, subsections (b), (c), and (e) of Public Law 377, 79th Congress (Federal Airport Act), as amended, and, except when specifically recommended by the Administrator of Civil Aeronautics and approved by the Congress, the share of the Federal Government in any approved project should not exceed 50 percent.

XV. The Congress should review the Federal Airport Act, together with all other statutes affecting airports, in the light of experience gained since 1946, with the view to eliminating unnecessary costs and restrictions through amendments to the act or applicable statute. Pending such action by the Congress, the Civil Aeronautics Administration should review the administration of the act with the view to eliminating all unnecessary costs, restrictions, regulations, and requirements.

The CHAIRMAN. The Chair recognizes the gentleman from Nevada [Mr. YOUNG].

Mr. YOUNG. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Georgia. The gentleman alluded to the Airport Committee of the Transportation Council, which reported favorably on a continuation of this program. In addition, the Air Coordinating Committee appointed by the President also completed a comprehensive study of the role of the Federal Government in national air transportation. It, too, reported favorably and recommended that this program be continued on a modified basis. It pointed out that in its opinion the primary role in airport construction belongs to local and State governments, but that the National Government does have an interest in maintaining a national air transportation program not only for the purpose of keeping up with our phenomenal economic growth but for the purpose of helping us discharge our responsibility as a world leader.

The Department of Commerce conducted a separate survey in which it pointed out that air transportation use has grown tremendously in this country during the past few years. In 1945 there were some 13 million who enplaned on domestic airplanes. In 1953 that number had grown to 28 million. The Department anticipates and predicts that in 1960 there will be 50 million Americans using domestic airlines. This growing use has overtaxed existing facilities and unless national air transportation is to suffer, the Federal aid to civil airport program must be continued. Our air services must be expanded with its supporting base to keep pace with our economic development and position as world leader. I urge adoption of this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. HINSHAW].

Mr. HINSHAW. Mr. Chairman, I desire to inform the gentleman from New York [Mr. COUDERT] that the committee considered the revision and modification of the Federal aid to airport program and tabled the bill, knowing full well that the bill made such modifications that the committee could not go along with it. The original act provided for $75 million a year for 10 years. At no time has the Committee on Appropriations come even close to that figure which we believed at the time was necessary properly to build a system of airports in the United States. I believe that the Committee on Appropriations in effect would veto this legislation passed under the aegis of my committee by such action as is here proposed. I support the amendment of the gentleman from Georgia [Mr. PRESTON].

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. CLARDY].

Mr. CLARDY. Mr. Chairman, as one who has been flying his own plane from one end of the Nation to the other for better than 25 years, I think I know something about how the program has worked. I do not like what I see. If you think you are helping private aviation, you are kidding yourselves. Furthermore, as a freshman Congressman, I am appalled. Every time someone rushes to Washington for money, you would think that it was merely turned out on a printing press and cost no one anything. Will there never be an end to the idea that this money comes out of the pockets of the very people who think they are benefiting from it? And if this amendment is adopted you will have opened the floodgates. Next year the cry will be that we must carry on the project this money will start. I think the amendment should be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. HAYS].

Mr. HAYS of Ohio. Mr. Chairman, I rise in support of the amendment. I would like to cite one example here. The airport that serves most of the people of my district is located in Ohio County, W. Va. Obviously, the only way we can contribute to it is through Federal funds. The runways of that airport are deteriorating; they need resurfacing, and every year that it is put off it is going to cost more money to get it in the kind of shape it ought to be in to be safe. I think the people of my district want this amendment because they realize the importance of aviation and the importance of national airliners to serve their communities. I am in wholehearted support of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. VORYS].

Mr. VORYS. Mr. Chairman, 25 years ago I was Ohio's first director of aeronautics. We learned then that aviation is national. We found you could not have city or State licensing or traffic regulations for aviation, although some States

and cities tried it. We found you had to have Federal licensing of pilots and planes, and Federal air traffic regulations. The traffic is national and requires nationwide regulation and national support. We have Federal railway regulations and the Federal Government helped the railways in the early days with Federal land grants. We have a 50–50 Federal support of our road system. We have gigantic rivers and harbors appropriations and additional Federal subsidies for our merchant marine. This aviation is a national proposition, involving defense and safety, as well as interstate commerce, and it is a wonderful thing that we get a share of the costs from these cities that are willing to bond themselves.

Now, you cannot have a city wait until an appropriation is made before it issues its bonds. The city must of course move first under the airport aid law. If it does it on the faith and credit of the national law, I think there is a Federal commitment. Take your social security. That requires future appropriations, but nobody claims that the people are not justified in relying on social security when they pay in their money. In cases like my own home city, Columbus, Ohio, where we voted a bond issue of $3,383,000 in reliance on this law, the Federal Government ought to meet its obligation.

Port Columbus is high in priority on national defense aspects. A naval air facility is on the airport. North American Aviation has a plant beside the port. The greatest Army Quartermaster depot in the world is within a mile; 17,838 Air Force landings and takeoffs were made in 1953.

When the Federal Government gets a defense facility like Port Columbus for 50 cents on the dollar, it is getting a bargain. The Government ought to carry out its part of the bargain.

Mr. YOUNGER. Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. GUBSER] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. GUBSER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Georgia.

Last year, the Federal airport aid program was cut pending studies then being conducted. A committee appointed by the Secretary of Commerce recommended that the Federal airport aid program be continued on a larger scale. The air coordinating committee unanimously recommended the Federal airport aid program, and President Eisenhower adopted the report of his air-coordinating committee as national policy.

Like many other cities throughout the country, the city of San Jose, Calif., which is in my district, extended itself financially on the airport expansion and development program in the belief that the Federal Government would continue to carry out the recommendations of its own agencies and study commission, and that it would follow the policy laid down by the President. In order to preserve land for badly needed major airport development, the city of San Jose borrowed deeply from its capital reserve to advance the Federal Government's share of acquisition funds.

In accordance with the Federal Airport Act, the city of San Jose already has incurred out-of-pocket expenses of $131,028 in land and engineering costs in anticipation of Federal aid. In addition, the city of San Jose has created a special fund for the carrying out of a project, total cost of which comes to $382,323. Last year, the city of San Jose authorized the purchase of additional airport property in the amount of $158,000. This property was purchased on the assumption that Federal aid would be obtained. The approved master plan for development of the San Jose airport to the standard required by the industrial development of the San Jose area, and the San Francisco Bay area as a whole, cannot be carried out without Federal aid.

I am not proffering the contention that the Congress is under legal obligation to appropriate the funds sought under the Federal airport aid program by the Civil Aeronautics Administration. I do, however, urgently suggest that we are under the moral obligation to carry out what has been proclaimed as the national policy by our own leaders, and upon which cities in all parts of our country have relied.

MORAL OBLIGATIONS SHOULD BE LIVED UP TO, NOT AVOIDED

If it is the desire of the Congress to shut down the airport-aid program—something that I personally hold to be contrary to the national interest—then let us do it after giving proper notice, so that those who heretofore have worked under the illusion of a Federal-local partnership may be disabused, and are not lured into making commitments on their part which later must remain unfulfilled for lack of Federal assistance.

Mr. Chairman, let us recognize that the $22 million sought by the CAA under the airport-aid program for the current fiscal year is not sufficient for the tremendous needs facing airport development everywhere. It is an amount calculated to give welcome assistance to a number of airports with carefully screened and officially approved projects deemed advisable not only in the local but in the national interest as well. The almost unbelievable rate of industrial development in the San Francisco Bay area renders the development of airport facilities at San Jose a necessity. I am sure the same is true elsewhere.

We have aided the railroads in crisscrossing the country with their lines as a matter of national interest. We have aided in road construction to aid motor links, likewise in the national interest. Let us now in enlightened self-interest, aid aviation by creating the landing fields.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. YOUNGER].

Mr. YOUNGER. Mr. Chairman, I think our duty is very clear here. Rightly or wrongly, we have inveigled or encouraged communities to issue bonds in the amount of $33 million for airports. We have not carried out the obligation of the Federal Government. The gentleman from New York says that this should not be in this bill. I want to know what kind of a bill it should be in if it should not be in an appropriation bill; and this is an appropriation bill. This amendment was recommended by the Bureau of the Budget. The gentleman from New York says that this is not an emergency. He cannot say to those local governments which have issued these bonds, which have been waiting all of this time, that this is not an emergency. I support the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. KNOX].

Mr. KNOX. Mr. Chairman, I rise in support of the amendment of the gentleman from Georgia [Mr. PRESTON]. Also, I concur wholeheartedly in the remarks of my colleague the gentleman from Ohio [Mr. JENKINS]. I cannot believe that this Congress can justify taking a position of dormancy at this time as far as the aviation industry is concerned. I certainly feel that if we are justified in appropriating funds for roads, then we are justified in providing funds so that we may have some safety on our airways. It is my hope that the House will wholeheartedly accept the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. POLK].

Mr. POLK. Mr. Chairman, first I wish to say a word in commendation of the gentleman from Georgia, Mr. PRINCE PRESTON, who has worked so hard and so faithfully and so long on this particular proposal.

FEDERAL AID FOR AIRPORTS

As you may recall, last year when the appropriation bill was before the House, it was my privilege to offer an amendment similar to the amendment the gentleman from Georgia [Mr. PRESTON] has offered here today. At that time we were told that if we would only wait another year until an investigation could be made, that this question would be considered. The investigation has been made. A favorable recommendation has been made on the matter of Federal aid to airports.

Certainly we have complied with the request of those who wanted to study this question. It has been studied. We are now in the process of securing the money which the people of this country have believed that the Congress had a moral obligation to supply to them to match the money that they had themselves appropriated. I strongly support this amendment and urge its approval.

The CHAIRMAN. The Chair recognizes the gentleman from West Virginia [Mr. NEAL].

Mr. NEAL. Mr. Chairman, it would seem to me that to appropriate money for things that are really not needed, when we have to borrow that money from the people, is wrong. But we all recognize that aviation is here to stay so that we are appropriating money here that is needed to meet previous commitments. To me this amendment makes sense, for this reason. I do not believe the Government has any right legally to refuse

funds that have been formally committed and repudiate an agreement that people made with the Government to match funds on a 50–50 basis, to create their own facilities. It would seem to me that to deny this appropriation would not be very good judgment on the part of the Government. I personally feel that I can favor this amendment. To permit the Federal Government to fulfill its obligations and commitments to municipalities that have fully complied by executing their part in fund raising in good faith, in anticipation that the Federal Government would do likewise.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Chairman, this amendment is, first of all, a plain matter of the good faith of the United States. It has been said that some of these American communities did not take adequate pains to discover whether Federal funds were actually available to match their bond issues. Perhaps it was naive, but I will not admit it, for the American people to believe statements proceeding from their own Government in Washington advising them and even urging them to raise money themselves, which the Federal Government would match.

Most Americans still believe that the word of Government officials can be depended on. Having encouraged local communities to raise funds for airports, and now that they have their share of the funds raised for the airports—and nobody denies that the need for them exists—it is unthinkable to me for the Congress not to go through with its part of the bargain.

I think this amendment ought to pass overwhelmingly as a matter of good faith and as a matter of national security and sound development of national transportation facilities. I cannot find one adequate reason against this amendment. We are going to do it eventually; why should we not do it now, and act in good faith with our local communities?

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. SCUDDER].

Mr. SCUDDER. Several years ago the Federal Government entered into an agreement with the city of Ukiah, in my district, in order to assist them in the building of an adequate airstrip so that the larger type commercial planes could land there. The city voted a sizable bond issue to provide for the necessary improvements for the airport. The city purchased the land expecting that the Federal Government would meet their agreed obligation. The Government agency found themselves without funds to meet its share of the cost of this project. Today the city owns the land. But the strip is ungraded, it is unsurfaced, because of the lack of matching money obligated by the Federal Government and air transportation has been retarded in that area.

I know an emergency does exist in the city of Ukiah and without a doubt there are other similar cases. This amendment is necessary to take care of the improvement of airports in a similar position. These people are entitled to air service. I believe it is the responsibility of the Federal Government to meet its obligation and assist in carrying out a project the city entered into in good faith. I support the amendment and ask for a favorable vote.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin [Mr. LAIRD].

(By unanimous consent, Mr. LAIRD was given permission to transfer the time allotted to him to Mr. TABER.)

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. WIER].

Mr. WIER. Mr. Chairman, I want to associate myself with my colleague from the city of Minneapolis in supporting this amendment. The major airports in the principal cities of this country serve all the people, and in addition they serve many of the needs of the military. The Word Chamberlain Field in Minneapolis at one time was completely a commercial field but has now been servicing both the Navy as a reserve station and likewise the military Air Force. They have encroached there and are taking over considerable of the room on the field, with a resulting problem to the Word Chamberlain Administration. For that purpose, I think the Government does have a real interest in helping to service the major fields of this country and making it possible for those in the smaller communities to have adequate service. So I, too, support the amendment offered by the gentleman from Georgia [Mr. PRESTON].

The CHAIRMAN. The Chair recognizes the gentleman from Georgia [Mr. PRESTON].

Mr. PRESTON. Mr. Chairman, I call the attention of the committee to a statement by the United States Chamber of Commerce in its policy statement of May 1953:

> The national interest in the provision of an adequate nationwide airport system justified reasonable Federal aid for this purpose. The Federal Airport Act of 1946 is the basis for such participation.

No one would accuse the United States Chamber of Commerce of being possessed of spendthrift ideas. It is one of the most ultraconservative organizations in the country. It is the organization that has importuned Congress more often than any other organization to act economically. Yet here the granddaddy of all the economy organizations in its policy statement says that we should carry on the Federal airport program enacted in 1946. I submit that that is proof of the highest order.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. CHUDOFF].

Mr. CHUDOFF. Mr. Chairman, perhaps one thing which can be brought out in favor of this amendment is our wonderful and great new Philadelphia International Airport, which we have just opened in the past 6 months. The city of Philadelphia went to great expense to plan what, in my opinion, is one of the finest airports in the world. They took into consideration in making these plans the fact that there would be Federal aid to airports on a 50–50 basis. We definitely need this money to finish this airport. Some time ago I came to the well of the House to ask the Federal Government not to break faith with the Commonwealth of Pennsylvania in its compact to clean up the Schuylkill River. Just as in the case involving these airports, the Federal Government had authorized the cleanup and never appropriated the funds. Fortunately, we were able to get the funds for the cleanup and the work will be finished this year. I think this is just another example of the Federal Government breaking faith with the municipalities of our Nation. I feel many of our municipalities do not understand the system we have here in the Federal Government and in the Congress of the United States. They do not understand that there not only has to be an authorization, but there must be an appropriation besides. They feel that as soon as the authorization has passed that the Federal Government will finally come through with the money necessary to meet the authorization. Then they find, after they have made their plans and issued their bonds, that the Federal Government refuses to come through with the money and appropriate sufficient funds to keep the agreement with the municipalities. In all fairness, I think that since the municipalities are trying to develop the airports of this country, this amendment should be passed.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio [Mr. CLEVENGER].

Mr. CLEVENGER. Mr. Chairman, there is scarcely time enough to answer but 1 or 2 of the allegations that have been made. I want all of you to remember that of this $22 million, there is $1,250,000 for administration. There are 46 of these planners at the present time that are the cause of the municipalities being in the shape they are in. This money will be appropriated under the very terms of the appropriation to be allotted to the States under the present formula. For the whole State of Ohio, it would amount to about $503,000. I am sure that my two colleagues will not be able to get all they want out of that amount of money.

I want to be honest with the people of Portsmouth. There is no way that this committee can earmark $400,000 for Portsmouth, Ohio.

Mr. JENKINS. Mr. Chairman, will the gentleman yield?

Mr. CLEVENGER. I yield.

Mr. JENKINS. I do not want to enter into a dispute with the gentleman, but the chief authorities of this department say to me that they can do this thing and that they can take $400,000 out of the $28 million and pay it down there, and they can do that until the money is expended. It seems that some of you just do not understand what the situation is.

Mr. CLEVENGER. Some of us are remembering the obligation that we have toward the rest of the towns and the rest of the States, and we are not trying to grab more than our share. I am going

to tell you something. When some of you Members go out on the stump and go to talking about balancing the budget, and how you are for economy, and suddenly you feel something bitter in your mouth, do not be alarmed, it is just an excess of biliary action and your gall bladder is working.

The CHAIRMAN. The Chair recognizes the gentleman from Missouri [Mr. CANNON.]

Mr. CANNON. Mr. Chairman, how easy it is to spend money for some beloved project back in our own districts—and how hard it is to levy taxes to raise the money. The mythical senator, Senator Snort, always voted for all appropriations and against all taxes—a consumate achievement in statesmanship. It is to be observed that most of those who are urging additional expenditures here today voted to reduce taxes in the last tax-revision bill. We vote for appropriations and we vote against taxes, and then, as Senator Snort said, we get letters from crackpots who want to know where we are going to get the money.

Mr. Chairman, may I interrupt this hilarious, headlong stampede on the Federal Treasury for just one word? Can we talk a little commonsense? Mr. Chairman, may I talk a little practical politics with my friends here this afternoon, in their own language?

How disappointed. How shocked and disappointed some of us who are voting for this pork-barrel amendment here this afternoon are going to be when we get in line to collect our share of the loot.

The amendment provides $22 million for more than 1,600 airports. But you are not going to get an equal division even on the $22 million. Something like $2 million must first be subtracted for administration and the insular possessions.

Of the remaining $20 million, 25 percent goes to the Bureau of Aeronautics. Seventy-five percent goes to all the States—not in equal parts—but according to population and area. Texas with its huge area and population would get a major slice. But Texas is full of airports and the entire $20 million if given to Texas alone would be equivalent to a pint can of water carried across the desert to extinguish a forest conflagration.

There will be expectant constituencies all over the country, whose hopes have been buoyed by the rosy accounts of this vote who will be quite irked when $15,000,000 does not build a superairport in every county seat in the Nation.

But the embarrassment of the Congressman who fails to deliver on the flambuoyant reports the newspapers will carry on this amendment will not be a circumstance to what he will be up against when the drive really starts. Every hamlet and village and crossroads in the country will be out to get its airport and its share of the Government money. There is $1,250,000 in the bill, to be taken out of the $22 million, for new employees whose business will be principally to cruise around over the country and encourage more towns to apply for airports.

It will take a lot of explaining on the part of the Congressman to convince them that they are not as much entitled to an airport as the town just across the line. Oldtimers around here will remember what happened when each Congressman had one new post office building to pass around and two dozen towns in the district reaching for it.

Now let us be practical about this matter. It is no time to start something which can in 1 year get completely out of control. To pass this amendment is to start a program which cannot be held in leash. It is a program which will demand not millions but billions of dollars. It opens up an area of such colossal expenditure as to dwarf any other peacetime item in our national budget.

I know we get tired hearing about the budget. Balancing the budget—balancing the budget. But as weary as we are of hearing about it, the unbalanced budget reported the first of the month at the beginning of this fiscal year and which will confront us on the adjournment of the Congress, is one of the most serious and dangerous of all the serious and dangerous situations which surround us today.

Just one more absurdity. Doubtless you have been surprised at statements made during debate on this item to the effect that the Government is committed—that the Government is pledged—that the Government has entered into contract—that the Government is guilty of bad faith—when it does not supply money in any amount to any locality which chooses to issue bonds for an airport.

It cannot be stated too emphatically that the Government has never at any time made any agreement of any kind with anybody to contribute anything whatever to the construction of any airport contemplated by this amendment.

"Oh," they say, "the Congress has passed an act authorizing such expenditures." But an authorization has no binding effect whatever. The statute books are full of them. They are passed every session—too often by what amounts to unanimous consent. If the Committee on Appropriations reported and the Congress passed this afternoon all appropriations authorized by law the Treasury would discontinue payment tomorrow morning.

Mr. Chairman, this expenditure is unwarranted. We have been getting along without it and we can continue to get along without it. Every dollar of it is deficit spending. The States and minor political subdivisions are solvent. Let them take care of such expenditures. The amendment should be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Montana [Mr. D'EWART].

Mr. D'EWART. Mr. Chairman, I rise in support of this amendment.

The city of Billings, Mont., one of the two largest cities in our State, has been planning for improvement and enlarging its airport for several years and has depended upon the availability of Federal funds to help in the project. The city did not rush into this program, but gave it considerable study and devoted a good deal of effort to its plans before it applied for Federal help. Unfortunately, the delay occasioned by the desire to have a sound project carried the city beyond the date when Federal funds were cut off.

As part of its planning, the city of Billings about a year ago voted upon a $450,000 bond issue for the airport program. The voters endorsed the project overwhelmingly. At that time the city was negotiating with the CAA in good faith with no idea that the Federal program would be terminated.

Under these circumstances, we feel strongly that the Federal Government has a commitment, at least a moral commitment, to go ahead with this project. The total Federal share would be $570,859, while the local sponsors would contribute $460,000. The work includes land acquisition, grade and drain landing strip to be 500 feet by 8,800 feet, paving and lighting another runway 150 feet by 8,600 feet, paving of taxistrips and aprons, construction of a new terminal building, etc.

Not all of this work needs to be done at once, but the improvement and lengthening of the landing strips is essential.

Billings is the center of the new and rapidly developing eastern Montana oil industry. Its population is growing rapidly. It is a transportation hub in the State for air, highway, and rail travel. For the past several years it has rated sixth among all the cities in the eight Northwest States as to the number of enplaned passengers.

The present airport is entirely inadequate to handle the growing amount of traffic and the new and larger aircraft that are being used and are on order for Northwestern Airlines, Frontier Airlines, and Western Airlines.

This is a necessary and worthwhile project, and I think that the Federal Government should come forward without delay to do its share under the Federal Aid Airport Act. I hope that the committee will include in the bill at least enough money to go ahead with the projects at the larger and more important air centers such as Billings, Mont.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. TABER] to close debate on this amendment.

Mr. TABER. Mr. Chairman, I hold in my hand the justifications that were brought up by the Civil Aeronautics Administration when they came for their hearing on this matter. They said they wanted 1,910 airports. With an item of $22 million each airport would get about $10,000. You can figure your chances on this thing. I just hope too many will not be buncoed by the propaganda that has been put out by these fellows down there on the payroll. They have been out to these communities and sold them without any authority on a promise that the United States would pay half. It was a bad thing that the Congress permitted them to stay on the payroll.

Let us not allow the people to be bamboozled by such folks as that; let us not allow them to build up another 65, 70, or 100 additional redtapers to go around and inveigle communities into trouble.

I hope this House will show its usual good sense and refuse to add this item onto the appropriation bill today.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 157, noes 61.

So the amendment was agreed to.

Mr. YOUNG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG: On page 6, following line 8 insert:

"CLAIMS, FEDERAL AIRPORT ACT

"For an additional amount for 'Claims, Federal Airport Act', to remain available until expended, as follows: Municipal Airport, Elko, Nev., $69,449."

Mr. YOUNG. Mr. Chairman, the amendment which I have offered is to appropriate $69,449 to repair damages done to the Municipal Airport at Elko, Nev. I may say at the outset that we should commend the Appropriations Committee for the excellent job it has done in economizing, in cutting out unnecessary expenditures. However, I believe in this instance we have not an unnecessary expenditure but a legal obligation of the United States Government.

How did this claim arise? It arose under section 17 of the Federal Airport Act, which provides that in the event a Federal agency damages or does harm to a municipal public airport, then the Administrator of Civil Aeronautics can investigate, appraise the damage and make a recommendation of what sums will be necessary to rehabilitate the airport and repair the damage. That has been done. During the first session of the 83d Congress, by Public Law 105—this Congress reaffirmed that law. A claim was duly submitted; it was certified by the Civil Aeronautics Administration in the amount of $69,449. It represents a legal, contractual obligation. It represents an obligation upon which the United States Government could be sued in the Court of Claims, and I see no defense to the claim.

How did this damage occur? It occurred from two causes. First, as the result of Operation Haylift, which was conducted from March 22 to March 31, 1952. In Operation Haylift, heavy Army and Navy planes used the Municipal Airport at Elko, Nev., for the purpose of dropping hay to cattlemen in distressed areas. The areas were distressed because of a heavy snow which isolated them from their supplies of food.

The airport was designed to handle airplanes with loads of 15,000 and 20,000 pounds for single and dual-wheeled planes, respectively. Heavy C–54 and C–119's, carrying gross loads of 63,000 and 64,000 pounds utilized the airport. There were 110 such loads from the Elko Municipal Airport. There is no doubt that damage occurred as a result therefrom. Shortly after the commencement of the operations city authorities notified the Engineer Corps that extensive damage was being done to the pavement. Later that summer repairs were made to the airport, and that fall a second cause for damage occurred when an air rescue mission was underway. There were several downed planes. Approximately 30 Army and Navy planes utilized the airport to conduct their operations.

I have here a letter from the commanding general of the Air Rescue Service, in which he says:

AIR RESCUE SERVICE,
MILITARY AIR TRANSPORT SERVICE,
UNITED STATES AIR FORCE,
Washington, D. C., February 4, 1953.

Hon. DAVID DOTTA,
Mayor of the City of Elko,
Elko, Nev.

DEAR MAYOR DOTTA: I wish to convey my sincere appreciation through you to the citizens of Elko and the surrounding territory for the splendid cooperation afforded members of my command during the recent search for a United States Air Force C–47 and a civilian Cessna aircraft, both lost on December 10, 1952.

The combined efforts of local Civil Air Patrol members, governing officials, and volunteer searchers greatly hastened the conclusion of the mission.

Although the absence of survivors in either disaster was saddening to us all, still, the singleness of purpose displayed by military and civilian alike in a desire to help their fellowman is unquestionably reassuring.

Since I cannot thank each one concerned individually, I must take this collective method of expressing my personal gratitude, and that of my entire command.

Sincerely,

T. J. DUBOSE,
Brigadier General, USAF, Commanding.

There seems to be some question as to the amount of damage done to the airport. The Engineer Corps made a preliminary report and estimated that some $20,000 would be required to repair the airport. The city, in conjunction with the services of the Nevada State Highway Department, submitted a claim in the amount of $116,000. Later the Civil Aeronautics Administrator made an investigation and reported that in his opinion an amount of $69,449 would be required to put the airport in the same condition that it was in prior to the time of Operation Haylift, and the air rescue mission. The claim was duly submitted, but it has been rejected by the Committee on Appropriations.

Now, why do I feel that the Federal Government is obligated to pay this? First, because section 17 of the Federal Airport Act clearly and unequivocally states that when the Administrator of Civil Aeronautics certifies a certain amount as necessary to rehabilitate an airport it should become a legal and contractual obligation of the United States Government. Secondly, we know if a private plane used an airport such as this and damaged it as extensively as this was damaged, there would be no doubt that liability would attach and damages could be obtained. Thirdly, the operation of December 10, 1952, the air rescue operation to which I have referred, was exclusively a military operation and certainly one which was accomplished by an agency of the Federal Government. Mr. Chairman, there is a legal and, I believe, a moral obligation for the Government to pay this claim. I, therefore, urge adoption of this amendment.

Mr. TABER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have before me the hearings and a man named Howell from the Civil Aeronautics Administration was a witness. He said that the Corps of Engineers investigated the claim and that the city of Elko was advised on June 12, 1953, that the actual estimate of the damage was $20,200.

Now, a lot of the damage, according to the hearings, was not confined to the bad breaks and failed areas where planes broke through or shattered the pavement but covered the entire westerly 4,200 feet of the 6,000-foot runway, an area of approximately 70,000 square yards.

Now, the committee felt when it was investigating this matter that it was more than should be considered under the circumstances.

Mr. ROONEY. Mr. Chairman, will the distinguished gentleman yield?

Mr. TABER. I yield to the gentleman from New York.

Mr. ROONEY. Was it not the thought of the committee that this sort of item does not belong in a supplemental appropriation bill; that it is a matter to which more time should be given by the committee because of the difference between the estimate of the Corps of Engineers in the amount of $20,000, and the amount requested by the Civil Aeronautics Administration? Was it not principally a matter of deferring this until the committee could get some firm judgment with regard to it?

Mr. TABER. That is a correct picture of the situation.

Mr. YOUNG. Will the gentleman yield for a question?

Mr. TABER. I yield.

Mr. YOUNG. Did not the testimony show that there was $70,000 worth of damage and did it not also point out that the report of the Corps of Engineers was based only upon repair to the surface damage? I have photographs which show holes big enough to hide a man in, as a result of heavy planes landing on the airport.

The longer we delay, the harder it will be upon the city of Elko. They have made temporary repairs, but those were knocked out by the rescue mission on December 10. They have a half million dollar investment in that airport between the Federal Government and the city of Elko, without counting the amount of money that was required to acquire the original 350 acres. It is a legitimate claim under Public Law 105.

Mr. TABER. It is, insofar as it is justified, yes. The CIA engineers found that the damage was not confined to the bad breaks and filled areas where planes broke through but covered the entire area of the 6,000-foot runway, an area of 70,000 square yards. That finding is rather disturbing to me.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield.

Mr. ROONEY. Is it not the further fact in connection with this claim in the amount of $69,000, that the total investment of the city of Elko in the airport originally was in the amount of $103,000?

Mr. YOUNG. That does not include the cost of the 350 acres that constituted

the airport. That is a sizable contribution for a city of around 5,000 population.

Mr. ROONEY. A city how large?

Mr. YOUNG. Slightly over 5,000.

Mr. ROONEY. We were given to understand that Elko was a city of 12,000 population with only four commercial flights a day. Evidently the Civil Aeronautics Administration is not too well acquainted with that area.

Mr. YOUNG. I wish the committee were as generous with their appropriations as they are with estimates of the population of the city of Elko.

Mr. ROONEY. It is not a question of generosity; it is a question of trying to do the right thing by the taxpayer.

Mr. YOUNG. That is all we are asking, what the Administrator certified.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nevada [Mr. YOUNG].

The amendment was agreed to.

The Clerk read as follows:

MARITIME ACTIVITIES

SHIP CONSTRUCTION

Mr. WIGGLESWORTH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGLESWORTH: Page 6, line 11, after the words "ship construction" strike out all of lines 11, 12, and 13, and insert in lieu thereof the following:

"For payment of construction-differential subsidy and cost of national defense features incident to construction of four passenger-cargo ships under title V of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1154); for reconditioning and betterment of not to exceed four ships in the national defense reserve fleet; and for necessary expenses for the acquisition of used tankers pursuant to section 510 of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1160), and the payment of cost of national defense features incorporated in new tankers constructed to replace such used tankers, $82,600,000, to remain available until expended: *Provided*, That transfers may be made to the appropriation for the current fiscal year for 'Salaries and expenses' for administrative expenses (not to exceed $500,000) and for reserve fleet expenses (in such amounts as may be required), and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses: *Provided further*, That appropriations granted herein shall be available to pay construction-differential subsidy granted by the Federal Maritime Board, pursuant to section 501 (c) of the Merchant Marine Act, 1936, as amended, to aid in the reconstruction of any Mariner-class ships sold under the provisions of title VII of the 1936 act."

Mr. TABER. Mr. Chairman, I make the point of order that the amendment contains legislation. The language "and any such transfers shall be without regard to the limitations under that appropriation on the amounts available for such expenses" makes it clearly subject to a point of order.

The CHAIRMAN. Does the gentleman from Massachusetts desire to be heard on the point of order?

Mr. WIGGLESWORTH. Mr. Chairman, the language submitted is the language that was received from the Bureau of the Budget. It seemed to me that if this step was to be taken this was the desirable way to do. However, if the gentleman from New York insists, I concede that the language in question is subject to a point of order.

The CHAIRMAN. The Chair sustains the point of order on the ground that the amendment does contain legislation.

Mr. WIGGLESWORTH. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGLESWORTH: Page 6, line 11, after the words "ship construction", strike out all of lines 11, 12, and 13, and insert in lieu thereof the following:

"For payment of construction-differential subsidy and cost of national-defense features incident to construction of 4 passenger-cargo ships under title V of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1154); for reconditioning and betterment of not to exceed 4 ships in the national-defense reserve fleet; and for necessary expenses for the acquisition of used tankers pursuant to section 510 of the Merchant Marine Act, 1936, as amended (46 U. S. C. 1160), and the payment of cost of national-defense features incorporated in new tankers constructed to replace such used tankers, $82,600,000: *Provided*, That appropriations granted herein shall be available to pay construction-differential subsidy granted by the Federal Maritime Board, pursuant to section 501 (c) of the Merchant Marine Act, 1936, as amended, to aid in the reconstruction of any Mariner-class ships sold under the provisions of title VII of the 1936 act."

Mr. WIGGLESWORTH. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes, if necessary.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. WIGGLESWORTH. Mr. Chairman, the able subcommittee in charge of this bill has effected reductions to the extent of $766 million. That is a reduction of 40 percent in the total requests considered. The amendment which I now present would restore to the bill 4 percent of the 40 percent which would otherwise be deducted.

I offer this amendment in the interest of national defense. I offer it in order that the funds requested by the President of the United States may be made available for deficiencies in our merchant marine and to help meet the desperate situation confronting shipyards today which are essential to national defense.

One year ago the Department of Defense estimated an official deficiency in merchant-type vessels to the extent of 214 ships, including 43 large tankers, 6 large passenger-cargo ships, and 165 ships of other types.

The request which the President makes, which is represented by this amendment, presents a modest program of ship construction, not of 214 ships, but of 14 ships, including 10 new, large tankers and 4 new, large passenger-cargo ships, all to be built in our American yards.

Time and time again, Mr. Chairman, the urgent and immediate need for fast, modern, large tankers has been presented by Department of Defense officials to the Congress.

We have been told that those tankers which we now have are fast becoming obsolete, and that they are too slow for modern requirements.

We have been told that there are practically no tankers of any description in our Reserve fleet.

We have been told that we do not have enough tankers on hand to meet an initial mobilization impact.

Listen to the words of our very able Deputy Secretary of Defense, Secretary Anderson. On July 23, 1953, when he was Secretary of the Navy in a letter to the chairman of the Committee on Merchant Marine and Fisheries, he wrote in part as follows:

I feel that I would be derelict in my duties as Secretary of the Navy, if I did not take this opportunity to strongly support the need for prompt construction of new tanker tonnage under the United States flag.

As you are aware, there are no United States flag tankers in reserve either in the Navy or national defense reserve fleet. Construction of military and civilian mobilization requirements, capabilities of existing tanker tonnage, anticipated losses due to enemy action, increased military demand for large quantities of petroleum products, as a result of technological advance in aircraft and other military equipment, and the time required for new construction all lead to the conclusion that the Government should promptly take such steps as are practicable to promote the construction of new tanker tonnage under the United States flag prior to mobilization.

The need for new, fast passenger cargo ships has also been repeatedly emphasized over the years.

I am advised that as of today in terms of trooplift capacity, we have just about 50 percent of what we had prior to World War II.

Why are these four particular ships required now?

They are required to replace five ships, each one of which is overage, each one of which is operating under waivers, the owners of each of which are under obligation to replace these ships at this time as a result of contracts with the Government.

Where will these ships be built, Mr. Chairman? They will be built in American shipyards, which are essential to our mobilization base in the interest of national defense.

What is the situation with reference to those shipyards today? It is a desperate picture.

The shipbuilding industry is perhaps the No. 1 industry in this country today in terms of distress. It was designated officially as a distressed industry 2 years ago and conditions are far worse today.

I am advised that not a single commercial contract has been placed in these private yards during the period of the past 18 months.

Of the 29 ships on the ways nationwide at this time, all except two will be completed in the next 150 days. There will only be two on the ways after December 31.

Unemployment figures among our skilled workers in this field so essential in time of emergency are becoming tragic.

Let me quote briefly from Admiral Leggett in this connection.

In a statement before the House Committee on Merchant Marine and Fisheries on April 26, 1954, he said among other things:

The situation today in our private shipyards is so critical that I have grave concern whether the industry can meet mobilization production schedules.

It is apparent that the industry is not prepared today to meet initial wartime requirements. Our private yards now have less than one-third of the total (employees) in December 1941, and a further drastic reduction is expected later on this year as the privately owned and mariner construction now on the ways is completed.

And Mr. Chairman, note this statement, I am still quoting:

I repeat, the Navy is gravely concerned with the plight of the shipbuilding industry which promises to become the most vulnerable area in our entire preparedness program.

Mr. Chairman, I do not say that all shipyards are essential. I do say that it is vital to keep in being all those yards that are essential from the standpoint of national defense.

To allow essential shipyards to fold up at this time, to allow their skilled forces of workers to be dissipated and lost is contrary to our entire national defense policy. In fact, it is suicidal.

All this amendment does is to reinstate the Budget request, the request which the President of the United States has made in order to carry out a modest program of ship construction.

I repeat, the amendment restores only 4 percent of the 40 percent which has been effected by way of reduction in this bill as a whole.

I hope, Mr. Chairman, that the House will see its way clear to go along with this amendment in the interest of national defense.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. ROONEY. Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts may proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from New York.

Mr. ROONEY. First let me reiterate what I said yesterday, that I have an amendment prepared exactly similar to the one now offered by the gentleman from Massachusetts. I shall fully support his pending amendment, as will many of us on this side of the aisle. I will go a bit further, though, and propose an amendment to the gentleman's amendment, adding a further proviso, to wit:

Provided further, That all ship construction, reconditioning and betterment of vessels appropriated for herein, be performed in shipyards in the continental United States.

I wonder whether or not the gentleman would have any objection to such an amendment to his amendment.

Mr. WIGGLESWORTH. I am in entire sympathy with the gentleman's proposal. The only reason that I did not include it in my amendment was that I was advised that it was unnecessary as it was required under existing law.

Mr. ROONEY. There seems to be some question whether or not this provision is necessary. I have been told that perhaps it is not, but to insure the fact that these vessels would be built in American shipyards in the continental United States and so there is no doubt about it, I am going to offer this as an amendment to the gentleman's amendment. I know he will accept it and vote for it, because we have been in thorough agreement with regard to this subject all along, not only on the American merchant marine but with regard to the American shipyards.

Mr. WIGGLESWORTH. The gentleman is correct.

I yield to the gentleman from Connecticut.

Mr. SEELY-BROWN. I want to congratulate the gentleman for his fine statement, and I shall support his amendment as amended by the gentleman from New York.

Mr. WIGGLESWORTH. I thank the gentleman.

Mr. HALE. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from Maine.

Mr. HALE. I want to compliment the gentleman for introducing this very constructive and necessary amendment and I sincerely hope it will prevail.

Mr. WIGGLESWORTH. I am grateful for the gentleman's support.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from Pennsylvania.

Mr. JAMES. I want to associate myself completely with the statement that has been made by the gentleman from Massachusetts, and to urge support of the amendment he has offered. I would very willingly vote for the amendment to the amendment that has been suggested by the gentleman from New York [Mr. ROONEY].

Mr. WIGGLESWORTH. I thank the gentleman from Pennsylvania.

Mr. SCUDDER. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from California.

Mr. SCUDDER. I wish to associate myself with the gentleman's amendment. It is a very worthwhile amendment, and I believe the safety of our country makes it necessary to have a proper merchant marine.

Mr. WIGGLESWORTH. I thank the gentleman.

Mr. DEVEREUX. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from Maryland.

Mr. DEVEREUX. I would like to compliment the gentleman on his very fine statement. There is one point that could be made. If we can keep our mobilization base within the confines of the continental United States, we will then be able to have a potential that will not be as vulnerable as we have been in building our mobilization bases in Europe and in other places in the world.

Mr. WIGGLESWORTH. I thank the gentleman from Maryland, who has had such wide experience in the field of national defense.

Mr. WOLVERTON. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from New Jersey.

Mr. WOLVERTON. I also want to congratulate the gentleman from Massachusetts on the comprehensive statement that he has made. He has put his finger on the real necessity for his amendment. First, that there is need for ship construction.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

(By unanimous consent, at the request of Mr. WOLVERTON, Mr. WIGGLESWORTH was granted 2 additional minutes.)

Mr. WOLVERTON. The gentleman has put his finger on the two important features that sustain the amendment he has offered; namely, that there is need for the construction of these ships; and, second, there is need for this work in the shipyards of this country if they are to be maintained and their organizations retained in this all-important work. Too frequently we have seen our shipyard organizations dispersed as a result of lack of employment, and this creates a situation that is detrimental to our national defense. It is highly detrimental to our best interests to have organizations such as that which carries on our shipbuilding industry dispersed into other industries. The shipyards abroad are working overtme. They have a tremendous schedule of work. Why our shipyards should be left in the condition they are at the present time is not understandable to me.

I am in full accord with the amendment the gentleman from Massachusetts [Mr. WIGGLESWORTH] has offered and the amendment to that amendment that has been offered by the gentleman from New York [Mr. ROONEY].

Mr. WIGGLESWORTH. I thank the gentleman for his contribution.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to my colleague from Massachusetts.

Mrs. ROGERS of Massachusetts. It is entirely proper and absolutely necessary that we should consider the building of ships in our own country instead of in other countries.

Mr. WIGGLESWORTH. I thank my colleague from Massachusetts.

Mr. ALLEN of California. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from California.

Mr. ALLEN of California. Mr. Chairman, I think the gentleman should point out that this program involves an appropriation of some additional $70 million. But its expenditure would require that industry contribute on its part in the neighborhood of $100 million in the joint project that would be undertaken.

Mr. WIGGLESWORTH. I thank the gentleman for his contribution.

Mr. CLEVENGER. Mr. Chairman, I rise in opposition to the amendment and ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. CLEVENGER. Mr. Chairman, this amendment was offered in the full committee and was defeated. It is a little over 2 years ago—I think this is the third year—since the merchant marine section was transferred over from the Subcommittee on Independent Offices. At that time there were 35 so-called Mariner ships under contract. They cost, in round figures, about $10 million each. They were built in seven shipyards from identical plans, and the cost varied as much as $2 million per ship.

On page 699 of the hearings there occurs this colloquy between Mr. COUDERT and Mr. Rothschild, and I asked one question:

Mr. COUDERT. How many of those ships have been sold to private operators?

Mr. ROTHSCHILD. Three of them, sir.

Mr. COUDERT. Three out of 35?

Mr. ROTHSCHILD. Yes. None prior to my incumbency.

Mr. CLEVENGER. One has been wrecked.

Mr. ROTHSCHILD. Yes.

What is the situation that faces us now?

This bill carries a request for millions of dollars to convert these new ships that have never carried a cargo—31 of them have never been loaded, as far as I know—converted into shape that they might be sold to some shipyards for half what they cost.

Mr. ALLEN of California. Mr. Chairman, will the gentleman yield?

Mr. CLEVENGER. I would like to use a little bit of my time.

It is evident that the temper of the House is such that it has forgotten all the election promises of 2 years ago and the balancing of the budget or an honest treatment of the people's money. That is as far from realization here as it could well be.

I ask some of you if you were on this committee and you had this bundle of dirty laundry dumped in your lap, would you rush to appropriate $82 million more to the same crowd that built these Mariners, or misbuilt them?

Just what are we expected to do? Just appropriate in faith, hope, and charity? Is this, after all, a WPA bill to put people back to work? And the cost of them is double what it is in western Europe, and more than that if you compare costs with northern Europe or Japan.

I want to give you just a little idea of the cost of operating these ships, the cost of subsidies; I cannot give the whole picture in 10 minutes, but a few figures, perhaps, for 4 or 5 new liners, these combined passenger-freight ships. I want to give you the history of the *Brazil*, the *Argentina*, and the *Uruguay* of the Moore-McCormack Lines.

Subsidized cost, $10,129,000. Subsidized costs per voyage, $405,195.

Subsidy accrual—I take that to be a credit earned against the ship—$181,000.

The *United States*. You know she cost $75 million. The present owners have $20 million in her and we are negotiating to get them to pay $9 million more. I asked for the subsidy figure for 1953 but got 1952 which was worse.

The subsidy accrual was $2,985,000. The subsidized cost per voyage of the *United States* was $399,906. For the *Independence* and the *Constitution* of the American Export Lines, the subsidized cost per voyage was $322,460 and the total subsidized costs $9,641,326.

Is it not time that someone be asked to investigate the operations of the merchant marine?

I should like to refer to the testimony of Mr. Rothschild in which he admitted that some $3.50 mine peril pay costs were carried indefinitely, for 3 or 4 years, even though the conditions had been remedied. It was only in December last that some of it was taken off, but I have not seen it reflected in the budget. I will take his word for it.

Many of you may have heard a program the other night about the addition of a tanker to the Cities Service fleet steamship *Alton Jones* in New York which carries 14½ million gallons of oil, as much as three ordinary commercial tankers. Is anyone going to stand up here and contend to the Members of the House that our oil companies are not sufficiently prosperous to build more ships like that, even in American shipyards? We must give them a new tanker for two overaged tankers of theirs. Just what right has an Appropriation Committee got, legal or morally, to deal with the American people's money in any such fashion?

It is a strange thing, but we can build a motorcar cheaper in the United States than any place else in the world. We can build most everything in heavy industry cheaper. But why is it that we cannot build a ship for less than twice as much as what it would cost in any other country? There must be something wrong somewhere. There must be something wrong in the negotiations, there must be something in the American process that is wrong.

If we are going to be competitive in this world, it seems to me we ought to cut out all of the embroidery and get down to the business of building ships. We are not helping the American merchant marine by pouring more millions into such a trap as this. We are just helping the American merchant marine to commit suicide if we pursue such a course.

Mr. COUDERT asked Mr. Rothschild:

Fundamentally, were they not really built as sort of a boondoggling proposition to keep shipyards going?

Mr. ROTHSCHILD. As I understand it, sir, their building was discussed and induced by the outbreak of the Korean incident.

That was his answer.

Mr. COUDERT. Was it not a fact that the distribution of the construction contract was on some sort of a pro rata national basis and and not on the basis of the lowest bids?

Mr. ROTHSCHILD. They were built in 7 different yards—5 ships each in 7 different yards.

And they were built from identical plans and the costs ran from $7¾ million to $10½ million each.

What kind of an operation are we expected to engage in as an Appropriations Committee? We run a good laundry down there in that committee and we always have, we wash with Ivory soap everything, but we do not guarantee it not to shrink.

A moment ago a gentleman spoke of this as being only 4 percent of the savings. There has been nothing saved in this bill up to this time. The spenders have been in control on this floor. Once again I want to remind you that within 2 or 3 weeks you will be out on the platform again, you will be campaigning for Eisenhower, or most of you will, which would justify your being returned to this House. Just how are you going to square an unbalanced budget? We have been running wild all this year, and we are coming back now to supplementals, always saved to the last. Is there a man here that did not promise to balance the budget? I know it is almost useless to appeal to you, in the temper you are in, but I am not ready to embark on a WPA in connection with ships or anything else. I think this country is fundamentally stronger than that. I want to remind you that when I came down here there was a school man from Gary who thought it was incredulous when he was told that they had the then President in the middle of a swift stream. Well, they got the next President in the middle of the same swift stream and in the next 7½ years he spent more money than all of the previous Presidents put together. Now we have a man stronger and wiser than either of them, Dwight D. Eisenhower, and I want to get him out of that swift stream and get him on solid shore with a balanced budget, sound fiscal policies, the same forces are playing upon him and he needs the support of solid citizens of both parties.

Mr. ROONEY. Mr. Chairman, I move to strike out the last word.

Mr. ROONEY. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Chairman, at the outset I must observe that my good friend and chairman, the very sincere gentleman from Ohio [Mr. CLEVENGER] has been utterly consistent over all these years insofar as any spending of taxpayers' dollars is concerned. It is all right to be consistent, and it is all right to be conservative but not to the extent that the distinguished gentleman would bring us. Now, today you observed that he was against the census of business, manufactures, and mineral industries which has been demanded by businessmen and chambers of commerce throughout the country, and which was so eloquently pleaded for here by a number of Members on the majority side of

the aisle. He was against aviation, and now he is against the American merchant marine.

First, let me explain the amendment which I shall presently offer and which is now at the Clerk's desk. It is a perfecting amendment to the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH]. It provides that with regard to whatever moneys are appropriated herein for maritime activities, for the construction, reconditioning, and betterment of vessels, that the work shall be performed in American shipyards in the continental United States. My reason for offering this amendment is this: It has come to my attention that at the present time there is being built or about to be built in Communist Yugoslavia two mine sweepers out of funds of the Federal Operations Administration off-shore procurement program. I do not feel that we should use the American taxpayers' moneys for the construction or reconditioning of these vessels at any shipyard other than in our almost idle shipyards in the continental United States. We now have gross unemployment in them. They are working at such a low capacity that it is utterly dangerous to our national defense. They tell us that in time of war our working force can only be expanded in the area of 12 to 14 for 1. In our hearings it was pointed out that instead of having a minimum required work force of 36,000 skilled mechanics at all times in our shipyards we shall be down to about 1,200 or 1,500 in 1955.

I intend to insert later at this point some of the testimony given on June 16, 1954, by Maritime Administrator Louis Rothschild to the Subcommittee on Appropriations headed by my friend, the gentleman from Ohio.

Mr. ROONEY. First let me say, thank God, and the wisdom of Congress for the 1936 Merchant Marine Act, otherwise the American merchant marine today would probably consist of three whaleboats.

Mr. Administrator, the shipbuilding business is one dependent upon highly skilled employees, is it not?

Mr. ROTHSCHILD. Yes.

Mr. ROONEY. These shipyards have a great deal to do with the economy, not only of our Nation, but of the communities in which they are located?

Mr. ROTHSCHILD. Yes.

Mr. ROONEY. They employ a great many people, and the payrolls in those yards and the work done there have a great effect upon the local economy as well as the national economy, does it not?

Mr. ROTHSCHILD. I think that is correct.

Mr. ROONEY. In the event of a national emergency it is imperative that we have these yards ready with skilled workers; is that correct?

Mr. ROTHSCHILD. May I comment on that a moment, sir?

Mr. ROONEY. Am I correct?

Mr. ROTHSCHILD. "Yes" is the answer to the question.

Mr. ROONEY. Do you want to elaborate on that?

Mr. ROTHSCHILD. If I may.

There has recently been made and distributed a report on the merchant marine, the first one, by the way, which has been done since 1936. It is a joint effort of the Office of the Under Secretary of Commerce for Transportation and the Maritime Administration. In that we quite carefully examine the shipbuilding potential of the country, and we find that in order to have enough people who know how to build ships when we need them in time of war we must not let our in-between war work force get below 36,000 people, because a working force can only be expanded in the area of 12 to 14 for 1 in time of war.

Mr. ROONEY. And to permit it to go below that would be dangerous to the very life of our Nation, would it not?

Mr. ROTHSCHILD. That is correct.

Mr. ROONEY. Particularly in these turbulent and chaotic times?

Mr. ROTHSCHILD. At any time, and we are below that figure today.

Mr. COUDERT. I am always interested in the observations of the gentleman from New York.

Mr. ROONEY. A great many of my people over in Brooklyn, and in the Red Hook section, rather than those on Park Avenue, would thoroughly understand this. All of the shipyards in Brooklyn are located in my district. I know what it means to have a dead waterfront. I know what it meant years ago to see the piers and no ships at work.

Mr. COUDERT. The second question of the gentleman from New York to the Administrator that raised the importance of maintaining our shipping industry, which he has pointed out with his usual dramatic eloquence—well, we have a steel industry, we have an automobile industry, we have other highly technical mass-production industries, large-scale industries, which do not require a subsidy.

NECESSITY FOR SUBSIDIES

Mr. Administrator, why is it that the shipping business is so wholly dependent upon subsidies? Is it that the shipping industry has allowed itself to become antiquated and obsolescent and has failed to develop new techniques and methods of operation and construction so, unlike the automobile industry, the steel industry, and others, they are unable to compete with foreign competition?

Mr. ROTHSCHILD. There are two easy answers to your question. No. 1 shipbuilding is not a mass-construction industry that can be compared to the others that you mentioned. Ships are built in small numbers. Even a large shipbuilding contract is for small numbers of ships by comparison with automobiles.

Mr. COUDERT. But a ship is a large thing in itself.

Mr. ROTHSCHILD. But they are handmade.

Mr. ROONEY. And there are many and varied skills involved in the building of a ship, some of them used at one point of construction and not used at another point; maybe down toward the end of construction when it comes to the fitting of the ship, you do not have 90 percent of those who had worked on the ship when it was originally started. Is that correct?

Mr. ROTHSCHILD. May I answer the second part of Mr. COUDERT's question?

Mr. ROONEY. Wait just a minute. I have one hanging fire and I would like an answer to it.

Mr. ROTHSCHILD. There are peaks and valleys in the shipbuilding industry.

To answer Mr. ROONEY's question, there are varying skills involved in the building of a ship. As to how they progress and what percent of them is involved at one period or another, I am not qualified to answer.

* * * * *

Mr. ROONEY. Mr. Administrator, other nations subsidize their merchant marine, do they not?

Mr. ROTHSCHILD. Yes.

Mr. ROONEY. Please address yourself to that subject and tell us what these other nations do—generally speaking.

Mr. ROTHSCHILD. They use all of the devices which are used by governments in subsidy areas, Mr. ROONEY. They give financial aid in the matter of supplying funds; they pay subsidies on the construction side; they give depreciation schedules far greater than American depreciation schedules, and they do various other things in that same general area—not all nations do all of them, but some nations do all of them.

Mr. ROONEY. Is it not worth some dollars and cents, insofar as payment of an American operating subsidy is concerned in connection with the liner *United States*, to have that liner, the queen of the American merchant marine, on the high seas visiting foreign ports? That is worth something that cannot exactly be measured in dollars and cents, which adds greatly to the prestige of this Nation in these times; is that not correct?

Mr. ROTHSCHILD. That is absolutely correct, and it is conceivable to me in time of war the *United States*, which can carry as many troops as it can, might be even more valuable than any war vessel which we own.

Mr. ROONEY. Exactly. Now, Mr. Administrator, I have examined your statement, and since I am one who in my 10 years on this committee has never liked the words "estimated at," or "approximately," I must say that I find that all of your figures are broad estimates; they are all in rounded millions or half millions, and I suggest you give us further definite facts.

This record should be made to contain the real McCoy when it comes to these figures so we will all know with regard to each of them whether or not they are firm figures, or broadside estimates amply padded upward.

Mr. CLEVENGER. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Ohio.

Mr. CLEVENGER. The gentleman said a moment ago that I was against aviation. The gentleman has served on the committee with me for several years and knows that we were doing things long ago for American aviation, for safety in the airways and on the airfields, and for the expenditure of money where the traffic was heavy. He knows he is unjust when he made the statement that I was against aviation.

Mr. ROONEY. Perhaps I was a little too loose in the choice of my language, I will say to the distinguished gentleman from Ohio. I did not mean to be unkind to him. The distinguished gentleman just does not want any money added to this bill although the President of the United States on yesterday as I informed the House, told the leadership on that side of the aisle that they must restore $93 million for maritime activities and for aviation.

Does the gentleman mean to say that the President of the United States yesterday morning down at the White House in talking to his legislative leaders was advocating a WPA project for the American merchant marine?

Mr. CLEVENGER. Not being present, I do not know.

Mr. ROONEY. I made a similar statement here on the floor yesterday, shortly after noon, and it was verified by the press in all the afternoon papers. This morning's newspapers again stated that there was such a conference at the White House and that the position taken by the President was that these funds must be added to this bill, not in the other body, but in this House. Does the gentleman mean to say that the Presi-

dent is engaged in boondoggling when he advocates the expenditure of $82,600,000 for maritime activities?

Mr. CLEVENGER. I did not say so and the gentleman cannot put words in my mouth.

Mr. ROONEY. When the gentleman opposes this pending amendment which the President has asked for, does he not, in effect, accuse him of starting a boondoggling project?

Let me say to the gentleman with regard to his ill-advised remarks on labor in the shipyards and his statement that he does not understand why we cannot build ships at the same cost at which they are built in foreign shipyards: I daresay that if the gentleman inquired around, he would find that every other Member of this House knows the answer to that question. They do not pay the wages in foreign shipyards that are paid in American shipyards. Our standard of living, thank God, is higher and entirely different from what it is in foreign countries. Is there anything very wrong about that? So what are you going to do about it? Are you going to stop building our own ships? I understand that at the present time in Great Britain alone there are about 550 ships on the ways. How many ships are on the ways in the United States? How is one supposed to feel when he sees, as I did on television last night, the brand new luxury Italian liner *Cristoforo Colombo?* I give Italy and the Italian people great credit for building that liner, which has just come off the ways and which is making her maiden trip. But what has the American merchant marine outside of the liners *United States, America, Constitution,* and *Independence?* Why is it that we carry only a small share of the trans-Atlantic passengers?

Does the gentleman not think it is worthwhile to have the American flag flying over representative vessels putting in at ports of call throughout the world, for American prestige? Does he not think that this is worth something in dollars and cents at a time when the world is so chaotic and when we have such dangerous international complications as have developed within the last year?

Would the gentleman defy the President, or is he going to be so bold and reckless, as I suggested here yesterday, as to stand up and support the President of the United States?

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield to the gentleman from Washington.

Mr. PELLY. The gentleman mentioned the figure 500 as the number of ships being built in English shipyards. Is it not true that 120 of those are being built for Americans?

Mr. ROONEY. They are being built with American money, there is not a bit of doubt about that.

Yesterday, in connection with the American merchant marine, I said you would be decimating it if you refused these ship-construction funds. I fear that that was an understatement so far as this situation is concerned. I should have said you would be destroying the American merchant marine.

Mr. PELLY. Is it not true that the foreign shipyards have a 2 years' backlog of work, when by October we will have only 3 ships under construction in our own shipyards?

Mr. ROONEY. I believe that is so, may I say to the gentleman, and I compliment him on being interested in unemployment in the shipyards, as he should be.

Mr. Chairman, I urge the adoption of the pending amendment of the gentleman from Massachusetts [Mr. WIGGLESWORTH] and the perfecting amendment which I shall offer.

Mr. TABER. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 40 minutes, 5 minutes to be reserved to the gentleman from Missouri [Mr. CANNON].

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Washington [Mr. TOLLEFSON].

(Mr. YOUNGER, Mr. SEELY-BROWN, Mr. SCUDDER, Mr. DORN of New York, Mr. ALLEN of California, and Mr. PELLY asked and were given permission to yield the time allotted to them to Mr. TOLLEFSON.)

Mr. TOLLEFSON. Mr. Chairman, let me first express my appreciation to those Members who have yielded their time to me, as I did hope I would get more than the short time allotted to me to say something about this item in the appropriation bill.

I am satisfied that the gentleman from Ohio, who is the chairman of the subcommittee handling this matter, has no desire to destroy or kill the American merchant marine. I feel that he does not have complete understanding of the American merchant marine.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield.

Mr. TABER. Does the gentleman realize that this amendment, and the operation of the subsidy system, is rapidly driving the American merchant marine off the high seas?

Mr. TOLLEFSON. No; I do not.

Mr. TABER. Well, the statement I have made is correct.

Mr. TOLLEFSON. I would dispute the gentleman's word, or rather the position that he has taken with respect to that argument. Let me discuss this matter just a moment. I started to say that I am satisfied that the gentleman from Ohio does not understand that the American merchant marine is the fourth arm of our defense, and is so considered by the military authorities of our Nation. At the conclusion of World War II the admiral in charge of naval operations made the statement that if it had not been for the American merchant marine fleet, the Navy never would have been able to accomplish its mission in Europe. You do not fight a war without a merchant fleet. The Navy does not carry the men and the materials and guns and whatnot to the farflung fighting fronts overseas. Those items of war are carried by the American merchant marine. The military recognizes that fact. In recent months the National Security Council, the Office of Defense Mobilization, and military representatives have made it clear that there is—

First. A serious deficiency of tankers in our reserve fleet.

Second. They have made it clear that we need some high-speed new tankers which might have an opportunity to evade the attacks of submarines operated by the enemy.

I do not know whether the House knows it, but today Russia owns six times as many submarines as Germany did at the outset of World War II.

Third. The agencies that I have mentioned have indicated they recognize the plight of the commercial shipbuilding yards in the United States.

My colleague, the gentleman from Massachusetts, made reference to a statement made by Admiral Leggett to the effect that the private or commercial shipyards promise to be the most vulnerable area of our whole defense program. Now, Admiral Leggett did not say that the most vulnerable area was the possibility of the shortage of battleships, tanks, and guns and so forth. He said it was the plight of our commercial shipyards. The President recognizes that and so he sent to the House through the appropriate agencies two tanker bills. One went to the Committee on Armed Services and one to the Committee on Merchant Marine and Fisheries. Both of those tanker bills were approved by the House without a single negative vote. They passed the House without a single negative vote on the theory that we needed those tankers as a matter of national defense. Some reference has been made to operating subsidies here and to construction subsidies. Let me say with respect to the tanker bill of the Committee on Merchant Marine and Fisheries there is not 1 penny of construction differential subsidy. All that the Government is doing is buying for about one-third the cost of construction these tankers, from operators who agreed to build new high-speed tankers. There is not 1 penny, as I have stated, of construction differential subsidy in that bill.

Mr. SHELLEY. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield.

Mr. SHELLEY. And contrary to the statement previously made, these tankers which are to be turned in are not overage, but rather are underaged tankers, is that not correct? And they also have some useful life remaining in them and will be held in reserve.

Mr. TOLLEFSON. That is correct. They have at least one-half of their useful life left in them. The Navy testified before our committee that they will be a welcome addition to the reserve tanker fleet.

Some reference has been made to operating subsidies. The gentleman from Ohio made some mention of that. Let me say that there is not 1 penny of operating subsidy in this bill nor in this amendment. There is no operating subsidy in connection with the construction of these ships. So that argument is a diversionary argument, and is merely a straw man. The gentleman from Ohio criticized the Mariner construction

program. I am quite amused at that because those mariners were built at a cost of $350 million, and the program was sponsored by the Committee on Appropriations itself. Those mariners were not built under legislative authority emanating from the appropriate legislative committee of the Congress, but they were built under a rider attached to an appropriation bill, and our committee has nothing whatsoever to do with it.

Mr. ALLEN of California. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield.

Mr. ALLEN of California. Is it not true that under those circumstances the 10 tankers and the 4 passenger ships that will be built will be built by private industry suiting the vessels to the need of the trades rather than being built by the Government, as was the case with the Mariners?

Mr. TOLLEFSON. That is correct. Had the mariner program come through the proper legislative committee, I am satisfied we would have had a mariner construction program that would not receive the criticism it is receiving today. But I want to emphasize the fact that that was a matter that came out of the Appropriations Committee, not out of the appropriate legislative committee of the House.

I want to say a word about the four liners that are proposed in the bill under this item. Those liners must be built under a contract which the operators today have with the Government. The present liners are about 24 years old and 2 of them are being operated today under waivers from the Coast Guard because they do not meet the safety requirements for operating ships at sea. The two Grace Line vessels do meet Coast Guard requirements. Recently the Coast Guard have said they did not know how much longer they could continue to waive safety requirements. As I have stated, the Government has entered into a contract with these operators whereby the operators are compelled to replace the four liners. This is the means by which they hope to replace them. These liner operators will put up 55 percent of the construction money.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield.

Mr. McCORMACK. There are certain indisputable facts that prompt the adoption of the Wigglesworth amendment, and I hope also the Rooney amendment. First, the private shipyards in the country are in bad shape.

Mr. TOLLEFSON. That is correct.

Mr. McCORMACK. Second, the President recommended it himself.

Mr. TOLLEFSON. That is right.

Mr. McCORMACK. Certainly the President took into consideration not only budgetary conditions but the necessity of trying to do other things that will help our private shipyards and at the same time inure to the benefit of our national defense.

Mr. TOLLEFSON. That is correct. And the Congress itself has acted upon the two tanker bills.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. McCORMACK. Mr. Chairman, I ask unanimous consent to yield the time allotted to me to the gentleman.

The CHAIRMAN. Without objection, it is so ordered.

Mr. TOLLEFSON. I thank the gentleman.

Mr. O'NEILL. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. I want to subscribe to the remarks of the gentleman. I realize he knows this problem thoroughly. I agree particularly with the remark which I think many Members have overlooked, that the merchant marine is the fourth arm of our national defense.

(By unanimous consent, Mr. O'NEILL and Mr. DEVEREUX yielded the time allotted to them to Mr. TOLLEFSON.)

Mr. TOLLEFSON. There was one thought that I neglected to mention, and that is a simple one. If the Congress subscribes to the theory that our American marine fleet is the fourth arm of defense—and we need one indeed—and that has been the philosophy of this Congress in the 1936 Merchant Marine Act and it was the philosophy expressed in the 1920 Merchant Marine Act—if the House subscribes to that philosophy, it must come to this conclusion: If we are going to have an American merchant marine, there is only one way we can have it, and that is by Government assistance. We cannot build ships as cheap as they can be built in foreign shipyards. Therefore, we need a construction subsidy. Nor can we operate our ships as cheaply as foreign nations can, and therefore, we must have operation subsidies. The Congress has recognized that. Why should we abandon that philosophy now? It has proven itself to be worth while.

Mr. COUDERT. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield to the gentleman from New York.

Mr. COUDERT. The gentleman has just referred to the fact that the Congress had adopted a policy, and in support of that policy the Congress has authorized and voted subsidies.

Mr. TOLLEFSON. That is correct.

Mr. COUDERT. Would the gentleman mind telling the House what, if anything, either his committee has recommended or the Congress has done beyond mere subsidy to compel improvement in efficiency and economy in the operation of construction of ships?

Mr. TOLLEFSON. From the standpoint of legislative action, of course we have done nothing to compel any operating economies. But our committee constantly insists upon the Maritime Administration doing so.

Mr. COUDERT. Has any Government agency to the knowledge of the gentleman from Washington done anything to bring about economies and improvement in operations? Or done anything beyond recommending more, bigger, and better subsidies?

Mr. TOLLEFSON. From the testimony before our committee I am convinced that the present Maritime Administration is constantly stressing the need for economy in operation of the American merchant marine.

Mr. SHELLEY. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield to the gentleman from California.

Mr. SHELLEY. In answer to the question just put by the gentleman from New York [Mr. COUDERT], the answer is that the General Accounting Office has come up with constructive criticisms in the operation of the entire program which have been accepted.

The CHAIRMAN. The gentleman from California, [Mr. SHELLEY] is recognized.

(By unanimous consent, Mr. CONDON and Mr. YORTY yielded their time to Mr. SHELLEY.)

Mr. SHELLEY. Mr. Chairman, I must congratulate the Appropriations Committee on exceeding the expectations of the distinguished gentleman from New York [Mr. ROONEY] when he said on the floor of the House the other day that the committee under its present leadership would not approve enough money to build three whaleboats. In comparison with that expectation they have been absolutely munificent in approving $11,100,000 for four Liberty ship conversions under this bill. But, when we compare this puny appropriation with the very modest request by the Maritime Administration for $82,600,000, or with the far greater needs of our shipping lines, our reserve fleet, and our shipbuilding industry the committee has done next to nothing.

Mr. Chairman, comment was made that only 3 out of 35 Mariners have been sold. That is true because as soon as the Mariners were finished they were immediately taken over by the United States Navy for operation in the hauling of supplies to Korea. It must be remembered that the Mariners were started just as we got into action in Korea. Those finished were turned over to the Navy for 6 months' operation on test runs for the hauling of troops, equipment, and supplies on all of the seas of the world.

Only three have been sold because since the time bids for their sale were called for one company on the Pacific coast asked for the three. Several other companies are now negotiating for the purchase of Mariner vessels with modifications to meet the requirements of the trade routes in which the vessels will be used.

Comment was made that none have ever been loaded. The fact is that as fast as they have been finished they have been outfitted and made ready for sea and used by the military and they have proved to be very valuable ships for military purposes.

As to the four passenger vessels—the companies which operate these subsidized vessels are required by the law enacted by Congress and now referred to as the Merchant Marine Act of 1936 to replace their vessels when they are 20 years of age, and what the committee

proposes to do is to renege on a Government contractual responsibility. They are under contract with us—the Government of the United States to do what the Wigglesworth amendment will allow to be done. By adopting the amendment we are keeping our part of the contract. What, in heavens name, is wrong with that?

We have not the passenger ships. During World War II we paid to the British Government $125 for every commissioned officer and $100 for every enlisted man who traveled on the *Queens*. We paid over a billion and a quarter dollars to the British Government because we did not have the passenger ships. A board composed of representatives of the Departments of Commerce, Navy, Army, the Munitions Board, and other governmental agencies immediately after World War II made a report emphasizing the shortage of passenger vessels available to the military in the event of another war and calling upon the Congress to make available money and a program for the building of such vessels so that the situation in which we found ourselves at the outbreak of World War II would not occur again.

The Merchant Marine Committee and the Federal Maritime Administrator are endeavoring to correct that situation at the lowest possible cost to the American taxpayer and in complete conformity with the law as it exists and as it has existed.

Mr. SEELY-BROWN. Mr. Chairman, will the gentleman yield?

Mr. SHELLEY. I yield.

Mr. SEELY-BROWN. Is it not true that that program is less costly to the American people than the old program operated on the boom-and-bust concept?

Mr. SHELLEY. The gentleman is absolutely correct. Here we are engaging in an orderly replacement program whereby we take out of service old and obsolete vessels and build in their place a new vessel, modern for military conversion and usage—fast and able to travel without convoy—outfitted to handle passengers in peacetime or troops in wartime comfortably and safely. We keep our commercial sealanes open and meet a defense need with a graduated program instead of repeating the mistakes of World Wars I and II. What were those mistakes? They have been mentioned on this floor many times—the country found itself twice in a generation involved in world wars and without a merchant marine. Friendly countries couldn't help us. We had to build at any price any kind of vessel to meet the immediate emergency. As a result we boomed the cost up and paid $10 instead of $1, and we busted the fleet later because they did not meet commercial needs. I think that is what the gentleman means, and he is absolutely correct. This approach is the logical way to prevent a recurrence of that type of situation.

The CHAIRMAN. The gentleman from Iowa [Mr. GROSS] is recognized.

Mr. GROSS. Mr. Chairman, the gentleman from New York [Mr. ROONEY] and others on the floor this afternoon have expressed their indignation—and justifiably so—that ships are being built in foreign yards while our yards remain idle.

I have protested that situation on the floor of the House as the Members well know. I will further say to the gentleman from New York that I have protested this sugar-coated proposition of off-shore procurement repeatedly on the floor of the House; and I will say to him and to others who have voted for these foreign giveaway programs in the past, that as you continue to vote for those programs in the future you will find your money and the American merchant marine going where the woodbine twineth and the whangdoodle whangeth.

The CHAIRMAN. The gentleman from New York [Mr. COUDERT] is recognized for 1 minute.

Mr. COUDERT. Mr. Chairman, the distinguished gentleman from Massachusetts, and my good friend from New York [Mr. ROONEY] very frankly stated what this operation is. This is simply a relief bill for shipyards. Now, I have no objection to shipyards being put on relief. It may be necessary to have shipyards, but I think probably a cheaper way than putting shipyards on relief that are not able to compete with foreign yards would be to set up schools in which to maintain the mechanics and operators who have no ships to build. All sorts of ways might be considered.

Frankly, my criticism of the whole program is that I have not seen a constructive suggestion in the 8 years I have been here for improvement in the method of the construction of ships. Here we sit in the Congress merely doling out bigger and better subsidies to maintain shipyards that may be for all I know or any of us in this committee knows completely obsolete.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina [Mr. BONNER].

Mr. BONNER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Massachusetts. If there ever was a time in the history of this Nation when we need to build vessels it is now.

This is not what has been referred to as a WPA program for shipyards. This is a fundamentally sound program. It has a great deal of merit. We need the four passenger ships to replace ones that are practically worn out.

In the committee we have taken particular care to see that there is no subsidy in connection with the tanker bill if it is carried out as the conference report has been agreed on, and I am sure it will be carried out in that manner in the contracts let by the Maritime Commission.

Many in this House never stop to think what would happen to the American economy if it were not for the American merchant marine.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Chairman, this shipbuilding program should be initiated immediately. It is necessary to pick up declining employment in the Nation's shipyards. This is particularly true on the west coast where shipbuilding is almost nil and where ship repair and modernization are at a new low. A deplorable condition frought with the hardship born of unemployment.

If we are to preserve the skills peculiar to shipbuilding and the all important know-how we must act with celerity and dispatch.

While the immediate and to be served is important there are other basic reasons that cannot be contravened or disregarded.

A well organized smoothly functioning merchant marine is indispensable to our national economy if we are to develop and hold an overseas market to absorb the great productive capacity of this country. This can be directly translated into jobs in our automobile, refrigerator appliance and other plants producing durable goods. Jobs here are vitally important.

Agricultural surpluses can find markets among the growing hungry populations of the world but we must have ships to carry them overseas.

Our commerce must not be at the mercy of nations no matter how friendly who control world shipping. We must have American ships to maintain the freedom of the seas and our proper place among the nations of the world.

As a member of the Armed Services Committee of the House of Representatives I am mindful of the pertinent and compelling reasons for a vigorous, stable merchant marine as an integral part of our Defense Establishment. Two world wars have taught us the value of having ships, ships, and more ships.

A healthy merchant marine is more than just ships. It is the terminals, docks and the ancillary services used by ships. We need the yards and docks to build, repair and maintain a fleet of vessels, too.

We must, above all, preserve the men with the skills peculiar to the sea be it as sailors, radio operators, ships' officers or engine room crews. A knowledge of electronics is as important on sea today as a knowledge of cordage. The art of building ships can be lost unless we continually exercise it.

That is why, Mr. Chairman, I said in the beginning that we need a shipbuilding program now to pick up the waning employment in our shipyards.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, it is rather astounding to me this afternoon to sit here and hear some of the statements that have been made by members of the Appropriation Committee as to the lack of necessity for a merchant marine or a shipbuilding program. I wish that those who have the responsibility of deciding these questions from an appropriations standpoint would take time out and visit shipyard localities and see for themselves why it is so necessary to keep together shipbuilding organizations. There is no industry in this Nation of ours that requires so many varied

types of craftsmen as is the case in the building of ships.

You cannot train such workers overnight. They require long years of apprenticeship and training, and the failure to do that creates a situation which was mentioned by the gentleman from Connecticut [Mr. SEELY-BROWN]. A failure to keep up an efficient working force in our shipyard industry creates a boom or bust situation insofar as a working organization is concerned, resulting in the industry being busted, weak, and inefficient for lack of organization when a real emergency arises that needs ships built in a hurry.

This idea of cutting down appropriations for ships, both naval and commercial, with the idea that it saves money is an unwise policy. It is pennywise and pound foolish.

How well I remember the situation that confronted us when World War I broke suddenly upon us. It caught us with neither an adequate Navy or merchant marine to carry our troops and supplies to Europe. Our shipbuilding industry was at a low ebb. We had to send out an S O S for workers to build ships. Shipyards were without adequate organizations to make even a nucleus around which an organization could be met. The call for men to work in shipyards went far and wide. It was desperate because the need was desperate. It brought in men from all over the country who were attracted because of the high pay that was offered. They were accepted regardless of whether they knew anything about ship construction. Hatters, waiters, trolley car operators, shoemakers, tailors, bakers, butchers, candlestick makers. The variety was such that it would be impossible to describe them all.

Could these men build ships? Of course not. They had to be trained over long periods of time even for the smallest task. All of the time they were being paid the high wages. This added millions upon millions of dollars to the cost of the ships. And, not only was the money lost the only result. Think of the delay that was caused while all of this training was going on. The net result was a tremendous loss of money and a great increase in cost of every ship.

Did we learn our lesson from all of this? I regret to say we did not. When World War II came upon us we were again caught without an adequate number of either fighting ships or merchant marine. Whereupon we had to go through the same process I have described with respect to World War I. In addition we had to charter ships of foreign nations to carry our troops and supplies while we were busy building the ships which we should have had, but, which we did not have. Expense added to expense as a result of our pennywise pound-foolish policy.

And, now today, notwithstanding the lessons of the past and the present urging of President Eisenhower for an adequate shipbuilding program, the Committee on Appropriations comes before us denying the necessity for a shipbuilding program. And, the committee takes this attitude in defiance of the wishes of President Eisenhower. How long will it take for some people to learn? Ordinarily it would be appropriate to send this bill back to the committee, but it would accomplish nothing. Therefore it is necessary for us on the floor of the House to amend this bill so it will provide a shipbuilding program, at least the start of such a program.

For the reasons I have given, and many more I could give if time permitted, I will support the amendment now under consideration that provides for the building of 4 passenger-cargo ships and 10 tankers. This, together with some repair work on our ships, will provide approximately $170 million worth of work for our shipyards.

If this amendment is adopted in the House and concurred in by the Senate it will preserve our shipbuilding industry and bring joy to the hearts of our shipworkers and their families.

I appeal to the House to adopt this amendment by such a large majority that there will be no doubt as to the policy this House approves.

The CHAIRMAN. The Chair recognizes the gentleman from Missouri [Mr. CANNON].

Mr. CANNON. Mr. Chairman, the House cannot always be wise, the House cannot always be right, but, Mr. Chairman, it can be consistent.

This House is overwhelmingly committed against subsidies of any character, and yet we have before us here, Mr. Chairman, the greatest subsidy payable to the fewest number of beneficiaries in all the history of legislative gratuities. Fewer men owning these shipyards are getting the largest amount of free Government money of any of the subsidies that we so generously bestow.

This month the House denied the farmer a fair wage for his labor and a fair price for his product on the ground that it amounted to a subsidy. The very name subsidy has been anathema. But it is all right for the gentlemen who own these shipyards and who are making tremendous amounts of money out of them to have a subsidy. I believe, after many years of observation, that there has been more money wasted on these shipyards than on any enterprise in which the United States Government has subsidized.

And, there is another sacred principle which is being violated here—the principle of private enterprise. We are being told all along that business does not want the Government to engage in private enterprise; that they want to be left alone; that they want to be left free to work out their problems without Government interference. That is the stereotyped statement regularly made by every chamber of commerce and of every manufacturers association in the country. They believe religiously in free enterprise. And here we propose to violate every principle of private enterprise by doing for them what they can do for themselves.

Why, Mr. Chairman, in 1953, private enterprise built 15 ships, and already in 1954 they have built 6 more ships. All we have to do is to give free enterprise a chance to go along uninterrupted and unimpeded by Government handouts and they can and will build all the ships we need.

Appalling waste has marked the expenditures of these huge subsidies. They have built ships that were not needed. They have constructed fleets that never sailed.

With the money they hope to receive through this amendment they are proposing to alter the design of ships that are now under construction—ships that have not yet been completed.

Can you imagine any sensible, responsible group of men countenancing such colossal waste and inefficiency?

It was disappointing, too, Mr. Chairman, to note the emphasis placed this afternoon on the fact that the President is displeased with the action of the Committee on Appropriations in reporting out this bill without the ship subsidy in it. The Committee on Appropriations has spent months in investigating, in holding hearings and making studies of this problem. The committee has brought in a recommendation against this expenditure.

Immediately the President sends word up here to disregard the Committee on Appropriations. I yield to nobody in my admiration for and my devotion to the President of the United States. I have supported him when the Members on that side opposed him. But there are three branches of the Government—the legislative, the judicial, and the executive. Why should the executive branch dictate to the legislative branch? Why have any Committee on Appropriations at all?

Mr. Chairman, effort has been made to camouflage this amendment as a labor amendment. As a matter of fact it involves no labor issue of any kind. That has been thrown in here merely to cloud the issue. The great labor organizations, the A. F. of L. and the CIO, have announced no position on it and have taken it up with none of the Members I have heard discuss it.

The beneficiaries are a few privileged shipyard owners who have become accustomed to consider Government handouts as their vested right.

We have denied subsidies to the farmer. We have insisted on free enterprise without Government interference. Let us apply those principles without prejudice or favor. Let us defeat this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. ROONEY].

Mr. ROONEY. Mr. Chairman, before speaking to the amendment, may I ask unanimous consent that all Members may extend their remarks at this point in the RECORD?

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RAY. Mr. Chairman, I rise in support of the amendment.

Our need for a strong, privately owned and operated merchant marine has been recognized and established by law for many years. It has been recognized recently by the President. High Army and Navy officials and officers say that the present condition of the merchant-ma-

rine fleet makes it the weakest link in our national defense. Their testimony was overwhelming and unanimous and there is no evidence to the contrary.

Perhaps we do not have the best possible way of developing and maintaining a strong merchant marine—that is a question for much further study but this is no time to quibble and procrastinate on that score. We must have ships and our shipyards must be enabled to keep their essential skilled workers busy.

The ship construction which would be authorized by the amendment under discussion is a vital part—but only a part—of the overall program that should be started and carried out immediately. Time is one thing we simply cannot afford to lose.

Mr. WILSON of California. Mr. Chairman, I rise to support the appropriation of funds for additional court facilities for the new judges, which are to be appointed as a result of the omnibus judgeship bill which passed earlier this session.

The General Services Administration has asked for $220,000 for additional courtroom facilities to improve the crowded courtrooms in the Federal Building in San Diego, in my district.

Approval of this appropriation will be additional evidence that Congress, the Administrator of the Courts, and the General Services Administration are in agreement that the new judge should sit in San Diego.

Such was the clear intent of the Judiciary Committee and the Congress in approving the omnibus judgeship bill earlier this session. The only testimony presented last year showing the need and requesting the services of an additional judge for the southern district of California was presented by the San Diego Bar Association and other interested San Diego citizens. The committee was impressed by the need shown by the crowded calendar of the one district judge sitting in San Diego. However, rather than writing the place of residence into the bill, as had been done for San Diego's first judge, the committee decided such a policy might lead to additional problems, and eliminated designation of all places of residence for all judges in the bill. In doing so, they left the residence decision to the judicial council, but stated clearly in the report accompanying the bill that the committee was impressed with the need for a second judge at San Diego.

Despite this clear statement of intent by Congress, the judicial council reportedly has left the determination of the place of residence up to the presiding judge in the southern district, Judge Leon R. Yankwich, of Los Angeles. Judge Yankwich appears to have decided to ignore the intent of Congress in the assignment of the second judge. He has made several public statements to the effect that the second judge is not needed at San Diego, despite the fact that a second judge has sat at San Diego almost continuously for the past year or so. In recognition of the caseload at San Diego, Judge Yankwich has assigned a second additional judge on a rotation basis, allowing 8 of the 10 southern district judges to sit for a 3-month period in San Diego, in rotation.

In adopting the policy of rotation, Judge Yankwich is in effect doubling the cost of the second judge Congress has provided for the San Diego area.

The cost of assigning an extra judge to San Diego on a rotation basis amounts to more than double what a San Diego resident judge would be paid. Each judge and his clerks and bailiffs would be entitled to per diem expenses of approximately $40 per day week in and week out, plus mileage at 7 cents per mile to and from their homes, some over a hundred miles away.

This extra cost could be eliminated if Judge Yankwich and the judicial council would follow the dictates of Congress; which has set up the additional judgeship for San Diego's expressed needs, which is today approving the construction of his courtroom in San Diego, and which provides the funds for operation of this court and all courts.

San Diego needs the second resident Federal judge provided by Congress. I submit that any other assignment by the judicial council or the southern district judges would be a capricious, arbitrary, and extravagant decision directly contravening the intent of Congress.

Mr. LESINSKI. Mr. Chairman, this bill, perhaps more than any other we have taken up this session, shows what is wrong with the Republican Party when it is put in charge.

The Eisenhower administration, in the 1952 campaign, attacked all the programs of the Democratic administrations and said they were terrible and would be ended. That was the usual Republican campaign or propaganda and we were all used to that after all those years when the Republicans were out, so we did not take it too seriously.

But the Eisenhower crowd apparently believed their own campaign oratory. When they came in down here they brought in thousands of efficiency experts and big-business men to show how to get the Government out of all of the so-called unnecessary operations started under the Democrats.

Well, all last year the administration was tearing these programs apart and throwing them away as fast as they could find them. The majority in the Congress went along with that idea wholeheartedly and had a wonderful time slashing the appropriations and eliminating programs.

Now, after more than a year of studying the situation, the Eisenhower people discover they made some horrible mistakes. The aviation people came in and told them how wrong they were to kill the airport-aid program. The business people came in and said: "Say, you do not really want to kill off those census studies and statistical reports; business needs them."

The maritime industry came in and said: "Are you fellows aware that you are letting the merchant marine and the shipbuilding industry collapse? You better get busy and get things back on the track."

The hard-money program turned sour and unemployment began to grow and here there was not enough money in the budget for unemployment compensation or veterans unemployment compensation.

So, on one thing after another, the administration had to send up supplemental requests for more funds for these programs. The budget turned out to be full of mistakes, but you can always correct mistakes of that kind by just appropriating enough money in time.

But what happened? The Republicans up here who had been so happy about cutting out all the old Democratic programs suddenly woke up to find that the Republican administration wanted them put back in the budget again.

All this time, our Republican friends up here have been bragging about cutting the budget and cutting out Democratic programs. When anyone complained—particularly any businessmen back home who were damaged in their businesses by these cuts—our good friends on the Republican side had a snappy comeback—they said: "Do you want a balanced budget or not? Do you believe in Republican economy or not?"

What was a good Republican businessman to say to that? Even if it put him out of business, he had to agree economy and a balanced budget were just what the chamber of commerce ordered.

Well, the Republicans are really in a spot now. The President says, just forget some of that stuff last year about knocking out the airport program, or the ship subsidies, or big bureaucracies for employment compensation, or these boondoggling censuses, and so on. We find we made a big mistake. Give us all the money back again.

According to some of the Republicans on the House Appropriations Committee, in the printed hearings on this bill, the lid is off on every foolish thing.

Well, Mr. Chairman, it is not really that bad at all. These things turn out to be not so foolish after all. Maybe there was some foolishness in cutting them so hard before the administration woke up to how important these programs are to business and industry and the general public and also to the security of the country.

Any of our Republican colleagues who feel it might make them look foolish to vote this year for the very things the Eisenhower administration told them last year were not necessary can always tell their constituents they are just following the Republican line.

But the Appropriations Committee apparently believes in following the Eisenhower line in one direction only—toward cutting the budget. So we have this bill before us cutting and cutting the very appropriations the President says must be increased—not lowered.

It is quite a dilemma for a conscientious economizer who has spent years in Congress yearning for Republican austerity budgets and now finding that it costs money to run the Government even when the Republicans are in.

Let us forget the 1952 promises and legislate for the good of America. Otherwise, we could economize the country into disaster.

Mr. CONDON. Mr. Chairman, I subscribe wholeheartedly to the position taken by the gentleman from California [Mr. SHELLEY] and am in support of the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH]. During the emergency of World War II, the Richmond shipyards in my district built more ships than any other yards in the world had ever built in a comparable period of time. It is a shameful folly to see our shipyards fall into disuse and to see the skills which we have developed be dissipated away from the waterfront. I certainly believe that this body must preserve the American merchant marine and our shipbuilding industry by appropriating the money recommended by the President and embodied in the amendment offered by the gentleman from Massachusetts.

"ECONOMY" WHICH WILL HURT MILLIONS OF AMERICANS

Mrs. KEE. Mr. Chairman, the Committee on Appropriations can take all the bows it wishes to for the remarkable economy record it has compiled in reporting out this supplemental appropriation bill. But unless the Congress reverses some of the actions of the committee, millions of Americans will be hurt by this kind of economy.

It is not economy, Mr. Chairman, to leave our women and children and, in fact, all the people of this country, medically unprepared for the unimaginable horrors of atomic or hydrogen attack. True, this bill saves $35 million out of a proposed $60 million for emergency medical and rescue supplies and equipment.

But would it really be economy if thousands or millions were to die for lack of this stockpile of essential supplies? I do not think so. The scientists talk about these horrible bombs in terms like megadeaths—meaning millions of deaths. The committee acted on this matter as if the threat were really far away.

God grant that this might be true. But certainly the world and standards of political morality in the world are not such that we can take this threat calmly or ignore it. We must be prepared to enable our people to survive whatever the future may hold in store. I do not think $35 million would be considered much of a saving if it meant unnecessary loss of many lives for lack of adequate lifesaving supplies.

SAVING $119,000 AT THE EXPENSE OF JOBLESS VETS

Mr. Chairman, as a member of the House Committee on Veterans Affairs, I am extremely conscious of the problems of the young ex-serviceman, or the discharged reservist, in trying to reestablish himself in civilian life. It is a particularly difficult task for him right now in many sections of the country, and particularly in States like West Virginia where the incidence of unemployment is very high.

In connection with the regular Labor Department appropriation bill acted on earlier this year, we heard how the Bureau of Veterans Reemployment Rights is running 5 and 6 months behind in acting on the cases of returning veterans who have been unable for one reason or another to get their old jobs back. Now the matter is again brought to our attention in the requests made by this bureau for a supplemental appropriation to bring that backlog closer to a current status. It asks for a very small amount—$119,000. I am amazed that this request has been denied by the Committee on Appropriations.

Are these boys and girls coming back from the service, and denied their rights under the GI bill, to sit and cool their heels for 6 months or more before the Government agency set up to protect their rights can get around to their cases?

Is this economy? I think not.

ALL JOBLESS WORKERS AND THEIR FAMILIES AFFECTED

A further provision of this bill, as it has come from the Appropriations Committee, similarly affects all of the hundreds of thousands of American workers and their families who are dependent upon unemployment compensation.

The President asked for an additional $43 million for the administration of unemployment compensation and the employment services in the various States. The committee has allowed only $4,600,000. Now what does that mean? It means that those eligible for unemployment compensation will have to wait longer for action on their cases. It means they will have to wait longer for their checks. It means they will have to wait longer for any help from the employment service leading toward other jobs.

It means the youngsters coming out of school looking for their first jobs will have to wait in line—way back in the line—for any attention from the overworked employment service people.

Let us go back a moment, Mr. Chairman, and see how this request for additional funds originated. The President says his advisers made a serious miscalculation when the budget was prepared originally in estimating the amount of unemployment we would be having at this time. They did not ask Congress for nearly enough funds for the kind of program now needed—to process the unemployment compensation claims of those out of jobs and help them to get new jobs. But before that admission was made and steps taken to correct it, Congress went ahead and cut what the administration now tells us was already an inadequate figure. So instead of the funds it really needs of about $260 million for the current fiscal year which started July 1, the Bureau of Employment Security will be at least $40 million short—that is, adding up the cuts made in this bill and in the regular appropriation. This kind of economy, Mr. Chairman, hurts people who are most in need of help—those out of work.

ELIMINATING THE NEW HOSPITAL CONSTRUCTION PROGRAM

There are many, many instances of similar economy in this supplemental appropriation bill, Mr. Chairman, and I cannot begin to cover all of them in the time allowed. Other Members, I am sure, will discuss cuts in programs affecting various industries, and so on.

But I do want to make mention of several items which hurt our people on human terms. The Congress has just recently passed, with much ado, an extension of the Hill-Burton Hospital Construction Act to provide for Federal aid for the construction of specialized types of hospitals—diagnostic or treatment centers, hospitals for the chronically ill, rehabilitation facilities, and nursing homes. Now we are asked to appropriate funds to carry out this program. The President asked for only $35 million for construction funds for this purpose for the first year of the new program's operations instead of the $75 million authorized under the new law. The committee, practicing economy, has not voted a single dollar for this purpose. Why did we pass the bill for the program if we do not believe in voting the funds to carry it out? This kind of economy is disillusioning to the folks who thought they would be helped by the new law we passed. But no money is provided to carry out the law.

JUVENILE DELINQUENCY PROGRAM ALSO ELIMINATED

I have called to the attention of the House several times in recent months, Mr. Chairman, the alarming problem of juvenile delinquency and the need for corrective action to prevent this terrible waste of human resources. In my home county we are trying to meet this problem affirmatively on the local level by joint efforts on the part of an aroused and interested citizenry. We are trying to chart a new course in a very difficult problem area. Recently we had Dr. Martha M. Eliot, Chief of the Children's Bureau, come to talk with us and outline some of the areas in which she thought our group action could accomplish the most.

She informed us of big plans in the Children's Bureau for setting up a special program in juvenile delinquency work, to obtain and disseminate information in this vital field the better to help community efforts such as our own program back home. The people in our county were much encouraged by this.

But along comes this bill, Mr. Chairman, acting on Dr. Eliot's request for a modest $165,000 for the juvenile delinquency study by appropriating exactly nothing. Not a cent. So the special study cannot go forward. I do not believe that kind of "economy" is very helpful to the mothers and fathers of America and the teachers and clergy and youth leaders seeking help in curbing a growing national menace of juvenile delinquency.

"LITTLE AID TO EDUCATION" PROGRAM GETS NO FUNDS

A last word, Mr. Chairman, on the matter of help for our hard-pressed schools, now bulging at the seams and with teachers carrying a frightfully heavy pupil load at frightfully low pay.

The administration's approach to this problem has been one of delay and "study." It has avoided any attempt to get help to our schools but has proposed a series of research programs in this field.

With much ado, again, the Congress passed three bills in this area—one for a cooperative program of research with the colleges on educational problems; one for

a national advisory committee to advise the Secretary of Health, Education, and Welfare on school problems, and one for a White House Conference on Education. Out of all of these studies, including the White House Conference a year and a half from now, the administration hoped to get enough information on the needs of education to recommend a Federal policy in this respect.

It has been my position that these programs were woefully inadequate. They "study" a problem we know just about all we have to know about. We know our schools need financial help. How are they to get it?

But little as this aid-to-education program of the present administration has been, it is all we have at this point. It is a puny thing, but perhaps of some use. Not under this bill, however. For under this appropriation bill, not a single dollar is appropriated to carry out any of these programs—not a dollar of the $100,000 requested for the cooperative research program, not a dollar of the $175,000 requested for the national advisory committee, not a dollar of the $1,750,000 just authorized recently for the White House Conference.

The "little aid to education" program, under this bill, becomes the "no aid to education" program. I am deeply disappointed.

Mr. ROONEY. Mr. Chairman, I mentioned in my remarks awhile ago that I had an amendment at the Clerk's desk, which would provide that whatever ship construction or ship reconstruction money is provided in this bill, must be spent in shipyards in the continental United States.

The CHAIRMAN. Does the gentleman desire to offer his amendment now?

Mr. ROONEY. I offer my amendment now, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. ROONEY to the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH]: Add the following: *"Provided further,* That all ship construction, reconditioning and betterment of vessels appropriated for herein be performed in shipyards in the continental United States."

Mr. WIGGLESWORTH. Mr. Chairman, will the gentleman yield?

Mr. ROONEY. I yield.

Mr. WIGGLESWORTH. I will say, as far as I am concerned, that I am very happy to join in that amendment.

Mr. ROONEY. I thank the gentleman. I knew he would.

Mr. Chairman, in my remaining time may I point out with regard to the pending amendment offered by the gentleman from Massachusetts, [Mr. WIGGLESWORTH], that not only the National Advisory Council, but the Defense Establishment is in favor of this proposed ship construction. The Department of Defense a year ago stated that for defense purposes there was a deficiency of 214 merchant vessels in our merchant fleet; 43 large tankers, 6 large passenger-cargo ships and 165 other vessels. If we adopt the amendment of the gentleman from Massachusetts [Mr. WIGGLESWORTH], as I feel we are, we would merely be restoring 14 of the 214 vessels required as a minimum for the national defense.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, we have been monkeying with this subsidy business for a long time. The result has been that we have almost driven the American merchant marine off the seas. There has been no study made, there has been no analysis made of this situation by the Maritime Commission nor the Merchant Marine and Fisheries Committee. If we continue, we are going to drive the American merchant marine off the seas and over to other countries in this hemisphere. I understand that a block of ore boats, to carry 60,000 tons apiece, are being built in Japan and undoubtedly will be operated under the Venezuelan flag, to carry ore from Venezuela to Philadelphia. We are creating a situation under which the American people cannot travel on American ships. It is impossible for them to get dinner after 7 o'clock in the evening.

What bothers me about this situation is that if we go on that way, God help the American merchant marine. Let us try to find a way out instead of trying to dig ourselves in deeper.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Chairman, I am in favor of this amendment. Each year when we have had the foreign-aid bill before us, I have opposed as strongly as I could, the provision that required that 50 percent of the shipping used in that program be in American bottoms. I did not think that was the fair or right way to take care of our merchant marine. Each year some tens of millions of dollars of the appropriations advertised to the American public as foreign aid was actually money to subsidize our own merchant marine.

But the merchant marine must be taken care of, and this amendment provides a part of the right way to do it. We have got to have an American merchant marine and an American shipbuilding industry. We cannot compete on even terms with the cheap labor of countries which do not have the high standard of wages and of living that we enjoy in the United States. Provisions like those in this amendment are part of the price we pay for our high standard of living and for our national security. I am glad to pay that price.

This is the proper kind of legislation to keep our merchant marine on the high seas, to keep it up-to-date, and to keep it adequate, both because of our commercial interests, and even more as a part of our national defense.

I hope the amendment will be agreed to.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from New York [Mr. ROONEY] to the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH].

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 117, noes 32.

So the amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. WIGGLESWORTH] as amended.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 123, noes 41.

So the amendment was agreed to.

Mr. TABER. Mr. Chairman, I move that the Committee do now rise.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. ALLEN of Illinois, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 9936) making supplemental appropriations for the fiscal year ending June 30, 1955, and for other purposes, had come to no resolution thereon.

HOUR OF MEETING TOMORROW

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 o'clock tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. TABER. Reserving the right to object, Mr. Speaker, this is the situation. If we are going to get that foreign relief bill marked up in the Committee on Appropriations, and the House meets at 11 o'clock, it will be impossible to do it before Thursday and we will not be able to report it before Tuesday of next week and take it up on Friday. That is the situation we are in here. I just want to know what the program is.

Mr. HALLECK. I withdraw my request, Mr. Speaker.

LEGISLATIVE PROGRAM

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I have taken this time in order to announce generally to the membership what has been a matter of some discussion among the leaders and the chairman and ranking members of the committees. As I am sure everyone knows, suspensions which were in order for last Monday have been transferred to tomorrow.

We expect to call up under suspension of the rules on tomorrow the bill H. R. 9888, extending the Korean GI bill of rights for 1 year, which has been reported by the committee. We also expect to call up under suspension of the rules, the bill H. R. 9020, having to do with veterans' benefits, amended by the Committee on Veterans' Affairs. We also expect to call up under suspension of the rules what have come to be known as the postal rate and postal pay bill, as reported out by the Committee on Post Office and Civil Service with the amendments which were voted in committee. The suspension will include both of those bills. I

might say that both bills have been reported and the reports are available and will be available in the morning, as well as a committee print which will indicate the final form of the measure upon which the motion to suspend the rules will be made. We also propose to call up under the suspension of the rules the bill H. R. 7130, having to do with forfeiture of citizenship. It has also been suggested to me that if time permits, these bills from the Committee on Public Lands might be called:

S. 2380, to amend the Mineral Leasing Act.

S. 2381, to amend section 27 of the Mineral Leasing Act.

H. R. 8498, authorizing construction of works to reestablish the Palo Verde irrigation district.

S. 3385, providing for more effective extension work among Indian tribes.

S. 2864, to approve an amendatory repayment contract negotiated with the North Unit Irrigation District, and so forth.

As I say, I do not know how many of those we might have time for. I have discussed that with the gentleman from Nebraska [Mr. MILLER] and I thought I might at least list them as a possibility. I might say to the Members on our side, before I conclude, that we hope to have a conference which should not run too long as soon as the House adjourns, which I hope will be shortly.

Mr. RAYBURN. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. RAYBURN. I do not believe, Mr. Speaker, that I have ever heard of so many bills proposed to come up on one day under any circumstances, much less under suspension of the rules. I might say also, Mr. Speaker, that I do not think while I was either Speaker or majority leader that I ever called up, or allowed to be called up under suspension of the rules, any bill until I had consulted with the minority leader. If my memory serves me correctly, I never recognized any Member to move to suspend the rules unless it was agreeable to the minority leader. This program is not agreeable to me. I think it is a terrible thing that in order to increase the wages or salaries or compensation of postal employees, we have to throw two bills together. I want to say now for myself, although I do not know what might be the course others may take, if the increases in postal salaries and the increase in rates on postage stamps from 3 cents to 4 cents come up together, it certainly shall not have my support.

Mr. HALLECK. Mr. Speaker, I certainly respect the gentleman's opinions.

I have not checked the RECORD, and certainly I am not going to do so, to determine whether or not the gentleman ever permitted any suspensions when he was Speaker that were not concurred in by the minority leader. As the gentleman knows, as we proceed through the session necessarily there are discussions, because a two-thirds vote is involved, with the minority as to what the situation is, but I have never understood it to be the practice, and certainly it is not in the rules, as we come up to the close of a session with the majority carrying the responsibility for the progress of the program, that we would be subjected to a veto from the side of the minority.

I am not going to argue the merits of these measures at this time, as the gentleman has in some measure, except to point out that similar action was taken in the 80th Congress, and I checked the RECORD and there was not even a rollcall on the passage of measures at that time that involved the matter of rates and pay.

Mr. RAYBURN. The gentleman understands, of course, what happened after the adjournment of the 80th Congress. One of the reasons why I never agreed to recognize anybody for suspension of the rules without the consent of the gentleman from Massachusetts [Mr. MARTIN], was on account of what had happened to me on some of these occasions, and it will probably happen to the gentleman tomorrow.

Mr. HALLECK. I discussed the matter in respect to the veterans bill, to which I have made reference, and it has been the practice, ever since I have been here, to call up those bills under suspension, whether the Democrats or the Republicans were in power.

COMMITTEE ON THE JUDICIARY

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

BRIEF SUMMARY OF LEGISLATION TO INCREASE SALARIES AND PROVIDE OTHER BENEFITS FOR POSTAL EMPLOYEES, AND FOR POSTAL RATE INCREASES

Mr. REES of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES of Kansas. Mr. Speaker, the leadership of the House has announced that legislation will be considered on tomorrow providing for increases in salaries and for other benefits for postal employees, and together with this legislation and included therewith, will be further legislation considered for certain increases in postal rates.

Because of time limitations allowed in considering these proposals on the floor of the House, I am making a brief statement with respect to these measures. Complete analysis of these proposals is included in reports of the bills, when reported to the House.

Legislation to be considered to provide for increases in pay, and for other benefits, for postal employees is contained in H. R. 9836, as amended by the committee, and reported without opposition by the Committee on Post Office and Civil Service.

Here is a summary of the amended bill. It provides:

First. A permanent 5 percent increase for all postmasters, officers, and employees in the postal field service with a minimum of $200 except in the case of fourth-class postmasters and hourly rate employees.

Second. A fourth longevity grade for personnel of the postal field service.

Third. A reclassification for all postmaster, officers, and employees in the postal field service by requiring that the Postmaster General submit to Congress by March 15, 1955, a proposal for job evaluation of the positions of postal field service personnel. This proposal must contain schedules which set forth grades and salaries of postal field service positions, and provisions assuring postal employees (a) of the right to appeal their classification to the Civil Service Comission; (b) that those on the rolls when the plan, or any part thereof, becomes operative will not suffer any loss in salary; and (c) that they will not be downgraded. This plan will take effect unless disapproved within 60 days by a majority of either House of Congress, a quorum being present.

Fourth. An increase in the allowable per diem for employees in the transportation service to $9 per day from the present rate of $6 per day.

Fifth. A uniform allowance of $100 annually for those employees required to wear uniforms.

Sixth. A modification of present law which restricts the number of permanent appointments in the Federal service. This will permit the granting of permanent appointments to a large number of temporary and indefinite employees in the postal field service.

Seventh. A biweekly pay period for personnel of the postal field service.

Total cost of bill, $151,533,000.

Legislation to be considered concerning increases in postal rates is included in the provisions of H. R. 6052, as reported by the House Post Office and Civil Service Committee. A complete analysis of the measure is contained in a report that has been on file for some time. A summary of postal-rate provisions is as follows:

FIRST-CLASS MAIL

The bill as reported increases from 3 cents to 4 cents the rate on the first ounce of first-class letter mail for delivery outside the office of mailing.

I think it well to observe that much has been said that first-class mail more than pays its way. This applies to what is known as drop-letter mail. It is mail delivered from the post office where it is mailed. This legislation does not change that rate of 3 cents per ounce. The 4-cent rate applies only to the first ounce on mail delivered away from the office of mailing.

AIRMAIL

The rate on domestic airmail is increased from 6 cents to 7 cents an ounce.

SECOND-CLASS MAIL

First. In addition to the 10-percent increase due April 1, 1954, under existing law, this bill will increase the rates on second-class mail in 3 increments of 10

percent, effective April 1, 1955, April 1, 1956, and April 1, 1957. These increases are based on the rates in effect prior to Public Law 233, 82d Congress, and are applied on the portion of publications for delivery outside the county of publication. The increases do not affect publications of nonprofit religious, educational, scientific, philanthropic, agricultural, labor, veterans', or fraternal organizations or associations.

Second. The publication, or portions thereof, delivered outside the county of publication on which rates are increased as explained in paragraph 1 above, will be subject to a minimum charge of one-fourth cent per copy, compared to the present charge of one-eighth cent. The one-eighth cent minimum remains the same as at present for publications of the nonprofit associations or organizations listed above.

Third. The present transient second-class mail is eliminated and in the future these mailings will be carried at the third-class rate for those publications of 8 ounces or less and at fourth-class rate for those publications weighing over 8 ounces.

THIRD-CLASS MAIL

First. The rate for individual pieces of third-class mail is increased from 2 cents for the first 2 ounces, plus 1 cent for each additional ounce—or in some cases, 1½ cents for each 2 ounces—to 3 cents for the first 2 ounces plus 1½ cents for each additional ounce or fraction thereof.

Second. The rate on third-class matter mailed in bulk is increased from 14 cents per pound and 1½ cents minimum per piece to 16 cents per pound and 1½ cents minimum per piece.

Third. The fee for a permit to send third-class mail under the bulk mailing rate is increased from $10 a year to $50 a year, with the privilege of purchasing a 3-month permit at $15.

Fourth. Odd-sized pieces of third-class mail will be subject to a minimum charge of 5 cents, representing an increase of 2 cents per piece.

Fifth. The minimum charge on third-class matter mailed at bulk rates without individual addresses, for delivery under regulations prescribed by the Postmaster General, will be 2 cents per piece.

Sixth. No increases will be made in bulk rates on third-class mailings of books and catalogs of 24 pages or more, seeds, cuttings, bulbs, roots, scions, and plants not exceeding 8 ounces in weight, or on mailings of nonprofit religious, educational, scientific, philanthropic, agricultural, veterans', or fraternal organizations or associations.

CONTROLLED CIRCULATION PUBLICATIONS

Controlled circulation publications will be subject to a rate of 11 cents per pound with a minimum charge of 1½ cents per piece.

BOOKS

The committee struck from the bill the provision which would have increased postage on books by $4 million, or approximately 25 percent.

INCREASED REVENUE

Following is the estimated total increase in postal rates when all the rates are in effect:

Estimate of revenues from each section of H. R. 6052 (as reported)

[Based on 1953 volume and assuming no loss in volume due to higher rates]

Section:	
1. First-class mail (first ounce of nonlocal)	$159,000,000
2. Domestic airmail	15,600,000
3. Second-class mail (publishers' second class)	13,500,000
Transient second-class at third- and fourth-class rates	900,000
4. Third-class mail:	
Increase in piece rates	29,000,000
Increase in pound rates 14 to 16 cents	3,200,000
Bulk fee $10 to $50 year or $15 quarter	8,000,000
Pieces of odd size or form	1,000,000
2-cent minimum on unaddressed third-class	3,000,000
Total	44,200,000
5. Controlled circulation publication (up to 8 ounces)	80,000
Total increase	233,280,000

THE DROUGHT SITUATION IN KANSAS

Mr. MILLER of Kansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. MILLER of Kansas. Mr. Speaker, I wish to revise and extend my remarks and include a letter from Mr. Glenn Stockwell, of Randolph, Kans., showing what a group of intelligent and progressive farmers can do in the way of soil conservation and flood protection when they cooperate in measures for that purpose:

RANDOLPH, KANS., *July 14, 1954.*

Hon. HOWARD S. MILLER,
House Office Building,
Washington, D. C.

DEAR CONGRESSMAN: I would like to tell you of my experience on my farm and in my neighborhood with watershed management as a means of flood control. My farm is located on Crooked Creek in northern Riley County, Kans. This creek is typical of many in this section. The creek is bordered with rich farmland that is highly farmed. The uplands are rough and steep. Through improper farming and pasture management the watershed has deteriorated and floods on the creek were becoming more frequent and severe.

In 1937 we had a very severe flood that destroyed acres of crops, washed out miles of fencing and drowned livestock. It was evident that we would either have to abandon the farmland along the creek or find some method of controlling the runoff waters. My neighbors and myself consulted with technicians of the State college, and the Soil Conservation Service. We visited some of the demonstration projects on which watershed development was being tried out. We were soon convinced that our remedy was in a proper management and development of our watershed. It would have to be a community effort.

Since that time much of the land has been terraced and grassed waterways installed. Improved rotation practices have been adopted. Much of the poorer upland has been reseeded to grass and the native grass improved through good pasture management. At least 15 impoundment structures have been built. Some of this work has been done under ACP assistance but much of it has been done at the farmers' own expense in order to accelerate the work.

The results have been outstanding. We went through the 1951 and 1952 flood periods with practically no flooding although we were in the area of high rainfall. During the 60 days of rainfall of May, June, and July 1951, the water was almost continuously trickling from our terraces but at no time did it assume flood proportions. We can now farm our lowlands with confidence and erect fences that are necessary for our livestock business without fear of having them washed away.

We are now experiencing a severe drought and are finding that the greatest benefits from our work may come in drought periods. In spite of the dry weather we have just finished harvesting one of the best wheat crops of our experience. Our springs are still flowing and we have plenty of water in our pastures. Our farm has been in the family for 97 years and we are just now developing a system of watershed management that will make the farm a stable and permanent proposition. I believe that an accelerated soil conservation and watershed development program would be the greatest boon that this country could receive. The benefits would be manifold and so widespread as to benefit the entire economy of our Nation.

Sincerely yours,

GLENN D. STOCKWELL, Sr.

Mr. Speaker, at this point I include a communication from the Kansas Livestock Association:

KANSAS LIVESTOCK ASSOCIATION,
Topeka, Kans., July 13, 1954.

Representative HOWARD S. MILLER,
House Office Building,
Washington, D. C.

DEAR MR. MILLER: The following night letter was sent to Secretary of Agriculture Ezra T. Benson, July 13:

"Record heat 114° common yesterday. No rain past 2 weeks in most of Kansas. Crops and grass are burning. Stock-water situation becoming critical. Forced cattle marketing started. Some truckers report bookings 2 weeks ahead. Beef-purchase program, to be effective, should start at once. Price paid for beef should warrant stronger cattle prices. Contracts should be for delivery dates requiring immediate purchase by processors."

A. G. PICKETT, *Secretary.*

Mr. Speaker, that telegram was sent a week ago and the heat and drought continue. The conditions are worsening daily and stockmen are compelled to liquidate their cattle.

It is my understanding that the Secretary of Agriculture has authority to institute a cattle-buying program to meet this emergency. I am one Member of Congress who believes it time to begin.

MY RECORD ON REA

Mr. VURSELL. Mr. Speaker, I want to pay a compliment to the fine work the officials of REA cooperatives have done throughout the Nation in bringing light and power to millions of farmers in the last several years, which greatly increases the wealth of the Nation by making an outlet for the use and purchase

of electrical appliances, amounting to billions of dollars a year, which is an aid to business and to the economy of the Nation, lifting at the same time much hard work from the farm women of America.

FREE ENTERPRISE

As I have often said, I regard REA as one of the finest examples of free enterprise at the grassroots. The officials who direct the management of REA cooperatives have done a splendid job, nationwide.

The five REA cooperatives serving my congressional district have made every loan payment on time, and are ahead with their repayments now $1,763,954. This fine record shows they are paying off their loans faster than they come due.

When I came to Congress in 1942, only 49 percent of the farms in Illinois had electric light and power. Now, 12 years later, we have 95 percent served.

VOTED FOR $2,649,000,000

In these 12 years I have voted for REA loan funds a total of $2,649,000,000, which is $75 million more than was requested by Presidents Roosevelt, Truman, Eisenhower, and the Bureau of the Budget acting for those Presidents.

We appropriated	$2,649,000,000
Presidents requested	2,574,000,000

This shows we appropriated $75 million more for the REA loan fund than was requested by these three Presidents.

I thought the farmers should have these facts. I decided to give them to you because I have learned that a false campaign is being started by those who hope to gain political advantage by charging I had not adequately supported the REA. These loans are repaid with interest.

Mr. H. CARL ANDERSEN. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield.

Mr. H. CARL ANDERSEN. The gentleman from Illinois [Mr. VURSELL] has throughout his 12 years in this House always fought for what he has considered to be just and fair treatment for the farmer in every respect. I recall the many times in which he has appeared before my Subcommittee on Appropriations for Agriculture in behalf of such programs as REA. I have noticed that during these 12 years the gentleman from Illinois [Mr. VURSELL] has always voted as I have relative to REA loan allocations. I am positive in my own mind that during these years, he and I have voted for $155 million above and beyond what the budget has requested of the Congress. There is no better friend of REA and the farmer than the gentleman from Illinois [Mr. VURSELL].

Mr. VURSELL. I sincerely appreciate the comments of the gentleman from Minnesota [Mr. ANDERSEN], the chairman of the Appropriations Subcommittee for Agriculture.

Mr. HORAN. Mr. Speaker, will the gentleman yield?

Mr. VURSELL. I yield.

Mr. HORAN. I just want to say that in my opinion the gentleman from Illinois is as good a friend of REA as there is in the Congress, and has been all down through the years. He has fully supported REA loan funds for the 12 years he has served in the Congress.

Mr. VURSELL. Mr. Speaker, I want to thank both of these gentlemen, who are members of the Agriculture Subcommittee on Appropriations.

Mr. Speaker, the members of the Appropriations Committee of the House know that I have fully supported the loan funds for REA in every session of the Congress for the past 12 years.

The farmers generally know that I have not only supported the REA loan fund to extend light and power to the farmers of Illinois and the Nation, but that I have supported soil conservation and research and extension work; that I helped to write and pass the farm-to-market roads program—to pull the farmers out of the mud; that I have supported the Farmers' Home Administration loans to assist farmers to own their homes—and I note from a recent report that 50 farm loans have been granted to farmers in Marion County; that I have voted at all times and am still voting in this session to help the farmers on every front.

I have owned and operated farms most of my life. I helped to organize, as a charter member, nearly 40 years ago, the Farm Bureau in Marion County, and am still a member.

NAIL CHARGES DOWN

Mr. Speaker, I want to nail these false charges down by giving you the record of my support of REA loan funds, carefully compiled by a member of the staff of the House Subcommittee on Appropriations for Agriculture.

May I point out that, in order to save time on the House floor, on many occasions, no record vote is taken. When the Members are in agreement they often pass the bill by a voice vote rather than take the time to call the roll of 435 Members, which must be called twice on a rollcall vote.

Twelve years ago the first REA appropriation bill I was privileged to vote for came in the 1st session of the 78th Congress.

HERE IS THE RECORD

78th Cong., 1st sess., 1943

Budget request	$30,000,000
House committee approved	20,000,000
Senate approved	30,000,000

It then went to a conference committee of the House and Senate. When it came back to the House, Congressman RANKIN moved that the House approve the Senate figure increasing REA appropriations to $30 million. The record shows that I voted "yes" on the Rankin substitute—CONGRESSIONAL RECORD, volume 89, part 5, page 6361—which was defeated. This shows I voted to increase REA appropriations $10 million.

78th Cong., 2d sess., 1944

Budget request	$20,000,000
House committee approved	20,000,000
House approved	20,000,000

I supported the $20 million although there was no record vote. It went to the Senate, which increased the amount to $40 million. The conference committee representing the House and the Senate compromised at $25 million. No one opposed the conference report. I supported the $25 million, and this was the amount appropriated.

79th Cong., 1st sess., 1945

Budget request	$150,000,000
House committee approved	60,000,000
House approved	60,000,000
Senate approved	125,000,000

In the House on final passage of the $60 million, there was a record vote. I had been called to my office on an emergency matter, and returned to the floor as quickly as possible, but got there about 2 minutes too late to be recorded favorably on the House vote. Conferees, representing the House and Senate, compromised on $80 million, and I supported the conference report for $80 million.

79th Cong., 1st sess. (continued), 2d deficiency, 1945

Budget request	$160,000,000
House committee approved	50,000,000
House approved	120,000,000

I supported the $120 million on a division vote. There was no rollcall. The Senate approved $120 million. Final amount approved $120 million, and I voted for it.

79th Cong. 2d sess., 1946, urgent deficiency, 1946

House approved	$100,000,000

A motion was later made to recommit the bill, to eliminate funds for OPA, which was defeated on a record vote. I was not recorded on that vote, however, it had nothing to do with REA.

79th Cong., 2d sess., (continued)

Budget request	$250,000,000
House approved	250,000,000
Senate approved	250,000,000
Final amount approved	250,000,000

I voted for $250 million, as all other Members present did. In order to save time no record vote was taken.

80th Cong., 1st sess., 1947

Budget request	$250,000,000
House committee approved	225,000,000
House approved	225,000,000

Mr. CANNON of Missouri offered motion to recommit, CONGRESSIONAL RECORD, volume 93, part 5, page 6030, to provide $300 million for the Agriculture Adjustment Administration, $75 million for school lunches, and to increase REA $25 million. I voted against it because of the enormous sum added for AAA in the House.

On final passage of conference report I voted "yes" on the rollcall vote for $225 million—CONGRESSIONAL RECORD, volume 93, part 5, page 6031; 315 of the Members voted "yes" and only 38 voted "no."

80th Cong., 2d sess., 1948

First deficiency 1948 budget request	$175,000,000
Committee approved	75,000,000
House approved	175,000,000

In other words, we in the House increased the committee request by $100 million. Mr. CANNON of Missouri offered motion to recommit, and increase REA by $100 million. I voted "yes" on record vote, CONGRESSIONAL RECORD, volume 94, part 3, page 3995, and also voted "yes" on record vote for final passage on April 1, 1948. Senate also approved the amount.

Budget request (regular)	$300,000,000
Committee approved	400,000,000
House approved	400,000,000
Senate approved	400,000,000

This was under the 80th Republican Congress, which voted more funds in the 2 years it was in power for REA than has ever been voted in 2 years since REA was adopted. There was no record vote and practically no opposition. I voted for these large sums, as the other Members did.

81st Cong., 1st sess., 1949

Budget request	$350,000,000
Committee aprpoved	350,000,000
House approved	350,000,000
Senate approved	350,000,000

I supported this amount by a voice vote. There was no record vote.

Now, since there are always some people who are more interested in politics than they are in the farmers, I want to quote what I said with reference to the REA bill when we were considering it on April 5, 1949, 5 years ago. You will find my remarks in the CONGRESSIONAL RECORD, volume 95, part 3, page 3921. My comments then reflect the support I have always given REA loan funds throughout my service in Congress. This is what I said:

Mr. Chairman, I had occasion to appear before the subcommittee handling this bill. They have brought out a very good bill. It appeals to me in almost every section.

Particularly do I appreciate and favor that provision with reference to REA, which not only provides for an appropriation of $350 million, but has a proviso that the administrator of REA, Mr. Wickard, if he finds he is running short of funds may go to the Secretary of Agriculture and borrow in amounts of $50 million, if he can so justify, until an additional $150 million has been exhausted.

I am glad this provision is worded so that the administrator does not have to come back to Congress, if more funds are needed for the year 1949. The Congress by this provision has given REA full opportunity for the extension of its services, so much needed by the people of the Nation.

SOIL CONSERVATION

I am also interested in the provision with reference to soil conservation. The greatest contribution we can make to the posterity of this country, as well as for the immediate future is that we try to leave the soil in a better condition than we found it, more fertile, and more productive, for those who follow after us. If we have done that, then we have really rendered a service to the country, not only for the present and the near future, but for the years to come.

The RECORD further reads as follows:

Mr. RANKIN. Mr. Chairman, will the gentleman [Congressman VURSELL] yield?

Mr. VURSELL. I yield.

Mr. RANKIN. This bill appropriates $350 million for rural electrification, and makes $150 million additional available if necessary. That is right, is it not?

Mr. VURSELL. Yes.

Mr. RANKIN. That would mean $500 million would be available.

Mr. VURSELL. That is correct.

The above reflects the position I have always taken on REA loans and soil conservation.

81st Cong., 2d sess., 1950

Budget request (including rural telephones)	$450,000,000
House committee approved	375,000,000
House approved	375,000,000
Senate approved	390,000,000

Conference of the House and Senate committees approved a compromise of $382,500,000. Final amount approved, $382,500,000. I, with practically all other Members, voted for this large sum.

82d Cong., 1st sess., 1951

Budget request	$109,000,000
Committee approved	109,000,000
House approved	109,000,000
Senate approved	109,000,000

No amendment or record vote. No conference necessary. Final amount approved, $109 million. I, with practically all Members, supported the amount by a voice vote.

82d Cong., 2d sess., 1952

Budget request	$75,000,000
Committee approved	75,000,000
House approved	75,000,000
Senate approved	75,000,000

No conference necessary. Practically all of the House Members voted for the $75 million. No record vote was necessary.

83d Cong., 1st sess., 1953

Budget request	$200,000,000
Committee approved	185,000,000
House approved	185,000,000
Senate approved	202,500,000
Conference committee approved	202,500,000

The CONGRESSIONAL RECORD, volume 99, part 4, page 5277, dated May 20, 1953, will show that I voted "yes" on final passage.

83d Cong., 1st sess., 1954

Budget request	$55,000,000
Committee approved	100,000,000
House approved	100,000,000

I urged the subcommittee to increase the amount to $100 million, and we approved it on a voice vote. There was no record vote. The Senate raised the amount to $135 million. Inasmuch as I could not be present when the conference report came back to the House, I made the following statement, which I quote from the CONGRESSIONAL RECORD of June 22, 1954, page 8658:

Mr. Speaker, since it will be impossible for me to be present tomorrow when the conference committee reports on the agriculture appropriation bill, I should like for the RECORD to show that I favor the report, and if it were possible for me to be present, I would vote for the additional Senate $35-million loan authorization carried in the report for REA.

When the above bill was before the House, the CONGRESSIONAL RECORD of April 12, 1954, page 5036, carried my remarks, as follows:

REA FUNDS

Mr. Chairman, I am pleased to note that our committee has provided additional loan funds for rural electrification in the amount of $100 million in this bill. I would like to point out that the Appropriations Committee has increased the budget request of $55 million by $45 million, which will bring the loan fund for the coming year up to $100 million.

FOR REA TELEPHONE SERVICE

I would also like to say that I voted for the original Telephone Act and to point out that we have provided the full budget request of $75 million loan fund to be used in the extension of the REA telephone service, which is an increase of $7,500,000 over the appropriations made for telephone service over the recent year.

COMMITTEE REPORT

The committee has had reported to it many instances where private power sources are placing more and more restrictions on the activities of REA cooperatives as condition to negotiating contracts to supply the necessary power. Many times contracts offered by the private power companies are on a year-to-year basis. In the opinion of the committee, REA cooperatives are entitled to a firm source of power at reasonable rates and on a dependable basis, with the full right to operate on a basis which will render maximum service to eligible consumers. The committee feels that the Administrator's authority to provide loans for power generation should be fully utilized, if necessary, in order to assure adequate power to REA cooperatives on a reasonable basis.

The committee report we wrote is important, and shows the Congress is determined to protect the REA as it grows in the future to the extent that they may build their own power-generation plants, when necessary, to assure them adequate power, at reasonable competitive rates. When they are not able to secure adequate power in an area without unreasonable rates, I want them to have this protection.

I further stated "that Congress is determined to protect the REA as it grows in the future to the extent that they may build their own power generating plants, when necessary, to assure them adequate power, at reasonable competitive rates."

Now, the above shows that I, with a majority of the Members of Congress, appropriated for the REA loan fund to bring light and power to the farmers of America a total of $2,649,000,000, which is $75 million more than was requested by the three Presidents under whom I have served during the past 12 years.

INTERIOR DEPARTMENT—RECLAMATION, ETC.

The following will show that I voted with a majority of the Members of Congress to reduce some amounts for administration expenses and construction work, because the hearings held before the Appropriations Committee of 50 members showed these funds were not necessary, and would be a waste of the taxpayers' money.

ROLL CALL NO. 40, APRIL 25, 1947

A motion was made from the Democratic side to recommit the bill which would add funds to purchase 30 new automobiles for the Interior Department—mind you, not REA—and provide for $1,700,000 for administration of the Bonneville project, meaning they could employ more people who were not needed and spend more money.

The facts prove they had a carryover of $141 million in the Department that had not been spent. The Washington Post, the leading Democrat newspaper in Washington, published an editorial commending the action the committee had taken in reducing the Interior appropriation bill.

I voted against the waste of this amount of money because they already had too many automobiles and plenty of money for the administration of the project. I must have been right because 197, including Representative NIXON, now Vice President, and Representative William G. Stratton, now Governor of

Illinois, voted with me, while only 140 voted for the motion to recommit.

ROLL CALL NO 39, MAY 2, 1951

Mr. GARY, chairman of the Appropriations Subcommittee, and a Democrat from Virginia, offered an amendment to strike out $3,400,000 for the Southeastern Power Administration. I quote from the CONGRESSIONAL RECORD, volume 97, part 3, page 4282, what Mr. GARY said:

The purpose of this amendment is to prevent the useless expenditure of $3,400,000 to the Southeastern Power Administration for the construction of transmission lines to duplicate existing lines now in operation.

Mr. GARY has the respect of every Member of the House. His amendment carried on the roll call by 248 yeas to 149 nays. I was glad to vote with Mr. GARY to prevent this waste.

ROLL CALL NO. 40, MAY 2, 1951

Congressman HARRIS, an able and respected Democrat of Arkansas, offered the amendment to reduce SWPA by $550,000. In support of his amendment, I quote from the CONGRESSIONAL RECORD, volume 97, part 3, page 4295, his words, as follows:

Mr. Chairman, this amendment is an effort to reduce in some small way the burden—the load of the taxpayer. It does not handicap or adversely affect the program or service of the Southwestern Power Administration. * * * If there ever was a time when Federal expenditures unrelated to our national defense should be reduced to the bone, it is now.

I was glad to help save this $550,000. The amendment carried by 222 yeas to 173 nays.

ROLL CALL NO. 41, MAY 2, 1951

Simply a vote for language to be inserted that no funds of the appropriation could be expended for the construction of facilities designated as comprising the western Missouri project. Yeas 247, nays 152.

ROLL CALL NO. 42, MAY 2, 1951

This motion was made to reduce the amount appropriated for Bonneville project by $5½ million. However, that left $62 million for that project, more than they could or did spend for the coming year. Motion carried 225 to 167. I voted to save $5½ million.

ROLLCALL NO. 44, MAY 2, 1951

This had to do with construction under the Bureau of Reclamation, Mr. TABER made a motion to reduce the amount from $207,190,000 to $197,000,000. That still left an enormous sum. I voted "yea" to slow down the spenders; 237 voted "yea" to only 160 "no." I voted against unnecessary waste.

ROLLCALL NO. 45, MAY 2, 1951

This was an attempt on the part of the spenders to duplicate transmission lines already rendering adequate service; 226 voted "yea," only 165 voted "nay." I voted with the 226.

ROLLCALL NO. 32, APRIL 28, 1953

This vote was on a motion to recommit the bill which had been considered for many weeks by the Appropriations Committee, and had been approved by that committee after long hearings. The motion would add to the bill about $6,856,000 to be spent on various construction projects in the Southwest, West, and Northwest parts of the United States.

The motion was voted down by a vote of 212 to 167. I voted to prevent spending $6,856,000, which was clearly unnecessary.

Mr. Speaker, in closing, on the rollcalls I have just listed I would like to point out that the Members of this House, by a big majority on every rollcall, voted as I did knowing it was our duty to prevent unnecessary waste of millions of dollars of the taxpayers' money. I am glad to have helped render that service.

RESOLUTION ON SPECIAL COMMITTEE TO INVESTIGATE TAX-EXEMPT FOUNDATIONS

The SPEAKER. Under the previous order of the House the gentleman from New York [Mr. JAVITS] is recognized for 20 minutes.

Mr. JAVITS. Mr. Speaker, I ask unanimous consent to reduce my special order to 4 minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JAVITS. Mr. Speaker, I am glad we have a good attendance here preparing for the Republican conference, because I have something very serious to say to the House and it is a very fortuitous circumstance.

We have heard a lot pro and con about rules of congressional procedure for investigating committees in both this House and the other body.

There seems to be no practical way in which once an investigating committee is organized and endowed with an appropriation the House can recapture its control over it. We have in this body, in my opinion, a special committee which needs to have the recapture of control at least reviewed as far as the House is concerned. It is the Special Committee on Tax-Exempt Foundations.

The power of the whole House of Representatives being vested in any investigating committee the House should now assert the right to review that power with respect to its exercise by the Special Committee to Investigate Tax-Exempt Foundations. I am introducing a resolution for that purpose today the text of which is as follows:

Resolved, That the Committee on Rules is hereby authorized and directed after inquiry to make recommendations to the House of Representatives respecting the activities of the Special Committee to Investigate Tax-Exempt Foundations created pursuant to House Resolution 217, 83d Congress, and the termination thereof, the report thereof to the House of Representatives, the disposition of the papers and documents of the said special committee and such other measures relating thereto as may be appropriate.

It is high time that the House of Representatives asserted itself in one of these investigations that has gotten off the track, as the best answer to the danger of any loss of prestige which may be suffered by either House of the Congress attributable to the excesses of congressional investigating committees. Having reported favorably House Resolution 217 to create the special Committee it should be a duty given to the Rules Committee to exercise legislative oversight over it, and my resolution so provides.

The case for action is clear. On July 2 after hearing 11 witnesses critical of the tax-exempt foundations and 1 witness favoring their activities, and before the foundations themselves were heard, the special committee abruptly ended further public hearings, saying statements could be submitted that could be made public. The predecessor Cox committee heard 40 though this present committee was said to be justified because its predecessor did not do a good enough job. Terminating public hearings when only one side has been heard is not the American way and the House should not tolerate it. It resulted in the New York Herald Tribune calling this particular inquiry a senseless investigation and the New York Times calling it another stupid inquiry. These are authoritative publications and such editorials are not conducive to the prestige the House seeks to, and should, sustain on a high level.

The whole investigation of foundations has been conducted upon the theory that the foundations have been engaged in some conspiracy to infiltrate socialism into American educational institutions and social life. As against this, we have the findings of the predecessor Cox committee unqualifiedly to the contrary. The Cox committee said in their report:

It seems paradoxical that in a previous congressional investigation in 1915 the fear most frequently expressed was that the foundations would prove the instruments of vested wealth, privilege, and reaction, while today the fear most frequently expressed is that they have become the enemy of the capitalistic system. In our opinion neither of these fears are justified.

* * * * *

Aside from the pressing needs of national security there are ever-widening and lengthening avenues of knowledge that require research and study of the type and kind best furnished or assisted by foundations. The foundation, once considered a boon to society, now seems to be a vital and essential factor in our progress.

* * * * *

The committee believes that on balance the record of the foundations is good. It believes that there was infiltration and that judgments were made which, in the light of hindsight, were mistakes, but it also believes that many of these mistakes were made without the knowledge of facts which, while later obtainable, could not have been readily ascertained at the time decisions were taken. It further believes that the foundations are aware of the ever-present danger and are exerting and will continue to exert diligence in averting further mistakes. While unwilling to say the foundations are blameless, the committee believes they were guilty principally of indulging the same gullibility which infected far too many of our loyal and patriotic citizens and that the mistakes they made are unlikely to be repeated. The committee does not want to imply that errors of judgment constitute malfeasance.

Nothing material has appeared before the present committee to alter the validity of these conclusions of its prede-

cessor committee. I hope very much that my colleagues will very seriously think about this question of what control we do have and whether it is not vitally important that we have some residual control over these investigations as there is a possibility that they may go off the track.

Mr. BUSBEY. Mr. Speaker, will the gentleman yield?

Mr. JAVITS. I yield to the gentleman from Illinois.

Mr. BUSBEY. May I inform the gentleman that there are some of us in this body who do not take our evaluations of congressional committees from the New York Herald Tribune or from the New York Times. Some of us disagree violently with their position and I am one of them.

Mr. JAVITS. That is proper and the gentleman is entitled to his opinion. But the gentleman will notice that the first thing I spoke of was the cessation of any public hearings after one side was heard. I first gave the facts before I gave anybody's opinion.

Mr. JACKSON. Mr. Speaker, will the gentleman yield?

Mr. JAVITS. I yield to the gentleman from California.

Mr. JACKSON. The House exercises its constant and continuing control over any investigating committee and at any time it is the consensus of the Members of the House that any committee has overstepped the bounds of decorum in the conduct of its operations it can cut off that appropriation.

Mr. JAVITS. I have suggested a means by the filing of this resolution by which the House can make its will felt. I think that some means to enable the Houses of the Congress to see to their own prestige is vitally needed here and in the other body.

TENTH ANNIVERSARY OF THE ASSASSINATION OF THE GERMAN ELITE

The SPEAKER. Under special order heretofore entered into, the gentleman from California [Mr. YOUNGER] is recognized for 30 minutes.

Mr. YOUNGER. Mr. Speaker, today, July 20, marks the 10th anniversary of the assassination of the German elite. In memory of that occasion I would like to read from an address delivered by Prof. Karl Brandt, associate director of the Food Research Institute, Stanford University, before the World Affairs Council of Northern California on July 8, when he said as follows:

We are assembled here today to pay our tribute of respect and admiration to those German men and women who put their lives at stake in resisting the tyranny and lawlessness of the Hitler regime, and who were assassinated for doing so. In honoring the memory of those gallant martyrs for the cause of freedom and human dignity, we have a phase of contemporary events to ponder which, for the vivid contrast between man's most vicious and diabolical capacities on one side and his noblest emotions and acts on the other, constitutes one of the greatest tragedies in the history of the west.

We are commemorating those past events in a distant country tonight because they give us an insight into the nature of the struggle of the free society in our day. In fact, this experience concerns all of us most intimately because what happened in Germany can happen anywhere in the world, at any time. Only a clear knowledge of what took place there, the will of those who believe in human dignity to make the sacrifice to preserve it, and eternal vigilance will spare other countries the same ordeal and the same tragic loss. While the scene and the special emphasis may change, the nature of the basic human problems as well as the potential human reaction to them will remain the same in any country. Only those afflicted with racialism would deny this, and endeavor to indict whole nations or other collective groups. For this reason we may remind ourselves that our present quarrel is not with the Russian people, but with a temporary regime which rejects the basic tenets of the philosophy of freedom.

What happened in Germany from 1933 until this day is full of meaning to us in America, the more so since we are intimately concerned with that country. The American people have twice defeated the German armed might in battle, and have twice done their best to rebuild Germany. Today our troops are protecting it and our Government still guides its course in domestic and foreign affairs. In 1933 Germany was 1 of the 3 leading and scientifically advanced industrial countries of the world; it had built a modern democracy and an orderly government by law. In that year it sank into totalitarianism, and almost perished.

Under the impact of a lost war, a disastrous runaway inflation, and the worldwide depression, the democratic German society of the Weimar Republic foundered, owing to the same sort of political deadlock which at this very moment brings France, even in the midst of prosperity, to the edge of revolution. To grasp the enormity of the events that culminated in the assassination of the German elite after July 20, 1944, we must trace the rise of the tyrant and his might-is-right regime of terror and plunder.

By 1933, one-third of the working population of Germany was unemployed and living on a meager handout from the tottering democratic state. The impractical constitution of the Weimar Republic contributed considerably to this impasse, just as her unworkable constitution is troubling France today. Not quite one-half of the German votes were cast for Hitler in 1933. He promised employment, economic recovery, and new security. This platform made a lot of sense to many despairing people. After having gone through the agony of a misconstrued and sabotaged political process in a multiparty democracy, the German citizen felt that discipline under a dictator would get him out of the mess. President Franklin Roosevelt and Hitler were inaugurated about the same time on similar economic and social platforms: to start up the idle wheels of industry, to create full employment, to lift prices for the farmer, and to put planning and social reforms into the economic system. The two men were worlds apart in every sense, but it took Roosevelt until 1937 or 1938 fully to size up even the contours of Hitler's wickedness. The German people did not admire Hitler's looks, his harsh, rasping voice, his Austrian dialect, or his cheap, demagogic manners. But most of them felt that the deadlock in politics and economics had to be broken somehow, even if at the temporary cost of some liberties.

Late in March 1933 I asked farmers throughout the country why they had voted for Hitler. Their answer was: "How could you go on with such ruinous prices for wheat and rye and all the other products?" All they wanted was recovery—and this they got; Hitler rapidly gained more support.

Germany had had a long and honorable record along the lines of constitutional monarchy, two-house parliament, labor unionism, free press, and guaranty of civil liberties ever since the abortive revolution of 1848 which sent waves of democratic Germans to this country. Germany had also emancipated the Jews earlier than any other country, and they had contributed their fair share to government by law, to science, and to the arts. It had too broad and educated and experienced an intelligentsia not to see the devil's horns and hoofs under the Führer's uniform, which he revealed almost immediately. When Reichspräsident von Hindenburg received Hitler in 1932 as a candidate for the position of Reichskanzler, and asked what his conditions were, Hitler said, "I need the right to destroy physically my political opponents." The old gentleman gasped, and, horror struck, inquired, "What did you say you wanted to do?" When Hitler stubbornly repeated his claim to the rank of overlord of gangsters, the field marshal snapped, "The audience is over."

Unfortunately for the Germans, the domestic political deadlock, the social distress, and the desolate international situation created such a crisis that a few months later Hitler acceded to power anyway. His and his henchmen's orders were plain: "Get tough, muss them up, spare nobody; crush any opposition physically—cow them all. This will change the situation and speed recovery." It actually did. But terror stalked the country from the day Hitler took over.

In December 1932 Ambassador Bullitt, special envoy of President-elect Roosevelt, visited with me in Berlin. Democracy and government by law were still in force under Chancellor Schleicher, and the worst of the depression had been passed 6 months before. When Philip LaFollette, Governor of Wisconsin, toured Berlin with me in the spring of 1933, the atmosphere of intimidation and arbitrary use of power and perversion of truth and justice were already all around us. Assured of immunity by Göring, the Storm Troops were waging a civil war against all whom they proscribed. In the sanctum of a private club an air force officer mimicked Hitler before a small group. Hitler heard of the episode and ordered the man shot. Göring pleaded clemency. The officer was slain just the same. Jews, Catholics, liberals, Social Democrats, Freemasons, and all conscientious dissenters of any philosophy or conviction were under persecution. The 6 million Communists promptly sided with the ruling brand of totalitarianism; only a handful of outstanding figures were jailed.

By April 1933 storm troopers had taken over an abandoned brewery at Sachsenhausen near my family farm north of Berlin. A white-painted sign over the gate read: "Concentration camp of the standard 202 of the SA." Soon two of my farm workers were taken to it for a week's education with rubber truncheons. Gradually the camp filled with inmates, and so did scores of others all over Germany.

In May 1933 I visited with my many Jewish friends during the first feeble boycott, and helped them plan how to get out from under it. On July 15, 1933, my late friend, Hubert Knickerbocker, and Edgar Ansel Mowrer—both courageous American journalists of renown—told me the shocking facts of the "bloody night of Koepenick," in which a score of Social Democrats were murdered by the SA. In Kiel, the police surrendered a prisoner to a lynch mob. The aged former president of the police, von Jagow, commented: "In 84 years this is the first time such a thing has happened in the Prussian police force. It takes decades to build a reliable law-enforcement body, but only a few days to despoil it."

Thus far the atrocities were a domestic concern, but on June 30, 1934, the Hitler gang demonstrated its nature before the

world. In throwing down the supposed revolt of Captain Röhm, an orgy of annihilation of opponents swept Germany. Ex-Chancellor Kurt von Schleicher, his wife, General von Bredow, State Secretary Klausener, Vice Chancellor von Papen's assistant, Edgar J. Jung, and scores of others were slain in gangland style by SS murder detachments. Ex-Chancellor Heinrich Brüning and my friend Minister Gottfried Treviranus, through the courageous aid of British friends, just escaped being shot. Open terror glowered from the eye sockets of the death's head on the caps of the SS. Soon the Germans no longer dared to utter aloud the name "Himmler" or "Heydrich" for fear the sound of the dreaded names might kill. Thousands of doctors, scholars, and other professional men left the country because they were persecuted or had been declared racially, religiously, or politically undesirable. From 1933 to 1937 Hitler gave Germany full employment and recovery, and rearmed it to the teeth, bent all the time on revenge for Versailles and on the conquest of Europe, if not more, consumed by a morbid lust for power and more power.

With the success of domestic recovery, and unlimited rearmament, Hitler was presented with diplomatic success on a platter, first by France and Great Britain, then by Russia. While the Western democracies delivered Czechoslovakia to Hitler, Stalin went one step further and, in cahoots with Hitler, divided Poland and Rumania and gobbled up the Baltic States. This at long last brought appeasement to an end. Molotov and von Ribbentrop ratified this carnivorous deal. The same Mr. Molotov, incidentally, who is still ready, upon occasion, to offer similar deals, though now the conditions are harder.

Hitler then went on the fatal warpath, and ultimately made the same error that Napoleon did—he invaded Soviet Russia, while the United States and Great Britain prepared for the onslaught which led to his doom.

In all the years from 1937 up to this day it has been claimed that all of this perversion of everything Germany had stood for in a long history was accomplished without the slightest civic revolt or even objection. It is no exaggeration to say that even though it has available the most elaborate means of information through radio comment, journals and magazines, and a vast array of news-gathering agencies, the American public still holds the view that all Germans became 100 percent Nazi the moment that Hitler became Chancellor. They have also been led to believe that it was inherently the will of all the people that this hideous system of denying all basic civil rights reflected their innate desire. The popular argument goes that the Nazi system was constructed by the most prominent philosophers and statesmen of Germany, with names like Kant, Fichte, Hegel, Nietzsche, and Bismarck studding the list. Supposedly all their philosophy, their political creed, together with their alleged opportunism, their docility, their servility, and their congenital militarism ended logically in licking with gusto the boots of the tyrant. This theme has been stated in endless variation by the army of ex-post philosophers and the always popular discoverers of the politically obvious truths of yesterday. Only for the German Jews is an exception made, although they, too, by cultural background and centuries of belonging to the German community were in every sense of the word Germans, and for the most part exemplary citizens. On them one bestows by a contemptuous act of grace absolution from German sin by racial exemption. Fortunately enough, the values of human dignity, freedom, and truth—and faithfulness to them do not have any relation to race or color. The lack of knowledge in the American public about the facts of the internal struggle against Hitler does not hurt the Germans, but it hurts us in our foreign policy and our understanding of history.

The truth is, indeed, radically different and much more complex. For many years, particularly so long as the emphasis was upon recovery, and again when it looked like success in war after the unexpected debacle of France, most of the German people went along with a national policy conducted by a totalitarian chancellor with antidemocratic means. There was a time in our own country when Anne Morrow Lindbergh's The Wave of the Future, which took it for granted that it did not make sense to swim against the current, was a best seller.

From the very outset there was a strong opposition to and a real resistance among the Germans against police-state rule in Hitler's regime. As I said before, it was in April 1933 that the Sachsenhausen brewery had been converted into a concentration camp. This evil punitive "educational" institution sprang up in many places all over Germany. The camps were soon overcrowded. Why? Because from the first days there was a determined resistance to the totalitarian state by individuals who could not stomach the arbitrariness and tyranny of the police state.

To resist the all-powerful, ruthless totalitarian police state of the 20th century and its psychiatric shrewdness in breaking man's personality and his will to resist is immeasurably more difficult than the ordinary citizen who has known nothing but government by law can possibly imagine, even now—despite the fact that we know what happened to Cardinal Mindszenty, Robert Vogeler, General Dean, and scores of other sturdy men. If you decided you could not go along with every whim of the Nazi regime, you had, even in the first days of the 12 years of Nazi rule, only two choices: Either you could emigrate or you could stay and resist, passively or actively. I chose the easiest way, emigration, because I was not sure I could stand up under the ordeal of solitary confinement, and I had many good friends in this country, and thus an easy opportunity to go. If the decision was to stay, as most Germans had to, and you were not a moral contortionist, it meant that at any time you might literally have to put your life at stake, without any assurance that anyone would ever know why you disappeared or even how. I question the right of the smart critic and the glib talker to sit in self-righteous judgment on the unfortunate people who were caught in the totalitarian trap. These critics pat themselves on the back, sure they would be quite different from the German people—the perfect heroes, hard as nails, and unflinching defenders of the faith in the face of sure death. Every individual is not a born martyr, whether he is a German, a Russian, a Frenchman, an American, a Jew, or a Gentile. He has an innate urge to survive, even under most excruciating conditions. If he has relatives, dependents, and friends whom his resistance would jeopardize, his urge to survive is intensified manyfold.

The late Gestapo and its sister organizations, the GPU and MVD, or whatever letters this modern corps of assistants to the police state uses for camouflage, are a tough lot, scientifically equipped with the latest electronic devices and the techniques of psychoanalytic and psychosomatic torture. As in any area where totalitarianism takes over, Nazi Germany cast fear into the hearts of its people by the ridiculously simple yet most effective device of inviting anonymous information about others—not only inviting it, but making it a criminal offense not to inform on others—even children on their parents and husbands on their wives.

You may sense from the following sample what it all amounted to. One of my late friends, Secretary of Agriculture Dr. Hans Krüger, had this experience in 1935. The Gestapo notified him to appear before an inspector at headquarters 2 weeks after the date of the citation. When, slightly tattered by the waiting and the worry about the dreaded machine, Krüger appeared before the inspector, he was offered a cigar and requested to be at ease with, "Please relax and feel at home. You have recently been doing some unwise things. Oh, no? Would you like to read a little in your Gestapo file? Here it is—help yourself. No; take all the time you want to examine it; there's no hurry." My friend read and read and sweated blood as he read: here was an account of a private party he had given, attended by only three friends. Pieces of their conversation were on record—dangerous talk—revolt against the criminal regime, actual plans for sabotaging Nazi policies. The inspector signed letters and puffed on his cigar as my friend read. "Please don't feel rushed," he urged. Finally, he told Krüger: "Don't be afraid. We won't arrest you. Just be advised that we are watching you. You'd better go straight. I should deeply regret it if we had to hurt you, particularly since you have a wife and children. Watch your step. So long—have a good time."

All the men who revolted against the immorality of the whole hideous system knew that they were in a scientifically designed and efficiently operated trap. But a very large body of them went right ahead, and became accustomed to the always vigilant eyes and ears of the Gestapo and the presence of informers. It is beyond belief how this changes people who do not possess the strongest of nerves. I had a visit from my aged parents in 1937 in New Jersey. It took me about 10 days to persuade my father, at a lonely spot in the countryside, that it would be safe to have an open word with me about what was going on at home.

You may ask when did the resistance begin to amount to anything, and did it ever succeed in impeding the Nazi regime seriously? Did they perhaps begin to resist only when the jig was up and the American, British, and Soviet armies stood inside Germany? These are certainly legitimate questions, and they cannot be answered simply in a general statement. Yet today we have an almost complete record of what did happen, particularly owing to the fact that the captured documents now housed in Alexandria, Va., comprise most of the Gestapo records. Owing to the German habit of never throwing away a piece of paper with anything written on it, we also have the German police and jail records, and also a vast literature of memoirs. There are more than 340 books dealing with the German resistance against Hitler.

What actually happened reflected anything but a uniform attitude. Some of the most lucid minds had sense enough to realize before Hitler came to power that he was an insane force, possessed of a satanic combination of skills and gifts tied to a morbid personality. They also knew that he had a rare and mystical sort of appeal to the mass mind and a psychopathic clairvoyance. When at Teheran President Roosevelt made a remark about "this fool, Hitler," Stalin quickly countered, "You cannot call this man a fool; anyone who has achieved that much in history is certainly no fool."

The men who had to deal with him first as genuine and legitimate opponents were the core of generals of the army whom Hitler had inherited from the small Reichswehr of the Weimar Republic. They were truly conservative men of advanced years, with combat experience in World War I, who were brought up in the Prussian puritanical spirit. Particularly after the disastrous loss of World War I, they were skeptical observers of political democracy in troubled times, and unquestionably great patriots. Generals

von Hammerstein-Equord, Beck, von Fritsch, von Witzleben, Oster, Carl Heinrich von Stülpnagel, von Brauchitsch, and the chief of the counter intelligence Admiral Canaris, to name only a few—all men of extraordinary stature—had made up their minds about who the sergeant of World War I really was. They saw in him the greatest menace to their country, and in fact to the future of government by law in Europe. They were conscientious men of order. Hitler was to them a mountebank and an illbred brigand. But they did not consider it their task to take over the political leadership. Neither in the United States, Germany, nor England has it been the normal course for the generals and admirals to take over political responsibility from duly appointed civilian cabinet officers who have legitimate authority. Hitler, in turn, knew who his deadliest enemies were, and did not shrink from using the vilest and most vicous methods of intrigue, bribery, and character assassination to get rid of some of them and split the ranks. As the Nuremberg trials have proved, the German general staff was opposed to military adventures. It knew too well the limitations of German military and economic resources. Moreover, it had sense enough to realize that one could probably win battles, but never a war in which the United States and Great Britain would inevitably become involved. They distrusted Hitler on every ground—character, philosophy, maturity of judgment, and even more, political and military intuition. The assassination, underworld style, which Hitler administered to Generals von Schleicher and von Bredow, to Messrs. Klausener and Jung and scores of others was—if anything of that sort was needed—an eyeopener to the general officers. These men knew far more than the public about the cold-blooded gang of killers that had seized the German power of government. The proper question of course is, if they did know so much, why did they not act and remove Hitler? This is one of the most involved problems of the whole exasperating struggle between the resistence and the Hitler regime.

To begin with, these men actually did move all the time to achieve Hitler's elimination from power. But he surrounded himself with his own pretorian guards, the SS and the SD, and packed the Wehrmacht with young officers of his own choosing. Yet the military-resistance leaders joined with civilian protesters, at first particularly those of the conservative wing. Among these men who were willing to resist actively were the former mayor of Leipzig, Dr. Karl Goerdeler, State Secretary Ernst von Weizsäcker, and former Reichsbank president, Hjalmar Schacht. They planned for September 1938 a coup d'etat with troops prepared for the attack on Czechoslovakia. Exactly at that moment British Prime Minister Chamberlain, who had been advised of the conspiracy, told Hitler that he wanted to compromise on Czechoslovakia. On September 29 Hitler's victory at Munich was complete. It supposedly saved the peace but it deprived the generals of that opportunity to execute their coup.

One of the most fateful errors of the generals of the resistance was their failure to prevent the invasion of Poland; at that time they could still have changed the whole course of history. What they did later was to try to stop the extension of the war to the west. They organized a refusal by the top command to order the attack, but two in their ranks refused to commit mutiny. Hitler again had it his way. By that time, however, the political activities of civilian members of the whole conspiracy became stepped up. They negotiated via Norway through intermediaries in London and at the same time sent an emissary, Dr. Adam von Trott zu Solz by air via Gibraltar to Washington, D. C., where he negotiated on behalf of the German resistance with leading political figures, among them Felix Morley, Justice Felix Frankfurter, and a number of diplomats. President Roosevelt, in close contact with London, turned down flat any attempt at negotiating with the German resistance. The same attitude prevailed in London. The leading idea already was: Unconditional surrender and nothing less. On his way back to Germany via Japan and Russia, Dr. von Trott stopped for a day at my home in Palo Alto. I bitterly criticized the leaders of the resistance for their fateful delays and hesitations, and ultimately said to my daring and well-shadowed guest that their failure to stop the attack on Poland would ultimately lead to the total destruction of Germany by the United States and his assassination and that of all his fellow conspirators by Hitler. Von Trott was one of the first to be murdered by Hitler's gang after July 20.

As the war went on, the activities in resistance circles began to coagulate, but this could never grow into a mass movement. All the work had to be underground by small groups of loyal friends. Men from all spheres of life took part. Many ran afoul of Gestapo agents posing as resisters. There were prominent and outstanding figures of labor, among them Dr. Julius Leber, Carlo Mierendorff, Theodor Haubach, and Wilhelm Leuschner in the civilian underground. (Kurt Schumacher had long since disappeared in a concentration camp.) Most powerful resistance centers were the Catholic and Protestant churches. Cardinals Faulhaber of Munich, Count von Galen of Münster, and Count von Preysing of Berlin fearlessly fought a running battle against the heathen creed, its racialism and inhuman traits, the killing of the insane, and the perversion of charity. They protected Jewish refugees and succeeded in saving a considerable number of them. Members of the confessional synod fought a pitched battle under the leadership of Pastors Niemoeller, Bonhoeffer, Lilje, Dibelius, Gerstenmaier, and a large number of outstanding laymen. The handful of Seventh Day Adventists were indomitable opponents, and marched into the concentration camps. Other small sects also had resistance cells. Diplomats Otto Kiep, Von Hassel, Von Trott, Von Weizsnaecker, Count Bernstorff, and Count von der Schulenburg were joined by agricultural leaders in all parts of Germany, by industrialists, mayors, administrators, and professors—particularly of the social sciences.

One of the most powerful spiritual centers of the resistance was the so-called Kreisau-circle under the leadership of Count Helmut James von Moltke. This circle did not work for the violent overthrow of the Hitler regime, but prepared spiritually and intellectually for the days to come after his downfall. This went so far that preparations were made for the structure of a new government and democratic representation of the people; a new constitution was written for a truly free society and government by law; and a roster of future political leaders and cabinet members was kept. The circle and their friends also prepared for bringing the Nazi leaders to trial in court for their crimes.

The philosophy of this circle offers the key to the thought of the Bonn government today. These men refused to interfere with the disaster which they saw coming, because they believed it vital for the restoration of a decent society that this time the wicked course of a ruthless power policy come to its logical end. They wanted no new legend about a betrayal of victory—certainly a momentous decision in view of the enormous disaster it involved. But these people felt that the scope of the catastrophe was no greater than was the disgrace and depravity which the Anti-Christ and his cohorts had brought upon the Germans in the West.

Aside from this circle, however, were increasing numbers of men, particularly among high-ranking officers of the Army, who believed that to prevent the total destruction of the country it was necessary to eliminate Hitler and his lieutenants. This conviction was deepened by the clear realization that Hitler, in his craze, was forcing these professional soldiers to commit more and more crimes against the rules of warfare and valid German and international law. Leaders of this group, aside from General Beck, were military leaders in the headquarters of Army group central inside Russia, men in the command in Paris, and in the Wehrmacht command in Berlin.

On March 13, 1943, Colonel von Schlabrendorff placed a time bomb in Hitler's plane. Despite several months of careful preparation, and hundreds of trials with the type of bomb selected for use, the mechanism failed in practice. General von Gersdorff carried in his overcoat pockets two time bombs in order to blast Hitler and himself to bits, but Hitler left the meeting a few minutes before the bombs were due to explode. In the winter of 1943–44 some officers met with Hitler to display new uniforms, and brought along dynamite with which to kill him. An air raid interrupted the whole demonstration. In December 1943 Count Stauffenberg manipulated a bomb through the guards of Hitler's headquarters on an occasion when Hitler was expected for a conference, but Hitler canceled his appointment. All told, 10 separate attempts to kill Hitler were made before the portentous final one.

Finally, on July 20, 1944, Count Stauffenberg placed a bomb in a satchel beside Hitler's desk in his East Prussian field headquarters, "Wolfschanze," and the wooden shack blew up, wounding Hitler, but not killing him. The whole plot succeeded in Paris, and to some extent also in Berlin, where troop units went into action, but it succumbed to successful counteraction from Hitler's headquarters, and Hitler immediately began to liquidate the opponents who had revealed themselves.

From July 20 black terror raged throughout Germany and in all the German-occupied areas, just as the red terror gripped Soviet Russia after the attempt on Lenin's life. It reigned savagely for almost 10 fateful months, spurred by Hitler, the cornered power maniac, who now, in his doom, did what he had told Hindenburg he wanted to do. The Gestapo rounded up all known conspirators and by torturing the captives, brought many others to light. Until the very end, with foreign armies in Berlin, the assassinations went on. All of the men were tortured, and after drumhead trials by the notorious people's court, were condemned to die. In a large number of cases concerning his most illustrious enemies, Hitler insisted on having the victims tortured to death gradually rather than summarily executed. Our Army captured the motion pictures he ordered taken of these nauseating scenes and at which he gazed during the final days in his bunker in Berlin.

This macabre business actually blotted out the main body of what one correctly can call the finest flower of the German nation that had resisted the tyrant and belonged to the leadership of Christendom. During the years 1933 to 1944 approximately 32,500 Germans were executed by so-called court procedure, not counting the vast number of victims who perished in concentration camps. Up to 1939 more than 1 million Germans had been sent to concentration camps; 300,000 of them were camp inmates in that year. The war cost the Germans, a nation of 67 million, 3½ million soldiers and 500,000 civilians, but the assassination of the elite was definitely the greatest loss of all.

The groups that composed the resistance and their members who were assassinated are too numerous to mention here. But they included also many brave German women and young people. The student circle, the White Rose, shook all of Munich into open revolt. Its leading members were executed. The Edelweiss circle in Hamburg was just as active and equally gallant.

In conclusion, we may say that there was considerable and morally very strong resistance against Hitler composed of extremely courageous men and women. These martyrs failed in their attempt to change the course of events by overthrowing the regime. But stating this means to misinterpret and ignore their real, tragic, yet glorious role in history. Their situation was tragic; no matter how they acted, they could not avoid violating their own code of values. They had to tackle a satanic personality who was one of the evil geniuses of history, holding in his hands more power than any other individual—a ruthless killer. On their freely chosen road to martyrdom, with the supreme sacrifice always before their eyes, they rose to a rare level of humaneness, and quite a number of them died as saints. The letters they wrote in their dungeon cells are part of the finest treasure of western civilization. What these people really achieved was the greatest victory man can ever win. July 20, 1944, was Germany's darkest day in history—and at the same time its brightest.

What an apocalyptic scene it was on that day, 10 years ago, in one of the enlightened and leading countries of the west: Total agony and disaster everywhere. Cities founded in Julius Caesar's time in smoking ruins. Mass suicide and murder at every hand. As in Biblical days God shook creation and a wicked man and his regime, meant to last for a thousand years, fell, while he was busy murdering his nation's elite. But in the darkness of the dungeon cell the light of goodness to man was shining, and human dignity and respect for the truth stood reaffirmed. The rebirth of the doomed nation began right there. And the martyrs knew that this was what they were dying for. The last words of one of them, Count Michael Matuschka, were, "What grace of God to be hanged for the honor of one's country on the day the cross is being raised."

The illustrious group of men and women who died for the cause of freedom are missed today in a thousand places. This is one of the great weaknesses in Germany and in Europe. But by the grace of God a small proportion of the martyred elite survived. The rain of bombs and fire that raged through Germany during the final phase of the war created such disorder that the systematic murder system of Hitler's henchmen was in some cases thrown out of gear. Soviet forces and American and British troops freed some of the victims awaiting execution. Today they are the ones who set the tune of politics and law and public morale in the Republic of Germany.

It is our good fortune that they do. But it also lays upon the statesmen of the other western nations the great responsibility of making up for the tragic failure to cooperate with those who became the victims of Hitler's revenge, and with members of the resistance who survived. These people especially merit the assistance of the western world in their efforts to build a better Europe. All who are gathered here to honor the memory of those martyrs have the duty and the privilege of spreading the truth about their struggle and to learn more about it ourselves.

My thoughts go in profound respect and sympathy to the many friends I lost on July 20 and to the widows of all the slain men who shared their struggle and ordeal and guard their spiritual estate.

One of the doomed conspirators against Hitler, Pastor Dietrich Bonhoeffer, observed in *Stations on the Road to Freedom*, which he wrote in prison:

"Not in following will, but in doing and daring of justice,
Not in possible deeds, but in real ones bravely attempted,
Not in the flight of thought, but only in action, is freedom.
Up and out of your hesitant fear into storms of occurrence,
Only supported by God's command and the faith that is in you!
Freedom then shall receive your spirit with jubilant welcome."

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. LANE and to include extraneous material.

Mr. HESS.

Mr. MCDONOUGH and to include an article.

Mr. WOLVERTON and to include extraneous material.

Mr. O'NEILL in two instances and to include extraneous material.

Mr. ROONEY, the remarks he made in Committee of the Whole and to include extraneous matter.

Mr. MILLER of Kansas and to include extraneous material.

Mr. WIGGLESWORTH to revise and extend the remarks he made in the Committee of the Whole today and include extraneous matter.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. GRANT (at the request of Mr. RAINS), for an indefinite time, on account of death of his mother.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 130. An act to amend section 1 of the act approved June 27, 1947 (61 Stat. 189);

H. R. 5185. An act for the relief of Klyce Motors, Inc.;

H. R. 6786. An act authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho;

H. R. 7466. An act to authorize the Secretary of the Interior to execute an amendatory repayment contract with the Pine River Irrigation District, Colorado, and for other purposes;

H. R. 8026. An act to provide for transfer of title to movable property to irrigation or water users' organizations under the Federal reclamation laws;

H. R. 8983. An act to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla.;

H. R. 9005. An act to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177).

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 1381. An act to amend the Agricultural Act of 1949;

S. 2367. An act to amend the act of June 29, 1935 (the Bankhead-Jones Act), as amended, to strengthen the conduct of research of the Department of Agriculture;

S. 2583. An act to indemnify against loss all persons whose swine were destroyed in July 1952 as a result of having been infected with or exposed to the contagious disease vesicular exanthema;

S. 2766. An act to amend section 7 (d) of the Internal Security Act of 1950, as amended;

S. 2786. An act granting the consent and approval of Congress to the Southeastern Interstate Forest Fire Protection Compact;

S. 3561. An act authorizing the Administrator of Veterans' Affairs to convey certain property to the armory board, State of Utah;

S. 3630. An act to permit the city of Philadelphia to further develop the Hog Island tract as an air, rail, and marine terminal by directing the Secretary of Commerce to release the city of Philadelphia from the fulfillment of certain conditions contained in the existing deed which restricts further development; and

S. J. Res. 96. Joint resolution to strengthen the foreign relations of the United States by establishing a Commission on Governmental Use of International Telecommunications.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on July 19, 1954, present to the President, for his approval, bills of the House of the following titles:

H. R. 2617. An act for the relief of Guillermo Morales Chacon;

H. R. 2846. An act authorizing the President to exercise certain powers conferred upon him by the Hawaiian Organic Act in respect of certain property ceded to the United States by the Republic of Hawaii, notwithstanding the acts of August 5, 1939, and June 16, 1949, or other acts of Congress;

H. R. 4928. An act to authorize the Secretary of Agriculture to convey a certain parcel of land to the city of Clifton, N. J.;

H. R. 6263. An act to authorize the Secretary of Agriculture to convey certain lands

in Alaska to the Rotary Club of Ketchikan, Alaska;

H. R. 6882. An act to amend the act of September 27, 1950, relating to construction of the Vermejo reclamation project;

H. R. 6975. An act authorizing the Secretary of the Interior to convey certain lands to the Siskiyou Joint Union High School District, Siskiyou County, Calif.;

H. R. 7012. An act for the relief of Nicole Goldman;

H. R. 8549. An act granting the consent of Congress to The Breaks Interstate Park Compact;

H. R. 8713. An act to amend section 1 (d) of the Helium Act (50 U. S. C., sec. 161 (d)), and to repeal section 3 (13) of the act entitled "An act to amend or repeal certain Government property laws, and for other purposes," approved October 31, 1951 (65 Stat. 701);

H. R. 9242. An act to authorize certain construction at military and naval installations and for the Alaska Communications System, and for other purposes;

H. R. 9006. An act to authorize the Secretary of the Army to donate 28 paintings to the Australian War Memorial.

ADJOURNMENT

Mr. HALLECK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 22 minutes p. m.) the House adjourned until tomorrow, Wednesday, July 21, 1954, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1755. A letter from the Assistant Secretary of State, transmitting a translation of note No. 3083, dated July 2, 1954, from His Excellency the Ambassador of Mexico, Senor Don Manuel Tello, expressing deep appreciation of the Government and people of Mexico for the assistance given during the recent floods along the Rio Grande; to the Committee on Foreign Affairs.

1756. A letter from the Archivist of the United States, transmitting a report on records proposed for disposal and lists or schedules covering records proposed for disposal by certain Government agencies; to the Committee on House Administration.

1757. A letter from the Administrative Assistant Secretary, Department of Agriculture, transmitting a report of claims paid for the period July 1, 1953, to June 30, 1954, pursuant to the Federal Tort Claims Act as reenacted (28 U. S. C. 2671–2680); to the Committee on the Judiciary.

1758. A letter from the Secretary of Commerce, transmitting copies of proposed legislation entitled "A bill to authorize the President to place Paul A. Smith, a commissioned officer of the Coast and Geodetic Survey, on the retired list, in the grade of rear admiral (lower half) in the Coast and Geodetic Survey, at the time of his retirement, with entitlement to all benefits pertaining to any officer retired in such grade; to the Committee on Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOPE: Committee of conference. H. R. 6788. A bill to authorize the Secretary of Agriculture to cooperate with States and local agencies in the planning and carrying out of works of improvement for soil conservation, and for other purposes (Rept. No. 2297). Ordered to be printed.

Mr. TOLLEFSON: Committee of conference. House Joint Resolution 534. Joint resolution to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels and for other purposes (Rept. No. 2298). Ordered to be printed.

Mr. FORRESTER: Committee on the Judiciary. H. R. 6427. A bill for the relief of the State of North Carolina; with amendment (Rept. No. 2299). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONAS of Illinois: Committee on the Judiciary. H. R. 9740. A bill to provide for the relief of certain Army and Air Force nurses, and for other purposes; without amendment (Rept. No. 2300). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. S. 2027. An act authorizing the Secretary of the Interior to issue quitclaim deeds to the States for certain lands; without amendment (Rept. No. 2315). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. S. 3302. An act granting to the Las Vegas Valley water district, a public corporation organized under the laws of the State of Nevada, certain public lands of the United States in the State of Nevada; with amendment (Rept. No. 2316). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. S. 3699. An act granting the consent of Congress to a compact entered into by the States of Louisiana and Texas and relating to the waters of the Sabine River; without amendment (Rept. No. 2317). Referred to the Committee of the Whole House on the State of the Union.

Mr. COLE of Missouri: Committee on Post Office and Civil Service. H. R. 7785. A bill to amend the Civil Service Retirement Act of May 29, 1930, to make permanent the increases in regular annuities provided by the act of July 16, 1952, and to extend such increases to additional annuities purchased by voluntary contributions; with amendment (Rept. No. 2318). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 8365. A bill to confirm the authority of the Secretary of the Interior to issue patents in fee to allotments of lands of the Mission Indians in the State of California prior to the expiration of the trust period specified in the act of January 12, 1891, as amended; without amendment (Rept. No. 2319). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 8821. A bill to authorize the exchange of lands acquired by the United States for the Catoctin recreational demonstration area, Frederick County, Md., for the purpose of consolidating Federal holdings therein; without amendment (Rept. No. 2320). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 9679. A bill granting the consent of Congress to a compact entered into by the States of Louisiana and Texas and relating to the waters of the Sabine River; without amendment (Rept. No. 2321). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 9821. A bill to amend titles 18 and 28 of the United States Code; with amendment (Rept. No. 2322). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 9751. A bill to authorize the Secretary of the Interior to sell and convey certain Parker-Davis transmission facilities and related property in the States of Arizona and California, and for other purposes; with amendment (Rept. No. 2325). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. S. 3506. An act to repeal the act approved September 25, 1914, and to amend the act approved June 12, 1934, both relating to alley dwellings in the District of Columbia; with amendment (Rept. No. 2326). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ST. GEORGE: Committee on Post Office and Civil Service. S. 1244. An act relating to the renewal of star-route and screen vehicle service contracts; without amendment (Rept. No. 2327). Referred to the Committee of the Whole House on the State of the Union.

Mr. KEARNS: Committee on the District of Columbia. S. 1585. An act to amend the District of Columbia Traffic Act, 1925, as amended; without amendment (Rept. No. 2328). Referred to the Committee of the Whole House on the State of the Union.

Mr. TOLLEFSON: Committee on Merchant Marine and Fisheries. S. 3233. An act to amend the Merchant Marine Act, 1936, to provide permanent legislation for the transportation of a substantial portion of waterborne cargoes in United States-flag vessels; with amendment (Rept. No. 2329). Referred to the Committee of the Whole House on the State of the Union.

Mr. KEARNS: Committee on the District of Columbia. S. 3329. An act to amend the District of Columbia Police and Firemen's Salary Act of 1953 to correct certain inequities; with amendment (Rept. No. 2330). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. S. 3518. An act to amend the laws relating to fees charged for services rendered by the office of the Recorder of Deeds for the District of Columbia and the laws relating to appointment of personnel in such office, and for other purposes; without amendment (Rept. No. 2331). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. S. 3655. An act to provide that the Metropolitan Police force shall keep arrest books which are open to public inspection; without amendment (Rept. No. 2332). Referred to the Committee of the Whole House on the State of the Union.

Mr. TALLE: Committee on the District of Columbia. S. 3683. An act to amend the District of Columbia Credit Unions Act; with amendment (Rept. No. 2333). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ST. GEORGE: Committee on Post Office and Civil Service. H. R. 5718. A bill to limit the period for collection by the United States of compensation received by officers and employees in violation of the dual compensation laws; without amendment (Rept. No. 2334). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 6127. A bill

to amend the act entitled "An act to create a Board for the Condemnation of Insanitary Buildings in the District of Columbia, and for other purposes," approved May 1, 1906, as amended, and for other purposes, with amendment (Rept. No. 2335). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 7484. A bill to authorize the United States Attorney for the District of Columbia to make the determination in proper cases whether prosecution of certain juveniles, charged with capital offenses, those punishable by life imprisonment and other felonies, shall be tried in the Juvenile Court of the District of Columbia; without amendment (Rept. No. 2336). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 7670. A bill relating to the referral of cases by the Municipal Court for the District of Columbia to the District of Columbia Tax Court; without amendment (Rept. No. 2337). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 8915. A bill to amend the act entitled "An act to consolidate the Police Court of the District of Columbia and the Municipal Court of the District of Columbia, to be known as 'The Municipal Court of Appeals for the District of Columbia,' and for other purposes"; with amendment (Rept. No. 2338). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 9194. A bill to provide for the conveyance of certain land owned by the Federal Government near Vicksburg, Miss., to Vicksburg, Miss.; with amendment (Rept. No. 2339). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 8590. A bill to amend title IX of the District of Columbia Revenue Act of 1937, as amended; without amendment (Rept. No. 2340). Referred to the Committee of the Whole House on the State of the Union.

Mr. SIMPSON of Illinois: Committee on the District of Columbia. House Joint Resolution 560. Joint resolution to authorize the Commissioners of the District of Columbia to promulgate special regulations for the period of the American Legion National Convention of 1954, to authorize the granting of certain permits to the American Legion 1954 Convention Corp. on the occasion of such convention, and for other purposes; without amendment (Rept. No. 2341). Referred to the Committee of the Whole House on the State of the Union.

Mr. SIMPSON of Illinois: Committee on the District of Columbia. House Joint Resolution 561. Joint resolution to authorize the quartering in public buildings in the District of Columbia of troops participating in activities related to the American Legion National Convention of 1954; with amendment (Rept. No. 2342). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 8128. A bill to modify the requirement for an oath in certain cases in attachment proceedings in the District of Columbia; with amendment (Rept. No. 2343). Referred to the House Calendar.

Mr. O'HARA of Minnesota: Committee on the District of Columbia. H. R. 9882. A bill to incorporate the Foundation of the Federal Bar Association; with amendment (Rept. No. 2344). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 650. Resolution for consideration of H. R. 9666. A bill to amend section 1001, paragraph 412, of the Tariff Act of 1930, with respect to hardboard; without amendment (Rept. No. 2345). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 651. Resolution for consideration of H. R. 9785. A bill to provide a method for compensating claims for damages sustained as the result of the explosions at Texas City, Tex.; without amendment (Rept. No. 2346). Referred to the House Calendar.

Mr. KEATING: Committee on the Judiciary. H. R. 3534. A bill to authorize the extension of patents covering inventions whose practice was prevented or curtailed during certain emergency periods by service of the patent owner in the Armed Forces or by production controls; with amendment (Rept. No. 2347). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1108. By Mr. KING of California: Petition of the Board of Supervisors of the County of Los Angeles opposing enactment of S. 1555, H. R. 4449, S. 964, and H. R. 236 or similar legislation pending in the Congress of the United States pertaining to Colorado River water; to the Committee on Interior and Insular Affairs.

1109. By Mr. WILLIAMS of New York: Petition of Miss Anna M. Sweet and others, favoring the Bryson bill, H. R. 1227; to the Committee on Interstate and Foreign Commerce.

1110. Also, petition of a group of citizens from Ilion, N. Y., favoring the Bryson bill, H. R. 1227; to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

Opinion Poll Report for the 11th Congressional District of Massachusetts

EXTENSION OF REMARKS

OF

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 20, 1954

Mr. O'NEILL. Mr. Speaker, I am more than happy at this time to place in the CONGRESSIONAL RECORD the tabulated results of a questionnaire which I sent early this spring to the residents of the district which I represent here in the House of Representatives.

My objectives in sponsoring this referendum were threefold:

First. To promote responsible citizenship by stimulating the widest possible discussion and understanding of major legislative issues of current concern;

Second. To determine in broad terms, for my own benefit, the attitudes and opinions of my constituents on these issues; and

Third. To enable me to present to Congress, for its consideration, the views of an important segment of the voting population.

The number of responses which I have received has been most gratifying, and I am proud of the active, aroused public interest in governmental affairs which has been displayed.

FOREIGN POLICY

1. Do you approve of the present method of handling our international relations? Yes, 1,761; no, 2,537; no opinion, 754.

2. Do you believe that the United States Government should continue our foreign-aid program? Yes, 3,094; no, 1,605; no opinion, 635.

3. Do you feel that we should continue military aid to foreign nations? Yes, 3,378; no, 1,122; no opinion, 734.

4. Do you favor the continuation of economic aid to foreign nations? Yes, 3,162; no, 1,360; no opinion, 712.

5. Do you support the point 4 program (supplying technical assistance, manufacturing know-how, and management skills to undeveloped nations to help them help themselves)? Yes, 3,235; no, 530; no opinion, 979.

(a) Do you believe this program should be reduced? Yes, 510; no, 1,413; no opinion, 1,048.

6. Do you believe that Russia should be permitted to remain in the United Nations? Yes, 2,274; no, 2,110; no opinion, 850.

7. Do you believe that Communist China should be seated in the United Nations? Yes, 723; no, 3,907; no opinion, 604.

TARIFF POLICY

1. Do you suport the present methods of handling tariffs? Yes, 902; no, 2,021; no opinion, 2,311.

2. Do you believe that foreign goods should come into the United States regardless of the effect that it may have on the American worker? Yes, 743; no, 3,538; no opinion, 953.

3. Do you understand the present Government method of handling tariffs? Yes, 1,714; no, 2,124; no opinion, 1,396.

STATEHOOD

1. Do you favor conferring statehood on—

(a) Alaska? Yes, 3,810; no, 1,676; no opinion, 689.

(b) Hawaii? Yes, 3,830; no, 694; no opinion, 710.

TAX POLICY

1. Do you believe that the Federal Government should spend more money than it receives in income? Yes, 1,685; no, 2,693; no opinion, 856.

If opposed, which of these steps would you take?

(a) Keep taxes high? Yes, 1,240; no, 1,430; no opinion, 2,564.

(b) Cut domestic spending? Yes, 1,940; no, 983; no opinion, 2,157.

2. Do you feel taxes should be cut more than they already have been? Yes, 1,796; no, 1,940; no opinion, 1,498.

3. Do you support an increase in the exemption for dependents? Yes, 2,881; no, 1,598; no opinion, 855.

4. Do you favor cutting income taxes across the board percentagewise? Yes, 1,586; no, 2,540; no opinion, 1,077.

5. Do you believe in more exemption for dividends and other unearned income? Yes, 1,208; no, 2,339; no opinion, 1,087.

6. Do you support exemptions to cover expenses for college education? Yes, 2,581; no, 1,956; no opinion, 697.

7. Do you favor an exemption for the first $1,500 of retired income? Yes, 2,568; no, 1,744; no opinion, 922.

SOCIAL SECURITY, HEALTH, AND WELFARE

1. Do you believe that the present 2 percent social security tax on the employee should be maintained? Yes, 3,551; no, 839; no opinion, 844.

2. Do you believe it should be returned to 1½ percent? Yes, 807; no, 3,174; no opinion, 1,260.

3. Do you support an increase in old-age assistance benefits? Yes, 3,608; no, 764; no opinion, 762.

4. Do you favor an increase in the death benefits under social security? Yes, 2,986; no, 1,435; no opinion, 1,148.

5. Do you believe that hospitalization, sickness and accident insurance should be covered by Federal law? Yes, 1,825; no, 2,527; no opinion, 882.

HOUSING

1. Do you believe that more low-cost housing should be built by the State and Federal governments? Yes, 2,906; no, 1,631; no opinion, 697.

2. Do you believe these should be multiple-unit dwellings? Yes, 992; no, 1,878; no opinion, 1,547.

3. Do you believe they should be in three-family units? Yes, 1,074; no, 1,758; no opinion, 1,585.

LABOR

1. Are you in favor of raising the minimum wage? Yes, 3,183; no, 1,283; no opinion, 768.

2. Do you feel this would be helpful to New England insofar as competing with the Southern States is concerned? Yes, 2,428; no, 1,442; no opinion, 1,364.

3. In your opinion could small business afford an increase? Yes, 2,198; no, 1,310; no opinion, 1,726.

4. Do you believe that the Taft-Hartley Act is fair to management and labor? Yes, 1,506; no, 1,755; no opinion, 1,156.

(a) Would you favor outright repeal? Yes, 762; no, 2,902; no opinion, 1,570.

(b) Would you favor changes through amendments? Yes, 2,986; no, 698; no opinion, 1,550.

5. Are there sections of this law which you feel are oppressive to workers? Yes, 2,332; no, 1,374; no opinion, 1,528.

6. Are there in your opinion, sections which are oppressive to small business? Yes, 1,805; no, 1,342; no opinion, 2,187.

ST. LAWRENCE SEAWAY

1. Do you understand the questions involved in the St. Lawrence Seaway? Yes, 2,584; no, 1,341; no opinion, 1,309.

2. Do you feel that the construction of the seaway would hurt employment in our area? Yes, 1,481; no, 2,022; no opinion, 1,731.

3. Do you believe the St. Lawrence Seaway would hurt the future economy of the New England area? Yes, 1,591; no 1,876; no opinion, 1,767.

VOTING AGE

1. Do you believe that persons who are 18 years old should be given the right to vote in national elections? Yes, 1,897; no, 2,832; no opinion, 505.

LOCAL ISSUES

1. Do you believe that the port of Boston should have more Federal assistance? Yes, 3,362; no, 715; no opinion, 1,157.

2. In your opinion, is the Federal Government treating New England fairly on the policy of defense cutbacks? Yes, 809; no, 2,399; no opinion, 2,026.

No Seating of Red China in U. N.

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 20, 1954

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include my statement registering my approval of House Joint Resolution 627, reiterating the opposition of the United States House of Representatives to the seating of the Communist regime in China in the United Nations:

NONE FOR, IS HOUSE SCORE ON ADMISSION OF RED CHINA TO THE U. N.

to wit:

Red China thumbed its nose against the United Nations when it invaded Korea.

Red China was indicted as an aggressor.

It still is.

Far from repenting or making amends the Chinese Communists continued their aggression against another neighbor, Indochina. At the beginning, an effort was made to represent this as a revolution within Indochina. That pretense has now been junked. It is the Chinese Communist leaders who will decide the fate of that country.

Aggression, plus aggression, compounded by insolence that demands complete surrender by the United Nations.

Will the British never learn?

The pattern that led to World War II is being repeated, but the British and other wishful nations, are making the same old blunders.

The rationalizing process is in full swing.

The bait of trade and the illusion of coexistence are being used to gloss over realities.

The U. N. as constituted has no legal or military authority to protect the peace.

Only as it speaks up bravely and resolutely for moral principles in the settlement of international disputes will it have any meaning or prestige.

When morality is abandoned nothing is left.

The United Nations will become as lifeless as the old League of Nations if it fails to take a stand now.

Appeasement is still appeasement, no matter how it is disguised.

The Communists are amused and are emboldened by this servile weakness on the part of once-great nations.

Cowardly concessions only win Red contempt.

If the U. N. gives in now it is gone.

There is not much time left to provide it with backbone.

Americans believe in fair play. When the chips are down they will, as they have always done, speak up unafraid for what is right and just.

They did so last week.

The United States House of Representatives by a unanimous vote of those present, 385 to 0, served notice on the world that the American people are completely and vigorously opposed to the admission of the defiant aggressor, Red China, into the family of nations.

Nothing in my experience as a Congressman gave me a greater thrill than that resounding rejection of those who think that right and wrong are interchangeable, who would ape communism by putting expediency above eternal truths.

The conscience of America spoke in that vote.

It told of a retreat that was over, of a counterattack that has just begun. Time and again we have made concessions hoping that Communist Russia and Communist China would learn to mend their ways, so that they could be genuinely accepted into the family of nations on a basis of mutual trust that would never betray the peace.

That day is done.

The Red record is one long list of betrayals.

The time has come when the Reds must purge themselves of their aggressions first before they can ever hope for admission into the society of law-abiding nations.

The United States, speaking for all who believe in liberty and justice, has made a clear and irrevocable decision.

Red China will never be admitted to the U. N. until it makes restitution for the crimes it has committed against the peace of the world.

Los Angeles Keeps Right On Growing and Expanding

EXTENSION OF REMARKS

OF

HON. GORDON L. McDONOUGH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 20, 1954

Mr. McDONOUGH. Mr. Speaker, the city of Los Angeles with its numerous suburbs, suburbs which are cities of many thousands in their own right, originated in and spread over the Los Angeles Basin, an extensive area stretching from the sea over lowland areas to gentle rising slopes which suddenly plunge upward to the sky forming a magnificent background of lofty mountains rising to a height of 10,000 feet above the sea.

Modern roads climb the mountainous terrain back of the city affording birds-eye views that are spectacular and brilliant. Viewed from a high vantage point the city stretches for miles in every direction and to the very edge of the blue Pacific itself.

Looking across this vast metropolis, it is difficult to realize that the first expedition of white men to visit this area arrived in 1769. The area was described at that time as a "very spacious valley, well grown with cottonwoods and sycamores, among which ran a beautiful river."

Los Angeles was settled with 44 colonists in 1781, just a scant 171 years ago, and named El Pueblo de Nuestra Senora la Reina de Los Angeles de Porciuncula.

By 1790 the name was shortened to Los Angeles, and the population had increased to 139.

Originally under the Spanish standard, Los Angeles later became part of Mexico, and in 1847 when Mexico surrendered the territory of California to the United States, Los Angeles was the capital and chief metropolis of the territory with a population of 5,000. In that year San Francisco, known as Yerba Buena, was only a tiny mud pueblo.

With the discovery of the first nugget in northern California, the gold rush was on, and the growth of Los Angeles halted, but this was only a temporary set-back. For Los Angeles had a glorious destiny to fulfill and would not be denied.

By 1890 the population of Los Angeles had swelled to 50,000. In the next 10 years, at the turn of the century, it reached 102,000. Ten more years saw the population reach over 300,000 as Los Angeles became the 16th largest city in the United States.

Today more than 7 million people live in the "economic sphere" of the Los Angeles area, and the latest figures resulting from a special census of September 1953, place the population of Los Angeles at 2,104,663.

The following summary of the economic sphere of the Los Angeles area, and the city's growth, clearly outlines the important part Los Angeles has in the economy of the State of California and of the Nation:

MORE THAN 7 MILLION PERSONS IN THE LOS ANGELES AREA'S ECONOMIC SPHERE

California has 2 of the 10 largest centers of population and business volume in the United States. With respect to most of the important measures of economic size, the Los Angeles metropolitan area ranks third in the Nation and the San Francisco-Oakland metropolitan area ranks sixth.

The economic life of the southern portion of the State naturally tends to center around the Los Angeles area, and the northern portion around the San Francisco area—although there are a number of other communities such as San Diego, Fresno, San Jose, Sacramento, Bakersfield, and Santa Barbara which constitute large consuming markets and which are substantial centers of production and distribution in their own right.

For many years there has been recurrent discussion as to the extent and bounds of the territory which is in the Los Angeles economic sphere. What are the limits of the territory which can be served more economically and more advantageously from the Los Angeles area than from the San Francisco area? In marketing their agricultural, mineral, and factory production, which communities are oriented more toward the southern metropolis and which toward the northern center? What, in brief, are the geographic boundaries of the territory in which the Los Angeles area has a greater economic stake than her sister metropolis to the north?

Over the years, these and related questions have been considered by sales managers, economists, market research analysts, and others. The answers reached have not always been in agreement. This has been due in part to the fact that for many years the extent of the Los Angeles economic sphere has been gradually expanding. And, in any locality, it takes time for changes in the economic environment to alter business relationships and ties which have had a long historical basis.

San Francisco was a large city when Los Angeles was still a small town. In 1870, for example, the Bay City's population was 149,473 as compared with 5,728 for Los Angeles. Over the decades, rapid growth continued in both areas, but particularly in the south. The Los Angeles area eventually moved into the lead in population and in volume of business—and has continued to extend that lead.

According to estimates by the State department of finance, the population of the Los Angeles metropolitan area on July 1, 1953, was 4,485,900—double the total of 2,450,700 for the San Francisco-Oakland metropolitan area.

The United States Bureau of the Census has conducted 84 special population counts in the southern half of California since the nationwide census of April 1, 1950.

All of these special censuses have been at the request and at the expense of the communities involved. They have been prompted principally by the desire of the various communities to obtain more current—and hence larger—official population figures to be used in connection with the distribution of State gasoline tax funds.

	Date of latest special census	Apr. 1, 1950, census	Special census	Percent change
Los Angeles County:				
Alhambra	Sept. 25, 1953	51,359	53,558	+4.3
Burbank	June 25, 1953	78,577	88,043	+12.0
Claremont	Apr. 15, 1953	6,327	7,814	+23.5
Covina	Apr. 28, 1953	3,956	6,452	+63.1

Torrence	Nov. 4, 1953	22,241	44,914	+101.9

Health Reinsurance

EXTENSION OF REMARKS
OF
HON. CHARLES A. WOLVERTON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 20, 1954

Mr. WOLVERTON. Mr. Speaker, the following is a notice I have issued as chairman of the Committee on Interstate and Foreign Commerce with reference to further hearings to be conducted by the committee on the subject of Health Reinsurance, as provided for in H. R. 8356.

It reads as follows:

HEALTH REINSURANCE

Representative CHARLES A. WOLVERTON, Republican, of New Jersey, chairman of the House Committee on Interstate and Foreign Commerce, announced today that the committee would meet in executive session next Tuesday, July 20, to consider H. R. 8356, the health-reinsurance bill, which the committee had previously reported out and recommended for passage, but which the House last Tuesday recommitted to the committee. Chairman WOLVERTON said:

"I am bringing the matter before the committee in accordance with the vote of the House that further consideration be given to the bill by the committee.

"In accordance with these instructions, the meeting will be held to consider any amendments that anyone may wish to offer. I am hopeful that the American Medical Association will avail itself of this opportunity to present any amendments it may wish the committee to consider. This opportunity has been repeatedly extended to the AMA since January 28, 1954.

"On that date, in introducing Dr. Walter B. Martin, president-elect of the American Medical Association, who was testifying in our health inquiry, I said:

" 'It has seemed to me, however, that no one should be in better position to set forth for us a concrete proposal of just what can be done to provide a real and adequate protection against these costs than the medical profession itself, as represented in its official organization, the American Medical Association. This is an association of men who have dedicated their lives to the mitigation of human suffering—men devoted to making available the best of medical care to all of our people, regardless of their economic status.

" 'We, therefore, confidently look to them to come forward with a constructive program to meet this problem, one of the greatest facing us today.'

"Neither at that time nor at any time thereafter, including the appearance on April 5, 1954, of Dr. David B. Allman, chairman of the association's committee on legislation, to testify on this bill, have any representatives of the association come forward with one constructive idea or proposal for meeting this serious and important problem facing our American people today.

"It is amazing that the association's opposition is predicated entirely on questions which it raises in the insurance field. The association in no way whatsoever opposes the bill on any medical grounds or on any suggested interference with the practice of medicine or anything having to do whatsoever with the field in which the association's members are engaged.

"In connection with this committee meeting on Tuesday, I want to emphasize my complete agreement with President Eisenhower's statement that he did not consider that anyone lost by the House action last Tuesday except the American people, but that it was only a temporary defeat."

Compact Relating to Higher Education and Establishment of New England Board of Higher Education

EXTENSION OF REMARKS
OF
HON. THOMAS P. O'NEILL, JR.
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 20, 1954

Mr. O'NEILL. Mr. Speaker, I would like to comment for a moment on the bill H. R. 9712, presently pending before the House Committee on Education and Labor, having to do with the Congress granting certain New England States the privilege to enter into a compact relating to higher education and the establishment of a New England Board of Higher Education.

In this connection, I would like at this time to express my great appreciation to one of my former colleagues in the Massachusetts Legislature, Wilfred S. Mirsky, of Boston, the former chairman of the Massachusetts House Committee of Education, and an outstanding Democrat, for his concerted efforts on behalf of this compact in particular, and his wholehearted aid in the education field in our Commonwealth.

Mr. Mirsky is currently the counsel to the Massachusetts commission, and his ability and handiwork has been most important to the successful drafting and passage of this compact through the legislature. The compact was approved in Massachusetts on June 7, 1954. The granting of congressional consent was brought before this House in the manner of a bill, H. R. 9712, 83d Congress, 2d session.

The purposes of the New England higher education compact shall be to provide greater educational opportunities and services through the establishment and maintenance of a coordinated educational program for the persons residing in the several States of New England parties to this compact, with the aim of furthering higher education in the fields of medicine, dentistry, veterinary medicine, public health, and in professional, technical, scientific, literary, and other fields.

The drafting of this compact as it was presented to the Massachusetts Legislature was most competently handled by Mr. Mirsky, and the very great thought and educational ideals of this man may be evidenced on every page.

Under Mr. Mirsky's leadership, the Democratic Party in the Commonwealth of Massachusetts initiated and passed the first antidiscrimination laws in the Commonwealth assuring all citizens an equal opportunity for higher education, at the same time securing a program of hot lunches in the public schools by having the Commonwealth cooperate with the existing lunch programs of the municipalities and the Federal Government.

The Democratic Party in Massachusetts launched a new school-building program to promote better educational facilities thereby improving opportunities for the children of the Commonwealth. The Massachusetts school-building-assistance program, incidentally, has become one of the leading in the Nation.

When I was speaker of the House of Representatives in the Massachusetts Legislature, the State university received consistent attention in the developments of plant, faculty, and student body increases. It was during this time that Mr. Mirsky was most instrumental in the passage of a bill through that legislature, establishing Commonwealth scholarships at the University of Massachusetts. These scholarships afford qualified students the opportunity for a college education and permitted those children of the laboring class from the larger cities who could not possibly afford higher education to take advantage of the opportunities that their more wealthy brethren could handle privately.

Mr. Mirsky's tireless efforts in the Massachusetts Legislature in codifying the laws pertaining to education in the Commonwealth and bringing them up to date so that educators can have the opportunity to administer these laws in the most expeditious manner for the benefit of the general public, is greatly appreciated not only by all teacher and administrators but by the Massachusetts Legislature itself.

Mr. Mirsky's driving force was the stimulus that prodded the legislature into taking definite action to the establishment of an educational TV station sponsored by the Commonwealth, and currently being established by the famed Lowell Institute. We all hope that Greater Boston will soon enjoy this marvelous innovation in education that will come to them through TV channel 2. It will afford the hundred educational institutions and universities in the Greater Boston area an opportunity to display and transfer from one to the other their facilities and faculties.

The chairman of the Massachusetts Tubercular and Health League has stated that Mr. Mirsky's untiring zeal on behalf of the health of the schoolchildren of the Commonwealth deserves honorable mention.

He provided support to the bill that permitted periodic X-rays of school employees and children. This law is certain to help assure more complete protection for all schoolchildren of the Commonwealth. No wonder then, that Hugh Nixon, executive secretary of the Massachusetts Teachers Federation, praised the efforts of the Democratic Party in general and Mr. Mirsky in particular, for their work on behalf of both the teachers and the schoolchildren.

The Democratic Party in the Commonwealth has championed a State dental and medical school. The recent platform adopted at Worcester by the preprimary convention reiterated that demand. If this compact will help to increase medical and dental services in the Commonwealth, I believe that it will receive the blessings of the Democrats in the Commonwealth, but if it be a mere subterfuge to delay and hinder the production of medical and dental services or in any way lower the stringent standards that we in the Commonwealth insist upon, then it will be subject to criticism.

I therefore feel that this Congress should make every effort to give consent to the compact and we trust that the individual States making up those great New England States will follow through with the high ideals for which this compact was originally proposed.

H. R. 7839

EXTENSION OF REMARKS
OF
HON. WILLIAM E. HESS
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 20, 1954

Mr. HESS. Mr. Speaker, I was unavoidably absent early in the day today, July 20, due to a cancellation of the American Airlines flight from Cincinnati, Ohio, to Washington, D. C., on which I had made reservations.

Had I been present at the time the vote was taken on the motion to recommit the conference report on H. R. 7839, I would have voted against it, as I favored the provisions contained in the report with reference to public housing. I previously voted for a provision like this when the bill was originally on the floor of the House. The amendment was offered by Representative WIDNALL and was defeated by an overwhelming Democratic vote.

I would also have voted for the adoption of the conference report had I been present.

Juvenile Delinquency

EXTENSION OF REMARKS
OF
HON. HOWARD S. MILLER
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 20, 1954

Mr. MILLER of Kansas. Mr. Speaker, not only as a father, but as a citizen, I am greatly concerned about the increasing juvenile delinquency in this country. We are all concerned. Every man and woman in the Nation with any appreciation of the higher motivations of human beings must be greatly concerned. The question arises: What is the cause of this increase in delinquency among the youth of our land? Not until we have ascertained the cause can we intelligently even consider the remedy.

What is the cause of delinquency? If delinquency is on the increase in recent years, something has taken place in that time that has brought it about. Yes; I used the word "brought" deliberately, for I lay it down as a settled and undisputable fact that juvenile delinquency is the product of the situations and conditions that the adult human beings create and place around the youth of our land. They are just as upright, just as delin-

quent, as we their elders and their parents have made them. The very fact that Congress and the people are wishing to do something about the situation is evidence that we realize that the environment we throw about our young people influences their character. If it will influence them in the future, it has influenced them in the past. But it was we adults who made the environment that produced the present character of our young people. It was therefore our responsibility.

Now that we have found ourselves to be responsible, the next question is: What have we done or failed to do that has brought on this regrettable situation? What changes have taken place in the environment of our children and young people? Where and under what circumstances do we find the greatest increase in delinquency? I understand that it is in the larger cities. If that is true, what is there in the conditions found in the larger cities that contribute to delinquency? Can we agree that the conduct of young people will depend almost altogether upon their associations and the way they spend their time? If we can so agree, and I am sure that we can, we have now brought our problem to the point where it is only necessary to find for our young people wholesome surroundings and decent employment. Might we further agree that decent employment, by which I mean a job on some worthwhile enterprise, is of itself a wholesome surrounding. How very simple, as simple as reducing a problem in arithmetic to its lowest terms. But to find those jobs in town or city, that is something else. It is a simple matter on the farm. To solve their problem in towns and cities is something else. It is one of our serious problems.

SENATE

WEDNESDAY, JULY 21, 1954

(Legislative day of Friday, July 2, 1954)

The Senate met at 10 o'clock a. m., on the expiration of the recess.

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Eternal Light, who hast folded back the curtain of darkness and caused the dawn of a new day to brighten the earth, we beseech Thee to gladden our hearts with Thy light. May our lives be flooded with the radiance of faith, that doubts may be dispelled like mists of the morning. Invade our hearts with new reverence and responsiveness, that even the silence of this hallowed moment may be a benediction at the day's beginning from Thee.

We turn from the busy concerns that engage our minds, from the trivial pleasures that fill the passing moments, from the pressing cares that burden our day. At this wayside altar of prayer subdue the clamor of our hearts, soften every alien note, and for the high mission which by the will of the people has been committed to Thy servants here, in the ministry of the Nation's life, may they hear Thy voice and learn Thy will. We ask it in the Redeemer's name. Amen.

THE JOURNAL

On request of Mr. KNOWLAND, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, July 20, 1954, was dispensed with.

A MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting nominations was communicated to the Senate by Mr. Tribbe, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its clerks, requested the Senate to return to the House of Representatives the bill (H. R. 6399) granting the consent of Congress to an interstate forest fire protection compact, and the message of the House thereon.

ENROLLED BILLS SIGNED

The message announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 95. An act for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son, Nicola Marin Dikoff;

S. 98. An act for the relief of (Mrs.) Betty Thornton or Jozsefne Toth;

S. 102. An act for the relief of Francesco Cracchiolo;

S. 110. An act for the relief of Christopher F. Jako;

S. 203. An act for the relief of Yvonne Linnea Colcord;

S. 222. An act for the relief of Mrs. Dean S. Roberts (nee Braun);

S. 246. An act for the relief of Gerrit Been;

S. 267. An act for the relief of Pantelis Morfessis;

S. 278. An act for the relief of Szyga (Saul) Morgenstern;

S. 308. An act for the relief of Filolaos Tsolakis and his wife, Vassiliki Tsolakis;

S. 496. An act for the relief of Dr. Samson Sol Flores and his wife, the former Cecilia T. Tolentino;

S. 552. An act for the relief of Anna Urwicz;

S. 587. An act for the relief of Carlos Fortich, Jr.;

S. 661. An act for the relief of Nino Sabino Di Michele;

S. 790. An act for the relief of Irene J. Halkis;

S. 794. An act for the relief of Paulus Youhanna Benjamen;

S. 795. An act for the relief of Josef Radziwill;

S. 830. An act for the relief of Samuel, Agnes, and Sonya Lieberman;

S. 841. An act for the relief of Dionysio Antypas;

S. 843. An act for the relief of Rabbi Eugene Feigelstock;

S. 855. An act for the relief of Kirill Mihailovich Alexeev, Antonina Ivanovna Alexeev, and minor children, Victoria and Vladimir Alexeev;

S. 891. An act for the relief of Albina Sicas;

S. 912. An act for the relief of Bruno Ewald Paul and Margit Paul;

S. 915. An act for the relief of Augusta Bleys (also known as Augustina Bleys);

S. 917. An act for the relief of Stefan Burda, Anna Burda, and Nikolai Burda;

S. 937. An act for the relief of Virginia Grande;

S. 945. An act for the relief of Moshe Gips;

S. 986. An act for the relief of Mrs. Ishi Washburn;

S. 1129. An act for the relief of Jozo Mandic;

S. 1267. An act for the relief of Irene Kramer and Otto Kramer;

S. 1313. An act for the relief of Olga Balabanov and Nicola Balabanov;

S. 1362. An act for the relief of Rev. Ishai Ben Asher;

S. 1477. An act for the relief of Gerhard Nicklaus;

S. 1490. An act for the relief of David Maisel (David Majzel) and Bertha Maisel (Berta Pieschansky Majzel);

S. 1841. An act for the relief of Carlo (Adiutore) D'Amico;

S. 1850. An act for the relief of Dr. John D. MacLennan;

S. 1860. An act for the relief of Amalia Sandrovic;

S. 1954. An act for the relief of Anthony N. Goraieb;

S. 2009. An act for the relief of Mrs. Edward E. Jex;

S. 2036. An act for the relief of Joseph Robin Groninger;

S. 2065. An act for the relief of Mr. and Mrs. Hendrik Van der Tuin;

S. 2677. An act for the relief of Michio Yamamoto;

S. 2820. An act for the relief of Mrs. Erika Gisela Osteraa;

S. 2960. An act for the relief of Barbara Herta Geschwandtner;

S. 3197. An act to authorize the acceptance of conditional gifts to further the defense effort; and

S. 3605. An act to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. KNOWLAND, and by unanimous consent, the Committee on Interior and Insular Affairs was authorized to meet during the session of the Senate today.

Mr. KNOWLAND. Mr. President, after having cleared the question with the acting minority leader, I ask unanimous consent that the Subcommittee on Rules of the Committee on Rules and Administration be permitted to meet this afternoon during the session of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE BUSINESS

Mr. KNOWLAND. Mr. President, I ask unanimous consent that immediately following a brief executive session and a quorum call there may be the customary morning hour for the transaction of routine business, under the usual 2-minute limitation on speeches.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. KNOWLAND. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to consider executive business.

EXECUTIVE MESSAGE REFERRED

The VICE PRESIDENT laid before the Senate a message from the President of the United States submitting sundry nominations, which were referred to the Committee on Post Office and Civil Service.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

The following favorable reports of nominations were submitted:

By Mr. CAPEHART, from the Committee on Banking and Currency:

Norman P. Mason, of Massachusetts, to be Federal Housing Commissioner; and

Andrew N. Overby, of the District of Columbia, to be United States Executive Director of the International Bank for Reconstruction and Development.

The VICE PRESIDENT. If there be no further reports of committees, the clerk will state the nominations on the Executive Calendar.

UNITED STATES DISTRICT JUDGE

The Chief Clerk read the nomination of Herbert S. Boreman to be United States district judge for the northern district of West Virginia, whose nomination had been previously passed over.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

UNITED STATES ATTORNEY

The Chief Clerk read the nomination of Joseph E. Hines to be United States attorney for the western district of South Carolina, whose nomination had been previously passed over.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

DEPARTMENT OF THE INTERIOR

The Chief Clerk read the nomination of Clarence A. Davis, of Nebraska, to be Under Secretary of the Interior.

The VICE PRESIDENT. Without objection, the nomination is confirmed.

Mr. KNOWLAND. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The VICE PRESIDENT. Without objection, the President will be immediately notified.

LEGISLATIVE SESSION

Mr. KNOWLAND. I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

Routine business is now in order.

EXPRESSION OF CONDOLENCE ON DEATH OF THE LATE SENATOR BUTLER, OF NEBRASKA

The VICE PRESIDENT laid before the Senate a letter from the secretary, Republican Club of St. Thomas and St. John, V. I., transmitting a resolution adopted by that club, expressing its condolence and sympathy on the death of the late Senator Hugh Butler, of Nebraska, which was ordered to lie on the table.

SEVERANCE OF DIPLOMATIC RELATIONS WITH RUSSIA—RESOLUTION

Mr. JENNER. Mr. President, I present for appropriate reference, and ask unanimous consent to have printed in the RECORD, a resolution adopted by the Deparment of Indiana, the American Legion, favoring the severance of diplomatic relations with Russia.

There being no objection, the resolution was referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

SEVER DIPLOMATIC AND TRADE RELATIONS WITH U. S. S. R.

Whereas Maxim Litvinoff, who was then the People's Commissar for Foreign Relations, did solemnly bind the Union of Soviet Socialist Republics to "respect scrupulously the indisputable right of the United States to order its own life within its own jurisdiction in its own way and to refrain from interfering in any manner in the internal affairs of the United States, its Territories or possessions," as a condition for diplomatic recognition of the Union of Soviet Socialist Republics by the Government of the United States on November 16, 1933; and

Whereas the Government of the Union of Soviet Socialist Republics did further pledge that it would refrain from and restrain all persons in government service or organizations under its direct or indirect control "from any act, overt or covert, liable in anyway whatsoever to injure the tranquillity, prosperity, order or security of the whole or any part of the United States, its Territories or possessions"; and

Whereas the Government of the Union of Soviet Socialist Republics has knowingly and willfully violated the letter and the spirit of each of these provisions of its original agreement with the Government of the United States; and

Whereas the Embassies of the Soviet Union and its satellites, having the protection of diplomatic immunity and inviolability, have been utilized for organizational bases, subversive spy centers, points of communication, and letter drops as has been so well demonstrated by the exposures in the United States, in Canada, Cuba, and Australia; and

Whereas the closing of our Embassies in these same enemy countries for retribution would not lose their value as listening posts, due to the 24-hour surveillance by the Soviet secret police and their agents; and

Whereas the psychological effect of this positive action by the Government of the United States upon the other free nations of the world would be tremendous and demonstrate that the United States is determined to uphold and assist free nations everywhere; and, therefore,

Whereas continued diplomatic and trade relations with the Government of the Union of Soviet Socialist Republics implies friendly relations and tacit approval of its intercourse with the Government of the United States; and

Whereas such continued diplomatic and trade relations with this morally depraved dictatorship can only result in further acrimonious actions toward the Government of the United States and further persecution of the enslaved peoples of the world: Now, therefore, be it

Resolved by the American Legion, Department of Indiana, in convention assembled this 9th day of July, 1954, in the city of Indianapolis, Does urge the Government of the United States to summarily sever diplomatic and trade relations with the present Government of the Union of Soviet Socialist Republics and with the present governments of the satellite nations enslaved by the U. S. S. R.; and be it further

Resolved, That a copy of this resolution be forwarded to the coming American Legion national convention in Washington with the recommendation that it be favorably acted upon, and a certified copy of this resolution be sent to the Indiana Representatives and Senators in Washington, President Eisenhower, and Secretary of State Dulles.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LONG, from the Committee on Interior and Insular Affairs, without amendment:

S. 3316. A bill to authorize and direct the conveyance of a certain tract of land in the State of Mississippi to Jonathan Jones (Rept. No. 1967).

By Mrs. SMITH of Maine, from the Committee on Government Operations, with amendments:

H. R. 6290. A bill to discontinue certain reports now required by law (Rept. No. 1968).

By Mr. POTTER, from the Committee on Government Operations, with amendments:

H. R. 5605. A bill to amend the Federal Property and Administrative Services Act of 1949 to provide for payment of taxes or payments in lieu of taxes with respect to real property transferred from Government corporations to other agencies of the Federal Government (Rept. No. 1966).

By Mr. LANGER, from the Committee on the Judiciary, with amendments:

H. R. 951. A bill for the relief of the Trust Association of H. Kempner (Rept. No. 1969).

ADDITIONAL FUNDS FOR COMMITTEE ON BANKING AND CURRENCY—REPORT OF A COMMITTEE

Mr. CAPEHART. Mr. President, from the Committee on Banking and Currency, I report an original resolution to provide additional funds for the Committee on Banking and Currency.

The VICE PRESIDENT. The resolution will be received and placed on the calendar.

The resolution (S. Res. 289), reported by Mr. CAPEHART from the Committee

on Banking and Currency, was placed on the calendar, as follows:

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 (a) of the Legislative Reorganization Act of 1946 and pursuant to its jurisdiction under rule XXV (1) (d) 4 of the Standing Rules of the Senate, the Committee on Banking and Currency, or any duly authorized subcommittee thereof, is authorized until January 31, 1955, to make such expenditures, and to employ upon a temporary basis such investigators, and such technical, clerical, and other assistants as it deems advisable.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $150,000 (in addition to amounts heretofore made available for such purposes), shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, July 21, 1954, he presented to the President of the United States the following enrolled bills:

S. 95. An act for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff;

S. 98. An act for the relief of (Mrs.) Betty Thornton or Jozsefne Toth;

S. 102. An act for the relief of Francesco Cracchiolo;

S. 110. An act for the relief of Christopher F. Jako;

S. 203. An act for the relief of Yvonne Linnea Colcord;

S. 222. An act for the relief of Mrs. Dean S. Roberts (nee Braun);

S. 246. An act for the relief of Gerrit Been;

S. 267. An act for the relief of Pantelis Morfessis;

S. 278. An act for the relief of Szyga (Saul) Morgenstern;

S. 308. An act for the relief of Filolaos Tsolakis and his wife, Vassiliki Tsolakis;

S. 496. An act for the relief of Dr. Samson Sol Flores and his wife, the former Cecilia T. Tolentino;

S. 552. An act for the relief of Anna Urwicz;

S. 587. An act for the relief of Carlos Fortich, Jr.;

S. 661. An act for the relief of Nino Sabino Di Michele;

S. 790. An act for the relief of Irene J. Halkis;

S. 794. An act for the relief of Paulus Youhanna Benjamen;

S. 795. An act for the relief of Josef Radziwill;

S. 830. An act for the relief of Samuel, Agnes, and Sonya Lieberman;

S. 841. An act for the relief of Dionysio Antypas;

S. 843. An act for the relief of Rabbi Eugene Feigelstock;

S. 855. An act for the relief of Kirill Mihailovich Alexeev, Antonina Ivanovna Alexeev, and minor children Victoria and Vladimir Alexeev;

S. 891. An act for the relief of Albina Sicas;

S. 912. An act for the relief of Bruno Ewald Paul and Margit Paul;

S. 915. An act for the relief of Augusta Bleys (also known as Augustina Bleys);

S. 917. An act for the relief of Stefan Burda, Anna Burda, and Nikolai Burda;

S. 937. An act for the relief of Virginia Grande;

S. 945. An act for the relief of Moshe Gips;

S. 986. An act for the relief of Mrs. Ishi Washburn;

S. 1129. An act for the relief of Jozo Mandic;

S. 1267. An act for the relief of Irene Kramer and Otto Kramer;

S. 1313. An act for the relief of Olga Balabanov and Nicola Balabanov;

S. 1362. An act for the relief of Rev. Ishai Ben Asher;

S. 1477. An act for the relief of Gerhard Nicklaus;

S. 1490. An act for the relief of David Maisel (David Majzel) and Bertha Maisel (Berta Pieschansky Majzel);

S. 1841. An act for the relief of Carlo (Adiutore) D'Amico;

S. 1850. An act for the relief of Dr. John D. MacLennan;

S. 1860. An act for the relief of Amalia Sandrovic;

S. 1954. An act for the relief of Anthony N. Goraieb;

S. 2009. An act for the relief of Mrs. Edward E. Jex;

S. 2036. An act for the relief of Joseph Robin Groninger;

S. 2065. An act for the relief of Mr. and Mrs. Hendrik Van der Tuin;

S. 2677. An act for the relief of Michio Yamamoto;

S. 2820. An act for the relief of Mrs. Erika Gisela Osteraa;

S. 2960. An act for the relief of Barbara Herta Geschwandtner;

S. 3197. An act to authorize the acceptance of conditional gifts to further the defense effort; and

S. 3605. An act to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HAYDEN:

S. 3781. A bill to enable the State of Arizona and the town of Tempe, Ariz., to convey to the Salt River Agricultural Improvement and Power District, for use by such District, a portion of certain property heretofore transferred under certain restrictions to such State and town by the United States; to the Committee on Interior and Insular Affairs.

By Mr. BRICKER:

S. 3782. A bill for the relief of Mr. Fu-Ho Chan and Mrs. Fu-Ho Chan; to the Committee on the Judiciary.

By Mr. KEFAUVER:

S. 3783. A bill to amend the Veterans' Preference Act of 1944 in order to give preference in promotions and transfers to preference eligibles under the provisions of such act; to the Committee on Post Office and Civil Service.

By Mr. KENNEDY:

S. 3784. A bill to amend the Legislative Reorganization Act of 1946 in order to eliminate certain obsolete provisions and to make certain minor technical corrections therein, to amend title III of such act, and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. KENNEDY when he introduced the above bill, which appear under a separate heading.)

By Mr. CORDON:

S. 3785. A bill for the relief of Bernard L. Denn; to the Committee on the Judiciary.

AMENDMENT OF LEGISLATIVE REORGANIZATION ACT OF 1946

Mr. KENNEDY. Mr. President, I introduce a bill to amend the Legislative Reorganization Act of 1946 in order to eliminate certain obsolete provisions and to make certain minor technical corrections therein, to amend title III of such act, and for other purposes, and request that it be referred to the Committee on Government Operations.

There being no objection, the bill (S. 3784) to amend the Legislative Reorganization Act of 1946 in order to eliminate certain obsolete provisions and to make certain minor technical corrections therein, to amend title III of such act, and for other purposes, was received, read twice by its title, and referred to the Committee on Government Operations.

PRINTING OF ADDITIONAL COPIES OF PART SIX OF HEARINGS ENTITLED "PETROLEUM, GAS, AND COAL"

Mr. MALONE submitted the following concurrent resolution (S. Con. Res. 97), which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That there be printed 1,000 additional copies of part 6 of the hearings conducted before a subcommittee of the Senate Committee on Interior and Insular Affairs pursuant to Senate Resolution 143, 83d Congress, relative to stockpile and accessibility of strategic and critical materials to the United States in time of war. Such additional copies shall be for the use of the Senate Committee on Interior and Insular Affairs.

PRINTING OF ADDITIONAL COPIES OF INTERIM REPORT ENTITLED "ACTIVITIES OF UNITED STATES CITIZENS EMPLOYED BY THE UNITED NATIONS"

Mr. JENNER submitted the following concurrent resolution (S. Con. Res. 98), which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate Committee on the Judiciary an additional 20,000 copies of the second interim report entitled "Activities of United States Citizens Employed by the United Nations," a report of hearings held before a subcommittee of the above committee during the 83d Congress.

PRINTING OF ADDITIONAL COPIES OF HEARINGS ENTITLED "STRATEGY AND TACTICS OF WORLD COMMUNISM"

Mr. JENNER submitted the following concurrent resolution (S. Con. Res. 99), which was referred to the Committee on Rules and Administration:

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of the Senate Committee on the Judiciary not to exceed 25,000 copies of parts 1 to 3 and subsequent parts of the hearings entitled "Strategy and Tactics of World Communism," held before a subcommittee of the above committee during the 83d Congress.

PRINTING OF ADDITIONAL COPIES OF PART 1 OF HEARINGS ENTITLED "UNITED STATES DEPARTMENT OF INTERIOR, BUREAU OF MINES"

Mr. MALONE submitted the following resolution (S. Res. 290), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed 1,000 additional copies of part 1 of the hearings conducted before a subcommittee of the Senate Committee on Interior and Insular Affairs pursuant to Senate Resolution 143, 83d Congress, relative to stockpile and accessibility of strategic and critical materials to the United States in time of war. Such additional copies shall be for the use of the Senate Committee on Interior and Insular Affairs.

REVISION OF ATOMIC ENERGY ACT 1946—AMENDMENTS

Mr. HUMPHREY submitted amendments intended to be proposed by him to the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes, which were ordered to lie on the table and to be printed.

Mr. BURKE submitted an amendment intended to be proposed by him to Senate bill 3690, supra, which was ordered to lie on the table and to be printed.

AGRICULTURAL ACT OF 1954—AMENDMENT

Mr. HICKENLOOPER submitted an amendment intended to be proposed by him to the bill (S. 3052) to encourage a stable, prosperous, and free agriculture and for other purposes, which was ordered to lie on the table and to be printed.

MUTUAL SECURITY ACT OF 1954—AMENDMENTS

Mr. HUMPHREY submitted amendments intended to be proposed by him to the bill (H. R. 9678) to promote the security and foreign policy of the United States by furnishing assistance to friendly nations, and for other purposes, which was ordered to lie on the table and to be printed.

INCLUSION OF MINISTERS IN SOCIAL SECURITY BENEFITS—RESOLUTION

Mr. HUMPHREY. Mr. President, I ask unanimous consent that a resolution adopted by the Evangelical Lutheran Church at its 1954 general convention regarding the so-called Reed bill, to include ministers in social security benefits, be printed in the body of the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE EVANGELICAL LUTHERAN CHURCH, OFFICE OF THE GENERAL SECRETARY, MINNEAPOLIS, MINN., JULY 8, 1954

SOCIAL SECURITY FOR MINISTERS

Whereas the extension of social security coverage to ministers is being considered by the Congress of the United States; and

Whereas the Evangelical Lutheran Church has gone on record favoring such extension; and

Whereas certain specific features of such proposed legislation now need further expression from the church; and

Whereas social security coverage for ministers should provide for freedom of choice to the ordained minister in order that the principle of separation of church and State be kept inviolate: Therefore be it

Resolved, That the extension of social security coverage to ministers should include the following points:

1. That the plan adopted shall be on a voluntary self-employed basis which will make it permissive in character to avoid any possible taxation or supervision of churches by the State;

2. That the act safeguard the conscience of the individual minister, and that the action of a minister shall in no way be binding upon his successor in office. No compulsion shall be involved;

3. That in the interest of the soundness of the plan, we are willing that certain safeguards, which are calculated to make the application of the act practical, be provided, such as that of a group inclusion (for instance, there might be a provision that ministers must choose whether or not they desire to be included within 1 year after ordination. This would insure a wide age range within the group and would counteract any tendency to have enrollment simply on the part of those approaching retirement age).

Your consideration of the viewpoints herein expressed in formulating social security legislation in this area will be appreciated.

O. H. HOVE,
General Secretary.

FARM SURPLUSES

Mr. BEALL. Mr. President, the problem of farm surpluses has been a matter of growing concern to the Congress; and Secretary Benson's recommendations were an attempt to meet the problem of surpluses in basic commodities.

The Baltimore Sun points out today in an editorial, that the new crop report is one of the best arguments for congressional approval of the Eisenhower-Benson program. I request unanimous consent to have the editorial included as part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SURPLUSES MAKE AN ARGUMENT FOR THE EISENHOWER FARM PLAN

The new crop report ties dramatically into the President's case against high-level price-support schemes in agriculture now pending in the Congress. The new report shows that we may close the present crop year with one of the biggest overall productions on record. This in the face of surpluses in such basic crops as wheat which are already overtaxing storage facilities.

It is true that the new report shows that wheat and cotton acreage is down a little in line with previous control plans. It has to be remembered, though, that Congress did not allow those control plans to be applied as tightly as the facts warranted. Even more devastating is the evidence that even when farmers took lands out of wheat and cotton they put them into other crops in which equally troublesome surpluses now threaten.

Thus lands taken out of cotton and wheat merely boomed production of things like soy beans, oats, barley, flaxseed, sorghums, rice, dry beans, and sugar beets. Suggestively enough an amendment tacked onto the pending farm bill in the Senate Agriculture Committee would provide high-level supports in oats, barley, grain, sorghums, and rye. Thus, with new surpluses in these lines now in sight as a mere byproduct of high supports in other lines, the political farmers are pushing to extend directly to them more of the high-support influence which brought them into surplus supply in the first place.

It is plain—and alarming—facts like these which make the best ammunition for the Eisenhower people in making their congressional fight. This is the kind of factual argument which brought an administration victory in the House. The House finally took the flexibility principle which allows the price support to be lowered when surpluses threaten to develop. Senators AIKEN and ANDERSON, the brave Senate champions of the brave administration program, need merely stand fast on these facts to win general public support and, it may be confidently expected, a majority vote in Congress.

MARYLAND TOBACCO AND THE TARIFF ON SWISS WATCHES

Mr. BEALL. Mr. President, Maryland tobacco farmers are at this time awaiting action by the President on recommendations by the Tariff Commission that import duties on Swiss watches be increased. I have previously stated the unfortunate effect any increase would have on southern Maryland tobacco growers, since the Swiss are one of the best markets for our particular tobacco.

The Baltimore Sun today comments editorially on the special qualities of Maryland tobacco. I request unanimous consent to have the editorial made a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

MARYLAND TOBACCO DESERVES ITS POPULARITY

Production of Maryland tobacco averaged 27,500,000 pounds a year from 1934 to 1938, and the average price per pound in those years was 19.7 cents. The 1953 crop (now being marketed) was around 37,100,000 pounds and auction prices through June 4 averaged 56.7 cents a pound, some grades bringing as much as 70 cents. The average price for this marketing season is not yet available, but the crop now being disposed of is supported by the Government at 50.4 cents a pound.

Hence, Maryland tobacco people have greatly increased their production since the prewar years and have more than doubled their price. Such popularity must be deserved. How does Maryland leaf tobacco, technically known as type 32, earn its popularity?

Of course the general inflation accounts for some of the price boost, but aside from that there are two more solid explanations. First, Maryland tobacco has certain special virtues present in no other tobacco. Second, the leading tobacco product, cigarettes, in the manufacture of which Maryland tobacco is particularly useful, has experienced a great boom in the last two decades.

Take the special virtues of Maryland tobacco first. They are three. Maryland tobacco has a quality of steady burn. Mixed with other tobaccos this quality keeps the whole cigarette going even though the smoker does not draw on it all the time. a wag once explained that this was the quality which enabled your guest's forgotten cigarette butt to burn a hole in the top of your piano.

Then just as the steady-burn quality of Maryland tobacco makes it useful in blends, so its mild flavor and aroma—its second virtue—makes it a good blender. The third Maryland quality comes from the way in which Maryland tobacco is cured. It is cured naturally by air and weather in Maryland tobacco barns. Other cigarette tobaccos are

cured artificially by a flue process. The natural curing leaves a fluffier, less compressed tobacco. A pound of this goes further in manufacturing cigarettes.

The broader industrywide reason for increasing demand in Maryland tobacco is indicated by the figures on cigarette consumption. In 1930 people 15 years old or over in the United States smoked up an average of 4 pounds of tobacco a year in the form of cigarettes. The figure was about halfway between 10 and 11 pounds in 1953. Much of the increase is attributable to the rising use of cigarettes by women.

In the earlier days of the Maryland tobacco culture, as much as 90 percent of Maryland's product was sold overseas. With the development by the French and other foreign users of alternative sources the export market fell off. Now it absorbs about 20 to 25 percent of the total. Of the 8 million pounds of exports expected for this year, fully two-thirds will go to Switzerland. That, as suggested here the other day, is the reason why the tobacco people of southern Maryland are in favor of low tariffs on Swiss watches. For the disposal of these watches in the United States yields dollars with which the Swiss can buy their favorite Maryland tobacco.

REGULATION OF NATURAL-GAS RATES BY FEDERAL POWER COMMISSION

Mr. WILEY. Mr. President, ever since the issue arose on the national scene, I have favored vigorous protection of the rights of Wisconsin and other consumers of natural gas.

I have fought against every effort to deprive consumers of the legitimate protection to which they are entitled by the Federal Power Commission. I have fought against legislation which would strip the FPC of the necessary legal power. I have combatted the reluctance of the FPC itself to assert its own power. I have commended the decision of the United States Supreme Court reasserting the authority of the FPC.

An editorial appeared in the Monday, July 19, issue of the Milwaukee Journal entitled "Gas Price Fight Is Not Over." It points out certain apprehensions in the minds of friends of the American consumer, including, I might say, the office of the attorney general of Wisconsin, the Wisconsin Public Service Commission, and the city attorney's office of Milwaukee.

I ask unanimous consent that the text of this editorial be printed in the body of the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GAS-PRICE FIGHT IS NOT OVER

The Federal Power Commission has finally asserted its authority to regulate prices charged by so-called independent natural-gas producers—an authority that the Commission denied it had until a court order insisted that regulation was the FPC's duty.

In freezing prices charged by independent producers the FPC has paved the way for a study of natural-gas prices. The bitter reaction of Senators and industry spokesmen from oil and gas States indicates that the FPC order is also provoking a strenuous new effort by gas and oil interests to wipe out by congressional action the FPC's regulatory authority. Such legislation failed in the past only because former President Truman vetoed it.

The FPC order is drastic. It not only covers major producers who serve such States as Wisconsin, but hundreds of small and unimportant producers. Wisconsin and Milwaukee officials are afraid that the order was deliberately made drastic as an aid to those who want legislation ending FPC control. The past reluctance of the FPC to regulate prices charged by independents lends that suspicion some credibility. It's an old trick to enforce a law to such extremes that it becomes unworkable. The FPC would have served consumers and its functions better if it had moved first to regulate big producers and then carefully and systematically had acted in the case of small producers as the need for regulation arose.

But the order has been issued. Prices are frozen. The fight is on. It's up to consumer States to increase their alertness and to intensify their efforts to prevent FPC's regulatory authority from being wiped out by legislation and to see that the authority is properly and wisely used. It's not going to be an easy fight. The oil and gas interests are powerful. They're tough antagonists.

Wisconsin—through the attorney general and the public service commission and the Milwaukee city attorney's office—has led the fight for the gas consumer successfully so far. Let's keep it up.

EIGHTIETH BIRTHDAY ANNIVERSARY OF FORMER PRESIDENT HERBERT HOOVER

Mr. SMITH of New Jersey. Mr. President, I rise to present what I consider to be a matter of personal privilege.

Mr. President, I wish to make a short statement concerning the concurrent resolution I am about to submit. Upon concluding, I shall ask unanimous consent for the immediate consideration of the resolution. Despite the various differences we may have on partisan issues before the Senate, there are many subjects concerning which there is unanimous agreement. The subject of this resolution is a matter on which I am confident there will be complete accord among us all.

On August 10, 1954, America's distinguished elder statesman, the Honorable Herbert Hoover, will be 80 years of age. Our majority leader, the senior Senator from California [Mr. KNOWLAND], the senior Senator from Michigan [Mr. FERGUSON], and I, in the Senate; and Speaker MARTIN and the Honorable CLARENCE BROWN, Representative from Ohio, in the House, are submitting, simultaneously, concurrent resolutions extending congratulations to our former President, Mr. Hoover, and wishing him many more happy years of public service. Along with many Members of both the House and Senate, and other persons now prominent in public life, I have been honored to have been closely associated with Mr. Hoover in his numerous humanitarian works since World War I.

It has been our privilege to participate intimately in many of the great accomplishments that Mr. Hoover has brought about, over the years, in behalf of the welfare of all mankind. Because of this long association, the sponsors consider it a great honor to submit the concurrent resolutions in our respective Houses of the Congress. On behalf of myself and our majority leader, the Senator from California [Mr. KNOWLAND] and the senior Senator from Michigan [Mr. FERGUSON], I submit the concurrent resolution, and ask that it be read.

The VICE PRESIDENT. The concurrent resolution will be read.

The concurrent resolution (S. Con. Res. 96), submitted by Mr. SMITH of New Jersey for himself, Mr. KNOWLAND, and Mr. FERGUSON, was read as follows:

Resolved by the Senate (the House of Representatives concurring), That the Congress of the United States hereby extends to the Honorable Herbert Hoover its greetings and felicitations on the 80th anniversary of his birth, August 10, 1954.

SEC. 2. The Congress expresses its admiration and gratitude to Mr. Hoover for his long years of devoted service to his native land and to the world in general in many different capacities.

SEC. 3. The Congress is especially appreciative of his willingness to accept cheerfully the heavy burden of serving as Chairman of the second Commission on Organization of the Executive Branch of the Government, which is an arm of the Congress, in order to complete the work so well begun a few years ago by a similar commission under his chairmanship.

SEC. 4. The Congress expresses the hope and desire that divine providence may permit Herbert Hoover to be spared to give many more productive years of honored service to humanity and to his beloved country.

SEC. 5. A copy of this resolution shall be transmitted to America's elder statesman, the Honorable Herbert Hoover.

Mr. SMITH of New Jersey. Mr. President, I ask unanimous consent for the immediate consideration of the resolution.

There being no objection, the Senate proceeded to consider the resolution.

Mr. MARTIN. Mr. President, I desire to speak on the concurrent resolution.

The VICE PRESIDENT. The Senator from Pennsylvania is recognized.

Mr. MARTIN. Mr. President, I was Republican State Chairman in Pennsylvania when Herbert Hoover was President of the United States. I was not for Herbert Hoover's nomination on the Republican ticket, to be President; but I soon learned of his great qualities and his unusual understanding of affairs, not only of the United States, but of the world.

Certainly this concurrent resolution is most appropriate, and I am extremely glad that the distinguished senior Senator from New Jersey, the distinguished senior Senator from California, and the distinguished senior Senator from Michigan [Mr. FERGUSON] have seen fit to give us the opportunity to approve a measure of this character, which is so greatly deserved.

Mr. GILLETTE. Mr. President, it happens that ex-President Hoover is the one former President of the United States who had the honor of being born in the State of Iowa. We are very proud of his record. I do not happen to belong to the same political party that he adorns; but, at the same time, I am one who admires very much the public service of Herbert Hoover, and I am one who regrets very much the circumstances which surrounded the campaign when he lost the Presidency. He was charged with many things for which he was not responsible. As one who participated

somewhat in the attack in the campaign at that time, there were some things for which I considered him responsible; but he was compelled to bear the burden of attack for many matters for which he was not responsible, but which grew out of a situation which had developed throughout the country.

I wish to say that I am proud to join with the Senator from New Jersey and other Senators, so that this will be an expression of admiration from the Democratic side as well as from the Republican side; and as an Iowan, I am particularly proud.

Mr. KNOWLAND. Mr. President, I am very pleased to have an opportunity to sponsor, together with the distinguished Senator from New Jersey and the distinguished Senator from Michigan, this concurrent resolution relative to the 80th birthday of former President Hoover.

Mr. Hoover is a great American citizen. He is a great humanitarian. He has served his country without regard to narrow partisanship. He rendered signal service to the Nation during World War I and subsequent to that war, under the Presidency of Woodrow Wilson. Mr. Hoover served in the Cabinet of two Republican Presidents. He himself served as Secretary of Commerce and, later, as President of the United States.

Subsequent to that service, he was called to help on both the Mississippi flood problems and the problems of famine abroad; and he was consulted by the former President, Mr. Truman, regarding some of these problems.

Despite his years, Mr. Hoover has remained active and interested in the welfare of the American people and the Nation. He has taken on the rather heavy burden of serving as chairman of one commission, and then another, to study the reorganization of the executive branch of the Government of the United States.

Mr. President, I know that all Americans, regardless of their partisan affiliation, will join with the Congress of the United States in wishing Mr. Hoover many happy returns of the day and many more years of useful service to the Nation.

Mr. FERGUSON. Mr. President, on August 10 of this year the Honorable Herbert Hoover, former President of the United States, will be fourscore years old. It is very fitting that we in the Congress should by adopting a concurrent resolution extending greetings and felicitations to him on the 80th anniversary of his birth.

Mr. Hoover has served his country and the whole world well. No one should ever forget the days he spent as Secretary of Commerce during World War I, and the great task which he undertook and completed in connection with the Belgian relief program. It was this distinguished service to mankind and human welfare that made him a figure known to the entire world.

As President of the United States he served with honorable distinction. During the days following his term as President he took an active part in the affairs of his Government. We all know and appreciate the outstanding service he rendered as the leader of the first Commission which bears his name. He, himself, recognized and acknowledged the fact that the first Commission was not able within the time limit afforded to accomplish all the things required to be done.

As a cosponsor of the resolution which created the second 12-member Hoover Commission, which is now undertaking to complete the task of making our Federal Government a more efficient, better organized, and less expensive government, and as a member of this Hoover Commission, I know personally that Herbert Hoover is rendering a great and distinctive service to the people of the United States. He understands government. Even in years when any man could retire to the sidelines with honor, he is devoting his efforts effectively to the task before him and his colleagues.

I work personally with him, and have in the past during the many years of our good friendship. I know the number of hours he works, and the intelligent effort he gives toward guiding in detail the activities of the Hoover Commission. It is only fitting and proper that this concurrent resolution be adopted in order that he and all the people of the United States may know that Congress appreciates the fine service which this truly great American has rendered to his country.

Mr. HICKENLOOPER. Mr. President, I wish to join the Senator from New Jersey [Mr. SMITH], the Senator from California [Mr. KNOWLAND], and the Senator from Michigan [Mr. FERGUSON], and other Senators who have spoken this morning with reference to the observance of the 80th birthday anniversary of former President Herbert Hoover.

We in Iowa are honestly proud to call him a native son. At a later date, I had intended to speak, and I shall speak, about his 80th birthday, and about the preparations and plans which we have in Iowa for a suitable observance of that occasion. It is sufficient now to say that we join in the resolution. Our legislature has noted the occasion in its last session. The town of West Branch, where Mr. Hoover was born, has long since honored him by setting aside the house in which he was born, with its surrounding lot, as a public memorial to him, and on the 10th of August a statewide ceremony of observance will be held at the small town of West Branch. As I previously stated, I shall speak in more detail prior to the adjournment of this session with reference to that observance, but I wish to join in the tributes which have been paid this morning to Mr. Hoover as being one of the truly great Americans of history and one of the truly great men of the world in modern history.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 96) was agreed to.

WATER PROBLEMS OF THE ARID WEST

Mr. BENNETT. Mr. President, I wish to continue my brief discussion of the water problems of the arid West.

In the very beginning, when our Utah settlements were small, there was water enough for everyone; and a farmer could dig a ditch and divert whatever water he needed. But the time soon came when each man's share had to be established and his rights defined. Later on, a "water master" had to be set up, to see that each man got his share and his turn.

Although the people of the seven States along the Colorado knew they would have to establish shares and rights, it it was not until 1922 that they began that task. Before the great Hoover Dam could be constructed—and I pause here to join my colleagues in tribute to the great man whose name that dam bears, and to observe that perhaps over the long centuries, that will be the monument which will keep his name alive—before that great dam could be constructed the rights of the lower basin States, California, Arizona and Nevada, had to be set. They were set at 7½ million acre-feet per annum. Then another 25 years passed, until in 1947 the upper basin States divided the water that should remain.

That division is an interesting one, as follows:

	Percent
Colorado	51¼
Utah	23
Wyoming	14
New Mexico	11¾

But the waters of the Colorado are not inert things to be cut and parceled out like cheese. The river is a living thing, of many moods and dangerous caprice. Before it leaves its mountain heights, it has cut the first of the deep, twisted canyons, through which it bears its load of silt down to the sea. It is too treacherous for commerce, and at some times and places, it is too deadly even for the boatmen daredevils. Yet, if we are to keep our commitments to the lower basin, and the promise of our own future, the river—like a wild horse—must be tamed and put to work.

The Bureau of Reclamation began its first investigations of the river in 1903, and the actual job of taming it began in the Uncompaghre Valley in 1906; and in the 4 upper basin States, only 2 million acre-feet of water have been put to work—against 5⅓ million in California.

We of the upper basin have agreed that the turn of our downstream neighbors should come first—both in time and in amount. We have waited over 30 years for our turn to come. We hope that this year my colleagues, who represent our Federal "water master," will recognize our patience and will help us begin to develop the program which, even though it takes 50 years or more to build, will make the shares of both the upper and the lower basins firm and sure.

DUTY ON IMPORTATION OF WATCHES

Mr. MARTIN. Mr. President, on Tuesday of last week the Washington Star carried a letter to the editor from Mr. Charles P. Taft, opposing the increase in duties on watches which the President now has under consideration.

A very similar letter from Mr. Taft appeared more recently in the New York Times. The letter to the Star was inserted in the CONGRESSIONAL RECORD on July 14.

At the close of these remarks I would like unanimous consent to insert in the RECORD the reply of the American manufacturers which was printed in the Star on last Saturday. I think this reply shows that the content of Mr. Taft's letters is misleading. I agree with the American producers that it is time to deal with this problem on a more realistic basis.

These letters have attracted some attention and I want the Senate to know that they represent only a part of a last-minute pressure campaign being put on by the Swiss and the importers of Swiss watches to make it appear that an increase in watch tariffs will be publicly unpopular. They have apparently taken to the letters-to-editors columns because the newspapers have, for the most part, stopped printing the flood of press releases and other material which they have been passing around.

The Swiss and the importers are also trying to organize the retail jewelers to bombard the Congress and the President with objections. They are asking the tobacco farmers of Maryland to do the same thing. They have enlisted the CIO through the Swiss and the international unions. They have tried everywhere to create the impression that, if we should increase the watch tariff, the economy of Switzerland will collapse, our international trade program will be undermined, and our American economy will be crippled—all of which is nonsense.

The Swiss had a favorable balance of total trade with the United States in 1953. They have over 80 percent of our jeweled watch market. Yet they object in the strongest terms to our trying to protect a vital defense industry from complete destruction. This attitude is completely unreasonable, to say the least, and I would be extremely disturbed if I did not believe that our Government has finally realized that the tariffs must be increased.

I ask unanimous consent that the letter from the Washington Evening Star be printed in the RECORD at this point as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WATCH TARIFF CONTROVERSY

The July 13 letter of Charles P. Taft, commenting unfavorably upon the Star's level-headed editorial on the watch-tariff case, is an excellent illustration of the tactics which have almost caused the extinction of the jeweled watch industry in the United States.

In the first place Mr. Taft is not very forthright in disclosing his real interest in this watch-tariff controversy. He signed his letter as president of the Committee for National Trade Policy. It seems only fair for those who read his letter to know that the Taft family are—or until recently were—large stockholders in the Gruen Watch Co. of Cincinnati, Ohio, 1 of the 4 largest importers of Swiss watches.

Gruen has been one of the leaders of the importers' trade organization—the American Watch Association—which has sought for years, so far quite unsuccessfully, to confuse the watch-tariff issue. Ralph Lazrus, an officer of the Benrus Watch Co., another major importer, is president of the American Watch Association and is also a member of the committee for which Mr. Taft purports to speak.

Now let us see how closely Mr. Taft appears to be working with the importers of Swiss watches and the Swiss watch trust. The approach and the phraseology of Mr. Taft's letter, as it relates to the jeweled watch industry, correspond very closely with the statements of former Senator Millard Tydings, who represents the American Watch Association, before the Tariff Commission and, more recently, before a Preparedness Subcommittee of the Senate Armed Services Committee. An excellent example is the references to a so-called investigation by the late Senator Hunt, of Wyoming, into the defense importance of the jeweled watch industry. The purported quotation of Senator Hunt relating to the capacity of Eastman Kodak Co. to make time fuses is in reality a quote from a letter signed by Mr. Lazrus as president of the American Watch Association to the Office of Defense Mobilization, dated March 24, 1954. This quoted statement was prepared by Mr. Lazrus, not by Senator Hunt.

Thereafter, on April 6, 1954, the material in this letter of the importers was placed in the CONGRESSIONAL RECORD by Senator Hunt in the form of a statement that made its contents seem to be based on information from the Department of Defense. A press release covering the statement was then issued in the name of the American Watch Association, and it is interesting to note that this release came from the office of the public relations firm which represents the watch trust in Switzerland—not the firm which represents the American Watch Association.

The material was so completely misleading that I was sure Senator Hunt was not aware of the real facts. I therefore went to see him, with two representatives of one of the jeweled watch companies. Senator Hunt told us that the prepared statement had been given to him by Mr. Tydings, and that he had placed it in the CONGRESSIONAL RECORD at Mr. Tyding's request not knowing himself that it contained highly controversial matter. Senator Hunt also told us he did not know of the press release covering his statement issued in the name of the American Watch Association.

Thus, the extremely misleading statements prepared initially by the importers' trade association, at the request of Mr. Tydings, has been used successively through the American Watch Association, Senator Hunt, the Swiss watch trust, and now over the name of the Committee for National Trade Policy.

The arguments advanced by Mr. Taft are no sounder over his signature than they have been when coming from the importers or the Swiss. He ventures that the domestic jeweled watch industry is probably suffering only from the general decline in watch sales that has occurred since January 1954. The fact is that the domestic companies suffered a decline of production from 3,161,000 ing 1951 to 2,237,00 in 1953, or about 30 percent in 2 years, while Swiss imports increased from 9,128,000 to 10,615,000. At the end of 1953 the Swiss had 83 percent of the domestic jeweled watch market and the domestic industry had 17 percent. In 1954 the domestic industry's production has been cut back severely and the Swiss will move closer toward complete monopoly of the United States market.

Mr. Taft, like Mr. Tydings, finds no national defense danger in this situation because he can see no defense importance in the watch industry. The persistence of the importers in this position indicates a startling case of myopia.

Very recently Arthur Flemming, Director of the Office of Defense Mobilization; Thomas Pike, Assistant Secretary of Defense, and Lothair Teetor, Assistant Secretary of Commerce, testified publicly that the jeweled watch industry, and, indeed, the horological industry as a whole, was absolutely essential to national defense. These statements, made after months of study by the respective agencies, are completely ignored in favor of discredited material of the importers' own making. This is a class illustration of the old saying that "there are none so blind as those who will not see."

It seems to us that the time for such trifling and obfuscation is past. As your editorial indicated, this is a serious issue that ought to be faced squarely on the facts. It appears that the Government is trying to do just that, and the repeated efforts of the importers and the Swiss to confuse the picture are rapidly approaching the status of a national disservice.

PAUL F. MICKEY,
Vice President, American Watch Manufacturers Association, Inc.

ROY M. COHN

Mr. WELKER. Mr. President, I would be less than honest with myself if I did not address this body and pay tribute to a Democrat who, I am informed, resigned on Monday as chief counsel for a congressional committee. I did not work on that committee. I was not a member of it, but I do know Roy M. Cohn, the chief counsel who resigned. I know of the excellent service he has rendered and the fight he has carried on from the days of his youth, in the practice of law, against the Communist forces which would destroy freedom-loving peoples all over the world.

Mr. President, Roy Cohn is a young man. I think he is only 27 years of age. I have never met a more brilliant attorney. I have heard it said that he has made mistakes. If so, who among us at the age of 27 did not make mistakes? Notwithstanding the fact that he has resigned from a congressional committee, I fervently hope that he may continue to serve the profession of law as well as he has served his country in the fight against communism. I think it speaks well for young America when we recall that this young man took an active part in the prosecution of the Rosenbergs, in the Remington case, in the case against the 11 top Communists, and in other investigations—all directed against those who would destroy our precious way of life.

Roy M. Cohn is the son of a distinguished jurist, Albert Cohn, of the appellate division of the New York Supreme Court. The time is coming when it will be rather difficult to obtain such experts as Roy Cohn to work for congressional committees. I know certainly of the abuse to which Senators on investigating committees are subjected. I know that the staff suffers even to a greater extent than do Senators from such abuse.

I wish it were possible for me to have associated with me in the private practice of law such a man as Roy M. Cohn, a man whom I consider to have more ability than any other lawyer I have ever known.

Since I have been a member of the Internal Security Subcommittee of the Senate it has been my privilege to know two of the greatest experts on communism. One is Judge Robert Morris, of New York, who was chief counsel of the Internal Security Subcommittee, and

with whom I have had the honor of working. The other is Roy M. Cohn.

I trust that the Communists will not derive great happiness from the resignation of Roy Cohn. America will not sit idly by while the Communists attempt to destroy her from within. I am certain that Roy Cohn will continue to fight communism whether in assisting a congressional committee or in the practice of law.

In saying that I dislike to see any man skilled in the fight against communism leave a congressional committee, whether it is an Internal Security Subcommittee or any other committee, I may add that I believe that as a result of what Roy Cohn has done the fight against communism will be enhanced from within our country. Americans will not coddle Communists at home when their sons have been killed and others may be killed by the Communist conspiracy abroad.

I ask unanimous consent that two editorials—one published in the New York Daily News, and the other in the Daily Mirror, of New York, N. Y., of July 21, 1954—be printed in the RECORD at this point as a part of my remarks.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Daily News of July 21, 1954]

COHN QUITS—SCORE ONE FOR REDS

Roy M. Cohn resigned Monday as chief counsel to the McCarthy investigation subcommittee. He did so in the knowledge that he was slated to be fired yesterday by the subcommittee's three Democrats plus CHARLES POTTER, Republican from Michigan.

Thus, the domestic Communists and anti-anti-Communists get a scalp they long have sought. They also notify any patriots who consider serving hereafter as Red hunters for Senator MCCARTHY that they may well be smeared and denounced as was Cohn for some 18 months.

We don't think that will deter the Wisconsin Senator in his campaign to wreck the criminal Communist conspiracy. But it may handicap him in finding able assistants and investigators. That, too, would delight the domestic Reds and their fellow travelers.

Not that we consider Mr. Cohn indispensable. We think he was correct in figuring that the smear drive had destroyed his usefulness to the McCarthy subcommittee.

And it may be that Cohn brought some of the abuse on himself by his rather brash manner and occasional displays of temper. Those are frequent weaknesses of youth and Cohn is only 27. There is an instructive contrast, though, between the abuse heaped on the hotly pro-American Cohn by a lot of self-professed intellectuals and the abuse which these same gentry did not heap on such characters as Alger Hiss and Lee Pressman when they were found to have embraced communism in their hot, brash youth.

We wish this brilliant young man well and think he will go far.

And now that Cohn has resigned, how about giving the heave to a certain thoroughgoing pipsqueak who functioned on the other side of the McCarthy-Cohn-Schine-Stevens battle? We refer, it almost goes without saying, to John G. Adams, chief counsel to the Army.

[From the New York Daily Mirror of July 21, 1954]

ROY COHN

The resignation of Roy Cohn must mark a new phase, not an end, of Senator MCCARTHY'S efforts to expose and combat Communists. No matter what the wording of the resignation, most Americans will insist that Roy Cohn was put in an impossible position by the wrangling Senators, who tried to make him a football of their own political ambitions. This role he has rightly refused to play.

The loss is the committee's and the Senate's. Roy Cohn has made a remarkable record as a prosecutor of Communists. He was instrumental in indicting and prosecuting William Remington, atom spies Julius and Ethel Rosenberg, and the top-ranking Communists in New York. As chief counsel for the McCarthy committee, he led the investigation of Communists in the Voice of America, at Fort Monmouth and in defense plants.

It is a remarkable record for a lawyer who is only 27 years old. Criticized for being brash and not too respectful of some Senators whom he antagonized, he won a great following among Americans who watched him over television at the Stevens-McCarthy hearings and recognized his ability and devotion to a cause that is America's.

Surely, he will have ample opportunity to continue so brilliant a career in the battle against the Communists and their friends in this country. There are many ways to fight communism, but there are too few competent fighters. Roy Cohn is among the best.

FILLING OF VACANCIES ON FEDERAL RESERVE BOARD

Mr. HUMPHREY. Mr. President, I wish to direct my attention this morning to a matter of primary importance. On March 1, 1954, I spoke on the floor of the Senate on the subject of filling vacancies on the Federal Reserve Board. I made note of the fact that there had been two vacancies on the Federal Reserve Board since October 30, 1952. I also made note of the fact that the law of the land requires that the President of the United States fill those vacancies. At that time, on March 1, I submitted to the Senate a resolution, known as Senate Resolution 216, which was referred to the Committee on Banking and Currency. I wish to read the salient portions of the resolution in order to emphasize the purpose of my remarks this morning:

Whereas Congress has, by legislation long debated and duly enacted, created a Federal Reserve Board to consist of seven members to be appointed by the President with the advice and consent of the Senate, said Board to operate as an agency independent within the Government, not subject to control of any other department of Government except the Congress, but specifically provided that said Board should report to and be under the direct supervision of the Congress; and

Whereas the Congress has given said Board broad discretionary powers in the conduct of its affairs and in its supervision of the Federal Reserve System, the regional Federal Reserve banks and their respective branches and the Federal Open Market Committee; and

Whereas the Congress has also created by legislation the Federal Open Market Committee as an integral part of the Federal Reserve System, giving this committee also wide discretion in the conduct of its affairs, and the Congress provided that said committee should consist of the 7 members of the Federal Reserve Board plus 5 presidents of 5 separate Federal Reserve banks, said 5 to alternate from year to year between the 12 Federal Reserve bank presidents; and

Whereas the Congress, when it determined that the number of members of the Federal Board should be seven, did not reach that decision by chance or caprice or by compromise, but only after long and serious and objective and nonpartisan consideration and debates; and

Whereas the legislative history shows that the number seven was finally determined as being the minimum number in the opinion of the Congress which would achieve fair geographical and functional representation on this powerful Board for all sectors of our economy and all sections of our vast country; and

I skip a part of the resolution, and continue to read:

Whereas by the use of the word "shall" instead of the word "may," it was clearly indicated that the Congress intended it to be obligatory upon the President to maintain at all times the membership of said Federal Reserve Board at the statutory required number of seven members; and

Whereas the said Federal Reserve Board is particularly an instrument of this Congress, answerable only to the Congress, and is the only instrument of the Congress through which it may discharge its responsibility for the conduct of the monetary and credit policies of the Nation: Now, therefore, be it

Resolved, That the President be, and he is hereby, requested to select immediately proper and qualified citizens to fill these vacancies on the Federal Reserve Board—

And so forth.

Mr. President, I conclude my remarks by saying that I believe it is of the utmost importance that the vacancies on the Board be filled.

The whole matter of financing the public debt, the whole matter of the creation of credit, and, in fact, all the monetary and credit policies of the country are in the hands of the Federal Reserve Board. Today there are 5 members of that Board, when there should be 7. There have been only five members since October 1952. I cannot believe that out of 161 million people it is impossible to find two competent additional members to complete the statutory requirements with respect to the membership of the Board.

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). The Senator's 2 minutes have expired.

Mr. HUMPHREY. I ask unanimous consent that I may speak for an additional 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. The statutory requirement is, as I stated in the resolution, based upon functional and geographic consideration. I suggest that it is not fulfilling the requirements of law enacted by Congress when, over a long period of time—almost 20 months now—the Federal Reserve Board is required to function with an inadequate number or a lesser number of members, namely, 5 instead of 7.

Mr. President, one of our distinguished colleagues in the other House, the Honorable WRIGHT PATMAN, recently directed his attention to this subject, and in the CONGRESSIONAL RECORD of May 20 it is noted that Mr. PATMAN addressed a letter to the President under date of May 17. Mr. PATMAN received a reply from the Presidential Assistant, Mr. Sherman Adams, in which Mr. Adams assured Representative PATMAN that the President had received the letter and that it

had been carefully noted. Mr. Adams went on to say:

We appreciate your writing in detail as you did, and I can assure you that the matter of bringing the Board of Governors of the Federal Reserve System to full strength with two strong appointees is now under the most active consideration.

That letter was dated May 18, 1954, which is more than 2 months ago.

I suggest that Congress should be very much concerned about the failure to fill the vacancies. Recently I noted the fact that the Federal Reserve Board relaxed its credit restrictions to the point of creating an additional $9 billion worth of credit. I appreciate the fact that the administration has reversed its monetary policy. A year and a half ago it had a hard-money policy. Today it is as soft as mush; it is a real soft-money policy. However, it is being done by five members of the Board, instead of the statutory number of seven.

Finally, by way of passing comment, I should like to state that recently the Senate passed a bill to create the post of Under Secretary of the Treasury.

The PRESIDING OFFICER. The additional 2 minutes of the Senator have expired.

Mr. HUMPHREY. I ask unanimous consent that I may speak for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Recently the Senate passed a bill to create the post of Under Secretary of the Treasury. Apparently it was done to accommodate the appointment to the post of a gentleman who is now serving as Deputy Secretary of the Treasury, Mr. W. Randolf Burgess. I suggest that perhaps an interim appointment will be made to the post of Under Secretary of the Treasury.

I again point out that it is of the utmost importance that a committee of Congress should examine anyone who is appointed to these critical and important posts. I now make the prediction that the appointment ot the post of Under Secretary of the Treasury will be made while Congress stands in adjournment.

I further make the prediction that the appointments to the Federal Reserve Board will be made while Congress stands in adjournment. They will be made as intermediate or temporary appointments.

The appointments should have been made during the months that Congress has been in session, so that the appointees could have been properly interrogated before the appropriate committee of the Senate, in fulfilling the constitutional and statutory requirements. It is unfortunate, and it is bad business, and I do not think the practice can be sustained or defended.

SUPPORT OF STRONG PARITY IN SENATE BILL 3052

Mr. WILEY. Mr. President, I send to the desk the text of a letter from Mr. E. M. Norton, secretary of the National Milk Producers Federation, endorsing the Senate committee's version of Senate bill 3052.

I also send to the desk the text of an interesting article which appeared in the latest issue of the noted farm magazine, Wisconsin Agriculturist and Farmer. The article points out the relatively inexpensive amounts which our parity program has cost the American people—inexpensive in relation to the tremendous benefits which have been achieved for our population.

I ask unanimous consent that both these items be printed at this point in the body of the RECORD.

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

NATIONAL MILK PRODUCERS FEDERERATION,
Washington, D. C., July 19, 1954.

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: Our dairy farmer members support the provisions of S. 3052 as reported by the Senate Committee on Agriculture and Forestry.

In respectfully urging you to vote for the proposed legislation and oppose amendments designed to modify the provisions relating to price supports, we recognize that you may not be in complete agreement with our position. If you agree with us, your support is very much appreciated. If you differ with our views, we respect your right to do so.

However, there is one factor involved in this controversy that outweighs all others—namely, the unity of agriculture. Above all other considerations, all segments of agriculture must stand together and not permit one commodity to be pitted against another commodity. Neither producers nor consumers gain when agricultural ranks are divided.

Every vote in support of the recommendations of the majority of the Senate Committee on Agriculture and Forestry will contribute toward maintaining a united agriculture. We earnestly ask your help in achieving this important objective.

We repeat—we support the provisions of S. 3052 as reported.

Sincerely yours,

E. M. NORTON,
Secretary.

[From the Wisconsin Agriculturist and Farmer of July 17, 1954]

COST OF PRICE SUPPORTS

Farmers fatten at the public trough. Headlines like that have been showing up in many big city papers. The stories tell of the terrific cost of Government-farm programs.

Here are the figures. Agricultural programs have cost each American family $1,000 since 1932. That's an average of $45 per year per family.

That looks like a lot, doesn't it. Actually it isn't a true picture at all. Here is what a little digging into the subject shows.

Only one-fifth of the total amount went into price-support programs. An average of $200 per family for the full period or a cost of $9 each year. The big slice of the money went to foreign aid food buying. Much went for war programs, school lunches, soil saving, research, and the like.

So price supports actually cost the taxpaying family only $9 a year. Isn't that pretty cheap for the abundance of food which American farmers have poured into the lifeline of the Nation?

Farmers need not apologize for having their hand in the public purse. Government helps have been mighty small payment for services rendered.

The fact is that American business receives much greater subsidies than do farmers. We don't hear as much about these Government helps to business and labor but they are there all right. Nobody worries much about them.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment of the Senator from Michigan [Mr. FERGUSON] as modified.

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE INTERCONTINENTAL BALLISTIC MISSILE

Mr. SYMINGTON. Mr. President, I wish to address the Senate this morning on matters of national defense, primarily the subject of the intercontinental ballistic missile.

The United States is not spending enough money for national defense—and what is infinitely more important, the money that is being spent is not being allocated to provide the weapons most needed.

Now, as to the problem, first in a general way, and then more specifically.

As the position of the free world continues to deteriorate in Asia, it would appear advisable to take stock of our strength.

We had hoped that our diplomatic and military policies would create favorable events, all over the world.

But that has not been the case. On the contrary, unfavorable events have been creating policy, for many long months.

If this condition continues, the free nations will lose the fight against communism; and darkness will prevail.

The purpose of this talk is to discuss frankly the growing danger—and to suggest methods for reversing this trend toward our destruction.

Each day that goes by sees the relative military strength of the United States and its allies becoming weaker as against the growing strength of the Communists.

This condition continues against a background of confusion and disagreement among our officials.

Some administration leaders now urge us to reconcile ourselves to a world of coexistence.

Others say such a coexistent world is impossible.

Whichever faction is right, our hope lies in growing strong and staying strong.

This session of the Congress is now nearing its end.

It would be reassuring to return home feeling that we had provided properly for the defense of the United States.

It would be reassuring if the people of our country could place their trust in our present program for national defense.

It is always pleasant to believe pleasant things.

But the truth of the matter is that the United States is in grave danger—and that danger is growing rapidly.

Adequate defense against advancing world communism is the greatest problem which confronts us today.

Again, even after careful study, one can only be confused by all the contradictory claims and statements emanating from people in high authority.

On one day, an official responsible for research and development in the Department of Defense asserts that the Communists are overtaking us in the race for new and improved weapons—and I am convinced that is true.

But on the very next day, after the political repercussion of these frank and honest words, his superior contradicts him—and assures us that the Russians are not overtaking us.

This contradiction, one of but many in recent months, was widely regarded as laughable evidence of bureaucratic confusion.

My own sense of humor was not so stimulated, however, because what could be more serious than whether or not the Communists are overtaking us in the critical race for the new weapons?

If they are overtaking us, and continue their relative progress, then only providence can save us.

Even if we just hold our lead, we may be slipping toward defeat, because as the free world continues to lose the cold war we have no choice but to depend even more heavily on weapon superiority.

Unless, therefore, there is some miracle, like a sudden collapse in Communist power, or a change of heart among the leaders of the Kremlin, our main hope would appear to be concentration on the development and production of the new armament.

We cannot and will not compete with the Communists in the use of manpower.

Their leaders have proved willing to expend it without stint or mercy.

In fact, it is generally acknowledged that they have one military advantage we and the other nations of the free world can never equal—their complete disregard for human life.

Nor could we win any possible future war as we have won in the past, namely, by counting on our material resources, because behind the Iron Curtain are adequate raw materials for those weapons necessary to quickly overcome the free world if we fail in our efforts to be ready.

America's resources in machinery and the skills required to build advanced weapons are superior to the skills and machinery of the Communists.

But while we devote only a small part of such resources to the building of our new-weapons military strength, the Communists are devoting a very large percentage of their resources to creating such strength.

Already they have land forces and air forces superior to ours in number, and they continue to improve their war plants and to multiply the skills they require for qualitative superiority.

Every year for some years the Communists have been graduating twice as many engineers as are graduated in America.

Every year for some years the Communists have been expanding their basic industries faster than ours are being expanded.

Every year the Communists convert more of their basic products into specialized instruments of war.

Every year the Communists add to their stockpile of atomic and hydrogen bombs.

Every year the Communists add new models of jet aircraft to their already formidable air force, and the number of these new aircraft is rising rapidly.

Of course, we are increasing the strength and striking power of our own Armed Forces. But that is not the important question.

The important question is, Does our ability to handle the Communists in case of attack grow more rapidly than their ability to successfully deliver such an attack?

Many discussions about this question would seem to involve the advancement of 1 service at the expense of the other 2; but, in any case, seldom is there any realistic analysis of the overall American defense problem.

There would seem to be little willingness to exhibit even the outlines of the true picture for all the people to see.

Is this administration more fearful of alarming the people of the United States than it is of failing to alert the people of the United States?

Is this administration fearful that the people, once they are given the truth, will demand that more be done than is being done?

Is there fear that these demands will upset programs of budget balancing or tax reduction?

Is it because of such fears that the American people are not given available evidence which proves conclusively the great progress of the Communists in the development of jet aircraft?

As example, why have not the American people been shown pictures of the new Communist long-range jet bomber which was recently displayed over Moscow?

This bomber was extensively photographed by many representatives of the free world. Why have not pictures of it been officially shown the American people?

What American official has publicly commented on the ominous significance incident to the appearance of this bomber far earlier than experts had predicted?

Americans interested in Communist air power could learn more about it from articles published in West German newspapers than from anything published in this country.

Mr. President, I ask unanimous consent that a recent article in a West German weekly, Der Spiegel, be printed as a part of the RECORD, following the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD. (See exhibit A.)

Mr. SYMINGTON. Mr. President, have we now reached a period in America's history when we are even afraid to admit that danger exists, let alone face it?

Has our national spirit quailed to the point where we want our public officials to shield their eyes from unpleasant truth?

In the twilight of Greece's glory, the flabby citizens of Athens stoned messengers who brought them news of danger.

Have we Americans become so complacent amid our luxuries and pleasures that our leaders have become afraid of being punished if they point out what sacrifices are necessary to perpetuate our freedom?

If we are to survive in this dangerous world, the people must know the brutal truth about the growing military strength of the Communists.

In recent months, in what at times would almost seem a deliberate effort to confuse, we have been regaled with speculation about various new weapons and super-weapons, atomic and non-atomic.

All possible means of delivering these new weapons have been analyzed and advocated—from old-fashioned cannon to satellite missiles.

It is important not to be distracted by unrestrained fancy—rather to isolate and examine what is known beyond all doubt.

I now want to discuss briefly two major developments which threaten the security of the United States as it has never been threatened before.

The first: Nuclear weapons, including hydrogen bombs as well as atomic bombs, can now be manufactured inexpensively and in great volume.

Shortage of fissionable material was the limiting factor in the past.

There is no longer any such shortage.

Soon we can make enough of these weapons to devastate an area far larger than the United States.

The tremendous significance here is that, if we can do this, so can the Communists.

Soon there will be sufficient weapons, of sufficient power, to destroy any and all targets which could possibly threaten either ourselves or our allies—not merely war industries and fixed military installations, but fleets and armies assembled anywhere.

Soon the Communists will amass a stockpile of these cheap packages of absolute destruction large enough to blacken with atomic fire, not just our cities and industries, but every square mile of our American landscape.

Unlimited hydrogen destructive capability is therefore with us.

This fact is not entirely new. But the significance of this hydrogen potential has never been stated with either clarity or frankness.

It is this: The dispersion of targets, military or otherwise, no longer offers a solution—and accuracy in delivering

these weapons becomes less and less important.

Random discharges of such tremendous power could devastate any nation on earth.

The second development of supreme importance to the future security of the United States is this: Within a few years it will be possible to deliver atomic and hydrogen weapons by long-range, intercontinental ballistic missiles, descendants of the old German V–2.

That weapon was most effective over 10 years ago—and it is dangerous to our national security that since then we have not followed the Communists in concentrating on its improvement.

But the V–2, the first of these ballistic missiles was not even a model T compared to the IBM's of today.

The V–2 had a range of about 200 miles. The new missiles will have a range of 4,000 to 5,000 miles.

They will be far more accurate than the V–2—and they will have hydrogen bombs for warheads.

These new units of destruction will climb so high, and descend so fast, they will need protection against destruction by atmospheric friction.

They will be guided only during the first portion of their climb, but guided so precisely that any error in accuracy can be measured, not in miles, but in hundreds of yards.

To those listening to the arguments of biased professionals who advocate fighting a possible future war with weapons of the past war—something which never happens—these developments may sound fantastic.

But the intercontinental ballistic missile is not fantastic at all.

It should be less surprising than the original German V–2, because it is little more than a logical extension of the V–2, in range, in accuracy, and in power.

This second important development—intercontinental missiles—is closely related to the first—hydrogen weapons.

The incredible destructive power of hydrogen warheads makes it possible to destroy a nation by launching a hail of ballistic missiles against it.

The effect of such a missile barrage on an entire continent would be comparable to the effect of an ordinary artillery barrage on a few acres of battlefield.

The most ominous aspect of this new weapon, however, is that once launched, there is no defense against it.

Such a missile does not depend upon electronic guidance as it approaches its targets; and therefore it cannot be thrown off course by electronic jamming.

The elaborate and expensive systems of radar defense we are being urged to build would be utterly useless against such a missile barrage. Practical prototypes of these weapons already exist. But no workable method of intercepting or deflecting them has been devised, even in theory.

There is no doubt whatever that intercontinental ballistic missiles will be produced in quantity years before any adequate defense against them is worked out.

Will the Communists have these IBM's before we do? There are many reasons to believe they will.

For over 30 years the Russians have been working on rockets—and this type missile is a logical development of the twin-stage rocket.

For some time now such Moscow periodicals as Izvestia, along with East German press and radio, have openly announced their progress with twin-stage rockets.

We know that, over 9 years ago, the Communists captured a number of German scientists who, in addition to working successfully on the V–2, were also designing an IBM for attack on the United States.

We can be very sure that these Germans, along with the outstanding Soviet scientists, have made much progress in the latter field.

We also know that over the years we have consistently underrated the ability of the Communists to manufacture superlative new weapons of war in large quantities.

What better illustrations of this ability could be given than the Joseph Stalin tanks and the MIG–15 jet fighters?

America has also made progress. But over here our policy is a far cry from the all-out program of the Communists.

There has been no such all-out program in this country.

In fact, the opposite is true, because for years the United States has appropriated less, each year, for research and development, than it did the previous year.

We had our share of luck, as well as genius, in the development of the A-bomb and the H-bomb.

The Communists also have their geniuses, however, including the great atomic scientist, Kapitza; and they might also have some luck.

Behind the Iron Curtain there is tremendous concentration on the improvement of these new weapons, a concentration which, as we have already mentioned, has been conspicuous by its absence over here.

These two all-important facts—the hydrogen bomb and the IBM—are not something in the distant future, to be handled by our children, or our grandchildren.

They are with us now. They will be with us in great quantity within from 5 to 10 years.

And it is probable, on the basis of our present plans and programs, that the Communists will have these hydrogen missiles in such quantity before the United States.

So the time to take stock is not tomorrow, but right now.

Should we continue to soft-pedal these realities at the same time we enjoy the highest standard of living in history?

What satisfaction will there be to him who is the richest man in the graveyard?

The Communists are making heavy sacrifices to outstrip us in the race for control of the air, above and between the continents of Asia and North America.

When we consider this steadily growing hydrogen potential of the Communists, along with their improved ability to deliver missiles with hydrogen warheads, other recent events begin to fall into their true perspective.

As example, it is now all too clear that warfare, as known in the past, is a thing of the past.

Yes; for the first time in their history, the American people must now face up to the real meaning of vulnerability.

Today nations could be destroyed as quickly and as completely as in the past a battalion of soldiers could be defeated, or a ship sunk.

Today every nation of the free world, except the United States, is practically helpless before the armed might of those who have pledged to destroy them—the Soviet Communists.

As we seek to understand the shifts in reaction and world policy now characteristic of some of our old friends, let us remember that these friends are far more vulnerable today than they were in 1940.

Let us also remember that in a short time, primarily because of these two new developments, the United States may be more vulnerable than Great Britain was in the late thirties.

Let me ask again, as I did in a talk at Baylor University in Texas over 5 years ago: "Who is behind us today as we were then behind England?"

If we are attacked tomorrow, and do not have the capacity to retaliate with instant and total devastation, we shall go down in defeat; and freedom will perish from the earth.

In this century we have had one consistently accurate prophet with respect to the intentions of those who oppose freedom—Winston Churchill.

Anyone who has read While England Slept knows that if his advice had been followed 20 years ago there probably would have been no Second World War.

At Llandudno, Wales, some 6 years ago, Mr. Churchill prophesied again. Listen to what he said, as his patriotism foresaw the increasing helplessness of Britain in this air-atomic age. As my colleagues know, the Soviet did not have the atomic bomb. I now quote Mr. Churchill:

> Nothing stands between Europe today and complete subjugation to Communist tyranny but the atomic bomb in American possession.
>
> The question is asked what will happen when they get the atomic bomb themselves and have accumulated a large store.
>
> You can judge yourselves what will happen then by what is happening now.
>
> If these things are done in the green wood, what will be done in the dry? If they (the Russians) can continue month after month disturbing and tormenting the world, trusting to our Christian and altruistic inhibitions against using the strange new power against them, what will they do when they themselves have large quantities of atomic bombs?
>
> No one in his senses can believe we have a limitless period of time before us. We ought to bring matters to a head and make a final settlement.
>
> We ought not to go jogging along, improvident, incompetent, waiting for something to turn up—by which I mean waiting for something bad to turn up.

But we have gone "jogging along, improvident, incompetent, waiting for something to turn up." And what has turned up has been bad.

As stated, now the Communists not only have the atomic bomb, but also the

hydrogen bomb, and the intercontinental bombers to deliver it.

As for us, we have the fine, courageous stand of Korea—and the sadness of the retreat of the free world in Indochina.

If in the future we continue to appease the advance of the Communists, as we are doing today, what shall we do when our vulnerability to sudden attack is increased a hundred times as a result of the joining together in quantity production of the two basic developments previously mentioned in this talk?

If we fail to stand firm, to hold our ground, to demand justice for the Americans in Communist dungeons, to act, now, as a rallying point for all freedom-loving nations—if we fail to do these things today, where tomorrow shall we find the courage to resist the ever-increasing arrogance of Communist power?

Why are we unwilling today to start making the sacrifices which will assure us an advantage in these new weapons?

From the standpoint of our national security, is it again going to be too little and too late; especially as, in this atomic age, too late would be final?

I do not believe in any policy which advocates striking the first blow.

But I do believe in having our Government face the facts, and telling the American people the truth, so they will know what they must do.

This would be the first step in getting started a program which will make us so strong any would-be aggressor will hesitate before attacking.

As for striking the first blow, the Soviet Communists have already broken the peace, a long time ago. After they had concentrated their power, in defiance of solemn agreements they moved in to enslave Poland, Rumania, Bulgaria, Hungary, West Germany, and finally Czechoslovakia.

As a great soldier of the free world has recently said:

> The first thing to realize, if we are to direct our strategy wisely, is that we are engaged in world war III now, and have been for many years.
>
> It is difficult to name a date for its beginning. The uneasy partnership of 1941–45 was not remotely like an alliance; from the Soviet point of view it was merely a convenient and for them extremely fortunate, arrangement which made it possible for them to dispose of one batch of enemies before going on to deal with the others, the rest of the capitalists' world.
>
> For those who like their history neatly paragraphed by dates, a D-day for this stage of the war might perhaps be that day in 1948 when poor Jan Masaryk fell to his death from a window in Prague.

Yes, Mr. President, the war has been going on for some time—and many of the blows are clear.

A direct blow was struck against the free world when the Reds intervened to defeat our ally, Nationalist China.

A direct blow was struck against us when first the North Koreans, then the Red Chinese, poured into Korea, and inflicted upon us tens of thousands of casualties.

A direct blow was struck against the free world when another free nation, Tibet, was overrun by Chinese Communists.

Today, the forces of our NATO ally, France, are being driven back to the Tonkin Gulf, by Communist forces equipped with Chinese and Russian weapons.

American and Allied planes have repeatedly been fired upon. Often they have been shot down, either over the high seas or the territory of free countries.

Many Americans are still held without cause or excuse in Communist prisons, while all we do about it is protest vainly for their release.

Should we not take whatever steps are necessary to stop these atrocities—and show more determination about preventing anti-Communists from being overrun and enslaved by the Communist hordes?

Just 2 years ago, in a political campaign, we heard much talk of freeing the enslaved peoples behind the Iron Curtain. Who has been freed? Instead, have not millions more who dared to work and fight on the side of freedom become enslaved? How can we speak of peaceful coexistence while such tragic retreat continues?

The question today is not whether we shall fight back. It is whether we shall stand our ground, for we are failing to do even that, and everyone knows it.

I do not always agree with my distinguished colleague, the majority leader. But I certainly do agree with him in that part of his recent address when he stated we should cease taking losses at the council table, and that we must, by deeds as well as words, prove to the Communists that we mean to defend ourselves against further Communist aggression.

All of us know now that we have failed to stand our ground when we should stand, and are failing to build our strength while we still may have the time to build it.

All-out war will occur when the Communists are confident they can win, and no sooner. The reason we are not at war today is that they have not yet achieved a decisive advantage in the new weapons.

But the Communists steadily improve their position in other fields besides the weapons field. They are gaining ever more territory and ever more people.

Why? Because we of the free world let them do it, without any real show of resistance. Most important, they are moving ahead of us in the advanced weapons—because we are not making any comparable effort to produce those weapons.

It is incredible, and it is shameful, that despite these facts, this year we are asked to appropriate less money in research and development than we have for several years.

It is incredible, and it is shameful, that we are cutting the personnel of our Armed Forces.

It is incredible, and it is shameful, that we are losing indispensable technical specialists, simply because we refuse to pay them and house them well enough to keep them.

It is incredible, and it is shameful, that in the present crisis we have, nevertheless, cut ROTC programs so brutally that in some cases honor graduates from outstanding colleges have been denied commissions.

What siren songs have seduced us? Are our dreams so sweet that we can sleep through this rising clamor of danger while our advantages melt away, while our vulnerabilities increase, while our allies weaken in power and spirit, and while precious months and years are lost?

One of the dreams that lulls us into this hopeful make-believe, is the theory of the so-called atomic standoff. This is the argument that, when both we and the Communists have plenty of atomic weapons, neither of us will use them. To gamble on such a miracle is like betting that two men armed with loaded pistols will merely wrestle, until one of them is thrown to the ground and kicked to death.

Mr. President, nations, like men, know that terrible weapons can mean sudden death; but neither nations nor men have ever refrained from using their decisive weapons in a life-or-death fight.

Some say these evil atheists, who treat human life as a commodity, would never destroy millions of our people in a hydrogen attack. Those who take that position should balance it against our knowledge that the rulers of the Kremlin were perfectly willing to destroy millions of their own people in order to establish a particular farm program.

As for our own policy, would we allow ourselves to be defeated in another all-out war without using the only weapon which could bring us victory? Would we allow our allies in Europe and Asia to be overrun and enslaved without striking an effective atomic blow in their defense? If we did so allow, we would be sealing our own doom.

Let us hope General Gruenther's statement a few weeks ago really is our national policy, when he said:

> Our minds are clear that we must and shall use every weapon in our arsenal.

Responsible leaders across the sea admit there is no chance whatever to withstand the massive manpower of the Communists on the continent of Eurasia unless we employ nuclear weapons. Therefore we must maintain our qualitative advantage. This can be done, but it will require far greater effort than we are making today.

If we are to continue to exist as a free people, America must lead in weapons; first, with superior bombers and fighters, naval task forces, and mobile ground forces. Second, and as soon as possible, with superior long-range missiles. These missiles must be buried deep in the earth—and positioned to avoid the possibility of sudden destruction. If we adequately increase our efforts toward such preparation, and stand firm against all threats, we can hold these power-drunk Communists in check.

In conclusion, I urge with serious and earnest conviction that the deeds and sacrifices which must be required of the American people be told to them clearly and unmistakably by those who have all the facts, and who have the responsibility. If the people get the truth, they

will do whatever is necessary to remain free.

I know of course that we must also be strong economically and spiritually, with abiding faith in our way of life. Above the atomic, hydrogen, or even the cobalt bomb, is the integrity of man.

But God has given us the opportunity to defend that way of life through adequate military strength—and the sooner we attain that strength the sooner we can halt the present drift toward a helplessness which can only result in the loss of the free world.

Some 15 years ago a valiant warrior stood his ground against the Communists—Marshal Mannerheim, of Finland. The marshal said:

The rights of nations are not defended by declarations and phrases. There must be the desire to defend one's country by deeds and sacrifices.

EXHIBIT A

BOMBS ON AMERICA

(Translation of article appearing in June 16, 1954, issue of Der Spiegel. Der Spiegel is a weekly news publication widely read. There is no byline on this article. However, one reviewer suggested that it might have been written by the former Chief of Staff of the Luftwaffe.)

The hope of the American bomber force was the B–52. This most modern of all American jet aircraft has, without droppable tanks, a radius of action of over 5,000 kilometers; it can operate at altitudes up to 18,000 meters and flies with a speed which might lie above 1,000 kilometers an hour. The first production aircraft of this kind left the Boeing plant in March of this year. It will take until autumn of 1955 until the first active squadron can be placed in service. At this time there are two aircraft in service.

The Chief of Staff of the United States Air Force, Gen. Nathan F. Twining, was recently compelled to admit that the American pride in the superiority of the B–52 was somewhat premature and somewhat too self-complacent: "The new heavy jet bomber of the Soviet Union is in its form and in its characteristics comparable with our own B–52. * * * The Reds have shown the world that they are in possession of a jet bomber of a similar type."

When on the 1st of May military attachés clicked their cameras on Red Square in Moscow in order to film the new heavy bombers flying past at low altitude, the Soviet liaison officers looked on, smiling in a friendly way. They were, even more surprisingly, ready to render information. "Molot" (Hammer) is the name of the new model, they explained to foreigners.

The material which the Western air attachés then transmitted to their superior headquarters sufficed to destroy the various illusions concerning Western air superiority. General Twining characterized the parade of May 1 as a "more important milestone than the knowledge of the first Soviet atomic-bomb explosion."

Immediately an expert commission under the direction of Maj. Gen. James S. Stowell was assembled by the United States Air Force to evaluate the material on the new Soviet bomber. On May 22 its investigation ended and it submitted its report.

According to the findings of the commission, the Soviet type resembled the B–52 externally, but exceeded it, apparently, by about 1 meter in the span of the lifting surfaces. On the contrary, the Soviet jet bomber is propelled by only 4 jet engines, while the B–52 possesses 8.

This fact was so sensational for specialists that, for example, the British wing commander, T. C. Musgrave, was led to the premature conclusion that the bomber exhibited in Moscow must have been flown only with 4 engines, while 4 others were built into the wings, and during the parade were flown throttled down.

Musgrave had to give up these theories after the photographs were laid before him and the experts had proved to him that a large bomber could not be flown at a speed of 880 kilometers per hour (as the attachés estimated the speed) over the parade if it used only half of its engines.

From this it is to be concluded that, assuming about the same weight for the Soviet and the American aircraft, the Soviet engines must develop approximately twice as much thrust as the Pratt & Whitney J–57 engines, with which the B–52 is provided. Jet engines of such strength have not even been put on the drawing boards in the United States.

A further conclusion emerges: Four engines which have approximately the same thrust as eight weaker engines have in combination do not consume the same quantity of fuel, but about 25 percent less. As a consequence, payload and radius of action of the Soviet bomber exceed that of the B–52.

The expert commission has unanimously reached the conclusion that the new bomber is already in production.[1]

The number of aircraft already on hand was estimated diversely: British experts were of the opinion that the Soviets have about 1 wing (27 aircraft) ready for first-line use, while the Americans, and with them a few neutral observers, attacked this figure as being too high.

The observers concluded: The Soviet Union possesses a long-range bomber that can be described as a technical success; the bomber is, as a result of its speed, in position to evade defensive fighters (in English) ("fast enough to elope interceptors"—"elope" is the verb Der Spiegel quoted); the aircraft has a radius of action which permits flights from the Soviet Union to the United States of America and return; the Soviet Union is, accordingly, in position to execute atomic attacks against the United States of America.

Adm. Ben Moreell, retired, during the war commander of the American Sea Bees in the Pacific, now president of Jones & Laughlin Steel Corp., calculated, under the impact of the Moscow May Day parade, that 10 atomic bombs could knock out about 75 percent of the entire American heavy industry.

The Americans replied to the Moscow exhibition with the announcement of a supersonic bomber. In the development of the B–58, the planned aircraft, essential advances had been made.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

Mr. SALTONSTALL. Mr. President, will the Senator withhold that suggestion for a moment?

Mr. KNOWLAND. Certainly.

Mr. SALTONSTALL. I should like to reply very briefly——

Mr. KNOWLAND. Mr. President, some time ago the distinguished Senator from Missouri [Mr. SYMINGTON] mentioned that he had an important speech to deliver. It has been an important speech. A day or so ago I stated that until the pending business was disposed of I would object to Senators yielding except for questions. If the Senator from Massachusetts can phrase his remarks in the form of questions, I have no objection. Otherwise, I hope we can proceed with the pending business. There will be ample time, after we have concluded consideration of the pending bill, to discuss questions of foreign policy.

The PRESIDING OFFICER. Is the Chair correct in his understanding that the Senator from California withholds his suggestion of the absence of a quorum?

Mr. KNOWLAND. I withhold it temporarily. The Senator from Massachusetts may desire to address a question or two to the Senator from Missouri.

Mr. SALTONSTALL. I will phrase my observations in the form of several questions directed to the Senator from Missouri.

Mr. SYMINGTON. Mr. President, I thank the majority leader for allowing me to answer, and I am glad to yield for a question.

Mr. SALTONSTALL. Mr. President, I do not intend to take any great amount of time. However, I did not want to let pass by unchallenged the several statements beginning, "It is incredible, and it is shameful." I do not agree with them.

The Senator from Missouri is a member of the Armed Services Committee, as I am. Will not the Senator agree with me that this spring we had some very frank and outspoken briefings by various leaders of the armed services? As one member of the Armed Services Committee, from the Senator's side of the aisle, has said to me, they were the best and frankest briefings that have been given by members of the armed services to our committee. Will not the Senator agree with me that those briefings were very complete, and answered every question we had the intelligence and the knowledge to ask?

Mr. SYMINGTON. I will agree that the military members of the Joint Chiefs of Staff who appeared before us answered questions put to them. However, in a spirit of fairness—and I know the distinguished chairman of the Armed Services Committee would want me to say this—I believe it important for the American people to realize that our recent policies in the Far East have been adopted over the direct protest of members of the American Joint Chiefs of Staff. I believe there are members of our Joint Chiefs of Staff who agree with many Members of the Senate on both sides of the aisle that the time for appeasement of Communist aggression is over, and that we must make a stand somewhere, on some basis.

Let me add that I am very proud of those members of the Joint Chiefs of Staff who feel as they do in that connection. However, I fully understand why, when decision is made by those above, they are not in a position to oppose in a hearing before our committee.

Mr. SALTONSTALL. On the Armed Services Committee are representatives of the people of Missouri, Massachusetts, Washington, and Mississipi. Those representatives are present in the Chamber. The Senator will agree with me——

Mr. SYMINGTON. I hope the Senator has nothing against Kentucky and

[1] As proof, English and Scandinavian attaché reports were adduced which could demonstrate that in the past the Soviet Union had never exhibited weapons at their annual May Day parade which had not already been introduced to the troops.

Tennessee, and I must not forget California, either.

Mr. SALTONSTALL. I wonder if the Senator will agree with me that, to the representatives of those various States pertinent information was given, so far as possible, to members of the Armed Services Committee. The Senator will agree, will he not?

Mr. SYMINGTON. May I take a moment to quote again from a very great fighter for the free world against communism. I refer to Marshal Mannerheim, of Finland. The marshal said:

> The rights of nations are not defended by declarations and phrases. There must be the desire to defend one's country by deeds and sacrifices.

I agree we have heard many fine declarations and fine phrases, but I do not think we have a program adequate in scope to defend the security of the United States and the free world. That is the purpose of my address this morning.

Mr. SALTONSTALL. In the form of questions, I should like to ask the Senator about 1 or 2 further points.

I am a member of the Appropriations Committee, as is the majority leader and several other Senators who are present in the Chamber. I have heard in that committee the plea that there must be no reduction of appropriations for research, either in connection with airplanes or other weapons of war, such as self-propelled weapons of various kinds.

This year, particularly, we have appropriated, for research, through the Commission on Aeronautics, which is engaged in research on the fundamentals of airplanes, the full amounts requested and they are approximately the same as the appropriations for previous years. Has the Senator any information, beyond the information which is given to the Appropriations Committees, showing that less money is being spent for research?

Mr. SYMINGTON. I shall be glad to read the figures to the distinguished Senator from Massachusetts.

In 1953, for example, the fiscal year, for research and development we appropriated for all 3 services and the Office of the Secretary of Defense, $1,586,000,000. In 1954, despite more knowledge on our part about the tremendous concentration on new weapons in the Soviet Union, we appropriated a great deal less, namely, $1,390,000,000. In 1955, with apparent Soviet superiority in the intercontinental ballistic missile field becoming more possible, we appropriated still less, namely $1,352,000,000.

More important than the figures, however, is the approach to the problem. If the American people knew the facts, as on the basis of, say, the Manhattan district project, which project resulted in our getting the atomic bomb before anyone else, every scientist in the country would want to drop what he was doing to work for the defense of his country; whereas today few scientists are eager to work on a problem which seriously affects the security of the country.

Mr. SALTONSTALL. I agree with the Senator. Let me add to those statements the observation that I believe the Senator will find that there are substantial unexpended balances from various previous appropriations for research, which must be added to the present appropriations.

Just two more questions, Mr. President——

Mr. SYMINGTON. Mr. President, will the Senator yield at that point?

Mr. SALTONSTALL. Yes.

Mr. SYMINGTON. What the Senator says is true, and unexpended balances add to the logic of my remarks. I should like to point out also that in the 1955 budget the appropriations for research and development, as passed by the House, are still further reduced than the figures just mentioned, to the point where, this year, and despite world conditions, including the great importance of hydrogen weapons and intercontinental ballistic missiles, we will be authorizing millions of dollars less for research and development than a few years ago.

Mr. SALTONSTALL. I most respectfully disagree with the Senator on that point, although the figures I have stated are from memory. The question of continental defense, I realize, of course, is of great importance to our national security. However, I should like to ask the Senator from Missouri if he is generally acquainted—perhaps I am more intimately acquainted because I have had the responsibility of trying to learn more about it—with the steps taken, the effort expended, and the money which is being put into our continental defense today.

Mr. SYMINGTON. I believe I am more than generally acquainted, having followed the subject carefully since leaving the Pentagon some years ago. I believe it important to have adequate continental defense, primarily for two reasons. First, under hydrogen-bomb attack, such defense would mean that more people can get out of more cities; secondly, it means that our strategic Air Force, with its capacity to retaliate, will have more time to disperse.

However, one of the basic points of my talk this morning is that today there is no defense against the new intercontinental ballistic missile, regardless of whether we spend $5 billion or $50 billion in continental defense.

There is absolutely no known method for defending the United States against an intercontinental ballistic missile attack.

Hydrogen bombs can now be made inexpensively and can be delivered in large quantities. Therefore it is extremely important for the American people to understand why our foreign policies must be more decisive and more realistic than they are today.

Mr. SALTONSTALL. I agree with the Senator from Missouri that there is no known defense today against an intercontinental ballistic projectile of the kind the Senator mentions. However, I would also state that in my opinion—and I know the Senator has the same opinion—that that is still a weapon of the future. I should also state that we are developing our research and knowledge so as to be able not only to build such a weapon, but to know how to defend against one which might be aimed against us.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. SALTONSTALL. I yield.

Mr. SYMINGTON. So that no false impression may be created on this subject—and of course I know the distinguished Senator from Massachusetts would never want to give such an impression—I believe that within 5 years there is a chance there will be enough intercontinental ballistic missiles, with hydrogen warheads, in the possession of the Soviet Union, to deliver an all-out attack against the United States. I am certain that that will be true in less than 10 years. The advisers on that subject are the same ones who stated accurately that the Soviet Communists would have the atomic bomb many years before most experts predicted they would. In fact, some of them thought the Soviets would have the bomb by 1948, instead of 1949.

My point is that it would be a terrible tragedy from the standpoint of our future security if we try to wave aside, with seductive remarks, the fact of the growing danger of the long-range intercontinental ballistic missile with its hydrogen warhead.

Mr. SALTONSTALL. I should like to ask one more question, and I will put it in the form of a 4-part question.

Must we not proceed with realistic steps, and take the steps one by one, and make them practical? Does the Senator from Missouri know of any attempt on the part of the present administration to conceal any facts it can legitimately divulge? Must we not proceed on a long-range basis over a period of years, and not on a crash basis? Finally, from a spiritual and moral aspect, must we not proceed in a spirit of optimism and hope and faith in our own ability as free men to defend ourselves and our country and maintain the safety and security of our people, if we are going to go ahead in the United States.

Mr. SYMINGTON. I would appreciate it if the Senator would ask the first question again. I shall try to answer it, and then I shall proceed to the next question.

Mr. SALTONSTALL. I would say, with somewhat of a smile, because I want to cooperate with the majority leader—I know what he is trying to do, and I am trying to live up to what he has asked me to do—the first question, if I can remember it myself, is whether we must not proceed with realistic steps, one by one, and make them practical as we go along?

Mr. SYMINGTON. I say, also with a smile, that the Senator from Massachusetts has asked me if I am in favor of an early spring. I completely agree with him. I ask what is the next question.

Mr. SALTONSTALL. Does the Senator from Missouri know of any attempt on the part of the present administration to conceal from Members of Congress and the American people generally any facts it can legitimately divulge with regard to security?

Mr. SYMINGTON. The answer to that question is "Yes." Does the Senator from Massachusetts care to give me the third question?

Mr. SALTONSTALL. I shall leave it at that and debate the question with the Senator later.

Mr. SYMINGTON. I should like to say respectfully to the distinguished senior Senator from Massachusetts, as I stated in my talk, that we were shocked when we learned of the long-range bomber development of the Soviet Communists. Their new bomber was paraded before the Soviet people in the May Day parade. It was extensively photographed by persons of the free world. It has been extensively discussed in Europe. Yet there has been no official announcement, and no official information with official pictures, given to the American people on this bomber.

The point of my talk was that the American people must realize how important it is to follow these matters and face up to the Communist advances.

Mr. SALTONSTALL. I have seen a picture of that Soviet bomber in the newspapers and magazines.

Mr. SYMINGTON. So have I. However, I have not seen anything official. I have not seen any official statements about it, with pictures. I have not seen any warning to the American people in connection with it. I read that the Assistant Secretary of Defense in charge of Research and Development made the statement that the Soviets were overtaking, or getting ahead of us, in some of these new weapons. Later I read that statement was denied by a person in higher authority. I believe the first statement was correct, and the second statement was incorrect.

Mr. SALTONSTALL. The Senator from Missouri may have seen no official publication on that subject, but I state as my own personal opinion, not based on anyone elses opinion, that if there is no knowledge that such a plane is being produced by Russia in any quantity or that the plane is fundamentally sound at the present time, would it be wise for the Department of Defense to say, "Here is a weapon that may be used against us in the next few years," when they know or have reason to believe that such a weapon does not exist in any dangerous numbers?

Mr. SYMINGTON. I do not think we should fool the people with regard to these matters.

Mr. SALTONSTALL. We do not want to fool the people.

Mr. SYMINGTON. If the distinguished Senator from Massachusetts will remember, the estimated number of planes, modern long-range bombers now in the hands of Russia, was given to us in executive session in the Armed Services Committee, and the number exceeds the number of our latest bomber which we possess today.

Mr. SALTONSTALL. I know the distinguished Senator from Missouri has great intellectual capacity, so I shall ask my last 2 questions as 1, so as not to take any unnecessary time of the Senate.

In view of what the Senator himself has said, and from what we know, is it not wise to proceed on a long-range basis in building up our defenses? The other question is, Must we not in the next long-range period, certainly as long as the Senator and I shall live, pursue our course with optimism and faith, and with a desire to build up the morale of our people, rather than with an idea that the world is going to come to an end, that we are going to be defeated, and that we are not doing our part? Must we not proceed along spiritual lines as well as practical lines?

Mr. SYMINGTON. May I answer the second part of the Senator's question first? If the distinguished Senator will do me the courtesy of reading my talk in detail at his convenience, he will see, especially in the last part, that I recognize the dignity of man and the vital importance of spiritual and moral values. But I remember the history of those brave Spanish missionaries who landed in Florida, and walked up the beach, only to be promptly scalped by the Indians. I think we owe it to our children, in addition to teaching them moral and spiritual values, to supply our country with adequate military strength, because we are the last great power in the world left against the Communists. To hold to our traditions, and to be strong in the face of this terrible advancing aggression, we cannot depend on moral and spiritual values alone.

Mr. SALTONSTALL. I agree.

Mr. SYMINGTON. Now to the second part of your question: If I may respectfully say so, I do not think these matters can be handled on a sudden or a spasmodic basis. We must have a long-range program, putting into it anything and everything necessary for our security. I do not believe we are doing that, which is one of the reasons I am taking the time of the Senate this morning. We are faltering in our decisiveness with respect to our military position, just as, in my humble opinion, we are faltering in decisiveness in the field of foreign relations.

Mr. SALTONSTALL. Confining myself to the military, I believe there is decisiveness in going forward with the production of constantly changing weapons. I believe there is as much decisiveness as we can possibly have.

Mr. JACKSON. Mr. President, will the Senator from Missouri yield for a question?

Mr. SYMINGTON. I shall be glad to yield to my distinguished colleague from Washington.

Mr. JACKSON. With the tragic loss suffered in Indochina, as determined by the truce signed last night in Geneva, does the Senator feel there is a need for increasing our expenditures for defense over the amount which we have already appropriated for the fiscal year 1955?

Mr. SYMINGTON. Unfortunately, during the debate on appropriations for military defense, I was otherwise engaged.

Mr. JACKSON. I may say that the distinguished junior Senator from Missouri was not the only one in that position.

Mr. SYMINGTON. I know that to be true. Therefore, I could not go into the questions brought up on the floor by the able Senator from Massachusetts. But I think it extremely difficult for the American people to understand the justification for constantly reducing our expenditures for national defense, especially in that field of research and development which involves new weapons, while at the same time the Communists are steadily increasing their control over millions of acres, and millions of people. More specifically, I agree, without reservation, to the question of the distinguished junior Senator from Washington, that our military appropriations do not face up to the ever-growing peril.

Mr. KNOWLAND. Mr. President, will the Senator yield for a question at that point?

Mr. SYMINGTON. I shall be glad to yield.

Mr. KNOWLAND. I desire to follow the rules, and so will confine myself to asking a question. I should like to ask the distinguished Senator from Missouri if he does not believe that the policy which has been enunciated abroad of peaceful coexistence with ruthless and aggressive communism is not comparable to the situation of an individual who has been put into a cage with a vicious tiger which has just been well fed and is digesting a big meal, but when he digests his meal, which in this case is a big piece of Indochina, he will then seek the next source of his meat, which will be the unfortunate individual who is trying to coexist with him in the tiger's cage?

Mr. SYMINGTON. I could not agree more heartily with the Senator. I am reminded of that poem which begins, "There was a young lady from Riga who went for a walk with a tiger." We all know what happened. I cannot remember the last line. [Laughter.]

Anyway, there was a smile on the face of the tiger when he came back by himself. [Laughter.]

Mr. JACKSON. Mr. President, will the Senator from California yield?

Mr. KNOWLAND. I yield to the junior Senator from Washington.

Mr. JACKSON. Is it not true that as we lose to communism parts of the world's real estate, together with population and resources, the responsibility which rests upon the United States to defend itself is increased by just that much?

Mr. SYMINGTON. I agree. The more land we lose to those behind the Iron Curtain, the less chance we have of successfully defending ourselves, and, therefore, the greater the necessity now for a firmer attitude.

Mr. JACKSON. Mr. President, I wish to commend the distinguished Senator from Missouri for the invaluable contribution he has made to our defense effort over the years and his continuing contributions to the security of our country and of the free world.

Mr. HILL. Mr. President, will the Senator from California yield?

Mr. KNOWLAND. I yield.

Mr. HILL. I should like to join with the Senator from Washington in all he has said about the Senator from Missouri. We know of the great experience of the Senator from Missouri and the authority with which he speaks. Time and again on this floor, and time and again in many other places, he has made tremendous contributions to the defense of our country. I think the speech he has delivered this morning could not

have been more timely, more thought-provoking, or more challenging. I wish heartily to commend him and to congratulate him.

Mr. SYMINGTON. I thank my distinguished colleague, the senior Senator from Alabama and my colleague the junior Senator from Washington, for both of whom I have great affection and respect.

Knowing of the tremendous knowledge and experience in the field of military matters of the senior Senator from Alabama, there is no one from whom I would rather receive those undeserved remarks. I say to the distinguished Senator from Alabama, who has been such a great advocate of airpower in the years I have had the honor to be associated with him, that if the facts as presented in this talk today are true, it is a terrible position into which we have allowed this country to descend. And I have done my best to get the truth in order to present it to my colleagues.

Mr. STENNIS. Mr. President, it is my good fortune to sit next to the distinguished junior Senator from Missouri in the Committee on Armed Services. I know from daily contact with him of the deep concern he has with reference to the problems of defense. I also know of the real zeal and effort he devotes to these matters, in trying to help find the right course of action.

I think his speech, particularly as he emphasized the problem of long-range missiles, is very timely, and foreshadows coming events. What the Senator has said about long-range missiles is all too true. No other power on earth can begin to cope with the problem from this viewpoint.

I hope the Senator will continue to emphasize, urge, and push the matter in the inner councils of the Pentagon and at other levels, because the immensity of the problem, when considered with various defense problems on so many other fronts, could be overlooked, and action might come too late.

We are all indebted to the Senator from Missouri for what he has said. I disagree with him somewhat about going into Indochina. At the same time, what has happened in Indochina, which has culminated in the signing of armistice papers within the last 24 hours, certainly emphasizes the point he makes, particularly with respect to long-range missiles.

I hope the speech of the junior Senator from Missouri will be circulated throughout the Nation, and that he will make other speeches on this very important subject—not the scare type, but speeches having an intelligent, deliberate, helpful approach. I heartily commend the Senator.

Mr. SYMINGTON. I thank the distinguished Senator from Mississippi. It is a privilege, an honor, and a pleasure to be associated with him on the Committee on Armed Services, and to follow his fine mind when he approaches problems incident to our national security. If I may respectfully say so to the Senator from Mississippi, I do not think I said we should go into Indochina. I believe however, that the free world should not have gone out of Indochina. That opinion is held not only by Members on the other side of the aisle for whom I have great respect, but is also the firm conviction of Senators on this side of the aisle as well as military persons in our Government, for whom I have the same respect.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the distinguished Senator from Oklahoma.

Mr. MONRONEY. I wish to compliment the distinguished junior Senator from Missouri upon again, as he has done in the past, raising his voice in the Senate to warn the country of the need for keeping our defenses at a high and efficient level. Much as we hope that the experiment with peaceful co-existence may succeed with our allies, their efforts in this direction, I think, put an impelling need upon us not to gamble with the future of the world by failing to build up the defenses of the free world here in America. As the various moves are made by our allies in the effort for co-existence, I think it should only stimulate us and force us in the Western World to recognize that we probably are the last and most secure bastion of freedom. If we neglect to keep abreast of the technical development of long-range guided missiles, and other weapons of which the Senator has spoken so ably today, then we may fail to be the means of keeping the world free from the onrush of Communist aggression.

I believe we can well reflect upon a statement made by a great leader of the Republican Party, Theodore Roosevelt, who said, with respect to foreign policy, that we should speak softly, but carry a big stick.

Mr. SYMINGTON. I thank my distinguished friend from Oklahoma. It would seem obvious, as one analyzes the situation, that no countries in Europe could successfully defend themselves against an all-out guided missile attack. It is important that we accept that analysis as a military fact. Then it is much easier to understand some of the diplomatic problems confronting the world today. It emphasizes and reemphasizes the point made just now by the distinguished junior Senator from Oklahoma; namely, that the last hope left in the free world is adequate rearmament on the part of this country, so that we can protect the free world and ourselves; and also that we can create a decisiveness in foreign policy which is lacking today.

Mr. GORE. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Tennessee.

Mr. GORE. In reading the very able and provocative address of the junior Senator from Missouri, I find that he emphasizes two things—strength and determination; and to put those into effect, his speech deals with the power to retaliate, and also the strength of forces in being on the ground and on the sea.

On page 15 of the Senator's very able speech, he refers to the shamefulness of reducing appropriations for development and research, of cutting the personnel of our Armed Forces, of losing indispensable technical specialists, and of the cut in the ROTC program.

If we continue a policy of cutting down our Armed Forces and of withdrawing from the points of contact with the enemy, whom the able Senator has described as pushing, ever pushing, will not the inevitable result be that which the Senator has described on page 12 of his speech: "the retreat of the free world in Indochina, if in the future we continue to appease the advance of the Communists, as we are doing today."

My question is, Does the Senator believe that power in the air and power to retaliate are sufficient? Must we not continue to have strength to meet the threat wherever it arises? Else will we not have more appeasement, such as the Senator has described on page 12 of his speech?

Mr. SYMINGTON. I believe my distinguished colleague and friend from Tennessee is absolutely correct. The time has come when the free world must defend itself. Fifty years ago the speed of war was some 20 miles an hour. Today a man in a piloted plane has gone over 1,500 miles an hour, and shortly, he will go more than 2,000 miles an hour.

What does that mean? It means the world is contracting, and therefore, our outposts must be expanded instead of pulled back. Today we look at our television sets and see hundreds of thousands of people being turned over to those who rule behind the Iron Curtain. To me that means we are also watching the ultimate destruction of our own way of life, unless we take a sharp turn in policy.

Mr. ROBERTSON. Mr. President, will the Senator yield?

Mr. KNOWLAND. I yield to the Senator from Virginia.

Mr. ROBERTSON. I wish to ask the distinguished Senator from Missouri if he saw in the morning newspapers a statement made yesterday by Secretary of Defense Wilson, to the effect that we must build up our military personnel to a strength of at least 3 million; and that in fiscal 1956, we shall measurably have to increase appropriations for defense, and there will be no more cutbacks.

Mr. SYMINGTON. No, I did not see that statement, but I am glad to hear of it.

Mr. ROBERTSON. For several months I have been expressing that belief, if world affairs should take an unfavorable turn, it may be necessary to provide supplemental appropriations of between $2 billion and $3 billion for defense. Certainly what has happened in Indochina is not at all encouraging, although I can understand how happy the French are to have reached any kind of settlement there, because, from a military standpoint, they had just about "shot the bolt," so to speak.

But the clear inference of the statement by the Secretary of Defense was that while it may not be done in the current fiscal year, he is putting everyone on notice that increased appropriations probably will become a part of what is called the New Look; that having looked again at the world situation, the military is definitely of the opinion that in

the next fiscal year, instead of making further cuts in our defense program, there will be further increases.

Mr. SYMINGTON. I did not see the statement, but I am sure that when the distinguished junior Senator from Virginia repeats it on the floor of the Senate, he repeats it accurately. I now ask, as we contemplate the Kremlin's program for advancing communism, what justification could there be for the Secretary of Defense to say, in any statement this morning, that next year we should increase our military appropriations, when this year he approves action of the Congress of the United States in heavily reducing military appropriations.

Mr. KNOWLAND. Mr. President, will the Senator yield for one brief question before I suggest the absence of a quorum?

Mr. SYMINGTON. I yield.

Mr. KNOWLAND. Does not the distinguished Senator from Missouri feel that, if we have a mutual security system, the word "mutual" should be underscored so that both parties to it will contribute their fair share?

Mr. SYMINGTON. I agree without reservation to the observation made by the distinguished senior Senator from California.

Mr. KNOWLAND. Since the Senator from Missouri believes, as the majority leader believes, in a system of collective security, does he not think the time has come when we should definitely find out, if the chips should be down on further Communist aggression, which of our allies will stand up and be counted?

Mr. SYMINGTON. There is no question of the logic of what the majority leader has said, both from the standpoint of our own security and the security of our allies who want to stand up and be counted.

Mr. KNOWLAND. Does the distinguished Senator from Missouri believe that allies who are not prepared to stand up when the Soviet Union is in the early stages of its development and stockpiling of atomic weapons, and the means of delivering them, will be any better able to stand up 6 years from now, when the Soviet Union has built up its stockpile of hydrogen and atomic weapons, and instead of 1 or 2 planes flying over Moscow on May Day, they have hundreds of planes in the same category? Will our allies be better able to stand up under those circumstances?

Mr. SYMINGTON. In my opinion, within 6 years it will not necessarily be a question of planes. Those countries must now adopt with us some decisive policy against the advances of communism, because 6 years from now their position will be even more helpless than it is today.

As example, the V–2 was the first intercontinental ballistic missile. If the Nazis had had it a year before they did, they could certainly have destroyed London, and very possibly England.

As those know who have read the history of Hitler's last year, Hitler was basing a large part of his confidence in ultimate victory on these V–2 weapons. Today, instead of a Model T V–2, we have the new, sleek Cadillac of the 4,000-mile missile, developed not only by the outstanding engineers in the Soviet Union but also by the very same engineers captured from Hitler when the Russians swept over East Germany.

Therefore, if I may associate myself with the ideas of the majority leader, the people in the free world who should be most anxious to line up with us in a more decisive policy are those who are helpless today before the advancing Communists.

Mr. KNOWLAND. Mr. President, will the Senator yield for another question?

Mr. SYMINGTON. I yield.

Mr. KNOWLAND. Does not the distinguished Senator from Missouri think there are tens of millions of people, if not hundreds of millions, behind the Iron Curtain who are no part of ruthless and godless communism, and whose hope will be raised by action of the free world, but who will lose all hope and will despair if they see the free world retreating before the ruthless men in the Kremlin?

Mr. SYMINGTON. The majority leader is right. There is great sadness in the news of the latest retreat in a part of the world where literally millions of people who believe in God and freedom are being left to the knives of the advancing Communists.

Do not these actions nullify all statements made about stopping the Communists?

Mr. KNOWLAND. I will end my inquiries of the Senator from Missouri by asking if he does not agree with me that the decision of yesterday in turning over to Communist control tens of millions of people in what was a free area of Vietnam is one of the greatest Communist victories of the present decade?

Mr. SYMINGTON. I completely agree with the distinguished majority leader. Based on my knowledge of the resources of the country, I venture to say that this word "parallel," first in Korea, now in Indochina, may destroy us economically, regardless of whether it is going to destroy us militarily. We should not believe that dollars are all people of the free world need for ultimate victory in our struggle against the Communists.

Mr. LEHMAN. Mr. President, if the Senator from California will yield, I may say that I have listened with great attentiveness to the statement made by the distinguished majority leader. He stated that tens of millions of people behind the Iron Curtain possibly hundreds of millions, would be much encouraged by a show of force. Will the distinguished Senator from Missouri not agree with me that they need much more than encouragement that can be given to them by fortitude of spirit? What they want to have is some assurance that we are sufficiently strong militarily to come to their assistance if they throw in their lot with us. Is that not correct?

Mr. SYMINGTON. The distinguished Senator from New York is correct. Those peoples have been in wars for generations. Today, people in many foreign countries know that the way military power is distributed today, the only hope they have to continue as free people is based on what we do in this country about adequate military strength. I do not believe we are doing enough. I believe that is one of the reasons we are having so much trouble in foreign policy matters. Today the military people in the foreign countries are telling the rulers of those countries that we are not doing enough, just as the military people in this country are saying off the record we are not doing enough.

Realization all over the world that we are not adequately preparing is one of the reasons why the free world is being lost step by step.

Mr. LEHMAN. I completely agree.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment of the Senator from Michigan [Mr. FERGUSON], as modified.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KNOWLAND. Mr. President, I ask unanimous consent that the order for the call of the roll be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Mr. President, at the outset I wish to assure the Senate that the rather long speech I shall make today is not for the sole purpose of delaying the vote on any important measure. I had intended to make this statement before Congress had adjourned, and I have found no better time to make it than now, because the statement deals with the entire question of the Federal power policy, which is involved in the pending bill.

Mr. President, there are many disturbing features of the bill. However, I wish to center my remarks upon the power aspects of this measure, because in the section of the country from which I come, one of the most important questions, if not the most important, is that of the Federal power policy and power development and the effect of any legislative measures on the development of hydroelectric power, atomic power, and power from other sources. Certainly such power constitutes one of the most important resources of the Nation.

This bill comes before us under strange circumstances. All who have discussed it or worked on it, contend it is one of the most important measures to be considered by the Congress in this decade.

Of course, Mr. President, I have been familiar with the fact as have other Members of the Senate, that the Joint Committee was working on a bill. However, I was mistaken, apparently, in believing that the joint committee was working on amendments of a minor nature, in the light of the experience with

the McMahon Act since the time of its enactment. Until the pending bill was reported to the Senate, I had no idea that it contained such important features, calling for sweeping changes which would have a most serious effect upon the entire power policy of the Nation.

Mr. President, as I have said, the pending bill is a most important one. In spite of this, the bill was called up for debate within less than 1 hour after the committee report became available.

The bill shows that it was reported to the Senate Calendar on June 30. At that time it was assigned report No. 1699. Anyone looking at the calendar would think that the committee report has been available since June 30.

As I have just stated, such was not the case. Debate on this important bill was actually under way before many of us could get our hands on a copy of the committee report. It is difficult for some of us to understand why proposed legislation—allegedly as important as this—should be handled in such a slapdash manner.

I wager that few Members of the Senate—including those who sat on the joint committee and participated in the discussion there, and also the Members of the Senate who have listened to the debate on the floor of the Senate on many of the important features of the bill—fully understand this measure.

Actually, what the leadership should do is lay this bill aside, let the Members of Congress and the people of the country study its implications during the recess; and then, when Congress convenes in January, proceed to do a workmanlike job on this most important matter. I cannot understand the need for such hasty action.

I said at the outset that I wish to concentrate my remarks on the power aspects of the bill, although I appreciate that many other important aspects are involved. After all, power is not only most important to all the people of the United States, but it is particularly important to the people of the great Northwest area and other areas of the Nation where hydroelectric power is now being developed.

I shall now proceed to discuss the power aspects of the bill.

Mr. President, I am not an expert in the field of atomic energy, and of course I do not pose as such. Like most Senators and most members of the public, I do have a general knowledge of this new source of power. Like other non-scientific men, I comprehend something of its terrific potential.

We are dealing here with energy in its most basic form. In fact, we are dealing with matter itself. The people of this country have spent over $12 billion to discover the secrets of atomic energy and to develop the facilities for putting it to work.

Mr. President, I remember well when this project was begun in utmost secrecy, during the war, for at that time I was one of those who knew about the project, as I was a Member of Congress at that time. However, to date we have spent more than $12 billion in this very successful development, and we are proceeding very rapidly.

That $12 billion investment produced the atom bomb. In addition, it has financed the partial know-how of converting nuclear material into electric power and many byproducts. This new source of power may exceed in importance and in dollars the value of all the rivers of this country, insofar as electric power is concerned. Yet, Mr. President, again I say the bill does not contain the necessary safeguarding provisions. No procedures have been written in or devised to protect the public interest.

Early in the history of the Republic, the Congress and the people recognized that our rivers and streams—that falling water—were priceless assets. Early in the days of the Republic, it was recognized that this asset belongs to all the people, that they are the owners, and that rules of the game must be devised if private use or exploitation of the asset was to be permitted.

Congressional action to protect the public owners of our streams and rivers against private misuse, culminated in the adoption of the Federal Water Power Act, the Reclamation Acts, the Flood Control Act, and the Bonneville Act. Collectively, these statutes spell out the policy of this Government on the conservation and development of our water resources.

Mr. President, I think it is well again to remind the Senate and the people of the country, of some of the safeguarding provisions of those acts. Those safeguards, which form a part of our power policy in the interest of the people of the country, include:

First. Safeguard for the prior right of Federal development of the resource in any specific case where this will best serve the public interest. Mr. President, such a safeguard is very important, but no such safeguard is provided in the pending bill.

Second. Safeguard for the prior right of public bodies and cooperatives, as against a private applicant for a license for any specific development of the resource.

Third. Safeguards for the right to public hearing in connection with any application, with specific provision for admission of interested States, State commissions, municipalities, representatives of interested consumers or competitors as parties. No such safeguard exists in this bill.

Fourth. Safeguards for the right of Federal or other public recapture of any development by a private licensee at the end of the license period on payment of no more than the licensee's net investment in the project. In my opinion, that is a very important safeguard to place in the law dealing with the source of the people's power.

Fifth. Safeguards for reasonable rates to consumers by provision requiring licensees as a condition of any license to agree to Federal regulation where States have provided no regulation of electric rates, with further provision that in any rate proceeding the licensee can claim no more than net investment in the development for rate base purposes. That is the safeguard which has been adopted by practically every State in the Union. It is a part of our Federal power policy. No such safeguard exists in this bill.

Sixth. Safeguards for the preferred position of public and cooperative electric systems to obtain power supply from Federal development of the resource. That is an integral part of our Federal policy, and has been since 1902 or 1903. On many occasions we in the Congress have reffirmed that sixth safeguard by adding preference clauses governing the development of the people's resources. There is an amendment pending, of which I am proud to be a sponsor, which would put such a safeguard in the bill. However, as the bill came from the joint committee, no such provision was in it.

As I implied earlier, this bill, as reported, is wholly lacking in any of these safeguards. That is why I say the bill should be sent back to the joint committee and studied, so that we may have time to consider this very important matter in a manner consistent with the public interest. I do not think the bill is consistent with the public interest when it deals with the public power feature.

There can be no doubt however, that this great new source of energy belongs to the people. They put up the money to develop it. It is their investment that has made it possible. I intend to support amendments which will apply to power produced from a nuclear source the same kind of safeguards that it was found necessary to apply in the development of hydroelectric power and other sources of power.

I wish to quote excerpts from the hearings on the bill to amend the Atomic Energy Act of 1946. I read from page 577, in the statement of Mr. Thomas Murray, under the heading "Market for Nuclear Power." Mr. Murray said:

> Reduction in the cost of nuclear power is the key to its place in our economy in the next 2 or 3 decades.

He points out how important this is going to be.

> Present energy sources, though not unlimited, are capable of meeting our expanding needs for energy for many years of barring the unpredictable demands of war.

We have just listened to an able address by the distinguished Senator from Missouri [Mr. SYMINGTON] which pointed out that we are never too sure when the demands of war may come.

Mr. Murray continued:

> After the development period, nuclear power will have to earn its way under competitive conditions. The Paley Commission, which foresaw a doubling of all United States energy requirements in the 25 years from 1950 to 1975, and more than a trebling in consumption be met with little or no increase in real costs, provided all conventional energy resources are used advantageously.

In my area of the country the energy requirements in the next few years will be even greater. We have found in the past that our power needs double every 10 years, even with the present population, without taking into consideration a possible increase in population, new industries, or further development.

Mr. Murray continues, pointing out a very significant fact:

But beyond 1975 the picture is more uncertain; it may be that approaching exhaustion of other energy sources will make atomic energy an indispensable alternate and make cost differences measured in 1 or 2 mills quite unimportant.

He is speaking there, of course, of the fact that our reserves of natural gas, oil, and other sources of energy are not inexhaustible. Of course, our hydroelectric dams could conceivably continue to operate indefinitely into the future. Once they are paid for, the maintenance costs will be comparatively small. In the case of a dam the size of Grand Coulee, the operation and maintenance cost will be relatively small. So that power will be in existence for the people, with all these safeguards, in 1975.

Coal in the United States is abundant, but its cost and quality cannot be expected to remain at present levels in the face of indicated increases in demands of industry and utilities. Proved reserves of oil and gas are only 12 and 27 times present annual consumption, respectively, and in recent years the United States has drawn on imports for part of its petroleum supply.

Speculations about the future differ as to the exact timing and severity of shortage of fuels; but there is no dispute that we are using them at a faster and faster rate. United States annual consumption of the primary sources of energy—fossil fuels, wood, and waterpower—quadrupled during the first half of the 20th century, and is expected to double again before 1975.

That shows at how fast a pace we are using these resources.

The energy potentially available in the world's recoverable reserves of uranium has been estimated as perhaps 23 times the energy from world reserves of fossil fuels—petroleum, natural gas, and coal.

In other words, the far-reaching ramifications of the bill and the necessity for all of us fully understanding it are well pointed out in Mr. Murray's statement. The energy potentially available in the world's recoverable reserves of uranium has been estimated as perhaps 23 times the energy from world reserves of fossil fuels—petroleum, natural gas, and coal.

That is why some of us feel that we should know a great deal more about the ramifications of which I have spoken. That is why, if the Senate passes the bill, it should place in it the safeguards to which I have referred. I see no urgency for its immediate passage, in view of the immensity of the entire problem.

Mr. Murray continues:

Consumption of fuels in the United States, for all purposes, is expected to rise sharply between now and 1975: coal, from 522 million tons in 1950 to 815 million in 1975; oil, from 2.4 billion barrels to 5 billion; and natural gas from 6.3 trillion cubic feet to 15 trillion.

The fluid fuels, oil and natural gas, now furnish the major part of our total energy requirements, and by 1975 the proportion may be as high as 70 percent, if supply permits. Demands on this scale, accompanied by gradually rising prices, might mean that oil from shales or synthetic fluids from coal would become competitive within the next 20 years.

Digressing from Mr. Murray's statement for a moment, we had some interesting testimony given during the past month in the Appropriations Committee regarding the progress which is being made in obtaining gasoline from coal. The cost is gradually being reduced to a point where I am sure Mr. Murray's prediction that such fuels may become competitive within the next 20 years is a fair statement.

Such demands may not lead to early exhaustion of our energy resources, but they seem likely to affect in varying degrees the cost of fuels more so for gas and oil than for coal. Coal reserves are ample to meet projected consumption far beyond 1975, but rapidly rising rates of consumption may require us to turn in the last quarter of the century to higher cost and lower quality coal.

In the face of the mounting pressure on our present energy resources, mastering of a new and potentially very large source cannot prudently be deferred.

The rapidly expanding market for fuels for the generation of electricity and other purposes, and the time required for nuclear power development, should allay fears that competing fuels, particularly coal, may be hurt by the entry of nuclear power into the market. The contribution that nuclear power can reasonably be expected to make toward total requirements for electric power by 1975 would do no more than moderate the already rapidly rising demand for conventional fuels.

Because fuel supplies to meet the future generation of electricity may have to be doubled or trebled at the same time that demands on fuel for other purposes (heating, vehicles, manufacture, etc.) are also rising sharply, nuclear power is not a threat to the existing market for other fuels. Continually rising amounts of coal will be needed to supply electric generating facilities already in operation when nuclear power first becomes competitive and to fuel the larger share of new plants for an indefinite time thereafter.

Within the period until 1975, nuclear fuel can expect vigorous competition from other fuels in generation of electricity, and the market for nuclear power will be limited chiefly by the comparative cost at which it is available. To see just how important reduction of costs will be for the competitive position of nuclear power, we have examined the costs of generating power from new conventional steam plants, and can compare these with the range of 4 to 7 mills which is sought from nuclear plants. Clearly 4 to 7 mills nuclear power would be widely competitive: The Federal Power Commission computed for the joint committee that in 1952 the average production cost of steam-generated electric power in the United States was 7.4 mills per kilowatt-hour for the major utility systems. Such an average includes a wide range of costs for individual plants, varying with size, age, and efficiency of the plants and the extent to which they are used, the cost of fuel and other factors. To see the competition nuclear plants must face, one must look not at this general average, but at the maximum performance of efficient new conventional steam plants, in comparison with which a nuclear plant would be evaluated by any management considering the kind of plant to build.

The range of generating costs in new postwar utility steam plants is wide—from just under 3 mills per kilowatt-hour to over 12 mills per kilowatt-hour. But very little of the capacity (4 percent) in these new new plants produces at more than 8 mills per kilowatt-hour, and the plants that do are relatively small, the largest being 80,000 kilowatts, and most of them much smaller. Similarly, a minor part of the capacity (3 percent) can generate at less than 3 mills. Over 90 percent of the competition for nuclear power falls in the 3 to 8 mill range, and 70 percent falls in the 4 to 7 mill range which it is hoped will be achieved from nuclear plants.

If these cost ranges are applied to the expected growth in demand for electricity, we can obtain a picture of the market into which nuclear power will enter between now and 1975. The amount of electricity to be required is the consumption forecast by the Paley Commission, or 1,400 billion kilowatt-hours in 1975, an increase to 3½ times the 1950 consumption of 390 billion kilowatt-hours. The potential market for nuclear power within this overall total is considered to be a share of the new demand to be supplied by steam plants, plus a share of the steam generating capacity to be built to replace wornout equipment. Stability of generating costs is assumed, relying on continued increase in efficiency of conventional generating plants to offset rising costs of fuel. Examination of the potential market in this manner shows the importance of generating costs for the entry and rate of growth of nuclear power.

According to Federal Power Commission regions, the 1952 generating costs per kilowatt-hour in large new postwar steam plants fall in the following ranges:

In the Northeast the range is 5½ to 8½ mills. In the east central section it is 4 to 7 mills. In the Southeast it is 3½ to 8½ mills. In the north central section, 5 to 7½ mills. In the south central section, 2½ to 5½ mills. In the west central section, 4½ to 6 mills. In the Northwest, 4 to 6½ mills. The figure is a little under 4 mills to 6½ mills. In the Southwest it is 5½ to 7 mills.

Nuclear power at 7 mills would at most be competitive for part of the market in the Northeast, Southeast, and north central regions of the United States. It is shown that the northeastern section of the country has the highest power rate, and that, because of the hydoelectric development, the Northwest has the lowest rate. The rates range in between.

Nuclear power at 4 mills, on the other hand, would be competitive everywhere except for a part of the Southeast and south central regions fueled with low-cost coal and natural gas. Even in the natural-gas areas, future new generating plants may not be able to buy quantities of natural gas at the low prices that have in recent years made it possible to generate power at less than 4 mills.

These large plants, which, in my opinion, would be given away if this bill should be passed, would be limited to certain sections, because the estimated cost of one of these plants runs well over $100 million, and there would not be many of them constructed, but they would find themselves attracted to those areas where 7 mills would be the competitive rate, namely, in the Northeast, the Southeast, and the north-central regions.

It is clear that nuclear power will be able to compete more widely if rising fuel costs push up conventional generating costs; its potential market will be smaller if demand for new electric-generating capacity rises less sharply and steadily than projected.

The testimony and the figures I have quoted demonstrate how important this new source of energy, converted to electric power, will be.

I wish again to point out that the reserves are not inexhaustible, and we may be using them up at too rapid a rate.

I have demonstrated how important and vital the question is, and why this bill should not be forced upon the Senate in connection with this important subject.

I am particularly impressed with the statement that—

> The energy potentially available in the world's recoverable reserves by uranium has been estimated as perhaps 23 times the energy of the world's reserves of fossil fuel—in particular, natural gas and coal. It is certainly conceivable—and even probable—in the years to come, more electric power will be produced from nuclear sources than from the rivers and fossil fuels combined.

In other words, Mr. Murray is suggesting that the development will have to be distributed to areas of the country such as the Pacific Northwest, which has a great amount of hydroelectric power, and there would be a different situation in the Northeast, where higher prices are paid for power than in the Southwest where there is natural gas.

I wish to quote for the Senate a few paragraphs from the hearings, bearing on the possible rate at which nuclear power will come into the utility field:

> POSSIBLE RATES OF GROWTH OF NUCLEAR POWER IN THE UNITED STATES ECONOMY
>
> Within the range of possible costs for nuclear power, and the range of expected costs for generating power from conventional energy sources which have now been described, there are possibilities for widely varying rates of introduction of competitive nuclear power into our energy economy, and widely varying rates of growth of a new nuclear-power industry.
>
> It is well to bear in mind also that the growth of the nuclear-power industry, no matter how rapid, will happen case by case, as individual decisions to build plants are reached on developmental or economic grounds. In such decisions, the needs of particular areas and the characteristics of existing generating systems will be decisive, and an array of technical and economic factors will be balanced in each case.

Mr. Murray goes on to say:

> The effects of competitive nuclear power will be closely related to its scale and rate of growth.
>
> If we assume that our domestic technical program will be pushed and will be successful, what may be the impact on electric energy output between now and 1975?
>
> Our staff has made studies of two specific cases for purposes of illustration. Both assume that a development program, including construction of several large nuclear powerplants by the mid-1960's will lead to the building of a growing number of nuclear plants generating power at competitive costs. The two illustrative cases differ with respect to certain other assumptions. (Excerpt from testimony by Hon. Thomas Murray, member of Atomic Energy Commission, p. 579, hearings to amend Atomic Energy Act of 1946.)

In other words, the staff feels that if they have to construct powerplants before the mid-1960's it will also lead to the building of a growing number of nuclear plants generating power at competitive costs.

> Case 1 assumes nuclear power costs at 7 mills per kilowatt-hour in 1963, falling to 4 mills by 1975. It further assumes that as powerplants are built in different parts of the country, giving power at different costs, one-half will be nuclear if the costs are the same.
>
> Case 2 assumes 7 mills per kilowatt-hour in 1965, falling to 5 mills in 1975.

If that be the case, and the power can be developed at four mills, it will be necessary to make readjustments all over the country in the present electrical-producing capacity. That again is why the proposed legislation is so important, and should not be passed in a few days, without going into the matter in great detail.

I quote further from the statement of Mr. Murray:

> Five mills would be a blessing even now in many parts of the country. Case figure 2 further assumes that nuclear power plants will be built only if they have the use of 1 mill a kilowatt-hour of power from conventional plants.

I continue to read:

> It further assumes that nuclear powerplants will be built only if they have an advantage of 1 mill per kilowatt-hour over conventional plants.

Of course, the cost of these plants will be great. By 1975, the price of four mills would be available in certain parts of the country, wherever great hydroelectric developments were located. So it would probably be effective there. I continue to read:

> Under these assumptions, the first competitive plants under case 1 would be producing power in 1963, and in case 2 in 1966.
>
> In case 1, by 1975 the nuclear power component of the electric-generating industry would have an installed capacity of 21 million kilowatts. On an 80-percent plant factor, such a capacity might generate 147 billion kilowatt-hours out of 1,166 billion to be generated from all steam plants in 1975. The share of nuclear power in the total projected electric generation of 1,400 billion kilowatt-hours in that year would thus be about 10 percent.
>
> In case 2, with its less optimistic assumptions, the nuclear power share is, of course, smaller. About 5 million kilowatts of nuclear capacity would be in operation in 1975, generating about 35 billion kilowatt-hours. The share of nuclear power in total United States electrical output in case 2 would be about 2 percent.
>
> As I have indicated, no one can say whether these or some other ratios will prove correct. Either case represents a sizable nuclear capacity; in 1 case 140 reactors, and in the other case 33 reactors, of 150,000 kilowatts average capacity, would be in operation.

Mr. President, I have tried to point out how important this development could be to our economy, and how, by 1975, it could be a major part of the energy development in the United States. I point that out because there are always those who would exploit and take advantage of the resources of the people. The history of hydroelectric-power development in this country documents that statement. That is why so many of us have such a keen interest in the bill.

I say today that unless the Congress of the United States writes into the proposed legislation time-tested safeguards, the future will bring a private power monopoly bigger, stronger, and more devastating than anything the Nation has so far experienced.

So that the RECORD may be straight, I may say that I had fully intended to make these remarks before this session of Congress ended, regardless of whether the pending bill had been considered, because we would have had time to evaluate, by the closing days of this session of Congress, approximately 2 years of the new administration, with a change in the power policy. Therefore, I wish to review what has happened and what is happening in the electric-utility field to demonstrate what may be in store for the American people when a monopoly of atomic power is added to past and current attempts to monopolize the source of hydroelectric power.

To illustrate that point, I wish to read from the testimony of Mr. Gus Norwood, before the Hoover Commission Task Force on water resources and power generation, presented at hearings in Portland, Oreg., on June 28, 1954. Mr. Norwood is an expert on these matters, a man whom I know very well, and who is highly respected. The subject of his statement is entitled "Abundant Power." He said:

> The problem of abundance is likely to be much more serious than has heretofore been considered. Recently various officers of the General Electric Co. have been discussing the probable electric power requirements of the Nation for the year 2000. They estimate by that time an electric load of 10 trillion kilowatt-hours, or a twentyfold increase over the generating capacity of today. This means that the electric system of the Pacific Northwest in the year 2000 will be as large as the entire electric system of the Nation is today. At the present time Grand Coulee Dam, with a capacity of over 2 million kilowatts, provides about one-half of our electric requirements in the Northwest.

I do not think Mr. Norwood's statement meets our full requirements, because we shall need about 2 billion kilowatts for consumption in the Pacific Northwest. I continue to read:

> By the year 2000 some 45 Grand Coulee Dams would be needed in this area alone. This is the equivalent of three Columbia River power systems fully harnessed. The General Electric Co. studies are conservative in nature. They assume a population in the year 2000 of 250 million people, a mere gain of 2 million people a year although the current rate of population increase in 1954 is 2.7 million a year. They estimate that whereas 3.5 percent of the Nation's energy today is used in the form of electricity that 46 years from now over 36.5 percent of our energy may come to us in the form of electric power.

To paraphrase at that point, perhaps it would be a very conservative figure, because who among us can tell the number of new electrical appliances which will be invented for use by persons throughout the country, thus constantly increasing the need for electric power?

Mr. Norwood goes on to say:

> Another check on the great expansion which is ahead for the electric utility industry is provided in the 33d annual report of the Federal Power Commission which presents an estimate for the year 1975 of a need for 365 million kilowatts of generating capacity or roughly a fourfold increase in the next 21 years. The FPC estimate of energy needs by 1975 is 1,860 billion kilowatt-hours, as compared to 329 billion in 1950 and 443 billion in 1953. This FPC estimate comes about 2 years after the Paley Commission report which estimated the electric require-

ments of the Nation at 1,400 billion kilowatt-hours for 1975.

Translated into practical terms these estimates suggest that the Pacific Northwest will need about a million kilowatt-hours average of new generating capacity during each year of the 1960–70 decade. This involves the equivalent of a John Day Dam or Priest Rapids Dam or Hells Canyon Dam or the Dalles Dam in each year at an estimated cost of about $350 million for the dam and probably over $75 million for transmission facilities.

Two years have gone by without a single new start under the present policy.

I continue to read from the Norwood statement:

Before leaving the question of abundance some note should be taken of the probable impact of atomic energy in the Pacific Northwest. The phenomenal energy release of the hydrogen bomb has now been told to the public. Dr. Alvin Weinberg, director of the Oak Ridge national laboratory at Oak Ridge, Tenn., estimates that the raw fuel cost of atomic energy from an atomic breeder may be as low as 0.013 mills per kilowatt-hour. If a ton of coal costs $10 the equivalent amount of atomic fuel would be 5 cents or one two-hundredth as much. Already 13 private utility groups are exploring the possibility of atomic generation and at least 1 such power plant is on the drafting board. An atomic submarine motor is already in use.

For the Pacific Northwest the meaning of atomic energy is that by the year 2,000 we will in all probability obtain 50 to 100 percent more electricity from atomic sources than we will from hydro sources even if all of our hydro is harnessed.

One final thought on the question of abundance and that is the will and desire for abundance. The philosophy of waiting for the load to develop has been entirely too prevalent in the electric industry in the past. With each passing year that philosophy if permitted to continue would represent a danger of increasing proportions. The public interest would be better served by a program of attempting continuing to assure a 10-percent reserve or surplus power supply based on a median water year.

LOW-COST POWER

The entire electric utility industry of the Nation represents an investment of only about $25 billion. A twentyfold increase in the next 46 years is likely to require an additional $400 billion. Obviously every possible effort should be made to obtain the very lowest possible cost of money.

In the Pacific Northwest about 35 percent of the cost of doing business in the Federal power program has been interest. An increase in the rate of interest from 2½ percent to 3¼ percent would result in a wholesale power rate increase of about 15 percent.

I divert for a moment to suggest that the pending bill does not provide any regulation as to interest rates on the cost of a plant which might be licensed to private persons under the terms of the bill.

Thirty or forty years ago the interest rate on good municipal tax-exempt bonds was no lower than that on the bonds of a good private utility company. However, in the money market of today a private utility must earn from 11 to 13 percent before Federal income taxes, and compete with public bonds of 2 to 3 percent. The investment in the Pacific Northwest will be so great and the cost of money in the form of interest will be such a large proportion of the cost of doing business that it is essential that this program be conducted with the lowest possible cost money. Thus low-cost power is contingent upon obtaining low-cost money and this means public financing.

That is why the potential energy from that source is so important.

Mr. Norwood goes on to point out to the task force commission:

POWER TRUSTEESHIP

When the Pearl Street generating station was started in New York City in 1882 electricity was a distinct luxury. Today it is a vital necessity of modern living. It is the most important public utility function, second only to a healthy domestic water supply. Yet, the indication for the future is that the role of electric power will be even more important.

We have seen that considerations of achieving an abundant supply of power and a low-cost supply of power constitute strong arguments for the financing, construction, and operation of electric generating and transmission facilities on a public basis. This Nation can ill afford to have its productivity and its industrial payroll curtailed because the power supply is insufficient and too expensive. The power need per worker is rising spectacularly and is a subject on which another paper could be written.

Mr. Norwood goes on to point out a philosophy which I think is good and sound in the development of the natural resources that belong to the people, which philosophy is wholly lacking in the bill:

The electric business is not a private business. It is not a competitive business and it has not been an enterprising business. It is a natural monopoly because considerations of economy dictate that only one electric system should operate in a community. A public system also is a natural monopoly. Natural monopolies must be controlled by the public.

How thus that is, when, as pointed out by Mr. Murray, we face the potential development of electric energy from nuclear power. Again, to indicate what might happen in the future, when a bill is drawn up without safeguards, as this bill is, I want to point out what has happended in the past.

Step by step, since the start of the conservation movement under President Theodore Roosevelt 50 years ago, the people have been building a program for use of their great power resources.

They have provided for Federal development of power in connection with irrigation projects, with safeguards against the distribution of the power being dominated by the nearest private monopoly.

They have provided that private developers of the waterpower resources of the country must apply for Federal licenses, and that, in connection with consideration of such licenses, the Federal Power Commission must first determine whether the project should not be built by the Federal Government itself.

They have provided that after the Federal Government, the States and municipalities enjoy the next priority for development of these waterpower resources, private applicants may receive licenses only after it is clear that the Federal and other public agencies are not planning to make the development.

They have provided that licenses for private development of waterpower resources shall be for a limited term, with the Federal Government retaining the right of recapture at the end of the license period. They have also given the Federal Government the right of condemnation at any time.

They have provided for Federal development of hydroelectric power in connection with comprehensive river-basin programs, and for Federal marketing of this power, in accordance with the same antimonopoly provisions that apply in connection with irrigation projects.

They have provided for bringing electricity to all the farmers in the land, and for Federal marketing agencies with authority to construct transmission lines so as to assure even the smallest municipal or rural-electric cooperative system equality in the field of power supply.

Mr. President, I am not going into detail to prove the great value of this policy to the users of electricity throughout the country, for I have something of more immediate importance to deal with.

But I shall say—and I do not think it can be contradicted—that this power policy has meant lower electric rates and more abundant use of electricity to all the customers of electric systems throughout the whole United States, whether served by public, cooperative, or privately operated power systems. It has shown the way for America to enjoy the full fruits of the electric-power age.

Mr. President, from personal experience on many occasions, I know that immediately upon the entrance into the power field of municipally owned systems or the extension of a transmission line from a Government system, the users of electricity find they receive lower rates. When there has been competition of that kind, the rates have dropped very greatly on many occasions. That is one of the points we have to keep in mind in connection with this loosely drawn and, in my opinion, badly drawn bill, which does not provide the proper safeguards.

This power policy has also meant great progress in the economic development of important regions of our country which 50 years back were still dependencies—economic colonies, if you will—of eastern finance and industry. It has, therefore, been a great decentralizing policy, and the vested interests, which too often have dominated this country's economic life, seem now to be fighting to regain control.

The improvement in these regional economies, resulting from Federal power policy, has meant more business for the rest of the country, higher levels of stable employment, and greater economic strength.

Today, Mr. President, the policy which has brought all these blessings is threatened. It is threatened by the very warp and woof of the bill itself; and it is threatened by the actions and words of the administration and the Congress. We face a concerted drive to change the Federal power policy. In this case the pending bill attempts to change the law as well as the policy.

This change has been dictated by the private power monopoly. Following the exposé of its machinations by the Federal Trade Commission, and following the utility holding companies scandals which centered around such names as Insull and Hobson, the old "power trust"

was supposed to have retired. But it is again showing its ugly head, threatening to destroy all the people's gains during the intervening years.

Mr. President, I propose to show that the private power company propaganda machine is brazenly repeating the practices of the 1920's, only in a much more scientific, subtle, and dangerous form.

I shall seek to demonstrate that this propaganda machine was a dominant factor in the last election, creating the very atmosphere or public opinion in which the election was fought: That the victorious candidate for the Presidency, as well as the only living Republican ex-President, are consciously or unconsciously vehicles for this propaganda; and that the developing retreat of the Interior Department, in the handling of rural electrification by the Department of Agriculture, and the cutting of appropriations vital to the carrying out of Federal responsibility in the power field, represent the beginning, Mr. President, in my personal opinion, after long experience with this matter, both politically and otherwise, of the payoff. When we add to all that the so-called amendments to the Atomic Energy Act, we have the picture, Mr. President.

In order to convey some idea of the workings of the private-power campaign to capture the public mind, let us look for a moment at some of the revelations by the Federal Trade Commission concerning the activities of the late Samuel Insull's National Electric Light Association in the 1920's, when the same pattern was taking effect and the same pattern which could take effect under the provisions of the pending bill, in view of the extremely large electric-energy potential in connection with the development of atomic-energy processes and other new processes. The pattern used then is in no essential respect different from the mass hypnosis techniques which have become resurgent in the past few years, and are being applied with ferocious intensity at this moment, apparently with the blessings of some of those now in the Government.

The twin aims of the power trust in the 1920's were to forestall effective regulation of their operations and to prevent public development of our Nation's energy resources.

On this campaign, the so-called power-trust spent between $25 million and $30 million annually. This generous expenditure was accomplished simply and effectively. The electric consumers footed the bill. It was all "charged off" as proper operating expenses of the industry, and was computed in the rates the public was required to pay.

"Money was no object," said M. H. Aylesworth, sometime director of the National Electric Light Association. He stated frankly and concisely: "The public pays the expense."

Among the agencies which were established to carry the enlightened message of the private-utility empire to the Nation were 28 State public-utility information bureaus or committees active in 38 States, with a colossal war chest, the utilities proceeded to use every device in the books to condition the minds of our citizens. They even proceeded to rewrite public-school textbooks, place teachers on company payrolls, and inundate newspapers with lush advertising revenue to influence editorial opinion favorable to the policy of the power trust. Every means of mass communication was used—chautauquas, moving pictures, speakers bureaus to address civic clubs, women's clubs, social clubs, and every type of farmers' organizations.

As it was stated by Ocley, director of the Nela's information department in testimony before the Federal Trade Commission, skywriting was the only publicity medium which the campaign had neglected.

Mr. President, this campaign was not confined to the mere molding of editorial and local opinion. The trail of the power trust led into the halls of every statehouse in the Nation.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. MAGNUSON. Mr. President, I ask unanimous consent to yield to the Senator from Vermont without my losing the floor.

Mr. PAYNE. Mr. President, reserving the right to object, will the Senator withhold his request for a moment?

Mr. MAGNUSON. Certainly.

Mr. PAYNE. Mr. President, I understand that the matter for which the Senator from Washington agreed to yield has not clearance from the majority leader and the minority leader. Therefore I must object.

Mr. MAGNUSON. I did not know what the matter was.

Mr. AIKEN. I thank the Senator from Washington. It involves simply a case in which the House has sent to the Senate a bill which was referred to the Committee on Agriculture and Forestry, and which was later discovered to be carrying the wrong number. It ought to be returned.

Mr. MAGNUSON. I think we had better have a policy meeting of both parties.

Mr. AIKEN. I think we had better have a policy meeting before the bill is returned to the House.

Mr. MAGNUSON. The trail of the power trust led even into the Congress of the United States. The power trust infiltrated the very places where public policy was decided, as well as entering every home with the purpose of disarming each family on utility issues. This technique, unless it is fully recognized, exposed, and checked can pollute the very wellsprings of democracy. I shall return to this thought before I complete my remarks.

It is instructive to take a look at the campaign of the 1920's to review the actual financial manipulations of the private electrical utilities during a period in which there was no effective Federal power policy to regulate and check the rapacity of the power trust.

As I have pointed out, it is instructive to study the campaign of the 1920's. It bears on the subject we are discussing in the Senate, and the type of legislation which is involved. It is always instructive to take a look at what happened to us in the past. It provides us with a preview of what will return to plague us if the present drive by the private power monopoly is successful in undermining this policy. It provides us with a preview of what I think will happen to us in the field of nuclear generation of electric energy.

Today many of the private power companies are lavish in their praise of State regulation—they cite State regulation as the true guardian of the public interest. Since they have in effect taken over the policy decisions of many State Regulatory agencies, the blessings they administer are quite understandable from their own selfish viewpoint.

But only a little more than 20 years ago the Power Trust was resorting to every technical and legal devise their fruitful imaginations could conceive of to render regulation ineffectual in order to maintain the excessively high rate structure which in turn would sustain heavy water capitalization.

Midwest Utilities, Electric Bond & Share—with its subholding companies, Niagara Hudson Power Corp., Associated Gas & Electric, Columbia Gas & Electric, Standard Gas & Electric, Southeastern Power & Light—these remain as symbols of the utility holding company age, which served the public by taking thousands of small investors on a buggy ride to line the pockets of financiers who made a specialty of building fortunes out of other people's money.

These financial freebooters inflated the stock of electric power systems in order to build their paper pyramids. As I say, this could be a preview of what could happen in this vast new field if the bill as written should pass the Congress.

They bulldozed State regulatory commissioners into sanctioning rate structures which passed on the financial burden of their jerry-built capital structures to an already victimized general public.

The results of the Federal Power Commission accounting proceedings on the methods used by the private electric companies as late as only 15 years ago, laid bare a startling situation. To use the Commission's own words:

> It was not possible, except in a comparatively few cases, to obtain from the books of account of the electric utilities the cost of plant by departments—electric, gas, water, and so forth—the cost of electric plant by functions—production, transmission, and so forth—or the cost of large operating units such as steam-generating plants. The total inflation of the accounts was unknown, but it was known that the amount was large.

Imagine what a field would be opened in this case, considering the vast amount of money required to build one of these plants, with no safeguards as to what the rate structure will be.

Still quoting the Power Commission:

> Huge amounts of intangibles were buried in lump-sum accounts called by vague terms such as "purchased property."

The Federal Power Commission states that the electric utility accounting in the good old days, before Federal power regulation became effective, had often been employed to distort the true fiscal facts and to pave the way for issuance of watered securities. In those days the utilities were not so much concerned with water to produce power, but water

to produce wildcat speculation. They were not so much concerned in milking machines to help farmers, but in machines to milk the investing public. This is what could happen in the atomic energy field without the right kind of regulation and the right kind of safeguards.

Another Federal regulatory agency, the Federal Trade Commission has published report after report filled with instances of grave accounting abuses, often attended by equally grave financial manipulations. Its summary report sets forth the total in writeups and other forms of unnatural inflation such as are found in the following figures:

Top holding company writeups and other inflation, $273,420,165.

That is passed on to the consumer. That could happen in this case.

Subholding company writeups and other inflation, $353,370,035.

Operating company writeups and other inflation, $864,231,623.

Total inflation found by Federal Trade Commission, $1,491,021,823.

The Commission's table, itemizing the writeups by holding-company groups, carries the following note:

Including writeups in 1929 of $299,201,827 in the investments of Electric Bond & Share Co. and $140,109,788 in the investments of Niagara Hudson Power Corp., the total writeups of all companies examined amount to $2,030,335,438. However, Electric Bond & Share subsequently wrote down its investments $441,387,724, and Niagara Hudson Power Corp. subsequently wrote down its investments $138,869,250.

That is very interesting, Mr. President. That is the end of the quotation from the Federal Power Commission with respect to the writeoffs, before we made safeguards available. The same kind of writeoffs could be made in the development of electricity from atomic energy, without any safeguards. There are no such safeguards in the bill now.

Here, Mr. President, at the beginning of the 1930's, after a period in which the private power industry had trampled State regulation into the dust, was evidence of more than $2 billion of water in the Power Trust financial pyramid.

This faked investment, which had showered largesse upon the inside manipulators, could be properly handled in only two ways—either at the expense of ratepayers by imposition of excessive rate structures, or at the expense of small investors through the loss of their invested savings.

Actually, both danced to the Power Trust piper, and both paid through the nose. In the 1929 crash and the holding-company collapse which followed, thousands of small investors lost their savings. Yet, the high rate, low sales policy, which this financial sleight-of-hand induced in management, even now has been partially shaken off only in areas where Federal power policy has provided real support for federally generated power at low cost, and real support for public competition.

Many of these accounting monstrosities were given birth through affiliated company devices similiar to those exposed by congressional investigations of the Credit Mobilier railroad scandals in the 1860's and 1870's. The late Honorable Robert E. Healy, the grand old Vermont judge who served as counsel for the Federal Trade Commission's Utility Investigations, and later became a charter member of the Securities and Exchange Commission, describes them thus:

In the simplest and boldest form a write-up consists of marking up the figures at which assets are carried on books of account to higher figures. But the same result may be, and has been, obtained in a more subtle manner. This was particularly so where holding companies were concerned. Often a writeup was created by causing one company to convey its assets to another company at a price in excess of the figure at which they were bought by the selling company, both companies at the time of the transfer being subject to common control.

That is taking place again.

Similarly, a merger or consolidation of two or more companies under common control was utilized to accomplish a similar increase in the book value of assets of the new company.

Of course, at any time these groups can increase the value of their assets, they can get higher rates.

It was through such manipulations that Sam Insull built up his utility holdings until he came to furnish power and light to some 20 million people in 32 States. His corporations boasted assets of $2.5 billion, with annual revenues of about $400 million. It was President Franklin D. Roosevelt who described such combinations as "a kind of private empire within the Nation."

I am afraid that some kind of private empire will be set up under this atomic energy bill as now proposed.

It was not until the Federal Power Commission set to work under the new 1935 act to clean up the accounts of the electric operating companies, subject to its jurisdiction, that the full extent of the writeups was brought to light.

After January 1, 1937, under its new uniform system of accounts—and incidentally, there is no provision in the present bill for any uniform system of accounts in the sale of this energy to the public—the commission ordered the elimination of write-ups and other amounts in excess of original cost, to the extent of more than $1,600,000,000 and from only that portion of the industry under its jurisdiction. This means that these power companies had written up their plant accounts on the average by about 25 percent. The Georgia Power Co. inflated itself almost 50 percent, and the Montana Power Co. between 80 and 90 percent.

Without safeguards, the same kind of inflation can take place in the development of electricity from atomic energy.

But all the water wrung from the private power company plant accounts understates the total immersion for which the private power industry was responsible. A number of the large power companies successfully escaped jurisdiction of the FPC by either cutting or avoiding interconnections with neighboring systems which would have brought them into interstate commerce.

This dodge was used by the Connecticut Light & Power Co. which was a member of the Connectitcut Valley Power Exchange until the enactment of the 1935 Federal Power Act. The power exchange served Connecticut and western Massachusetts, a sort of a regional pool to insure efficient and reasonably priced power supply.

The Connecticut Light & Power Co., rather than to submit to the FPC, cut its interconnections and fought the commission's assertion of jurisdiction up to the Supreme Court. It demonstrated its remarkable sense of responsibility to its customers and the public by gratuitiously depriving its service area of the advantages of a power pool, and just as gratuitiously refusing to allow Federal regulation of its accounts in the public interest.

Other large privately owned electric utilities which have avoided Federal jurisdiction by not participating in interstate commerce are: Consolidated Edison of New York, Detroit Edison and Consumers Power Co. of Michigan, Commonwealth Edison of Chicago, Colorado Public Service Co., Texas Power & Light Co., and all the companies serving the States of Maine and Arizona.

Only last year the Detroit Edison Co. was behind the proposed amendment to the Federal Power Act which would have allowed it to export energy to Canada and still not be subjected to regulatory jurisdiction of the Federal Power Commission. This was considerably less than what the same company asked in 1947. Walker L. Cisler, who was then and now is president of Detroit Edison, and who pressed for last year's bill, appeared before the House Interstate and Foreign Commerce Committee with the request for legislation which would virtually junk the Federal Power Act. He wanted amendments which would enable his own and other power companies to join interstate power pools without the necessity of coming under Federal regulation.

It was interesting to read Mr. Cisler's testimony—the numerous and tangible benefits of power pooling, economical use of power plants, more reliable service, strengthening national security. It could be had "at a price," he said. All the Congress had to do was to exempt the big companies from Federal regulation.

It sounds as if he might have had something to do with the writing of the bill which is now before the Senate.

The power companies have learned—in the past 20 years—that it is far easier to manage regulation, when that regulation is done by State bodies.

Having taken over the State bodies in many States, the power trust attempts to avoid Federal regulation by amending the statutes—or by mere changes in the manner and emphasis of administration, which can accomplish much the same purpose. A friendly Federal Power Commission is of great assistance.

I have seen what the FPC has found in the Roanoke Rapids and Kings River cases. I am watching carefully to see what will be done in the Hells Canyon case. It is only because of the stern and indignant opposition of the citizens of

my region that the Hells Canyon giveaway has been stopped—thus far.

I still say the same kind of giveaway could be affected under the terms of this bill.

Nevertheless, during the past 15 years or more, the Federal Power Commission has done an excellent accounting job in the public interest. It has tracked down $1½ billion of water in the power company rate bases, and has purged it from their plant accounts. It can be well termed a great dehydrating operation.

Under the pending bill, I cannot yet understand what relation the Federal Power Commission will have to any regulatory matter if the power companies are permitted to develop this vast amount of power.

During this period the FPC was also upheld by the United States Supreme Court on its establishment of the right of regulatory commissions to use a net investment rate base, throwing out the old reproduction cost theory of regulation, devised by private power companies to support high rates.

By such agencies as the Federal Power Commission, and by other significant and far-reaching legislation, the people have evolved a program to develop and protect their great water power resources. I want to repeat the essential parts of that program, which I think protect the people.

They have provided for Federal development of power in connection with irrigation projects, with safeguards against the distribution of the power being dominated by the nearest private monopoly.

They have provided that private developers of the waterpower resources of the country must apply for Federal license, and that in connection with issuance of those licenses, the Federal Power Commission must first determine whether the project should be constructed by the Federal Government itself.

They have provided that, after the Federal Government, the States and the municipalities shall enjoy the next priority for development of those waterpower resources, and that private applicants may receive licenses only after it is clear that Federal and other public agencies are not planning to make the development.

That is not true of the bill which is now before the Senate.

They have provided that licenses for private development of waterpower resources shall be for a limited term, with the Federal Government retaining the right of recapture at the end of the license period. They have also given the Federal Government the right of condemnation at any given time.

They have provided for Federal development of hydroelectric resources in connection with comprehensive river basin programs, and for Federal marketing of power, in accordance with the same antimonopoly provisions as apply in connection with irrigation projects with power features.

All this has been a well-thought-out, long-time policy.

They have provided for bringing electricity to all the farmers in the land and for Federal marketing agencies with authority to construct transmission lines in order to assure even the smallest municipal, public utility district, or rural electric cooperative system equality in the field of power supply. No such safeguards exist in this bill.

The people, by means of the Tennessee Valley Authority, the Bonneville Power Administration, and more recently, the Southwest and Southeast Power Administrations, have been demonstrating a practical way by which low-cost abundant power can be wholesaled and transmitted to the people, at low electric rates, even though the private utilities continued to control the State regulatory bodies. This yardstick of low-cost power, together with the exposure of inflated writeups by the Federal Power Commission, have forced down electric rates all over the country, even private rates. With the Federal and public power yardstick, inflated capital accounts could not be resorted to, so long as the Federal power program remained a vital alternative.

The power trust knows this. Against the competition of cheap Federal power, against a Federal geographic power grid, against priority of public groups obtaining access to Federal power, the power trust is carrying out a deadly and implacable campaign. It will never rest until it is successful, either in destroying the Federal power program or until it is itself decently defeated.

With the administration now in power, the new campaign is far more dangerous than that of the 1920's—because it is armed with a myriad of new devices for reaching and capturing the public mind. In addition, the financial power of the combine far exceeds that of 30 years ago.

You will recall the New Testament parable, in which the unclean spirit which had departed from a man, returned with seven other spirits, each more wicked than himself, so that the last state of the man was worse than the first.

Mr. President, the old Insull group, as I pointed out earlier in my speech—the National Electric Light Association—having supposedly removed itself from polluting the body politic, returned under a new name—the Edison Electric Institute. Theoretically, the Edison Electric Institute walked to the mourners' bench and purged itself of all the old Insull poison. But it soon associated itself with three other kindred spirits, so that the last state of the body politic bids fair to be worse than the first. That is the meaning of the present attempt, with the aid and comfort of many in the so-called new Eisenhower administration, to kill the Federal power policy.

These other three spirits which have dedicated themselves to aid in the enslavement of the public mind, are the electric companies advertising program, the National Association of Electrical Companies, and the public information program.

The four musketeers of monopoly—EEI, ECAP, NAEC, and public information program—are each and every one fronts for the private power monopoly. Each plays its part to induce the proper public response to their conditioning, with the same deadly thoroughness as Professor Pavlov with his dogs.

Let us demonstrate how they work together.

The Edison Electric Institute prepares statistical and other technical information and influences various educational institutions with this matter, with the plausible theory that what they have to distribute is free of charge, and is not emanating from a propaganda organization.

The electric companies advertising program hands out advertising to newspapers and magazines, sponsors the weekly Meet Corliss Archer radio program, and provides 135 member companies with light radio announcements and 3 advertisements each month to feed to local newspapers and radio stations. This program is masterminded by N. W. Ayer & Son, Inc., a top-ranking advertising and public relations firm.

The National Association of Electrical Companies, headed by $65,000 a year Purcell Smith, is the best heeled lobby still in Washington. In 1953, by its own admission, it spent $547,789.32. The NAEC assists Congress. That is what they say—and how.

The public information program, handled by Bozell & Jacobs, another far-flung advertising firm, follows up the general information, advertising and radio barrage with expert cultivation of the local grassroots. Bozell & Jacobs has had 30 years experience in guerrilla warfare against popular referenda in favor of public distribution of electricity. They specialize in my own State of Washington in handling publicity and propaganda, from the Seattle offices, and with apparently sufficient resources, in attempting to influence the legislature on bills affecting power, attempting, and sometimes successfully to elect public utility district commissioners who are against the PUD's opposing the sale of Puget Sound Power & Light to the PUD's which have been negotiating for purchase, and supporting the merger of Washington water power and Puget Sound Power and Light.

Mr. President, the objectives of this far-flung and beautifully engineered monopoly campaign are quite simple. They would—

First. Reduce Federal appropriations for river basin programs, particularly in hydroelectric facilities. In my opinion, they have been quite excessive. Not one single new start was approved in the 1955 Republican budget. Together with the no new starts program, projects under construction are slowed down, so that vitally needed power is delayed in coming on the line.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. I have been following with a great deal of interest what the Senator has said with respect to new starts. The Senator will recall that former President Truman, on October 1, 1952, during the course of the last campaign, stopped at Kalispell, Mont., to

dedicate Hungry Horse Dam. He told the people at that time to take a good look at Hungry Horse because, he said, "If the Republicans win the election, there won't be any more dams of this kind for a long, long time."

The Senator from Washington, as I understand, has been pointing out that there have been no new starts since the Eisenhower administration came into power. I call the Senator's attention to the fact that so far as new starts in the State of Montana are concerned, the Republican chairmen of the appropriate committees in the Senate and the House have introduced bills to deauthorize the construction of Libby Dam, in northwestern Montana, and Yellowtail Dam, on the Crow Reservation, in the southeastern part of my State. I make these comments to back up what the distinguished Senator has been saying in his splendid speech.

Mr. MAGNUSON. I thank the Senator from Montana. I remember the occasion when the former President of the United States was present. I was in attendance, as was the Senator from Montana.

Mr. MANSFIELD. That is correct.

Mr. MAGNUSON. I remember the beautiful day and the beautiful scenery. We were all at the foot of that huge structure. Many people had come to celebrate the dedication of Hungry Horse Dam, in which Montana takes great pride, and which will soon produce power as far down as the Columbia River.

I remember President Truman saying, "Take 1, take 2, take 3 looks, because if you put that crew back in power, this is the last dam you will ever see."

Up to the present time, I must say that the former President of the United States has been absolutely correct in his prediction.

Mr. MANSFIELD. There is no question about that. I hope his statement, so far as new starts are concerned, will be kept in mind.

Likewise, I hope the American people will keep in mind the pledges made by the Eisenhower administration during the campaign in the fall of 1952. I hope, furthermore, that in the coming November the American people will hold the Republican Party to the promises made in 1952.

Mr. MAGNUSON. There is no question about the promises, and there can be no contradiction of the statement that since the Republicans have been in office the promises have not been kept. Oh, yes, the Republicans have pointed out that the President of the United States will dedicate McNary Dam this fall.

Mr. MANSFIELD. That is an old Democratic custom. Certainly we have no objection to that.

Mr. MAGNUSON. Yes, that is well and proper. But the impression is abroad that the Republicans are doing something about hydroelectric development. Of course, money was appropriated to finish the Chief Joseph and McNary Dams because they were well along toward completion, and it would have been utter folly not to finish them. But the fact still remains that since this administration has been in power, there has not been one single new start.

Mr. MANSFIELD. The Senator is absolutely correct. The present administration has taken much credit for accomplishments with which it had nothing to do. As an illustration, it is telling the people how much their taxes have been reduced. But they do not tell the people that the 10-percent reduction in taxes was provided, so far as the effective date was concerned, by a Democratic Congress, and that taxes, to the extent of $6 billion or $7 billion, were going to be reduced not because of what the Republican administration did, but because the Democrats provided for an effective date, and the reduction went into effect at a certain time.

Mr. MAGNUSON. I am certain the Senator from Montana and I probably will, this fall, when Congress has adjourned, be at home with our people, pointing out more broken promises, more failures to do what the administration said it was going to do during the past 2 years. It has failed to do more than I think any other five prior presidential campaigns promised would be done.

Furthermore, in some cases not only did the administration not do what it promised the people, but it has turned around and done exactly the opposite. It is one thing not to keep a promise, but this is the first administration I have ever heard of which promised something in the campaign, in order to get elected, and then, after election, turned around and did the opposite.

Mr. MANSFIELD. Yes. Let us consider the question of parity, as an illustration. The Republican presidential candidate's statements in Kasson, Minn.; Fargo, N. Dak.; and Brookings, S. Dak., without any ifs, ands, or buts, was that the Republican Party stood for 90 percent of parity, and eventually full parity—and not in the market place. There was not that qualification.

What have we now, after the bill has passed? We have coming before this body a flexible price support structure, backed up by the administration and the Secretary of Agriculture. I think at this time the American people remember the promises made during the last campaign, and I think also that the American people will have a good many questions to ask when they find out, come November, that those promises have been abrogated or broken.

Mr. MAGNUSON. Yes.

Mr. WILEY. Mr. President, I had received instruction that the speaker should yield only for questions.

Mr. MAGNUSON. The Senator from Montana asked me if certain things were not facts, and I said they were.

Mr. WILEY. I did not hear that. I raised the point of order because the discussion will have to terminate sometime.

Mr. MAGNUSON. The Senator from Montana is correct. I am trying to show, in the best way I know how, based on past experience, what the new administration, either wittingly or unwittingly, has done. We know what they have done wilfully, as shown by hard, cold facts, but the whole power trust pattern is coming back into the picture. The administration had the temerity to publish in its trade magazine, which I think is called the Fortnightly, or the Quarterly, or some such name, in January of 1953, an editorial which was probably written in December, pointing out one by one just what it was going to do now that it had control. That has been what has been happening. I bring that up in the discussion of the bill because if we are to produce electric energy through nuclear power, I think the pattern set in the past will be followed. The bill lends itself to another private power empire. That is what I have been trying to point out.

The Senator from Montana has mentioned other promises made by the President. I remember the then candidate for the presidency of the United States saying in my section of the country, "You can depend on this party. We are going to see that your resources are adequately developed."

I listened to those speeches. I was at Kasson, Minnesota, when our candidate for the presidency said in effect, though I do not attempt to quote him verbatim, "I believe in the continuation of the Democratic program."

Mr. MANSFIELD. Which was 90 percent of parity.

Mr. MAGNUSON. Which was 90 percent of parity. Mr. Eisenhower walked up, and he had a speech which he read. I was chastised severely by the Republican national chairman in a television show, at which I think the Senator from Montana was present, when I quoted President Eisenhower. I was told, "That is not correct." He said "in the marketplace."

Mr. MANSFIELD. The word "marketplace" cannot be found anywhere in those speeches.

Mr. MAGNUSON. No. Not only did he say that there would be 100 percent of parity—I know we are getting off the subject, but it is pertinent—but he had not even taken his office when he appointed a Secretary of Agriculture who said he did not believe in parity at all.

Mr. MANSFIELD. That is correct.

Mr. MAGNUSON. What kind of promise is that?

Mr. MANSFIELD. Mr. President, will the Senator yield for a question?

Mr. MAGNUSON. I assume on an important matter like that he ascertained some of the views of the prospective Secretary of Agriculture before he appointed him. They dilly dallied back and forth. Statements were coming out of the office once a day.

Mr. MANSFIELD. Were they all the same?

Mr. MAGNUSON. No; they would be different, until the farmer did not know where he was. He went away from Kasson feeling fine.

Mr. MANSFIELD. Does the Senator mean the farmers went home feeling fine?

Mr. MAGNUSON. The farmers went home feeling fine, because the Democratic nominee for President had said he was in favor of 90 percent of parity, and the Republican nominee said, "The Democrats are chumps. We are for 100

percent." The farmers said, "We can't lose on this deal. We either get 90 or 100 percent."

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. He not only said 100 percent, but is it not true that there has been before Congress a wool bill which in effect brings into operation the Brannan plan, which was castigated by the Republicans during the campaign, and personally by the Republican candidate for President, which bill, if passed—and I am in favor of it—would allow up to 115 percent of parity for the wool producers of the country?

Mr. MAGNUSON. That is correct.

Mr. MANSFIELD. Getting back to the question at hand, what did the President say about the Tennessee Valley Authority during the course of his campaign?

Mr. MAGNUSON. I did not hear the speeches he made in the Tennessee Valley, but I am sure he did not make the following statement when he was campaigning in the Tennessee Valley: "This is the worst kind of creeping socialism." I am sure he did not make that statement in the Tennessee Valley during the campaign, but I know some Republican spokesman went to Chattanooga and said, "Not only is TVA creeping socialism, but we ought to sell it."

Mr. MANSFIELD. And the post office, too.

Mr. MAGNUSON. And the post office, too. A certain person said, "I do not agree with you, but inasmuch as you are going to sell it, can I put my bid in for Fort Knox?" [Laughter.]

Mr. MANSFIELD. Mr. President, will the Senator yield further?

Mr. MAGNUSON. I should like first to finish this thought.

The same kind of giveaway is inherent in the pending bill. That is why amendments are necessary. The way the bill is drawn, it should be opposed. A measure of such importance should not be shoved down the throats of Senators on such a short notice. That is why I am pointing out the parallel. I think the bill is the greatest giveaway ever presented. I do not know, but I suppose the crusade is on the march on land, in the air, on the sea, and we are now getting into the atomic field.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. Will the Senator tell the Senate why the Republican presidential candidate, in the fall of 1952, when he appeared in the Tennessee Valley asking for votes, did not at that time tell the people there, who were most affected by the great project, that in his opinion the Tennessee Valley Authority was an example of "creeping socialism"?

Mr. MAGNUSON. I am sure at that time his advisers said to him, "When you get to Tennessee, lay off that stuff." I think that applied to the area represented by the Senator from Alabama [Mr. SPARKMAN]. But at the same time our candidate for the Vice Presidency let the people in that area know how he stood on all these questions.

Mr. MANSFIELD. The Senator is correct. We have nothing to apologize for. Both the presidential and the vice presidential candidates on the Democratic ticket laid their cards on the table, and the American people knew where they stood.

Mr. MAGNUSON. Yes. I think our distinguished friend from Alabama [Mr. SPARKMAN] and Mr. Stevenson could go up and down the byways and highways of the country today and repeat word for word what they said in 1952 without a bit of embarrassment or without having to take back one word.

Mr. MANSFIELD. That is correct.

Mr. MAGNUSON. Let us now get back to the private utilities.

Mr. SPARKMAN. Mr. President, before the Senator proceeds with that subject, will he yield to me for a question?

Mr. MAGNUSON. I yield to the Senator from Alabama.

Mr. SPARKMAN. The Senator has just had an exchange with the able and distinguished Senator from Montana with reference to some of the campaign promises made back in 1952 by President Eisenhower. The Senator from Washington suggested that perhaps he remained silent when he was in the Tennessee Valley area. Let me refresh the recollection of the Senator from Washington by reminding him that the President, who was then a candidate, was not silent on TVA. As a matter of fact, he told how great the TVA was, what a great job it had done, and he ended up with the expression, which is engraved on the minds of all of the people of the great TVA area, that if he became President, he would see to it that the great TVA should continue to be maintained and operated at maximum efficiency. Believe me, everyone in the TVA area knows he did not remain silent.

Today I have seen a telegram from various distributors in the Tennessee Valley, and I wonder whether the Senator from Washington has had the telegram called to his attention.

Mr. MAGNUSON. No; I have not.

Mr. SPARKMAN. I should like to read the telegram, and then request that the Senator from Washington comment on it:

> The 148 municipal and cooperative distributors of power in the Tennessee Valley area are disappointed that our letter to you of July 9 is unanswered.

By the way, the letter of July 9 has been placed in the RECORD. It reminded the President of the exact words he used.

I read further from the telegram:

> We hope your silence does not represent a lack of interest in the economic welfare of the Tennessee Valley. However, the vigorous attacks made on us by your friends in the Senate are causing people in the Tennessee Valley to ask whether those Senators are asserting your position. We are the minority partner with TVA, but feel entitled to an answer to our July 9 letter before, not after, the Congress has acted.

The telegram is signed by the group I have mentioned.

Mr. KNOWLAND. Mr. President, I do not wish to raise a point of order; but I think the Senator from Washington has been yielding for more than a question. He has already been speaking for more than 2 hours, and we have the cots ready for an all-night session. I hope that at least Senators will follow the rule, so that the Senator who has the floor will yield only for questions.

Mr. MAGNUSON. The Senator from Alabama was asking me whether I had seen the telegram; and he had to read the telegram, in order to ask me whether I had heard of it.

Mr. SPARKMAN. Yes. The able majority leader was not in the Chamber when I began stating the question. I was putting it in the form of a question, but I had to read the telegram, in order to submit the question.

Now let me state the second part of the question: Is not the able Senator from Washington now convinced that the President, when he was a candidate, did not remain silent with reference to TVA, but promised the people of that area and, as a matter of fact, the people of the United States, that the TVA would be operated at maximum efficiency?

Mr. MAGNUSON. Mr. President, I am glad the Senator from Alabama has brought that matter to my attention, because that was a part of the campaign. I did not keep up with the campaign in the Tennessee Valley, but I know what has occurred since the administration has been in office. If the President has done anything in regard to Tennessee, he surely has done under the contract what I said would be done, namely, attempt to dismantle the TVA and not keep it operating at maximum efficiency.

The Senator from Montana called attention to the fact that in the great Northwest the administration has cut the heart out of hydroelectric development. We wish to have the Libby Dam built, for it will provide storage upstream and will develop approximately 1 million kilowatts of power. That project was probably the No. 1 project, next to the Ice Harbor and Hell's Canyon developments. We were given the impression, by the statements which were made, particularly the statements made by the Secretary of the Interior—and I can bring those statements here and read them to the Senate—that the administration was favorable to those developments. However, nothing has happened to them. On the contrary, the administration had not been in office very long before the chairman of the Senate Committee on Public Works and the chairman of the House Committee on Public Works introduced, simultaneously, identical bills to deauthorize the Libby Dam. That was the first time I ever heard of such a proposal. Not only that, but I also wish to state that on July 13 the Secretary of the United States section of the International Joint Committee, Mr. Ellis, sent me a letter and two statements relating to the Libby Dam. I wish to point out again, in connection with all the pledges and hedges the administration makes, that this is the dam which Mr. McKay and others in the administration are pointing to as the next big new start in the Pacific Northwest. However, now we are nearing the end of the session, and all the appropriation

bills except the supplemental bill have been acted on; and the administration have turned their backs on all new starts, although now they say they might go ahead with Libby Dam.

I can read into the RECORD, if desired, the letter from Mr. Ellis about Libby Dam. The indications, so it is said, are probably that it will not be constructed because Canada has taken no action as yet. Mr. Ellis states that the International Joint Commission has received two statements in response to the application—one from the Government of Canada and one from the government of the Province of British Columbia.

Mr. MANSFIELD. Mr. President, will the Senator from Washington yield to me?

The PRESIDING OFFICER (Mr. BUTLER in the chair). Does the Senator from Washington yield to the Senator from Montana?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. Does the Senator from Washington know of any action taken by either of the two committees to withdraw the bills they introduced, which provide for deauthorizing construction of the Libby Dam?

Mr. MAGNUSON. I do not know of any.

Mr. MANSFIELD. Mr. President, will the Senator from Washington yield further to me?

The PRESIDING OFFICER (Mr. CARLSON in the chair). Does the Senator from Washington yield to the Senator from Montana?

Mr. MAGNUSON. I yield.

Mr. MANSFIELD. Perhaps we might move farther north—since we have already been discussing the Northwest—and discuss Alaska. According to today's press reports, the Secretary of the Interior has, in effect, told the people of Alaska that they have no right to put pressure on him for statehood; that they have been making too many arguments not connected with the subject; that Alaska will receive statehood in time, but that at the present time the administration is against it because of defense reasons and because the Alaskans are opposed to the idea of partitioning their Territory, and for 3 or 4 other reasons.

I am surprised, as I assume the Senator from Washington is, that the Secretary of the Interior would have the temerity to go to Alaska and tell the Alaskans that they should not push for the admission of their Territory as a State.

Mr. MAGNUSON. Having had some experience with him in the past, I am not surprised that the Secretary of the Interior would make such a statement; but I am surprised that he would have the temerity to tell the people of Alaska that they should not continue their efforts to have Alaska admitted as a State, so that they would become first-class citizens of the United States, rather than second-class citizens.

Mr. President, I have before me the telegram from Mr. Ellis, which I mentioned. It refers to the two statements that have been received, one of them from the Government of Canada, and one from the government of the Province of British Columbia. That seems to be "all that is cooking" on the subject.

So now we see what is happening to the promised "big development" of our natural resources, after all the statements which were made on that subject.

Mr. President, as I pointed out a little while ago, the objectives of this monopoly campaign are quite simple.

The first is to reduce the program by not having any new starts. A great deal has been accomplished in that direction. Let me read the other points in the monopoly program:

Second. Turn over all planning and development of the people's waterpower resources—such as Hells Canyon, Kings River, Niagara, and Paradise sites—to private monopolies.

Third. Be sure that any Government power generated is sold to private monopolies at the generating station, instead of being transmitted to municipal and cooperative electric systems as first priority, then to private companies in industries on Federal transmission lines. That is exactly what the pending bill does. As a result, they will accomplish that in this new field.

Fourth. By means of such commissions as the Hoover Commission, to set policy aimed at liquidating the Federal power investment in such magnificent projects as Boulder, Grand Coulee, Norris, Douglas, Bonneville, Garrison, Bull Shoals, and Hungry Horse, which have become symbols of power, progress, and democracy.

Fifth. By eliminating Federal power planning and related programs, to take over the $5 billion electrical business of the Nation's municipals, REA's, and PUD's which are now supplying more than 50 billion kilowatt hours a year to some 7½ million customers.

This program is likewise dedicated to the numbing and conditioning of the public mind, so that private monopoly can penetrate the public affairs of city, State, and the Nation.

Mr. President, that constriction of Government already has been practiced in nearly every section of this Nation by the private power monopoly. The time has come to recognize this threat to free government and to scotch it. That is what must be done in connection with the bill.

An attack on our democratic institutions can be successful only if our citizens fail to think. To accomplish this it is first necessary to prevent the public from achieving access to all the facts on the power issue, or any other issue. The next step is to use distorted propaganda of monopoly, with every aid of the social sciences, and every trick of the advertising profession, to induce a general state of consciousness among our citizens which George Orwell, the British author of the famous book, 1984, called group-think. In group-think the higher judgment centers are rendered inert by lack of use, and the public responds like one great, mechanical man, at the press of a button.

In the private power propaganda campaign, the American people are examined, scrutinized, evaluated, and manipulated like white mice or guinea pigs in a scientific laboratory. They are segregated as to their state of health. The propaganda specialists find that the majority of the American people are ailing. The majority have delusions—like the Tennessee Valley Authority, the rural-electrification program, the public-preference clause, the construction by the Federal Government of Hells Canyon Dam.

I submit, Mr. President, that it is the right of every patient to summon the doctor of his own choice, when it is necessary to obtain medical attention. I further submit that the propaganda specialists of the private power monopoly spend too much time in mass hypnosis and not enough time in getting us power at low rates. Each and every month we provide in our power bills baksheesh for further experimentation on our minds and souls. Such fear symbols as "creeping socialism" are applied to great Federal multiple-purpose projects like the Tennessee Valley Authority; such fear symbols as "Socialists" are applied to the millions of people who favor the great American power policy which has been an integral part of the conservation movement since the turn of the century.

This creeping-socialism party line has been adopted by such eminent Republican spokesmen as President Eisenhower and former President Herbert Hoover, apparently in order to help set a favorable climate for the big change in Federal power and river development policy which is being sold to the American people.

Behind the platitudes of such spokesmen lies the sinister manner in which great corporate interests are moving quietly to control this country. Surely, all the implications of this bill would suggest again that same pattern.

In 1943 the Electric Companies Advertising Program began a study, at 2-year intervals, of the public attitude on various issues affecting the power business. The data obtained were to be used in formulating a program, not to correct any evils or malpractices, and thus obtain sound public support, but to manipulate words and symbols in order to obtain the proper public response to an unchanged policy.

As ECAP puts it:

> The founders of ECAP were practical businessmen, mostly engineers, and they went at this project scientifically—it is now possible to measure the mass mind—to determine areas of misinformation or unfavorable attitudes, and to treat those areas methodically.

This cold-blooded attitude toward people is simply science divorced from humanity.

Here is an example of what these mental chloroformers did:

Their public-opinion studies revealed that despite the prodigal outpouring of money for advertising and opinion forming, a large and, it could be said, a predominant segment of the population either did not look on the private power companies with favor, or were not much interested in the matter, one way or the other. They also discovered that—

First. Fifty-two percent looked favorably on public ownership of the electric-power industry.

Second. Less than one-third of the people thought a private company would give lower rates than a publicly owned system, and that 36 percent of the people thought the private-company rates too high.

Third. Most alarming of all, they found that 63 percent of the people approved the Tennessee Valley Authority, that 65 percent of those in the upper-income brackets, and 83 percent of the editors and educators were favorable, and that 69 percent thought TVA's in other regions of the country would be a good idea. Yet we have this bill, which tends to dismantle it and start a new private-monopoly empire.

They even found that people were not much worried about whether TVA paid taxes like a privately owned power company.

Here was a shocking dilemma. The majority of the people, even after years of propaganda barrages from the Power Trust, had seen the true facts and the true issues, and endorsed our Federal power policy, which the power monopoly, with the aid of the Republican administration, now proposes to liquidate.

But the canny social engineers came up with an answer—an answer which had already been used with some success in the 1920's, as I have previously mentioned in these remarks. The answer, however, constitutes a serious threat to the democratic process if great corporate interests are permitted to use their vast resources, which flow to them from consumers, to hire scientific mind manipulators to brainwash these very consumers at their own expense.

For these social engineers discovered that the word "socialism" is a bad word. It produces a general negative reaction among people. In fact, the poll revealed that 69 percent of the sample thought socialism would be a bad thing for the United States.

So, instead of becoming pals with the American public, the ECAP turned to assault its mind with fear. ECAP decided that—

> To link our fight to the TVA question would run us into a lot of opposition * * * but to link our fight to socialism is something else again. The people do not want socialism.

I suspect that is why the expression "creeping socialism" is now running rampant throughout the country.

Gloating over this epoch-making discovery in the science of pressure psychology, the ECAP braintrusters wrote in a pamphlet not intended for public consumption:

> We're on favorable ground there. ECAP advertising in magazines and on the radio will stress the fight against the socialistic state more in the future. It should be stressed, too, on the local level—in speeches, radio talks, interviews, and other expressions of management opinion.

Mr. President, this is the genesis of the phrase "creeping socialism." The use of this phrase does not contribute to public education or to public action to meet the issues of the present. It does not solve the problems of our democracy in the use of its natural resources. It is a device for mass hypnosis; a device to shut off free and full discussion of the real issues involved. Those who concocted and use this device realize that if there is full and free discussion, on the basis of all available facts, the onslaught upon our power resources will be turned back and stopped.

Here is a statistical summary of this campaign to inundate the American public with what I contend is misleading, fear-creating propaganda:

First. The Meet Corliss Archer radio program is reaching some 10 million families, perhaps 30 to 40 million people each month.

Second. The 8 radio announcements a month furnished to each of the 135 member private power companies, are reaching thousands of additional listeners through local radio programs.

Third. Every time one of their pious, misleading ads is carried by their full list of eligible magazines, it is read by between six and ten million people.

Fourth. The 3 additional advertisements, furnished each month to the 135 member companies for use in local newspapers must complete almost a thorough saturation of the entire United States.

Mr. President, I have tried to show a part of the pattern nationally. I wish now to turn to the Pacific Northwest in particular. As I say, I have no intention of delaying a vote on any important matter. This is an important matter to us.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. FULBRIGHT. I did not quite understand the Senator's last statement.

Mr. MAGNUSON. I said I did not want to delay a vote on any important matter.

Mr. FULBRIGHT. I thank the Senator.

Mr. MAGNUSON. For some time I had intended to make this speech before the end of the session. Now is as good a time as any. This bill would affect the State of Arkansas, too.

Mr. FULBRIGHT. I thank the Senator. I did not quite hear.

Mr. MAGNUSON. Moreover, this bill, with its far-reaching implications, was thrown at us at a time when very few of us knew just what it meant, and without any safeguards whatever in it. The proposed legislation could start another private power monopoly.

Mr. President, I wish now to turn to the Pacific Northwest and to describe the manner in which the Power Trust is attempting not only to scuttle our entire river basin comprehensive Federal power program but to take it over, lock, stock, and barrel.

The Washington State Grange, which was the great moving force behind enactment of our public-utility-district legislation of 1930, was deeply aware, even before that time, that the power monopoly was on the move. The annual report of the Washington State Grange for 1927 warned—

> The privately owned electric utilities are rapidly extending their power and influence and preparing for the struggle which they expect to come for control of the water resources of the State. The longer the contest is delayed the greater the obstacle we shall have to overcome.

In my State we have had all too much experience with the workings of the power monopoly with well-laid plans to seize control of our hydroelectric-energy base, which constitutes 22 percent of the Nation's undeveloped hydro potential. These efforts are directed not only against the Federal policy and program but against all local desire to conduct the power business on a public basis.

Not only have magazines of large general circulation been fattened by such advertising, but those directed toward more specialized audiences as well. Collier's magazine has collected $319,000 from ECAP, which openly boasts of its resulting influence on the press in general, "The companies have many friends among the publishers"; that the electric industry enjoys "a generally favorable press"; and that Collier's last year "had published a highly complimentary article on the activities of P. G. & E."

Mr. President, P. G. & E. is the Pacific Gas & Electric Co., a giant private utility, which has been for years actively fighting the Federal Government's great Central Valley program.

Nowhere else in this Nation have the manifestations of the private power conspiracy to seize the energy resources of the Nation been more intense, widespread, and diverse. And since the Eisenhower administration has taken office the Pacific Northwest might be properly termed the testing ground for the "private monopoly-Republican" power policy.

In my own State of Washington, the public utility law of 1930, plus the generation of large blocks of low-cost power marketed by the Bonneville Power Administration over a regional grid system has brought about the creation of public utility districts in 29 of the 39 counties of Washington.

During the 1930's the PUD's had to fight through the courts, county by county, to establish their constitutionality, and free their operations. Their adversaries, of course, were the private power companies.

It was during the 1930's that the great battle of the people to build Grand Coulee Dam was waged and won—against every gun in the arsenal of the power monopoly.

It is ironic to remember the picturesque phrases of some people in describing the utter worthlessness of the greatest dam on earth.

It was the biggest boondoggle since the Great Pyramid, according to some people. It would create power which would be used only by the jackrabbits. I remember that on one of my first days as a Member of the House of Representatives, when the appropriation for the Grand Coulee Dam came up for consideration, one Member after another rose, on both sides, and spoke against spending the money in that area to create power which would have to be sold to the jackrabbits and the sagebrush, and would create nothing more than a colossal concrete monument. Now the same persons have embraced the multiple purpose

principle of power and river development. There is only one catch. The executives of the power companies want to own the reimbursable and profit producing power features. They are willing to let the people—the Federal Treasury—pick up the check for the nonrevenue-producing and nonreimbursable features of such projects.

Under the administration of Franklin D. Roosevelt, Grand Coulee and Bonneville went forward. The battle for Grand Coulee was similar in most respects to the people's fight to save Hells Canyon for public development. These fights must be waged over and over again by the people to protect their own resources.

For years there has been waged in my State a bitter and inveterate campaign by the private power companies to hamstring the operations of the public utility districts and, I suppose, eventually, destroy them. There has been foray after foray in the State legislature. There has been initiative measure after initiative measure placed on the ballot.

The Classic Power Co. strategy and tactics are political expenditures to influence public opinion charged as operating expenditures; the widespread use of front groups, financed by the power companies.

I have known organizations to spring up overnight during the campaigns in which public power was an issue, and then suddenly disappear as soon as the question was settled. The people of my State have voted time after time on the issue, but still it springs up. Citizens groups have been created to wage war against the public groups. Both Oregon and Washington private utilities spent large amounts of money on this type of public-opinion molding—money which went to the Washington State Taxpayers' Association, Let the People Vote League, Washington Bureau of Governmental Research, Washington Business & Investors, Spokane Taxpayers Economy League, Oregon Business & Tax Research, Inc., Oregon Tax Review Publishing Co., and many other so-called citizens committees and local groups. I could list 500 others.

The Federal Power Commission conducted a hearing on power-company activities in connection with initiative 139. The private utilities were opposed to initiative 139 because it favored public power.

Among other things, the Federal Power Commission found:

That the actual expenditures of 1 power company to influence public opinion, as uncovered by the investigation, were in excess of 12 times what the company was willing to admit.

That these expenditures, concealed, or falsely entered in the company's books of account, likewise concealed the fact that the front groups following the power-company line were connected by both philosophical and financial interest with the companies—yet purported to give unbiased advice to the electorate. Individual citizens also served in the same capacity.

That 50 higher paid employees of Pacific Power & Light and Northwest Electric Co. incurred obligations of $46,000 plus interest in financing some of the political activities of the campaign of 1940, and that the 2 companies paid off this debt with company money which was to be conveyed to the United States National Bank in Portland, Oreg., then found its way into the hands of the 60 employees through 3 front organizations—the Washington Taxpayers Association, F. H. Young, and the Washington Business & Investors. This was accomplished on the books by a series of vouchers.

After referring to the literally hundreds of thousands of pieces of printed matter which had saturated Washington to carry home the case of the power monopoly, the Federal Power Commission commented:

> Extensive advertising and radio programs were featured by the utilities during the political campaigns, thus providing subsidies to the organs of public opinion.

The president of 1 water power company boasted that 90 percent of the newspapers in the territory served by his company favored the point of view which he advocated in utility matters.

Mr. President, that kind of campaign has been raging in my State of Washington and continues to rage with unabated fury. There was initiative 166 in 1946 which was another move to cripple the PUD's. It was overwhelmingly defeated by the people at the polls.

There were the negotiations in 1947 between Pacific Power & Light and a PUD's which had offered to purchase that company. In those negotiations the private power companies organized a front group of bankers who bid the price of the utility up to $16 million. This group of bankers than bought Pacific itself. Next, they put out the stock at $23 million, which I do not consider to be a bad deal for the bankers.

When American Power & Light was given an order by the Securities and Exchange Commission to dispose of Washington Water Power Co. under the Holding Companies Act, a group of PUD's, also, negotiated for its purchase. They were stopped by a series of "nuisance" lawsuits and finally lost out when A. P. & L. distributed the common to the preferred stockholders. Since that time, Washington Water Power has been granted two rate increases and is now seeking to make a third temporary raise a permanent one.

Washington Water Power is the most implacable enemy of public power in the Northwest, perhaps in the country. So far they have failed to kill this movement but, through the years, are still at it. They have spent tremendous amounts of money, customers' money, in an attempt to do so.

As an indication of their power in the neighboring State of Idaho, Washington Water Power lobbied a bill through the State legislature under suspension of rules, which was passed and signed by the Governor in 2 days. The bill prohibits sale to any public group from Washington State of any part of the company's property located in Idaho.

A third attempt of associations of Washington PUD's to buy out private power companies in Washington took place when, with the consent of the legislature and Governor, they sought an orderly and friendly purchase of Puget Sound Power & Light Co. The company was willing and cooperative. But the sale has been delayed by the usual nuisance lawsuits—stimulated by other private power companies.

Thus is the will of the people thwarted, but I hope only temporarily.

Mr. President, I could take you on a tour of the other major Columbia Basin States—Oregon, Idaho, and Montana, recounting the operations of the private power companies against the democratic process.

But what I will now demonstrate is that since the Eisenhower administration has taken office the power monopoly is moving for a quick kill before the people awaken to their danger. Part of the kill would be the language of the bill. First to go will be the competition of low cost, abundant Federal power. When it is gone the Federal power investment will be liquidated. After that comes the mopping up of the stranded and helpless public groups, cut off from their source of Federal generation and transmission.

With an understanding of the power monopoly record of the past, the policy statements and moves by the Eisenhower administration are no longer puzzling. They are crystal clear—both as to motivation and intent.

The present partnership policy, so-called, of the Eisenhower administration found its genesis in policies instigated by the Power Combine over the past years—policies sold to and then resold by the Republican Governors of the four Columbia Basin States; some State affiliates of the National Reclamation Association; some farm groups, and some chambers of commerce. The merchandise, however, bears the private utility trade-mark.

These individuals and groups have worked steadily, even during the days of Democratic administrations, to dilute, delay, and dismember the Federal power program. Their emphasis was on the Interstate Compact Commission, which at best has never been much more than a debating society. Through the compact commission they seek to apportion water from a river system. They seek, what has never been successfully done, namely, to allocate power by State. Power development should be carried out not by the Federal Government, except in very costly projects, they argued, and State and local interests should be given this responsibility.

In short, this was only the overture to the 1954 approach of complete domination of power planning and programing by the private power companies, which, alleging themselves to be local interests, are moving in on the entire program, singly and in combination.

The Northwest governors and some Republican congressional delegates were able to sell this idea to the Republican National Convention in 1952, with no difficulty at all. The natural resources plank in the GOP platform for that year favors—"greater local participation in

the operation and control, and eventual local ownership of federally sponsored, reimbursable water projects."

That sounds well, Mr. President, but it does not work, and the past months have demonstrated that fact.

Candidate Eisenhower met with the Republican Western governors in Boise in September 1952, the day he made his first major campaign address. The governors, all of whom shout the power monopoly line from the housetops, did a good selling job.

Candidate Eisenhower mentioned the Federal power program in his Boise speech only to imply that an overweening, aggressive bureaucracy was trying to do everything for the people, even to wash the housewives' dishes.

I remember I remarked at the time that that was exactly what we were trying to do, because I think every housewife knows the benefits flowing from electric dishwashers.

Later, in Seattle, he echoed a speech made a few days previous in Detroit by Gov. Len C. Jordan, of Idaho. The echo reads:

> Planning management and coordination for all present and future public projects (should) be vested not in a Federal Columbia Valley Authority but a new interstate body.

In other words, what the Eisenhower administration proposes is a new kind of TVA for the river basins of the country—one controlled by the private power companies. I think we should call it the monopoly valley authority.

The first step to implement planning for monopoly was not long in coming. In February 1953, Secretary of the Interior Douglas McKay withdrew his Department from its previous intervention against the license application filed by the Idaho Power Co. with the Federal Power Commission to construct a small dam at Oxbow site on the Snake River—a dam which would prevent the construction of the great Federal multiple-purpose dam at Hells Canyon.

The next step demonstrated how our Federal power policy could be rendered meaningless without changing a single law—demonstrated that the policy could be changed merely by administering it out of existence.

The demonstrator was Assistant Secretary of the Interior Fred G. Aandahl. Shortly after his appointment, he said this, in a speech delivered before the United States Chamber of Commerce:

> There is a sizable indication that the preference clause has been used as an implement to practically force local communities to establish public power at the local level to take advantage of low-cost hydroelectric power * * * if we just break away from that concept of a Federal power wholesale monopoly, tied into local public power, ever increasing local public power which can later easily be absorbed by the federalized wholesale power system * * * in which the organization has been administered for a number of years, and please get this, administratively we can correct a good many of the evil effects that the Federal power system has brought on our communities during the past years.

Here, again there is shown a part of the pattern. Here is the Secretary of the Interior saying to the chamber of commerce, "Although Congress passed these laws, we do not particularly care about them. A lot can be done to correct some of these things by administrative action."

Ask anyone in my State what are the evil effects of the Federal power policy, and there will be a statement that it has done a pretty good job in the past 20 years.

Assistant Secretary Aandahl is faulty on his facts, faulty on his implications, and faulty on his history. He has conveniently failed to mention that the Washington Public Utility District Act was passed in 1930, and the first district was in operation in 1935 before either Grand Coulee or Bonneville had gone on the line. He conveniently fails to mention that in 1930 the private utilities distributed about 84 percent of the Northwest region's power to the ultimate consumer, while in 1953, omitting sales direct to industry by the Bonneville Power Administration, it still accounted for 70 percent.

Assistant Secretary Aandahl vaguely talks of evil effects of the Federal power program, and omits describing them. He would have quite a problem convincing the REA people, for instance, of the evil effects of their program, or the public-utility districts in my State, or the workers in aluminum plants energized by cheap Federal wholesale power, or the new homesteaders on the great Columbia Basin irrigation project made possible by that "white elephant"—Grand Coulee Dam.

But the most ominous part of his statement, the administrative nullification of legislation, has been brought to pass by the Department of the Interior.

I shall describe it, but first I wish to pay my respects to a fellow westerner and to discuss also some of the actions of the Secretary of the Interior, or apparent policies of the Department of the Interior, all of which must, of necessity, be approved by the Secretary.

It was on May 5, 1953, that Secretary McKay announced his Department's abandonment of Hells Canyon to the Idaho Power Co. It was the beginning of the big dam-site giveaway, repeated at Kings River, Paradise, and Niagara.

Naturally, in accordance with the Republican platform and translated into the Eisenhower partnership power policy, if a "local interest"—a quaint and homespun term for an eastern controlled private-power monopoly—wants to build a dam, any kind of dam, where a Federal project is proposed, it is necessary to back down in the interests of fair play and giveaway.

The Idaho Power Co. had made a majority of southern Idaho irrigators enemies of their own Federal Government—had made them enemies of a Government which had spent millions of dollars in providing water for new land, and supplemental water for land already under ditch. The company used the same kind of fear symbol as the one of creeping socialism, but with a local twist. This time it was, "Man the headgates; the bureaucrats are after your water."

Idaho Power showed its tender regard for the farmers in Long Valley, Jordan Valley, and the Malheur sections of Idaho and eastern Oregon, by crushing three little REA's. It did this by means of the most skillful and, I think, ruthless tactics ever employed by a private power company—the only known instances, up to now, of a private power company taking over a rural electric cooperative.

Idaho Power fought against the Columbia Valley Administration, together with the other Northwest power companies, spending thousands of dollars in opinion forming. Idaho Power has fought inveterately against the high Federal dam at Hells Canyon with every trick in the book.

Idaho Power bled the farmers on the Minidoka project of $750,000, which was added onto the cost of the project in order to pay damages to the company for the alleged loss of its water rights on a small power dam at American Falls Reservoir, built by the Federal Government. It obtained valuable storage rights in this reservoir, and adds hundreds of thousands of firm-up kilowatts to its system every year, from reservoir release, without costing the company a dime.

Idaho Power Co.'s low power dams in the Snake River east of Boise, Idaho, have prevented the construction of a major storage dam which would have provided power and irrigated several hundred thousand acres of fertile, arid land.

This is the self-styled citizen wherever it serves, which is the hopeful recipient of a colossal giveaway by the Federal Government, with all the aid and comfort which a friendly administration can provide. We in the Senate who are fighting alongside the farmers, organized labor, public power, and other groups, to save one of our last remaining great natural dam sites for full and comprehensive development, know how heavy the hand of an unfriendly Federal Government can be when that Government has turned away from the people.

The citizen, wherever it serves, cries "havoc" whenever anyone has the temerity to suggest that it is not a local interest—that, instead, it is an eastern-controlled monopoly; incorporated in the State of Maine; holding its stockholders' meetings there annually; and with its voting control east of the Mississippi. The 1952 report to the Oregon Public Utility Commission shows that of its first 30 largest shareholders, in terms of votes, all except 4 are located east of the Mississippi, mainly in New York, New England, and Philadelphia. These 30 insurance companies, investment banks, and securities houses controlled 458,617 votes, or slightly more than 35 percent of the total number of votes cast at the 1952 stockholders' meeting at Augusta, Maine.

During the course of an interview published last year by United States

News, when he was asked who controlled Idaho Power Co., Secretary McKay, with a straight face, replied: "The people." We are glad to have your definition of what you regard as the people, Secretary McKay.

When Secretary McKay abandoned Hells Canyon Dam to Idaho Power Co., he gave notice that his Department was going on a standby basis; for he said:

> The granting of licenses for the construction of dams and hydroelectric plants on the rivers of the United States is the primary function and responsibility of the Federal Power Commission and not of this Department.

This seems to me to be some artful passing of the buck, which has resulted in absolute stultification of the Federal program in the Northwest at any site on which either a private power company or a public group in self-defense files upon. The joint comprehensive plan of 1949 drawn up after 20 years of river study by the Bureau of Reclamation and the Corps of Army Engineers is being dismembered, piece by piece.

As I have pointed out before, there has not been one single new start on the river by this administration, in the face of a crying power shortage which will require Federal and non-Federal new generation of 7,500,000 kilowatts, and which, according to BPA, will still leave our region lacking 1,200,000 kilowatts in 1963. That is, unless we fight through with Hells Canyon and its 1,124,000 prime kilowatts.

The citizens of our region, aided by groups elsewhere, have risen to take up the colossal burden of trying to hold open Hells Canyon for maximum development. In the hearings before the Federal Power Commission they have been trading blows with the Idaho Power Co.—despite its fearsome backing of Ebasco Services, Morrison, Knudsen Construction Co. and the eastern securities houses. They have exposed the emptiness, the inadequacies, and omissions of the power company case for its three Beaver Dams. Government witnesses have demonstrated, even testifying under wraps, the overwhelming superiority of the Federal project to the power company's three-dam plan.

I am proud to have been one of the sponsors of S. 1644, to authorize Federal construction of Hells Canyon Dam. This Congress should have held hearings on that measure, so that the Federal program of comprehensive river basin development and basinwide integration of power output could go forward to provide more power, more jobs, expanded opportunity, and a stronger and more democratic economy both for peace and defense.

The duplicity of Secretary McKay in his role of "repository of information" and "not that of a partisan contestant" in the Hells Canyon matter is no better shown than his inadvertent break before a Portland, Oreg., Chamber of Commerce gathering last June.

It is particularly interesting to follow the closeness which McKay adheres, in my opinion, to the private power company line—even though his style is somewhat incoherent.

In Portland McKay said, according to a tape recording of his remarks:

> So I say to you that in my opinion the Idaho Power Co. should be allowed to build these dams under specifications of the Federal Power Commission that will say you will build them and they have a million acres (sic) feet and that water will be released along with the Government-built dams and it will be.

Mr. Clarence Davis, Solicitor of the Interior Department, indignantly denied that McKay had given utterance to these words "on June 1, or at any other time." But apparently the goods were on him, and McKay finally stated that he was speaking before a group of old friends, not as Secretary of Interior, but as a plain citizen.

It was in 1949 that this same Douglas McKay, then Governor of Oregon, wrote to Gen. Lewis A. Pick, then Chief of Army Engineers, on the matter of the Corps' 308 report and the main control plan for the Columbia—which included Hells Canyon Dam—to say fulsomely that he wished "to heartily endorse the project." The same Douglas McKay also wrote a covering letter that year in June to the report of his State engineer, endorsing the Bureau's Hells Canyon project, in which McKay had this to say:

> I have examined Mr. Stricklin's statement and I concur in his conclusions and in his recommendations that the report as amended be submitted to Congress.

It was this same Douglas McKay who in the summer of 1953, wrote a form letter in reply to citizens protesting the Hells Canyon giveaway; and I quote that letter:

> To say that the Snake River is a natural resource belonging to all the people, and, therefore, should be developed only by the Government is contrary to basic American standards.

It will be recalled—before we shake our heads sadly and place Secretary McKay in the category of a crazy, mixed-up kid—that his endorsement of Bureau-Corps development came at the time when such endorsement was universal by all the Northwest governors, prodded by the private power companies as a club to beat the proposed Columbia Valley Administration over the head. As soon as CVA was temporarily stalled, the power companies, followed by the governors, turned upon the Bureau of Reclamation and smote it hip and thigh—in other words, divide and conquer.

The adoption last year of the 20-year contracts between the Bonneville Power Administration and the private power companies is another basic policy decision by the Eisenhower administration aimed straight at the heart of the public body preference clause—which the bill before the Senate would also be—and toward the weakening of the public bodies in the region.

The Bonneville Power Act requires protection to be given domestic and rural consumers, explicitly through preference and priority of sale of Federal wholesale power to public bodies. Furthermore, section 5a provides that any other customer's contract with Bonneville Power Administration shall be subject to cancellation in 5 years—thus further protecting public groups in their preferential rights.

Let us now examine into the provisions sponsored by the administration. The resale provision in the 20-year contract refers to the courts any disputes arising from section 5 (a), but it has no meaning in control of resale rates by private utilities. In contracts with public bodies, however, resale rates are subject to more direct controls, hence, the contracts tend to place public groups at a bargaining disadvantage with the private companies.

I shall now discuss some of the more glaring discriminations in the new 20-year contracts, and why the new contracts, in my opinion, do not protect the public at all.

First. They deal with the private companies as a single combination, whereas the public agencies negotiate separately.

Second. They contain a provision for arbitration not existing in public body agreements.

Third. They raise the question of violation of the act by excluding from a public customer's priority needs any power in excess of 10,000 kilowatts in any year needed to serve an industry obtaining its power from a public group. The provision of the act dealing with priority for public body power requirements does not place any statutory limitation on the kind of customers to be served by these agencies.

Fourth. If point, or points, of delivery are changed to private companies, the contracts need not be reopened, but can be determined by negotiation. With public body contracts, the entire matter must be reopened.

Fifth. They contain a provision guaranteeing that more favorable terms given any contractor in the future will be included in the present 20-year contract—a benefit not conferred upon the public body contracts.

Sixth. They do not contain provisions requiring private power companies to wheel public power to any public agency, although previous negotiations between BPA and private utilities have shown BPA as insisting on this kind of provision to protect public groups' priority rights.

Seventh. They contain monthly billing provisions for the private companies as against present contracts between BPA and public agencies, which are computed on the basis of the largest amount of power taken in any month of the year. This could result in considerable savings to the private power companies—savings which are not passed on to customers in the form of reduced rates.

On August 31, 1953, another passing strange policy was formally placed into effect by Interior, at a meeting held in Tacoma, in my own State of Washington. It allows private utilities to oppose construction of any facilities which they might consider as infringing on themselves. That this policy was on the way

had been revealed even earlier by power company rejection of certain facilities proposed by BPA to serve public groups. In fact, a transmission line authorized by Congress to serve the Coos-Curry Electric Cooperative in Oregon was removed from activation by an order from Interior, after we authorized it by legislation, because it had been given the thumbs-down sign by the California-Oregon Power Co. Up until now it has been the President of the United States who was solely empowered to veto an act of Congress.

I shall now illustrate another part of the power company pattern. The next blossoming of the Eisenhower-McKay power policy took place in the summer of last year, when a special statement on the subject was made by Secretary McKay: "Primary responsibility for supplying power needs rests with the people locally," this statement read, with Interior content to "give leadership and assistance," not stepping in unless there is a multipurpose project, which, "because of its size and complexity, is beyond the means of local public or private enterprise. In general, the Federal Government will not oppose the construction of facilities which local interests, either public or private, are willing and able to provide."

With respect to transmission facilities, McKay promises that there will be continued Federal activity and construction, unless other public or private agencies have or will provide the necessary facilities upon reasonable terms and make power available at rates no higher than if the Federal Government had built the lines.

McKay pledged allegiance to the public body preference provision, with no more expansion of power to serve directly new industrial consumers, such as aluminum, but only to carry out existing contracts, or expanding them.

Rate schedules, McKay promised, would be held at lowest feasible levels consistent with repayment of the power investment with interest, subject to review every 5 years. Control over resale rates would not ordinarily be exercised on the assumption that sellers of power to ultimate users are responsible to the customers, and are always on the lookout for his interest, and that Interior would insure that private companies purchasing Federal power would reflect in their rates as nearly as possible the cost of the service plus a reasonable return on the investment at work.

Mr. President, the new power policy of the Eisenhower administration, as set forth by Secretary of the Interior McKay, is one which is damaging the economy, the morale, and the political freedom of the Pacific Northwest. Secretary McKay, a Westerner, a native Oregonian, has demonstrated beyond a shadow of a doubt that he is actively carrying into effect a program aimed at the destruction of the Federal program which has meant so much to his own State, the region, and the Nation. Apparently, he aims to reimpose absentee domination by eastern monopoly, with the Pacific Northwest once again reduced to the role of economic milch cow, producing raw materials for the industrial East, with no diversified economy to provide the bolstering of agriculture and lumbering, and prey to the seasonal fluctuations in employment which reduce earning power, production, and levels of living among its citizens.

We need, of course, a dynamic program, coordinated, comprehensive, and under Federal leadership, to get the kilowatts on the line. We need the great, upstream storage plants, like Hells Canyon, to firm up downstream power and avoid the brownouts that occurred during the great drought of 1952. We need more transmission lines to complete a gridback network throughout our region to every load center, and to achieve, through this kind of interconnection, the widest dissemination and use of cheap, wholesale Federal power—to industry, to public groups, to rural areas, to private power companies. The latter also depend in part upon the Federal Columbia River Power System, which provides more than 57 percent of the region's power supply.

The region and the Nation demand such a program. But apparently McKay's answer is to "pass the buck" to what the Republicans are pleased to term "local interests," which by odd coincidence turn out to be private power companies, controlled by eastern share holders. These "local interests" are the only agencies which can even partially move into the vacuum created by the buck-passing of McKay. The people ask for bread, and McKay gives them a stone.

The Republican heirs of Hoover are returning us to the Republican policy of scarcity—scarcity in power, in new industry, in jobs. We shall need 7,500,000 kilowatts of power in the Northwest by 1963, to take care of reasonable expansion. Yet there have been no firm steps by the Eisenhower administration in a year and 3 months to give us a single new kilowatt on the Columbia.

The Eisenhower administration is returning us to the days before we had a comprehensive plan, to the days before we had a schedule of multiple-purpose main control projects. For the Columbia, to provide power for the region and the Nation. We now can see the clock turned back to the days of normalcy of the Harding, Coolidge, and Hoover regimes: Back to the days of single purpose beaver dams on multiple purpose sites, with monopoly, in the saddle, building these dams with a single purpose, namely, dollars.

The Eisenhower administration, through the Interior Department, has made its policy clear. It is much easier to analyze it through actions, rather than the pious words of Douglas McKay. I have told about the fragmentation of the comprehensive plan of the Corps and Bureau, by the giveaways at Hells Canyon, Kings River, and Paradise. I have told about the attack on the public groups in the Northwest by imposition of the 20-year contracts between the Bonneville Power Administration and the private power companies.

I wish to talk now about three more matters which plainly demonstrate that the Eisenhower administration is operating as an aid to monopoly—at the expense of the people in the Pacific Northwest.

1. THE POLITICAL RIVER STUDY

The ire of the citizens of the Northwest over the giveaway at Hells Canyon has been a constant source of embarrassment and frustration to the plans of McKay, Tudor, and Aahndahl, as they seek to carry out their scuttling of the Federal power program in the Northwest. The heat of indignation has been generated among groups representing farm, labor, public power, and consumers, with a membership of more than 2,500,000 citizens in my region, and supported by the endorsement and active assistance of similar organizations, with an aggregate membership of more than 15 million, all over the Nation. This kind of opposition is something to reckon with. It is felt by incumbent Senators and Representatives in the Columbia watershed. They are worried; and they have good reason to be worried, for these people still vote, and they know how to vote.

Apparently, with this in mind, the administration, with the aid of the Senator from Idaho [Mr. DWORSHAK], instigated last summer two political river studies in order, I believe, to reduce the pressure for construction of Hells Canyon Dam, divert opinion, and appear to propose a reasonable compromise.

The Corps of Engineers was given a $140,000 appropriation to study the Clearwater River in Idaho, in order to come up with a suitable alternative for the Kooskia Dam. The Kooskia Dam was opposed by local people because of the damage to the economy by flooding.

The Bureau of Reclamation obtained funds to investigate the Snake River below Hells Canyon, to come up with an alternative for that project. These studies were begun in the middle of September, and the findings and recommendations were made public at a local hearing in Orofino, Idaho, on November 20.

The corps proposed two storage dams, for power, flood control, and navigation, at Bruces Eddy and Penny Cliffs, on the Clearwater. The Bureau recommended a large dam at the Mountain Sheep site on the mid-Snake.

What has become of this river study? It received the plaudits of the power company fronts. Len C. Jordan, Idaho's Governor, stated that Mountain Sheep had for years been his favorite site. This is an interesting switch from his testimony in 1952 on the Hells Canyon bill. Then, he said that there should be no storage dams on the Snake River, in Hells Canyon and below, but only a series of low-head dams similar to the ones the Idaho Power Co. was then pushing—pushing chiefly for propaganda purposes.

What these gentlemen neglected to tell the public was that development of the Clearwater, except as an alternate to Glacier View, had been deferred to a later construction phase in the main-control schedule for the Columbia by the Corps of Engineers. Moreover, Clearwater de-

velopment would not in any way interfere with Snake River development in the Hells Canyon area and below, but would be complementary to it.

Another significant omission was that Mountain Sheep was merely set as an alternate to another ultimately scheduled project of much greater potential in power and flood control, namely, Nez Percé. If Nez Percé could not be built because of its interference with the salmon runs, then Mountain Sheep was to be considered as second choice. But the site at Nez Percé was to be held open until studies by Federal and State agencies on anadromous fish runs provided a final verdict. Mountain Sheep, as proposed in 1953 by the Bureau, would forever prevent the construction of the great Nez Percé Dam, larger even than Hells Canyon.

The reports were heralded as a new day in river development, demonstrating, apparently, that the Eisenhower administration had not abandoned a dynamic program. Let the Hells Canyon area be developed by the Idaho Power Co., these people implied; we can get you a better deal somewhere else.

But 1954 rolled around, and the Bureau-Corps reports came in to Washington. There was the Bureau report of January 23, submitted to the Commissioner of Reclamation by the Director of region I.

Something had gone wrong. The rock at the Mountain Sheep site, after more thorough exploration, had developed to be faulty—so faulty that a special board of engineers and geologists from the Bureau recommended that no large dam be built there. Instead, they recommended a small, run-of-the-river plan, for a small amount of power only.

The report then suggested that there was a site several miles upstream from Mountain Sheep which might be feasible for a medium-sized storage dam, impounding about half a million acre-feet. This was the mouse that was produced by the Mountain Sheep. It is no wonder that this story had to be broken by the local press in my region, and that neither the Department of Interior nor the Governor, nor the Idaho Republican delegation have been talking about it.

The Clearwater report was examined by the Board of Review of the Corps of Engineers this spring, here in Washington. It was found that there were insufficient data on navigation and flood control, so it was referred back to the region for remedial action.

That is the status of the great political river study instigated by the Eisenhower administration.

Mr. President, I wish to state quite bluntly that the competent engineers and technicians of the Bureau and the Corps have been exploited for cheap politics. Remember Dr. Astin, the Department of Commerce, and the great battery additive fiasco? This is the same kind of situation, and it must be stopped. The economic needs of my region are too acute for this kind of playing with matches. We want cheap power, not cheap politics.

A part of the plan follows:

2. THE EBASCO-POWER CO. DRIVE TO TAKE OVER THE FEDERAL POWER PROGRAM

The McKay political river study provided some grim amusement at its sorry outcome, even though it gives aid to the Republican policy of power scarcity by preventing resumption and acceleration of the projects which have long been proposed or authorized on the Columbia.

But behind all this vaudeville acting, the private power companies have been moving with swift thoroughness to make the partnership policy their own. The situation is alarming in the extreme. Here are some of the reasons:

The Governors of the Northwest called a meeting on December 7, 1953, to establish a power policy committee. This group was organized to give life and meaning to what has been called the Eisenhower partnership policy. We have been listening to that for months. It is some vague partnership policy, but with no kilowatts on the line.

From the start this group, in my opinion, has been taken over by the power trust and its operating and engineering agency, Ebasco Services, which is a subsidiary of Electric Bond & Share.

In Seattle, on December 7, a group of five power companies in the region—all contractually affiliated with Ebasco Services—announced through their spokesman, J. E. Corette, president of Montana Power Co., that they had formed a single working combination and would gladden the administration by filing soon on an announced site.

Two weeks later, Corette anounced that this combination—Washington Water Power, Portland General Electric, Pacific Power and Light, Montana Power, and Mountain States Power—had filed with the Federal Power Commission application for preliminary permit to investigate Bruces Eddy and Penny Cliffs on the Clearwater, which had just been studied with $140,000 worth of taxpayers money by the Corps of Engineers.

This was merely the first gun fired in a much more ambitious enterprise—that of becoming the unchallenged leader in developing the power resources of the Columbia and relegating the Federal Government to the role of silent partner.

On January 30 a press release was issued from the offices of Bozell and Jacobs, the private power public relations firm. Mr. Corette, in this story, announced that the five companies, with more to come in, were ready, willing, and able to assume the responsibility of meeting future power needs in the watershed of the Columbia. Said Corette:

> The companies see a combined need of 150,000 to 200,000 kilowatts a year for the next 20 years, and they are willing to spend about $50 million a year to provide that power. I have long felt that power shortages will continue in any area so long as the people rely entirely upon the Federal Government for their power supply.

The "good housekeeping" seal of approval on this project, Bozell and Jacobs, announced had been received from Under Secretary and Assistant Secretary of Interior Tudor and Aahndahl; Gov. Len C. Jordan, of Idaho; and Col. F. S. Tandy, of the Corps of Engineers, in Walla Walla, Wash.

Corette stated that on all multiple-purpose projects the combination would pay for the reimbursable power investment, while legislation would be introduced to enable a grateful taxpaying public to pick up the check for the nonreimbursable features of the dams, including flood control, navigation, and irrigation. This is what the Interior Department approved, just as approval is sought for the present bill.

Nothing was said about system operation, control of power marketing, all-important subject of rates, public-body priority, or planning.

The way had already been cleared by Interior for the power monopoly to take over the planning and power pool operations formerly under the responsibility and leadership of the Bonneville Power Administration. First, as I have mentioned previously, was the veto power on new BPA proposed transmission and substation facilities proposed by the private companies.

Next was the wholesale reduction in force of the vital power planning section of BPA. By the end of 1953 Under Secretary of Interior Tudor was pleased to announce great accomplishments. BPA personnel had been reduced 20 percent, mostly in the planning areas, as against only 7 to 8 percent in Interior generally.

Tudor announced that under present Interior policy—

> We envision Bonneville Power Administration as properly a wholesale utility company. * * * Bonneville will no longer push for development of power resources, which will be left more to agencies, both public and private, of the communities concerned.

He served further warning that a management survey team would be out to study the agency.

That team has been there. It is hoped that it will not complete the job of emasculating BPA just as has been recently done by the Republican administration on Southwestern Power Administration.

With this accomplished, the control of planning, marketing, and resale of power in the Pacific Northwest will pass into the hands of the Northwest Power Pool. The Northwest Power Pool is dominated by companies with EBASCO contractual relationships. In effect, the future policy will be made and carried out by guidance of EBASCO services.

Here, Mr. President, is local interest with a vengeance. A better term for it is "monopoly on the loose." Here is a combination which may well become a single corporation with capital of between $600 million and $800 million, which would be controlled by a small common stock issue held by the component Northwest Utilities, guaranteeing a return between 8 and 12 percent. Insurance companies would underwrite the power financing, with a healthy assist by the taxpayers on the nonpower features, without which the major projects would not be economically feasible.

Then, with the Federal Government no longer providing the planning and

estimating of future power needs and power loads, it is only a matter of course that the 150,000 to 200,000 kilowatts of the 5-company combine—at high rates—would be set as the optimum goal in our region. Forgotten would be the 700,000 kilowatts actually required, according to estimates by BPA in 1953.

It adds irony to McKay's remarks before the American Power Association on March 25, when he said:

> It is with considerable satisfaction that I can report to you that the dynamic new Federal power policy is now in effect, and what is more to the point, it is working effectively.

I pause to smile.

McKay stated later in this address:

> In addition to the participation of public bodies, a healthy interest in the partnership program is being manifested by private power companies.

There, Mr. President, are two examples of the magnificent overstatement and the magnificent understatement.

The one praising the no-new-starts policy, and the anarchy that reigns supreme. The other coyly mentions the healthy interest manifested in the partnership policy by a group of rapacious power companies who are in a fair way gobbling it up.

We may depend upon it that since the departure of Dr. Raver from BPA, no one in the Department will lift a hand to defend this agency as it is pushed toward the chopping block.

Dr. Pearl, Raver's successor, has already stated his reasoned opinion on the comparative virtues of the Idaho Power three dams and Hells Canyon. He has stated that he favors multiple dams. Subsequently when he was asked the basis on which his opinion was formed, Dr. Pearl said he had once listened to a debate on the matter during a Kiwanis Club luncheon.

The administrative management team could take its cue from that, when it formulates recommendations on BPA. Here's what the report should say: "Eliminate all engineering and technical personnel, and assign Dr. Pearl the responsibility of obtaining his data by listening to luncheon club debates on the power issue, with the admonition that he stay awake after the sherbet has been served. This is the kind of economy that pays off."

Behind these fronts, Mr. President, our region is facing a situation which is perilous in the extreme. The governors' power policy committee is numerically and policywise controlled by the private power companies, with its technical adviser a representative of Ebasco Services still on the Ebasco payroll.

There is the threat of a monopoly, which is going forward rapidly.

Is it any wonder, Mr. President, that the public utility districts in the State of Washington have been forced to act in self-defense to preserve the sources of their future power? They have been made strong by the Federal power program, but now the Federal program is being destroyed by the administration—some people say to pay off an election debt to the Power Trust. The public utility districts filed on Rocky Reach; they have asked for deauthorization of Priest Rapids. They have filed on wells.

Partnership seems bankrupt. It means no kilowatts for the region.

Mr. Herbert West, secretary of the Inland Empire Waterways Association of my region, has cogently measured the promises of partnership against its performance. There does not seem to be any connection between what they say and what they do.

The Inland Empire Waterways Association is comprised of prominent businessmen, farmers, shippers, and all segments of the economy, and has been performing a useful service in my region for nearly 50 years.

Under the so-called partnership policy, West said, each applicant for a dam has suggested in effect that Uncle Sam provide the money for economic and engineering surveys, and then build the nonreimbursable features, like fish ladders, navigation locks, and flood control storage, while the other partners construct the power producing or profit producing end of the dam.

That is a partnership that should interest taxpayers. The private power company gets in on the producing end, and we furnish the rest of it.

Mr. West goes on to say:

> Regardless of what we think out here, it doesn't make sense to Congressmen and Senators from other parts of the country who have to vote on appropriations.
>
> Previously Congress was assured that the money it had loaned us would be repaid. Now, under proposed partnership participation—

This New Look, this Eisenhower program—

> Congress would be making a direct appropriation with no assurance that it will ever see the return of a dollar to the United States Treasury. They don't like it and they won't vote for it.

The blame, West says, lies with the administration and the Interior Department. "I can reach no other conclusion than this," West said. "Unless the administration and Interior Department present an operating plan for partnership participation, our water resources program in the Pacific Northwest will come to a complete halt."

I wish to remind my friend Mr. West that it is at a complete halt.

Mr. West made his statement with full accord of his membership. His concern is echoed by citizens of Oregon and has found utterance in editorials of such a conservative newspaper as the Portland Oregonian, which had earlier given wholehearted endorsement to McKay's policies.

With this kind of realistic and responsible concern among the conservative elements of the Pacific Northwest, the fatuous assurances of McKay about grassroots support for a dynamic power policy have fallen flat, no artful dealing in semantics can cover up this dismal fact.

3. THE ACCELERATED AMORTIZATION OF PRIVATE PROJECTS

I wish to sum up my remarks on the power-company conspiracy to seize control of the power and politics of the Pacific Northwest and the Nation, by a brief discussion of the rapid amortization program.

Instituted shortly after the Korean war, by act of Congress creating the now famous section 124–A of the Internal Revenue Code, companies engaging in defense production of various kinds could expand their plant for defense purposes and receive permission from the DPA and then ODM to write off in 5 years the costs of such facilities in taxes.

The private power companies were quick to participate in this program. Since its inception, the total value of rapid amortization certificates issued to commercial electric companies to September 1953 was $1.9 billion.

It was estimated by the National Rural Electric Cooperative Association that this $1.9 billion, by means of excess depreciation, plus tax savings for 5 years, plus 6 percent interest compounded over the average 33.5-year lifetime of the facilities, less deferred taxes to be paid from the sixth year to the end of the 33.5 years would result in net aggregate benefits amounting to more than $2.8 billion.

Compare this with the $3 billion expended by the Federal Government on its multiple-purpose power dams most of which is repaid to the Federal Treasury at 3 percent interest per year, while after the payout period annual power revenues continue to be returned to aid in paying for the costs of government.

Under our Federal program for the past 20 years, all our dams in the Pacific Northwest are far ahead of their repayment schedules, with interest.

The quick writeoff program for the power companies has been correctly termed by a congressional committee as the "biggest bonanza that ever came down the Government pike." But it was upheld by a 4 to 1 decision for the private power companies last fall, when the Federal Power Commission found that to require the power companies to pass on these savings to customers in the form of lower rate structures "would be inconsistent with the effort of Congress to aid our national defense," and took the usual buck passing out by contending that "we cannot veto the acts of another agency of the Government."

The Federal Power Commission was simply saying this:

> We wish to make these cash donations available only to the companies and not to the consumers, and that if another agency of Government does something which affects our own powers and responsibilities conferred by Congress, we will do nothing about it.

Mr. President, one of the biggest guns of the power company propaganda artillery has been the dark accusation that low-cost Federal power has been obtained by subsidization, while tax-paying red-white-and-blue private power pays its own way. You have read it in the full-page advertisements in the leading magazines. You have read it in the full page advertisements in your newspapers. You have heard it over the radio. Your civic club has pro-

vided a forum for the power company opinion former to make the same fallacious statement. Now here we have a subsidy at the taxpayers' expense going to the power monopoly which nearly equals the total investment in power that has been made by the Federal Government in 50 years.

Prior to the moratorium finally imposed by the Office of Defense Mobilization on further quick writeoffs for electric powerplants and facilities, the Idaho Power Co., still in the hearing process on its licenses to build 3 small dams in Hells Canyon, applied for rapid amortization certificates on 2 of them Brownlee and Oxbow, even before they were built and had their licenses. The Brownlee certificate would represent the largest on record of any private power company.

Mr. President, I stated to the press at that time that the Idaho Power Co. had requested certificates which would amount to probably 65 percent of the costs of the dams, estimated by the company—and this has been shown to be an understatement—at $103,762,000. Since that time I find that in 40 years it would present the company with a total of $168,218,000, all at Uncle Sam's expense. I said this:

I take the position that if the people are going to have to pay for these private dams, in whole or in part, through tax concessions, FPC and the public should have full knowledge of the facts. It is difficult for me to imagine either defense or economic benefits growing out of construction of the dams, should the Federal Power Commission license the Maine corporation to build them.

These, Mr. President, are the sorry results, the ominous unfolding of the so-called "new, dynamic" Federal power policy of the Eisenhower administration in the Northwest. The power trust is smelling warm meat. Where the body of cur 50-year Federal power policy lies, the vultures seem to be gathering. I have used the unfolding of destruction in my area only because, as I have said, the tremendous power potential there, causes the Pacific Northwest to be the proving ground for the strategy of this conspiracy against the people.

Mr. President, I feel that what is going on raises a grave question as to how long we can entrust the conduct of a great public industry like electric power to private interests which are consistently using the great funds which the grant of a public privilege gives them to pervert the processes of democracy.

There is every evidence of a linking up between the campaign of the electric utilities, that of the Iron and Steel Institute, that of the Association of American Railroads, and that of the American Medical Association in a grand conspiracy to drug the public mind, to frighten the American people, to distort any action of Government in the public interest into the bogey man, the specter of creeping socialism, and so to control the functioning of democracy.

The editors of Fortune have pointed out that—

The free enterprise campaign is shaping up as one of the most intensive sales jobs in the history of industry. * * * At the current rate it is accounting for at least $100 million of industry's annual advertising, public relations, and employee-relations expenditures.

The tragic thing is that the American taxpayers and consumers are, in fact, footing the greater part of the bill for this colossal effort to control the very motivations of democracy.

So, Mr. President, I conclude by expressing by conviction that if the present campaign against Federal power policy succeeds, it will mean not only great losses to consumers of electricity and serious consequences to our future expansion in this power age, but also immeasurable and perhaps permanent damage to democracy itself. It must not succeed, and it will not succeed when the people get the facts.

I think the bill fits into the whole picture, and it is very important, in view of what has happened in the past and what is now happening, not to allow a bill like the one now before the Senate to be passed on 2 or 3 days' notice, in spite of its bad features.

Mr. President, on July 13 the Secretary of the International Joint Commission, Mr. Jesse B. Ellis, sent me a letter and two statements relating to Libby Dam and Reservoir on the Kootenai River near Libby, Mont.

This is the dam which Secretary of Interior McKay and the administration are pointing to as the next big start in the Pacific Northwest. The Secretary and the administration have turned their backs on all other logical new starts, saying, "No, let us build Libby first."

Well, Mr. President, this looks like another hoax. The facts certainly support the suspicions that the Secretary and the administration are supporting Libby Dam because they know full well that Libby Dam may never be constructed.

I ask unanimous consent to have inserted in the RECORD the letter from Mr. Ellis, a statement by the Honorable L. B. Pearson, Canadian Secretary of State for External Affairs, and the Honorable W. A. C. Bennett, Premier of British Columbia.

These statements from our Canadian friends clearly demonstrate that construction of Libby Dam is a long, long way off.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

INTERNATIONAL JOINT COMMISSION,
Washington, D. C., July 13, 1954.

Hon. WARREN G. MAGNUSON,
United States Senate,
Washington, D. C.

DEAR SENATOR MAGNUSON: The Government of the United States recently filed with the International Joint Commission an application, dated May 22, 1954, for approval of the construction and operation of the Libby Dam and Reservoir on the Kootenai River near Libby, Mont., a copy of which the Acting Chairman of the Commission sent to you on June 8, 1954.

To date, the Commission has received 2 statements in response to the application, 1 from the Government of Canada and 1 from the government of the Province of British Columbia.

I am pleased to enclose a copy of each of the above-mentioned statements for your information and files.

Sincerely yours,

JESSE B. ELLIS,
Secretary, United States Section,
International Joint Commission.

IN THE MATTER OF THE APPLICATION OF THE GOVERNMENT OF THE UNITED STATES TO THE INTERNATIONAL JOINT COMMISSION, DATED MAY 22, 1954, FOR APPROVAL OF THE CONSTRUCTION AND OPERATION OF THE LIBBY DAM AND RESERVOIR ON THE KOOTENAI RIVER, NEAR LIBBY, MONT.

STATEMENT IN RESPONSE

To the International Joint Commission,
Ottawa and Washington:

In response to the above-mentioned application, the Government of Canada states that it is not prepared at present either to consent to an order of approval or to oppose the granting of such an order. Sufficient data has not yet been assembled by the International Columbia River Engineering Board to make it possible to determine the most advantageous use of the waters concerned from the points of view of both countries.

If in the light of such a study it is found that more advantageous use of the waters concerned could be achieved by other methods, such as a diversion of part of the waters of the Kootenai River into the Columbia River in Canada, the Canadian Government reserves the right to oppose the issuance of an order of approval in the present application.

If, however, it should be found that the issuance of an Order of Approval for the Libby Dam project would be in the best interests of both countries, the Canadian Government submits that any Order of Approval should be on such conditions as to ensure:

(a) the protection and indemnity against injury of all interests in Canada which may be affected by the construction and operation of the said dam and reservoir, as provided by Article VIII of the Boundary Waters Treaty of 1909;

(b) an equitable recompense to Canada for the use in the project of Canadian natural resources, which will include an amount of power based on the increase of level permitted at the International Boundary and a share in down-stream benefits or storage in power on a basis to be negotiated;

(c) any rights to the use of storage in Canada which might be approved will be for the life of the present project as expressed in a term of years to be settled in accordance with sound engineering and financing practice;

(d) all considerations which may be deemed relevant as a result of the Commission's study of all engineering and economic factors in the Columbia River Basin in general, and the Kootenai River in particular, should be taken into account.

L. B. PEARSON,
Secretary of State for External Affairs.
OTTAWA, *July 7, 1954.*

IN THE MATTER OF THE APPLICATION OF THE GOVERNMENT OF THE UNITED STATES TO THE INTERNATIONAL JOINT COMMISSION, DATED MAY 22, 1954, FOR APPROVAL OF THE CONSTRUCTION AND OPERATION OF THE LIBBY DAM AND RESERVOIR ON THE KOOTENAI RIVER NEAR LIBBY, MONT.

STATEMENT IN RESPONSE BY THE GOVERNMENT OF THE PROVINCE OF BRITISH COLUMBIA

To the International Joint Commission,
United States and Canada:

The Government of the Province of British Columbia respectfully submits, in the current absence of adequate and complete

factual data now in process of compilation by pertinent Canadian and International agencies, that it is not in a position, at present, to either agree to an order of approval or to oppose the granting of such an order. As and when the studies and compilation now in process in respect to the Columbia Basin are completed and made available, the Province may then determine, from its particular point of view, the most advantageous use of the waters involved and formally state its position in the matter.

If it is finally determined that an order of approval for the above-noted project shall issue, the Province further submits that such order should embody provisions entirely satisfactory to the Province in respect of the following points:

(1) The preservation of all rights of the Province of British Columbia under article II of the treaty of 1909.

(2) Any rights to the use of storage in Canada which might be approved to be for the life of the present project as expressed in a term of years to be settled in accordance with sound engineering and financing practice.

(3) In the implementation of any permissions given, all labor that may be employed on the project by or for the United States within British Columbia to be restricted to residents within the Province.

(4) Indemnity for lands and property flooded by the project, for all interests in the Province which may be injured by the erection and/or operation of the project, for the loss of taxes by the Province, for the loss to the economy of the Province for the productive capacity of lands flooded, to be settled in terms of power allocation in favor of the Province.

(5) Recompense for natural resources contributed by the Province to include:

(a) A share of at-site power proportional to the head and storage contributed by the Province through increase in level permitted at the boundary—the conditions governing generation, delivery, and acceptance of such power to be satisfactory to the Province.

(b) A share in downstream benefits accruing from storage made available in the Province of British Columbia or by consequence of permission to raise the level at the boundary—such share to be in terms of power on an agreed basis acceptable to the Province of British Columbia.

(6) Where any benefit to the Province of British Columbia is determined in terms of power under 5 (a) and/or 5 (b) above, such power should be available at a point or points on the International Boundary to be designated by the Province of British Columbia.

(7) That an international board of authority upon which the Province of British Columbia is adequately represented be set up with power to regulate the storage and release of water from the reservoir proposed under the project.

(8) Any order which issues shall in no way prejudice the right to the use of water in the Province of British Columbia for waterworks, irrigation, or other local consumptive purposes.

On these and other bases the Province of British Columbia will crave leave to adduce evidence at any formal hearings pertinent to the application and to make such submissions as counsel may advise.

Dated at Victoria, British Columbia, this 2d day of July 1954.

W. A. C. BENNETT,
Premier of the Province of British Columbia on Behalf of the Government of the Said Province.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. PAYNE in the chair.) The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDERSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE TO PRESERVE THE CIVIL SERVICE SYSTEM

Mr. JOHNSTON of South Carolina. Mr. President, last week the United States Court of Appeals for the District of Columbia reversed a lower court decision which threatened the destruction of the American civil service system. The appeal to the higher court was brought about by the act of a small group of men and women who believe in a government of freemen under the law. It was a courageous act, worthy of our traditions, and I should like to make it a matter of public record.

The name this small group has assumed for the accomplishment of its purpose is the Committee To Preserve the Civil Service System. It was called into existence less than a year ago to provide counsel for the appeal of Leo A. Roth, a civil service career employee. Mr. Roth had been summarily dismissed from the Department of Justice without charges, presumably to create a vacancy of political advantage to the administration. Mr. Roth took his case to the United States District Court for the District of Columbia, claiming that, as a career civil service employee, under the Lloyd-LaFollette Act he was entitled to know the charges and to have a chance to answer. In an almost apologetic opinion, Justice Keech found against Mr. Roth, and the young attorney found himself on the street.

Government employees everywhere, and many of us in this chamber, read Judge Keech's decision with dismay, for he had said:

> The court is aware that under its decision the statutory safeguard from summary removal relied on by a large number of Government employees is held not to exist.

William C. Doherty, president of the National Association of Letter Carriers, also read the decision. He saw immediately its corrosive effect on American government and resolved to support appeal of the case. The Committee To Preserve the Civil Service System was born of that resolve. It is a small but determined group. Mr. Doherty is its chairman. It raised money, procured legal services, and appealed the case. Last week, in the appellate court's unanimous opinion to reverse the lower court's ruling, the courage and determination of the members of the committee were rewarded.

I call this to the attention of the Senate today, because I believe that, in the prevailing climate of doubt, uncertainty, and cynicism which surrounds Government service, no significant act contributing to the dignity of man should go unnoticed. I call attention to it also because of the unseemly haste with which the Civil Service Commission undertook to change its procedures under a decision which it knew was being appealed and which acknowledged severe abridgement of the rights of all civil servants to whom the Lloyd-LaFollette Act extends protection.

In my experience, tyranny is not a single sweeping dramatic act, brightly lighted for all to see. It is rather the accumulation of countless small tyrannies, unnoticed by those whose rights are threatened and uncontested by those responsible for their defense. Unless we are alert and oppose the small tyrannies, we cannot hope to defeat the great ones.

I should like to urge, therefore, that the Members of the senior legislative branch of our Government join with me in expressing sincere gratitude to Mr. William C. Doherty, who successfully opposed this incipient tyranny; to the firm of Woll, Glen & Thatcher, who provided counsel without hope of equitable reward for their services; and to the men and women who have given liberally of their time, their energy, and their financial resources. Moreover, I should like to suggest that it will be most interesting to observe whether the Civil Service Commissioners respond to the appellate court's decision with the same sense of eagerness which characterized their reaction to the lower court's decision.

Finally, I hope that the work of the Committee To Preserve the Civil Service System is just beginning. It has demonstrated its high courage and its potential for effective service. It is a noble instrument in the cause of freedom.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment of the Senator from Michigan [Mr. FERGUSON], as modified.

Mr. HUMPHREY. Mr. President, the bill presently before the Senate, as has been stated again and again in the debate, is one of the most significant, and possibly one of the most far-reaching bills presented in Congress in recent years. It has tremendously far-reaching implications which will affect the political, economic, and social life of this country for decades and generations to come. It sets the pattern by which the peace-time benefits of atomic energy will be made available to the people of this Nation.

I suggest that there is no subject of greater importance today, in connection with the long-run economic future of the United States, than what is to be done with the atomic energy resources which have been unleashed and which have been made available through Government research.

Depending upon the nature of the bill passed by the Congress, atomic power will be used either to lighten man's burden and bring higher levels of prosperity for all the people of America, or

this new source of energy will be used to strengthen economic concentration of power within the hands of a few restricted, limited, large corporations.

I digress to point out that we are dealing not merely with a resource which has such names as "fissionable" and "nuclear," but that we are dealing with economics; and we may very well be setting a pattern for the economic future and the economic development of the Nation.

This bill is important not alone for its provisions relating to the international exchange of information on atomic energy, but perhaps even more so for its provisions dealing with the production of electrical power from nuclear reactors. So important are the power aspects of this bill that I would like to devote most of my discussion today to those features, and particularly to the amendments which I have introduced on this subject.

Mr. President, one of the sources of greatness of this Nation has been its rapid development of electrical energy. Use and production of electricity have had a phenomenal growth in the United States ever since central station generation of electricity was introduced commercially in 1882. Since 1920, its use has approximately doubled every 10 years, contributing greatly to increased labor productivity, larger national economic output, and improved living standards.

By 1950, electricity was being used for lighting and other purposes in 92 percent of all houses in the United States and in 83 percent of rural homes. It is estimated that electric motors provided at least 90 percent of the mechanical power used in industrial plants. An analysis of comparable industries, as covered by the census of manufactures, shows that the use of electric energy per man-hour of labor increased from 2.61 kilowatt-hours in 1929 to 4.60 in 1933 and 5.71 in 1947. By 1950, the average was estimated at 6.29 kilowatt-hours units of energy for our average industrial plan.

Total consumption of electric power in the United States in 1950 had reached 334 billion kilowatt-hours, compared to 74 billion in 1925. By far the largest part of the 1950 total, about 200 billion kilowatt-hours, was used for industrial purposes. Residential and farm consumption was about 75 billion kilowatt-hours, and commercial consumption, some 50 billion kilowatt-hours.

The President's Materials Policy Commission reported in June 1952 that the demand for electric energy in the United States during the next 25 years may be expected to increase 2½ times if there is to be a doubling of the Nation's goods and services in that period. With such a growth, the electricity demand in 1975, according to the President's Materials Policy Commission, would be about 1,400 billion kilowatt-hours, compared with the generation of 389 billion kilowatt-hours in 1950.

I digress to point out that the President's Materials Policy Commission's study is the most comprehensive one made to date of the need of natural resources and power in the United States.

And it is noteworthy of comment that the estimates of practically all Government commissions and other agencies usually tend to be extremely conservative in estimating the growth of the electric industry. The Federal Power Commission, regarded by many in the industry as too optimistic in its projections of power requirements, made a forecast in 1947 for the following 5 years. Actual demand exceeded their estimate by 50 percent. This cannot be explained by the unexpected industrial demands imposed by the Korean mobilization program, although that contributed to the heavier demand. Residential and rural loads, as well as those of the small nonresidential users such as trade and service establishments, were grossly underestimated. Actual load for these classes of consumers exceeded the forecast demand by about 35 percent.

Likewise, the semiannual surveys conducted by the Edison Electric Institute, national trade organization of the privately owned power companies, have repeatedly underestimated requirements during the postwar period. Over the years, actual demands also have exceeded TVA's long-range estimates.

In other words, to summarize, it means that when the use of electric energy is projected, regardless of whether it is by the Federal Power Commission or any other Government agency, or the Edison Electric Institute of the private utilities, or any other private group, the estimate has always been much less than the actual need or the actual use of power over the period that was in contemplation.

There has been a particularly sharp increase in the demand for electricity by rural users. The needs of these consumers—who in many cases have had to wait too long to receive electric service—have far exceeded the most optimistic estimates. In the past 5 years the electric loads of REA borrowers have increased from 3.3 billion kilowatt-hours in 1947 to 11.4 billion in 1952, or more than 3 times in these 5 years. During the past 10 years the increase has been tenfold.

The importance of electricity to our Nation's energy base cannot be overestimated. Our great industries, our homes, our businesses, our hospitals, our farms—in fact, all facets of American life—are dependent upon electrical energy. Moreover, the future welfare of our Nation demands that this supply of energy must be both abundant and available at low cost.

Thus far in our history we have developed electrical energy from two sources—fossil fuels and falling water. In other words, from coal, gas, and oil, and from hydroelectric resources. During 1950, 100.9 billion kilowatt-hours of electric energy were produced from hydroelectric power resources, while 287.8 billion kilowatt-hours were produced from the burning of coal, oil or natural gas.

Now we are on the threshold of a new source of energy—nuclear power. Varying estimates have been given by our scientists as to how soon this new source of energy will be economically competitive with electric power produced from thermal or hydroelectric powerplants. But all are agreed that within the next decade, if not sooner, nuclear power will be one of our important sources of electrical energy.

Therefore, it seems to me to be of the utmost importance, as a matter of public policy and public law, that we be very careful in whatever we now design as a legislative program for the furtherance of the use of nuclear energy or nuclear power.

The advent of this new source of energy opens entirely new horizons. In the past, low-cost hydroelectric power plants, of necessity, have been confined to those areas where there are great river systems which can be developed for the production of electric power. Thus, to date, our most comprehensive development has been in the Tennessee River Valley and the Columbia River Basin, and it is those areas which have enjoyed the greatest reduction in electric rates as a result of the development of hydroelectric power.

Possibly that explains why some of us in the Senate who do not come from the Columbia River Basin or the TVA area are very vitally concerned with the proposal before the Senate. As one Senator in part representing a Midwestern State, where power costs are high, I would like to see atomic energy or nuclear power made available, with priority given particularly to areas in which power costs are high. We in the Midwest find ourselves in a most unusual situation; with high freight rates on the one hand and high power rates on the other, it becomes extremely difficult to compete industrially.

I should like to suggest to those of my colleagues in the Senate who have been at times somewhat critical of programs such as the TVA, the Grand Coulee, and projects in the Columbia River Basin, that there is now before us a golden opportunity to see to it that nuclear power is made available to those areas in America where hydroelectric resources are not available. I want to make sure that, if nuclear power is made available on terms comparable to those for hydroelectric power, there will not be a public law written, and rules and regulations promulgated under the law, which will restrain or restrict the development of such power for the public good. I regret to say that, in my examination of the bill now before the Senate, I see in it not much in furtherance of the public interest, but provisions which favor special interests.

There are still great hydroelectric resources to be developed, and within the relatively near future it is my earnest hope—and I have been working with every effort at my command in that direction—that the great St. Lawrence and Niagara power projects can be developed, and that we can continue the progress which has been made in the Missouri Basin, the Southwest, the Northwest, and other sections of the country.

I point out that even if we were able to develop every available kilowatt-hour of energy in the Missouri River area, there would still be a power shortage in the foreseeable future in the area within the Missouri Basin.

Although there are vast hydroelectric power resources which are yet to be developed—the Federal Power Commission estimated only recently the undeveloped waterpower could add approximately 88 million kilowatts of capacity—we must recognize that there are limitations in the development of these resources, insofar as certain regions are concerned.

Similarly, certain areas are more fortunate than others in the availability of coal, natural gas, or oil. Areas which have these resources close at hand naturally can produce electric power at a lower cost than areas where substantial transportation costs are a factor in bringing fuel to the generating station. It is this problem which confronts some of our friends in the New England States, where it is necessary to haul coal and other fuel long distances, at expensive rates, thus increasing the cost of the generation of electricity, and making the generation cost unusually high, with the result that the electricity rates are also very high.

Although I am deeply interested in such areas of our country as New England, I predict that unless they can reduce their electric-energy costs and, in turn, the rates, they will be through as industrial sections, because one of the reasons why industry is going into the TVA area and elsewhere in the South is not so much because of the tax structure but because of the lower cost of fuel and power. I think we have had sufficient good examples of that situation to prove beyond the shadow of a doubt the accuracy of what I have just said. For instance, in recent months, numerous businessmen, whom one would think would, at least ideologically, be opposed to Government production of electricity, have made strong protests to the Government when it appeared that there would be a curtailment of the production of electrical energy in the Columbia River Basin. If business people can anticipate the possibility of lower fuel costs or lower power costs, they will naturally do all they can to obtain them. Lower costs in some areas lead to the development of the situation with which we are faced in almost every part of the country, namely, the competitive disadvantage of those located in high-cost power areas. That competitive disadvantage must not be underestimated.

Therefore, Mr. President, as one who wishes to have the peacetime benefits of atomic energy made available for proper and beneficial civilian purposes, I shall do all I can to see to it that the same standards which for approximately 50 years have been applied to the production of other power in the United States likewise are applied to the production of power from atomic energy.

Happily, with the production of nuclear power, these regional problems disappear. The cost of the nuclear fuel itself is extremely low, and we are informed that it can be transported safely and at relatively low cost. Thus, the advent of nuclear power brings to many areas renewed hope for industrial development and low-cost power for homes and commercial establishments.

It can readily be seen that the development of this new source of energy can, and undoubtedly will, have profound effects on our future industrial progress, and upon the entire economic, political, and social structure of the future.

Therefore, I do not intend to be a party to a program which will place in the hands of a limited number of corporations the vast resource of atomic energy, which may well determine the future economic life of our Nation. That is really the subject we are debating now, and not merely the Dixon-Yates project or the proposal to pool the production of electrical energy. What we really are debating is the proposal to rewrite the Atomic Energy Act. The proposal is to rewrite that act in such a way that atomic energy will be available primarily for civilian purposes, for the purpose of peaceful pursuits. I wish to make sure that in rewriting the act we do not engage in a sell-out to monopolistic groups or in providing a limited number of persons with monopolistic control over this fabulous resource, the development of which has been paid for by all the people of the Nation.

I see in atomic energy a great opportunity for forward economic development in many areas of our Nation. Some areas are somewhat underprivileged and underdeveloped. If we can consider pooling atomic energy, so as to make it available to our allies and our friends abroad, certainly we had better be sure that we write into the law provision for pooling atomic energy for use for peaceful purposes at home, so that our people can have access to it. I wish to be sure that our REA's and other public groups are included in the program, and that the program also will include provision for the granting of licenses to them, under appropriate conditions. I do not wish to see only the corporations that can raise from $100 million to $500 million or more, given the exclusive or sole right to develop the atomic energy resource for use for peaceful purposes in the United States.

Those who wrote the 1946 Atomic Energy Act, the McMahon Act, foresaw the far-reaching implications of peacetime development of atomic energy, and they wisely provided section 7 (b) of the act, which reads, in part, as follows:

> Report to Congress: Whenever in its opinion any industrial, commercial, or other nonmilitary use of fissionable material or atomic energy has been sufficiently developed to be of practical value, the Commission shall prepare a report to the President, stating all the facts with respect to such use, the Commission's estimate of the social, political, economic, and international effects of such use, and the Commission's recommendations for necessary or desirable supplemental legislation. The President shall then transmit this report to the Congress, together with his recommendations.

The framers of the first Atomic Energy Act knew that a tremendous new world was being opened up. They knew that at some time in the future this tremendous new discovery would have to be integrated into our human society, and that possibly it would revolutionize our way of life.

So the framers of that act provided in section 7 (b) that when a commercial application of atomic science approached feasibility the Atomic Energy Commission should make a public and publicized report on the social, economic, and international implications of the new development. After that report was made, and only after the public had been given a glimpse at its great importance, was it contemplated that Congress would act to permit the release of the discovery. Then, and only then, could the Members of Congress and the American people have any conception of the importance of the release. Then, and only then, would they be qualified to prescribe the conditions, the regulations, and the manner in which the release of this great publicly owned asset should be made.

Mr. President, I make note of the fact that the administration has not made such a report regarding the commercial feasibility of atomic energy. I make note of the fact that the President has not made such a presentation to Congress. I charge that neither the Atomic Energy Commission nor the President has reported to Congress, as required by section 7 (b) of the McMahon Act, the Atomic Energy Act of 1946. In other words, the pending bill is not based upon that requirement of existing law, namely, the requirement of section 7 (b) of the Atomic Energy Act. If a report has been made by the Atomic Energy Commission, as prescribed under the provision of the act I have just read—namely, under section 7 (b)—I should like to know where the report is. As one Member of the United States Senate, I certainly have as much right to see such a report as does any other Member. The Atomic Energy Act makes it quite clear that—

> Whenever in its opinion any industrial, commercial, or other nonmilitary use of fissionable material or atomic energy has been sufficiently developed to be of practical value, the Commission shall—

Not "may"—

> prepare a report to the President stating all the facts with respect to such use.

Later on, it is provided that—

> The President shall then transmit this report to the Congress, together with his recommendations.

Mr. President, I suggest that the President has not made to Congress the report called for by this part of the act. Furthermore, I say that, at least within my knowledge, no such report has come from the Atomic Energy Commission. So I am beginning to wonder why that is the case. I should like very much to see major developments occur in the field of the peacetime use of atomic energy. I recognize that the development of atomic energy for commercial, peacetime purposes must be undertaken mainly by private industry, by what we call our free-enterprise system. But I also say that the law is explicit. The law does not say "may." It says "shall." I suggest that this body insist upon fulfillment of the requirements of the law.

As pointed out in the separate views of Representatives HOLIFIELD and PRICE of the Joint Atomic Energy Commission in House Report No. 1699, the Atomic Energy Commission has never seen fit to prepare and present the report re-

quired by section 7 (b) of the McMahon Act.

There has been no such report to the people of America. We have only bits of information. We know that electric power can be generated from atomic units. We hear that it is expensive, but shows promise of becoming economically feasible. We do not know if it must be in giant central generating stations, or if there is promise of economic small units, which will provide power for a single small community, or a single small industry.

As sketchy as our information is about the use of atomic piles to produce electrical energy, it is much more than we have about the possible usefulness of atoms in other fields of activity. We hear that atomic action may prove useful in medicine, chemistry, agriculture, food preservation. There are many hints of such potential values.

The Congress therefore is currently considering legislation in this field without the benefit of the report from the Atomic Energy Commission which is required by the McMahon Act.

As Representatives HOLIFIELD and PRICE have commented—

> This omission is not a mere matter of form or one to be taken lightly. The "social, economic, political, and international effects" of using this new source of energy are certain to be profound and wide ranging, even if we discount the more exaggerated and optimistic claims. Surely the Congress is entitled, before legislating, to have the expert analysis and advice of the independent commission it created to administer the atomic energy program.

I point out that the omission of the report called for by section 7 (b) of the 1946 act is but one of many serious omissions which have been made in an effort to speed this legislation through the Senate during the closing days of the current session. The transcript of the committee hearings, some 1,157 pages in length, was made available to Senators only on July 9, and the committee report, consisting of some 138 pages, was not available until the afternoon of July 13—the same day that the bill was made the business of the Senate.

Let me say now to the majority leader and to anyone else who complains about the length of this debate, that, first of all, the committee hearings were never even made available to Members of the Senate until July 9, and I point out that the committee report was not made available until July 13. Here we are debating a subject matter which may well determine the future economic and social development of our country. Perhaps the majority leaders and others have insight into these problems which those of us of lesser ability do not possess. But I have seen too many measures literally jammed through the Congress. Apparently there is a desire to have a record of numbers, if not of quality. Apparently the legislative program is supposed to have good titles if not good substance. I am not willing to settle for just another bill that has been approved by the administration. I want to know what is in the body of the bill. Frankly, we did not debate the tax bill long enough. Many a measure has been pushed through Congress pellmell. I repeat that this kind of hasty legislative process does not yield good results.

It seems that every time there is some kind of giveaway project, every time we have a measure in Congress which deals with a selected few, it must be rammed through; and if it is not rammed through, someone says we are stalling. My view is that it would be good to stall on this bill for a great deal longer, because I am of the opinion that within the confines of the measure, this rather long bill, consisting of 104 pages, there are many hidden economic boobytraps which are going to explode in the people's faces. The boobytraps have not been set to trap the large industrialist or the large corporation. They are boobytraps which will injure millions of people.

The strange thing to me is that those who talk the loudest about free competitive enterprise are the very ones who come forth with policies which would literally monopolize a great field of endeavor. I desire to see written into the bill protective language which will make sure that no monopolistic practices are sanctioned by public law. I wish to make sure that small business, rural electric cooperatives, municipalities, and power districts have as many rights under this bill as any private utility in the Nation. Until we have debated those questions there will be no bill. Perhaps it will require a great deal longer than some persons think.

I may add that this is not only a long bill but an exceedingly complex bill, completely rewriting the McMahon Act. If one goes back and reads the RECORD he will find that the McMahon Act, the basic atomic law of this country, was not written in haste. I think he will find that no one was cracking the whip to see that it was written in haste. There is something more involved here than having a deadline. Most of the time it is important to be sure that we are doing the right thing; and in this instance we ought to be exceedingly careful.

The bill itself is some 104 pages in length, contains many cross-references, and deals with a matter which is not only of transcendant importance to the future welfare of our Nation, but is extremely complicated.

In view of these circumstances, I ask, why the rush? Why must this bill be presented for enactment in the haste for adjournment? Is this bill being rushed through before some of its deficiencies become more evident to Members of the Senate and to the voters of America?

Judging from the manner in which the administration is attempting to push this bill through the Congress, it is as if we were being asked to name the make, model, color, number of cylinders, diameter of the wheels, and color of the eyes of the driver while an automobile is being whisked before us at a speed of 100 miles per hour.

To carry the analogy a step further, I can tell the Senate that in the time that has been given me thus far to view this bill, I have observed a number of dented fenders, smashed windows and broken pistons.

It is in a sincere effort to correct these deficiencies that I have submitted a series of amendments which will make this bill a vehicle to advance the science of nuclear energy and provide for the welfare of all the American people, rather than the enrichment of a comparatively few large corporations.

One of the most serious and grievous deficiencies of the administration bill is that, for all practical purposes, it prohibits the Atomic Energy Commission from producing electrical power from a nuclear reactor.

Of all the things I ever heard of that seemed to sound as though they were on the fringes of logic and reason, this proposal takes the prize. The Government of the United States has taxed the people of the country to the tune of $12 billion, which it has put into atomic energy research and development. So long as that atomic research and development are used only to build atomic bombs, the Government can go ahead and spend. The Government has a monopoly on building the bombs. But the moment we reach the point where some atomic energy might be used for peacetime purposes, when we reach the point where atomic energy might be used to create electrical energy, which in turn is needed by the Atomic Energy Commission itself, we draw down the atomic energy curtain and say, "No; the Atomic Energy Commission will not be permitted to produce nuclear power or electric power from a nuclear reactor, either for its own purposes or for any commercial purpose."

This is equivalent to saying that the Government of the United States, even though it has jurisdiction over the rivers and streams of the country, shall be denied the right to build a hydroelectric power project. I do not believe that even the most rabid partisan would suggest that the Government of the United States ought not at least to be able to build a dam on a river. I am quite sure that we have got beyond that point.

But when we come to the new river of opportunity, the great new force of nuclear power, we are literally writing into the law a provision that the Government of the United States shall be handcuffed, that the Government shall not be permitted to develop electric power from a nuclear reactor for any commercial purpose. Indeed, it is doubtful whether the Government could even do it for purposes of research and experimentation, in a degree which would be practicable.

A draft of proposed legislation accompanying President Eisenhower's message to the Congress of February 17, 1954, contained this language:

> Nothing in this act shall be construed to authorize the commission to engage in the sale or distribution of electrical energy for commercial use except such energy as may be produced by the Commission incident to the operation of research and development facilities or facilities for the production of fissionable material.

That proposed restriction was incorporated in an earlier version of H. R. 9757, but the sponsors were persuaded finally to strike it out. The majority

report on the bill, however, construes the restriction to be still applicable to section 44. It states in this regard:

> This section will permit the Commission to dispose of that utilizable energy it produces in the course of its own operations, but does not permit the Commission to enter into the power-producing business without further congressional authorization to construct or operate such commercial facilities.

The Senator from Iowa [Mr. HICKENLOOPER], one of the coauthors of the pending legislation, defined an even more limited role for power production by the Atomic Energy Commission in a colloquy on the floor of the Senate on July 16.

I quote as follows from page 10731 of the CONGRESSIONAL RECORD of that date:

> Mr. HICKENLOOPER. • • • So far as the public-power problem is concerned, it is not even touched in the bill; in the bill there is no provision for the development by the Commission of public power. The only place in the bill where that subject is touched is in the section that provides that if, in connection with research and development, the Atomic Energy Commission produces some incidental power—power which is not primary in its operations—and if the Commission has an opportunity to sell the power, it may sell a few kilowatts which otherwise might be wasted.
>
> The question of the direct production of competitive power by the Atomic Energy Commission is not raised in this measure, and it is not authorized.

This position taken in the bill, and as enunciated by our colleague, the Senator from Iowa, has a close analogy in the field of hydroelectric power production.

In our navigable rivers we have a resource which is clearly owned by the Government. Occasionally we find a few persons who like to think they own it, but they do not own it; certainly not when the Government at least exerts its authority. No one has questioned the right of the Federal Government to build dams to produce power on streams which are owned by the people. Yet, if the philosophy of the Cole-Hickenlooper bill were followed, we would say, "Oh, no, the Federal Government cannot develop power from our water resources. We will not countenance that. Private power companies are the only ones who can build hydroelectric power projects."

The analogy is so apt because in atomic energy we have another resource that is owned by the Federal Government. That is acknowledged even in the Cole-Hickenlooper bill, for the Federal Government, under this bill, retains ownership to fissionable materials.

Moreover, the Government's, and hence the people's, stake in this resource is derived, too, from the fact that the Government has spent some $12 billion of tax money in the development of this resource.

What I am saying is that we have been treating the atomic resource in the same way we have treated any other natural resource. After all, when we get right down to it, the same great forces that made the rivers and streams made the atom. The only thing that mankind has done is to split the atom, and perhaps confuse it. Now we are about to apply it to modern man's living; but as soon as we get atomic energy to the point where it may help mankind, the Government, or at least the present administration, says: "This is a field from which the Federal Government must be excluded."

I do not intend to stand idly by and permit a precedent to be established which will deny the Government of the United States the right to use its own resources, any more than I would permit the establishment of a precedent that the Government of the United States should not have any control over navigable rivers and streams.

Mr. LEHMAN. Mr. President, will the Senator yield for a question?

Mr. HUMPHREY. I yield.

Mr. LEHMAN. Is it not a fact that we who are opposing the bill in its present form in no way object to free enterprise and in no way are trying to prevent cooperation with industry in the development of power? What we are objecting to—and I emphasize this point because it is so widely misunderstood—are the provisions in the bill which completely prohibit the Federal Government from developing any of this power, which is power that obviously belongs to the people, because the people have put up $12 billion for the development of this great resource, which is now of such tremendous value to our country and to our friends and allies. Am I not stating the situation accurately when I say that we are in no way opposed to free enterprise and that we are not trying to prevent the participation of free enterprise in the peacetime development of atomic energy?

Mr. HUMPHREY. I would say that the Senator from New York states exactly what my interpretation of the bill is. Not only are we not trying to prevent the participation of free enterprise, but we are trying to open the door for the participation of free enterprise. However, I do not call the colossal corporations exponents of free enterprise. Some of them represent nothing but free socialism. I am talking about people who can get together, put up a little money, and participate in a development such as this. Some of the loudest voices raised in praise of free enterprise are far from praising actual free enterprise. I am talking about competitive enterprise. I am talking about permitting the participation of a small private utility. When I say small, I mean a utility of about $20 million or $50 million capital, which is not so small in my language, even though some persons may think it is. It is that kind of corporate entity I have in mind.

A reading of the language of the bill shows that it will permit only a handful of the large investment companies in America to participate in the development of atomic energy. I am opposed to that. I am of the opinion that a small REA should have just as much right to the resources which have been created by the taxpayers as the largest investment company.

I shall have a little more to say about that in a few minutes, but speaking about investment companies reminds me of the Dixon-Yates contract. Mr. President, that has really smelled up the atmosphere, and has certainly brought a stench into Washington. The mess is now being taken out of Washington and is being transferred to the Tennessee and the Mississippi Rivers. We will soon come to that mess.

Mr. LEHMAN. Mr. President, will the Senator yield further?

Mr. HUMPHREY. I am glad to yield further.

Mr. LEHMAN. Is it not a fact that the Government of the United States now uses plutonium and uranium and other fissionable materials in production processes, but, under the bill, may not use it in the production of any power which would benefit the people of the country?

Mr. HUMPHREY. That is my understanding. Incredible as it may seem, that is the way the bill reads.

Mr. LEHMAN. Mr. President, will the Senator yield further?

Mr. HUMPHREY. I yield.

Mr. LEHMAN. The reason the distinguished Senator from Minnesota, the junior Senator from New York, and some of our colleagues are carrying on this fight, even though we are sometimes accused of filibustering, which is a completely false and inaccurate accusation——

Mr. HUMPHREY. I interrupt the Senator to say that those who make that kind of accusation never gave us any help to eliminate the filibuster. So far as this Senator is concerned, they made their bed; now let them lie in it.

Mr. LEHMAN. Is it not a fact that we are carrying on this fight—and thank God we are—in order to bring home to the people facts they do not understand and which have been misrepresented, and of which they have absolutely no knowledge and no conception? For the first time, because of the debate which we have been carrying on for the past 3 or 4 or 5 days, we are bringing at least some of the facts home to the people. So far as I am concerned, I want the fight to continue until the facts are known, and then others will support and back up our position and fight with us.

Mr. HUMPHREY. I believe that is exactly what has happened. I venture to say that 2 weeks ago not a handful of people in this country knew what the amendments to the Atomic Energy Act were. I venture to say that not 1 out of 10,000 ever heard of the Dixon-Yates contract. I venture to say that the public did not know that the McMahon Act was being amended.

Mr. President, every time this administration gets ready to give away half the public domain, they want a "quickie." In this instance they are not getting one. The stop lights are on. They are not even going to blink that yellow light. Interest rates went up overnight without any discussion in the Senate; the tidelands were given away; public land bills are all over the place. We now have a tax bill which gives accelerated depreciation of almost unlimited amounts. That was done in a hurry, too. Everything seems to be in a hurry. Why does

not the administration get into a hurry about doing something for the schools of the country? In America today there is greater need for more school buildings than there is need for the passage of this bill. There is on the calendar a bill providing for additional schools, and any time the majority leader wants to set aside this bill for the consideration of that bill, he can do so. The Cooper bill is on the calendar providing $250 million for Federal aid to school construction. But the President says that it must be studied by a committee. Well, let them study it. But I think almost everyone knows what the needs of the schools are.

We spent a great amount of money approximately 2 years ago to make a study of the schools of America. The late Senator Taft and I were cosponsors of the resolution providing for the study. Forty-eight States participated. A profound study was made, the results of which have been submitted to the Congress and to the President. The President, in his first state of the Union message, said he wanted to see the Federal Government do something about Federal aid for school construction. Such a bill is on the calendar. There is no hurry about it, apparently. There was no hurry about helping the unemployed; there was no hurry about doing a lot of things. The things we have to hurry about are to reduce farm income, raise the interest rates, scuttle the housing program, give away the offshore oil, and now give away our atomic energy resources.

No, Mr. President, that is not going to happen without a fight. If we cannot fight it out here we shall fight it out on the hustings, and we shall continue the battle.

The administration seems to be trying to reverse our public-land policy, and it is now trying to set a pattern with reference to atomic energy for civilian and possible home uses.

I say, frankly, that I do not trust this administration's judgment with reference to this bill, and I may as well bare my conscience. I am not willing to allow the private interests of the Nation, with their apparent hold on this administration, to write the public laws of the land or to circulate propaganda which molds public opinion in this area. It is time to protect the public. Atomic energy is as public as a postage stamp, and it is time we so term it, and not turn it over to private interests. There have even been ideas about turning over the Post Office Department to a private concern. The next thing we know we shall be turning the Department of Defense over to the Remington Arms Co.

I shall not stand idly by and see public laws written which literally have no safeguards for the American people.

Mr. DOUGLAS. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. DOUGLAS. The Senator from Minnesota said it was his understanding that the bill denied authority to the Federal Government to generate power from uranium, plutonium, or other byproducts. The Senator from Minnesota is, I take it, aware that this is not only his impression, but it is also the direct admission or assertion of the majority of the joint committee itself. I should like to call the Senator's attention to page 15 of the report of that committee. In the paragraph at the top of the page, beginning on line 4, speaking of section 44, we find the joint committee saying this:

> This section will permit the Commission to dispose of the utilizable energy it produces in the course of its own operations, but does not permit the Commission to enter the power-producing business without further congressional authorization to construct or operate such commercial facilities—

I invite particular attention to the words—

> but does not permit the Commission to enter the power-producing business without further congressional authorization to construct or operate such commercial facilities.

So it is not only the impression of the Senator from Minnesota, it is the direct assertion of the joint committee itself which drafted the bill which drew forth the very able minority views of Representatives HOLIFIELD and PRICE.

Mr. HUMPHREY. The Senator from Illinois has emphasized what I consider to be one of the main weaknesses in this measure. I believe it was the Senator from Oregon [Mr. MORSE] who said the other night that it substituted a golf stick for a yardstick. There is no yardstick in this measure—none whatsoever. There is no real protection of the public interest, and there cannot be so long as the Government's hands are tied.

Despite the Government's vested interest in this resource, the Government's hands are being completely shackled insofar as being able to develop this resource for the benefit of all the people. It is an incredible, shocking limitation.

Mr. President, my interest in having the people of America share in the benefits of this program, through their rural electric cooperatives and public institutions, is not new.

On June 1, at the time the Senate was debating appropriations for the Rural Electrification Administration, I engaged in a colloquy with the distinguished junior from North Dakota [Mr. YOUNG], who was chairman of the subcommittee that had handled that appropriation. At that time the Senator acknowledged that the appropriation for the Rural Electrification Administration could be used to make loans to rural electric cooperatives to construct a nuclear powerplant.

Again, in a speech which I delivered on June 9 before the annual meeting of the Minnesota Valley Co-op Light & Power Association at Montevideo, Minn., I stated:

> Steps must be taken now to protect the public's interest in future peacetime uses of atomic power, rather than permit it to become a private monopoly.

I went on further to say:

> Our great national system of rural electric cooperatives must be alert to the new opportunities that may lie ahead, and to the forefront in taking advantage of these great technological advances. They must be permitted to share with private power companies in experimental development of nuclear power sources.

Mr. President, the possible availability of REA loans to rural electric cooperatives to build nuclear power reactors is important, but I fear that such authorization is entirely inadequate to assure the rural electric cooperatives, municipalities, and other nonprofit electric systems an opportunity to share in the benefits of this new source of energy.

The reason why I am apprehensive is that I am informed that the minimum economically feasible size for a nuclear powerplant is about 250,000 kilowatts. Such a plant undoubtedly will cost many millions of dollars, and the rural electric cooperatives, which are relatively small by comparison with the private power companies, could not begin to finance the construction of such large generating stations.

Mr. DOUGLAS. Mr. President, will the Senator from Minnesota yield further?

Mr. HUMPHREY. I yield.

Mr. DOUGLAS. I saw estimates running as high as a thousand dollars a kilowatt, indicating that the approximate cost of an efficient reactor would range somewhere between $180 million and $250 million.

Mr. HUMPHREY. For a plant of reasonable size or one which would do the job of actual testing the cost factors involved in such power production. Is that the Senator's understanding?

Mr. DOUGLAS. Yes, I do not want to anticipate the Senator's argument. But we are not likely to see, are we, a number of firms competing within an area if an entrance fee of $200 million is required?

Mr. HUMPHREY. I think it is beyond the realm of possibility, and it certainly does not sound as if within our lifetime it would be a very practical proposition to expect a small company, an REA, or a municipality, to engage in that kind of a program.

Mr. DOUGLAS. Has the Senator ever seen two private transmission lines running down the same road on different sides of the street?

Mr. HUMPHREY. Not that I recall.

Mr. DOUGLAS. In other words, even today the distribution of electric power is a local monopoly.

Mr. HUMPHREY. It is by its nature; and therefore it is all the more important that we see to it that this resource shall not be controlled simply by a handful of large combines but shall be made available to the largest number which is economically or engineeringly feasible.

Mr. DOUGLAS. In the days before England became a democracy, is it not true that England was parceled out in duchies: The Duchy of Cornwall, the Duchy of Devonshire, the Duchy of Northumberland, the Duchy of Lancashire, the Duchy of Yorkshire, and so on? England was parceled out into some 15 or 20 different duchies. The duke in each region controlled the economic and political life of that region.

Is there danger that we will be setting up, in the democracy of the United States, similar economic duchies, each

having powers of life and death over industry in its area?

Mr. HUMPHREY. The Senator, I think, has put his finger upon what is the very obvious possibility, under the terms of the proposed legislation now before the Senate. Occasionally there are times in our national development when individuals or combines come to look upon themselves as separate principalities or separate duchies, but we generally do not underwrite them by law. Laws are passed against them. In fact, there is a prohibition in the Constitution against any form of nobility or title in the United States.

Certainly I do not wish to see public law literally prescribe conditions which would make possible what the Senator from Illinois has so ably described as economic duchies, because that would lead to great economic consequences for the United States, and they would be bad. The nuclear resources are tremendous. We have only barely scratched the surface of their overall development. From all we understand atomic energy, certainly we should proceed with caution.

The Senator from Illinois will probably recall that under section 7 (b) of the Atomic Energy Act, the Atomic Energy Commission is supposed to make a report—not supposed to, but required to—whenever the Commission believes that the developments in atomic energy have proceeded to a point where there are commercially feasible projects. Once the Commission makes its finding, it must report it to the President, and then the President must transmit the report to Congress. Congress, then, is supposed to legislate. I say again, in the vernacular of the electrical industry: We have been short circuited. There has not been any report from the Atomic Energy Commission, as prescribed by section 7 (b) of the act. There has not been any report from the President following the report by the Atomic Energy Commission.

Again I say we have had short-circuit treatment. We have had only tid-bits of information. On that basis we are asked to amend the basic law which pertains to our atomic economic development.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. LEHMAN. The Senator from Minnesota is, of course, familiar with the struggle which extended over a period of 30 years against the public development of water power resources on the St. Lawrence River, in New York State. I am certain the Senator also is familiar with the struggle which is still continuing, and unfortunately up to this point has been successful, on the part of the large power and industrial concerns to block the public development of hydroelectric power on the Niagara River, which would serve not only the State of New York, but also portions of Ohio and Pennsylvania, just as the St. Lawrence will serve not only New York, but also portions of New England.

I wish to ask the Senator from Minnesota whether, in view of that history, and in view of the great interest which has been shown in the public utility companies by the large corporations, he believes, even if sufficient capital could be made available by private industry, it is likely that they would set up reactors there which would come into serious competition with the great privately owned public utility companies like Niagara-Mohawk, Consolidated Edison, and the 4, 5, or 6 other great public utility companies.

I raise that question because I believe that there would be no disposition to do anything which would lessen the cost of power to the consumers in the State of New York, or in any other States similarly situated. They would not only not take steps to bring about such competition, but, in my opinion, they would do everything possible to block it.

Under the bill the Government of the United States would be powerless to accomplish anything along that line. It would be powerless to take action which would provide substantially cheaper power to all the consumers throughout the country where reactors could be erected to supply power rates which would be a yardstick, rates which would develop industry and business, and lead to far greater prosperity and far greater savings to the people of the United States.

Mr. HUMPHREY. I think the Senator from New York is absolutely right. It appears to me that we must face up to the realities of investment and business practice. Interests which already have invested millions of dollars in, let us say, a steam plant, whether using coal, gas, or oil as a means of fuel, are going to be hesitant to experiment in a very costly operation for the production of electrical energy or electric power. I think we still should expect that. As a matter of fact, if I were an investor in such a plant, I would expect the management to be somewhat careful and prudent in the use of its money.

Therefore, it is natural that we should expect the Government of the United States to do the pioneering. If the Government is to pioneer, it must pioneer in a way which is practical. It is not practical, as I understand, to build a plant which is too small, because it is not possible to determine what can be produced in terms of quantities of electrical energy, thereby reducing the rate per kilowatt-hour.

So I feel that there must be in the proposed legislation, authorization which, at least, unties the hands of the Government so that it may protect the public interest, and contains a yardstick as a competitive factor in a field of economic activity which, by its nature, at least in a particular area, is monopolistic.

In my colloquy with the Senator from Illinois [Mr. DOUGLAS], we were discussing the cost of nuclear powerplant construction, particularly if the plant were one of 250,000 kilowatts capacity. I said that such a plant undoubtedly would cost many million dollars, and that rural electric cooperatives, which are relatively small by comparison with private power companies, could not begin to finance the construction of such generating stations.

It is clear, therefore, that the Federal Government must assume in this field the same responsibilities as it has assumed in the field of development of hydroelectric power resources.

This is not to say, by any means, that the Federal Government is the only organization that should be permitted to build nuclear powerplants. Certain private power companies likewise should be given an opportunity to build such reactors, and I do not oppose the licensing of private companies, under proper safeguards, to build nuclear powerplants, just as I do not oppose the licensing of private power companies to build hydroelectric power projects, under conditions in which the public's interest is adequately protected.

I do not believe we should ever be driven into a position of all or nothing—public or private. What we are talking about is a balance between private and public utilities; between the use of public resources and private resources. But at all times, whatever agency may be used to develop hydroelectric power or atomic energy for electric production purposes, the public interest must be protected.

But unless the Government undertakes a program of building some reactors itself, as was pointed out by the Senator from New York [Mr. LEHMAN], I fear that the advantages of this new source of energy will not be made available to the rural electric cooperatives, the municipally owned electric systems and other local public agencies.

The Federal Government has ample justification to undertake such a program for other reasons.

First of all, prudent business practices demand that the Government, in order to supply its own needs, undertake a vigorous program of power production from nuclear energy. The Atomic Energy Commission today is the largest single consumer of electricity in the world. When presently authorized facilities are completed, the Commission will be utilizing capacity on the order of 5 million kilowatts, exceeding the combined capacity of the New England States. Its consumption of electrical energy in the near future may reach 8 or 10 percent of the Nation's total, with an outlay of some $150 million to $200 million a year.

In view of the staggering amount of power which the AEC requires for its own operations, one would think that the Commission would be seeking energetically to supply at least a portion of its own needs by the development of nuclear power facilities.

For the life of me I cannot understand how the Commissioners, the Commission, the President, or the Congress should want in any way to deny the Atomic Energy Commission the right to produce the power to service its own needs, just as a matter of economy, as a matter of saving the taxpayers money. Surely we ought to be considerate of that objective. Yet I am afraid that, under the terms of the bill, supplying the Atomic Energy Commission with its own

power needs might very well be considered as commercial sale of power. Therefore, the Commission might be denied that opportunity or that responsibility.

If the Commission supplied its own needs, the Commission would merely be engaging in practices which are followed by many of the largest industries, a great number of which have installed power generating stations to supply their needs for electrical energy. That is not at all uncommon. From one end of the country to the other large industries have built their own powerplants for their own needs. Yet here we are talking about a law which would deny the Federal Government the right to build power facilities for its own needs; and, by the way, its needs may represent the defense and security of the United States of America.

I point out that there has always been in this Nation a shortage of electric energy for an hour of crisis. There always has been. It will be recalled that in the hearings of the late thirties, before appropriate committees of Congress, the private utilities said there was more power than we could ever use, that there was plenty of power. Then came the defense period. Then came the war period. Then came dimouts and blackouts. I can say that had it not been for the TVA and the development in the Columbia River Basin we would never have had the supply of electricity essential for electric power and for the mass production of defensive weapons in the war period. The power requirements of the many industries I have mentioned are but a fraction of those of the AEC, and for an administration which prides itself upon being a "business" administration, it is incredible that it should attempt to hamstring the operations of one of the largest enterprises of the Government.

I consider the language of the bill before the Senate literally to threaten the effectiveness or possible effectiveness of the atomic-energy program itself. There cannot be atomic energy without electric energy. I do not believe we should rely upon the caprice of fortune or upon events or upon private companies to supply the electric energy which may be necessary for the very defense of the country.

But besides the necessity for supplying the AEC's own requirements, there are other equally compelling reasons why the Atomic Energy Commission or other agencies of the Federal Government should be empowered to produce electric power commercially from nuclear reactors.

The history of the electric industry in this country has proved conclusively that regulation of a basically monopolistic business such as the electric industry is largely ineffective. Rate reductions in the electric industry have resulted primarily from competition from what we call the yardstick plants of the Federal Government or other public agencies, rather than from the operation of regulatory agencies. In areas where public power is available, it will be found that reasonable rates are charged by private utilities. I may say that it will also be found that in those areas good profits are made. The private utilities of America have made plenty of money. I am delighted they have. They are paying good dividends on their stocks. They are able to expand. The private utilities have received tax concessions and quick tax writeoffs.

The private utilities literally have done most of the construction of electric generating plants. Only 13 percent of the electric power produced in America comes from Government plants; 87 percent comes from private resources. A smokescreen has been blown up in our land which would lead one to believe that we were socializing the electric industry. That is a lot of "hogwash," and it ought to be so branded. The American electric industry is one of the largest private industries in the world. Eighty-seven percent of all electric energy produced and used comes from private plants. The electric industry has invested hundreds of millions of dollars in plant expansion. The private utilities industry has received tax writeoffs under the law of the land. I am not complaining about it; I simply do not want them complaining as to their particular predicament.

The operation of a public yardstick as a means of regulating rates was strikingly shown in the President's Water Resources Policy Commission report of 1950. Table 3 on page 231 of this report shows how the wholesale rates of power to rural electric cooperatives were reduced steadily by the private power companies in areas where these companies were adjacent to public-power developments. It is noteworthy, however, that there were no corresponding rate reductions in areas such as New York or New England, where there were no Federal power projects.

So if one wants to ascertain where cheap power or reasonably priced power is obtained, all one has to do is find out where there are available Federal electric-power resources. In such areas, because of the competition, there will be found available reasonably priced power. Likewise the private utility will be making money, serving more customers, and industries will be using more electricity. Everyone seems to profit.

For example, the report I have just mentioned, the Water Resources Commission report, shows that rural electric cooperatives in Oklahoma were paying 1.16 cents per kilowatt hour in 1941 to their private-utility suppliers. But with the advent of the Southwestern Power Administration the wholesale rates were reduced to 0.88 cent per kilowatt-hour by 1945, and by 1950 the wholesale rate charged by these same companies was down to 0.58 cent per kilowatt-hour—exactly half the rate charged in 1941. In other words, using approximate figures, the rate went down from 11½ to 5½ mills in a period of a few years, primarily because of competition from the Southwestern Power Administration.

Yet, in the New England States, the wholesale rate to the rural electric cooperatives during this same period increased from 1.25 cents per kilowatt-hour in 1941 to 1.47 cents per kilowatt-hour in 1950. In other words, in an area where there were no yardstick plants, in the great New England area of America, the rural-electric cooperatives rates increased from 12½ mills to 14½ mills, approximately. Yet in the Southwestern Power Administration area, the rates decreased from 11½ mills to about 5½ mills.

I wish to say to my distinguished colleague, the junior Senator from Massachusetts [Mr. KENNEDY], who is now present, that power rates in the New England States are not only working a hardship on farmers, as I have noted, as compared with other areas of America, but upon industrialists, businessmen, and investors. The possibility of using atomic energy or nuclear power for the production of electric energy means everything to an area such as New England, and to some of the other areas in America where natural water resources are not available.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield to the Senator from Massachusetts.

Mr. KENNEDY. I agree with the Senator from Minnesota that the lack of a yardstick has resulted in a great deal of difficulty in trying to bring down power rates in New England. I was glad that the committee accepted the amendment of the Senator from Rhode Island [Mr. PASTORE] and Representative HOLIFIELD, which provides that reactors shall be constructed in geographic areas which might be the first to benefit from commercial atom power. It would be of particular benefit to New England because our power costs are so high. Atomic power will become feasible, therefore, first in the New England area.

Mr. HUMPHREY. I thank the Senator from Massachusetts for his comment. We do owe a debt of gratitude to the Senator from Rhode Island and others who joined with him in the amendment. At least when the licensing is done, the geographical considerations, or the necessities or problems due to geography and to the lack of certain natural resources for power development, will be taken into consideration. I hope the language of the bill is strong enough to accomplish that purpose. I have been discussing it with the Senator from Illinois [Mr. DOUGLAS] and other Members. We wish to make crystal clear that if the Government should undertake research development, consideration would be given to the so-called power-drought or the high-cost power areas.

Mr. President, the rate reduction on the part of the private power companies in Oklahoma, to which I have referred, was accomplished without creating any hardship to the financial stability of the commercial companies. In fact, the companies, if anything, improved their financial position during this period.

The process of rate reduction which I have described in the case of the rural electric cooperatives in Oklahoma has been repeated in every other section of the country where the private power

companies have experienced competition from Federal power projects or local public power systems.

Thus, public power has brought great benefits not only to the consumers who are served directly by the publicly owned utilities, but likewise by the customers of the private power companies which have been forced reluctantly and begrudgingly to reduce their own rates in order to meet competition.

This process of rate reduction obviously has brought savings to the electricity consumers. But, as in other facets of our economy, lower rates have also brought corresponding increases in consumption. The areas which are blessed with the advantages of public power have the highest residential consumption of electricity of any in the country. Moreover, this source of low-cost electricity has made possible industrial development through electro-chemical and electro-metalurgical industries whose very existence depends upon an abundant supply of low-cost electric power.

But as I pointed out earlier, these advantages of public power necessarily must be confined to the regions which have hydroelectric power resources susceptible of economic development. Unfortunately, not every section of the country is so blessed.

To make the advantages of this new, potentially low-cost source of energy available to all sections of the country, it is imperative that the Government be given the opportunity to build some "yardstick" nuclear powerplants. Only in this manner will the public have a means of measuring the cost of electricity supplied to them from nuclear powerplants. Only in this manner can we be assured that the benefits of this resource belonging to all the people will be passed on to the public at large.

It is inconceivable that the Government should be prohibited from engaging in the production of electric power from a source of energy which the Government itself has created.

For that reason, on July 16, I submitted to Senate bill 3690 the following amendment, proposing a new section 45:

SEC. 45. Electric power production: a. The Commission is empowered to produce or provide for the production of electric power and other useful forms of energy derived from nuclear fission in its own facilities or in the facilities of other Federal agencies. In the case of energy other than electric power produced by the Commission, such energy may be used by the Commission, or transferred to other Government agencies, or sold to other users at reasonable and nondiscriminatory prices.

b. The Commission may undertake any or all of the functions provided in subsection 44a through other Federal agencies authorized by law to engage in the production, marketing, or distribution of electric energy for use by the public, and such agencies are hereby empowered to undertake the design, construction, and operation of nuclear-power facilities and the disposition of electric energy produced in such facilities when funds therefor have been appropriated by Congress. Nothing in this act shall preclude any Federal agency now or hereafter authorized by law to engage in the production, marketing, or distribution of electric energy from obtaining a license under section 103 of this act for the construction and operation of facilities for the production and utilization of special nuclear material or atomic energy for the primary purpose of producing electric energy for disposition for ultimate public consumption.

It is my understanding that the senior Senator from Colorado [Mr. JOHNSON] introduced a similar amendment.

This amendment would permit the production of electric power from nuclear reactors, either by the Atomic Energy Commission or by other Federal agencies which already are empowered by the Congress to engage in the production, marketing, or distribution of electric energy for use by the public.

It will be noted that this amendment is merely an enabling one, and that appropriations would have to be made by the Congress before any such Federal agency could engage in the production or marketing of power from nuclear reactors.

The amendment I propose means that the Tennessee Valley Authority, for example, would be empowered to build a nuclear reactor for the production of electric power. This agency has already been delegated by Congress with the responsibility of supplying the electrical-energy requirements of the Tennessee Valley, and it should not be prohibited from engaging in new methods of producing electric power, just as any commercial utility should not be prohibited from taking advantage of new and improved techniques for the production of electrical energy.

My mention at this time of the Tennessee Valley Authority serves as a reminder that the President has already directed the Atomic Energy Commission to contract with a new company, to be formed by two holding companies, in order to supply the energy requirements of the TVA system.

It would seem that rather than use the AEC as a broker to provide TVA with its needs for more power, the President would be far better advised to empower the AEC to produce economically feasible atomic power for the TVA system, or permit the TVA itself to produce such power. This would be possible under the amendment I have proposed.

Mr. President, in mentioning the contract the President has directed the Atomic Energy Commission to make with what is known as the Dixon-Yates firm—composed of the two holding companies—there are some questions which I think could be asked in making the public record.

In this connection let me state that I have in my possession—as I am sure every other Member of this body does—a telegram which was sent a few days ago. It is dated July 19, and it arrived at my office at 3:54 p. m., having been sent from New York City.

The telegram was sent from New York City, and it reads as follows:

NEW YORK, *N. Y., July 19, 1954.*

Senator HUBERT H. HUMPHREY,
Senate Office Building,
Washington, D. C.:

We, the undersigned, have made an offer to finance, design, build, and operate a steam generating station at Fulton, Tenn., to supply the power needs of the TVA in the Memphis area. The cost of this power is to be 3½ mills per kilowatt hour or less. This is practically at the same rate as power produced by the TVA. Our offer will cost the Government between $90 million and $150 million less than any alternative proposal you have for consideration. We are repeating this offer, made to TVA and other governmental agencies concerned, to you and to every other Senator and Representative. We are now adding to this offer as follows:

"We will build steam generating stations on the same basis wherever they are needed in the TVA area. Power from these generating stations will also be available to the private utility companies in the adjacent territory at the same rates as TVA."

We respectfully ask that you interest yourself in the consideration of this offer by the proper Government agency, for the following reasons:

It is best for the Government, because: it saves $90 to $150 million. It eliminates the need for the AEC to make a power contract to supply the needs of TVA. It takes the AEC out of the power business. It eliminates need for further Government appropriations for the construction of TVA generating stations.

It is best for TVA because the Authority can continue to make its own power contracts for its own needs. It enables the TVA to supply all the power the AEC needs at the cheapest price. The Authority retains its ability to meet the growing needs of its own customers. The cost of power remains the same to its present customers. The great benefits, brought by TVA to the area it serves in seven States, are maintained through private money and private initiative.

It is best for the private utility companies in the territory adjacent to TVA because it enables them for the first time to obtain power at TVA rates and to compete with TVA on a price basis.

It is best for the consumer because his monthly bill for electricity in the TVA area remains the same and will be substantially less than he is paying now in the adjacent territory.

It is best for the country because it spreads the benefits of low-cost power over a vastly greater territory to a larger number of people.

Respectfully yours,

Walter von Tresckow, for Walter von Tresckow, New York City; Burns & McDonnell Engineering Co., Kansas City, Mo.; Salomon Bros. & Hutzler, investment bankers, New York City; Long Construction Co., Kansas City, Mo.; Robert W. Larrow, Burlington, Vt.; Harvey Weeks, New York City; George H. Schwartz, Zelig R. Nathanson, Schwartz Nathanson, I. Cohen, New York City; John N. Mitchell, Caldwell, Marshall, Trimble & Mitchell, New York City.

What I like about this telegram is that following the line "Respectfully yours," there is set out the name of every single person associated with the project, so that people may see who they are. We see, for example, the name of Burns & McDonnel Engineering Co., of Kansas City, Mo.; Walter von Tresckow, for Walter von Tresckow, New York City; Long Construction Co., at Kansas City, Mo.; Salomon Bros. & Hutzler, investment bankers, of New York City.

My question is this: Who are the investors in the Dixon-Yates project? What investment bank or banks support that project? Who are the bonding companies? How does it happen that we have a contract proposed, but do not even have the information I have

suggested? I do not think it is a matter of public record as to what great financial resources will be utilized for this particular contract. It is customary, it seems to me, when the Government makes a contract which runs into such proportions, to know about the background. If we can examine the background of every clerk, every riding page, and every officer of the Government, we can examine the background of those who are engaged in contractual relationships with the Government of the United States.

I say there is something "fishy" about this contract. It does not look right. If I were in Denmark, in the words of Shakespeare I would say that there is something rotten in Denmark. It seems to me that there is something not so good in Washington, and it seems to be worse near Memphis.

Who are the investment bankers who are financing the Dixon-Yates contract? What banking houses? What engineering firms? What bonding companies? Who are the investors who are going to be able to get the Government-guaranteed contract, the most amazing contract which has ever been brought to the attention of the Congress? There is to be an investment of slightly more than $5 million for construction which will cost more than $100 million. There is to be a Government-guaranteed, 25-year contract, the Government to pay Federal, State, and local taxes. We have discussed this contract at great length. It is not necessary to go into it further.

I say that there are many unanswered questions. I am of the opinion, from the recent press dispatches which have been brought to my attention, that the President was not fully informed as to some of these questions. I read from a dispatch which came over the ticker tape this afternoon:

> The President said it had long been his policy to change his plans if someone showed him a better way of accomplishing his purpose.
>
> He then said that his action on the power contract was motivated by a fear of the consequences of continued Government power development in one area of the country, without providing similarly for the development of other river basins.
>
> As for anyone saying he wanted to destroy the TVA, the President said the politest way he could answer that was that such an interpretation was in error. On the contrary, he said he was prepared to support the TVA with all of his heart.
>
> A reporter said that one of the principal objections to his position stemmed from the fact that three AEC members opposed signing the power contract, but had to do so on presidential orders.
>
> Mr. Eisenhower was then asked whether he felt he could order independent agencies to execute administrative policies to which they were opposed.
>
> The President said in the first place that he was governed by the recommendations of the Attorney General. He added that someone must exercise responsibility when the chips are down.
>
> He said that was his position in the power contract, adding that he did not believe the AEC could be classed in the same independent group, with, for example, the ICC.

It seems to me that we do not need to argue too much over the latter part of the question, as to whether or not the Atomic Energy Commission is an independent agency. One thing is certain, and that is that the Atomic Energy Commission has the responsibility to report to the Congress and to the President. In the case of the pending legislation, it has not done so.

Another point—and I should like to know what the President's answer to this question was, because it is not reported here—Did the President really know that three members of the Commission were opposed to the contract? It seems to me that the press reports skip over this question very quickly, without any answer whatsoever.

Finally, I should like to comment on the fact that the President said, "that his action on the power contract was motivated by a fear of the consequences of continued Government power development in one area of the country, without providing similarly for the development of other river basins."

The answer to that is not to weaken the TVA, but to put more push behind other power projects. We do not help the country by distorting the historical relationships between the Tennessee Valley Authority and its area and the Atomic Energy Commission and the private utilities. If we are worried because one area of the Nation is getting too much public power, we help the entire country by helping another part of the country. The answer is to help the other areas of the country.

Only a month ago I was pleading on the floor of the Senate for $400,000 for the beginning appropriation to bring high voltage transmission lines into the State of Minnesota from the Missouri basin, to bring them up to the Benson-Fergus Falls area, so that we could tie into a grid coming from the southern part of the Missouri River basin, from the Fort Garrison Dam in the Missouri River basin. I did not get any support. The administration did not recommend that project. Surely the people of my section are concerned about the ever-increasing facilities of the TVA. There has been concern about what they consider to be special treatment for the TVA area. I am not concerned. The answer to that is to give other parts of the country the same kind of special treatment which has taken place in the TVA area. From what I have seen of the TVA area, the result has been an improvement of the entire area. There has been an expansion of industry, and an improvement of homes, schools, parks, and playgrounds. There has been an improvement in health, and an improvement in income. The answer is not to try to shackle that development, but to try to help other parts of the country to move ahead.

In view of what the President has said, as reported in his press conference, I suggest that in areas which do not have river systems susceptible to hydroelectric development, in areas which do not have coal, oil, and gas which can be used for the development of low-cost electrical energy, we should provide for the development of electrical energy from nuclear power.

It is in that very respect that the pending bill is weakest, because the bill does not provide for the Atomic Energy Commission to enter into the kind of experimentation and pilot plant projects which will make it possible for many areas of the country to benefit in the foreseeable future from low-cost electrical energy to be developed from nuclear power.

I hope those who are advising the President will point out to him that all we seek is fair play and fair treatment. No effort is being made here to restrain private utilities from their legitimate aspirations and legitimate investments. However, an effort is being made to make certain that the great pattern of electrical power development, which has been established for years, shall continue to move forward. We do not want our REA's to die on the vine. We do not want to permit public bodies furnishing electrical energy to die because of lack of adequate electric power.

I have just had brought to my attention a matter which I believe is of significant importance. In the bill, S. 3690, on page 10, in "Chapter 3, Organization," section 21, the present law, known as the McMahon Act is reenacted. That is the chapter which created the Atomic Energy Commission. In line 13 of page 10 the pending bill provides that the President shall designate one of the members as chairman of the Commission, and then in line 25 the bill provides:

> Action of the Commission shall be determined by a majority vote of the members present.

It is quite clear from that language in the bill that when the Atomic Energy Commission is to undertake a program, it will be a majority of the Commission that will determine the program. It does not say that it will be done by the Bureau of the Budget or by the President. It says it will be done by a majority decision of the Commission. To be sure, the Commissioners are appointed by the President and confirmed by the Senate. However, once appointed and confirmed, the Commissioners are empowered to make decisions. In this instance, the decision that they made on the Dixon-Yates contract was "No." Three members said, "No."

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. HICKENLOOPER. Is the Senator from Minnesota under the impression that the Atomic Energy Commission voted to take action on that contract?

Mr. HUMPHREY. No; the Senator from Minnesota is under the impression that they did not have a chance to take action.

Mr. HICKENLOOPER. There was no action by the Commission on that score, and no vote. There were some preliminary opinions expressed by some members of the Commission, but the Commission took no action on the contract.

Mr. HUMPHREY. That is what I am complaining about. The President ordered the contract. The Commission was bypassed. Does the Senator from Iowa say that three members of the

Commission did not write reports or letters, or make statements in opposition to the contract?

Mr. HICKENLOOPER. Four members of the Commission, 3 or 4 years ago, took a position against the development of the H-bomb, but the President saw fit to take a different position—and I am glad he did—and then the Commission took a different position, after the President had determined what the policy should be.

Mr. HUMPHREY. Let us keep the facts straight. Is it not a fact that in that area the President did have authority to act, which authority is given to him expressly under the law?

Mr. HICKENLOOPER. I think he had authority.

Mr. HUMPHREY. Under the terms of the law, I mean. Is it not true that the Commission referred that question to the President?

Mr. HICKENLOOPER. I think that is true.

Mr. HUMPHREY. Let me ask the Senator this question——

Mr. HICKENLOOPER. When I say that is true, I will have to explain to the Senator what happened. There was a dispute between the Commission and the military liaison committee, and others, and the general advisory committee, and all of them said, "Well, let us take it to the President."

Four members of the Commission originally said, "We will not go into the H-bomb program." A little later one of them went to the other side, which made it 3 to 2 against the H-bomb program. However, they got together and agreed that they would take the matter to the President and submit it to him. They did. The President made the direction, and the Commission carried out the President's direction.

Mr. HUMPHREY. May I point out to the Senator from Iowa, who knows much more about the matter than any other Member of the Senate, because he has been for years a member of the joint committee, that the law specifically gives the President unusual powers insofar as the development of weapons is concerned? There is nothing in the law which says the President may designate who shall be the contracting parties to a contract for the production of a kilowatt of electricity. There is a great deal of difference. The President is the Commander in Chief. The President has great constitutional powers when it comes to the question of weapons. In the McMahon Act itself that fact is spelled out.

Furthermore, in the instance of the hydrogen bomb, the Commission itself unanimously referred it to the President for his decision. I say to the Senator from Iowa that the Commission did not refer to the President of the United States the Dixon-Yates contract. I say further to the Senator from Iowa that 3 members of the Commission expressed their disapproval of that contract, not so much because of the terms of the contract, but because they objected to the Atomic Energy Commission acting as broker for TVA.

We are talking about something else than the legitimate work of the Atomic Energy Commission. As concerns the H-bomb, that decision had to be made by the Commission and the President.

The Dixon-Yates contract does not call for the production of any electric energy for the Atomic Energy Commission—not one kilowatt, as Senators have pointed out on the floor again and again—but what it represents is an order to the Atomic Energy Commission to contract with a private firm to supply electricity to the TVA for the purposes of serving the Memphis area. In that great Memphis area that electricity will be serving such great defense installations as race tracks, peanut vending machines, hamburger stands, pop bottlers, and similar installations of equal importance to the security of our country.

I suggest that we have a most amazing situation. The TVA did not want the Dixon-Yates contract. The Atomic Energy Commission, or at least a majority of it, did not know about the contract. Congress apparently did not know anything about it until it happened. Congress did not ask for the contract. In fact, Congress had legislated in other areas last year for the Paducah plant and had excluded this one. The terminology of the other law is crystal clear.

I think the only thing one can say is that someone advised the President, "If you want to make a sort of flank attack upon the TVA, the way to do it is through a contract known as the Dixon-Yates contract with the Atomic Energy Commission."

I think the burden of proof for the legitimacy of that contract, or even for its desirability, rests upon those who have propounded it and who have made it and who have wanted it. Surely there is no reason at all to assume that it is of importance to the security of the country, or that it was wanted by the Commission, or that it was wanted by the TVA.

That argument has been worked over so much that I am sure there is nothing more that can be said about it.

I go back and ask a simple question: Who is financing this project? We found out who the financiers would be in the alternative proposal. Is the City National Bank of New York City financing the project? I do not know. I just wonder. Is the Continental Trust of Chicago financing the project? I do not know. I just wonder. If it is, it may be bad or it may be good. I just wonder. I merely want to know. What is the secret about it?

If there were need to provide greater power resources for the Atomic Energy Commission, the TVA could have built the plants, or Congress could have authorized more plants. That is what we did a year ago in that area, when we authorized private steam plants as a part of the Tennessee Valley system.

Therefore, what we really have is the use of the Atomic Energy Commission as a broker to provide TVA with power, and in this instance to provide it with power that it did not even request.

I have some other amendments which I have proposed. I believe they are necessary to bring the power features of the pending bill in line with the provisions of the Federal Power Act.

As I pointed out earlier, I have no objections to licensing privately owned power companies to use nuclear fuels for the commercial production of electric power. These companies are permitted by present law to obtain licenses to develop another great resource owned by the Government—the Nation's navigable streams.

But whereas as early as 1920 the Congress enacted the Federal Power Act to set up certain safeguards to the people when private institutions are permitted to develop resources belonging to all the people, no comparable safeguards have been provided in the Cole-Hickenlooper bill.

In fact, there is almost a complete absence of such safeguards. The lack of such safeguards is evidence of this administration's total disregard for the people's interest in resources belonging to all the people. To permit the Government to husband its resources in such a flagrantly loose manner is unconscionable.

Therefore, the following is one of the amendments which I have provided to set up standards for licensing private utilities in obtaining nuclear fuels:

On page 44, after line 3, add the following proviso:

"*Provided*, That upon not less than 2 years' notice in writing from the Commission the United States shall have the right upon and after the expiration of any license to take over and thereafter to maintain and operate any facility or facilities for the utilization of special nuclear material for the generation of electric energy on payment of the net investment of the licensee in such facilities, with severance damages, if any, in general accordance with the terms of section 14 of the Federal Power Act: *And provided further*, That if the United States does not exercise its right to take over the facility or facilities on the expiration of any license, States, municipalities, and cooperatives shall have a prior right of acquisition on the same terms in connection with the issuance of a new license for such facility or facilities."

The principle of this amendment is rooted in the Federal Power Act, which contains a similar provision generally known as the "recapture clause." The reason for such a provision in the Federal Power Act is that the Federal Government is the owner of our navigable waters, and merely licenses private companies to utilize those streams in the public interest. When a private company receives a license to build a dam on a navigable stream, at no time is it deemed that the company has ownership of that structure in perpetuity. At the conclusion of the term of the license, the Federal Government is given the option of taking over and operating the dam, upon payment of just compensation to the company.

In the field of atomic energy a similar situation exists. The Federal Government retains ownership of the nuclear material, giving licenses to private companies for a maximum of 40 years to build reactors to utilize the nuclear materials in the public interest. There-

fore, at the expiration of such licenses, the Government should have the option to maintain these facilities, if it deems necessary in the public interest.

It should be noted that under my proposed amendment, the licensee must be given at least 2 years' notice in writing if the Government decides to exercise its option of maintaining the facility, and the licensee must be justly compensated in accordance with the procedures established under the Federal Power Act.

Mr. President, that seems like elemental justice. I cannot imagine a licensing system under which anyone in government would grant a license in perpetuity. There is not a franchise that is not limited, in terms of years, at least. Yet here, with these fabulous resources in which the people have invested billions of dollars, resources which may change the face of America, the pending bill literally permits the Government to give a license extending into infinity, with no recapture clause whatsoever even if it should be deemed necessary in the public interest or in protecting national security. This seems to me to be the most loosely drawn provision of the bill.

Mr. HICKENLOOPER. Mr. President, will the Senator from Minnesota yield?

Mr. HUMPHREY. I yield.

Mr. HICKENLOOPER. There is always the opportunity to recapture the essential material, upon certain conditions arising. Certainly, in the recapture of the material we recapture the business. The business cannot operate if the material is taken back by the Commission under the circumstances set forth in the bill. It becomes a recapture provision.

Mr. HUMPHREY. It is quite common in municipalities that taverns, restaurants, and so forth, are licensed. Licensing is nothing new in American life. We do not recapture the license by shutting off the sale of spirits. I have never heard of a Government agency that did not have written into the law a provision for recapture.

Again, Mr. President, this is one of those backdoor, subterranean techniques. If there is a need of recapture of the license, why do we not write it into the law? Why have the kind of provision that says, "All we need to do is to take away your material." That is not even being fair.

Under the amendment I am offering we at least serve notice to the licensee 2 years ahead of time that the Government can reclaim its right to the license. I think that is fair and equitable, and it should be included in the measure. I am not at all satisfied with the idea that merely because the materials are under Government control it is adequate, or even fair. That may lead too much to capricious authority in the hands of the Government. I want it more formal.

The next two amendments which I introduced, and which relate to the procedures to be followed by the Atomic Energy Commission in processing applications for licenses, are as follows:

On page 86, line 18, after comma, insert the following: "to municipalities, private power companies, public bodies, and cooperatives within transmission distance authorized to engage in the distribution of electric energy to the public."

Line 21, insert new sentences after the period, as follows: "In case of protests or conflicting applications or requests for the establishment of special conditions in prospective licenses, the Commission shall, prior to issuance of any license, hold public hearings on such application or applications in general accordance with the procedures established in connection with consideration of applications for licenses under the Federal Power Act and interested parties shall have the same rights of intervention in such proceedings, application for rehearing, and appeal from decisions of the Commission as are provided in that act and in the Administrative Procedure Act. In any proceeding before it, the Commission, in accordance with such rules and regulations as it may prescribe, may admit as a party any interested State, State commission, municipality, public or cooperative electric system, or any competitor of a party to such proceeding, or any other person whose participation may be in the public interest."

Let us see what that does to the pending measure. On page 86 of the bill it is provided as follows, beginning in line 14:

The Commission shall not issue any license for a utilization or production facility for the generation of commercial power under section 103, until it has given notice in writing to such regulatory agency as may have jurisdiction over the rates and services of the proposed activity, and until it has published notice of such application once each week for 4 consecutive weeks in the Federal Register, and until 4 weeks after the last notice.

Let us consider the State of Minnesota, Mr. President. I am rather surprised that my good friend from Iowa [Mr. HICKENLOOPER] is not aware of the fact that there is no regulatory agency for private utilities in Minnesota. I am not proud of it, but that is the way it is. They had that fixed early in the State constitution. We have no regulatory agency. I should like to have the city of Minneapolis know if there is going to be a license issued. I should like to have the rural cooperatives know; I should like to have the Northern States Power Company know if there is an application for license and a license granted. After all, how else would the State which I partially represent know? How would we get any notice? It may be said, "You will get it in the Federal Register." If all the other people of the Nation are going to hear by letter or telegram or some other means of communication, I would suggest that we hear also.

I am only suggesting that the language be broadened so as to include what is now in the Federal Power Act. If that is done, we shall not get into any trouble. It is not written into the bill now. The amendment only places in the proposed law what is already in the Federal Power Act.

The amendment to be inserted on line 18 provides that, before issuing a license for the utilization of nuclear materials for the commercial production of electric power, the Atomic Energy Commission must give notice to municipalities, private utilities, public bodies, and cooperatives within transmission distance of the facility where the proposed nuclear power facility would be located.

This provision merely assures that utilities—both public and private—already serving electric consumers in an area must be given ample notice if a generating station using nuclear fuel is to be constructed in the service area of the existing utilities. Such a provision would assure that the Commission would not issue a license for a new generating facility without the knowledge of those utilities which have the most direct interest.

That seems a fair requirement. I would hope it would give them at least advance information as to what was going to transpire in terms of competition.

The latter part of this amendment, containing the language to be inserted on line 21, would require the Atomic Energy Commission to hold public hearings and follow the other time-tested procedures of the Federal Power Commission before issuing a license for a nuclear powerplant.

I notice no particular reference in the bill, so far as I can see, to the public hearings, or any reference to the Legislative Procedure Act. I merely ask that what is now established law—and Republicans and Democrats proudly proclaim this law—be applied to the pending bill, so as to include that provision as a part of the language of the statute.

I know the argument will be made, "Well, that was the intent." I am not satisfied with all the good intentions, which do not seem to materialize at times. Nor am I satisfied with the so-called legislative history. If there is a legislative history which interprets something in the bill that I do not see written there, then why not write it into the bill? If legislative history means what it says it means, let us include it as a part of the statute. All too often the so-called legislative history is window dressing. I want to be sure it is a part of the window sill, a part of the structure or the device we are creating.

Section 182c of the bill requires that the Atomic Energy Commission give preference to applications for commercial power facilities to those located in high-cost power areas of the United States. The amendment which I propose to this section is as follows:

Where conflicting applications include those submitted by public or cooperative bodies such applications shall be given preference.

My amendment would require that within the preference to applications for high-cost power areas, a further preference should be given to applications from public or cooperative organizations.

This amendment, again, follows the policies established by the Congress in the Federal Power Act. In fact, the preference to public bodies in the Federal Power Act is even stronger than the one which I now propose to be added to the Cole-Hickenlooper bill, in that the Federal Power Act provides that if the application by the public body is not equal to that of the private company, the public body shall be given reasonable time to amend its application to make it comparable to that of the private utility.

We are dealing with a public law which may very well supersede the Federal Power Act, because it is entirely probable that from the vast resource of energy which is available from atomic power, the development of hydroelectric facilities may be on its way out, may be a thing of the past. I have read many fine articles saying that we have approached a new horizon, a new period, in the development of electrical energy. I do not want to see that new period retarded or weighted down by a public law which will give preference to a privileged few, and not fair treatment to the many.

Therefore, I want to see written into the proposed legislation all the safeguards which have been proved to be workable and of benefit to the public interest.

We are not in the realm of theory. The amendments which many Senators are offering are amendments which already are in other statutes, already tried and tested, and proved by experience.

Certainly we cannot quarrel with the principle that nonprofit public agencies and rural electric cooperatives should have the first opportunity, where there are competing applications, to utilize a resource owned and developed by the Federal Government.

The next amendment which I have proposed is as follows:

(e) Every licensee under this act, holding a license from the Commission for a utilization or production facility for the generation of commercial power under section 103, shall be subject to the regulatory provisions of the Federal Power Act applicable to licensees under that act as established by sections 301, 302, 304, and 306 thereof and to such other provisions of the Federal Power Act as provide for the enforcement of the regulatory authority of the Federal Power Commission with respect to licensees for development of water power.

That is the technical language. What does it mean?

The purpose of this amendment is to assure that those licensed by the Atomic Energy Commission to use nuclear materials for the generation of commercial power are subject to the regulatory provisions of the Federal Power Act.

That is as reasonable a request as could be made. I suggest that under the terminology of the bill before the Senate, it is not at all clear that the Federal Power Commission or the Federal Power Act regulatory provisions would be applicable to the atomic installations.

In view of the fact that the Federal Government has spent some $12 billion in the development of atomic energy, and is continuing to retain ownership to nuclear materials, it would be inconceivable to permit exploitation of the public by those which are licensed to use this public resource. Therefore, I say that their business must be subject to close regulation.

Accordingly, the amendment to which I have just referred would require licensees to be subject to the regulatory provisions of the Federal Power Commission. The yardstick operation of nuclear powerplants by the Federal Government must continue to be our first line of defense against exploitation of this resource, but the control by a regulatory commission such as the Federal Power Commission is imperative as a second line of defense against exploitation by private licensees.

I am rather amazed that that language was not included in the act. Why all at once ignore the Federal Power Commission? Why all at once abrogate the preference clause of the Federal Power Act? Why fail to establish more standards for the use, development, and distribution of electrical energy from nuclear power, if we have them for the development of electrical energy from hydroelectric power? We are talking about electricity, and electricity is made for the people. Electricity can be used for good, or it can be used for bad. We are talking about something which is not new at all—electrical energy. Why should not the same tried and tested rules and regulations be applied to electrical energy generated from nuclear power as to electrical energy generated from thermo or hydroelectric power?

I think it is very strange that the bill before the Senate literally rewrites the whole pattern of the regulatory power of the Government over a great natural resource which can produce electrical energy. I do not think this is merely an inadvertent omission. I am of the opinion that it was calculated.

There has been a long-time battle in this country to weaken the Federal Power Commission. There has been a long-time fight to weaken, and ultimately destroy, the TVA. There has been a long-time fight to put our great natural resources of power and fuel into the hands of a limited number of monopolistic interests.

I am afraid that we now see an attempt being made in Congress—in the last days of this session of Congress—to drive through a bill, and to make it a public law, which would erase from the statute books, for all practical purposes, the regulatory mechanisms and the regulatory rules which have governed the sale, distribution, and generation of electrical energy; because, make no mistake about it, within the next decade electrical energy will be produced in ever-increasing quantities from nuclear fuel and nuclear reactors.

I think we should be exceedingly careful as we work on the proposed legislation to make certain that we do not open up, so to speak, a Pandora's box of trouble, or, should I put it, of special privilege, because millions and millions of dollars will be made out of atomic energy, just as billions and billions of dollars have been taken from the people in taxes to develop this resource. So, Mr. President, millions and millions of dollars will be available in terms of profits for those who receive the licenses.

I say that when anyone gets a license, it is prima facie evidence that he is receiving from a public institution a grant of authority or a delegation of power which belongs to the public institution or the public agency. When one receives any kind of license in other areas, he is subject to regulation. The regulations in this area should be drawn to protect the public interest. I do not want to see any ifs, ands, buts, or ors. I want to make certain that the regulations are contained in the law. Much as I respect the words of my colleagues, much as I respect what is called the legislative history, much as I have been brought up to respect committee reports, they are poor substitutes for statutory language. They do not have the same meaning, or the same directness of approach and application as the words written into the act. I say any provision which can be subject to misinterpretation, should be made clear in the law. Then we shall know what the law is, and there will be no guessing or proceeding in the realm of theory.

Accordingly, therefore, one of the amendments I have offered would require licensees to be subject to the regulatory provisions of the Federal Power Commission. That is the least amount of regulation, or the most equitable regulation, there could be.

One further amendment which I have submitted is as follows: "and no construction permit shall be issued by the Commission until after the completion of the procedures established by section 182 for the consideration of applications for licenses under this act."

This is one of the most important of the series. For, oddly enough, under the bill as now drawn, the Atomic Energy Commission is permitted to issue a construction permit for a nuclear power facility before a license is finally issued. I do not know why that is so. I am sure that no alderman or mayor would stay long in his position if he issued a license for a saloon before it was in existence. That is a poor comparison, but we are talking about licenses. A person is not issued a license for a car before he buys one. He generally has to produce the engine number of the automobile. Here is a situation in which the Atomic Energy Commission could issue a permit for the construction of a plant long before the license would even be granted. That is the old game of the camel's getting his head under the tent.

Let us assume the Commission finds later there is a reason why perhaps the license should not have been granted. Then pressure will be put on the Commission and on the Congress. Every Senator and every Representative will have persons saying to them, "We have already spent $200 million. We have already spent $50 million. You cannot deny us the license now."

I repeat, Mr. President, what is the hurry? There does not seem to be any hurry in the bill to help the REA's. There does not seem to be any particular hurry in the measure to help the municipalities. Who is asking for such a big rush? As a matter of fact, I now respectfully suggest, as I did earlier, that before we rush pell-mell into the revision of the Atomic Energy Act, we should use the old act a little bit. The old act, the McMahon Act, the basic law, as I have said, and as I shall continue to say, requires—it says "shall"—that there be a report made by the Commission to the President, and by the President to the Congress. The Commission has not made any report. There has been an argument in the Commission as to who is running it. The President has not made

any comprehensive report. The President apparently went to the Attorney General to get information about the Dixon-Yates contract. I doubt that he went to the Atomic Energy Commission, because had he done so, he would have found that a majority of the Commission was not in favor of the contract. He found a majority in the Justice Department—a majority of one.

It is clear that the ability of the Commission to issue the construction permit makes academic the procedures which must be followed by the Commission before issuing the license, for a prospective licensee could spend many millions of dollars, acting under the authority of the construction permit. It would then be highly doubtful whether such a company could be denied a license after being permitted to make such construction expenditures.

The amendment which I have proposed would insure that a fait accompli would not be effectuated before an applicant for a license ran the full gamut of the procedures required by law.

As I conclude, I should like to comment at this point on another amendment submitted by the Senator from Iowa [Mr. GILLETTE], whom I was proud to join as a cosponsor. It requires the Atomic Energy Commission to give a preference to local public agencies and rural electric cooperatives in marketing surplus power from its own installations.

The roots of the amendment go deep into American history. In fact, it was almost a half centry ago—in 1906—that the first so-called preference clause was first enacted by the Congress in connection with the marketing of power from Federal hydroelectric power projects.

I should like to give my Republican colleagues a little opportunity to redeem themselves. When we talk about the year 1906, we are talking about the period, in the history of this country, of the service of Theodore Roosevelt, one of the great Presidents of the United States—Theodore Roosevelt, the great conservationist; Theodore Roosevelt, who believed in the preference clause in the Power Act; Theodore Roosevelt, who said, "Speak softly and carry a big stick." This Republican administration has abandoned Theodore Roosevelt. It has forgotten his conservation messages. It is trying to do away with his Federal power policy. The administration talks loudly and, as one of my colleagues said the other day, carries a feather duster. It is not engaged in trying to pursue the great liberal spirit of that great Republican, Theodore Roosevelt.

I say to those on the other side of the aisle that effort after effort has been made to emasculate, to weaken, and to destroy the concept of protecting the great public and natural resources of the United States.

I am sure that in the days of Theodore Roosevelt we would not have lost the tidelands. I am sure that in the days of Theodore Roosevelt we would not have had the so-called stockmen's bill and similar bills before us. I am sure that in the days of Theodore Roosevelt there would have been a real struggle to protect the preference clause in the Public Power Act and the basic regulatory provisions which are necessary to protect the great natural resources, such as nuclear energy.

Gone are the days of Theodore Roosevelt. Of course, he did not stay long in the party. He had to bolt in 1912 in order to have his voice heard. But we are grateful to him for his years of service. We are particularly grateful for the fact that he was an ardent conservationist, that he recognized the public interest, and set a pattern for us to follow. That pattern today is no longer being followed. There are some persons who would tear it up.

I repeat, it was almost a half century ago, in 1906, that the so-called preference clause was enacted by Congress. That preference clause, 48 years later, in the year 1954, is threatened. The preference clause has been an important part of all the Federal power policy for almost a half century. In fact, up until recent years it has never even been contested. Now, when there is a proposal to utilize atomic energy for the production of electrical energy, according to the provisions of the bill before the Senate, it is proposed to scuttle the preference-clause section of the Power Act.

I call upon my friends across the aisle to return to the faith of their fathers. Some of their modern-day cousins are getting them into trouble. Return to the faith of their fathers, I ask them, and return to the faith of Teddy Roosevelt. Return to the faith of Abraham Lincoln. Let us have less of making speeches about them and more of following their spirit. This preference provision I think I shall call the Roosevelt preference provision, and in order not to alarm any of my colleagues, I mean the Theodore Roosevelt preference clause which, by the way, was endorsed by his cousin, Franklin Roosevelt. It represents a bipartisan effort to preserve this great public power feature which has served our Nation's interest so well.

The preference provision is equitable and has served our Nation's interests well. During the past half century it has been reaffirmed and strengthened on 12 occasions under both Democratic and Republican administrations. It is another indication of the appalling deficiencies of the present bill that a preference clause for local public agencies and rural electric cooperatives has been omitted.

Mr. President, the need for amendments such as those which I have introduced serves but to underscore the grievous failings of the pending bill. The bill, in its present form, is more than a giveaway of colossal magnitude—a magnitude so great that in the present stage of the atomic science we are still unable to calculate the extent of the giveaway. The bill establishes a pattern of complete and willful abdication of governmental responsibility in a resource development program which will have a profound influence on the economic, social, and political life of our Nation for many generations to come. This abdication by the Government would be in deference to a handful of large corporations which already are relatively free from competitive influence, and which would represent an even greater and more dangerous concentration of economic power if the pending legislation is approved by the Congress.

Even with the amendments which I have proposed the bill contains many inadequacies. But without such amendments it is a travesty upon the noble traditions which our Government has established in the past in conserving and developing our Nation's resources for the welfare of all the people.

Mr. President, I want my friends across the aisle to know that this is their first opportunity as a party to write public preference as a power policy for the Nation. I want them to know that by failing to take definite steps to write public preference as a power policy of the Nation, they are, in effect, tearing up the historic record of the development in the United States of public preference as a power policy.

Mr. President, in connection with this matter we are not discussing ordinary power, but we are discussing the use of nuclear energy for the generation of electric power. We are putting into the open, where all may see it, the policy of the administration with regard to public power; and in connection with this matter we are pointing to the Dixon-Yates contract, a contract which the administration cannot defend, for it is the most unconscionable contract that has been brought to public notice for years and years. That is the Dixon-Yates contract—a contract which no one wanted, but which was ordered from high places. The Dixon-Yates contract gives a bonanza the like of which has not been seen in Congress for 100 years. The Dixon-Yates contract will establish a precedent which will plague the Government for years to come. I say here and now that if special treatment is given to the Dixon-Yates group, then I want similar special treatment given to all the utility groups in the part of the country I represent. If there is to be a public feeding trough, there should be more than one snout in it; there should be many of them in it.

The administration is getting into a position from which I am sure it would like very much to extricate itself. The administration has ignored section 7 (b) of the Atomic Energy Act of 1946. In its proposed amendments to the McMahon Act, the administration has not had included in the pending bill any safeguards, or at least not any proper safeguards, of the public interest regarding the use, distribution, and development of electrical energy as generated from nuclear power. The administration has in the pending bill a provision for the making of a contract about which the administration does not dare speak. The administration has been driven into a corner, so to speak, because that contract is an indefensible one.

So, Mr. President, we are now beginning to see the real, true image of Republican doctrine. Let us have no more public relations announcements, such as have dribbled out from time to time, regarding Republican policy, for here we are beginning to see the real substance of Republican policy, namely,

a reversal of the public power policy which thus far has stood for 50 years. Certainly every good Republican should rally now in defense of the spirit of that policy.

However, by means of the pending bill, the Republicans will be repudiating Theodore Roosevelt, and will be repudiating the conversation policies, and will be repudiating the Federal Power Act. They will be turning back the pages of history.

Certainly the present so-called "businesslike" administration is guilty of violating almost every principle or concept of good business. The Dixon-Yates contract will cause the name of this administration to be recorded in history as a horrible example of what not to do. I think the Dixon-Yates contract will plague this administration in the way the Teapot Dome plagued another Republican administration.

Mr. President, we shall have more amendments to offer. As I have previously asked, why the hurry to act on this bill? I have not see any prairie fires of political anxiety over the adoption of amendments to the Atomic Energy Act.

Mr. President, as I have said earlier, I have received many letters of inquiry as to what Congress will do in regard to school construction. I am much more interested in the passage of the school-construction bill than I am in the passage of the pending measure. I am sure that when I examine the calendar, I shall find listed on it the bill known as the school-construction bill, which recently was reported from committee. That measure was sponsored by the Senator from Kentucky. I am sure the bill is on the calendar.

I wish to point out that every day I receive great numbers of letters inquiring about what action Congress will take on the school-construction bill. Furthermore, many persons send me letters in which they ask what Congress will do about unemployment compensation benefits. In addition, I have received, today, many telegrams about the conference report on the housing bill.

Mr. President, I am happy to find on page 10 of the calendar the listing of Calendar No. 1797, Senate bill 2601, to provide for Federal financial assistance to the States and Territories in the construction of public elementary and secondary school facilities. I wish to congratulate the Senator from Kentucky [Mr. COOPER] for that bill. I have had a long-time interest in that subject. In the 81st Congress, I introduced the first measure on that subject. As I have said earlier in the debate, I was fortunate in having that bill passed, and it is now public law, and it authorizes a nationwide study of the school needs.

School administrators have recently been meeting in Washington, D. C. The National Education Association met recently in this city. The national educators also met in Atlantic City, where they talked about school construction needs.

I do not recall receiving one telegram or one letter regarding the urgency of the passage of Senate bill 3690, to permit the Atomic Energy Commission to give special licenses to special persons, for special purposes, to make bigger special privilege. I have not received any request of that sort.

So far as the international aspects of the pending bill are concerned, I am of the opinion that the President can do under existing law everything he needs to do. If he cannot, we shall join the Senator from New York [Mr. LEHMAN] in taking specific action upon that section of the measure.

Mr. President, I am a little worried about the efforts to hurry us along. It was about 1 year ago that we were being hurried regarding the question of giving away the synthetic rubber plants. I think my colleagues will recall that, as a result, we hurried through some amendments to prevent the handling of the rubber plants from becoming a scandal.

Now we are told we must hurry other measures into law.

I myself have good reasons for wishing to hurry, for I desire to leave Washington and return to my State, to see my constituents. But so long as I am a Senator, I wish to protect them from what I consider to be an inequitable provision and, furthermore, a very unwise legislative policy.

That is why I have offered certain amendments. By the way, Mr. President, several other amendments will be sent to the desk by me today; those amendments will apply to the civilian aspects of the development of atomic energy.

Mr. President, before we conclude the debate, I think it will be good to know whether some of the other more urgent measures will be taken up. I see the majority leader in the Chamber. I wonder whether he plans to have the Senate take up the school-construction bill, once the Senate completes its action on the pending bill. I hope the school-construction bill will be taken up very soon.

Let me say that I believe that if today the majority leader were to conduct a public-opinion poll in the United States, I would be willing to make a sizable bet—that is, under the $1 figure—with the majority leader that for every response he would receive regarding the urgency of the pending measure, he would receive 100 responses regarding the urgency of the school-construction bill. Furthermore, I am sure I can find on the calendar other bills which can accurately be said to fall in the same category.

Mr. KNOWLAND. Mr. President, will the Senator from Minnesota yield for a question?

The PRESIDING OFFICER (Mr. SALTONSTALL in the chair). Does the Senator from Minnesota yield to the Senator from California?

Mr. HUMPHREY. I am delighted to yield; I had hoped to get a response soon.

Mr. KNOWLAND. Does not the distinguished Senator from Minnesota know that several days ago the majority leader announced a whole series of bills that will follow the taking of final action by the Senate on the pending measure? Does not the Senator from Minnesota also know that included in that list of bills was the school-construction bill, the farm-program bill, the foreign-aid-authorization bill, and the bill for extension of social security coverage? Let me say that when the filibuster is ended—the filibuster in which the liberal wing of the Democratic Party in Senate is engaging—we shall reach all those important measures.

Mr. HUMPHREY. I am very grateful for the Senator's informative comments.

Let me say to him that the best way for us to reach such very vital proposed legislation will be to have the pending measure placed where it properly belongs, namely, at the tail end of the docket. Where is the great hue and cry for this bill? One thing we can say about the farm bill is that plenty of people are for it and plenty against it. There is no doubt about it being a matter of public interest. We can rest assured that the social-security bill is a matter of public interest. There is not a Senator who has not received plenty of mail on that subject. We are interested in the mutual security bill and the other measures to which the Senator has referred.

The interesting thing is that this measure was brought up in such a hurried manner. The hearings were published on the 9th day of July. The report was available on the 13th of July. I am not quite sure, but it seems to me that within the next day we were debating the bill. This was represented as a bill that we just had to do something about. Why? We do not even have a report from the Atomic Energy Commission to justify the bill. No evidence has been officially presented by the Atomic Energy Commission, as required by law, to justify the measure.

I say further to the majority leader that while this legislation may represent a beginning, it is not the first chapter in the scripture in this field. Moreover, I am quite sure that deep down in their hearts the majority leader and other Senators realize that this bill does reverse public policy, insofar as regulation of a great natural resource is concerned.

The trouble is that some Members of Congress and of the public have come to believe that the atomic energy program is a private resource, or in the domain of private interests. Large companies have been doing research work in this field. They have been paid well, and they have done outstanding work. We honor them for the work they have done. But when we write a public law as important as this without proper guidance from the Atomic Energy Commission, because the Atomic Energy Commission did not make a report, as it was supposed to do, when we write legislation as important as this without a full-scale message from the President, and without the kind of public interest which ought to be involved in such a legislative proposal, we must be very, very careful.

Finally, I should like to say to my friend, the majority leader, that I commend him for his hard work and industriousness, and for his ability to get this program underway. I have not taken very much time in this debate. I started

speaking this evening at 4:10. I conclude my remarks at 22 minutes after 6. I have engaged in some colloquy, but not a great deal. If the Senator is of the opinion that there is a filibuster in progress, I remind him that a reading of the RECORD of last night will show that there was a pledge that we were to vote today. If there is a filibuster in progress, I assure the Senator that there is a great deal to talk about. We could talk about every one of the bills on the calendar. There is no filibuster, but there is a determined effort by some of our distinguished colleagues who led off in this debate to alert the public as to what is involved in this 104-page document known as Senate bill 3690. Senate bill 3690 was just another number until the Senator from New Mexico [Mr. ANDERSON], the junior Senator from Tennessee [Mr. GORE], the senior Senator from Tennessee [Mr. KEFAUVER], the senior Senator from Alabama [Mr. HILL], the junior Senator from Alabama [Mr. SPARKMAN], the Senator from New York [Mr. LEHMAN], and other Senators took this issue to the people. The bill could have been marked "secret and confidential" and no fewer people would have known about it from the mere fact of its printing.

This is one of the "must" measures. On whose list? "Must" for whom? It is a "must," just as the Dixon-Yates contract was a "must." For whom? I wish to know where the great outcry for this measure came from. There is no "must" list at all.

I conclude my remarks by paying tribute to those Senators who have again been the political Paul Reveres. This time it was not the British who were coming. This time it was a few more of the special interests who were waiting around to see what was going to happen. They have been coming, coming, and coming, running off with the oil, running off with some of the public lands, running off with accelerated depreciation allowances, and running off with depletion allowances. Now they would like to run off with the atomic energy resources.

Paul Revere had his hands full when he rode up and down the streets announcing to the people that the British were coming, but he knew from what direction they were coming, and he had the signals ready—"one if by land and two if by sea."

We find ourselves in a situation in which we do not quite know from what direction the enemy is coming. Those who would raid the public resources come from so many different directions and so many different sources that it is rather difficult to get the signal out.

I commend Senators who have joined in this debate thus far in order to give the signal to the American people.

Mr. HILL. Mr. President, will the Senator from Minnesota yield to me to make an insertion in the RECORD?

Mr. HUMPHREY. I was about to yield the floor. I yield to the Senator from Alabama.

Mr. HILL. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point as a part of my remarks a letter addressed to me by Dr. Harry A. Curtis, vice chairman of the Board of Directors of the Tennessee Valley Authority, together with a memorandum which Dr. Curtis enclosed with his letter.

There being no objection, the letter and memorandum were ordered to be printed in the RECORD, as follows:

TENNESSEE VALLEY AUTHORITY,
Knoxville, Tenn., July 19, 1954.

Hon. LISTER HILL,
United States Senate,
Washington, D. C.

DEAR SENATOR HILL: In response to your request for a statement from TVA regarding recent allegations that TVA has been overcharging the Atomic Energy Commission for power at its Paducah plant, the TVA Board has requested Mr. G. O. Wessenauer, our manager of power, to prepare a memorandum summarizing the history of TVA-AEC negotiations for power at Paducah.

We believe that Mr. Wessenauer's memorandum and its attachments show clearly that comparisons made in support of these allegations are misleading. The power which is currently being delivered to AEC is of two categories: (1) The basic power supply produced from modern and efficient plants constructed for the purpose, and (2) supplies of interim power from other sources which are required to supplement the basic power supply while the new generating units are being completed. AEC is receiving its basic power supply from TVA at very low cost, far lower than the costs of any other power which it purchases for its gaseous diffusion plants, and while new generating units are being completed has been receiving supplementary supplies of interim power at costs as low as are consistent with the costs to TVA of purchasing such power from neighboring utilities or of generating it at the high-cost plants on its system.

Much of the time of the TVA staff over a period of months was devoted to assembling the large blocks of interim power which the crash program of AEC demanded.

Very truly yours,

HARRY A. CURTIS,
Vice Chairman, Board of Directors.

JULY 19, 1954.

To John Oliver, General Manager.
From G. O. Wessenauer, Manager of Power.
Subject: Summary of power supply relationships with AEC for the Paducah project.

This is in response to your request for a summary of the development of power supply arrangements to AEC at Paducah, in view of the recent allegation that the rates contained in these arrangements are not as low as they should be.

INITIAL POWER SUPPLY ARRANGEMENTS FOR PADUCAH

At AEC's request a proposal under which TVA would supply one million kilowatts of power to the Paducah project was presented to AEC in November 1950. AEC indicated that the proposal was generally acceptable, and requests were made for appropriations for TVA to build the necessary power supply facilities. AEC then solicited and received a proposal from a group of privately owned utilities. As a result, the request for TVA power was cut in half and a block of 500,000 kilowatts was purchased from Electric Energy, Inc., a company created by the utilities. At the time, it was estimated that the price from Electric Energy, Inc. would be the same or a little lower than the price of power from TVA.

The AEC contract with Electric Energy, Inc. was on a cost-plus basis. The TVA contract was essentially a firm contract with all adjustments and escalations, except the cost of fuel, tied to national averages, not TVA's performance. We preferred such an arrangement because it provides an incentive for TVA's forces—both construction and operating—to do the best and most economical job possible. We made our best estimates of costs, and then the entire organization set out to try to beat the estimates. We suggested that the escalation for changing cost levels during the construction period should be tied to a national index instead of TVA's particular construction costs. Similarly, we suggested that the escalation for the labor costs involved in operation and maintenance should be tied to a national wage index instead of to our actual expenditures for labor. AEC willingly adopted our suggestions.

LEVEL OF TVA RATES IN THE PADUCAH CONTRACT

It was recognized at the outset, and made as clear as possible to AEC, that the urgency and special characteristics of their load made it necessary for TVA to quote a somewhat higher price for its share of the permanent power supply at Paducah than might otherwise be the case. We expected to spend and, in fact, have spent a considerably larger amount per kilowatt for the construction of the Shawnee plant to serve AEC, than we have spent in building other plants. The principal factor was the highly accelerated schedule, involving millions of dollars of overtime labor costs and premium prices paid to suppliers of some of the building materials.

TVA not only experienced extra costs, but it was necessary to amortize them during the contract period of about 15 years, thereby further increasing the annual cost of power under the contract. As AEC was advised at the time, the accelerated amortization of special costs would have the effect of providing for amortization of the total investment over an equivalent of about a 28-year period instead of the period of 35 to 40 years that would be normal in connection with service to our other loads.

It was also made clear that TVA's price was computed to provide, if our estimates were correct, an average annual return of 4 percent on the investment over the contract period. AEC felt that a figure of about 2½ percent would be more appropriate since it would amply cover the Government's cost of money. We explained that for a number of years we had been earning an average return of about 4 percent on our power operations and that Congress, which had established a schedule for the repayment of power investment, had not given any indication that it considered this return excessive and our rates too high. While AEC would naturally have preferred a rate based on a lower return on the investment, they accepted our position. A not insignificant consideration in this connection was that, under the contract we proposed, the expected return was an estimate on which TVA took the risks. If TVA costs overran our estimates, the return would be lower. The estimated 4-percent return to the Government would be realized only if TVA kept costs within estimates. It would be improved only if we built and operated below estimates. TVA took the risk; AEC was protected. As it developed, TVA built and is operating the Shawnee plant for somewhat less than the estimated costs; therefore it can expect to earn a little better return than estimated, with the result that the money invested will be repaid to the Treasury a little faster.

EXPANSION OF THE PADUCAH PROJECT

The foregoing comments relate to the term contract for TVA's share of the initial million-kilowatt load at Paducah. When an additional 940,000 kilowatts was required, TVA offered to expand its contract with only minor modifications. Electric Energy,

Inc. offered AEC power at a higher price than its first block, which it was clear by then would itself cost more than was first estimated. AEC chose to obtain one-fourth of its additional requirements from Electric Energy, Inc. and three-fourths from TVA. The assignment of part to each reflected AEC's continued desire for diversity in supply, but the assignment of the much larger share of the block to TVA reflected the fact that AEC would obtain more for its money from TVA.

INTERIM SUPPLY OF ADDITIONAL POWER

Large blocks of interim and supplemental power have also been supplied to AEC at Paducah, and are now being supplied. These are in a different category from the power covered by the long-term contract and require some separate explanation. AEC wanted power more quickly than it could be provided from the Shawnee plant even on an emergency construction schedule. To help provide this power, TVA built transmission lines that would not otherwise have been required from various points on its system into Paducah, accelerated the construction of other lines that were under construction, and took all possible steps to maximize the availability of power from its standby plants and over its interconnections with other systems. The price of power delivered to AEC for the interim period was based on estimates of the probable out-of-pocket costs of generating or buying the power, the costs of transmission, including the costs of the accelerated construction of some lines, and estimates of the transmission losses and the handling costs. The price recognized the provision of reserve capacity and the assumption of risks by TVA where firm commitments of availability were made.

Two factors have had an adverse effect on the cost of interim power. One has been the weather. The last 2 years have both been years of extreme drought which has severely limited the output of the system. The second is the fact that the TVA system in recent years has not had a normal margin of capacity over anticipated loads.

ATTACHED STATEMENTS

In the effort to support the accusation of overcharge to AEC, various misleading comparisons have been made of—

1. TVA's price for Shawnee power at Paducah and the cost to the Government of producing power at the Fulton site;

2. TVA rates to Memphis and the price in the Paducah contract;

3. TVA and EEInc prices for interim power at Paducah, and

4. TVA prices for interim power at Paducah and the average cost to TVA of power obtained from other systems.

We are attaching separate statements listing some of the points that ought to be considered when each of these comparisons is made.

ATTACHMENT 1

DIFFERENCES BETWEEN PRICE OF TVA POWER SUPPLIED TO AEC AT PADUCAH AND ESTIMATED COST TO GOVERNMENT OF PRODUCING POWER AT FULTON

Two basic tables were prepared jointly by the Bureau of the Budget, AEC, and TVA to help evaluate the Dixon-Yates proposal. These two tables, dated April 21, 1954, are attached.

Table 1 compared the price of power to AEC under the Dixon-Yates proposal with the price AEC pays TVA for power at Paducah. (For the sake of comparison it was arbitrarily assumed that delivery of the Dixon-Yates power onto the TVA system near Memphis would be equivalent to delivering it to Paducah.) This comparison showed extra costs to AEC for the Dixon-Yates power of $2,923,000 a year as estimated by the Budget Bureau and AEC, or $4,025,000 a year as estimated by TVA.

Table 2 compared the cost to the Government of obtaining power on the TVA system near Memphis in two ways: Buying the Dixon-Yates power or producing it from TVA generating units at Fulton and Johnsonville. This comparison showed extra costs to the Government for the Dixon-Yates power of $3,685,000 a year as estimated by the Budget Bureau and AEC, or $5,567,000 a year as estimated by TVA.

Efforts to use these tables as a device to appraise the fairness of TVA rates to AEC at Paducah have created a confusing picture. The implication is that the price for power delivered from the TVA system at Paducah, set forth in Table 1, must be too high because it is higher than the cost to the Government, set out in Table 2, of power delivered to the TVA system from the proposed Fulton plant. Aside from the fact that power from Fulton would not be and has never been proposed as a source of power supply for AEC at Paducah, there are a number of other factors which make any such comparison without value. Some of the more important of these factors are listed below.

1. The Paducah contract was designed to provide a return of 4 percent on the related TVA investment, and this is reflected in Table 1. Power from Fulton would also be expected to earn a 4 percent return, but Table 2, which compares the cost to the Government of Dixon-Yates power with power from Fulton, is not concerned with the rates at which TVA would sell the power. It was intended to show a comparison of the costs to the Government of obtaining the same amount of power in two different ways. To show the net cost to the Government, the Government's cost of money was assumed to be 2½ percent.

2. In serving AEC at Paducah, because of the desirability of providing ample system standby over the life of the contract and considerable interim transmission capacity before the Shawnee plant could be completed, TVA has a heavy investment in transmission lines into Paducah from Kentucky Dam and Johnsonville and via Kentucky Dam from other parts of the TVA system. The transmission facilities required in connection with the Fulton plant are less extensive.

3. Because of the rush schedule on which power had to be provided at Paducah, TVA had construction costs that are not normally experienced in connection with other additions to its system such as the contemplated additions at Fulton and Johnsonville which are the subject of table 2. Heavy expenditures were made for overtime labor costs and for premium payments for construction materials.

4. The abnormal capital costs referred to in the preceding paragraph not only added directly to the total of fixed charges included in rates for Shawnee power, but because prudence required that TVA amortize these abnormal portions of the investment during the period of the contract rather than over the entire life of the facilities, the annual charges are larger in the first years covered by the contract. The initial period of the Paducah contract will end about 8½ years after the beginning of the period used in the comparisons with Fulton, and TVA estimates that at the end of that 8½ years the bill to AEC at Paducah can be reduced by about $1,500,000 a year. The proportionate reduction assignable to 600,000 kilowatts would be about $720,000 a year. An adjustment in table 1 to reflect this situation was suggested by TVA but rejected by AEC and the budget. Had it been accepted, their estimate of the excess costs of Dixon-Yates power would have been nearly the same in both tables.

5. There have now been 4 years of further technological development since the Shawnee project was planned. As a result, it is possible to build generating equipment of greater efficiency and to design a plant with somewhat lower operating and maintenance costs. These factors can be reflected in an estimate made today for the Fulton addition. They were not present when the Shawnee plant was planned.

6. As the system grows, TVA is installing larger generating units. At the time the Paducah atomic energy plant was projected the TVA system was smaller. For that reason and also because of the need for proceeding rapidly, calling for the use of equipment already developed, 135,000-kilowatt units were selected for the Shawnee plant.

The Fulton units, on the other hand, are planned to be of 225,000-kilowatt rated capacity. Many elements of operating costs are very little larger for a 225,000-kilowatt unit than for a 135,000-kilowatt unit. This means that the operating costs per kilowatt-hour will be smaller at Fulton than at Shawnee.

7. Another factor that changes as the system grows is the proportion of reserve capacity that is necessary to insure continuity of supply. Even in the Paducah case TVA guaranteed a firm supply without including in its estimated costs nearly as large an allowance for necessary reserve capacity as had been included in the cost-plus arrangements for AEC power at Paducah from Electric Energy, Inc., and at Portsmouth, Ohio, from OVEC. In the case of Fulton, however, the further growth of the system now permits TVA to reduce further the proportionate reserve capacity required. This means that in this respect, also, TVA can serve additional load more economically by adding the Fulton plant to the system capacity than it was able to do at Paducah. (It is of interest in this connection that the Dixon-Yates proposal is based on the same assumption of reduced reserve capacity, but with the difference that the power supply is not guaranteed to be firm if more than one unit in the Dixon-Yates plant is out of service. In this respect the power offered by Dixon-Yates is less dependable that AEC's supply under any of its major power purchase arrangements. AEC recognizes this in referring to its need for continuity of service as one of the reasons it does not wish to reduce its contract with TVA to substitute Dixon-Yates power.)

8. There are certain costs which TVA has as a power supplier which are more or less independent of the source of the power. To simplify comparisons such items of cost were omitted, at the request of the Bureau of the Budget, from the comparisons between Dixon-Yates power and Fulton in table 2, although they are, of course, included in the actual rates charged for Shawnee power, shown in table 1. The type of costs referred to here are those distinguished from the costs incurred at the generating plant or in the receipt of purchased power. They include all such costs as those incurred by the central staff of the power system—the costs of load dispatching, and communication, as well as costs of service from other divisions in the TVA organization, such as personnel, law, and accounting, and other applicable items of overhead and general expense.

Table 2 was not intended to represent the price at which power from Fulton or Johnsonville would be sold, but rather the cost to the Government of providing capacity there in comparison with the cost to the Government of purchasing power from Dixon-Yates; therefore, marketing costs, overheads, etc., were not included.

TABLE 1.—*Comparison of annual cost of power supply for the AEC Paducah project (for 600,000 kilowatts of capacity and 5.2 billion kilowatt-hours per year)*

TVA-PADUCAH CONTRACT		REVISED DIXON-YATES PROPOSAL	
Demand charges	$8,208,000	Demand charges	$8,775,000
Energy charges (fuel cost 15½ cents per million B. t. u.)	[1] 9,828,000	Energy charges (fuel cost 19 cents per million B. t. u.)	[1] 9,688,000
		Additional TVA transmission costs	[2] 177,000
Total charges:		Total charges:	
Per year	18,036,000	Per year (excluding taxes)	18,640,000
Per kilowatt-hour (mills)	3.47	Per kilowatt-hour (mills)	3.58
		Taxes:	
		Arkansas—State and local	$1,499,000
		Federal income	820,000
		Subtotal	2,319,000
		Total charges:	
		Per year (including taxes)	20,959,000
		Per kilowatt-hour (mills)	4.03
		Additional charges per year	$2,923,000
Adjustments TVA would make:		Adjustments TVA would make:	
The initial term of the Paducah contract would end after 8½ years from July 1, 1957. With certain special costs at Shawnee amortized then, it is estimated that thereafter the monthly demand charge would be 10 cents per kilowatt lower. The resulting change in average annual cost for the 30-year period considered here would be.	−$51,000	Standby power, 2 units out	+200,000
		Increased off-peak transmission losses	+186,000
		Amortization of special costs at Shawnee	+200,000
		Total adjustments	+586,000
Adjusted total charges:		Adjusted total charges:	
Per year	17,520,000	Per year	21,545,000
Per kilowatt-hour (mil.s)	3.37	Per kilowatt-hour (mills)	4.14
		Adjusted additional cost, per year	4,025,000
		Total for 30 years	120,750,000

[1] Presently available coal prices were used, with an assumed transportation cost differential of 80 cents a ton (equivalent to 3.5 cents per million B. t. u.) between the Shawnee plant and the Dixon-Yates site.

[2] Represents the difference in TVA's annual transmission costs to deliver power from the Fulton and Johnsonville plants ($430,000) and their corresponding costs from the receiving point for Dixon-Yates power ($607,000).

TABLE 2.—*Comparison of annual cost to Federal Government for power supply delivered to TVA system in Memphis area (for 600,000 kilowatts of capacity and 5.2 billion kilowatt-hours a year)*

INCREASING TVA CAPACITY 650,000 KILOWATTS (AT FULTON OR AT FULTON AND JOHNSONVILLE)		ACCEPTING NEW DIXON-YATES OFFER (NEW PLANT AT WEST MEMPHIS, ARK.)	
Fixed charges, plant and stepup substation (interest, 30-year amortization, replacements insurance)	$5,077,000	Demand charges	$8,775,000
Production cost:			
Operation and maintenance	1,780,000	Energy charges (fuel cost 19 cents per million B. t. u.)	[1] 9,688,000
Fuel (a) 9,917 B. t. u. heat rate (fuel cost 18.4 cents per million B. t. u.)	9,537,000	TVA transmission costs	607,000
TVA transmission costs	490,000	Subtotal (excluding taxes)	19,070,000
		Per kilowatt-hour (mills)	3.67
		Taxes:	
		Arkansas (State and local)	$1,499,000
		Federal income	820,000
		Subtotal	2,319,000
		Total cost	21,389,000
Cost to Government	16,884,000	Less: Federal income tax	820,000
		Cost to Government	20,569,000
Per kilowatt-hours (mills)	3.25	Per kilowatt-hour (mills)	3.95
		Additional cost to Government per year	$3,685,000
		Total, 25 years	92,125,000

Adjustments TVA would make

Amortization 35 instead of 30 years:		Standby power, 2 units out	+$200,000
(1) Plant and step up substation	−$496,000	Increase offpeak transmission loss	+186,000
(2) Transmission	−35,000	Amortization specification costs at Shawnee	+200,000
Plant heat rate 9,350 instead of 9,917 B. t. u.	−548,000	Income tax from bondholders	−174,000
Income tax from bondholders	−391,000		
Total adjustment	−1,470,000	Total	+412,000
Adjusted cost to Government	15,414,000	Adjusted cost to Government	20,981,000
		Adjusted additional cost, per year	5,567,000
		Total for 25 years	139,175,000
		Total for 30 years	167,010,000

[1] If coal can be barged to Memphis site of Dixon-Yates (55 miles further from Fulton) at same cost as at Fulton as assumed by D-Y, then this cost would be reduced by $309,000.

ATTACHMENT 2

DIFFERENCES BETWEEN THE TVA PRICE TO AEC UNDER THE PADUCAH CONTRACT AND TVA'S RATES TO MEMPHIS

It has been said that if TVA billed the city of Memphis for power under the rate schedule in the TVA-AEC Paducah contract, the resulting rate per kilowatt-hour would be higher than TVA charges Memphis. This is interpreted as indicating that the rate in the Paducah contract is too high. There are several reasons why this is an unwarranted conclusion. Some of the more important of these reasons are noted briefly below.

1. TVA's commitments to Memphis and the other municipal and cooperative distributors were made a number of years ago. They were based on the operation of a generating system comprised largely of some very economical hydro projects which were designed and built to supply that type of load, that is, a load which varies from hour to hour and season to season. Those plants were built largely during a period of low construction cost levels. In contrast, the Shawnee plant, built to supply AEC at Paducah, was built during a period of much higher cost levels, and, in addition, as noted in attachment 1, the cost was increased by use of overtime labor, etc., to meet an urgent construction schedule.

2. While the cost of much of the power for Memphis and other distributors is related to hydro plants built in a period of low

prices, steam power from more costly new plants is also required for increments of around-the-clock industrial load served through the distributors' systems. The power so supplied is priced accordingly. Memphis, for instance, pays an additional half mill per kilowatt-hour for power resold to industrial customers.

3. Some of the points noted in attachment 1 apply in this case also. The limited term of the arrangements and uncertainty of continuation of AEC's use of power make it necessary to write off certain parts of TVA's costs over a limited contract period rather than over the useful life that the facilities would have if power deliveries could be expected to continue indefinitely and without diminution.

4. The rate to Memphis does not include consideration for major risks involved in guaranteeing a fixed rate over a long term. The power contract with Memphis, as well as those with the other distributors of TVA power, permits the rate to be changed from time to time to reflect changes in TVA's costs. This contract provision was used, for example, as a basis for negotiating an increase in the rates to the distributors effective a little more than 2 years ago. The rate in the Paducah arrangement is fixed for the term of the contract except for changes in the cost of fuel or those resulting from changes in a national wage index.

5. The wholesale rate schedule applicable to Memphis and the other distributors takes into account the hourly, daily, and seasonal diversity among the loads of all TVA power distributors. Because of such diversity the total peak load imposed on the TVA system by these loads is less than the sum of the billing demands. Large, high load factor loads such as AEC practically exclude all opportunity for diversity.

ATTACHMENT 3

PRICE DIFFERENCES BETWEEN TVA AND ELECTRIC ENERGY, INC., FOR INTERIM POWER DELIVERED TO PADUCAH

Until quite recently much of the power supplied to AEC at Paducah has been supplied on an interim basis. AEC needed large blocks of power before TVA and Electric Energy, Inc., could build their steam plants nearby. In addition, AEC has found that it could use advantageously more power than it had contracted for. As a result of these circumstances, interim arrangements were made for power supply from both TVA and Electric Energy, Inc. The arrangements with both suppliers were similar in many ways, but were and have become enough different and have involved such a variety of sources of power that comparisons are difficult and complicated.

During the entire period from the beginning of power use at Paducah through March 31, 1954, Electric Energy, Inc. delivered just under 4 billion kilowatt-hours and TVA 4.5 billion kilowatt-hours. The average price paid for the Electric Energy, Inc. energy was 5.53 mills per kilowatt-hour while the average price paid to TVA was 6.16 mills per kilowatt-hour. These figures (and corresponding figures for fragmentary parts of the period) have been referred to as suggesting that TVA has been charging too much for power supplied on an interim basis.

Some of the factors that ought to be considered in appraising whether TVA's prices were fairly related to costs are referred to below.

1. Initially both Electric Energy, Inc. and TVA committed themselves to supply equal parts of the interim power needed. Subsequently the amounts committed were renegotiated by AEC because for a time it was falling behind schedule and wanted to reduce its commitment accordingly. The reduction by AEC of the amounts of power it wanted to commit itself to take from TVA during the early months reduced the amount of its overall dollar obligations to TVA, but resulted in some increase in cost per kilowatt-hour, because certain TVA expenditures had already been made in anticipation of the earlier schedule.

2. Later AEC needed supplemental power over and above the advance commitments. TVA had to supply a greater portion of this power than Electric Energy, Inc., because Electric Energy, Inc. did not have as much transmission capacity to bring power into Paducah over and above the amounts under contract. Periods when large additional amounts of supplemental power were needed by AEC unfortunately included some periods when TVA, because of drought, was using most of the economical and moderately costly sources of steam and purchased power to firm up the supply under its previous commitments to others (as well as AEC), making it necessary for TVA to call on the more expensive sources of power, including TVA's own standby steam plants as well as purchases from other systems.

3. TVA's charges during the interim period included about half a million dollars for the cost of accelerating construction of certain transmission lines needed to maximize the supply of interim power to AEC. This added, of course, to the average overall payment per kilowatt-hour to TVA as compared with Electric Energy, Inc.

4. As soon as any unit in the Shawnee plant began operating, TVA began amortizing the corresponding investment. As a result, the charges collected from AEC by TVA during the interim period have already provided for the amortization of some of the investment in the Shawnee plant and related transmission facilities. On the other hand, Electric Energy, Inc.'s arrangements with its bankers and with AEC were such that it postponed any amortization of the investment in its Joppa plant until after four units were completed. That point had not been reached by the end of the period under study, that is, through March 31, 1954. Therefore, AEC still faces the necessity for reimbursing Electric Energy, Inc. for the entire cost of the Joppa plant, while it has already paid for part of the Shawnee plant. For this reason, also, the 5.53-mill average paid Electric Energy, Inc. therefore is not comparable to the 6.16-mill average paid to TVA. It did not represent the entire cost to AEC of power received during the period, for AEC has yet to pay that part of the capital cost of Joppa that is represented by the portion of the useful life of the first three units that has already been expended.

5. During much of the period in question, TVA provided standby or reserve generating and transmission capacity for both its supply and Electric Energy, Inc.'s supply to AEC. It did so because Electric Energy, Inc.'s capacity was sharply limited, and the total supply to AEC would have had to be reduced if Electric Energy, Inc. had been obliged to provide its own reserves. The result, of course, was that the costs and risks associated with the provision of such reserves were borne largely by TVA rather than by Electric Energy, Inc.

ATTACHMENT 4

DIFFERENCES BETWEEN TVA'S PRICE FOR INTERIM POWER AT PADUCAH AND TVA'S AVERAGE COST OF ENERGY OBTAINED FROM OTHER SYSTEMS

During the fiscal year 1953, TVA delivered to AEC at Paducah a total of 976,956,000 kilowatt-hours at an average price of 8.59 mills. It has been stated that the price was too high—that during the same year TVA purchased and received by net interchange from private power companies 2,696,749,000 kilowatt-hours at an average cost to TVA of 5.07 mills, to which TVA must have added a 70-percent profit margin. This is an effort to compare figures that are not at all directly comparable. Some of the more important factors that need to be taken into account in understanding the figures are listed below.

1. It is incorrect to assume that all the power that was delivered to Paducah during the fiscal year was obtained from private companies, or that the energy so obtained was typical, costwise, of the large total amounts of such energy. The intent of the arrangements agreed upon with AEC was to keep TVA whole as far as the impact of the interim AEC requirements on TVA's existing operations and customers was concerned. It was not intended to take away from TVA or its customers energy which it would have been obtaining without the existence of the AEC load. The basic question, then, is: What were the incremental additions to TVA's energy supply, by purchase and by TVA's own generation, by means of which the AEC interim requirements were met?

2. The number of kilowatt-hours stated to have been received by purchase and net interchange from private companies was wrong. Reference to the TVA annual report for 1953 will show (in schedule G of the financial statements) that the purchase and net interchange accounts reported 2,948,290,000 net kilowatt-hours received for the year. However, this total included 411,469,000 kilowatt-hours purchased not from private companies but from AEC itself at Oak Ridge and largely redelivered to AEC at Oak Ridge and, therefore, not available for use at Paducah. This reduces the net quantity received from private companies to 2,536,821,000 kilowatt-hours.

3. The net interchange received, as distinguished from the purchases, was 2,059,749,000 kilowatt-hours at a little less than 4 mills. The great bulk of this energy was energy which TVA would have received anyway irrespective of the AEC Paducah load. Furthermore, most of it was obtainable only at night and over weekends, whereas the AEC plant operates around the clock.

4. The purchases from private companies, as distinguished from the net interchange and as distinguished from the energy obtained from and returned to AEC at Oak Ridge, totalled 477,072,000 kilowatt-hours, and was received by TVA at an average cost of 9.72 mills. The range in cost of this energy was rather wide, some costing much more and other parts, much less than the average of 9.72 mills.

5. TVA also used during this fiscal year, as a result of the abnormally high load in relation to supply, power produced at old standby steam plants. Without the AEC load the use of such steam plants would have been eliminated or greatly reduced. Included among such generation, as shown also in schedule G of the 1953 financial statements, were 224,914,000 kilowatt-hours generated at the Wilson steam plant at a cost of 8.111 mills per kilowatt-hour, 91,384,000 kilowatt-hours generated at the Nashville steam plant at an average of 10.728 mills per kilowatt-hour, and 171,984,000 kilowatt-hours at the Hales Bar plant at an average cost of 7.719 mills per kilowatt-hour.

6. Not only did the availability of power from other systems vary widely between daytime and night hours as compared with the uniformity of the AEC load around the clock, but also the seasonal pattern of availability of energy from other systems was different than the pattern of the buildup of the AEC load during the year. Some of the sources that were available to TVA and used by TVA for other purposes in months when AEC's load was relatively small were not available in other months when AEC's load had grown.

7. The reported cost to TVA for power obtained from other systems is the cost delivered at the point of interconnection between the other system and TVA. During the fiscal year 1953 the largest amounts obtained from other systems were received at 2 points, 1 about 100 miles northeast of Nash-

ville, Tenn., and another about 50 miles north of Knoxville, Tenn. Other points at which energy was received ranged from Bristol, Va., to locations in Mississippi. Such parts of this power as were delivered to Paducah, along with the power delivered to Paducah from such TVA steam plants as those at Nashville, Wilson, and Hales Bar, had to be carried over scores or hundreds of miles of transmission lines. Because of the loss of energy in transmission, more kilowatt-hours had to be received than could be delivered, adding to the cost per kilowatt-hour delivered.

8. Most of the energy received from other systems was obtained on an "if, as, and when available" basis. TVA, rather than the supplying system, provided the operating reserves, and bore the associated costs and risks of making the supply dependable. These factors, of course, are over and above the price per kilowatt-hour paid by TVA to the other systems. In the case of the great bulk of the energy delivered to AEC at Paducah during fiscal year 1953, TVA guaranteed months in advance that the power would be delivered. In contrast, most of the energy received from other systems was obtained without any assurances of availability, and in most cases for intermittent intervals.

Mr. HILL. Mr. President, I also ask to have printed in the body of the RECORD at this point as a part of my remarks a brief telegram sent to the President of the United States as of this day by the Tennessee Valley Public Power Association and signed by Raleigh V. Taylor, president.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

The 148 municipal and cooperative distributors of power in the Tennessee Valley Area are disappointed that our letter to you of July 9 is unanswered. We hope your silence does not represent a lack of interest in the economic welfare of the Tennessee Valley. However, the vigorous attacks made on us by your friends in the Senate are causing people in the Tennessee Valley to ask whether these Senators are asserting your position? We are the minority partner with TVA but feel entitled to an answer to our July 9 letter before, not after, the Congress has acted.

TENNESSEE VALLEY PUBLIC POWER ASSOCIATION,
RALEIGH V. TAYLOR, *President*.

Mr. HUMPHREY. I yield the floor.

Mr. KEFAUVER. Mr. President, my remarks will be comparatively brief.

During the early part of this session, this body spent weeks on end discussing the danger of one branch of the Government encroaching upon the perogatives of another.

A stack of CONGRESSIONAL RECORDS 3 feet thick literally bulges with argument and complaint that the Congress has been forced to swallow, against its will, policies which were forced upon it by the Executive.

I am somewhat disturbed to note that individuals and organizations who were so sensitive to the danger in January and February, when it was nebulous and indistinct, are reluctant to see it today when its outlines are sharp and clear.

For, Mr. President, if there ever was a clear-cut case of the Executive usurping a congressional right, or a case in which the Executive unilaterally changes policies already set by the Congress, it is exemplified by the Dixon-Yates contract.

As has been pointed out on this floor so often and so well by so many distinguished Members, the Congress of the United States established the Tennessee Valley in 1933, and the Atomic Energy Commission in 1946. One of these executive agencies, such as the Interstate Commerce Commisison or the Federal Trade Commission, is as important in the place it holds as any of the others. The Congress gave those agencies certain areas of authority in which to operate. Originally, and from time to time subsequently, the Congress has prohibited those agencies from entering certain other areas. But clearly, the TVA and the AEC were intended to be independent agencies, carrying out basic policies determined by Congress itself.

Let us look for a moment at how the AEC's purpose is defined in the United States Government Organization Manual, produced by the National Archives and Records Service of the General Services Administration:

It is the purpose of the Atomic Energy Act to effectuate the declared policy of the people of the United States that, subject at all times to the paramount objective of assuring the common defense and security, the development and utilization of atomic energy shall, so far as practicable, be directed toward improving the public welfare, increasing the standard of living, strengthening free competition in private enterprise, and promoting world peace.

Now let us see how the same manual defines the authority of the TVA:

The Tennessee Valley Authority is a corporation created by act of Congress May 18, 1933 (48 Stat. 38; 16 U. S. C. 831–831dd). The statute directs the corporation to take custody of the Wilson Dam and appurtenant plants at Muscle Shoals, Ala., and to operate them in the interest of national defense for the development of new types of fertilizers for use in agricultural progress. These purposes governed the original construction of the Muscle Shoals properties pursuant to section 124 of the National Defense Act of 1916 (39 Stat. 166, 215; 50 U. S. C. 79). The statute further provides for the development of the Tennessee River and its tributaries in the interest of navigation, the control of floods, and the generation and disposition of hydroelectric power. Executive Order 6161 of June 8, 1933, which implements sections 22 and 23 of the Tennessee Valley Authority Act, confers upon the corporation the authority to conduct investigations upon which additional legislation may be predicated in order to aid further the proper conservation, redevelopment, and use of the resources of the region. In the conduct of its operations and investigations, the corporation is authorized to cooperate with other National, State, and local agencies and institutions so that the fullest measure of effectiveness can be achieved.

Those quotations simply point up the fact that the two agencies are operated on the basis of long-range policy determined by the Congress and spelled out in public law.

We are today confronted with the spectacle of the executive branch of the Government losing its sense of perspective. Probably acting under the influence of the private-utility lobby's insidious propaganda, the Executive Office of the President has nudged, prodded, and finally commanded the Atomic Energy Commission to enter into a contract for which the AEC has no legal authority under its organic act.

And, Mr. President, the American people do not have to be hit over the head with a cyclotron to realize that this same contract is tailormade to wreck TVA.

The backstage maneuvering and negotiation leading to the Dixon-Yates contract just cannot be gilded into respectability. Here is a flagrant attempt to do, by administrative action, something that AEC has no legal right to do, and something Congress has no right to sanction by the surrender of constitutional powers.

If it wants to, Congress can change the organic structure of the TVA and the AEC, and can change the direction in which we want them to go. But if that is what Congress wants done, Congress ought to do it itself.

It would be downright cowardly and immoral for us to wink slyly and look the other way while the administration does Congress' dirty work.

We all appreciate that the present administration has a rather different outlook from the previous ones. Despite disclaimers to the contrary, certain forces in the administration do not look with sympathy or favor upon the objectives of the Tennessee Valley Authority. Whether it realizes it or not, the administration is bent on striking down the TVA and the philosophy that brought it into being 21 years ago.

Mr. President, I hope both branches of the Government—both the Legislative and Executive—realize that the present administration will not be with us from here to eternity. It will surely pass away and be followed by others—Republican as well as Democratic. Under the laws of change and nature, those administrations yet unspawned will have viewpoints as different from the present one as it has from the last. It has always been so.

I would suggest to my colleagues the possibility that some future administration might be just as unsympathetic toward the AEC as the current one is to TVA—and that if this Congress allows the present administration to use one independent agency as a tool to fight another, it is setting the stage for similar action in the future.

Who knows but that the Federal Power Commission might not one day be used as a means of attacking AEC, or the TVA against the AEC, or the Federal Communications Commission against some other independent agency, or the CIA against them all.

The Dixon-Yates contract is bad in itself—malum in se—for reasons that have been copiously examined on this floor. But it is doubly evil in that it is a front runner for chaos. This Congress must strike it down in its tracks, if we are not to be a party to the disintegration of government in the future.

It is nothing short of amazing to me that certain persons, in and out of Congress, are willing for the Congress to assume this role.

I would have Senators read how casually the whole matter is treated by

the chairman of the House Appropriations Subcommittee, who handles both the AEC and TVA appropriations. In a congressional newsletter published in the July 15 edition of the Riverside (Calif.) Enterprise, Representative JOHN PHILLIPS, with whom some of us served in the House of Representatives, said:

> The present hot argument arose because the Committee on Appropriations suggested to the AEC that it look around and see if the additional 600,000 kilowatts it needs for Paducah could be brought from private sources. Several power companies in the area agreed to talk about a contract to build a new plant, to run the power into the TVA grid and to supply Memphis, taking out the additional power for Paducah as was most economical and convenient.

Of course, that is not what is being done here. This steam plant has no connection at all with the Atomic Energy Commission in Paducah. The Paducah atomic energy installation has two steam plants, which will supply its needs for all time to come, or at least for the foreseeable future. This is just using the AEC to build a steam plant to put electricity into the TVA system to supply commercial users in the Memphis area, which is something the Atomic Energy Commission has no connection with whatever.

Quoting further from Representative PHILLIPS' newsletter:

> All the liberal commentators and columnists are screaming their heads off. If anyone shows that the deal is to the advantage of the taxpayers, or for the security of the country, he can hardly get in the news. I have no concern over the outcome. The President is getting a bit mad over the attacks and the misstatements. He will stand hitched. Those of us who thought this was a little matter, of small importance, will have to take the floor and give the facts.

A little matter of small importance indeed. An illegal contract, a perversion of the Atomic Energy Commission's authority, an unconstitutional seizure of congressional jurisdiction, and the implicit destruction of a useful Government agency. I do not regard that a little matter, or an unimportant one, either.

Nor can I find one scintilla of advantage to the taxpayers, or of security for the country, as my one-time colleague purported to find. It is inconceivable that the annual payment of an extra $3,685,000, I take the Atomic Energy Commission's figure, but, of course, the TVA's figure is much higher than that, to a utility combine can be called an advantage to anyone but the combine itself. The only security in it is not for the country, but for the old-age stockholders in the Southern Co. and Middle South Utilities.

What is this $3,685,000, this additional annual amount that AEC says it will cost to get its power from Dixon-Yates?

We cannot call it a swindle, because it is ordered by our highest executive authority. And we cannot call it robbery because Dixon-Yates are not armed with anything more irresistable than their corporate charter. We cannot say it is theft or a steal, because it is taking place in broad daylight. It is not a purchase, because we are not getting anything back. And we cannot say it is a grab because the administration is literally fighting for the privilege to hand over the money.

Mr. President, the nearest I can come to defining it is to call it an annual gratuity, a donation, if you will, to Dixon-Yates. I personally do not know what service Dixon-Yates have performed for us as a Nation that merits such preferential treatment.

The manner in which the entire problem of obtaining more power for the Atomic Energy Commission's Paducah works, and for the Tennessee Valley area in general, has been mishandled very badly.

It would be a very simple matter to restore the situation to reason and decorum.

We can reject the Dixon-Yates deal, and, in a supplemental appropriations bill, we can include the funds needed for TVA to build the Fulton steam plant.

In that way, AEC can get the 600,000 kilowatts it needs for the Paducah works, the integrity of both TVA and the AEC will be assured, and the Congress will not have surrendered its right to determine policy for those two great independent agencies.

Mr. President, let me here make one more plea that the Tennessee Valley Authority be preserved.

Since its establishment 21 years ago, it has meant much to the seven-State valley area. But it has been something more than an area project. It has put new economic breath into a whole great region of our country, a region that was only two decades ago called "The Nation's No. 1 Economic Problem."

The valley today is the show window of democracy in action. It is a great national asset.

When foreign visitors come to this country to see how they can develop their own resources, and lift the living standard of their people, in the first place, they go to see the inspiring example of people working together with government for the development of a nation. They find it in the Tennessee Valley Authority. I think it is significant that the President of the United States and others have recommended projects similar to the TVA for many other parts of the world. It is a great national asset, and if it is preserved it will be in the future, as in the past, a vast arsenal of electric energy for the defense of our country and of our civilization.

Mr. President, let it be remembered by those living in other areas of this Nation that the TVA is a great national asset. It is the best market in the Nation for products made in other parts of the United States, where most of the farm machinery, electrical appliances, generators, and other products of that kind are purchased.

Some of us are firmly convinced that this Dixon-Yates contract means the beginning of the end of TVA—a tearing apart of the agency that has served us all so well.

In the name of national sanity, this must not be done. Even if the Fulton steam plant is not built, surely there is some other way we can work out this power need without the destruction of TVA itself.

We have here an occasion for statesmanship, and I am sure that if we look at the facts clearly and without preconceived judgment, we will rise to it.

Mr. President, I said there was an alternative. Personally, I think it would be a calamity not to allow the TVA to have its own source of supply of power, but a feasible plan has been submitted on behalf of representative people who have the ability to put it into effect, whereby a steam plant can be built at Fulton, Tenn., without the appropriation of $1 by the Congress. It will save $125 million or $130 million to the Government and, in the end, will be owned by the Government or the Tennessee Valley Authority, and will not violate the position of the AEC or the TVA. The plan has been submitted to the Atomic Energy Commission, which has paid little heed to it.

In a letter dated July 19 Mr. Walter von Tresckow, on behalf of himself, Burns & McDonnell Engineering Co., Kansas City, Mo.; Salomon Bros. & Hutzler, investment bankers, New York City; Long Construction Co., Kansas City, Mo.; Robert W. Larrow, Burlington, Vt.; Harvey Weeks, New York City; George H. Schwartz, and Zelig R. Nathanson, of Schwartz-Nathanson-Cohen, New York City; and John N. Mitchell, of Caldwell, Marshall, Trimble & Mitchell, New York City, and, I am sure, Mr. Lucius Burch, of Memphis, states that they are able to build and finance a steam plant which would avoid an appropriation, which would save the Government money, which would not wreck the TVA, and which would not cause a perversion of the Atomic Energy Commission's program.

Mr. President, I ask unanimous consent that this letter be printed in the RECORD following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JULY 19, 1954.

HON. ESTES KEFAUVER,
United States Senator,
Senate Office Building,
Washington, D. C.

DEAR SENATOR KEFAUVER: We, the undersigned, have made an offer to finance, design, build, and operate a steam generating station at Fulton, Tenn., to supply the power needs of the TVA in the Memphis area. The cost of this power is to be 3½ mills per kilowatt-hour or less. This is practically at the same rate as power produced by the TVA. Our offer will cost the Government between $90 million and $150 million less than any alternative proposal you have for consideration.

We are repeating this offer, made to TVA and other governmental agencies concerned, to you and to every other Senator and Representative. We are now adding to this offer as follows:

"We will build steam generating stations on the same basis wherever they are needed in the TVA area. Power from these generating stations will also be available to the private utility companies in the adjacent territory at the same rates as TVA."

We respectfully ask that you interest yourself in the consideration of this offer by the proper Government agency, for the following reasons:

It is best for the Government, because—
It saves $90 to $150 millions.

It eliminates the need for the AEC to make a power contract to supply the needs of TVA.

It takes the AEC out of the power business.

It eliminates need for further Government appropriations for the construction of TVA generating stations.

It is best for TVA, because—

The authority can continue to make its own power contracts for its own needs.

It enables the TVA to supply all the power the AEC needs at the cheapest price.

The authority retains its ability to meet the growing needs of its own customers.

The cost of power remains the same to its present customers.

The great benefits, brought by TVA to the area it serves in seven States, are maintained through private money and private initiative.

It is best for the private utility companies in the territory adjacent to TVA, because—

It enables them for the first time to obtain power at TVA rates and to compete with TVA on a price basis.

It is best for the consumer, because—

His monthly bill for electricity in the TVA area remains the same and will be substantially less than he is paying now in the adjacent territory.

It is best for the country, because—

It spreads the benefits of low cost power over a vastly greater territory to a larger number of people.

Respectfully yours,

WALTER VON TRESCKOW.

(For Walter von Tresckow, New York City; Burns & McDonnell Engineering Co., Kansas City, Mo.; Salomon Brothers & Hutzler, Investment Bankers, New York City; Long Construction Co., Kansas City, Mo.; Robert W. Larrow, Burlington, Vt.; Harvey Weeks, New York City; George H. Schwartz, Zelig R. Nathanson, Schwartz - Nathanson - Cohen, New York City; John N. Mitchell, Caldwell, Marshall, Trimble & Mitchell, New York City.)

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SALTONSTALL in the chair). The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Aiken	George	McCarran
Anderson	Gillette	McCarthy
Barrett	Gore	Millikin
Beall	Green	Monroney
Bennett	Hayden	Morse
Bowring	Hendrickson	Mundt
Bricker	Hennings	Murray
Bridges	Hickenlooper	Neely
Burke	Hill	Pastore
Bush	Holland	Payne
Butler	Humphrey	Potter
Byrd	Ives	Purtell
Capehart	Jackson	Reynolds
Carlson	Jenner	Robertson
Case	Johnson, Colo.	Russell
Chavez	Johnson, Tex.	Saltonstall
Clements	Johnston, S. C.	Schoeppel
Cooper	Kefauver	Smathers
Cordon	Kennedy	Smith, Maine
Crippa	Kerr	Smith, N. J.
Daniel	Kilgore	Sparkman
Dirksen	Knowland	Stennis
Douglas	Kuchel	Symington
Duff	Langer	Thye
Dworshak	Lehman	Upton
Eastland	Lennon	Watkins
Ellender	Long	Welker
Ervin	Magnuson	Wiley
Ferguson	Malone	Williams
Flanders	Mansfield	Young
Frear	Martin	
Fulbright	Maybank	

Mr. SALTONSTALL. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CLEMENTS. I announce that the Senator from Arkansas [Mr. MCCLELLAN] is necessarily absent.

The PRESIDING OFFICER. A quorum is present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, its reading clerk, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 599. An act for the relief of Corporal Robert D. McMillan;

S. 1203. An act for the relief of Lieutenant Colonel Rollins S. Emmerich; and

S. 2070. An act for the relief of the estate of Givens Christian.

The message also announced that the House had passed the bill (S. 1225) for the relief of Brunhilde Walburga Golomb, Ralph Robert Golomb, and Patricia Ann Golomb, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 252) to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes.

The message further announced that the House insisted upon its amendment to the bill (S. 3344) to amend the mineral leasing laws and the mining laws to provide for multiple-mineral development of the same tracts of the public lands, and for other purposes, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WHARTON, Mr. D'EWART, Mr. DAWSON of Utah, Mr. YOUNG, Mr. ENGLE, Mr. ASPINALL, and Mrs. PFOST were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division to the Chief Joseph Dam project, Washington.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 9040) to authorize cooperative research in education.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7434) to establish a National Advisory Committee on Education.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7601) to provide for a White House conference on education.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 669. An act for the relief of George D. Kyminas;

H. R. 787. An act for the relief of Israel Ratsprecher and Maryse Ratsprecher;

H. R. 818. An act for the relief of Mrs. Emma Martha Staack;

H. R. 842. An act to restore United States citizenship to Atsuko Kiyota Szekeres;

H. R. 905. An act for the relief of Franciszek Wolczek;

H. R. 950. An act for the relief of Panoula Panagopoulos;

H. R. 1171. An act for the relief of Mrs. Wai-Jan Low Fong;

H. R. 1209. An act for the relief of Stylianos Haralambidis;

H. R. 1324. An act for the relief of Georgina Chinn;

H. R. 1897. An act for the relief of Mrs. Betty E. LaMay;

H. R. 2051. An act for the relief of Ivo Markulin;

H. R. 3742. An act for the relief of Paul Bernstein;

H. R. 7508. An act for the relief of James Dore, Jr.;

H. R. 7636. An act for the relief of Mrs. Helen Aldridge;

H. R. 7762. An act for the relief of M. M. Hess;

H. R. 7924. An act for the relief of Giuseppe Clementi;

H. R. 7925. An act for the relief of Mrs. Dina Mianulli (nee Kratzer); and

H. R. 8334. An act for the relief of Helmut Cermak and Hana Cermak.

The message further announced that the House had agreed to the following concurrent resolutions, in which it requested the concurrence of the Senate:

H. Con. Res. 254. Concurrent resolution favoring the granting of the status of permanent residence to certain aliens; and

H. Con. Res. 257. Concurrent resolution authorizing the printing of additional copies of the hearings relative to the contribution of atomic energy to medicine.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H. R. 669. An act for the relief of George D. Kyminas;

H. R. 787. An act for the relief of Israel Ratsprecher and Maryse Ratsprecher;

H. R. 818. An act for the relief of Mrs. Emma Martha Staack;

H. R. 842. An act to restore United States citizenship to Atsuko Kiyota Szekeres;

H. R. 905. An act for the relief of Franciszek Wolczek;

H. R. 950. An act for the relief of Panoula Panagopoulos;

H. R. 1171. An act for the relief of Mrs. Wai-Jan Low Fong;

H. R. 1209. An act for the relief of Stylianos Haralambidis;

H. R. 1324. An act for the relief of Georgina Chinn;

H. R. 1897. An act for the relief of Mrs. Betty E. LaMay;

H. R. 2051. An act for the relief of Ivo Markulin;

H. R. 3742. An act for the relief of Paul Bernstein;

H. R. 7636. An act for the relief of Mrs. Helen Aldridge;

H. R. 7762. An act for the relief of M. M. Hess;

H. R. 7924. An act for the relief of Giuseppe Clementi;

H. R. 7925. An act for the relief of Mrs. Dina Mianulli (nee Kratzer); and

H. R. 8334. An act for the relief of Helmut Cermak and Hana Cermak; to the Committee on the Judiciary.

H. R. 7508. An act for the relief of James Dore, Jr.; to the Committee on Finance.

HOUSE CONCURRENT RESOLUTION REFERRED

The concurrent resolution (H. Con. Res. 254) favoring the granting of the status of permanent residence to certain aliens, was referred to the Committee on the Judiciary, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress favors the granting of the status of permanent residence in the case of each alien hereinafter named, in which case the Attorney General has determined that such alien is qualified under the provisions of section 4 of the Displaced Persons Act of 1948, as amended (62 Stat. 1011; 64 Stat. 219; 50 App. U. S. C. 1953):

ADDITIONAL EXECUTIVE REPORT OF A COMMITTEE

As in executive session,

The following additional favorable report of a nomination was submitted:

By Mr. MILLIKIN, from the Committee on Finance:

Charles Irwin Schottland, of California, to be Commissioner of Social Security, of the Department of Health, Education, and Welfare.

REVISION OF THE ATOMIC ENERGY ACT OF 1946

The Senate resumed the consideration of the bill (S. 3690) to amend the Atomic Energy Act of 1946, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment of the Senator from Michigan [Mr. FERGUSON], as modified.

Mr. ANDERSON. Mr. President, I have two items I should like to have printed in the RECORD at this point. One is a letter directed to me by the American Public Power Association. If this letter has been sent to other Senators and has already been placed in the RECORD, I shall not ask that it be reprinted.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN PUBLIC POWER ASSOCIATION,
Washington, D. C., July 21, 1954.

DEAR SENATOR ANDERSON: The American Public Power Association, which represents over 700 local publicly owned electric utilities in 38 States and Puerto Rico, is greatly disturbed about certain features of the Cole-Hickenlooper bill (S. 3690) to amend the Atomic Energy Act of 1946.

This is, without doubt, one of the most important pieces of legislation to be brought before the Congress in recent years. Its passage would have a profound influence on American life for many future generations, for it would set the pattern for peacetime use of a great new source of energy. Needless to say, it would have a particularly great effect on the future of the electric industry, including the portion represented by the American Public Power Association.

Thus far, much of the Senate debate has centered about the so-called Dixon-Yates proposal by which a private utility holding company combine would furnish 600,000 kilowatts of power to the Tennessee Valley Authority, as a replacement for power which TVA now furnishes the Atomic Energy Commission.

Under this arrangement the AEC would be used as a broker to buy power, for the TVA is already adequately furnishing the power requirements of the AEC. It has been estimated that under the Dixon-Yates contract the additional cost of power to the AEC would range from $3,685,000 a year to $5,567,000 a year. Moreover, the Federal Government would reimburse the Dixon-Yates combine for its payment of Federal income taxes—a scheme which we understand is unprecedented in the history of our Government.

Although the Dixon-Yates controversy is extremely important particularly from the standpoint of the future of TVA, the debate on this contract has largely obscured from public view some of the extremely important power and related provisions of the atomic energy legislation. They are as follows:

1. Patents: Testimony which representatives of our association presented to the Joint Committee on Atomic Energy on May 12, 1954, described the patent provisions of the identical bills then before the committee (S. 3323 and H. R. 8862) as affording "opportunity for the creation of a monopoly on a scale never before known in America." Although we believe that the patent features of the bill presently before the Senate have been improved by their alteration in the direction of the 1946 Atomic Energy Act, we believe that the patent provisions of the new bill are still complicated, the procedures to be followed by the Commission in compulsory licensing are not well defined, and the way is opened for favoritism in the granting of exclusive patents.

2. Construction of nuclear reactors for power production: For all practical purposes, the Atomic Energy Commission and other Federal agencies are prohibited from building nuclear reactors for the commercial generation of electric power.

Since the Federal Government to date has invested some $12 billion in the field of atomic energy, and since the Federal Government will continue to retain ownership to nuclear materials, it would seem that the Government should not be prohibited from building pilot or "yardstick" plants for the generation of electric power, particularly in view of the fact that the Atomic Energy Commission itself is the largest single consumer of electricity in the world, its requirements exceeding about 5 million kilowatts of capacity. Certainly the Federal Government should not be prohibited from supplying its own needs for power.

To prohibit the Government from constructing plants of its own would be the same as saying to the Government that it had ownership of the navigable streams of the Nation, but could not build hydroelectric power facilities.

3. Preference in power marketing: In any incidental surplus power which the Atomic Energy Commission may produce as a by-product to experimental work, the present bill does not require that the Commission give a preference to local public agencies and rural electric cooperatives in the marketing of such power. Such nonprofit agencies are given preference in the marketing of federally produced hydroelectric power, the first such preference condition having been adopted by Congress in 1906.

4. Issuance of licenses: In the future, both local public and private power systems, as well as rural electric cooperatives, will be required to come before the Atomic Energy Commission to obtain 40-year licenses to build powerplants for the commercial production of electric power from nuclear materials. Here we are confronted with a situation similar to that of the Federal Power Act, since non-Federal agencies are required to go before the Federal Power Commission to obtain a license to build hydroelectric power projects on navigable streams. But whereas the Federal Power Act required that the Federal Power Commission give preference to applications submitted by local public agencies, no such condition is included in the pending atomic energy legislation.

5. Following procedures of Federal Power Act: As noted above, the Atomic Energy Commission, under the pending bill, would be authorized to issue 40-year licenses for nuclear power facilities. Yet, none of the significant regulatory procedures contained in the Federal Power Act have been included in the atomic energy legislation to govern the conduct of the Commission in issuing such licenses.

To correct these serious deficiencies, we urge your support of amendments, most or all of which have already been introduced in the Senate, which would do the following:

1. Prohibit the signing of the Dixon-Yates contract, which we believe is not only contrary to the purposes of the Atomic Energy Commission, but would be a devious means of opening the door to destruction of the TVA power system.

2. Substitute for the applicable provisions of the Cole-Hickenlooper bill the essential provisions of the 1946 Atomic Energy Act relating to patents.

3. Permit the Government itself, where specifically authorized by the Congress, to build nuclear powerplants.

4. Require that the Atomic Energy Commission give a preference to local public agencies and rural electric cooperatives in the marketing of power from federally owned nuclear power facilities.

5. Require that local public agencies and rural electric cooperatives receive a preference in obtaining licenses for nuclear power facilities, where there is a limitation on the availability of such materials.

6. Bring the licensing provisions of the Atomic Energy Act into line with the procedures established under the Federal Power Act.

The American people can rightly take pride in the careful manner in which the Congress, over the past 50 years, has developed legislation which protects for all Americans their rights to natural resources. We are at the threshold today of developing for the benefit of many future generations an entirely new source of energy. Depending upon the manner in which Congress acts upon the pending legislation, this energy source—holding such bright potentialities for the future—can either be developed for the benefit of all Americans, or it will become the province of a relatively few large corporations.

Unless the amendments to which we have referred are adopted, we fear that the latter will be the result.

We therefore strongly urge that the Congress, in formulating legislation of such transcendent importance, follow the same principles which in the past half century have guided the actions of Congress in preserving a national resource for the benefit of all the people.

In submitting these recommendations, we do not in any sense advocate a Federal Government monopoly in the field of nuclear energy, just as we do not advocate a Federal or public power monopoly in the electric industry. Local public agencies, whom we represent, and private companies should be permitted to share in the opportunity of making this resource available to all the people. But the Federal Government, which in the first instance has made this resource available through the expenditure of some $12 billion of tax funds, should not abdicate its responsibility by permitting unbridled exploitation of this resource or licensing of its use under loose procedures which do not protect the public interest.

Sincerely,

ALEX RADIN,
General Manager.

Mr. ANDERSON. Mr. President, the second item is a telegram from the board of directors of the National Rural Electric Cooperative Association with reference to their meeting at Wausau, Wis., on July 21, expressing their opinion as to certain phases of the pending bill. I ask that this telegram be printed in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *July 21, 1954.*

Senator CLINTON P. ANDERSON,
The Capitol, Washington, D. C.:

By resolution passed unanimously at a meeting of the board of directors of the National Rural Electric Cooperative Association at Wausau, Wis., July 21, 1954, the following message is sent to all Members of the Congress:

"It is our firm belief that the atomic-energy program, developed with the people's funds to the extent of $12 billion, is a part of the public domain as much as public lands, the navigable rivers, and other resources long considered to be the people's property. We feel most strongly that this is the basic premise which should guide the Congress in the consideration of S. 3690 and H. R. 9757.

"We commend those Members of the Senate who have courageously set forward the issues in S. 3690 and urge the continuation of debate until all issues are clarified and the bill satisfactorily amended.

"We urge that the licensing provisions and procedures be brought into line by appropriate amendments to make such licensing subject to the same safeguards applicable to water resources under the Federal Power Act. This includes public notice to interested parties, public hearings, and preference to public bodies and cooperatives on all licenses for the construction, operation, and fueling of atomic establishments for the production of electric power.

"We oppose the granting of private patents on discoveries made with Government funds, in the past or the future, directly or indirectly, and we urge compulsory licensing of all patents affecting the use of this great resource. No private monopoly should be permitted to jeopardize the domestic welfare and national security.

"We urge that preference in the purchase of electric energy generated as a byproduct of the atomic-energy program be given to public bodies and cooperatives. Section 44 should be so amended.

"We urge amendment of the bills to empower the Atomic Energy Commission to construct and operate or license any other Federal agency to construct and operate electric-generating facilities, and that preference in the purchase of electricity generated in such facilities be given to public bodies and cooperatives.

"We deplore the attempt to use the Atomic Energy Commission to open the way for invasion of TVA by the private power companies via the so-called Dixon-Yates contract, and we urge both Houses to amend the Atomic Energy Act to specifically forbid the signing of such contracts.

"We urge the Congress to recognize the vital importance of this wholesale revision of the Atomic Energy Act; that the Congress recognize that S. 3690 and H. R. 9757 are primarily electric-power bills; and that the rights of the people to the full benefits of their investments of $12 billion be recognized and safeguarded against monopolistic restraints and exploitation, through licenses, patents, subsidies for atomic fuel, and any and all other devices."

J. E. SMITH,
President
(For the Board of Directors of National Rural Electric Cooperative Association).

Mr. ANDERSON. Mr. President, I shall try my best not to detain the Senate very long, but I believe that the pending amendment and the amendment offered by the able Senator from Michigan [Mr. FERGUSON], present an issue that should be settled and needs to be settled, and that therefore the Senate should pass upon the issue in a clear fashion.

The two amendments now under consideration, the one of the Senator from Michigan, and my substitute, bring squarely before the Senate the question as to whether or not the Atomic Energy Commission, in dealing with the problem involved in the measure before the Senate, shall make contracts for power with those who may not be directly connected with the installations involved, or whether, as I have tried to provide, they must have a direct connection with the projects involved.

I wish to say in the beginning that so far as I am concerned, and speaking only for myself, we are not dealing with a quarrel between public power and private power. I do not believe the question of free enterprise enters into consideration in any way. Actually, I would remind the Senate that there was before the Joint Committee on Atomic Energy the question of two very substantial contracts known as the EEI and the OVEC contracts. In both those cases the Atomic Energy Commission had tried to contract with private organizations for all the power they might require at Paducah and Portsmouth. They found that while the private companies were

willing to be of assistance to the Government, they were not able to meet the entire demand at Paducah and Portsmouth, and very properly, I think, the Atomic Energy Commission gave them all the energy they were willing to furnish, and gave them contracts for it.

There was no question about those contracts. There was no great outcry by any Senator on this floor. We recognized that the Government had moved to give people power for these atomic installations, and we had no objection whatever because the contracts were made with private power companies. Nor do I believe the private power companies had the right to object, and they did not object, so far as I know, when the Atomic Energy Commission said the remaining power needed, which could not be supplied by the private companies, should be supplied by the TVA.

I think that, in fact, the whole situation illustrates the desirability of going as far as it is possible to go with the private power groups; and that when they are no longer able to carry the load, it is then desirable to turn to the TVA and ask the TVA to fill in the gap. That was done.

Therefore, so far as I am concerned, I hope this matter will be considered, not as being a squabble between private power and public power, but as relating to the question of whether in getting the power, the Atomic Energy Commission is to be used as a broker for the purpose, or whether the law which was passed with the clear understanding, at least, of every member of the Joint Committee on Atomic Energy, shall be used to permit the setting up of additional corporations to deal in a roundabout way with the Atomic Energy Commission.

Second, I wish to point out that these are not small contracts. Nearly a billion dollars is involved in these 2 plant—several times the amount involved in the Dixon-Yates plant. So we are not dealing with this matter solely because a large contract is available. I think it is extremely important to remember that many sincere friends of the Tennessee Valley Authority, who raised the question of the invasion of its territory, have a right to do so; but that is not why I have objected so strenuously to the proposed Dixon-Yates contract.

My amendment forbids the final execution of the Dixon-Yates contract. My amendment requires the company which gets the contract to produce directly for the Atomic Energy Commission. I do not desire to review the history of this matter; but if Senators will examine the hearings again, they will find that not one kilowatt of the power to be generated by this plant will be used by the Atomic Energy Commission. If Senators will examine pages 958 and 959 of the hearings, they will find that language specifically set forth.

Furthermore, they will find that this contract was not initiated by the Atomic Energy Commission. That testimony appears on page 959 of the hearings. The general manager of the commission testified at the hearings that this program was not initiated by the Atomic Energy Commission, but came to the Commission from another source.

If Senators wish to see how the original proposals from private utilities compare with what was finally worked out, they need only examine page 960 of the hearings, from which they will find that the original costs proposed were high, running into several hundred million dollars.

I say that the fact that the amount was brought down to a more sensible one, seems to me to be an extremely good thing.

Question has been raised, if AEC did not do all these things, if the Atomic Energy Commission did not initiate the contract, how does the Commission happen to be involved in it? Of course, the answer is that the Atomic Energy Commission is involved in it by virtue of the directive of the President of the United States.

It needs to be remembered that if the contract is finally negotiated on the terms which have been proposed, it must be done on the basis that is in the record. It has been suggested that these terms may be modified, when the parties come to negotiate the final contract.

I should like to have the Members of the Senate turn to page 952, and there read the statement that—

> The President has asked me to instruct the Atomic Energy Commission to proceed with negotiations with the sponsors of the proposal made by Messrs. Dixon and Yates with a view to signing a definitive contract on a basis generally within the terms of the proposal.

So when someone said, "You need not point to the cancellation clause, because it has no bearing on this matter; if that clause is bad, we will change it when we get through"; or when it is said, "Pay no attention to the rates prescribed; if they are not good, we will toss them out when we get through," I say the fact remains that the Commission has no authority whatsoever to execute this contract unless it be done under the directive of the President of the United States; and that directive says the contract must be signed "on a basis generally within the terms of the proposal."

So if the contract is negotiated, it will be negotiated on the basis of their bad proposal. Therefore, we cannot now attempt to reform the proposal by deciding what should have been offered if the parties had not been as exceedingly liberal to the companies as they were.

I was interested in certain questions put today to the President of the United States at his press conference. The following question was asked of the President:

> One of the major points in the debate on the Atomic Energy Commission-TVA contract arose out of testimony before the Joint Committee on Atomic Energy that three Commissioners of the AEC opposed signing the contract. Therefore, the Senators are asking the question of whether the President has the power to order independent agencies to take action that their administrators or a Commission majority oppose. Would you discuss your attitude toward this problem?

Then the quotation is given:

> I have an Attorney General; and when a matter of legality arises, why, I have to be governed by what the legal staff of that office decides is correct.

Mr. President, I pause here to say that only a short time ago I listened to a radio-television program on which the able and distinguished Attorney General of the United States, Mr. Brownell, was a guest. That occurred on July 11. When, during that program, a question arose regarding the contract, naturally I listened with extreme interest to what the Attorney General would say, because I had once found that a member of the Cabinet of the President of the United States must depend upon the Attorney General as his chief legal adviser.

So, when the following question was put to the Attorney General by Mr. Peter Edson—

> With reference to the Dixon-Yates contract, did you give your approval to that contract?

I noted that Mr. Brownell replied:

> No, that has not come over to the Department of Justice in any way.

Yet at the press conference there was the statement:

> I have an Attorney General; and when a matter of legality arises, why, I have to be governed by what the legal staff of that office decides is correct.

Yet the President's directive went to the Atomic Energy Commission months ago, whereas as late as July 11, the Office of the Attorney General had never been consulted in any way in regard to the Dixon-Yates contract.

Mr. President, if I may do so, I should like to go a little further.

In today's press conference, the President said:

> The AEC, I do not believe, is an independent commission in the sense that the ICC or the FCC is. It is something that I am compelled to take action on, and over which, to exercise supervision.

I submit to the Senate that when the McMahon Atomic Energy Act was before the Congress, there never was in the mind of anyone a feeling that the Atomic Energy Commission was not an independent commission, but was something over which the President was compelled to exercise supervision.

In that connection, I say that when the President of the United States, many of whose policies I have supported, and whose policies on farm legislation I probably shall be arguing for, on this floor, in a very few days—I say that when the President of the United States had to reach a decision on this question, rather than take the advice which was given him, which quite obviously was not from the Attorney General of the United States, the President would have done far better if he had consulted the only Republican Senator who lives in the Tennessee Valley Authority area, I refer to the able and distinguished junior Senator from Kentucky [Mr. COOPER], whose address on this subject was one of the finest addresses delivered in the Senate for a long, long time. I regret that the President has not sought that advice, as apparently he has not. I

think a far better decision would have been reached for the country, for the Tennessee Valley Authority, and—yes—even for the Republican Party, if the President of the United States had called the able junior Senator from Kentucky [Mr. COOPER] to the White House, and had said to him, "Tell me what this is all about. Tell me what your reason is for believing that this contract should not be entered into. Tell me what you propose that I should do now."

Mr. President, knowing the able junior Senator from Kentucky [Mr. COOPER] as I do, I think he would have proceeded to point out to the President of the United States the philosophy behind the Tennessee Valley Authority Act, and would have tried to bring to the mind of the President the reasons why people in that area fight so strongly against the Dixon-Yates contract and for TVA. I, of course, feel that the Senator would be an excellent person to do it. I hope that today he may bring some of that information to the Senate.

There are basic provisions in the contract that are bad. The President of the United States, by his directive, has said that this contract must be negotiated with Dixon-Yates with a view to signing a definitive contract on a basis generally within the terms of the proposal. That basis, I believe, is bad.

In the first place, I believe the cancellation costs are too high. In case there is a change in the program, and either the Paducah or the Portsmouth plant is closed down, if the current is sold to a Government agency, well and good; it is proper that the cancellation provision shall not apply. However, I think it is wrong, if every kilowatt of that current is sold to some private buyer at a rate greater than the Federal Government was expected to pay, to provide that the builders of a $100-million plant may collect up to $40 million in terminal cancellation damages. I think that is a bad provision, and I think the Commissioners of the Atomic Energy Commission are right in shying away from negotiating that contract. I do not believe they should be compelled to sign it under any circumstances.

In the second place, if the Atomic Energy Commission does not want the power, there is this interesting provision in the cancellation clause:

> Buyer—
>
> Meaning the Atomic Energy Commission—
>
> may assign any balance to any other governmental agency at an increased price to be approved by the Federal Power Commission.

Why at an increased price? If one looks at page 947 of the hearings, in the testimony of General Nichols, he will find an answer and realize that TVA would be the only agency which might buy that power. Mr. Nichols says, quoting from the third paragraph from the bottom of the page, where he is talking about the Dixon-Yates people:

> However, their rates to furnish TVA are higher than what they would furnish AEC for reasons of their own.

What are those "reasons of their own?" The "reasons of their own" are that they do not want TVA rates to be low. I say to the Senator from Kentucky and others who have fought here for the TVA that I think it is wrong for a private utility to have the opportunity to sell power to TVA at a price higher than that at which it will sell it to the Atomic Energy Commission, in order that when TVA passes the power on to some other purchaser, it may then be shown that TVA's rates are high, and that its method of operation is not a good one.

I do not believe that the strong arm of the Government of the United States should be used to interfere in a fight—if there is a fight—between private and public utilities. It seems to me that that very testimony by the General Manager of the Atomic Energy Commission, in which he said that private companies desired to sell to TVA at a price greater than they charge the Atomic Energy Commission, for reasons of their own, is very significant. I do not believe for a moment that the Congress of the United States should be a party to that sort of warfare. I think the Senate ought to see to it that the contract is made impossible, as my amendment would make it.

Finally, I come to a reason which compels me—and I hope will compel the Atomic Energy Commissioners, even though directed by the President to sign it—to refuse to sign this contract. I do not see how any man who lifted up his hand and swore to uphold the constitution and laws of this country can support a provision which permits the payment by this Government of Federal income taxes, as this contract would.

This contract might run for 25 years plus two 5-year extensions—a total of 35 years. According to a table which I have been furnished, and which I am quite sure is correct, at the end of 30 years the entire bonded investment in the plant will have been paid and all the bonds will be retired. It is a little difficult to obtain information on this subject. The amortization table is not in the files of the Joint Committee on Atomic Energy. It was not in the general files of the Atomic Energy Commission. It was in the personal file of a man who was careful enough to put it away, and I commend Mr. Cook for keeping track of it, so that when I needed it I could obtain it from him. I regret to say that it is not in the files of the Joint Committee on Atomic Energy because I think that when a contract runs as high as $100 million there should be a little interest in how the money is to be paid back.

If at the end of 30 years every dollar of investment has been paid back, and 9 percent earned in the interim upon the $5½ million supposedly venture capital—but which could easily be earned out of the profits involved in building a $100 million plant—then the Government of the United States is still obligated to pay the income taxes of the people who own the $5½ million worth of stock. I shall place the table in the RECORD because it will show that between the 29th and 30th years $5,300,000 will have been paid off in principal, in addition to the interest that will be paid on this transaction. I ask unanimous consent to have the table printed in the RECORD at this point as a part of my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Amortization of Dixon-Yates debt

Amount of debt, $101,750,000; 3¼ percent interest, 30-year level debt service (sinking fund)

[Millions of dollars]

Year	Cumulative interest paid	Cumulative principal repaid		Total cumulative payment
		Amount	Percent	
1	$3.54	$1.96	1.9	$5.50
2	7.01	3.99	3.9	11.00
3	10.42	6.09	6.0	16.51
4	13.75	8.27	8.1	22.02
5	17.00	10.52	10.3	27.52
6	20.18	12.86	12.6	33.04
7	23.27	15.27	15.0	38.54
8	26.27	17.78	17.4	44.05
9	29.19	20.36	20.0	49.55
10	32.01	23.04	22.6	55.05
11	34.75	25.81	25.4	60.56
12	37.38	28.68	28.2	66.06
13	39.91	31.66	30.1	71.57
14	42.34	34.73	34.1	77.07
15	44.66	37.92	37.3	82.58
16	46.86	41.22	40.5	88.08
17	48.95	44.64	43.9	93.59
18	50.92	48.18	47.3	99.10
19	52.76	51.84	50.9	104.60
20	54.48	55.63	54.7	110.11
21	56.06	59.55	58.5	115.61
22	57.50	63.62	62.5	121.12
23	58.80	67.83	66.7	126.63
24	59.95	72.18	70.9	132.13
25	60.94	76.69	75.4	137.63
26	61.78	81.36	80.0	143.14
27	62.45	86.19	84.7	148.64
28	62.95	91.20	89.6	154.15
29	63.28	96.38	94.7	159.66
30	63.42	101.75	100.0	165.17

Mr. LONG. Mr. President, will the Senator yield?

Mr. ANDERSON. Let me finish this one thought.

After the 30 years and through the next 5 years, if the rates are established at the same level, the company would be making more than $6 million a year, but because of the contract with the Federal Government, the Government of the United States could not collect a thin dime in income taxes from it. There would be a 100-percent return on the investment of the sponsor's every year, and not a penny would go to the Treasury of the United States in income taxes. Let Senators go home and explain that to the businessman who is paying to the Federal Government a 52-percent tax on his corporation's earnings. Go home and tell him why these power moguls have been placed in such a position by a negotiated contract, for which the General Accounting Office suggested there should be competitive bidding. There was no competitive bidding. Let Senators explain to their home folks why these power companies can get a 100-percent yearly return on their money and not pay a penny of income taxes to the Federal Treasury, while the home folks have to pay such taxes.

Mr. LONG. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. LONG. It seems to me that there is a great difference between the two kinds of taxes. For example, if one had in mind the corporation income tax, that might be an entirely different matter from the individual income tax. I have in mind particularly the fact that the individual income tax is a graduated

tax, under which some persons pay as little as 20 percent, and others pay as much as 85 percent, while on the other hand the corporation tax is more or less a flat-rate tax, at 52 percent. Could the Federal Government be held under any circumstances, under this contract, actually to make good the individual's personal income tax on that profit?

Mr. ANDERSON. I will say to the Senator from Louisiana that I do not know. The reason I do not know is that on page 58 of the hearings, which had to do with the EEI and OVEC contracts, there is a provision which would have allowed the renegotiation of those contracts. That same provision, I assume, because of the language of paragraph 12 in the Dixon-Yates proposal, could be carried forward into the Dixon-Yates contract. But there is no requirement that the Dixon-Yates people agree to renegotiation. There is no requirement that they permit themselves to be taxed at a high rate or at any rate.

I wonder how this provision gets into the bill—particularly a Senate bill. I thought bills to raise revenue had to originate in the House of Representatives. When I was a member of the Way and Means Committee of the House of Representatives I was very jealous about any other committee or any other body coming forward with a bill providing that someone need not pay an income tax. The only reason I never protested against a provision of this exact nature is that never in the history of this Republic, so far as we know, has anyone ever proposed that a business organization should be excused from payment of Federal income taxes, simply because it builds a powerplant at the directive of the President of the United States.

Mr. LONG. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. LONG. It occurs to me that generally under utility laws and utility regulations a utility is permitted to make a fair return on its investment. I understand that that is often construed to mean a fair return beyond taxes. In other words, if it were an 8-percent return, it would have to be a return over and above taxes. Otherwise taxes would account for perhaps 50 percent of the net profit. It seems to me that might have something to do with the fact that this contract proposes to reimburse those who would owe the corporation tax for their taxes. It would be an entirely different matter if it provided that they should be entitled to make a fair return over and above their personal income tax. That is the reason I asked the question.

Mr. ANDERSON. I wish to say to the able Senator from Louisiana, who is a member of the Committee on Finance, that I do not understand these ramifications. I have some business interests, and I would be very sorry to be expected to pay my personal taxes and the corporate taxes on my business interests if at the same time I knew there was an organization building power plants with a chance to make a very nice return—I will not say a guaranteed return—of 9 percent on its investment every year; and that at the end of 30 years, when it would not have one dime invested in the business except its venture capital in the approximate amount of $5½ million, it would be able to make a profit of approximately $6 million annually and, in addition, have its income taxes paid for it by the Government and be able to keep all of that amazing return.

Mr. President, I promised to be brief, and I shall try to be brief. I believe we had better try to keep the Atomic Energy Commission independent. I do not believe that the President of the United States should be allowed to direct the Atomic Energy Commission to enter into this contract any more than he should be allowed to direct, in the case of the other provisions of the bill, if the bill is passed, that the Atomic Energy Commission shall license a particular firm or shall refuse to license a particular firm, or grant a patent right or refuse to grant one.

Once a man is selected by the President for service on the Atomic Energy Commission and his nomination by the President is confirmed by the Senate, I do not believe that a Presidential directive should go to him or to the Atomic Energy Commission as a whole, that a license be granted to General Motors but not to General Electric.

I do not believe that a directive should be given to the Commission that it shall give a patent provision to one organization, and not to another.

I believe that we tried to frame the present law on the basis of having the Atomic Energy Commission operated by men of independent judgment, who would study the problems involved, and try to decide issues on the basis of what was best for the United States, and who, knowing all the facts, would move our atomic program in the direction which promised most for our country.

If they are no longer to be independent, we shall certainly need additional safeguards for almost every provision in the bill; and in that case we had better start to rewrite the bill from stem to stern, if we are to have a Commission composed of men who, after being confirmed by the Senate, are not to be allowed to exercise their independent judgment.

Mr. President, in a very short time there will come before the Senate the nomination of a man for appointment to the Atomic Energy Commission. What manner of man will he be? It matters not what we think of him if he is to be only a rubber stamp, if he can be directed to do something which in his conscience he believes he should not do, or if he can be directed to go ahead when he says, "I do not want to go ahead," or if—as Dr. Smyth and Mr. Zuckert said—he says, "It is wrong for us to do it," he can nevertheless be directed to do it. If such a man is directed to go ahead, and he accepts the direction, then I say to the Senate that he should not be confirmed by the Senate.

I suggest, Mr. President, because of this controversy, it will be more than a mere formality to confirm the next nominee for membership on the Atomic Energy Commission.

Very shortly, too, there will come to the Senate an appointment for chairman of the Tennessee Valley Authority.

Again I say that the President of the United States might have listened to the importunings of what I understand was the voice of one of the Members of the Senate whose heart is very close to that subject. But he did not and must appoint a new chairman. When the President sends the name of such an appointee to the Senate, it will be natural, again, to ask, "Can the President direct him? If he can direct him, why bother with Senate confirmation? Why try to find out what kind of man he is? Why place any reliance upon him at all?"

Mr. President, downstairs in this Capitol where the Joint Committee on Atomic Energy meets, there is a tablet on the wall which the members of the joint committee walk by every time they come and go to meetings. It is the famous message which was the first message sent by telegraph, and it was sent from that room. It reads, "What hath God wrought?"

When Senators have voted on this bill, and they go home, they should tell their constituents what the Congress of the United States, and particularly what the Senate of the United States, hath wrought. Let Senators go home and tell their constituents that they voted for a provision which pays the income tax of one particular corporation. Let them go home and try to make their constituents understand the cancellation provisions that are contained in the bill. Let Senators go home to their constituents and make them understand, although when the original McMahon Act was passed, and the Senate, acting jointly with the House, decided that an independent organization should be established, and that the great problem of atomic energy, as it is used for wartime as well as for peacetime purposes, should be in the hands of men who should reach out and make sound decisions, that the Senators now have decided that these men should not be free and independent at all, but should be under the direction of the President of the United States.

I do not believe that I would want to take that decision home. Therefore, Mr. President, without trying to inject myself into a public and private power fight, and realizing that I voted for private power contracts for AEC running up to a billion dollars, I have offered an amendment which would forbid the granting of this contract running to a hundred million dollars, and instead, I want to require that such contract shall be made directly with a firm supplying the direct current needs to this plant.

I trust that the Senate of the United States will make certain that that shall be done.

Mr. COOPER. Mr. President, last Thursday I spoke briefly in support of the amendment offered by the distinguished Senator from New Mexico [Mr. ANDERSON]. I support his amendment because I believe its purpose is good. Among other things, it is designed to prevent the execution of the proposed contract between the Atomic Energy Commission and the Dixon-Yates utility company to supply 600,000 kilowatts of

power to the Tennessee Valley Authority. At this late hour I shall not attempt to detail at any length the reasons which lead me to support the amendment. However, I wish to emphasize the importance of the issues which it presents to the Senate, and also to make some suggestions which I hope the administration will take into account.

This debate has made it clear that the purpose of the proposed contract is not to supply the power needs of the Atomic Energy Commission at Paducah or Oak Ridge. It is, rather, to replace in the Tennessee Valley Authority system, power which the AEC purchases from it. Its ultimate purpose is to supply electric energy to the domestic consumers of the Tennessee Valley Authority system. It is clear, I think, that provision for obtaining additional power for the Tennessee Valley Authority has been made a function of TVA by the act which created it. In the 20 years which have passed since the creation of TVA, that function has been approved and confirmed again and again. It would seem reasonable that if the power is to be directed into the Tennessee Valley Authority system, that TVA would be made a party to the negotiation, and to the contract, and its views would be sought. Yet in this case the Tennessee Valley Authority is not considered equally a party to the negotiation or to this contract. TVA has not requested that this power be directed into its system. It has not assented to it.

The determination of the policies of the Tennessee Valley Authority, its provision of sources of power and need of power at this time, has been made by another independent agency, the Atomic Energy Commission.

Therefore, it has been made clear to me, at least, that the first issue which the contract presents is whether the Atomic Energy Commission has the power under its act to exercise a primary function of the Tennessee Valley Authority that is to provide power for its area.

It is a power given by the Congress to the Tennessee Valley Authority.

Surprisingly, this argument has borne little weight in the debate. It may be termed a legalistic argument, and one of no great practical relation to the problem of the supply of power in the Memphis area of the TVA.

I wish to speak to this viewpoint before we vote tonight, and to address my remarks to my own colleagues on this side of the aisle.

During the past 20 years our party has been the legalistic party; it has been the constitutional party; it has been the party, watchful and jealous of the wrongful exercise of power by the agencies and officers of our Government. In our position of opposition we have guarded closely the exercise of power by our opposition when we did not believe it proper. It has been a position of which we have been proud, and one which has guarded and protected the country over these years.

The principle, and the necessity of asserting it does not change because there has been a change of party or a change in situation. The principles are still the principles in which we have said we believed, on which we have held a strong position throughout the years.

So, Mr. President, I repeat my question to my own colleagues, namely, Where is the power, where is the authority in the AEC to exercise such an extensive power? Where is the statute or language which gives to the Atomic Energy Commission authority to take over the function of another independent agency, the Tennessee Valley Authority?

I leave that question with my colleagues for their own decision and determination.

Congress created these agencies. It defined their power, and, in defining it, it also limited their power. It gave certain powers in connection with their operation to the executive branch and by the very definition of these powers it limited the powers of the executive branch. Whatever may be our views concerning the Tennessee Valley Authority, whether we think it is a good or a bad agency, we cannot escape this question of power when other agencies act with respect to it.

As I said in my statement a few days ago, I know that the President is motivated by the sincerest desire to assist the residents and people of the Memphis area in their search for electric power. I also stated that I believe the purpose of the AEC is simply to replace power in the TVA system. But under our governmental system, no agency of the Government is authorized to take a course of action which it believes good unless it possesses governmental authority.

It can be said, of course—and I am sorry the distinguished Senator from Michigan [Mr. FERGUSON] is not present—that his amendment as modified by the amendment of the junior Senator from North Carolina [Mr. ERVIN] and will correct for AEC this question of statutory authority about which I have been speaking. It will be said, that when the amendment of the Senator from Michigan is passed, that the question of the authority of the AEC to act for the Tennessee Valley Authority will be academic, and the AEC can then enter into the contract, with all doubts about its authority to do so removed. Then it can coerce and require the Tennessee Valley Authority to assent to the contract, and thereby remove all questions of legality or power, and no objection can be made.

I must say, as one who has been a practicing lawyer, that it is perhaps time that if the Ferguson amendment is passed, all question of statutory authority will have been removed. But we will not, in passing the amendment, escape another question, namely, the question of whether, if it is a good policy, it is right and proper to change the functions and character of TVA and AEC in this easy way. Again I speak to my colleagues on this side of the aisle. In addition to being a constitutional legalistic party of opposition, our party has stood for orderly legislative processes. We have resented, in the past, shortcuts; we have said the legislative changes must be orderly and in accord with the proper processes of Government. In weighing what we are doing, against the principle we have asserted, let us examine the consequences if it is approved. It will probably confer power on AEC to execute the contract. When it has been executed, and the Tennessee Valley Authority is then required to assent to the contract, there will later be introduced into the TVA system a public power system, a large volume of private power. It will not be by its voluntary assent, because the TVA will be required to accept the power.

The ultimate effect if such a policy is continued will change the character, the concept of TVA as Congress has determined it. The TVA is a controversial agency. I have not always gone along with the views of my colleagues on the other side of the aisle who serve the area. They know that. I have favored the appointment of a new chairman because I have believed a new and objective analysis of the TVA is needed. But the TVA is an authority created by the Congress of the United States. For 20 years the Congress of the United States has confirmed again and again its purposes by amendments and by appropriations. The Congress of the United States has the right and power to change its purposes and its functions. I remember that in 1947, Senator McKellar proposed a change in the method by which the TVA handled its revenues, a revision which, it was charged, would have changed its functions and its flexibility. The question was argued for weeks, before the Public Works Committee of the Senate of which I happened to be a member at the time. This thorough hearing was in the Republican 80th Congress, and no change was made.

This one contract may not change the TVA, the Yates-Dixon contract cannot alone change or remake TVA, but if it can be done again and again, then we shall have provided the instrument for change in the concept, the purpose, and the character of the Tennessee Valley Authority.

Whether or not we approve the TVA, it seems to me the orderly and proper thing to do, the direct thing to do if it is the desire of the Congress to change its purpose, is by the introduction of legislative proposals to revise the TVA and upon which hearings may be held and upon which an issue may be presented squarely to the Congress, and upon which it can make a decision.

If the amendment of Senator FERGUSON is not adopted, and this contract is made, it will be made not by the Congress, but by the decision and determination of the Atomic Energy Commission. But if the amendment presented by the Senator from Michigan and the Senator from North Carolina, is agreed to, then the Congress will be making through it a new determination respecting the policy of the Tennessee Valley Authority. We can do it in this fashion but I would not like to think it is being done without hearings upon the precise issue, and in a few hours of debate upon a bill which is not concerned primarily with the Tennessee Valley Authority.

For myself, I believe that the Tennessee Valley Authority has had great value. Contrary to what many persons may think, the TVA does not affect an

extensive area of my State, but it has had a great value to my State, locally, in its supply of power to REA cooperative, communities, and businesses. It is of local benefit to the area it serves. But it has rendered service to the entire Nation as a demonstration of a public power system.

In closing, all that I can offer to my colleagues is the submission of the proposition that if this action so important to the future of TVA is to be taken, it should be done directly. It should be done after hearings. It should be done after discussion and after a debate upon the issue itself.

Again, before we vote, I direct my remarks to the substantive question of whether or not there is any authority and power in the AEC to execute the contract. If the amendment of the Senator from New Mexico, which we are considering, and for which I will vote, is defeated, and later the amendment which has been presented by the Senator from Michigan [Mr. FERGUSON] and the Senator from North Carolina [Mr. ERVIN] is adopted, and Congress declares its intent thereby to modify the TVA Act, for that is what it will do, I hope the administration will still take into account this debate, and that it will not execute the contract. I hope that it will consider all alternatives, including the possibility of TVA issuing its bonds to secure capital investment fund for generating facilities. If it decides to execute the contract, then I hope there will be forthcoming from the administration a declaration policy with respect to the remaining area of the Tennessee Valley Authority. I hope it will direct and authorize the new Chairman of the Tennessee Valley Authority to assume responsibilities and functions, to analyze the capacity and need of the area and to make recommendations to the Executive and the Congress as to what steps should be taken to supply the future power needs of the Tennessee Valley Authority, as they may develop, and what the policy shall be toward maintenance of this institution created by Congress.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. HICKENLOOPER. With reference to the two statements which the Senator from Kentucky has made, that this question should not be decided after only a few hours of debate, and that it should have the benefit of hearings, I call attention to the fact that the entire matter has been the subject of substantial hearings before the Joint Committee on Atomic Energy. The very question of replacement power was the subject matter of hearings. It is mentioned in the report. The hearings show that they were of considerable length.

So far as the question of a few hours of debate is concerned, I shall respectfully have to disagree with the Senator from Kentucky that there have been only a few hours of debate. It seems to me that the bill has been the beneficiary not only of hours, but of long days of specific discussion, devoted almost entirely to this particular subject. So I shall have to disagree with the statement of the Senator from Kentucky that the matter has not been the subject of hearing, and that it has been given only a cursory, limited, lick-and-a-promise discussion by way of debate.

I have one other observation. At this late hour, I do not wish to engage in a ramified debate on the question.

I suggest that the Tennessee Valley Authority, after all, is the creature of the United States Government. So far as I know, there is no legal justification for the Tennessee Valley Authority arrogating to itself an untouchable attitude. It still must remain subject to the will of the Congress of the United States. It is not the exclusive property of any State or any particular area. I believe the TVA should gracefully yield itself from time to time to the properly constituted opinions of Congress.

Mr. STENNIS. Mr. President, I wish to make it very clear, in the beginning, that I shall not take much of the time of the Senate, because I want to be brief. I respectfully ask that I not be interrupted until I have concluded my remarks. Then I shall be glad to yield to answer any questions which may be forthcoming.

In spite of the very fine debate which has taken place, there is still some uncertainty, some doubt, as to exactly what the fundamental facts are with reference to the provisions of the bill. I feel that the Senate is about to take a very far-reaching step and to make a very far-reaching decision on a very important question of policy.

I desire to make it clear that I am not in favor of the territorial expansion of TVA. I live on the southern border line of TVA. Some people in the State of Mississippi have urged me to try to have the area of the TVA extended. I have declined to accede to those suggestions. I oppose the territorial expansion of TVA. My interest in it stems from the fact that it is a national organization, it is a part of the Federal Government, and there should be a fairly systematic regulation of the policy in relation to natural expansion based on the demands in that territory.

But I shall speak on two points, because I believe that the question reduces itself to this simple form: Shall the TVA continue to be the policymaking authority of the Government with reference to electric power, or shall the Atomic Energy Commission be authorized to help determine the policy?

If it is desired to authorize the Atomic Energy Commission to enter into the policymaking field with reference to electric power, then Senators should vote for the Ferguson amendment, because that is exactly what the amendment provides. It is an affirmation and an approval of the contract which has been discussed in the debate for all these days. The Ferguson amendment does not say that after the contract is referred to the joint committee, the committee may disapprove of it or stop it, or that it shall not be valid if disapproved. The Ferguson amendment, on that score, merely says that the contract shall be referred to the joint committee, and shall remain there for 30 days.

But the contract already has been before the Joint Committee on Atomic Energy, and it has not been disapproved. It is now before the Senate. If the Ferguson amendment shall be adopted, the first thing that will be said about it is that it is an approval of the contract in toto.

Someone, as I have said, has been trying to constitute the Atomic Energy Commission as a policymaking agency as to electricity. The Commission has not done that, because the Commission did not originally approve the contract. I have found that that fact is not known by a number of Senators, so I shall refer briefly to volume II, page 950, of the hearings before the Joint Committee on Atomic Energy. The witness whom I am about to quote is Mr. Nichols, who is General Manager of the Atomic Energy Commission. This is what he had to say about whether or not the Commission approved of the contract:

> Subsequent to receiving the proposal, the Atomic Energy Commission, after making an analysis to compare it with the rates that we are now paying at Paducah and the total cost, forwarded the proposal with the analysis to the Bureau of the Budget, and in forwarding it, it was made clear to the Bureau of the Budget that the Commission did not agree on the wisdom of the AEC entering into this type of contract.

There is a statement in black and white. Who is it that is trying to constitute the AEC as a policymaking agency? Not the Atomic Energy Commission, not the President of the United States, as I verily believe; but apparently some member of the Commission, or someone acting between the Commission and the President of the United States; because I believe that if the President understood all the facts, however he might feel with reference to having a steam plant built by the Government or by private companies, he would not use the Atomic Energy Commission to carry out his purpose. I say that in all sincerity.

Only a few days ago, Admiral Strauss, Chairman of the Atomic Energy Commission, appeared before the Committee on Armed Services. We are accustomed there to hearing serious discussions on matters of far-reaching consequence, on worldwide problems, on continental defense, on strategic airpower, indeed, on almost everything that is bound up in the very serious question of our defense. accustomed as the members of the committee are to hearing important facts, they sat on the edges of their chairs while Admiral Strauss testified concerning the complexities of the problem with which the Commission is faced, and the far-reaching decisions which it must make now, and will continue to make in the future.

I felt very good after hearing him testify along those lines, and it has been the most disappointing experience I have had as a Senator to come to the Senate Chamber and learn that the Commission, which has embarked upon such a high, and I almost said holy, mission, has become enmeshed—not through its own fault, but it is nevertheless a fact—in a power-policy fight which involves the integrity of the laws under which it oper-

ates, and which involves, just as certainly as we sit here tonight, the confidence the American people are going to have in the Commissioners.

As we leave this building tonight, we shall walk by a sign which reads, "Shelter area this way." All over the Nation 160 million people are reading similar signs every day. As they drive down the highways, 160 million people see signs which read, "In case of enemy attack, this highway will be closed." We are daily reminded of the terrible consequences we would suffer should there be an atom bomb attack on us. Our defense, and our sole defense, will depend upon whatever may come out of the far-reaching plans, the decisions, and the wisdom of the Atomic Energy Commission.

I say it is a shame to embroil the members of the Commission in this controversy. It is a shame to encumber and embarrass them with this subject matter. The people of the United States are entitled to have an Atomic Energy Commission that lives high above such contests as this. The men who are carrying that burden are entitled to an atmosphere in which they can work. They are entitled to the confidence of the people for whom they plan. They are entitled to work in an atmosphere far above the level of that which comes from such a contest as this. I say it is unfortunate, and I am sad to see that Commission become the victim of the battle taking place in the Senate.

I say again, if Senators want to put the Commission right in the middle of policy-making with respect to electric energy, they will vote for the Ferguson amendment, because that is exactly what it will do.

Mr. President, I wish to touch just a few of the high spots of the contract. A bare statement of the facts of the contract is enough to condemn it. It could not possibly stand on its own merits. It could not have stood on its merits before the Atomic Energy Commission. The contract had to have the favorable word of the Budget Bureau, according to the record, in order to give it a prop. It had to have the indirect word of approval of the President of the United States to give it any validity. That is the only thing that permitted it to go as far as it has gone. The only thing that is keeping the contract in the debate on the floor of the Senate tonight is the influence of the President of the United States; and I verily believe it is a misguided influence, at that.

Mr. President, in touching on the highlights of the contract, I wish first to say that the contract had no legal basis when it was conceived. As a young lawyer, I remember reading a jury verdict which had been handed down in one of the old trials in England. The case concerned the legitimacy of a child. The jurors had rendered this verdict: "Conceived out of wedlock, but born in wedlock."

I respectfully submit that what the Ferguson amendment attempts to do is get a verdict from the jury, the Senate, admitting more or less that the contract was conceived without legitimate authority, but it will be blessed by a verdict of the Senate declaring it to be legal, and thereby make it legitimate.

But let us look briefly at some of the birthmarks before we make it legitimate. The first thing that impresses me is the question of taxes, which are guaranteed at the rate of more than $2,319,000 a year. It is proposed that the Federal Government guarantee taxes, come what may. If the Nation goes to war, this company will not suffer because of increased taxes. No tax bill which may be passed by Congress will be able to affect this company. No excess profits tax bill passed by Congress will affect them, because they will have a contract with the Federal Government in which it is provided that even though they are in business and making money just as are other corporations throughout the country—and I am in favor of anyone making legitimate money—they will be immune from any tax bill the Government might send them, even a capital gains tax. If we become involved in a world war III—God forbid—Congress may provide for a capital gains tax. I hope that will not happen, but I heard a revered member of the Finance Committee a few days ago speak in terms of such a possibility. So at the very threshold, the tax provision robs the arrangement of the character of a private-enterprise contract. What is being proposed is not a private-enterprise contract; it is a subsidized contract, topside and bottom.

Another thing that impressed me was the question of the equity capital and the return thereon, which will be 9 percent on $5½ million for 25 years. I say to my friends, that is a pretty good investment. In addition, the income tax which would have to be paid on the 9 percent return will also be paid by the Federal Government. I repeat, that is a pretty good investment. That 9 percent return is guaranteed, provided the plant does not cost in excess of $107 million. I think the Dixon-Yates group are smart enough to have made an estimate that will be fairly close to what the plant will actually cost them. I am not criticizing them for that, but 9 percent on $5,500,000 for 25 years is a pretty nice tax-free income, free from State taxes, free from State income taxes, and free from Federal taxes. That does not sound to me like a private-enterprise contract.

That is another reason why the undertaking is beyond the ordinary scope of a private enterprise arrangement. It has to be guaranteed and subsidized; therefore, the plant could just as well be built by the Government.

However, I am impressed with the excess cost involved. I would call it that even according to the most conservative estimates. That amount of money is not to be laughed at. The excess cost will be $3,685,000 a year. That is the increased cost as compared to what it would cost if a plant were built by the Government. Those estimates have been prepared by the Atomic Energy Commission itself. By the way, for the 25-year period, that would be a total of $92,125,000 excess cost over what it would cost if the other arrangement were made use of.

What would the Government have at the end of 25 years? Nothing in the world—merely a clean sheet of paper with a receipt written on it; but no plant, not even a burned out fuse. The estimate of the TVA was that the difference would amount to more than $5,500,000 a year, or, for the 25-year period, $139,175,000. That is the excess, according to the estimate made by the TVA.

So, Mr. President, the bare facts, on their face—without going into the details—condemn the contract as not really being a private enterprise contract. A statement of the bare facts condemns the contract as being unsound from a public policy point of view. As I have said, the contract would long since have fallen by the wayside if it had not had the mistaken blessing of one very, very high in authority.

I shall not detain the Senate long, except to read briefly the amendment of the Senator from Michigan, and particularly the last part, with reference to submitting the contracts to the Joint Committee on Atomic Energy:

> Any contract hereafter entered into by the Commission pursuant to this section shall be submitted to the Joint Committee and a period of 30 days shall elapse while Congress is in session (in computing such 30 days, there shall be excluded the days in which either House is not in session because of adjournment for more than 3 days) before the contract of the Commission shall become effective.

That is all there is to the clause—simply a provision that the contract shall lie before the joint committee for 30 days, at the end of which time the power of the joint committee in that respect will be ended. The only authority the amendment of the Senator from Michigan will give the joint committee will be authority to have the contract lie before them for 30 days, if they so choose. But the first part of the amendment shows, beyond the possibility of misunderstanding, that there will be a change of policy, both as to the Atomic Energy Commission and as to TVA power.

After all, Mr. President, the amendment of the Senator from New Mexico, as a substitute for the amendment of the Senator from Michigan, is very, very mild. The amendment of the Senator from New Mexico does not even condemn the contract, but merely provides, in part—

> The authority of the Commission to enter into contracts for electric utility services shall extend only to contracts with persons who agree to supply the contractual amount of electric utility service directly to the installations of the Commission named herein.

In other words, it keeps the Atomic Energy Commission in the atomic energy business, in the business of making atom bombs and hydrogen bombs, and perhaps cobalt bombs; it keeps the Commission at work on its primary purpose. So the amendment of the Senator from New Mexico is a very, very mild one; it merely reiterates existing law.

Mr. President, I most sincerely submit that the amendment of the Senator from New Mexico is all that should be adopted; the Senate should do no more.

I thank the Senate for its courtesy in hearing me.

The PRESIDING OFFICER (Mr. PURTELL in the chair). The question is on agreeing to the amendment of the Senator from New Mexico [Mr. ANDERSON] in the nature of a substitute to the amendment, as modified, of the Senator from Michigan [Mr. FERGUSON].

Mr. GORE and Mr. HILL asked for the yeas and nays, and they were ordered.

Mr. FERGUSON. Mr. President, I wish to say a few words on the pending question. The vote will come on the substitute by the Senator which has been submitted for the modified amendment I have offered.

There is one difference between the substitute and my amendment, namely, regarding the right of the Atomic Energy Commission to contract for electric power. The amendment of the Senator for New Mexico, which is proposed as a substitute for my amendment, would limit the Commission to entering into contracts which would supply power directly to the Atomic Energy Commission's plant. My amendment would allow the Atomic Energy Commission to contract for electric power to be furnished to the Commission by the Tennessee Valley Authority, and to contract with any person to furnish electric energy in replacement thereof to the Tennessee Valley Authority.

Mr. President, some time ago in the Tennessee Valley, when the TVA desired to build a plant at Johnsonville, it was contended that it would be a steam plant, and that it could be built for the purpose of firming up hydroelectric power that came from dams which were built in the Tennessee Valley. It was said that this firming up was merely in order to put power into the lines; that they had lines all over the Tennessee Valley, and that electric power could not be singled out, but that when supplied at one point, it was for the benefit of all.

I remember very well the argument made by Senators on the other side of the aisle regarding that plant. It was said, "We must build this plant because the power must go to the defense plants."

We asked, "Can you prove that the power will go directly to the defense plants?"

They replied, "No; we do not have to prove that. Once the power is put into the system, that is all that is needed. That is what is essential."

Mr. President, that is the purpose of my amendment—to allow the Atomic Energy Commission to contract for power. I request this specific authority because it was claimed that the section of the act to which the amendment applies is not sufficiently clear to authorize this contract.

I believe the intent of legislation should be clear; there should be no doubt about the purpose. Therefore, I submitted the amendment in order to be specific, in order to allow a contract with a private utility, to provide electricity to go into the Tennessee Valley Authority system, and to replace power that was taken from the Tennessee Valley Authority system by the Commission. That is all my amendment authorizes.

The Senator from North Carolina [Mr. ERVIN] proposed an amendment to my amendment; he wished the contract to be submitted to the Joint Committee on Atomic Energy. I accepted his amendment to my amendment, because I believed that would be a good provision—namely, to allow the joint committee to have 30 days, while Congress was in session, to examine the contract which would be submitted; or if the joint committee believed the contract was all right, the joint committee could shorten the time to less than 30 days, or could waive entirely the requirement to wait 30 days while Congress was in session.

In other words, the amendment of the Senator from North Carolina to my amendment did not give the joint committee a veto power in case it did not approve the contract; but under the provisions of the amendment of the Senator from North Carolina to my amendment, it would be necessary for Congress to be in session 30 days after the joint committee received a copy of the contract; and then the Senate and the House of Representatives—the two bodies of the legislative branch—could act, if they so desired, to refuse to allow the contract to be made, because they could revoke the power.

Mr. President, I say that this is a proper power to give to the Joint Committee, to the President of the United States, to the Tennessee Valley Authority, and to the Atomic Energy Commission.

I hope the Senate will now proceed to reject the Anderson substitute, which would destroy what we are trying to do, namely, to put a private plant across from Memphis, Tenn., to furnish power to go into the channels of the Tennessee Valley Authority. Is this power needed? For 2 years the Tennessee Valley Authority has been asking for a plant at Fulton, Tenn., because it says it needs power. Under this contract it can get power which is being taken today by the Atomic Energy Commission.

As I contemplate the development of atomic energy, the time may come when the Tennessee Valley Authority will not be able to supply all the power required by the Atomic Energy Commission. My amendment, instead of destroying the Tennessee Valley Authority, would allow it to continue, because, as a greater amount of power is taken by the Atomic Energy Commission from the system, it will be able to provide the same amount of power to go into the system at other places. It does not make any difference where it comes from, so long as it gets into the system.

I hope the Senate will reject the Anderson substitute amendment and approve the Ferguson amendment.

Mr. FULBRIGHT. Mr. President, for the satisfaction of Senators let me say that I do not intend to speak, but I wish to insert in the RECORD at this point several memoranda which I have had prepared, dealing with questions which have been discussed in various speeches, primarily for the information of Senators, for the RECORD, and for the benefit of anyone who is interested in developing the full facts on this subject.

I therefore ask unanimous consent to have printed in the RECORD at this point as a part of my remarks several memoranda. The first deals with the income of the TVA, which, it has been asserted, belongs to the United States Treasury.

The second memorandum deals with the question of replacement of power, which was just discussed by the Senator from Michigan [Mr. FERGUSON].

The third memorandum analyzes the effect of the proposed contract and its results, which we have discussed here at various times.

The next memorandum relates to the risks assumed by the sponsoring group.

The next memorandum relates to taxes.

There being no objection, the memorandums were ordered to be printed in the RECORD, as follows:

ALL INCOME OF TVA BELONGS TO THE UNITED STATES TREASURY

The statement is made repeatedly that it is quite proper for TVA to get its money without interest and to pay little or no taxes since, after all, it belongs to all of the people of the United States. This is a high-sounding phrase but one which hardly withstands close scrutiny.

Senator GORE made the statement (CONGRESSIONAL RECORD, p. 10490) that TVA will repay its investment in power projects to the United States Treasury in 40 years. This, too, is not strictly factual.

If the TVA were to completely repay its total investment in the power business and if it were to actually pay into the Treasury its total net income (an amount which has been likened to being equivalent to carrying charges on the investment of all the people) there might be some substance to the statement that all American citizens did participate in this business venture. It doesn't work that way. The Government Corporations Appropriation Act, 1948, under title II, sets forth a formula for repayment of the investment. It provides for the repayment over a 40-year period of a fixed sum of $348,239,240 plus any further appropriated funds. It did not provide for the repayment of retained earnings. The following table using figures from the official TVA annual report for 1953 reflects the status at June 30, 1953:

Appropriations and transfers of property:	
Employed in power program	$657,858,076
Construction and investigations in progress	192,690,665
Total	850,548,741
Less payments into the general fund of the U. S. Treasury, including $10,000,000 during 1953	50,059,019
	800,489,722
Bonds outstanding	34,000,000
Accumulated net income	225,773,288
Total	1,060,263,010
The amount TVA is obligated to repay under title II of the Government Corporations Appropriation Act, 1948:	
Beginning with the year ending June 30, 1948	348,239,240
New appropriations for power facilities	351,059,817
Total	699,299,057
Less repayments since enactment of this legislation	57,500,000
	641,799,057

In summary, out of $1,060,263,010 of TVA power investment at June 30, 1953, only $641,799,057 is required to be repaid.

Section 26 of the TVA Act of 1933, as amended provides that the Board does not have to pay to the United States Treasury such part of the proceeds from the sale of power as in the opinion of the Board shall be necessary for the Corporation in the conduct of its business (copy of sec. 26 is attached).

At June 30, 1953, TVA's report shows accumulated net income or earnings retained in the business of $225,773,288. That is all of its net income from power operations during the lifetime of TVA. It has been retained for the benefit of the power customers in the Tennessee Valley.

In discussing TVA's retained earnings, Senator GORE said at page 10490 of the CONGRESSIONAL RECORD of July 14, 1954:

"All the net earnings, all the proceeds, all the properties are subject to the disposition of the United States Congress."

I have already shown that section 26 of the TVA Act permits the Board to retain such proceeds as it seems necessary in the business.

Now, I should like to quote from title II of the Government Corporations Appropriations Act, 1948, as follows:

"None of the power revenues of the Tennessee Valley Authority shall be used for the construction of new power-producing projects (except for replacement purposes) unless and until approved by act of Congress."

Now to show the Senator how TVA interprets the statutes I want to present the following excerpt from testimony of Gordon Clapp, former head of TVA, before the subcommittee of the Committee on Appropriations, House of Representatives, 83d Congress, 2d session, pages 2448–2449:

"Mr. JONAS. As I understand this justification, the request is for $142,868,000 of appropriated funds.

Mr. CLAPP. $141,800,000 is the new appropriation request, and there is a carryover balance of about $1 million.

"Mr. JONAS. Which makes the sum of $142,868,000.

"Mr. CLAPP. That is right.

"Mr. JONAS. Now from corporate funds you are asking that you be authorized to spend $221,400,000.

* * * * *

"Mr. CLAPP. I do not want to seem to be too technical in these matters, Mr. JONAS, but we are not seeking authorization to spend those corporate funds. The authorization to spend those corporate funds is in our basic law. It is a fact that the budget of 1955 includes those moneys from corporate funds in order to give the complete picture of our spending program."

The foregoing hardly supports the statements of the various Senators opposing the proposed contract during the colloquies on the floor of the Senate on July 14, 1954, typical of which were:

Senator GORE, page 10490: "In addition to that, the TVA has had net earnings. The Congress upon each occasion, in its appropriation bills, has had the disposal of the net earnings. Congress has sometimes directed the TVA to use the net earnings in a specific manner. The appropriation bill this year did exactly that. All the money has not been actually, physically transmitted to the Treasury of the United States."

Senator GORE, page 10490: "All the earnings of TVA are within the disposition of the Congress each year."

Senator GORE, page 10490: "Each year Congress acts upon the matter. The TVA has been authorized—and not only authorized, but directed—to retain certain of its net earnings to be invested in other properties. Those, too, I may point out to the Senator, are amortized. So I come back to my original statement, that all the earnings of the TVA, not simply a part of them, as is the case with respect to taxes paid by private concerns, are the property of the United States Treasury."

Senator ANDERSON, page 10490, Senator GORE, page 10490:

"Mr. ANDERSON. * * * It seems to me that if profits accrue from the operation of the TVA, and Congress, instead of making new appropriations for new capital funds, directs that the moneys shall be used for expanding powerlines, or doing anything of that nature, that is just the same kind of utilization as if the money had been taken into the Treasury, and then a brandnew warrant had been issued by the Treasury to pay for the lines.

"The able Senator from Arkansas was a Member of Congress when I became a Member of it in 1941. He and I, and all the Members permitted the TVA to do exactly that.

"Mr. GORE. And not only permitted, but directed."

Senator HILL, page 10490: "The TVA cannot start one single new power facility, it cannot put $1 of its income or any other funds into any new power facility, except by and with the advice and direction of Congress."

Senator ANDERSON, page 10494: "I said it was a matter of significance. If there were to be profits from the operation, and if there were to be new dams and new facilities constructed, without congressional approval, that would be one thing. But actually it is merely a bookkeeping charge, because Congress has control of every dollar which comes into the TVA, and Congress can decide how much shall be used for plant improvement, and what amount shall go into the Treasury."

No wonder Senator BUSH said:

"The Senator from Connecticut did not authorize them."

EXCERPT FROM TITLE II OF THE GOVERNMENT CORPORATIONS APPROPRIATION ACT, 1948

Tennessee Valley Authority: Not later than June 30, 1948, and not later than June 30 of each calendar year thereafter, until a total of $348,239,240 has been paid as herein provided, the board of directors of the Tennessee Valley Authority shall pay from net income derived the immediately preceding fiscal year from power operations (such net income to be determined by deducting power operating expenses, allocated common expense, and interest on funded debt from total power operating revenues) not less than $2,500,000 of its outstanding bonded indebtedness to the Treasury of the United States exclusive of interest, and such a portion of the remainder of such net income into the Treasury of the United States as miscellaneous receipts as will, in the 10-year period ending June 30, 1958, and in each succeeding 10-year period until the aforesaid total of $348,239,240 shall have been paid, equal not less than a total of $87,059,810, including payment of bonded indebtedness exclusive of interest on such bonded indebtedness. Total payments of not less than $10,500,000 shall be made not later than June 30, 1948.

Amounts equal to the total of all appropriations herein and hereafter made to the Tennessee Valley Authority for power facilities shall be paid by the board of directors thereof, in addition to the total of $348,239,240 specified in the foregoing paragraph, to the Treasury of the United States as miscellaneous receipts, such payments to be amortized over a period of not to exceed 40 years after the year in which such facilities go into operation.

None of the power revenues of the Tennessee Valley Authority shall be used for the construction of new power producing projects (except for replacement purposes) unless and until approved by act of Congress.

EXCERPT FROM TVA ACT OF 1933 AS AMENDED

SEC. 26. Commencing July 1, 1936, the proceeds for each fiscal year derived by the Board from the sale of power or any other products manufactured by the Corporation, and from any other activities of the Corporation including the disposition of any real or personal property, shall be paid into the Treasury of the United States at the end of each calendar year, save and except such part of such proceeds as in the opinion of the Board shall be necessary for the Corporation in the operation of dams and reservoirs, in conducting its business in generating, transmitting, and distributing electric energy and in manufacturing, selling, and distributing fertilizer and fertilizer ingredients. A continuing fund of $1 million is also excepted from the requirements of this section and may be withheld by the Board to defray emergency expenses and to insure continuous operation: *Provided*, That nothing in this section shall be construed to prevent the use by the Board, after June 30, 1936, of proceeds accruing prior to July 1, 1936, for the payment of obligations lawfully incurred prior to such latter date.

REPLACEMENT

It is often said that the proposed contract does not constitute replacement power for the Atomic Energy Commission.

The genesis of these negotiations was the President's budget message in which the following was said:

Arrangements are being made to reduce, by the fall of 1957, existing commitments of the Tennessee Valley Authority to the Atomic Energy Commission by 500,000 to 600,000 kilowatts.

The proposal of the Dixon-Yates group itself says:

"In response to the suggestion in the President's budget message that the power industry might furnish 500,000 to 600,000 kilowatts to your Commission by the fall of 1957, Middle South Utilities, Inc., and the Southern Co. submitted a proposal to you under date of February 25, 1954. It was our understanding of the budget message that this power was desired in order to reduce the commitments of Tennessee Valley Authority to your Commission for service at Paducah, with a resultant reduction in the amount of capital expenditures which would have to be budgeted for TVA. Our proposal was designed to accomplish that purpose."

The letter from the Bureau of the Budget, dated June 16, addressed to the Chairman of the Atomic Energy Commission, says this:

"Moreover, this proposal will reduce the magnitude of necessary adjustments in the TVA system which would result in the event of a reduction or termination of AEC operations in the future." Also, "He [the President] has also requested me to instruct the Commission and the Tennessee Valley Authority to work out necessary contractual, operational, and administrative arrangements between the two agencies so that operations under the contract between AEC and the sponsors will be carried on in the most economical and efficient manner from the standpoint of the Government as a whole."

In a letter dated June 16, addressed to the chairman of the Appropriations Committee of the Senate, Senator SALTONSTALL, we find the following passage:

"In exploring ways to obtain the additional capacity, consideration of the problems involved in furthering concentration of additional capacity in the Paducah area indicated that the most economical method for accomplishing the objectives stated in the budget message would be to provide additional capacity in the Memphis area. Accordingly proposals were received on the basis that TVA would continue to deliver power to AEC at Paducah where it is needed by AEC, but

would receive in substitution power purchased by AEC from private sources in the Memphis area where power is needed by TVA. This method would avoid a further concentration of generating capacity in the Paducah area."

The Bureau of the Budget's letter to the TVA on this subject contains the statement that the President "also requested that instructions be given the Tennessee Valley Authority and the Atomic Energy Commission to work out the necessary contractual, operational, and administrative arrangements between the two agencies so that operations under the contract between AEC and the sponsors will be carried on in the most economical and efficient manner from the standpoint of the Government as a whole."

Very clearly it is contemplated that the proposal is, as the President said, designed to reduce the existing commitments of the TVA to the Atomic Energy Commission. Therefore, it is a substitute for power furnished by the TVA to the AEC.

It is in accordance with the practice of the TVA in supplying power to the Atomic Energy Commission by feeding it into the TVA system at points which may be remote from the actual site of the AEC installation.

ALLEGATION

The powerplant will not be a Government-owned plant, even though the Government will have paid for it over the life of the proposed 25-year contract.

ANSWER

The Government will not pay for the plant over the life of the proposed 25-year contract. Upon expiration of the contract in 25 years, 24.6 percent of the debt and all of the equity ($5,500,000) will still be outstanding and is the sole responsibility of the sponsors. The Government will have an option to extend its contract for an additional 10 years beyond the 25-year initial contract period. It is a one-way street whereby the Government has the sole right of cancellation any time and for any reason up to the 25th year and it alone thereafter has the option to renew the contract up to 35 years. For the last 5 years, if the Government elects to continue the contract, the price of power will be reduced to reflect the fact that all of the initial debt on the project will have been amortized. The sponsors cannot by any independent act of their own regain use of the plant facilities for 600,000 kilowatts at any time earlier than 35 years from the date the plant is completed. The right on the part of the Government to cancel this contract at any time and for any reason on 3 years' notice is an invaluable one. Obviously, an inherent right to use the plant for as long as 35 years if the facilities are useful to the Government with the alternate option of withdrawing from the contract on relatively short notice, completely refutes any argument that the Government is paying for anything other than that for which full value is received.

THE DIXON-YATES GROUP ACCEPT THE MAJOR RISKS

Attempts have been made to indicate that excessive profits were to be realized by the Dixon-Yates group on a modest capital investment and that no risks were involved. In a memorandum of July 9, 1954, prepared by the Bureau of the Budget and subsequently introduced into the CONGRESSIONAL RECORD at pages 10381 et seq., we find the following (p. 10383):

"There are several significant considerations in connection with this proposal:

"1. By utilizing private utilities, the Federal Government will save a capital outlay of at least $100 million over the next 3 years, the cost estimated by TVA for the construction of equivalent capacity at the Fulton site.

"2. The sponsors' proposal is a firm offer with a stated maximum capital cost reflected in the demand charge whereby a ceiling is placed on maximum liability on capital cost to the Government. The sponsors bear one-half of any possible increased cost from an estimated cost of $107,250,000 to $117 million and all the cost above $117 million. In addition, if the plant is built for less than $107,250,000 the Government will share 50 percent of the saving." (The reference here, as I shall point out later, is to additional costs of servicing the additional capital, insurance, etc. This amounts to $58,000 per annum for each $1 million by which construction costs vary up or down from the $107,250,000 estimate. Such annual additional costs or savings within the limits set forth on the "up" side and without limit on the "down" side are shared equally by the sponsors and the Government.)

"3. There is no guaranty as to the ultimate capital cost of a TVA plant even though that agency has had a favorable construction record in recent years." (Once the Government (TVA) embarks on construction of a powerplant it will be completed no matter what construction costs turn out to be in actuality—and the Government has that money invested without recourse from now on.)

"4. The proposal provides a guaranty and a real incentive on the part of the sponsors to assure that capital costs do not exceed $107,250,000. Thus, if the cost should go to $117 million, the return on $5,500,000 of equity capital would be reduced from 9 percent ($495,000) to 3.8 percent ($210,000). If the capital cost should exceed $117 million, return on equity capital would rapidly reduce to zero. Thus, the sponsors have a real risk under the proposal offered and a compelling reason to keep capital costs below the estimated cost of $107,250,000.

"5. In addition, the plant is not completely amortized at the end of the 25-year contract. There is 24.6 percent of the debt not retired at the end of 25 years so the rate under the proposal does not provide for completely amortizing the plant over the 25-year period." (I don't know why the Budget Bureau failed to point this out because it is significant—the sponsors—at the end of 25 years will also have all of their equity still tied up in this project.)

"6. Acceptance of the proposal will help spread the risk in the event of future reduction in the AEC power requirements, which will in 1957 amount to about 30 percent of the TVA power supply."

Special attention is directed to items 2 and 4. Senator ANDERSON during his debate on the afternoon of July 14, 1954 made the statement that if construction costs exceeded the estimate of $107,250,000 the Government would put up half of the additional capital costs to a ceiling of $117 million. In other words, on an increase of $9,750,000 he indicated that the Government would put up $4,375,000 of capital and the sponsors would put up a like amount (CONGRESSIONAL RECORD, p. 10506.) This is not so. The Government will not put up one dime of capital funds. Its maximum exposure in the event that construction costs exceed $107,250,000 is limited to an amount of $285,000 per annum, or a potential increase in the power bill of less than 1½ percent.

As indicated in Item 4 above, the so-called profit to the Dixon-Yates group will be 9 percent on the equity capital of $5,500,000 and this will be realized only if construction costs do not exceed $107,250,000. Whereas utility companies generally are permitted a return of about 6 percent on the total capital invested, this enterprise, if all goes well, will yield the sponsors about 3.78 percent.[1] The money to be borrowed (about 95 percent of construction costs) is being borrowed on the credit of Middle South Utilities and The Southern Co. as well as on the basis of the Government contract. Since the contract is cancelable on 3 years' notice, it is obvious that complete reliance cannot be given by the lenders to such contract as primary security for their loan. Furthermore, the total debt will be amortized over a 30-year period after completion of the plant. Twenty-four and six-tenths percent of the debt and all of the equity (5 percent of the capital) will still be outstanding and is the sole responsibility of the sponsors upon expiration of the contract in 25 years.

The Government will have an option to extend its contract for an additional 10 years beyond the 25-year initial contract period. It is a one-way street whereby the Government has the sole right of cancellation any time and for any reason up to the 25th year and it alone thereafter has the option to renew the contract up to 35 years. For the last 5 years, if the Government elects to continue the contract, the price of power will be reduced to reflect the fact that all of the initial debt on the project will have been amortized—certainly as advantageous as if the Government actually owned the plant. The sponsors cannot by any independent act of their own regain use of the plant facilities for 600,000 kilowatts at any time earlier than 35 years from the date the plant is completed.

It should be noted from the attached excerpt from the AEC-TVA Paducah Power contract, March 26, 1953, that under such contract the AEC is far less free to cancel the contract and does not have the sole option to extend the contract beyond an initial term of 11½ years. The attached excerpt from the AEC-TVA contract dealing with conditions under which the contract may not be renegotiated is quite illuminating.

EXCERPT FROM AEC-TVA PADUCAH POWER CONTRACT, MARCH 26, 1953

1. Term of contract: The provisions of this agreement shall become effective as of July 1, 1954, and said Letter Contract of August 23, 1951, is hereby terminated as of July 1, 1954. This agreement shall continue in effect for an initial term expiring on January 1, 1966. Unless this agreement is canceled by Commission as provided for below, then on January 1, 1966, and on each January 1 thereafter through January 1, 1977, the term of this agreement shall be extended automatically for an additional year unless either party notifies the other that such extension shall not be effected, such notice to be delivered not less than 5 years prior to the date on which such extension would otherwise be effected. It is the intent of the parties that no such notice shall be delivered for the purpose of seeking a change in rates or other conditions because more attractive markets for power or more attractive sources of power may develop.

This agreement may be terminated by Commission, effective on any date not earlier than September 30, nor later than November 30, of any year during the initial term or its extension, upon not less than 51 months' advance written notice to the Authority, accompanied by a statement of Commission's intent to reduce permanently below 1,500,000 watts its total use of power at the Paducah project.

---

[1] $5,500,000 equity (5 percent) at 9 percent equals $495,000; $101,750,000 debt (95 percent) at 3½ percent equals $3,561,260; $107,250,000 total capital earns $4,056,250, equal to 3.78 percent.

Unless otherwise agreed, the contract demand hereunder shall be reduced to 500,000 watts for the last 12-month period to any termination or expiration of this agreement, and to 800,000 watts for the 12-month period immediately preceding said 12-month period.

TAXES

Opponents of the proposed power contract have made every effort to confuse the issue by insinuating that there was something sinister or improper in the proposed treatment of taxes. There is nothing improper with respect to the suggested tax treatment nor is there anything unusual unless it be the great efforts made to insure that the price for power would include an amount equivalent to the tax burden and not one penny more.

To view this matter in its proper perspective, let's start in the beginning. There is to be a new company formed for the purpose of carrying out the proposed contract. It will have just one customer, the Atomic Energy Commission. It will have no source of income except from the sale of power to that one customer. It is an accepted fact that taxes represent a portion of the expense of doing business. Every product that the Atomic Energy Commission buys, be it paper clips, trucks, or uranium, has an element in its price to fully protect the manufacturer against all taxes identified with its business—State, local, and Federal. The sponsors of the so-called Dixon-Yates proposal had two alternatives: One was to include a sufficient amount in their price for power to cover all taxes at whatever rates they might be for the next 25 years. This course obviously would have resulted in setting a higher price sufficient to include all estimated taxes during the contract period. The second alternative was the one selected—a fair and decent method whereby the price for power would include an amount sufficient to pay whatever taxes may be levied and not one penny more.

There has been some alarm expressed because of the legal technicalities involved in reimbursing for taxes. The word "reimbursing" does not appear in the proposal and even if it did that would be unimportant as the proposal is merely to set forth an outline of objectives to be covered finally in a legally acceptable contract. This is what the proposal says about taxes:

"It is understood that the buyer will pay such additional amounts for capacity and energy as will result, after the payment by seller of Federal, State, and local taxes, licenses, fees, and other charges in the seller having net operating revenue (as such term is defined or derived under the presently applicable Federal Power Commission Uniform System of Accounts) in the same amount as seller would have had if seller were not liable for any taxes, licenses, fees, and other charges."

Another misconception or misinterpretation. The attempt has been made to indicate that the Goverment is to continue to pay an amount equivalent to the tax liability of the new company even after cancellation becomes effective and facilities may be operated for the benefit of sponsors. This is just not so. The proposal specifically provides that to the extent that the initial facilities (the new steam electric generating station and related facilities to be constructed by the seller) are used for purposes other than the supply of capacity and energy to or for buyer (AEC) and seller derives income therefrom and incurs tax liabilities as a result thereof, such tax liabilities shall be discharged at the sole cost and expense of seller. Can anything be clearer than that?

It is of more than passing interest that the TVA included a similar provision for reimbursement of taxes in its contract with AEC. That contract takes note of the fact that TVA currently is exempt from taxes on the sale of power to a Government agency but carefully provides that should circumstances change and the TVA be required to pay taxes like other public utilities it shall then look to AEC to pay additional charges equivalent to such taxes. An excerpt of this contract provision is set forth below:

"In the event that Authority is required by any law enacted after January 1, 1953, to pay any amounts for or in lieu of taxes which it would not have been required to pay except for the supply of power hereunder, including without limitation any payments resulting from Authority's ownership or operation of steam electric generating and other facilities required for such supply of power, Commission will reimburse Authority for such payments. Authority will confer with Commission before making any payment for which it would be entitled to such reimbursement in whole or in part."

Mr. FULBRIGHT. I also ask unanimous consent to have printed in the RECORD at this point as a part of my remarks several telegrams, together with a resolution by the board of directors of the Memphis Chamber of Commerce with regard to the establishment of a steam generating plant at West Memphis, Ark., a question which has also been discussed on the floor of the Senate.

There being no objection, the telegrams and resolution were ordered to be printed in the RECORD, as follows:

MEMPHIS, TENN., *July 20, 1954.*

Senator J. WILLIAM FULBRIGHT,
Senate Office Building,
Washington, D. C.:

For your information the following men are members of the Memphis Chamber of Commerce board of directors who passed the resolution endorsing the West Memphis steam plant. They are the men at whom Mr. GORE's remarks were cast yesterday. They represent a true cross section of Memphis business and industry and of American free enterprise:

R. W. Kirn, vice president, the Quaker Oats Co.; E. B. Lemaster, vice president, Edward Lemaster Realty Co.; H. B. Solmson, vice president, Plough, Inc.; R. A. (Dick) Tripper, vice president, Euclid-Memphis Sales, Inc.; Blanchard S. Tual, vice president, Tual and Morgan, attorneys; Walker L. Wellford, Jr., vice president, J. E. Dilworth, Co.; W. B. Pollard, treasurer, National Bank of Commerce, Memphis; Frank M. Grout, president, Colonial Baking Co.; Clifford Penland, executive vice president, Memphis Chamber of Commerce; George E. Berg, branch manager, the Kroger Co.; James J. Corbitt, president, Corbitt Motor Co.; Carl Carson, vice president, Dixie Drive-It-Yourself System; C. H. Cowan, president, Memphis Machinery & Supply Co.; William W. Farris, Farris and McKinney, attorneys; Richard D. Fuller, president, Fuller Alinement Service; Ray B. Gill, president, Inter City Trucking Co.; Richard G. Holladay, president, Marx and Bensdorf, Inc.; Virgyl D. Johnson, immediate past president, Memphis Junior Chamber of Commerce; Forrest Ladd, executive vice president, John A. Denie's Sons Co.; Lee McCourt, chairman of board, Fischer Lime & Cement Co., Fischer Steel Corp.; Clyde L. Patton, Patton Bros., cotton brokers; and Col. Roane Waring, president, Memphis Street Railway Co., and chamber president.

RESOLUTION BY THE MEMPHIS CHAMBER OF COMMERCE BOARD OF DIRECTORS IN REGARD TO ESTABLISHMENT OF STEAM GENERATING PLANT AT WEST MEMPHIS, ARK.

Whereas the details of the existing controversy as to the location of a steam generating plant in West Memphis, Ark., have been presented to the board of directors of the Memphis Chamber of Commerce by its industrial department in the following words, to wit:

"To the Board of Directors, Memphis Chamber of Commerce:

"The industrial department of the chamber of commerce is deeply concerned over the existing controversy as to the location of the steam generating plant in West Memphis.

"It is concerned, first, over the urgent need for the location of such a plant, either at Memphis, or in the near vicinity, in order that Memphis may be assured of adequate power supply for its future development. This apprehension is based upon the statement of Major Allen, of the Memphis Light, Gas, and Water Division, to the board of directors of the chamber of commerce, that at the present rate, and without the building of the Fulton Steam Plant, Memphis would suffer a shortage of power in 1957, and that, therefore, every effort should be made upon the part of Memphians to aid and assist in bringing about the construction by TVA of the powerplant at Fulton, Tenn.

"Now it is certain that the Fulton plant will not be constructed. Four times the Congress of the United States has refused TVA to appropriate the money necessary to construct the Fulton plant. Without this plant, according to the opinion expressed to your board of directors by Major Allen, Memphis will face a power famine in 1957. This must not occur.

"It is the hope and belief of all Memphians that Memphis will continue to grow. Millions of dollars have been spent in the preparation of Presidents Island for industrial development. Other industrial sites are spotted in various places in our city waiting for development. Without power, these developments cannot be made. This is the primary reason that impels your industrial department to favor the construction of the West Memphis powerplant, unless its construction will be detrimental and deleterious to the health, life, and prosperity of the city of Memphis, which is basically an engineering problem.

"We are concerned for a second reason. Memphis is vitally interested in the growth and development of its trade territory. Anything that benefits our communities, in turn benefits the city of Memphis. The people of West Memphis will be greatly benefited by the construction of this large plant immediately adjacent to their splendid city. They are vitally interested in this development.

"We are concerned and interested for a third reason, and that is because the building of this plant and its operation will be very beneficial to the city of Memphis, to West Memphis and the surrounding territory. Its construction will entail the payment of an estimated $21 million for labor and many millions more for materials. Much of this money will find its way into the trade channels of Memphis. Its construction will entail the employment of 2,500 employees, most of whom will come from our midst. When completed, its operation will add an annual payroll of a million dollars to Memphis and to West Memphis.

"One argument that is being used against the location of the powerplant in West Memphis, 8 miles below Memphis, is that the smoke from that plant will deposit ashes on the city of Memphis. No competent engineering study has been made yet that affirms it.

"The fact of the business is, that the great majority of our American cities today, including New York, Chicago, Philadelphia, Boston, Detroit, St. Louis, and Cleveland, all generate their power by coal, and many of their powerhouses are in the immediate vicinity of the uptown portions of their city.

"The chamber of commerce is here for the purpose of aiding and abetting in the development and growth, especially commercially and industrially, of the city of Memphis and its surrounding territory. We are fighting every day to bring new industries into Memphis, and, yet, we are told that in 1957 our efforts must cease unless additional power is made available.

"The industrial department is deeply concerned over a statement from Washington, D. C., made recently by the administration to the effect that the Fulton steam plant wasn't going to be approved, and if the West Memphis plant were not constructed, Memphis would be out of the picture for any additional power unless the city decides to build its own steam plant.

"The industrial department feels that its obligation is to promote and encourage all things for the good of the entire mid-South area. Any other policy would be shortsighted upon the part of our community.

"We believe this project is of such magnitude and public interest that the chamber's board of directors should take a positive public stand in the matter.

"Let us remind you that the smokestacks that are detrimental to our city, and to the mid-South, are those that are empty and their boilers cold, not the stacks that are in operation"; and

Whereas the matter has been thoroughly discussed by this board: therefore be it

Resolved, That we, the board of directors of the Memphis Chamber of Commerce, hereby endorse and ratify the statement by the said industrial department and accept same as the opinion of this board; be it further

Resolved, That this board favors the construction of the present proposed steam generating plant in West Memphis, Ark., to insure adequate power for future industrial development of the city of Memphis and its surrounding territory; be it further

Resolved, That the executive vice president of the Memphis Chamber of Commerce forward copies of this resolution to the President of the United States, members of the Atomic Energy Commission, members of the Federal Power Commission, the Bureau of the Budget, members of the delegations to the Congress from the States of Arkansas and Tennessee, the Industrial Council of the West Memphis Chamber of Commerce and the public press.

This 16th day of July 1954.

BOARD OF DIRECTORS, MEMPHIS CHAMBER OF COMMERCE.

I certify that the foregoing is a correct copy of a resolution passed by the board of directors of the Memphis Chamber of Commerce at a meeting held in the office of the Chamber of Commerce on this 16th day of July 1954.

CLIFFORD PENLAND,
Executive Vice President.

Mr. KNOWLAND. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Cordon	Green
Anderson	Crippa	Hayden
Barrett	Daniel	Hendrickson
Beall	Dirksen	Hennings
Bennett	Douglas	Hickenlooper
Bowring	Duff	Hill
Bricker	Dworshak	Holland
Bridges	Eastland	Humphrey
Burke	Ellender	Ives
Bush	Ervin	Jackson
Butler	Ferguson	Jenner
Byrd	Flanders	Johnson, Colo.
Capehart	Frear	Johnson, Tex.
Carlson	Fulbright	Johnston, S. C.
Case	George	Kefauver
Clements	Gillette	Kennedy
Cooper	Gore	Kerr
Kilgore	Millikin	Schoeppel
Knowland	Monroney	Smathers
Kuchel	Morse	Smith, Maine
Langer	Mundt	Smith, N. J.
Lehman	Murray	Sparkman
Lennon	Neely	Stennis
Long	Pastore	Symington
Magnuson	Payne	Thye
Malone	Potter	Upton
Mansfield	Purtell	Watkins
Martin	Reynolds	Welker
Maybank	Robertson	Wiley
McCarran	Russell	Williams
McCarthy	Saltonstall	Young

The PRESIDING OFFICER. A quorum is present.

Mr. CASE. Mr. President, if I am not interrupted, I shall speak for less than 5 minutes. I do not wish to miss this opportunity to correct an impression which I think exists among many of the rural electric associations throughout the country.

I think the offering of the substitute amendment by the Senator from New Mexico [Mr. ANDERSON] has served a very useful purpose. It has resulted in bringing on the Ferguson amendment, which would establish clearly in the law legal authority for the Atomic Energy Commission to enter into contracts for the procurement of power.

It has also brought on the Ervin amendment, or the modification suggested by the Senator from North Carolina, which provides that the Joint Committee on Atomic Energy shall have an opportunity to take a look at such contract; and presumably if the contracts were improper, steps would be taken to prevent their execution.

As the Senator from Michigan has said, the difference between the Ferguson amendment and the Anderson substitute is that the Ferguson amendment would make it legal to obtain power for the Atomic Energy Commission by a replacement contract, while the Anderson substitute would place a prohibition on the power of the Atomic Energy Commission to do so.

The rural electrification cooperatives of the country, and particularly those in South Dakota, have been told that they have something at stake in this amendment. They do have something at stake, Mr. President, but it is the reverse of what they have been told. It is the reverse of what they have been told, because six of the REA's in my State are today getting their power under a replacement contract. A three-way contract has been devised, whereby the REA's in my State get power which is produced, in effect, at Fort Peck, Mont., 300 miles away, and transmitted to them by the Montana-Dakota Utilities Co., a private utility.

This replacement power which the Montana-Dakota Utilities Co. gets in Montana and then delivers to the REA's in my State and to eight REA's in North Dakota is power which is produced by steam plants fed by lignite coal.

I shall oppose the Anderson amendment and vote against it because I do not want the precedent established that public bodies cannot get power by replacement. The Atomic Energy Commission is a public body. It ought to have the right to get power produced by the TVA. It ought to have the same right we have contended the REA's should have, namely, the right to get power produced at some distant point, if it can be produced more cheaply, and transported to the agency which can supply the power near at home.

Before this contract was worked out, REA's in my State were paying from 12 to 14 mills for power. By reason of their ability to get replacement power they are able to get power for 4.8 mills to 5.5 mills.

Mr. President, it is rather ironical that a campaign has been launched which has made some REA's in my State think their stake is the reverse of what it is.

Among the REA's which are served by replacement contracts in my State are the Cam-Wal Electric Cooperative, Inc., which serves Campbell and Walworth Counties, where the president of my State REA association lives. He and his associates get their power through a replacement contract. Another REA that gets replacement power is the Central Electric Cooperative, with headquarters at Blunt. Another is the Moreau-Grand Electric Cooperative, with headquarters at Timber Lake. Also the Grand Electric Cooperative, with headquarters at Bison. Also the Northern Electric Cooperative, with headquarters at Aberdeen.

Eight cooperatives in the State of North Dakota get their power by replacement contracts. These REA's get preference which has been established by a preference clause. I do not want now, by legislation through the Anderson amendment, to say to public bodies that they cannot get their power unless it is produced and delivered directly to them by the producer. I want them to have the right to get it through replacement contracts, if by doing so they can get cheaper electricity, or get the benefits of production which they could not get if the source of production for supplying additional power happens to be some distance away.

I believe that the debate on the Anderson amendment has produced a good result in that it has brought forth the Ferguson amendment, as modified by the suggestion of the Senator from North Carolina [Mr. ERVIN]. However, having produced that good result, I hope it will not be compromised or nullified by the adoption of the first part of the Anderson amendment. I urge the rejection of the Anderson amendment.

SEVERAL SENATORS. Vote! Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment, as modified, of the Senator from Michigan [Mr. FERGUSON].

The yeas and nays have been ordered, and the Secretary will call the roll.

Mr. McCARRAN. Mr. President, will the Chair state the question?

The PRESIDING OFFICER (Mr. PURTELL in the chair). The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from New Mexico [Mr. ANDERSON] to the amendment, as modified, offered by the Senator from Michigan [Mr. FERGUSON].

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MAYBANK (when his name was called). On this vote I have a pair with the Senator from Arkansas [Mr. McCLELLAN], who is necessarily absent. If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I withhold my vote.

Mr. YOUNG (when his name was called). On this vote I have a pair with the junior Senator from Arizona [Mr. GOLDWATER]. If he were present and voting he would vote "nay." If I were permitted to vote, I would vote "yea." I withhold my vote.

The rollcall was concluded.

Mr. SALTONSTALL. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CLEMENTS. I announce that the Senator from New Mexico [Mr. CHAVEZ] is necessarily absent, and if present would vote "yea."

The result was announced—yeas 36, nays 55, as follows:

YEAS—36

Anderson	Hennings	Lehman
Burke	Hill	Magnuson
Clements	Humphrey	Mansfield
Cooper	Jackson	Monroney
Daniel	Johnson, Colo.	Morse
Douglas	Johnson, Tex.	Murray
Eastland	Johnston, S. C.	Neely
George	Kefauver	Pastore
Gillette	Kennedy	Russell
Gore	Kerr	Sparkman
Green	Kilgore	Stennis
Hayden	Langer	Symington

NAYS—55

Aiken	Ervin	Mundt
Barrett	Ferguson	Payne
Beall	Flanders	Potter
Bennett	Frear	Purtell
Bowring	Fulbright	Reynolds
Bricker	Hendrickson	Robertson
Bridges	Hickenlooper	Saltonstall
Bush	Holland	Schoeppel
Butler	Ives	Smathers
Byrd	Jenner	Smith, Maine
Capehart	Knowland	Smith, N. J.
Carlson	Kuchel	Thye
Case	Lennon	Upton
Cordon	Long	Watkins
Crippa	Malone	Welker
Dirksen	Martin	Wiley
Duff	McCarran	Williams
Dworshak	McCarthy	
Ellender	Millikin	

NOT VOTING—5

Chavez	Maybank	Young
Goldwater	McClellan	

So Mr. ANDERSON's amendment to Mr. FERGUSON's amendment, as modified, was rejected.

Mr. FERGUSON. Mr. President, I move that the Senate reconsider the vote by which the Anderson amendment was just rejected.

Mr. KNOWLAND. Mr. President, I move to lay on the table the motion of the Senator from Michigan.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California [Mr. KNOWLAND] to lay on the table the motion of the Senator from Michigan [Mr. FERGUSON].

The motion was agreed to.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment offered by the Senator from Michigan [Mr. FERGUSON], as modified.

Mr. GORE and other Senators requested the yeas and nays.

The yeas and nays were not ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Michigan [Mr. FERGUSON], as modified. [Putting the question.] The "ayes" have it, and the amendment is agreed to.

Mr. FERGUSON. Mr. President, I move that the Senate reconsider the vote by which my amendment was agreed to.

Mr. KNOWLAND. Mr. President, I move to lay on the table the motion of the Senator from Michigan.

Mr. GORE and other Senators requested the yeas and nays.

The PRESIDING OFFICER. There is a sufficient second. The yeas and nays are ordered, and the clerk will call the roll.

Mr. BUSH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUSH. Mr. President, what is the question?

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California to lay on the table the motion of the Senator from Michigan [Mr. FERGUSON] to reconsider the vote by which the amendment offered by the Senator from Michigan was agreed.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MAYBANK (when his name was called). On this vote I have a pair with the distinguished Senator from Arkansas [Mr. McCLELLAN], who is necessarily absent. If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. YOUNG (when his name was called). On this vote I have a pair with the junior Senator from Arizona [Mr. GOLDWATER]. If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

The rollcall was concluded.

Mr. SALTONSTALL. I announce that the Senator from Arizona [Mr. GOLDWATER] is necessarily absent.

Mr. CLEMENTS. I announce that the Senator from New Mexico [Mr. CHAVEZ] is necessarily absent, and if present would vote "nay."

The result was announced—yeas 56, nays 35, as follows:

YEAS—56

Aiken	Ellender	Mundt
Barrett	Ervin	Pastore
Beall	Ferguson	Payne
Bennett	Flanders	Potter
Bowring	Frear	Purtell
Bricker	Fulbright	Reynolds
Bridges	Hendrickson	Robertson
Bush	Hickenlooper	Saltonstall
Butler	Holland	Schoeppel
Byrd	Ives	Smathers
Capehart	Jenner	Smith, Maine
Carlson	Knowland	Smith, N. J.
Case	Kuchel	Thye
Cordon	Lennon	Upton
Crippa	Malone	Watkins
Daniel	Martin	Welker
Dirksen	McCarran	Wiley
Duff	McCarthy	Williams
Dworshak	Millikin	

NAYS—35

Anderson	Douglas	Gore
Burke	Eastland	Green
Clements	George	Hayden
Cooper	Gillette	Hennings
Hill	Kerr	Morse
Humphrey	Kilgore	Murray
Jackson	Langer	Neely
Johnson, Colo.	Lehman	Russell
Johnson, Tex.	Long	Sparkman
Johnston, S. C.	Magnuson	Stennis
Kefauver	Mansfield	Symington
Kennedy	Monroney	

NOT VOTING—5

Chavez	Maybank	Young
Goldwater	McClellan	

So Mr. KNOWLAND's motion to lay on the table the motion of Mr. FERGUSON was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. JOHNSON of Colorado. Mr. President, for myself and on behalf of the Senator from Iowa [Mr. GILLETTE], I call up amendment 7-16-54-C and ask that it be stated.

The PRESIDING OFFICER. The amendment offered by the Senator from Colorado [Mr. JOHNSON], for himself and the Senator from Iowa [Mr. GILLETTE], will be stated.

The CHIEF CLERK. On page 23, between lines 12 and 13, it is proposed to insert a new section, as follows:

SEC. 45. Electric power production:

a. The Commission is empowered to produce or provide for the production of electric power and other useful forms of energy derived from nuclear fission in its own facilities or in the facilities of other Federal agencies. In the case of energy other than electric power produced by the Commission, such energy may be used by the Commission, or transferred to other Government agencies, or sold to other users at reasonable and nondiscriminatory prices. Electric power not used in the Commission's own operations shall be delivered to the Secretary of the Interior, who shall transmit and dispose of such power in accord with the provisions of section 5 of the Flood Control Act of 1944.

b. The Commission may undertake any or all of the functions provided in subsection 45 a., through other Federal agencies authorized by law to engage in the production, marketing, or distribution of electric energy for use by the public, and such agencies are hereby empowered to undertake the design, construction, and operation of nuclear power facilities and the disposition of electric energy produced in such facilities when funds therefor have been appropriated by Congress. Nothing in this act shall preclude any Federal agency now or hereafter authorized by law to engage in the production, marketing, or distribution of electric energy from obtaining a license under section 103 of this act for the construction and operation of facilities for the production and utilization of special nuclear material or atomic energy for the primary purpose of producing electric energy for disposition for ultimate public consumption.

On page 102, line 7, before the period, insert the following: "(other than for such acquisition, condemnation, construction, or expansion as may be undertaken under the authority of section 45 a. of this act)."

The PRESIDING OFFICER. Does the Senator from Colorado desire to have his amendments considered en bloc?

Mr. JOHNSON of Colorado. Yes; I ask that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments offered by the Senator from Colorado, for himself and the Senator from Iowa will be considered en bloc.

Mr. HICKENLOOPER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Iowa will state it.

Mr. HICKENLOOPER. Do I understand that the Senator from Colorado is submitting the three amendments en bloc?

Mr. JOHNSON of Colorado. Yes; they are all part of the same amendment. It is necessary, in accordance with the parliamentary situation, and under the language of the bill, to submit an amendment to each of three different provisions of the bill: The authorization provision itself, the licensing provision, and the appropriation provision. That is why there are three parts to the amendment. But they all pertain to the same subject, and they are all a part of the same proposal.

Under the amendment, the Atomic Energy Commission is empowered—and that means it is permitted, of course—to do what the amendments provide. This amendment is permissive; it is not directive. The Atomic Energy Commission, which is the greatest user of electric energy in the whole United States, is charged with the responsibility of handling and developing the great new source of power—atomic energy—and yet, under the bill which is now before the Senate, the Commission, which has been given this great responsibility and this tremendous task, would not have the authority to produce its own electric energy. My amendment would give it that authority. The Commission could produce its own electric energy, provided, of course, the Congress appropriated the money for that specific purpose.

If the Commission should produce more electric energy than the Commission needed or was going to use for its own purposes, temporarily or otherwise, it could sell the surplus electric energy, but under the provisions of the amendment it would have to sell it through the Secretary of the Interior. The Secretary of the Interior would sell it and distribute it under a provision which the Congress adopted in the Flood Control Act.

After the electric energy was turned over to the Secretary of the Interior, the Secretary could dispose of it only in accord with a principle and a formula which the Congress has already adopted as a standard for the handling of electric energy. That principle and formula are contained in section 5 of the Flood Control Act of 1944, in the well-known preference clause. Since it is rather brief, I shall read into the RECORD section 5 of the Flood Control Act of 1944:

Electric power and energy generated at reservoir projects under the control of the War Department and in the opinion of the Secretary of War not required in the operation of such projects shall be delivered to the Secretary of the Interior, who shall transmit and dispose of such power and energy in such manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles, the rate schedules to become effective upon confirmation and approval by the Federal Power Commission. Rate schedules shall be drawn having regard to the recovery (upon the basis of the application of such rate schedules to the capacity of the electric facilities of the projects) of the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power over a reasonable period of years. Preference in the sale of such power and energy shall be given to public bodies and cooperatives. The Secretary of the Interior is authorized, from funds to be appropriated by the Congress, to construct or acquire, by purchase or other agreement, only such transmission lines and related facilities as may be necessary in order to make the power and energy generated at said projects available in wholesale quantities for sale on fair and reasonable terms and conditions to facilities owned by the Federal Government, public bodies, cooperatives, and privately owned companies. All moneys received from such sales shall be deposited in the Treasury of the United States as miscellaneous receipts.

I have just read section 5. My amendment would adopt the formula prescribed in section 5 of the Flood Control Act for the disposition of whatever electric energy the Secretary of the Interior might sell from that source.

As I have said, Mr. President, the Atomic Energy Commission is the greatest user of electric energy in the United States. It would seem strange indeed if we should enact legislation which would not permit that Commission to produce its own power, if it should find it feasible and necessary to do so.

The mere fact that such a provision was in the law, Mr. President, I am sure would give the Atomic Energy Commission greater bargaining power when it went into the market and attempted to buy electric energy which it might need. Even though the authority which would be given to the Atomic Energy Commission might not actually result in plants being built, the mere fact that it would be a club behind the door should be helpful in enabling the Atomic Energy Commission to secure favorable rates, or at least rates which would be reasonable and fair.

Mr. PASTORE. Mr. President, will the Senator from Colorado yield for a question?

Mr. JOHNSON of Colorado. I yield to the Senator from Rhode Island.

Mr. PASTORE. It was brought out at the hearings, that as of January 1, 1954, the highest typical residential electric rate in the United States for 250 kilowatt-hours was $9.51, a rate prevailing in Boston, Brookline, Newton, and Somerville, Mass. That rate contrasted with the 5 low residential rates of $3.20 at Tacoma, Wash.; $4.40 at Seattle, Wash.; and $4.61 at Spokane, Wash.

That being the case, does not the Senator feel that his amendment, while it carries out the philosophy of the original Federal Power Act insofar as public power is concerned, nevertheless does not reach to the problem of reducing the rates in the sections and areas of the country where the rates are now high?

Mr. JOHNSON of Colorado. It may very well be that the provision would not reach New England. It happens that at the present time there are no atomic energy plants in New England, because New England is so close to the seaboard that perhaps it was deemed not in the best interests of our security to have atomic energy plants in that location. Nevertheless, I do not think the Senator from Rhode Island can predict the future. If the Atomic Energy Commission should decide to build a plant and should be able to produce electric energy at, we will say, one-third the rate, on the average, that persons pay in New England, does not the Senator from Rhode Island believe that such a yardstick, such a measure, would have its effect, and that New England and other sections of the country which might be remote from an atomic energy installation would insist upon fair rates? Does not the Senator believe it would have that effect, or could have that effect?

Mr. PASTORE. No; I am compelled to answer the question in the negative, because, if I understand the amendment of the Senator from Colorado correctly, it is an authorization on the part of the AEC to build electric generating plants.

Mr. JOHNSON of Colorado. That is correct.

Mr. PASTORE. And provides that the AEC should build its plants in the parts of the country where the rates are already low. We would defeat the very purpose of the whole program.

Mr. JOHNSON of Colorado. The amendment does not say any such thing. The amendment does not say such a plant would have to be built at any certain place.

The other day, when we were discussing this point, I heard the Senator from Rhode Island say that he was in full sympathy with this proposal, and that he thought it was in the interest of the people that some such arrangement be made. But now he says it would not be in the interest of the people, because in the amendment there is no directive to build a plant in Rhode Island or elsewhere in New England.

If the Senator from Rhode Island wishes to have the law amended in that way—if he wishes to have a plant built in New England—he should offer such an amendment. This amendment does not provide for the location of any plant. The fact is that the Atomic Energy Commission itself uses, for its own purposes, more electric energy than is used in all of New England, including Rhode Island.

Is the Senator from Rhode Island going to deny the Atomic Energy Commission the right, if the rates for the power available to it are too high and beyond all reason, to build a plant somewhere else, where it is using electricity and needs the power?

Mr. PASTORE. The Senator from Colorado misunderstands my question. I asked whether the amendment constitutes authorization for the Atomic Energy Commission to build electric generating plants.

Mr. JOHNSON of Colorado. The amendment provides, in part:

SEC. 45. Electric power production:

a. The Commission is empowered to produce or provide for the production of electric power and other useful forms of energy derived from nuclear fission in its own facilities or in the facilities of other Federal agencies. In the case of energy other than electric power produced by the Commission, such energy may be used by the Commission, or transferred to other Government agencies, or sold to other users at reasonable and nondiscriminatory prices.

When the power is sold to private parties, the formula which Congress

adopted in 1944, for the disposition and disposal of electric energy, must be followed.

Mr. PASTORE. Mr. President, will the Senator from Colorado yield further to me?

The PRESIDING OFFICER (Mr. PAYNE in the chair). Does the Senator from Colorado yield further to the Senator from Rhode Island?

Mr. JOHNSON of Colorado. I yield. First, however, let me say that no provision of this amendment would prevent the building of a plant in Providence, Rhode Island.

Mr. PASTORE. Let us assume that a plant is built in Providence, R. I., and that surplus electricity is available from that plant. Under the amendment, to whom must that surplus electricity be sold?

Mr. JOHNSON of Colorado. It must be sold, first, to the Atomic Energy Commission; and if any is left over, it is to be turned over to the Secretary of the Interior—under the provisions of my amendment; and he must sell it in conformity with section 5 of the Flood Control Act of 1944.

Mr. PASTORE. Let us assume that the nearest public power establishment is 1,000 miles from Providence, R. I., and that the rates in Providence are high. Does the Senator from Colorado suggest by his amendment that the plant in Providence should ship the electricity 1,000 miles, to a place where the rates already are low, and thus deny that power to the people of Providence, where the rates are high?

Mr. JOHNSON of Colorado. No. I am not proposing such an outrageous and ridiculous thing at all, and the Senator from Rhode Island knows that I am not.

Mr. HUMPHREY. Mr. President, will the Senator from Colorado yield to me?

Mr. JOHNSON of Colorado. I yield.

Mr. HUMPHREY. Perhaps we can be of some help in connection with this matter. Section 182c of the pending bill is a provision for which the Senator from Rhode Island himself is responsible. That provision requires the Atomic Energy Commission to give preference, in connection with applications for commercial power facilities, to those located in high-cost-power areas of the United States. In other words, there is now written into this measure that provision, which specifies that special preference shall be given to applications from establishments in high-cost-power areas.

The amendment of the Senator from Colorado is not in conflict with that provision. His amendment merely provides that the Atomic Energy Commission can itself produce electric energy for its own purposes; and that if any energy is left over, the Commission then will be entitled to sell it commercially, but through the Secretary of the Interior.

Mr. JOHNSON of Colorado. Yes.

Mr. HUMPHREY. In other words, the Senator from Colorado in preparing the amendment was pretty much applying the rules of the Federal Power Act, which relates to the Bureau of Reclamation, an agency under the jurisdiction of the Secretary of the Interior. His amendment applies those rules across the board, in the case of this form of power. Is not that correct?

Mr. JOHNSON of Colorado. Yes.

Mr. PASTORE. Mr. President, will the Senator from Colorado yield to me at this point, so that I may ask a question of the Senator from Minnesota?

Mr. JOHNSON of Colorado. Yes, provided I do not thereby lose the floor. I ask unanimous consent for that purpose, Mr. President.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. PASTORE. Mr. President, I am trying to reach the essentials of the amendment of the Senator from Colorado. There are few if any such public power bodies in the New England area. That being the case, what I am trying to determine is this: The rates in New England are already high. For the areas serviced by the public power projects we are talking about now, the rates are already low, because of these large developments, which have been a great boon to the parts of the country near them; and all of us are in favor of that. But New England does not enjoy the benefit of the boon of TVA or of Boulder Dam. In New England we are compelled to pay higher rates.

Under the amendment of the Senator from Colorado, will such plants in New England be compelled to ship the power from New England, where the rates already are high, to public power bodies in areas where the rates already are low?

Mr. HUMPHREY. No.

Mr. PASTORE. Please explain why not.

Mr. HUMPHREY. Let me say, first, that I have an amendment similar to the amendment of the Senator from Colorado, and I should like to associate myself with the amendment of the Senator from Colorado. The amendment simply provides, first, that the Atomic Energy Commission shall not be denied the right to produce power for its own facilities.

Mr. PASTORE. I agree.

Mr. HUMPHREY. And, second, that if there is surplus power, it shall be disposed of through the agency of the Secretary of the Interior. In other words, once the Atomic Energy Commission has satisfied its own needs, then, under the amendment of the Senator from Colorado, the provision will be, in effect, "Now the Atomic Energy Commission will get out of the power business. It has satisfied its own needs; and if it now has extra power, it will turn it over to the Secretary of the Interior; and he can get acquainted with the New England States"—in other words, he can see that Rhode Island or Massachusetts get power, just as well as South Dakota, North Dakota, Wyoming, or Colorado get power.

So how would Rhode Island be excluded? The fact that Rhode Island may not have made the acquaintance of the Secretary of the Interior is no reason why Rhode Island should not proceed to meet him. [Laughter.]

Mr. PASTORE. As I understand the formula of the Federal Power Act, it is that once the Secretary of the Interior gets the power, he has to give it to public bodies.

Mr. HUMPHREY. That is to say, if it is within reasonable transmission distance.

Mr. PASTORE. But that is not in the law.

Mr. HUMPHREY. Reason is always in the law, I may say to the Senator from Rhode Island.

What the amendment of the Senator from Colorado really provides is a means of disposing of surplus power. Under the present act, as now drawn, there is no authority at all to sell the power commercially.

Mr. PASTORE. That is correct.

Mr. HUMPHREY. The amendment of the Senator from Colorado will plug two loopholes in the present act. First, the amendment will permit the Commission to provide power for its own facilities. Second, the amendment will allow the marketing of surplus power. That is all.

Let us assume there are no public-power facilities in Rhode Island. The Federal Power Act provides that if there are public power districts, they shall be given preference; but if there are none, the power will go to a private utility or to anyone else who wants the power.

Mr. JOHNSON of Colorado. That is exactly what is provided by section 5.

Mr. HUMPHREY. Yes; that is all there is to it.

Mr. PASTORE. In other words, as I now understand, in any area of the country where there is surplus electricity and where there are no public power bodies, and where the rates are high, under this formula the electricity can be sold to private consumers; is that correct?

Mr. HUMPHREY. Yes.

Mr. JOHNSON of Colorado. Of course.

Mr. PASTORE. And the power would not have to be transmitted perhaps 1,000 miles, to a public project, under the provisions of the amendment?

Mr. JOHNSON of Colorado. No; of course not.

Mr. HUMPHREY. Mr. President, let me refer to the Flood Control Act of 1944 and to the Federal Power Act. While containing a preference clause, that clause is not exclusive. It merely provides that if power is available, it shall go, first, to public bodies, municipalities, and cooperatives. But private utilities are getting big blocks of public power under the preference clause; and the fact that in Rhode Island there are no public power districts, does not mean that Rhode Island would be denied the right to get public power from the Secretary of the Interior. A public power district would have first claim on the power. However, in the case of Rhode Island, if there was no public power district there, then any company or other prospective customer could obtain the power. In this instance, there would be no first claim, and therefore any private utility could obtain it.

Mr. JOHNSON of Colorado. That is the way the language reads. Let me read 3 or 4 lines:

> In order to make the power and energy generated at such projects available in

wholesale quantities for sale on fair and reasonable terms and conditions to facilities owned by the Federal Government, public bodies, cooperatives, and privately owned companies.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. LEHMAN. It seems to me that the amendments offered by the distinguished Senator from Colorado are almost identical with amendments which I had prepared. Like the Senator from Minnesota, I am very happy indeed to associate myself with the Senator from Colorado. It seems to me that these amendments are entirely clear. The bill before us would completely prohibit the Government from producing, in its own facilities or in the facilities of other Federal agencies, electric power and other useful forms of energy derived from nuclear fission. That means, of course, that without an act of Congress, while we would have a perfect right to produce uranium and plutonium, the production of which is, of course, a part of the operations of the Atomic Energy Commission, we would have no right, under the terms of the bill before us, to use such uranium or plutonium in the production of power for general use.

As I understand the amendments—and I hope the distinguished Senator from Colorado will correct me if my interpretation is not correct—the Commission would be empowered specifically by law to produce or to provide for the production of electric power and other useful forms of energy derived from nuclear fission, in its own facilities or in the facilities of other Federal agencies. That would do away with the present prohibition in the bill now before us. I am just as much concerned with the situation in the State of New York as my distinguished colleage from Rhode Island is with the situation in his State.

As I understand, if the Federal Government should determine to set up a reactor in the State of New York for the production of nuclear energy, it could dispose of such nuclear energy to any public or municipal body, to the Power Authority of New York, or, if necessary, to private utility companies, at a price which it considered fair, and that would serve as a yardstick or comparison with the prices now charged by the Mohawk & Hudson Power Co. or other public utilities. However, the control would always remain in the Atomic Energy Commission for the making of rates and for giving preference to public bodies in the distribution.

Mr. JOHNSON of Colorado. The Secretary of the Interior would do the actual distribution of any surplus beyond what the Atomic Energy Commission itself would use. The Senator is absolutely correct in the analysis he has made of the bill and of my amendments.

Under the present law the Atomic Energy Commission can generate electricity through use of radio-active materials. However, under the terms of the bill which is before us, it would be prohibited from doing so.

Mr. LEHMAN. Exactly.

Mr. JOHNSON of Colorado. It seems to me that that is a very unwise prohibition, not to permit it to make electricity for its own use, if and when it finds it to be in the public interest to do so. If the rates being charged are too high, it could build its own plant. The mere fact that it would be empowered to do so would, it seems to me, guarantee it a better bargaining status when it went out to buy power—and it does have to buy immense quantities of electric energy. The mere fact that it had such authority would save hundreds of millions of dollars to the United States Government and to the taxpayers of the United States.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. LEHMAN. As I understand, the provision in the bill now before us would completely prohibit the production of energy from nuclear fission by the Atomic Energy Commission. This amendment would simply make it possible, within the discretion of the Atomic Energy Commission, to proceed with the production. Let me also point out——

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. HICKENLOOPER. There is an evident misconception which I should like to correct in order that the discussion may proceed on a factual basis. If the Senator will yield, I should like to say that not only is there nothing in the bill which would prohibit the Commission from producing power, but it is a part of the duty of the Commission, under its program of research and development, to experiment in the field of production of power. So the Commission can produce power today.

Mr. JOHNSON of Colorado. For experimental purposes; yes.

Mr. LEHMAN. It can produce it for purposes of research and development.

Of course, the Commission is empowered and directed to carry on research work, but there is a definite prohibition in the bill—not in the existing law——

Mr. HICKENLOOPER. I wish the Senator would point out that provision.

Mr. LEHMAN. I shall do so in a moment, as soon as I can get at it. There is nothing in the amendments proposed by the distinguished Senator from Colorado with which the Senator from Minnesota and the junior Senator from New York have been glad to associate themselves——

The PRESIDING OFFICER. The Chair understood that the Senator from Colorado yielded for a question.

Mr. JOHNSON of Colorado. I will yield for a question.

Mr. LEHMAN. I will reword it.

I ask the distinguished Senator from Colorado if there is anything in his amendments which would in any way give exclusive rights to the Government, or prevent the licensing or operation of private-utility companies in this field. All these amendments would do would be to remove the prohibition which now exists, a prohibition which places the United States Government in a position where it cannot protect the rights of the people of the country, who have provided more than $12 billion for the development of this highly useful and valuable natural resource.

Mr. JOHNSON of Colorado. The Senator has stated the situation accurately.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. HUMPHREY. If I recall correctly, the amendment which the Senator from Colorado has offered had its genesis in a colloquy between the Senator from Colorado and the Senator from Iowa [Mr. GILLETTE] as to the interpretation of that section of the bill which pertains to the right, or the alleged right, of the Commission to produce electric energy for its own operations. Was not that the genesis of the amendment?

Mr. JOHNSON of Colorado. Instead of the Senator from Iowa it was the Senator from Rhode Island [Mr. PASTORE] and the Senator from Tennessee [Mr. GORE]. However, the Senator from Iowa has joined in the sponsorship of the amendment which I have before me, and the Senator from Minnesota and the Senator from New York, among other Senators, have prepared amendments along the same line. These amendments differ slightly as to language and procedure, but the legislative counsel came up with this version. It seems to me that this version would do the job very well, and do it thoroughly. It would amend three parts of the bill which deal with this subject. Instead of dealing with section 44, it writes a new section 45, and sets up permissive legislation under section 45.

Mr. HUMPHREY. Mr. President, will the Senator yield further?

Mr. JOHNSON of Colorado. I yield.

Mr. HUMPHREY. In other words, if the interpretation which the senior Senator from Iowa [Mr. HICKENLOOPER] has placed on this measure is correct, the amendment which the senior Senator from Colorado [Mr. JOHNSON] offers has the effect of writing into the bill what the senior Senator from Iowa thinks is already in the bill and is not excluded from the bill.

Mr. HICKENLOOPER. It does not have that effect at all. I know what is in the bill with respect to the Commission's authority to build powerplants under the research and development provisions of the bill. Today, without any amendment, the Commission can build powerplants under the research and development provisions of the bill and furnish its own power, and in so doing it can carry on all the experimental operations it wants to carry on.

The section of the bill which deals with the sale of incidental power produced as a byproduct of the Commission's experimentation does not authorize the Commission to go into the commercial production of power. That section does not authorize the Commission to do that. I do not believe it authorizes it to go into the commercial generation of power except for the Commission's own uses and purposes.

Mr. JOHNSON of Colorado. The Senator from Iowa is referring to section 44, the byproduct energy section.

Mr. HICKENLOOPER. That is correct.

Mr. JOHNSON of Colorado. The amendment I am offering adds another section at the end of section 44, and section 45, incorporates the provision which I have said is very important. It seems to me the provision is necessary for a clear understanding of the bill.

Mr. CORDON. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. CORDON. I am interested, as I know the Senator is, in making certain that the Atomic Energy Commission has authority not merely to sell surplus power or surplus products, but has the right to license the use of atomic material in the production of power, and the right to grant licenses to both public and private bodies. It would appear to me that we have achieved all that is needed if we are certain that the Commission can license to a public or private body the operation of what will one of these days be an atomic electric generating plant. That is what we need.

Mr. JOHNSON of Colorado. That is one of the very important provisions of my amendment.

Mr. CORDON. Will the Senator let me make a suggestion?

Mr. HICKENLOOPER. Mr. President, will the Senator yield at that point?

Mr. JOHNSON of Colorado. I yield.

Mr. HICKENLOOPER. The bill already amply provides that any public or private body that can meet the moral and general equipment standards—they must at least be equipped to enter the field—is eligible to receive a license from the Atomic Energy Commission. That means public-power districts, cooperatives, the TVA, private investment groups, and others. They are eligible to receive licenses from the AEC to develop their own power.

Mr. JOHNSON of Colorado. I appreciate what the Senator from Iowa is saying. The Senator is a very good lawyer, and I have great confidence in his legal ability. I know that he understands the bill and that he has given it deep study.

However, I took this matter up with the legislative counsel, and I had the office of the legislative counsel read the licensing provision in the bill. They came up with this provision and said that if we were going to provide that the Atomic Energy Commission could make the power for itself, the licensing provision of the bill, which may be found in section 103 of the act, would have to be amended.

Therefore my amendment, on page 2, subsection (b), from line 5 to line 20, inclusive, provides for such licensing.

Then the office of the legislative counsel said that there would have to be an amendment in the appropriation provisions of the bill. Therefore, on page 2 of my amendment, lines 21 and 24 provide for an appropriation. That language would be added on page 102, line 7, of the bill. Of course, Congress must first appropriate the money. I am told that in the report of the committee there is contained a paragraph which explains that there are serious restrictions, but I cannot find that paragraph in the report.

Mr. LEHMAN. Mr. President, will the Senator yield so that I may point out to him that passage in the report?

Mr. JOHNSON of Colorado. I yield.

Mr. LEHMAN. The Senator from Iowa questioned a statement which I made a short time ago. I believe this is the passage in the report to which the Senator from Colorado has referred. I should like to read from the committee report at page 15:

> This section will permit the Commission to dispose of that utilizable energy it produces in the course of its own operations, but does not permit the Commission to enter the power-producing business without further Congressional authorization to construct or operate such commercial facilities.

If that is not a complete prohibition, then I cannot read the English language.

Mr. HICKENLOOPER. Mr. President, if the Senator from Colorado will yield, I will explain to the Senator from New York——

Mr. JOHNSON of Colorado. I will yield to the Senator from Iowa, if he will be patient. The Senator from New York has found the language I was looking for. Now, when we are passing the bill, is the time to state the policy. It is not necessary to wait for some future Congress to do it. Let us put that provision in the bill. Let us have the bill as complete as we can make it. As the report indicates, before the Atomic Energy Commission can build a plant of this kind, it must have authority from Congress.

Let us put that authority in the bill now. Let us put it in while we are writing the bill. It still would be necessary to provide the appropriations. However, we are writing an authorization bill. Let us write the authorization bill now and let us make it a complete authorization bill.

As I said to the Senator from Iowa a while ago, I had to depend on the very able attorneys in the office of the Legislative Counsel to examine the bill and to find out what it did and what it did not do. They came up with the amendment I have offered, to do the things that I wanted done; and that language was written into my amendment. That is as much as I know about it.

Mr. HICKENLOOPER. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield.

Mr. HICKENLOOPER. What the Senator from Colorado and the Senator from New York and the Senator from Minnesota are trying to do with their similar amendments—and their amendments are practically alike—is to make a TVA out of the Atomic Energy Commission, and to make a production agency out of an agency which was never intended to be anything except a research and development agency and a weapons-producing agency for national defense. That is the effect of the amendment of the Senator from Colorado.

Mr. JOHNSON of Colorado. The Senator could not be any more in error——

Mr. HICKENLOOPER. It completely reorients the whole purpose of the Atomic Energy Commission.

Mr. JOHNSON of Colorado. The Senator could not be more wrong if he jumped out of one of the windows of the Capitol Building than he is in the statement he has just made. He is completely incorrect; completely in error. The Senator from Iowa knows the Senator from Colorado is not a public power fanatic. Perhaps I should not use that word.

Mr. HICKENLOOPER. I think the Senator is not a fanatic in anything. I think he is a very fine gentleman.

Mr. JOHNSON of Colorado. I know that we must have both public power and private power. Private power provides more than 80 percent of the electric energy in this country, and public power provides only 20 percent. I think it is something less than 20 percent. I believe there is a place for both public power and private power. This is a power bill. It is written especially to encourage the production of power by private enterprise. That is a good thing, and I am for it. I believe in it. Private power will take private capital and develop plants which produce electric energy. But I do not see any reason, and I can find no reason, why the public itself, which has made this great investment of $12 billion in atomic energy for this great institution it has built should be deprived of this opportunity, and I can see no reason why the Atomic Energy Commission which uses more power than does any other institution in all the world, should be prohibited from producing electric power.

Mr. HICKENLOOPER. Mr. President, will the Senator from Colorado yield for a question?

Mr. JOHNSON of Colorado. Yes; but I want, first, to yield to the Senator from Oregon. He was interrupted a moment ago. He had a line of questions. I shall be glad to yield to the Senator from Iowa shortly.

Mr. CORDON. I am interested particularly in being certain that public agencies other than the Atomic Energy Commission are legally authorized to operate atomic-energy facilities for the generation of electric power. I am not particularly interested in having the Atomic Energy Commission itself do that particular job. I think the bill fully provides that the Atomic Energy Commission may generate power for itself. Is it the thought of the Senator from Colorado, as it is that of the Senator from Oregon, that we should make certain that the bill authorizes the Atomic Energy Commission to license public bodies up to and including a State, and even Federal bodies, to operate electric powerplants?

Mr. JOHNSON of Colorado. That is exactly one of the things which my amendment provides.

Mr. CORDON. I wish to invite the Senator's attention to 1 or 2 little items, if he will permit me to do so.

Mr. JOHNSON of Colorado. That is one of the tasks I assigned to the legislative counsel. I asked them to draft this amendment. The Senator will find that the language in the first paragraph reads as follows:

> The Commission is empowered to produce or provide for the production of electric power and other useful forms of energy

derived from nuclear fission in its own facilities or in the facilities of other Federal agencies.

When the Senator looks at paragraph (b) he will find that the second point is taken care of on page 2 of the amendment.

Mr. CORDON. Mr. President, if the Senator will yield further, I should like to call attention to my own view of a minor amendment that will do everything except authorize the Atomic Energy Commission to produce electric power for commercial purposes, for sale.

On page 7 of the bill, in line 21, there is a definition of the word "person." It provides:

The term "person" means (1) any individual, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission, any State or any political subdivision thereof, or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and (2) any legal successor, representative, agent, or agency of the foregoing.

That definition would include every public agency in the United States except the Atomic Energy Commission—every State and every division of a State. If the bill were specifically to authorize the licensing of persons, then the definition of "person" would include every agency of Government except the Atomic Energy Commission itself.

Personally, I should like to keep the Commission out of it. I think it has a big enough job without becoming a commercial power company. That is my own view of it. I would suggest to the Senator as an amendment on page 42, line 21, after the word "licenses", which is the first word in that line, to insert the words "to persons applying therefor"; and to insert the same language on page 44, after the word "licenses" in line 20, and on page 45, after the word "licenses" in line 3, and the same words after the word "licenses" in line 20. That would do everything that needs to be done to make power available to every agency, public or private, in the United States, excepting only the Atomic Energy Commission, which could then continue in the field which peculiarly belongs to it.

I make that suggestion to the Senator. I am sure such an amendment would accomplish the purpose.

Mr. LEHMAN. Mr. President, will the Senator from Colorado yield?

Mr. JOHNSON of Colorado. Of course, I have great respect for the legal ability of the Senator from Oregon. I have heard 2 or 3 lawyers in the Senate say that the Senator from Oregon is the best attorney in this body. Whether he is or not, I know he is a very able lawyer.

Mr. CORDON. I am sure if Senators said that, they were mistaken.

Mr. JOHNSON of Colorado. The Senator is very modest.

I took the matter up with the legislative counsel, and I think they came up with as simple an amendment as is possible. They studied the matter not only for a few minutes, but for a couple of days, before they gave me the answer. I think they have suggested an amendment which will stand the test and do the job. I hope the Senate, in its wisdom, will adopt the amendment which I have offered.

Mr. CORDON. Mr. President, will the Senator from Colorado yield for one more observation?

Mr. JOHNSON of Colorado. I yield.

Mr. CORDON. If the Senator desires to include the Atomic Energy Commission in the group which is authorized to produce electric power for commercial use, the amendment which I have suggested would not do that. If he wants to exclude it, then my suggested amendment would be completely adequate.

Mr. JOHNSON of Colorado. The only reason why I want to exclude the Atomic Energy Commission is so that the REA's and municipal public bodies can receive electric energy. There is no use in licensing them to distribute electric energy if they cannot get hold of some electric energy. That is the reason why that provision is in the bill, and that is the only reason, so far as I am concerned.

Mr. CORDON. I suggest once more, if I may, that associations of such groups would be completely adequate in size to operate their own plants. But I do not wish to intrude further.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield to the Senator from New York.

Mr. LEHMAN. It seems to me that what the Senator from Oregon is proposing would destroy one of the main purposes of the amendment. I ask the Senator from Colorado whether there is anything in the amendment he has offered, or in the amendments offered by the Senator from Minnesota [Mr. HUMPHREY] and myself, which would in any way prevent, handicap, or hinder private enterprise. None of those amendments say that private enterprise should be excluded, should not be recognized, or that the Government should have a monopoly. Quite the opposite. We all welcome private enterprise. We want it, if necessary and advisable, to do the main part of the job.

But certainly it would be beyond the realm of justice, good sense, and logic for Congress to say that although the American people have put up $12 billion to defray the expenses of constructing the facilities and of carrying on the research and experimentation and operations of the Atomic Energy Commission, the Commission cannot, if it is in the interest of the people of the United States, undertake any of this work whatsoever? I do not say that they ever will. But certainly we should not close the door. We should not give the private utilities complete monopoly over this resource.

I do not know when it will be to the interests of the people of the United States for the Government to undertake some of this work, possibly in cooperation or in partnership with private enterprise, but, considering what the people have done to make possible this resource, the sacrifices they have made, and their ownership of the resource, I can see no excuse, no reason, no logic, in the Congress of the United States refusing to make it possible for the Atomic Energy Commission to market commercially in the interests of the people the power or the energy which is generated from nuclear fission.

That is what I am arguing for, and why I think this bill is a bad bill, because it completely closes the door to any possibility of the Federal Government taking care of the people of the United States.

The PRESIDING OFFICER. Does the Chair understand that the Senator from Colorado has yielded the floor?

Mr. JOHNSON of Colorado. No. I have yielded merely for a question. I wish to thank the Senator from New York for clarifying these very important points.

Mr. HICKENLOOPER. Mr. President, will the Senator yield for a question?

Mr. JOHNSON of Colorado. I wish to make another point while I have it in mind, if the Senator will be willing to wait. Then I shall yield.

Such a provision as is contemplated in my amendment would, I think, give a great deal of confidence to the people of the United States. They would know they were receiving a square deal in the production of electric energy from atomic sources.

I cite this as an example: I have been told that for 20 years before there were sound moving pictures, science had produced them, but the industry did not want to adopt the new type of films, because it had heavy investments in theaters which were equipped for the showing of silent films. The industry simply did not want to take that progressive step. So, I am told, the public had to wait 20 years until the motion picture industry got ready to come forward with sound pictures.

If such a thing should happen in the production of power by private enterprise, there would be a great temptation on the part of private enterprise not to go too fast. Private enterprise has a tremendous investment in the plants producing electric energy. They might move along pretty slowly with something new; they might not produce electric energy from atomic sources very rapidly. If the Atomic Energy Commission should believe that the private power industry was slowing down, the Commission could move ahead on its own and could produce electric energy. They could determine what it would cost to produce electric energy from atomic sources, and that could act as a yardstick for the cost of such energy, provided that kind of provision were included in the bill. If such a provision is not placed in the bill, and if private power companies are given a complete monopoly, something which they should not have in a public venture of this kind, many persons who are a little skeptical, anyway, of the free-enterprise system might imagine that private industry was slowing down, and that cheaper power could be had if private industry wanted to move ahead.

There is another side to the question. Under the pending bill, if the private power companies in their system of producing energy integrate an atomic plant, it will be very difficult for accountants or anyone else to ascertain how much it

is costing to produce electric energy from atomic power. It will not be possible to determine the costs, because the two methods of production will be integrated throughout the system, and will include coal production, hydroelectric production, and distribution. It will not be possible to determine absolutely and conclusively, to the satisfaction of the Commission, that a good job is being done.

But if a provision of this kind is included in the bill, and the Atomic Energy Commission itself becomes suspicious, it can erect a plant of its own to make electric energy, and thus prove the truth or the falsity of such suspicions or such charges.

I now yield to the Senator from Iowa.

Mr. HICKENLOOPER. Does the Senator from Colorado believe that the Department of Agriculture should engage in the commercial sale of fertilizer, or that the Bureau of Standards, which develops electronic devices, should engage in the manufacture of new kinds of radio sets, and sell them to the public? That is what the Senator is proposing in his amendment. He is seeking to provide for a research and development organization in the Atomic Energy Commission, which now actually produces nothing under its own management, except weapons. Most of the rest of the research is done under contract with private industry. But the amendment of the Senator from Colorado proposes to put the Atomic Energy Commission into the position of a producer of commercial power for retail sale. I merely submit that that is not the basic purpose of the Atomic Energy Commission. We would be reorienting the direction and purpose of a great research and development organization, which should keep its line of activities fairly plain, and not allow them to become distorted by engaging in the commercial production of electricity.

Mr. JOHNSON of Colorado. Of course, the Senator from Iowa is very familiar with the purpose of the Atomic Energy Commission and its functions, and with all the important tasks which have been assigned to it. He is familiar with all of its activities, because he has been a member of the Joint Committee on Atomic Energy for a long time. But I beg leave to differ with the Senator when he says that it is only a research body. It is nothing of the kind. It is more than a research body, and the Senator from Iowa knows it.

Mr. HICKENLOOPER. I said it was a research and development organization. Those two words must go together.

Mr. JOHNSON of Colorado. I should like to have the Commission develop a little something for themselves. Someone said the other day that the Atomic Energy Commission is in the electric-energy business. Certainly they are in the business. They are the biggest buyer of electric energy there is. They buy more than anyone else. They buy as much electric energy in a year as does all of New England put together.

The Commission has the facilities and the responsibility for making power. Why legislation should be enacted which would deny them the authority to make power, in case they found they were being overcharged for the great amount of electric energy that they use, is simply more than I can understand.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. JOHNSON of Colorado. I yield to the Senator from Minnesota.

Mr. HUMPHREY. Is the Senator from Colorado not somewhat disturbed or moved by the comment of the senior Senator from Iowa, to the effect that the Atomic Energy Commission is not supposed to be in the electrical production business, in other words, the production of electrical energy, or engaged in the electric business, when just a few moments ago on the floor of the Senate, when we were trying to make a determined effort to take the Atomic Energy Commission out of the electric utility business the effort was defeated? In other words, did not the Dixon-Yates contract, which used the Atomic Energy Commission as its vehicle, place the Atomic Energy Commission in the electric business? How can the Senator deny it? I want to know if there is any consistency in the remarks of the Senator from Iowa.

Mr. HICKENLOOPER. Mr. President, if the Senator from Colorado will yield, I shall be glad to answer the question.

Mr. JOHNSON of Colorado. I shall be glad to yield to the Senator from Iowa, provided I do not lose the floor.

Mr. HICKENLOOPER. The Senator from Minnesota asked a question about a remark I made. I shall answer it now or later; I do not care when.

Mr. JOHNSON of Colorado. I shall be glad to yield if I do not lose the floor, but I do not want to lose the floor.

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Iowa provided he will not lose the floor? Without objection, it is so ordered.

Mr. HICKENLOOPER. The action which the Senate took a short time previously did not put the Atomic Energy Commission in the electric power business any more than the Atomic Energy Commission is in the electric business when it buys electricity from any other source to run its plants.

Mr. HUMPHREY. Mr. President, will the Senator from Colorado yield so that I may make a rejoinder to the comment of the Senator from Iowa?

Mr. JOHNSON of Colorado. I yield, provided I do not lose the floor.

Mr. HUMPHREY. I may say to the distinguished Senator from Iowa that, according to all the testimony before the joint committee, the electric energy which will be forthcoming as a result of the Dixon-Yates contract will not relate to the operations of the Atomic Energy Commission at all. That energy is to be funneled into the TVA, and the TVA, in turn, is to service the community or area known as Memphis, Tenn. That is exactly what some of us were complaining about in terms of the philosophy expressed in the bill.

When the Johnson amendment is before the Senate, the cry is raised that it will permit the Atomic Energy Commission to be in the power business. I may point out to the Senator from Iowa that, by his vote a few moments ago, and by a majority vote of the Senate, we have established the precedent of the Atomic Energy Commission being in the power business because the contract with the Dixon-Yates group does not relate to the electric needs of the Atomic Energy Commission. I say to the Senator from Iowa that he can examine his own record and the testimony before the joint committee, of wl ich he is one of the distinguished senior members, and he will find that the Atomic Energy Commission never asked for that power. He will find that there is not 1 kilowatt of that power going to the Atomic Energy Commission for its facilities or production or research. He will find that the Atomic Energy Commission was put into the electrical-power business by a contract which was ordered to service the Memphis, Tenn., area. Is that not the case?

Mr. HICKENLOOPER. Mr. President, will the Senator from Colorado yield?

Mr. JOHNSON of Colorado. I shall be glad to continue to serve as a line of communications between the two Senators provided I do not lose the floor.

Mr. HUMPHREY. I say to the Senator from Colorado he is like the Atomic Energy Commission and the Dixon-Yates case—he just sort of got in. He is in the business of setting up the conversation between the Senator from Iowa and the Senator from Minnesota just as the Atomic Energy Commission was set up in the electric business.

Mr. JOHNSON of Colorado. But not quite so explosive.

Mr. HICKENLOOPER. Mr. President, I shall try to respect the time of the Senator from Colorado. I understand it is unanimously agreed that he will not lose his right to the floor.

Mr. JOHNSON of Colorado. It is the purpose of the Senator from Colorado to try to make his amendment as clear as he can. I am absolutely certain that if the Members of the Senate understood the purpose and the effect of the amendment which I have offered, it would be agreed to by an almost unanimous vote. So I shall be glad to try to help bring out all the facts in connection with my amendment. For that reason I have been very willing and glad to yield to the two very distinguished Senators. I now yield to the Senator from Iowa, with the understanding that I do not lose the floor by so doing.

Mr. HICKENLOOPER. I thank the Senator from Colorado. In the first place, I wish to say to the Senator from Colorado, and to assure the Senate, that the basic substance of the amendment which the Senator from Colorado has offered was given long and careful consideration by the joint committee, and decisively defeated in the joint committee. That is my first point.

With reference to the statement by the Senator from Minnesota that the action which the Senate took put the Atomic Energy Commission in the power business, I dispute that. It put the Commission in a position where it can acquire replacement power for power which it must take out of the TVA tank or reservoir. The Commission is exercising its responsibility in insuring an assured source of power.

That misconception on the part of the Senator from Minnesota reminds me of a number of misconceptions he has expressed and stated in his various arguments on the floor of the Senate. I am reminded of an old biblical saying. I shall apply it to the arguments which the Senator from Minnesota has made in the debate, and say that they are like the seed of Abraham, numerous as the sands of the sea.

Mr. HUMPHREY. Mr. President, will the Senator from Colorado yield so that I may reply to the comment of the Senator from Iowa?

Mr. JOHNSON of Colorado. I hope we will not get as far off the track as the seed of Abraham, but I yield provided I do not lose the floor.

Mr. HUMPHREY. First of all I want to thank the Senator from Colorado for his generosity and also the Senate for making the courtesy possible. I want to thank the Senator from Iowa for including me in the distinguished array of persons who sprung from the seed of Abraham and the sons of Abraham. In that group were included Solomon, David, and other distinguished prophets. I have never claimed to be a prophet, but one does not have to be a prophet to see what is going on. I urge the Senator from Iowa to use that great element of commonsense for which he is so well known. I have many times praised him for his work in the field of atomic energy. I think if he will answer these questions in the meditation of his own conscience, he will get the correct answer.

No. 1: Did the Atomic Energy Commission ever ask for the Dixon-Yates contract in order to replace power it was getting from the Tennessee Valley Authority?

May I give my answer, and then the Senator from Iowa can make his own confession? It did not.

No. 2: Did a majority of the Atomic Energy Commission feel that the contract was unwarranted, undesirable, and not needed?

My answer to that is that the majority did feel it was unwarranted, undesirable, and not needed.

The Senator from Iowa can answer that question in his own way.

No. 3: Does the Senator from Iowa believe the Atomic Energy Commission is not in the power business when the Atomic Energy Commission contracts for power with a nonexistent firm, which firm will be built primarily by Government support through a guaranteed contract, which power will not go to the Atomic Energy Commission, which power will go to the Tennessee Valley Authority facilities, and the Tennessee Valley Authority facilities are located in the Memphis, Tenn., area?

Finally, I ask this question, and the Senator from Iowa may answer it in his own time: Is there any evidence that one single kilowatt of power which the Atomic Energy Commission will have control of through the Dixon-Yates contract will be used for the facilities of the Atomic Energy Commission? If there is, will he point it out in the record of the testimony? If he cannot point it out in the record of the testimony, he must admit, must he not, that the Atomic Energy Commission, through a devious method, is in the power business?

As I said earlier in the debate, when we legitimatize it, it is a very peculiar arrangement, because we are postdating the birth certificate. The birth of the child of the Dixon-Yates contract was never legal, as the Senator from Mississippi [Mr. STENNIS] put it earlier tonight.

I ask the Senator from Iowa if he can offer one scintilla of evidence to indicate that the AEC is not in the power business in the Dixon-Yates contract.

Mr. JOHNSON of Colorado. Mr. President, I have only one other point to make. I had the honor, privilege, and responsibility of serving on the original Senate Committee on Atomic Energy, from its inception; I was one of the members who was appointed when the Committee on Atomic Energy was only a Senate committee. At that time we were assigned the responsibility of writing the initial act—the present so-called McMahon Act. We had nine separate bills, before we finally came up with a bill upon which we were able to agree. The present McMahon Act is that bill.

Under the provisions of that bill, the Atomic Energy Commission was given a complete monopoly over all radioactive source materials. The Commission must maintain that monopoly even today. It is not legal for any person to have uranium, thorium, or any of the other radioactive source materials, after they have been taken out of the ground in their natural state; under the law, it is not legal for any person to own such materials. They have to be turned over to the Atomic Energy Commission. So the Commission has a monopoly, and that must be so.

Many of us who served on the first committee did not like to create the monopoly. We hesitated to do so. However, it was absolutely necessary that we do it. So we did it with our eyes wide open; and as of today, the Atomic Energy Commission, under the new bill, will retain the same monopoly. It must retain it. So long as atomic energy is more useful for making weapons than for making anything else—as is the case at the present time—the Commission is, and must be, entrusted with our security.

Under these circumstances, Mr. President, why do we hesitate to empower the Commission to make some of the electric energy required for its own use; and, if the Commission has a surplus of electric energy, to sell it through the Secretary of the Interior? Do not we trust the Secretary of the Interior? Do not we trust the formula which we ourselves have established for the distribution and sale of public power that is created at the great dams the Government has built in the canyons of the West or on the rivers in the East that, if uncontrolled, cause great flood damage—the formula applied to the hydroelectric power generated in connection with those dams, and inasmuch as the Secretary of the Interior is authorized to sell and to distribute that power?

Do not we have confidence any more in anyone except private industry? Must we turn over everything to private industry, before we have confidence? I do not think so.

I want private industry to have all the opportunity we can give it. I want private industry to have great opportunity to help develop power from atomic energy. However, I wish to point out to the Senate that at this time it is not feasible to produce power from uranium. However, I am sure all of us who have faith are sure that the time will come when atomic energy will be the source of power; and it probably will not be done by heating water first. Instead, it probably will be done directly, as the RCA proved that it could be done—when radioactive energy is taken directly from radioactive materials, is captured, is run through a wire, and is used in that way. When that system is perfected, we shall find that power will be produced very, very cheaply, through these fissionable materials. That time is coming. The scientists have worked out the process in the laboratories; and once that is done, it is only a matter of time until the scientists work all the bugs out of the process, and until it is in common use.

So I do not see why we in the Senate tonight have so little faith in the Atomic Energy Commission that we are afraid to empower it with the right to create electric energy when we surround that power with the authority of Congress.

My amendment provides that Congress shall approve the appropriations for that specific purpose. When we surround the authority with every sort of limitation, why are we so fearful and so afraid? Why will we trust only private industry?

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. JOHNSON] for himself and the Senator from Iowa [Mr. GILLETTE].

Mr. NEELY. Mr. President, for many days and nights I have patiently listened to the Senate debate. At last I have decided to join the executioners instead of waiting in silence to be talked to death. [Laughter.]

So listen, my children, and you shall hear, not of the midnight ride of Paul Revere, but of some of the reasons why that part of the world known as the United States of America is now screwed up, as it was never screwed up before. [Laughter.]

I purpose to read from one of the oldest, and most patriotic and praiseworthy newspapers in the land. It was established 77 years ago, for the purpose of serving the Union veterans of the Civil War. It later became the promoter of the welfare of the veterans of all our wars. It has been Republican from its inception. Its present editor has been a Republican for 40 years.

Its name is the National Tribune-Stars and Stripes. So far as I know, it is one of the most reliable Republican newspapers ever published. This is not as high a compliment as it deserves. [Laughter.]

It has always put principle above politics, and courage above cowardice.

Proof of this assertion will be found in what you are about to hear.

Attention is invited to the latest issue of this paper on the front page of which

this banner appears: "Republican Party Forsakes Veterans."

Under that, extending over two columns of the page, is the subheading:

HOUSE LEADERSHIP TURNS DOWN ALL COMPROMISES ON PENSION INCREASES

Following days of high-level conferences, Speaker notifies veterans' committee White House will approve nothing but meagre boost for service-connected alone—move defeats any chance of cost-of-living hikes for those needing them most.

The article is as follows:

The Republican administration, at White House direction, has repudiated veterans and their needy dependents of all of the wars in which the United States has been engaged. The betrayal of the 20 million that constitute the veteran class, as well as of the 3,700,000 who are on the compensation and pension rolls is complete, and the Republican leadership has won for itself either a tremendous victory or a positive assurance of the loss of the House of Representatives next November.

On last Friday, after final efforts were made to compromise differences between the wishes of organized veterans—as represented in H. R. 9020 that was reported unanimously by the House Committee on Veterans' Affairs—and the Eisenhower administration, the friends of veterans in the Congress were advised that the White House would turn thumbs down on any bill excepting one to grant a 5-percent cost-of-living increase in compensation alone to veterans who suffer from disabilities resulting directly from war and to some of the dependents of those who have died as a result of war.

The House Committee on Veterans' Affairs, which may have met for a final session behind closed doors as this issue of the Tribune was on the press, had no choice before it but to accept the dictation of the White House or have no bill at all. It was a ringing victory for the House leadership under the direction of Majority Leader CHARLES A. HALLECK, of Indiana, who, according to the Congressional Directory, served in World War I and is a member of the American Legion.

Special rule is sought

H. R. 9020 proposed compensation and pension increases totaling $232 million and, regardless of the fact that it does not meet with any degree of realism the actual hikes in costs of living since the last increases were granted, it proposed roughly a 10 percent increase all down the line for service-connected veterans, picked up in part and attempted to correct inequities resulting from Public Law 356 of the last Congress and granted some relief to veterans and dependents of all wars, including the underpaid widows and totally-disabled non-service-connected veterans. The measure was written after prolonged hearings by the Veterans' Affairs subcommittee headed by EDMUND P. RADWAN, World War II veteran of New York, and was unanimously approved by the full committee on May 28. Immediately, Chairman EDITH NOURSE ROGERS, of Massachusetts, filed a request for a special rule for its consideration. Obtaining no satisfaction from the chairman of the powerful Rules Committee which is headed by World War I veteran LEO E. ALLEN, of Illinois, Mrs. ROGERS made a second appeal by letter to that committee. Even though it is known that 10 of the 12 members of the group, 8 of whom are Republicans, favored the measure, ALLEN would not permit consideration, and it is an open secret that the lack of action was due to administration interference.

On July 2, some 35 days after the Rules Committee had the first request, RADWAN introduced a House resolution (H. Res. 612) which sought to discharge the Rules Committee from further consideration and obtain a vote on the floor. The measure had to lie over for 7 legislative days before a discharge petition could be filed. That time expired on July 15, and Mrs. ROGERS sought to obtain the signatures of a majority of the House membership—218—so that the bill could come up in another 7 legislative days during which it had to lie on the Discharge Calendar.

Mr. LANGER. Mr. President, may we have order? We cannot hear the Senator.

The PRESIDING OFFICER. The Senate will be in order.

Mr. NEELY. Mr. President, I will endeavor to obviate that difficulty at once, because I want the distinguished Senator from North Dakota [Mr. LANGER] to hear what I am reading. He is the only Republican Member of this body who, to my knowledge, daily preaches and practices the political philosophy of Abraham Lincoln and Theodore Roosevelt. With the exception of the distinguished Senator from Oregon [Mr. MORSE], he is the only Senator on the other side of the aisle who seems to remember either the words or deeds of the Great Emancipator, who was one of the greatest of men.

I congratulate the Senator from North Dakota for still being a Republican of the Lincoln and Theodore Roosevelt school. He must be as lonesome in his present environment as Alexander Selkirk was on the island of Juan Fernandez.

Mr. LANGER. Mr. President, I demand order so that the distinguished Senator from West Virginia may be heard. [Laughter.]

Mr. NEELY. Mr. President, I second the motion, and accordingly proceed with the article—

Leaders fight measure.

That is, the Republican leadership of the House.

The 218 signatures were never obtained, and the list of signers cannot be available under House rules unless the petition is completed. It is known that approximately 160 Representatives filed to the Clerk's desk to affix their names, and Mrs. ROGERS sought desperately last Thursday to hold the House in session until the signatures could be had. The Massachusetts Congresswoman explained the measure in detail and sought to justify it. Surprisingly enough, only 8 House Members took the floor to help her and only 5 of them were members of the Veterans' Committee.

Minority Leader JOHN W. MCCORMACK, World War I veteran, of Massachusetts, stood stanchly by.

Mr. President, I digress to congratulate Massachusetts on having a great Republican woman and a great Democratic man in the House who were willing to stand up and fight for the veterans as they fought for their country around the world.

The five committee members supporting their chairman were JOE L. EVINS, World War II veteran, of Tennessee; JAMES A. BYRNE, of Pennsylvania; ED EDMONDSON, World War II veteran of Oklahoma; D. R. (BILLY) MATTHEWS, World War II veteran of Florida; and HARLAN HAGEN, World War II veteran of California. The others were MELVIN PRICE, World War II veteran of Illinois, and JACOB K. JAVITS, of New York. Other committee members and general Members of the House were strangely silent.

Before the attempt was made to dislodge H. R. 9020 from the Rules Committee, the week saw high-level conferences through which organized veterans and others sought to obtain legislative action. To be understood, with their consequences, the story should be told in chronological order.

CONFERENCES BEGIN

Acting in the best of faith, and faced with early adjournment, a group of veterans' leaders engaged in the interest of Republican Representative JAMES E. VAN ZANDT, of Pennsylvania, a three-time commander in chief of the Veterans of Foreign Wars. For them VAN ZANDT made an appointment with the Speaker of the House, JOSEPH W. MARTIN, JR., of Massachusetts. It is understood that invited also was Majority Leader HALLECK, who failed to show up but who was approached from the Speaker's office by telephone. There had been talk of a compromise bill in the air for weeks. The veterans had no compromise to offer. Some view in the nature of administration compromise was requested from the leaders so that it could be studied, but there was no tangible result excepting that, in discussing the entire problem with the Speaker, who apparently seemed to be in full sympathy with the original measure, possible changes in the bill were discussed.

This meeting took place on Tuesday, July 13.

At 8:30 the next morning HALLECK went to the White House for a general discussion on legislation with the President and his advisers. It was his purpose to discuss also the terms of H. R. 9020 and determine the stand of the administration on the bill. So far as is known, the results of that conference were not made available directly to the Committee on Veterans' Affairs.

On Wednesday afternoon the Veterans' Committee was called into a special executive session. It determined unanimously to name a subcommittee of ranking members who, with the chairman, were to meet with Speaker MARTIN. That conference took place and was also behind closed doors, but, it is understood, the special committee was advised that the White House sought some sort of a compromise.

Mr. President, it will be observed that those veterans and their representatives were having the same kind of success in dealing with the Republican leadership of the House that England, France, and the United States had in dealing with Russia and Red China at Geneva.

PETITION IS FILED

On Thursday, Mrs. ROGERS took the floor and announced the filing of the discharge petition, appealing to all Members of the House to affix their signatures so that the bill might have an opportunity for passage before adjournment. During the discussion in the House, and while Mrs. ROGERS sought to keep the body in session, Minority Whip JOHN MCCORMACK, reasserted his approval of the measure, insuring that many Democrats would go along.

Mr. President, Democrats always go along for the right and against the wrong.

Chairman ALLEN, of the Rules Committee, sought to indicate that the Congress had already passed a number of veterans' bills, all of which, incidentally, were of a comparatively minor nature. The House adjourned at 3:23 p. m.

Majority Leader HALLECK went back to the White House Thursday afternoon to advise that he had been victorious in stopping the discharge petition and to seek information relative to a compromise bill.

Think of an administration House leader going to the White House to celebrate with a great general, a parliamentary victory over veterans who had fought for their country and sacrificed themselves on bloody fields of battle for the American people.

One day last week a United Press dispatch carried on the front page of many newspapers, said, in effect, that during the last year the cost of living had risen higher than it had ever been before, and that in May of this year, under this administration's hard-money policy, the dollar was worth less than it had been at any other time during the past 169 years. In these circumstances it is not surprising that veterans and their friends are outraged by the mistreatment against which the distinguished editor of this great newspaper is crying out with the voice and vigor of a Jeremiah.

It is more than regrettable that General Eisenhower, who was the idol of the soldiers at the time he was elected, should confer with anyone who was boasting of a victory won over needy American veterans.

Mr. KNOWLAND. Mr. President, will the Senator yield for a question?

Mr. NEELY. I am delighted to yield to the distinguished majority leader.

Mr. KNOWLAND. I should like to ask the distinguished Senator from West Virginia if we are now advised that the liberal wing of the Democratic Party has determined not only to block the bill now pending before the Senate, but to obstruct the entire program of the President of the United States and the entire legislative program by an obvious filibuster, and thus prevent the public's business from being transacted? Is that the desire of the liberal wing of the Democratic Party?

Mr. NEELY. I have no authority to speak for the liberal wing of the Democratic Party. However, speaking for myself, I venture to say that if the rest of the program of this administration is similar to that which has already been enacted it would be no disservice to the people to filibuster to death that which remains, including the pending bill.

Mr. KNOWLAND. I take it that the Senator from West Virginia admits that he is now engaged in a filibuster to obstruct the remainder of the President's program.

Mr. NEELY. The Senator from West Virginia admits nothing of the kind. He is simply trying to protect deserving veterans. He is not filibustering. [Laughter.]

The Senator from California has consumed more time on this floor in the past 2 weeks than I have consumed since the 6th day of last January. If no one had talked more than I have, this session of Congress could have adjourned long before it gave away $50 billion worth of the Nation's oil which should have been used for the benefit of all the people.

Mr. KNOWLAND. Is the Senator from West Virginia familiar with the fact that a majority of his party in the Senate and in the House over a period of years supported that same legislation?

Mr. NEELY. I am aware of the fact that a Democratic President had the commonsense and patriotism to veto all such legislation.

Mr. President, let me encourage interruptions, if any other Senators wish to ask questions.

Mr. HENDRICKSON. Mr. President, will the Senator from West Virginia yield?

Mr. NEELY. I yield.

Mr. HENDRICKSON. Did the distinguished Senator say in the early part of his remarks that EDITH NOURSE ROGERS is a liberal or a conservative?

Mr. NEELY. I did not say, but, in my opinion, she is a liberal. I know she is a most patriotic, sympathetic, Christian woman.

Mr. HENDRICKSON. I noticed that in the Senator's remarks he classified her as a Democrat.

Mr. NEELY. Mrs. ROGERS is a Republican, at least she was when I served with her in the House. [Laughter.] But if Republicans are changing as fast in the House as they are in my home county of Marion no one can be sure that the Republican of yesterday is still standing pat today. During the past 2 years the registration change in Marion County, W. Va., has been at the rate of 7½ Democrats to 1 Republican. So I am not sure that anyone is still a Republican unless that fact is duly certified and sanctified by lie-detector tests, such as a Republican Senator recently suggested for the Republican Secretary of the Army.

Mr. HENDRICKSON. I only wanted to keep the RECORD straight, because the Senator did characterize Mrs. ROGERS as a Democrat in his earlier remarks.

Mr. NEELY. If so I misspoke I will correct that error at once. Does the Senator take exception to anything else I said about Mrs. ROGERS?

Mr. HENDRICKSON. Oh, no, indeed. I just wanted the RECORD to be straight.

Mr. NEELY. Mr. President, I hope it will be noted that, for once, I am in agreement with a Senator on the other side of the aisle.

Mr. LANGER. Mr. President, will the Senator from West Virginia yield?

Mr. NEELY. I yield.

Mr. LANGER. Is President Eisenhower a Republican or a Democrat?

Mr. NEELY. Why ask me? It took him 62 years to find that out. [Laughter.]

While we are on that point, Mr. President, do not ask me anything about President Eisenhower's religion. It took him over 60 years to find out that he could join a church. He was 60 years old before he learned that he could vote.

Mr. KNOWLAND. Mr. President, will the Senator from West Virginia yield?

Mr. NEELY. I yield.

Mr. KNOWLAND. Is the Senator from West Virginia questioning the patriotism of the President of the United States, a man who led the Armed Forces of the United States in the D-day landing? Is that what he is doing? Is he raising some question about the church to which the President belongs? What is the Senator trying to do? Is he trying to belittle the President of the United States on the floor of the Senate? I think he is showing the type of obstruction and undermining that is going on with reference to the program of the President of the United States who carries heavier responsibilities today than perhaps does any other man in the world. Is this the type of action to be taken in a great deliberative body which has before it a heavy program in the closing weeks of the session? Is this a demonstration of the attitude that is taken toward a long list of measures which must be acted upon, such as the tax bill, the unemployment compensation bill, the foreign aid authorization bill, the foreign aid appropriation bill, and the supplemental appropriation bill? Is this a spectacle the spokesman of that wing of the Democratic Party is trying to show to the people of the United States of America?

Mr. NEELY. Mr. President, of course I have not questioned the President's patriotism. I have repeatedly praised his outstanding military service. What the Senator has said about the deplorably neglected, lagging Republican program is a more caustic criticism of Republican leadership here and at the other end of the avenue than I would have ventured to utter. Let me remind the majority leader that his party is in control. If it does not redeem its campaign promises and enact promised laws, the voters, with their ballots, will on the 2d of November proclaim to the world that Republicans and not Democrats are to blame.

It is unfortunate that the Senator is afraid to have the people know that the President did not vote until he was 60 years of age, that he did not join the church until after he became President; and that he did not know whether he was a Democrat or a Republican until after he was 60 years of age. When the President became a candidate for political office he did what every other candidate does—put his character in issue. He did not become the beneficiary of anything resembling the divine right of kings. So far as I am concerned the record which the President himself has made is subject to the freest possible discussion. My right to freedom of speech about this important matter neither the majority leader nor anyone else will ever be permitted to abridge.

Mr. President, I resume the reading of the article:

The Committee on Veterans' Affairs went back into session at 4: 30 and discussed the proposition until adjournment at 6: 15, their decision being to write an amendment to grant a 5-percent boost across-the-board to service-connected and nonservice-connected veterans and dependents alike, with the single exception that the rates in H. R. 9020 as originally reported for dependent parents and service-connected widows, neither of whom had been given an increase 2 years ago, would remain as at first proposed.

On Friday, the special group from the Veterans Committee again met with Speaker MARTIN and carried with them the proposal as it had been rewritten.

TAKE IT OR LEAVE IT

This time the committee was informed that nothing would be acceptable to the White House but a straight 5-percent hike to service-connected veterans and the dependents of service-connected dead—nobody else.

That was the position as this issue of the Tribune goes to press. It is believed that the

full Committee on Veterans' Affairs would meet again in executive session on Tuesday of this week and rumors are rife that because it can get nothing better, a new amendment will be written to meet the White House proposal. If that action is taken, such a bill will doubtless pass both Houses before adjournment and be signed, and it will have come up under suspension of the rules on Wednesday.

There are other possibilities, but they are few. The Veterans' Committee could decide to take no further action and, because of the harshness of congressional leaders, let H. R. 9020 die. On the other hand, and because the discharge petition remains on the Speaker's desk, it could gamble with the adjournment date, appeal for the necessary signatures, especially in view of the fact that the so-called "compromise" is no compromise at all, depend upon House leaders to recognize the committee chairman for a vote, and send the measure on its way to the Senate. If the signatures are sought, it is more likely, however, that the House rules will be invoked and 7 days of the House in session must expire before the bill could be called up.

Either way, H. R. 9020 could pass the House before adjournment. It could also pass the Senate, provided the White House bullwhip were not used in that body, and yet if it passed both Houses, it would doubtless face either a direct or a pocket veto.

VET SPOKESMEN SHOCKED

As this is written veterans' organizations appear to be somewhat undecided as to what action they will take. Of course, none are satisfied with what has happened. Actually there is bitter disappointment.

Miles D. Kennedy, legislative director of the American Legion, while expressing disappointment, said that there is such a crisscross of confusion that he did not desire to make a public comment for the Legion. Omer W. Clark, directing legislation for the Disabled American Veterans, also chose to meet with organization officials before commenting, but he expressed the thought that anything less than a correction of the disparity created by Public Law 356 of the 82d Congress would not be acceptable to the DAV. John Holden, of the AMVETS, expressed himself in much the same language but did not desire to make a public statement, and John U. Shroyer, commander in chief of the United Spanish War Veterans, contacted in the State of Washington, could do nothing but state how highly unsatisfactory was the action taken by the House.

However, Omar B. Ketchum, legislative director for the Veterans of Foreign Wars, doubtless spoke the minds of most of his associates who testified for H. R. 9020 when he said:

"The failure to win the 218 necessary signatures on the RADWAN discharge petition constitutes a victory for the majority leader of the House of Representatives. It is my understanding that many House Members were advised not to sign the petition and that it would be unnecessary to do so because a compromise was to be worked out that would meet with the approval of all Members. Either HALLECK did not know what he was talking about, or he resorted to deceit.

"What the administration proposes he may think generous to some widows and dependents because it will give a slight lift to the service-connected group whom we have always favored and said must come first. Nevertheless those who most need help will now get nothing under the leadership's proposal. Once more the veteran class 'comes out on the short end of the stick.'"

"Doubtless this matter will be discussed in full at our coming national encampment in Philadelphia beginning August 1," Ketchum continued. "Probably the most grievous shortcoming is the failure to wipe out inequities in holding down increases to those who constitute the majority of service-connected veterans and who are rated at less than 50 percent disabled. To grant a straight 5 percent increase continues that gross inequity, and from the viewpoint of the Veterans of Foreign Wars the entire action of the administration is terribly disappointing.

"We have now the names of many who were willing to stand up and be counted. They have telephoned to us to tell us that they signed the petition. We hope that, despite what has already happened, that petition will be completed."

A DIRECT REPUDIATION

And that, briefly, is the story of the fiasco on Capitol Hill last week. The Republican administration has said, in effect, "Take this or nothing." That is what must be taken unless this week's developments differ materially from what the experienced observer can see.

The action of the Republican administration constitutes a direct repudiation of the judgment of the House Committee on Veterans' Affairs, takes into account not one iota of the thinking of that body, which has reached nothing but unanimous decisions, and goes further. It betrays all of the veterans who have fought this country's wars by refusing to keep promises made in good faith by the Republican National Convention in Chicago in 1952, promises reiterated by President Eisenhower, promises violated either directly by him or by his immediate advisers.

On the compensation and pension rolls as of May 31 there were a total of 3,699,778 veterans and dependents who were in receipt of compensation or pension. There are more now. Including peacetime veterans, who numbered 62,794, there were 2,053,467 receiving service-connected compensation, and most of them at rates below 50 percent disabling. There were 599,390 dependents of such veterans.

On the non-service-connected rolls, beginning with 1 survivor of the Civil War and going through the war in Korea, there were 528,347 non-service-connected veterans, all of whom must be totally disabled, and 515,595 dependents, all of whom must meet income limitations. The final proposal of the leadership is to grant a 5-percent boost in rates to 2,652,857 service-connected veterans and dependents and to refuse any relief to 1,042,492 beneficiaries. The increases themselves to the service-connected would amount to an additional 78 cents per month at 10-percent disabled on up to $8.62 for those who are totally disabled. There are, of course, a few who would benefit because of being rated above total. Widows would receive an additional $3.75 monthly with comparable increases to minors.

Mr. President, I now read another stirring editorial from the National Tribune, as follows:

THE GREAT BETRAYAL

Last December at the White House President Eisenhower said, "This administration is one that believes in keeping its promises," and a month later he made very kindly reference to the Nation's war veterans to whom, he said, "the country owes so much." A week ago in the Congress the President's party—the Republicans—repudiated the veterans' plank in the Republican Party platform, and, with the approval of White House advisers, turned down cold any and all legislation seeking to adjust pension and compensation payments to high living costs, thus deserting a personal Eisenhower pledge. This action of the House leadership constitutes an abject and cowardly betrayal of all United States war veterans and all of the needly and dependent loved ones of their honored dead. The promises made by the Republicans in their effort to be elected to the House of Representatives were not worth the powder to blow them up, and if the President is himself responsible for the directive to the House, the public statements of the Chief Executive himself do not have the value of the paper on which they were written.

In an adjoining column there begins a detailed and complete story of what happened to the veteran class in the Congress last week. It is a gruesome one and is as unbelievable as it is factual. For the first time since the tragic and brutal Economy Act of 1933, when a frightened and hysterical Democratic Congress rewrote veterans' laws and sent many a war hero to an untimely grave, the GOP had an opportunity to show an honorable and respectful concern for its warriors and their dependents. The party came in after a 20-year absence pledged to do that. It failed miserably on the first occasion it has had to adjust veterans' payments to living costs, and it used a bull whip to drive party members into line. As this comment is written there have been no repercussions. Veterans' leaders are stunned and the economizers off and on Capitol Hill have not had time to crow, but the reaction will come, and when it does, it is a certainty that there will be a payoff. The American people just happen to be constituted that way.

Briefly, the story is this. After many weeks of hearings on scores of pending bills, the House Committee on Veterans' Affairs came up with H. R. 9020. It sought to do two things—to grant promised cost-of-living pension hikes to most of our veterans and their dependents on the compensation and pension rolls, and to wipe out some inequities that appeared in similar legislation 2 years ago. The measure was reported unanimously by the legislative group designated by House rules to reach appropriate decisions on the subject. The bill was placed on the calendar and immediately Chairman EDITH NOURSE ROGERS, of Massachusetts, requested the powerful Rules Committee to grant the right-of-way for consideration. That was late in May. Twice since then the good lady tried again to get action, but to no avail. Subcommittee Chairman ED RADWAN, of New York, then was directed to file a resolution to discharge the Rules Committee from further consideration of H. R. 9020, which he did, this instruction also being the unanimous request of the Veterans' Committee. Under House procedure, that resolution had to lie for 7 legislative days when a discharge petition requiring the signatures of 218 Members, a majority, could be filed. That was done last Thursday and the move had to succeed if the full Congress were to have a chance to vote on the bill before an expected adjournment by July 30.

Unless the full 218 signatures are forthcoming, nobody is supposed to know who signed and who did not. That is a deep secret. But it is known that between 157 and 160 Congressmen placed their names on the petition before an early adjournment was forced. MRS. ROGERS did a valiant job. The House leaders, however, did a better one. They milled around the Chamber telling their cohorts it was useless to go to the Speaker's desk and sign up because there would be a compromise bill submitted and everybody would get off the hook. It was a great victory for Majority Leader CHARLIE HALLECK, a dauntless World War I veteran in school at 17 when the Kaiser went on his rampage, and for those White House people who probably did the President's thinking for him.

Now let us go back a day before defining the wonderful compromise. It's as interesting as it is important, and our veterans should know where they stand. On July 13, Tuesday, a group of veterans' spokesmen

met with Speaker JOE MARTIN to try to dislodge the bill or to find out what was wanted in the nature of a compromise to cut a few dollars from the $232 million measure. MARTIN thought H. R. 9020 was all right as it was, if our information is correct. HALLECK would not put in an appearance. Nobody was going to hook him, but he went to the White House for an 8:30 a. m. conference Wednesday even though he did not offer any terms to the Veterans' Committee.

Then came the fateful afternoon session when the discharge petition failed and HALLECK won his fight by telling the Congressmen a compromise would be offered and passed. The veterans' group was told that the White House would accept a 5-percent increase deal, so it met in late afternoon for 2 hours and rewrote the bill giving, with a few exceptions, all veterans and dependents on the rolls that miserable hike. On Wednesday the chairman and several committee members had met with Speaker MARTIN. They went back to him on Friday with the new deal, to see whether or not it was acceptable. We've been unable to find out who else, if anybody, was present but it has been announced that the President would be agreeable only to a 5-percent increase for service-connected veterans and dependents alone. Under such a proposal service-connected veterans would receive the munificent sum of 78 cents additional and on up the line to $8.62 per month at total, and the widows and kids would get a comparable sop. All of the nonservice connected would be thrown to the dogs. That was the promised compromise. The purpose that is sought is to divide the sentiment of the veteran class by giving two-thirds of the beneficiaries a little just to keep them quiet and keep their votes in line, if possible, and tell the other third to go to hell or get something better, if they can, on old-age-pension rolls under the States, where the powers that be want to place them anyway, and where all others will go eventually if they succeed.

The betrayal is complete. We do not know what can be done about it or what the Veterans' Committee will have decided to do on Tuesday after we go to press. It can, if it wishes, throw a bare bone to the service-connected class and let it go at that. It can refuse to accept the White House ultimatum and let the whole bill die, or it can make a guess that the Congress will not adjourn on July 30, fight for the rest of those 218 signatures and put the bill through looking to Senate approval and a possible veto. We hope they'll do the latter because we cannot believe that the service-connected class will be satisfied to accept a miserable pittance when those who most need help—totally disabled non-service-connected veterans and helpless widows and kids—get nothing. Misled as they were by their own leadership, and realizing now that there is no compromise in the White House directive, we once more call upon all House Members who have not already done so—Republicans and Democrats alike—to place their signatures on the Radwan discharge petition, and to then assure their constituents back home that they have done so. This runout on pledges will constitute a major issue next November, because people do not forget in 3 months who helped to deny to them a meager aid required to keep body and soul together.

Now let's get back to those promises the Republicans broke for themselves and for President Eisenhower—or, for that matter, that Ike himself violated if he was responsible for the Halleck orders. The essential part of the veterans' plank on which hinges this legislation reads, "We propose * * * that compensation be fairly and equitably adjusted to meet changes in the cost of living." Apparently the boys at 1600 Pennsylvania Avenue have latched onto that word "compensation" in their effort to desert considerably over a million pensioners on the rolls. That information has come to us. We had anticipated that it might, so we wrote to Candidate Eisenhower, on August 22, 1952, as follows: "Unusually high living costs have created among the pensioner class, including veterans and their dependents, a seriously difficult situation which requires periodic adjustment of compensation and pension payments based upon high costs of living, and within the ability of the country to pay. One of the party platforms mentions this condition. Would you be good enough to interpret these planks in the light of your own thinking?" That appears to be a fair enough question, and sufficiently distinct so that nobody could misunderstand it. We would interpolate here that this correspondence was made known as recently as December 16, 1953, to the Presidential Secretary, Gov. Sherman Adams, so there can be no excuse about not understanding the English language when we spoke of pensions as well as compensation. Here is the pertinent reply by Mr. Eisenhower to that direct question: "As has been clearly stated in the Republican platform, adjustment of compensation and pension payments must be made from time to time with changes in the cost of living. This responsibility I shall never overlook."

Well, that responsibility has now been overlooked, and the concern is that of every Member of Congress who was elected on the Republican ticket in 1952. It is the word of a great political party and their nominal leader, the President. Answerable to it are the majority leader of the House, the Speaker, and every member of the party. And because a similar pledge prevailed in the Democratic Party platform, the Democrats, too, are at least morally accountable to the veteran class for last week's failure, something recognized by Minority Whip JOHN MCCORMACK, of Massachusetts. The foreign aid program, which is about to exceed payments to veterans made during our entire history and which assists many foreigners who are responsible for the plight of the country's disabled and aged veterans and their dependents, is, the administration says, "paying off." We affirm here and now that the treatment accorded to the veteran class by the party in power does not and cannot pay off, and we here and now go on record to help assure that it will not.

It is a painful thing for one who has been an active Republican for 40 years to have to write as this editor has done above. We would hope that the catastrophe of last week might in some miraculous manner be undone or that something could still be accomplished in this session of Congress to right an awful wrong. We recognize, however, that such a hope is all but futile. We regret beyond measure the road we must take in the future, but we have advised the White House that our policy as a spokesman for the veteran class must be guided by the treatment accorded to them. We know no party when the welfare of our war veterans and their dependents is at stake. Who opposes them opposes us. We cannot abide with anybody whose given word is worth nothing. In this instance direct promises have been violated without any apparent regret by the violators. We shall always fight that sort of perfidy, let the chips fall where they may.

Mr. President, for emphasis, I again read a sentence of this editorial:

It is a painful thing for one who has been an active Republican for 40 years to have to write as this editor has done above.

Mr. President, in conclusion, three cheers and sincere wishes for long life and a green old age for the National Tribune-Stars and Stripes, whose distinguished Republican editor, with his forty years of loyalty to his party, can speak out so boldly, patriotically and convincingly as he has nobly done in the notable articles I have read to the Senate tonight.

The PRESIDING OFFICER (Mr. WILLIAMS in the chair). The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. JOHNSON] for himself and the Senator from Iowa [Mr. GILLETTE].

Mr. LANGER. Mr. President, we have before us what the power trust hopes will become the Atomic Energy Act of 1954. I think that the hope of obtaining this extraordinary giveaway of the people's new atomic power resource is doomed to disappointment. The people of the country are alert to what the anti-public-power policy of the administration threatens to do to low electric rates and abundant use of power. And they already recognize the bill before us for what it is—just the final blow to Federal power policy.

I refer to the hope of the well organized private power monopolies for a new Atomic Energy Act—rather than for amendment of the McMahon Act of 1946—because this bill, which has been reported by the Joint Committee on Atomic Energy, does not propose reasonable amendments to the original legislation. The authors of the pending legislation have gone out of their way to tear up the McMahon Act and to provide a new law which would deny any recognition of the fact that we are here today presiding over the opening of a new epoch, an epoch which will, without question, profoundly affect the American way of life for generations to come.

The private interests that have influenced the writing of the bill want none of that breadth of vision. They feel that the wool must be pulled over the eyes of the people before they can hope to get possession of the power of the atom—or to get control of the use of the power which the McMahon Atomic Energy Act of 1946 makes an inalienable resource of the people, whose vast investment has made it available for the uses of man.

As it always seems, in connection with the great natural resources of the world, private enterprise feels that it has a divine right to sit at the tollgate and exact tribute from the people for the use of what, in the last analysis, belongs to the people.

But I am convinced that, when it comes to electric power, the people of the United States have had too much experience with the results of a true public power policy to sit passively by while the rape of the atom is consummated. They know what it means to free rural electrification from the restrictive influence of private power monopoly; how it has raised the percentage of electrified farms from a scant 11 percent of the total in the country to more than 90 percent; how it has brought electric rates down wherever it has been effective, so that the average use of electricity in the home has increased to the point where, except in the remaining high-rate areas, housewives can use many of the electric appliances which mean higher living standards. The people have known how it has contrib-

uted to industrial expansion and full employment.

And the people, who have come to know all these possibilities springing from a Federal power policy which challenges private monopoly, are not going to stand by and let private monopoly climb back into the saddle, either through the administrative interpretations of the Eisenhower administration, or its prostitution of the Atomic Energy Commission to disrupt the TVA, or through favorable action by Congress on this atomic-energy bill, which would junk all the public safeguards which the McMahon Act of 1946 threw around the future use of the atom.

Since the Eisenhower administration began its campaign to destroy the Federal public-power program, I have followed its successive attacks carefully, because they come very much within the scope of the Monopoly Subcommittee of the Senate Judiciary Committee, of which I am chairman.

And I have followed with equal concern the rising reaction of the people throughout vast areas of the country to defend their power policy—that is, their right to ample supplies of low-cost power to supply their public and cooperative electric systems, and to assure healthy expansion of industry.

When the administration struck at the rural electric cooperatives in the Missouri River Basin with a series of so-called marketing provisions, which were in open violation of preference provisions written into Federal power marketing laws by the Congress of the United States, the Judiciary Subcommittee held hearings.

I wish that all Members of the Senate could have been present to get an idea of how the power companies are using the administration to put over private monopoly policy on the people, and how the people of the region are reacting through the leaders of the organizations.

When the administration was moving to force the rural electric cooperatives of Missouri, Arkansas, and Oklahoma on the mercy of the private power monopolies—after the House Appropriations Committee had led the 1953 session of Congress to abrogate the contract which the cooperatives had signed in good faith with the Federal Government—my committee again held hearings.

And again I wish all Members of the Senate could have listened in on the reaction of the people of those fine States to the new power policy.

Eventually, this rising of the people is going to bring not only a return of the power policy which the present administration is working so desperately to reverse before the voters again go to the polls, but it is also going to bring further steps toward establishment of a sound power policy on foundations which reactionary private power monopoly influence can never again threaten.

The people are going to look northward to the great neighboring Canadian provinces, like Ontario and Saskatchewan, with their public-power systems—or to the Tennessee Valley Authority system which, in spite of all its efforts, a private-power-influenced administration is not going to be able to destroy; and they are going to use their Federal Government and their State governments and their local governments, to whatever extent necessary, to assure them low-cost electric power for home and farm and industry in abundance.

This growing reaction of the people to the attack on their power policy includes the demand that, now that we are close to the realization of the next great step forward in the development of electric-power resources—the harnessing of the atom—this development be worked out through legislation which will assure that the atom shall serve the people whose money is invested, rather than private power monopoly.

That is why they are against the present bill—the "give away the atom" bill, which the power interests are trying to railroad through Congress in the last days of the session. They want to get control of atomic power before the popular reaction has gained full force. This they consider the major step in getting the Federal Government out of the power business so that private monopoly can proceed at its leisure to starve out and ultimately capture the nonprofit public and cooperative electric systems.

It is important that, before they act on this private monopoly inspired atomic energy bill, the Members of Congress take full cognizance of what the people, through organizations representing millions of voters, are saying about the drive on Federal power policy. For we are supposed to represent all the people—not just the United States Chamber of Commerce, and the National Manufacturers Association, and the Atomic Industrial Forum, and the National Association of Electric Cos., with Purcell Smith as its spokesman on Capitol Hill.

Because it is important for Members of the Senate to understand where the people stand on the issue before us in this atomic power bill, the people who were not consulted, I am going to devote my remarks to some of the resolutions and statements of position adopted by representatives of millions of farmers and industrial wage earners on the present state of power policy.

The statements to which I shall refer were adopted at important gatherings and express the interest of national and Statewide organizations. They express a sense of urgency which will not be denied. They include:

The statement of principles and position adopted by participants in the National Electric Consumers Conference held in Denver, Colo., December 10–11, 1953, under the auspices of the National Farmers Union.

The resolutions adopted at the 12th annual meeting of the National Rural Electric Cooperative Association, held in Miami, Fla., January 11–14, 1954.

The statement of goals, adopted at the Northeast Electric Consumers Conference, held in Albany, N. Y., February 26–27, 1954.

The resolutions adopted by the American Public Power Association, speaking for a majority of the municipal electric systems of the country, held in Chicago, Ill., May 6–9, 1954.

The report of the working committee of the Electric Consumers Workshop held in Wasington, D. C., May 10–11, 1954.

These important meetings drew representatives from rural electric cooperatives serving more than 3,500,000 farm customer-members, from a large proportion of the more than 2,000 American municipalities which own their own electric systems.

We have some of those in the State of North Dakota. We have one at Valley City, N. Dak., which has been used as the yardstick for all the private power companies within the borders of the State. That is at Valley City, which has its municipal-owned electric light plant. That has been adopted as a yardstick by other States also, who have sent men there to note the success of that particular cooperative. Also the National Farmers Union with a membership of many tens of thousand farmers; from the Cooperative League of the United States of America, representing a wide consumer and producer interest throughout practically all of the States; from the American Federation of Labor and the Congress of Industrial Organizations; and from special organizations like the National Hells Canyon Association, speaking for more than a million people in regard to the administration's disruption of the Federal power program, which was doing so much to build the Pacific Northwest.

I wish to make it crystal clear, Mr. President, that I am following in the footsteps of that great Republican, Theodore Roosevelt, under whose administration this entire public-power policy was formulated. It was Theodore Roosevelt, with a great Secretary of the Department of the Interior, that opened this path for the Republican Party.

I desire also to make it crystal clear that in my judgment I speak tonight for the Republican Party, the Republican Party of Abraham Lincoln, instead of the party of some of my colleagues, who have voted as they have voted tonight.

Mr. GORE. Mr. President, will the Senator yield?

Mr. LANGER. I decline to yield at this time. I do not care to be interrupted. I shall be glad to answer any questions at the conclusion of my remarks.

Mr. President, I wish that every Member on the floor who claims to be a Republican would read the record of Theodore Roosevelt on public power.

Anybody who reads that record cannot fail to realize that the bill we are debating tonight would wipe out all the things Theodore Roosevelt stood for at the time he was a great President of the United States.

It should be made crystal clear that what these meetings said about Federal power policy and about the atom reflects a mounting public opinion which we cannot disregard.

The National Electric Consumers Conference last December in Denver was a truly remarkable gathering which went to work with precision to develop a clear picture of the power situation and formulate the views of its participants. I had the privilege of attending the final session myself, flying to Denver after the

conclusion of the hearings of the Judiciary Monopoly Subcommittee on the administration's drive to destroy the rural electric cooperatives in the Missouri River basin. They actually sought to legislate private power companies into the preference classification reserved by Congress for public and cooperative electric systems.

The National Electric Consumers Conference brought together representatives of 88 different organizations, from 30 States, including spokesmen for major farm, labor, public power, cooperative, and rural electric groups. I have in my hand the statement of principles and position which it adopted. And I want to go over that statement briefly for the benefit of the Members of the Senate who are being called upon to take a position on the private-power monopoly atomic energy bill.

You will note as I read that splendid and forward-looking expression of widespread public opinion on the power issue that it refers briefly to the abuses of the private monopoly holding company era which characterized the administrations of Presidents Harding, Coolidge, and Hoover; it then turns to the evolution of the partnership in the power field between the Federal Government and the municipal rural electric systems; and then before taking up a positive outline of a sound Federal policy program, it touches briefly on the moves the present administration is making to disrupt that partnership.

I want to say again, Mr. President, speaking as a Republican from the Republican side, that North Dakota was beaten by the State of Vermont by only one-tenth of 1 percent in the votes cast in the last election for Dwight Eisenhower. I speak for the Republican Party, certainly of the northwestern part of the United States.

I call attention to the fact that Mr. William Howard Taft, when he was President, who had the opposite view from Theodore Roosevelt, was defeated at the end of one term. Mr. Hoover, who did not carry out the Theodore Roosevelt policy, was defeated at the end of one term. I predict tonight that if this administration goes ahead with the power policy it has formulated, against the will of millions and millions and millions of people, it will also serve one term, and no more.

Mr. President, if it goes ahead as it has done during the past few months, it should, in the opinion of the senior Senator from North Dakota, serve only one term.

Surely my Republican colleagues on this side of the aisle must have learned something as to what happened when Mr. Taft was in power. Surely they must recognize what happened when they had control of the 80th Congress. Do they never learn anything? I ask them, do they learn nothing from experience? In order to get the full flavor of the statement I shall read the text. This was drawn up in Denver. Eighty-eight organizations sent representatives, and those representatives came from 30 States.

Yet, tonight, Mr. President, one distinguished Senator arose and indicated that he knew more of what the people want in connection with electric power than do the people who represent the electric cooperatives, which I shall name.

Is it not strange how a man in public office sometimes believes he knows so much more than do the people who sent him to the Senate?

Mind you, Mr. President, this is a statement of principles and position of the participants in the National Electric Consumers Conference, held at Denver, Colo., December 10 and 11, 1953.

I might add, Mr. President, that the distinguished Senator who spoke tonight was not even present. I doubt that he has ever read what his constituents said at that meeting, which was composed of leaders of the REA.

Here is the statement of principles adopted by the representatives from 30 States, consisting of several thousand delegates, all of them experts in electric power, and who knew what they were talking about. I read:

The assurance of an abundance of electrical energy for the farms, the cities, and the industries of America need never be a problem. However, until the early thirties of the present century, securing power needed for national development was a continuing struggle; and unbridled, unprincipled, and gigantic power monopoly was the reason.

Instead of building power systems, the power monopolies watered stocks; instead of selling power at reasonable cost, they influenced and captured rate-regulating bodies. Secretly paid speakers, secretly supported front organizations, and even tampering with textbooks, were but parts of their campaign to brain-wash the American public. The financial, political, and propaganda activities of the private power companies uncovered by the Federal Trade Commission in the late 1920's and 1930's constitute one of the blackest chapters in the history of American business.

I ask, Mr. President, do we want to go back to that?

However, in the early 1930's there was begun a true partnership arrangement between the Federal Government, municipalities, and rural electric cooperatives which began to break this electric power monopoly.

Measuring sticks as to fair and reasonable costs of electric power were established. Through them was begun a great program which has brought power to millions of homes previously unserved, and power for new business and great new industries. The result has been lower electricity costs for all American consumers, either directly or through the effect of the yardsticks.

I may say, Mr. President, that on the Great Plains of the State of North Dakota lived my sister, less than a quarter of a mile from a big private power concern which had a transmission line. I endeavored to get my sister's home hooked up with that power line. They asked the great sum of $1,300 merely to connect up. The governor of the State, a few years later, had the privilege of providing an REA for the locality, and my sister joined and paid $5 and within a comparatively few months she connected with a great transmission line.

That case represents what has happened to millions of farm women all over the United States of America. They have been relieved of many, many hours of drudging slavery which previously they had to endure on the farms. Whether they churned, whether they washed clothes, whether they pumped water—no matter what the work was—it was difficult. Through the REA 90 percent of that work was taken off the shoulders of those farm women. And that is not all. Today in farm homes, because of radio, refrigerators, and many other things which are no longer considered luxuries, but necessities, the entire farm life of America has been changed. The senior Senator from North Dakota is not going to be one to destroy what has been accomplished. In one county on the edge of South Dakota, because of the policy of Mr. McKay, some of the farms have already had to dispense with some of those necessities. They no longer have them, and are back to using kerosene lamps. That is going on all over the United States.

Continuing reading the statement:

Much remains to be done, however, to complete the job of assuring abundant power. Power use is increasing, and population is increasing. Power supply must be continuously expanded, or our standards of living will fall. Low-cost power in abundance is necessary to a full-employment economy.

Events which have transpired during the year 1953 have brought the Federal power program to a halt, raising serious doubts as to its continuance, and even foreboding liquidation of existing facilities.

What are these events of 1953 which are disrupting the true Federal local partnership to foster national interests?

Private power monopolists, coddled and assisted by Federal officials, have moved toward its liquidation. No new Federal power projects are to be built. Power from present dams is to be leased on long-term contracts to private interests. Federal power supply responsibilities are to be denied. Our great regional resource development programs are to be impaired or to be made wholly infeasible by a giveaway of key dam sites. Present local public and cooperative power systems are to be made dependent on local private power monopolists for their continued existence. The public right to preference is to be denied.

This is not the statement of the senior Senator from North Dakota. This is the statement of representatives from 30 States—experts—who met on December 10 and 11, at Denver, Colo. This is the resolution they adopted:

The power monopolists are today again deep in the unethical, immoral, and evil political propaganda practices of a quarter of a century ago.

The current developments constitute a threat to our electric power systems, our standards of living, and our whole national economy, which has aroused the indignation of citizens across the Nation.

If anyone thinks the people are not aroused, let him get the poll of the junior Senator from North Dakota [Mr. YOUNG], a Member of this body. If any Senator thinks the people are asleep and do not know what is going on, let him get the poll of the junior Senator from North Dakota, and read for himself to see what the Republican Party will have left when it gets through with this deal they are now trying to put over. I continue:

Recognizing this threat, we, the participants in the National Electric Consumers Conference, called at Denver, Colo., Decem-

ber 10–11, sponsored by the National Farmers Union and attended by more than 600 representatives of nearly 100 REA, farm, labor, church, consumer, and other organizations in 30 States, acting as individuals, do adopt the following statement of policies and principles:

I. PRINCIPLES FOR A FEDERAL POWER PROGRAM

In fulfilling the responsibility of the Federal Government for assuring an electric-power program that fully serves the people's needs, the following principles should be followed:

1. Establishment by Congress of the principle of Federal utility responsibility for that portion of regional power supply required to meet the expanding needs of present or future nonprofit electric systems and to support sound expansion of the regional economy.

2. Legal provisions requiring that preference be given to public and cooperative nonprofit agencies in sale of wholesale energy produced by Federal projects must not be impaired.

3. Establishment by Congress of regional development agencies which will recognize hydroelectric development as a primary objective of multiple-purpose river basin programs, but will also provide for the optimum conservation and development of all values, including flood control, navigation, irrigation, recreation, and others.

4. Construction by Federal agencies of steam-electric stations and transmission lines necessary to firm hydro power and meet power requirements of service areas, and to carry that power to load centers.

5. Limitation on the discretion of the Federal Power Commission to grant licenses for private development wherever they conflict with a Federal program.

6. Full technical and financial support for the vertical as well as horizontal expansion of the rural-electric program, including—

Assistance to generation and transmission cooperatives where needed to provide the member cooperatives with an abundant power supply in the future;

Financial and technical assistance in acquisition programs; and

Removal of population limitations on communities which rural electric cooperatives may serve, which are creating serious problems in connection with annexations and community growth, and which deprive communities of a free choice as to who shall serve them.

7. Establishment by Congress of interregional wholesale power supply grids interconnecting Federal hydroelectric systems, Atomic Energy Commission nuclear powerplants, local public and cooperative generating facilities, and private electric systems.

Who says this was not drawn up by experts? Who says these men did not know a thousand times more than a Senator, who gets up on the floor and tries to insinuate that he knows more about it than the men who represented his State and my State at that great conference? I shall go on to show what happened at some other places.

8. More active Federal development of atomic power by the Atomic Energy Commission in cooperation with the program of the proposed interregional grids. Atomic power so developed should be marketed as an element in the general power supply from the Federal grids under the general Federal responsibility set forth in this statement.

9. Federal legislation to make it illegal for any electric or other utility engaged in interstate commerce and enjoying guaranteed profits without economic risk while operating as a private monopoly under franchise privileges granted by the public, to finance or engage in, either directly or indirectly, any activity designed to influence political action at either local, State, or national levels of government, or to create public opinion for or against any such actions. This legislation should be enforced by the Federal Power Commission. The Internal Revenue Act should also be amended to preclude the charging off of expenditures for institutional advertising, contributions to organizations, or other public relations activities, to expenses as deductions for tax purposes. Owners of electric utility companies should not be privileged to advance their personal political prejudices and interests by the expenditure of tax-free income which is collected from rate payers above and beyond the legal fair rate of return.

Mr. President, how well I remember that, during the time I was Governor of my State, a State senator, a lawyer, whenever a bill came up in the State legislature, shouted to high heaven against public power and in favor of private monopolies. But when an investigation was undertaken by the State legislature, it was found that the State senator from Fargo, N. Dak., was on the payroll of a private utility.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. LANGER. I prefer not to yield at this time.

Mr. KEFAUVER. I was going to talk about an investigation by the Antimonopoly Committee.

Mr. LANGER. I should like to finish my speech. Then I should be glad to answer any questions. I shall take only a brief time.

Mr. KEFAUVER. I hope the Senator will talk as long as he wishes.

Mr. LANGER—

10. Federal legislation requiring that benefits from accelerated tax amortization be passed on to consumers.

11. Actions condemned.

We specifically condemn:

The Interior Department's new power policy.

It is a very strange thing that one of the men from a neighboring State, who favored the resolution, was head of the Eisenhower campaign in that State.

I continue to read the list of condemnations:

The Missouri Basin power marketing criteria which penalizes public power systems and farmer-owned electric cooperatives.

Violation of the Federal preference clause by long-term contracts with private utilities without withdrawal provisions to protect preference customers, such as already negotiated by Bonneville Power Administration and those proposed in the Missouri Basin.

The cutback of REA loan programs and crippling of its technical assistance programs.

Any alterations of established credit policies of REA which might impair the financial feasibility of the cooperatives, thereby curtailing any necessary system improvements and expansion of service to unserved consumers.

Federal withdrawal of opposition to the licensing of private power dams at Hells Canyon which will ignore tremendous downstream power benefits and great secondary flood control, irrigation, navigation, recreation, and other conservation benefits.

Federal withdrawal of opposition to private power dam license on the Kings River in California.

Surrender to the private utilities of public power from the Central Valley project in California, and destruction of the Federal preference provisions by disposal of Central Valley properties to the State.

Repeal of the 160-acre limitation on the use of water in Federal irrigation projects in the Federal reclamation law.

The shameful repudiation of legal contracts between Southwest Power Administration and REA generating and transmission cooperatives.

The proposed giveaway of Niagara Falls to five power companies, and the licensing of a New York State development on the St. Lawrence River without provision for preference to public and cooperative bodies.

In that connection, I invite the attention of the Senate to the testimony taken before the Antimonopoly Subcommittee, which showed that even after the United States district court in Washington ruled in favor of the cooperatives the Department of Justice took an appeal and has kept the REA's from getting the money justly due them, first by an act of Congress, and, secondly, by the stipulation entered into between the cooperatives and the United States Government itself. If the Government's word is not any good, in heaven's name, who are we going to trust?

The list of condemnations continues:

Failure to maintain an adequate rate of generation installation in the Tennessee Valley and the Columbia River Basin.

The proposed Georgia contract, which would establish private monopoly tollgates between Federal projects and public preference customers.

Elimination of new starts and slowdown of projects through unwise reductions of Federal investments provided in the annual national budget.

Retarding of industrial growth by refusal to see additional power from Federal transmission system directly to new industry.

Packing of administrative agencies and regulatory bodies and commissions with enemies of the public-power programs.

Wrecking sound conservation policy of the past 50 years by removing the Federal Government from responsibility for full multiplepurpose development of the Nation's river basins.

Inequitable allocation of project costs to power by deliberate, unwarranted, and unfair deflation of other multipurpose use costs so as to increase electric rates.

Proposals for a Federal tax on income of Federal, municipal, and cooperatively owned power systems, and to a Federal tax on municipal bonds.

III. A 20-YEAR PLAN

We insist that during the coming session of Congress authorizations and appropriations be made, adequate to provide the electric power and transmission lines necessary to give substance to the true Federal-local partnership power program which is based on legislation dating through a half century.

Mr. President, that was in the platform of the Republican Party. Why do they not carry it out? What is a platform for? Is it to run on, and then after someone is elected, to throw it into the wastebasket? That is exactly what the Republican Party promised when it wanted to elect their men to high office; and the American people believed it.

Necessary Federal construction programs should be planned on a 20-year basis, with authorization of construction geared to the needs of at least the 6 succeeding years, and with construction scheduled so as to assure the lowest possible construction costs.

The next session of Congress should approve funds for the construction of projects, chosen from among those already authorized or planned, so as to meet the power needs of all areas of the Nation and assure

abundant energy for national defense and full employment.

IV. A PROGRAM OF ACTION

Citizens of America who demand abundant low-cost energy for the Nation are uniting in a rising tide of indignation against the proposed new power policy through this great meeting, and at others across the Nation in Portland, Albany, Omaha, Washington, Sacramento, Oklahoma City, and elsewhere.

There is recognition everywhere that the fight to save America from the blight of energy shortages, high rates, watered and inflated rate bases, reverse yardsticks, unbridled exploitation, and continued brain washing with the canned propaganda of unprincipled monopoly publicists cannot be won by forces divided into tiny units. An enemy cannot be repulsed by each citizen waiting to fight alone at his own doorstep.

The cause of the central valley of California, the New York-New England area, Hells Canyon, the Columbia Basin, the Tennessee Valley, the upper Colorado, the Missouri, the Southwest, the Southeast and other areas is each the cause of everyone of us. Assurance of the continuation of the REA program in all areas, including an adequate and expanding generation and transmission program for the future, is also the cause of all of us.

I want to refer for a minute to the 80th Congress. Mr. President, I wanted to get out on the platform in that election. I listened to the statements that under the Republican administration Congress had appropriated more money for REA than had ever been appropriated before. And that was true. Up to that time, it had appropriated for REA more than any other Congress—$300 million. I appeared before the Appropriations Committee, together with other Senators who were interested. We had that amount raised to $400 million. What happened to it? Why, as every Senator on this floor knows, $700,000 was taken out of the funds for the administration of REA. That meant that 172 engineers were taken off the rolls. In North Dakota, South Dakota, and Minnesota, how many engineers were there? Before a mile of construction is performed by the REA, an engineer has to lay out the plans.

He had to survey it, no matter how level the land was. That was the law.

Did we have 20 engineers left? Oh, no. The housewives had to wait, wait, wait another full year. Were there 15 engineers? No, Mr. President, not when the 80th Congress got through cutting $700,000 from the administrative funds for the REA.

Were there 10 engineers or 5 engineers left for the States of North Dakota, South Dakota, and Minnesota? Oh, no. North Dakota, South Dakota, and Minnesota had only 1 engineer for all 3 of those States, in connection with constructing the REA's.

In my State I ran for reelection. I remember that opposing me was a man who said he was running on a platform of being a friend of the REA—one of the same sort of friends I sometimes see in Washington. Mr. President, when the REA consumers got through with that man, he carried only 3 of the 53 counties. I always give credit to the REA users for my carrying of the 50 counties. I give credit for that to them and to the knowledge they had of the fight I made to get more engineers. As the Senate knows, we got more. We called the head of the REA before us; and he testified under oath to the truth of what had happened, with the result that we got the additional engineers.

I read further from the resolutions:

Our Congressmen and Senators must be urged to support Federal development programs in every area. They must be judged on across-the-board support of a total national program and not on their votes on local projects alone.

Our growing unity must be perfected.

We urge all organizations to publish full voting records on all power issues.

We strongly endorse the Electric Consumers Conference being planned in Washington, D. C., for early in the coming session of Congress.

We urge that regional electric consumers associations and similar groups, already appearing in many parts of the Nation, be encouraged and supported.

We urge that the Electric Consumers Conference to be held in Washington complete an effective federation of all groups to assure nationwide unity of action on each front.

Those are the resolutions that were adopted in Denver.

You will note, Mr. President, that the National Electric Consumers Conference recognizes that atomic power will have an important place in future Federal power programs. Thus, the seventh principle adopted by the conference calls for the establishment by Congress of interregional wholesale power supply grids, interconnecting Federal hydroelectric systems, Atomic Energy Commission nuclear powerplants, local public and cooperative generating facilities, and private electric systems.

Similarly, the eighth principle calls for more active Federal development of atomic power by the Atomic Energy Commission in cooperation with the proposed interregional grids. It also calls for the marketing of atomic power so developed as an element in the general power supply from Federal grids, under the general Federal responsibility for meeting the expanding needs of present and future nonprofit electric systems, and supporting sound regional expansion called for by the statement of principles.

Mr. President, I hold in my hand a telegram I have received from one of the most distinguished men who ever served in the United States Senate, a man who served in the Senate longer than almost any other man—my great friend, Senator Kenneth McKellar, of Tennessee. I think it appropriate that I read a telegram I have received from that distinguished man, now in the declining years of his life, a man who, in my opinion, certainly is just as wise as any Senator now on this floor, if not wiser:

JULY 12, 1954.

Hon. WILLIAM LANGER,
Senate Office Building,
Washington, D. C.:

As you know, the building of public-power dams was the main work of my long career in the Congress. I got the first dam built on the Tennessee River by bill June 3, 1916, and thereafter almost entirely through amendments offered by me in the appropriation bills we built all the dams on the Tennessee and Cumberland Rivers. After it was shown that the dams were a success in Tennessee our western Senators wanted them in many of their States. First as a member and then as chairman of the Appropriations Committee I aided the western Senators in every effort to build their dams and as I recall in like manner voted for and earnestly worked for a like proposal on the St. Lawrence River. These dams in Tennessee and in the West are the pride of my services in the Congress. I beg you not to destroy the Tennessee Valley Authority. In my heart I know you do not want to do so.

With best regards,

KENNETH D. MCKELLAR.

Mr. President, I well remember the occasion when Senator after Senator on both sides of the aisle rose and paid high tribute to that grand man from Tennessee.

Mr. President, I have received the following telegram from Bismarck, N. Dak.:

BISMARCK, N. DAK., *July 15, 1954.*

Senator WILLIAM LANGER:

We, the members of the North Dakota Association of Rural Electric Cooperatives, in convention assembled, contend that the Cole-Hickenlooper atomic-energy bill now before Congress will not be in the interest of the rank-and-file public but will be the biggest giveaway of public resources to private parties ever perpetrated in history. We respectfully request your urgent efforts in opposition to this bill.

R. G. HARENS,
Executive Secretary, North Dakota Association of Rural Electric Cooperatives.

Mr. President, I may say that North Dakota is an agricultural State with approximately 60,000 farmers; and the farms of over 90 percent of them are hooked up to REA, according to the statements of their representatives meeting at Bismarck, N. Dak., on the occasion when representatives of all those cooperatives met in session.

For the benefit of any Senator who may think he knows a great deal more about electrical energy, atomic energy, and that sort of thing than do the men who have hired experts for many years, let me say that many Senators who do not know any more about the subject than I do are perfectly willing to rely on their own judgment. I frankly confess that I know very little about the subject. All I know is what I have learned from the experts. I know very little about it, but I think I know as much about it as does the average Senator, and perhaps a little more, because of the hearings I have held since I have been chairman of the Judiciary Committee. I yield to no man in this body except possibly some Senator who has specialized in engineering.

I should like to read a telegram which I have received today from Mr. J. E. Smith, president, for the board of directors of the National Rural Electric Cooperative Association. There is a man who is an expert and who has had the advice of hundreds of men in his organization. I attended one of their meetings. There were delegates present from Alaska, from every State in the Union, and from Hawaii. Surely the average member of the Republican Party, at least, in my humble opinion, ought to listen to the voices of some of those experts.

The telegram is dated July 21 and is addressed to me. It reads as follows:

By resolution passed unanimously at a meeting of the board of directors of the

National Rural Electric Cooperative Association at Wausau, Wis., July 21, 1954, the following message is sent to all Members of the Congress.

Mr. President, how often have I heard a Senator rise and say, "I am voting for this particular measure because it is recommended by Herbert Hoover. The Hoover Commission has recommended it. Therefore, it should be enacted." That is the same Herbert Hoover who was overwhelmingly repudiated by the people, a man who was my friend. The excuse given is that the Hoover Commission has recommended something. I am not quarreling with those men, but Senators often say that the reason they voted for a particular bill was that the Hoover Commission recommended it.

Here we have a situation in which we have a resolution from the National Rural Electric Cooperative Association. This message was sent to every Member of Congress. The last vote in the Senate shows that Senators paid no attention to it. I suppose if Herbert Hoover had sent it the situation would have been entirely different. But Herbert Hoover did not happen to be president of the board of directors of the National Rural Electric Cooperative Association.

This is what the telegram says:

By resolution passed unanimously at a meeting of the board of directors of the National Rural Electric Cooperative Association at Wausau, Wis., July 21, 1954, the following message is sent to all Members of the Congress:

It is our firm belief that the atomic-energy program developed with the people's funds to the extent of $12 billion—

I digress for a moment to ask, How much is $12 billion? Every acre of land, every horse, cow, and sheep, every bank deposit, and everything else we have in the State of North Dakota, based upon 100-percent valuation, is worth a trifle more than $2 billion. So the Government has spent 6 times that sum, or $12 billion. These men, as experts, are talking about the $12 billion of the people's money which has been spent in the development of atomic energy. They say:

It is our firm belief that the atomic energy program, developed with the people's funds to the extent of $12 billion, is a part of the public domain as much as public lands, the navigable rivers and other resources long considered to be the people's property. We feel most strongly that this is the basic premise which should guide the Congress in the consideration of S. 3690 and H. R. 9757.

We commend those Members of the Senate who have courageously set forward the issues in S. 3690 and urge the continuation of debate until all issues are clarified and the bill satisfactorily amended.

We urge that the licensing provisions and procedures be brought into line by appropriate amendments to make such licensing subject to the same safeguards applicable to water resources under the Federal Power Act. This includes public notice to interested parties, public hearings, and preference to public bodies and cooperatives on all licenses for the construction, operation, and fueling of atomic establishments for the production of electric power.

Mr. President, may we have order? There is so much discussion on the floor among Senators that I cannot hear myself.

Mr. WILEY. Where are the Senators, Mr. President?

Mr. LANGER. They are all around me, let me say to the distinguished Senator.

I was just reading a telegram coming from the Senator's own State, from the city of Wausau, conveying the message that the National Rural Electric Cooperative Association is opposed to the passage of the pending bill. The telegram is signed by the president of the board of directors of the association, consisting of thousands of members. I know that the distinguished Senator from Wisconsin will be very much interested in a telegram coming from his own State, because I remember how eloquently he spoke to some of the producers of dairy products in his own State, and how he stood here in the Senate hour after hour pleading so eloquently for those dairy producers. I think some of the finest speeches I have heard delivered in this Chamber have been delivered by my distinguished friend from Wisconsin. Not only that, but he made a great record in fighting the oleomargarine bill, fighting for the farmers who were producing dairy products.

Mr. WILEY. The Senator is doing fine. Carry on.

Mr. LANGER. I hope that before we are through with this debate to see the distinguished Senator from Wisconsin speaking in behalf of the REA cooperatives in the great State of Wisconsin.

To continue with the telegram——

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LANGER. I decline to yield at this time. I shall be glad to answer any questions when I shall have concluded.

Continuing with the telegram:

We oppose the granting of private patents on discoveries made with Government funds, in the past or the future, directly or indirectly, and we urge compulsory licensing of all patents affecting the use of this great resource. No private monopoly should be permitted to jeopardize the domestic welfare and national security.

We urge that preference in the purchase of electric energy generated as a byproduct of the atomic-energy program be given to public bodies and cooperatives. Section 44 should be so amended.

We urge amendment of the bills to empower the Atomic Energy Commission to construct and operate or license any other Federal agency to construct and operate electric generating facilities, and that preference in the purchase of electricity generated in such facilities be given to public bodies and cooperatives.

We deplore the attempt to use the Atomic Energy Commission to open the way for invasion of TVA by the private power companies via the so-called Dixon-Yates contract, and we urge both Houses to amend the Atomic Energy Act to specifically forbid the signing of such contracts.

We urge the Congress to recognize the vital importance of this wholesale revision of the Atomic Energy Act; that the Congress recognize that S. 3690 and H. R. 9757 are primarily electric-power bills, and that the rights of the people to the full benefits of their investments of $12 billion be recognized and safeguarded against monopolistic restraints and exploitation, through licenses, patents, subsidies for atomic fuel and any and all other devices.

J. E. SMITH, *President*
(For the board of directors of National Rural Electric Cooperative Association).

I may say, Mr. President, that the hour is late, and I have no desire to detain my colleagues on the floor. I am just about half way through with my remarks, and I was about to read what some other organizations have said in passing resolutions on this subject. I shall do that at a later time, and I shall be glad to answer any questions that may be asked of me at that time. For the present, Mr. President, I yield the floor.

INDUSTRIAL ATOMIC POWER AND ITS RELATION TO DEVELOPMENT OF OTHER NATURAL RESOURCES

Mr. CASE. Mr. President, I was about to say that earlier today—it is now 12:30 a. m., Thursday—but I suppose I should say earlier on the day this session of the Senate began, Wednesday, July 21, there was delivered at Rapid City, S. Dak., a very interesting address entitled "Industrial Atomic Power and Its Relation to Development of Other Natural Resources." It was delivered by Mr. Lawrence R. Hafstad, Director, Division of Reactor Development of the Atomic Energy Commission, before the Missouri Basin Inter-Agency Committee. The Missouri Basin Inter-Agency Committee is comprised of the Governors of the States within the Missouri River Basin, representatives from the Corps of Army Engineers, from the Bureau of Reclamation, and from other Federal agencies who are involved in the comprehensive plan for flood control and the general development of the waters of the Missouri River.

The address is an outstanding paper. It was presented by the one man who probably knows more than any other person about the possibilities of industrial atomic power and its possible use in the development of electric power.

In view of the fact that it is very pertinent to the discussion that has taken place in this debate, and because it is the last word from an authority in that field, I ask unanimous consent that the address appear in the RECORD at this point, as a part of my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INDUSTRIAL ATOMIC POWER AND ITS RELATION TO DEVELOPMENT OF OTHER NATURAL RESOURCES

It is in the tradition of science first to observe, then to understand, and finally, to utilize the forces of nature. For over half a century scientists from all over the world have been observing and studying the forces within the atom and dreaming of the time when these forces might be utilized in the interests of mankind. During the 1930's, the curve of this scientific activity began to soar upward.

In the last decade there has been a tremendous upsurge of interest in atomic energy, on the part of the general public, started by the dramatic introduction of this new force during the war for atomic-bomb explosions, and, increased more recently, in connection with the realization of the imminence of the possible use of the same force for peaceful purposes.

It is important that, as long-range planners, we keep a broad perspective in this matter. For this reason, I wish to emphasize that work has been going on in this field for several decades in a number of countries and that the ground swell of interest we are now

witnessing is international. A surge of interest in connection with military utilization has been capitalized upon in the national interest to support atomic weapons programs which give a temporary military advantage to individual nations.

IN ENERGY, CHEAPER THAN COAL

Interest in atomic energy stems from the fact that in uranium we have what promises to be both a compact and a cheap source of energy. It is certainly compact.

One pound of uranium, about a cubic inch, contains as much energy as several trainloads of coal, more precisely 1,500 tons of coal. That this energy promises to be cheap, we can see by calculating the cost of the 1,500 tons of coal. At $3 a ton, this would be in the neighborhood of $10,000, whereas the cost of 1 pound of uranium is more like $20.

When one stops to realize the endless hours of engineering effort which have gone into improving the various commonplace energy-using machines by a few percent in efficiency to reduce costs by a corresponding few percent, one can realize the challenge felt by engineers when presented with an opportunity of decreasing costs, not by a few percent, but by a factor of 500. This is the challenging technical problem that we face.

Before trying to describe for you the present status of our progress in this exciting field, I feel that it is necessary to clear away some of the misconceptions that have arisen in connection with the possible use of atomic energy for peaceful purposes. It is the very existence of this theoretical factor of 500 in the potential reduction of energy cost that has led to so much wild speculation and undue optimism. These speculations are based on calculations of energy content in the material only, and take no account of the costs of getting the energy out of the material and into a usable form.

So far as practical use is concerned, the calculations I have just given you are as significant as, but no more significant than, the calculations involving the amount of energy available, for example, in the tides of the ocean. The energy is there; no one questions that. The problem is to get the energy out and into a usable form at a cost which makes the energy, in this final usable form, no higher than that available from other competitive sources. In spite of the availability of the vast "free" energy of the tides, we do not draw upon this source.

In the field of atomic energy, the scientists have done their job and done it well. The magic and mystery have been eliminated by the discoveries of the scientists, and the nuclear reactions involved are now adequately understood. Now the problem is for engineers to provide mechanisms necessary for its utilization and for management to make the decisions connected with the economic problems involved.

PROBLEM OF HEAT EXTRACTION

By a historical accident, the possibility of utilizing this new energy source was developed during a period of international stress. As a result, the work accomplished in this field in our country has been done under Government monopoly.

In this situation, it has been necessary for the Atomic Energy Commission, in charge of the monopoly, to make decisions which, in this country, would normally be made by private industry. In either framework, however, the key question is: Will the end result justify the very high cost of development of an entirely new process for the extraction and utilization of heat.

To approach this problem rationally, it is necessary to make a market survey to determine the possibility or probable future demand for such heat or energy. This can be quickly done.

It so happens that in industrialized nations the demand for energy is going up extremely rapidly. Both the population and the per capita demand for energy are mounting. In this country the demand for electric power has been doubling about every 10 years and there seems to be no basis for assuming that this trend will stop. It is also clear from the studies of the Paley Commission and others that most of the increased demand is for energy from the fluid fuels—petroleum and natural gas, specifically. Hydropower, while still extremely important and without question the cheapest source of such energy, is unavoidably limited in availability and will, over the years, contribute a decreasing percentage of the power requirements. Coal reserves will no doubt be needed for conversion to gasoline, with substantial increases in costs.

With demand established, the remaining problem is the one of future relative costs between different sources of energy. Here the problem depends to a large extent on the color and shade of the several crystal balls used by various forecasters. In general, however, while the cost of power from atomic-energy powerplants, as now conceived, is undeniably high, historically the trend in a new industry is for a rapid reduction in cost as the technology develops and volume increases. On the other hand, in an old and established industry costs tend to stabilize, and eventually even to begin to rise again, as the technology is perfected and rising labor costs begin to dominate. Those of us in the atomic-energy business feel that the crossover point on these two curves is likely to come somewhere between 5 and 15 years from now, depending on the vigor and intensity of the development effort in the atomic-energy field.

FIVE TO FIFTEEN YEARS AWAY

For planning in connection with power and other resources, it is not unreasonable to try as best we can to anticipate the effect of events and conditions as much as 15 years in the future, and, of course, to revise our planning as we acquire more knowledge. It is for this reason I feel this conference is particularly timely and that you are to be commended for beginning to take account of the effects of atomic energy in your long-range planning.

Now let us take a few moments to look at the technical program in this field, so that I can tell you how far we have come and how far we still have to go along the road to economic atomic power. Let us first ask the question, Why is atomic power so expensive? If the fuel is cheap, why isn't the power cheap? Here we must dabble a bit in physics, but we need not go any deeper than the general knowledge one picks up from newspaper and magazine reading.

One of the first factors we must consider is the large amount of radiation, similar to that from radium and X-rays, which is given off by atomic reactors. Both instruments and personnel must be protected from this radiation. To provide this protection requires large, heavy, and therefore expensive, shielding.

A part of this radiation consists of neutrons. In fact, it is these neutrons which keep the chain reaction going. Certain materials absorb neutrons readily or are damaged by radiation. Other materials retain few neutrons—are "transparent" to them, the scientists say—and withstand radiation damage fairly well. Generally speaking the latter class of materials can be used as structural materials in the core of the reactor which produces the heat. This is clear when one remembers that the neutrons are necessary to keep the chain reaction going and that any material which absorbs neutrons would have a dampening effect on the reaction. Yet it is no more mysterious than to say that any material, added to a wood or coal fire, which would reduce the available oxygen would tend to put the fire out.

Another requirement for reactor materials is that they must stand high temperatures. If we are to extract heat from the reactor, the higher the temperature with which we start, the easier it will be for us to extract the heat. Still another important materials requirement is that they withstand corrosive attack by the coolant—usually water or liquid metal—which carries off the heat so that it can be utilized.

FOUR NEEDS IN REACTOR CORES

Thus, for the reactor core we need materials with four properties; first, they must stand high temperatures; second, they must not absorb too many neutrons; third, they must stand exposure to intense radiation; and fourth, they must stand up under corrosion.

Now we begin to see the difficulties. There are very few materials available which can simultaneously meet these four requirements. In fact, uranium itself, which obviously is a very necessary component of the reactor core, is a particularly bad actor so far as stability in the presence of radiation is concerned.

Control is another serious problem. It is obvious, I think, that the very compactness of the fuel source itself introduces a hazard. For civilian purposes, it is necessary that the enormous store of potential energy within a reactor core be released gradually and under controlled conditions. In a power reactor, uncontrolled release of this energy, while extremely unlikely to lead to an actual explosion, can conceivably lead to temperatures higher than those which available materials can stand.

DISPOSAL OF WASTES

Still another problem is that of the handling and disposal of spent fuel elements and wastes. Nuclear reactions yield fission products which are analogous to the ashes of an ordinary combustion process, though much less bulky than the ashes of combustion. They are radioactively "hot," that is, they are sources of intense radioactivity similar to the radioactivity from the reactor itself. For this reason they must be handled by remote handling devices, under water or behind shields, and disposed of in ways which will prevent contamination of the environment. All of this is expensive.

Such then are the problems, and they are indeed formidable. However, thanks to the devoted efforts of scientists and engineers in our great national laboratories at Argonne and Oak Ridge, at other AEC installations, and by our industrial contractors, solutions have been found to these problems. As you have read in the newsapers, the land-based prototype of the submarine power reactor, for example, has already operated long enough to have driven a submerged nuclear-powered submarine, at high speed, entirely around the circumference of the earth. A powerplant with such performance is no longer a scientific toy.

The Argonne and Oak Ridge National Laboratories have each produced experimental reactor powerplants which have actually generated in the neighborhood of 200 kilowatts of electric power—enough to satisfy the needs of a good-sized commercial building.

The Commission, with Westinghouse as its contractor, has underway a project to design and build jointly with the Duquesne Light Co. a nuclear powerplant that will generate 60,000 kilowatts of electricity. This is enough power for a good-sized city.

ELECTRIC POWER FROM NUCLEAR POWER

There is no longer any question then that power, specifically electric power, can be produced from nuclear powerplants. The question of practicability revolves solely around the question of cost. It is natural to ask, How close are we now to economic atomic power? Unfortunately, this is a difficult question to answer. We really don't know because as yet no plant specifically designed for economic civilian power has been built and operated. All we have available are estimates based on extrapolations from experimental units or units designed

for military operation for which costs are hardly representative of industrial or "civilian" central station plants.

It is significant, however, that the engineers' cost estimates, made by groups representing the Commission's development contractors and by independent groups representing both publicly and privately financed utility organizations, are arriving at figures which indicate that nuclear powerplants should be able to produce power at a cost within a factor of about two of the present national average.

It is significant, too, that whereas a few years ago the low-cost estimates came only from enthusiastic amateur groups, while the estimates of our experienced industrial contractors were invariably disappointingly high, in recent months accumulated reactor experience has led even our most conservative and sophisticated contractors to support predictions of power costs close to the competitive level.

For example, a recent report of the General Electric Co. considers two different types of nuclear powerplants, one estimated to cost $195 per kilowatt of installed capacity, and the other $215. These investment figures compare with $130 per kilowatt for a conventional coal plant. For the nuclear plants, however, the fuel costs are only 1.35 and 1 mill per kilowatt-hour, respectively, as against 3.4 mills for the coal plant with coal at 35 cents per million B. t. u.'s. The low fuel costs compensate for high plant costs so that, for the nuclear plants, the overall energy cost becomes 6.7 and 6.8 mills per kilowatt-hour as against 6.9 mills for the conventional plant.

FIGURES ESTIMATES, NOT COSTS

I hasten to add that the precision of these figures is not to be taken too seriously. No nuclear plants have yet been built and operated and the cost estimates must, therefore, be assumed to have large errors, whereas conventional coal plants have been perfected to such an extent that for such plants the figures can be considered firm.

Accordingly, in considering nuclear power costs, it would be prudent, in view of our ignorance and inexperience in this field, to use contingency factors considerably higher than those used for conventional plants. Even up to a contingency of 100 percent, in the case of the GE estimates, we are still within the factor of two of the conventional power costs which I discussed a few minutes ago.

It may seem to some of you that I am too concerned with mills and fractions of a mill in power costs. Before fractions of a mill are dismissed as unimportant, it would be well to realize that a 1-mill-per-kilowatt-hour saving on electricity in the United States would represent a total annual saving to the Nation of about $430 million. Conversely, if nuclear power costs stabilize at a figure 1 mill above the average of electricity from conventional energy sources, the high cost of development of nuclear power may have to be written off as premature. The stakes are indeed high.

The next question to which we might address ourselves is: Where do we go from here? While there are many conceivable reactor types based on different fuels and fuel element arrangements, different coolants and moderators, and different temperatures and conditions of operation, the Atomic Energy Commission—through its advisers and its staff—has selected five different types as being the most promising at the present time. These types will be developed in projects financed largely by the Atomic Energy Commission to the stage at which an adequate technology is proved. According to present plans, AEC money will not be used to carry these types to the stage of an operating economic powerplant.

Three of these reactor types, which I'll not have time to describe and will list by name only, are relatively short-term projects. Experimental operating units should be available within 2 or 3 years' time. These are an experimental boiling water reactor, a sodium reactor experiment, and the already mentioned Westinghouse-Duquesne large-scale experimental powerplant, known as the PWR or pressurized water reactor.

The other two approaches are longer term projects in which we hope to build experimental reactors in about 5 years. These are a homogeneous reactor in which, as the name implies, the fuel is dispersed homogeneously in an aqueous solution rather than being fabricated in metallic fuel elements, and the breeder reactor, the most exciting of all, which promises to produce more fissionable material than it burns. It would transmute the reserve of fertile material into fissionable material.

This Government-financed program is strictly an experimental program and none of the reactors mentioned are expected to produce competitive economic power. It is important that groups such as yours realize that the production of such economic power is not yet an accomplished fact, and that much work remains to be done before it can be accomplished. Yet, with the goal in sight, as a technical man I share with my colleagues their impatience with delays and their urge to get the job done.

CONGRESS TO FIX POLICY

Technical men are usually not very much concerned as to how the work is financed, whether with Government or non-Government funds. It is for Congress and the administration to determine the rate at which work on the reactor program should be pushed, evaluating probable returns against costs. However, since it already has been announced that a vigorous reactor program is a matter of national importance, it is important that either Government expenditures be maintained at significant and effective levels or that non-Government funds be encouraged to get into the program. This Nation is rich in coal and oil, and has understandably shown less interest in civilian use of atomic power than energy-starved nations abroad.

Since there are few problems in arranging for the distribution of Government funds, it would seem to be most profitable for us to discuss the problem of making the transition from the AEC-financed experimental program to a developmental program of full-scale reactors financed largely or entirely by non-AEC funds.

Let me emphasize, again, that none of the reactors to be built by the AEC is expected to be economical, and, for this reason, no board of directors of either privately owned or publicly owned utility systems could at this time authorize the choice of such a nuclear powerplant for use as a part of a system as a sound financial proposition. At the moment the situation is something like that leading to the Homestead Act, which provided that a prospective farmer, on presenting evidence of probable future diligent work, might be given 160 acres of weeds and grass and trees and stumps and stones.

EXPERIENCE IS NEEDED

If nuclear powerplants are likely to become economic at some time in the future—even if people in this country have to buy them abroad—it is worth something to a utility management, private or public, to begin to gain experience with them, in spite of likely high cost of the first plants. The need for this experience could provide the basis for a cooperative program in which the excess cost of nuclear power from these first plants would be financed partly by the operator and partly by the AEC.

Thinking by the staff of the AEC on this transition problem is at the moment about as follows: We accept the fact that the construction of nuclear plants will be for the immediate future, be more expensive than conventional plants by some unknown amount.

We ourselves are satisfied and believe we can satisfy the engineers of any interested utility operator that nuclear powerplants can be confidently expected to work, though there may be some delay and inconvenience in getting the first units up to full power. We are further satisfied that, with a fair price to the operator for the byproduct materials produced, operating revenues will exceed operating costs.

Finally, we believe that both AEC and utility organizations will gain valuable experience from the construction and operation of such plants and, further, that the Nation as a whole will gain both in immediate military strength and in potential economic strength.

PROPOSAL FOR JOINT VENTURE

The staff proposal, then, is as follows: Utility organizations, for the sake of their own education and as a contribution to the national good, should be persuaded to consider seriously substituting a few nuclear powerplants for conventional plants in the course of normal expansion.

An organization's nuclear powerplant will be essentially an engineering extrapolation from one of the experimental reactor plants now being built and financed by the AEC. The nuclear plant will cost significantly more than a conventional plant, if for no other reason than the higher contingency, or ignorance factor. Since the utilities' first responsibility is to the consumer, the higher cost of such a nuclear plant cannot strictly be justified, though the cost of the equivalent conventional plant will represent a routine expenditure. On the other hand, in the AEC, research and development costs are routine expenditures, and it is the long-continued operation of the plant which represents an anomaly.

A joint program might, therefore, be developed on this basis: As a first approximation the utility company proposes to provide an amount of money equal to the cost of a conventional plant for the location in question while the Atomic Energy Commission, as part of its research and development expense, finances the difference between the cost of a conventional plant and a nuclear plant. If a number of such proposals can be developed every year, in each fiscal year the proposal considered to be most in the taxpayers' interest, as measured by minimum cost to the Government for the greatest technological advance, might be accepted for the reactor of the year. Under this suggested plan the Government would also purchase byproduct plutonium at a fair price.

With increasing experience on successive reactors, the difference between the cost of a nuclear and a conventional plant should become smaller and smaller and eventually vanish entirely, at which point the Government could step out of the picture. This approach seems to be one that can be made acceptable to the operating industry which, because of the nature of its business does not lend itself to the accumulation of risk capital. It further has the advantage of avoiding the high cost to the taxpayer of a long-continued subsidy program, for very few reactors will be built until power reactors become truly economic. Although some accounting and ownership problems are involved, this approach seems to be the most realistic under our present boundary conditions.

EFFECT IN MISSOURI BASIN

Let us now turn to a final question. If this, or some similar program is launched, what will be the effect in the Missouri Basin area and the interest of the people here? One of the first questions asked will be: How will the emergence of atomic power affect interest in hydropower and its use where it is available? The answer to this one is simple. Hydropower is so cheap, relative to other forms, that the Nation can and must develop all that is available, but this capacity will be able to meet only a

small fraction of the future energy demand of the Nation or, in fact, of the region in which it is developed. Experience in the Columbia Valley region is evidence. A region which was once considered to have inexhaustable hydropower is now surprisingly susceptible to brownouts.

Another popular question is: Are hydro power and atomic power compatible? I believe that future experience will show that they are not only compatible, but complementary. In the days when we thought of the power available from our big dams as very large blocks of power, it was natural to consider this power as providing the base load of an area. However, as the power demand increases and the percentage contribution of hydro becomes less and less, it seems clear to me that the base load will be carried by fossil or nuclear fuels and that hydro will be used for peak loads. This seems to be a healthy trend, for I can think of no cheaper way to store potential energy in a conveniently available form than in a water reservoir behind a high dam.

COMPLEMENTARY, NOT COMPETITIVE

There are, however, more subtle implications in what I think we can now confidently predict will be the gradual incorporation of nuclear powerplants into existing networks. In the beginning nuclear powerplants will be most attractive in areas where the cost of conventional fuel is high, and in these areas nuclear power will, in the long run, have the greatest social impact. The area in which we meet today is in one such area. There are 5 high-fuel-cost areas in the United States—one in the intermountain area in the West, one here in and around South Dakota, another in Maine, a fourth in Florida, and the fifth in the upper Michigan peninsula. In each of these areas, energy costs are roughly 35 cents a million British thermal units delivered.

On the other hand, the low cost areas are in the gulf region and along the Ohio River where energy costs are in the neighborhood of 10 to 20 cents per million B. t. u. Now this does not seem to be a tremendous difference in fuel costs, but it is surprising how much effect this differential has in the location of industry which as we all know, shows a tendency to concentrate in the Ohio River Valley and more recently in the gulf region where the fuel costs are particularly low. It is true that cost of fuel represents an extremely small fraction, in the neighborhood of 1 or 2 percent of the cost of finished products, but it seems to be a percentage that gets a lot of management thinking and does have an effect on the location of industry. We might say, therefore, from a strictly chamber of commerce point of view that it behooves people interested in the future of the Missouri Basin to become acquainted with and explore rather thoroughly the potentialities of nuclear energy, because it might serve to attract industry to an area which has the other desirable attributes.

You have still another advantage over other areas of the United States in respect to early introduction of nuclear power, and that is ample space. In the densely populated East, it is necessary in the design of reactors to lean over backward to take precautions against the remote possibility of "reactor incidents," which may be defined as a polite way of saying reactors out of control. In this area, however, the cost of precaution in the form of space around the plant to guard against the effects of "incidents" should be low.

Finally, if the international situation continues "not to improve," there would be a very great element of national strength in a utility system composed of electric power plants widely dispersed throughout the heartland of the continent with plants preferably underground and each with a 20-year supply of fuel stored in some convenient corner closet. I can only hope that our mobilization planners and civilian defense planners give due weight to the implications of civilian atomic power. Groups such as the Missouri Basin Inter-Agency Committee might find study of these military and defense aspects of nuclear power particularly rewarding.

COMPARATIVE ACTIVITY OF THE 81ST, 82D, AND 83D CONGRESSES

Mr. KNOWLAND. Mr. President, on Monday, July 19, the Senator from Tennessee [Mr. GORE] and I engaged in a colloquy on the floor regarding the legislative activity of the Senate during this session of Congress. At that time I inserted in the CONGRESSIONAL RECORD a statistical analysis which compared the activity during this session of Congress with activity of preceding sessions during the 82d and 81st Congresses. My office has advised me that the statistics for the first session of the 83d Congress and the 82d and 81st Congresses had only been brought forward as far as May 31 of each year instead of the June 30 date as indicated in the chart incorporated in the RECORD on page 10873 of July 19, 1954. Therefore, at this time I ask unanimous consent to have inserted in the RECORD at this point the completed chart of legislative activity as of June 30 for the 80th through the 83d Congresses.

Although I believe the statistics will speak for themselves, I merely want to point out that counting a 5-day workweek, Monday through Friday, the Senate has been in session 114 days out of a possible 126 days since it convened on January 6, 1954.

The PRESIDING OFFICER. Without objection, it is so ordered.

The analysis is as follows:

Data on legislative activity from start of session through June 30—Senate

Vetoes overridden							(1)	

[1] Senate adjourned June 19, 1948.

[2] These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report.

[3] This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." Reported measures not acted on include measures reported during 1st session.

(At 12:40 a. m., July 22, the Senate was still in session. The proceedings will be continued in the next issue of the CONGRESSIONAL RECORD.)

NOMINATIONS

Executive nominations received by the Senate July 21 (legislative day of July 2), 1954:

POSTMASTERS

The following-named persons to be postmasters:

ALABAMA

Lowell H. Wilson, Castleberry, Ala., in place of R. C. Salter, transferred.

ARKANSAS

James L. Latshaw, Fulton, Ark., in place of E. M. Odom, retired.

CALIFORNIA

Agnes C. Richmond, Beverly Hills, Calif., in place of M. J. O'Rourke, retired.

Bernice B. Dewar, Patton, Calif., in place of E. B. Smith, retired.

John C. Cummings, Yucaipa, Calif., in place of H. E. Rous, removed.

CONNECTICUT

Eugene F. Bull, Kent, Conn., in place of R. W. Bull, retired.

FLORIDA

John W. Turner, Hallandale, Fla., in place of B. N. Ingalls, resigned.

George E. Southard, Jupiter, Fla., in place of H. F. Aicher, resigned.

John J. Hoy, Lake Placid, Fla., in place of Carrie Bowers, retired.

GEORGIA

Valda D. Tanner, Jr., Sandersville, Ga., in place of C. B. Coopley, retired.

Ralph C. Key, Tallapoosa, Ga., in place of V. L. Howe, retired.

ILLINOIS

Carl A. Schroeder, Chicago, Ill., in place of John Haderlein, resigned.

William W. Van Gundy, Ellsworth, Ill., in place of M. M. Whalen, removed.

Lynn L. Simmermaker, Shipman, Ill., in place of C. E. Taylor, transferred.

Louise Kennedy, Villa Ridge, Ill., in place of Rosana Levitt, resigned.

INDIANA

Irvin Wesley Dolk, Chesterton, Ind., in place of F. P. Gavagan, retired.

Horace C. Little, Danville, Ind., in place of H. G. Thomson, retired.

Randall L. McCroskey, Fulton, Ind., in place of D. M. Zartman, resigned.

Granville P. Ziegler, South Bend, Ind., in place of F. C. Kettring, deceased.

IOWA

Earl W. Mayne, Sanborn, Iowa, in place of W. J. Foley, transferred.

Victor J. Hesseltine, Wayland, Iowa, in place of E. B. Wittrig, retired.

KANSAS

Charles A. Flaiz, Severy, Kans., in place of F. H. Olsen, transferred.

KENTUCKY

Paul A. Criscillis, Williamsburg, Ky., in place of E. A. Fish, deceased.

MAINE

Price Y. Tozier, Fairfield, Maine, in place of F. X. Oakes, deceased.

Hercules B. Roy, Frenchville, Maine, in place of Egline Plourd, resigned.

Henry L. Bryant, Tenants Harbor, Maine, in place of M. F. Rose, retired.

MICHIGAN

Raymond P. Brown, Copemish, Mich., in place of J. L. Romsek, transferred.

Byron R. Fowler, White Cloud, Mich., in place of Clyde Bowman, retired.

MINNESOTA

Marvin A. Halvorson, Dumont, Minn., in place of E. G. Burke, removed.

Allan J. Slezak, Hope, Minn., in place of J. E. Slezak, retired.

Peter D. McCarron, Sherburn, Minn., in place of E. T. Gibbons, retired.

Henry J. Schwegman, Taylors Falls, Minn., in place of G. W. Strand, retired.

MISSISSIPPI

Luther D. Henderson, Jr., Preston, Miss., in place of L. D. Henderson, retired.

MISSOURI

Jack E. Bradley, Harrisonville, Mo., in place of O. J. L. Brookhart, deceased.

Jim R. Preston, Sparta, Mo., in place of S. G. Greene, resigned.

NEBRASKA

Morris A. Odvarka, Clarkson, Nebr., in place of C. A. Koza, deceased.

Kenneth L. Bergstrom, Merna, Nebr., in place of G. L. Hammond, resigned.

Leslie J. Johnson, Silver Creek, Nebr., in place of C. D. Brummet, resigned.

Kermit Duane Cook, Springview, Nebr., in place of H. M. Hallock, resigned.

NEW HAMPSHIRE

Harris C. Pushee, Lyme, N. H., in place of J. L. Mayo, retired.

NEW JERSEY

Lester A. Sabo, Carteret, N. J., in place of W. J. Lawlor, retired.

Leo Mazza, Garfield, N. J., in place of J. A. Aloia, deceased.

Edwin A. Lake, Westfield, N. J., in place of W. C. Nestor, deceased.

NEW YORK

Florence Thompson, Harriman, N. Y., in place of F. L. Brady, deceased.

NORTH DAKOTA

Fayes Albert, Belcourt, N. Dak., in place of A. A. Ensor, removed.

OHIO

Winifred L. May, Mineral Ridge, Ohio, in place of J. L. May, deceased.

William C. Duff, New Concord, Ohio, in place of H. E. Miller, deceased.

Elmer Ford Simon, North Baltimore, Ohio, in place of N. Y. Roberts, retired.

Sam Verlenich, Jr., Warren, Ohio, in place of R. E. Schryver, resigned.

OKLAHOMA

Newel M. Taylor, Fox, Okla., in place of C. C. Cunningham, deceased.

PENNSYLVANIA

James W. Daubert, Allentown, Pa., in place of H. K. Bauman, deceased.

Leonard A. Quillen, Ardmore, Pa., in place of W. J. Carey, removed.

Elsie P. Bigger, Eagles Mere, Pa., in place of R. D. Kehrer, retired.

George B. Carpenter, Ulysses, Pa., in place of H. E. Merritt, resigned.

Frank F. Luek, Zelienople, Pa., in place of C. L. Druschel, deceased.

SOUTH CAROLINA

Clarence Ozell Hester, Ocean Drive Beach, S. C., in place of W. G. Griste, Sr., deceased.

TENNESSEE

Graden Featherstone, McKenzie, Tenn., in place of J. L. Marshall, retired.

TEXAS

John Harwin Parrish, Gladewater, Tex., in place of K. J. Preston, retired.

Herbert Williams, Hart, Tex., in place of C. B. Patterson, retired.

Emory D. Estes, Jr., Hawkins, Tex., in place of H. E. Minshew, removed.

Imogene M. Holt, Lockney, Tex., in place of H. B. Machen, resigned.

Billy J. Richardson, Reagan, Tex., in place of J. B. Moore, transferred.

Leila D. Kelley, Valentine, Tex., in place of J. J. Williams, removed.

WASHINGTON

Muriel June Kast, Elbe, Wash., in place of P. E. Engel, retired.

WISCONSIN

Louis J. Andrew, Sr., Fond du Lac, Wis., in place of J. C. Kiley, retired.

Amy O. Harder, Mindoro, Wis., in place of E. M. Olson, removed.

WEST VIRGINIA

Cecil C. Lanier, Coalwood, W. Va., in place of R. L. Keel, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 21 (legislative day of July 2), 1954:

DEPARTMENT OF THE INTERIOR

Clarence A. Davis, of Nebraska, to be Under Secretary of the Interior.

UNITED STATES DISTRICT JUDGE

Herbert S. Boreman, to be United States district judge for the northern district of West Virginia.

UNITED STATES ATTORNEY

Joseph E. Hines, to be United States attorney for the western district of South Carolina.

HOUSE OF REPRESENTATIVES

WEDNESDAY, JULY 21, 1954

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

God of all grace, as we go forth to discharge the duties of each new day, we are becoming increasingly conscious that we need a strength and a support which come from a source far greater than the ingenuities of our own finite minds.

We humbly confess that our beloved country is daily challenged by vast problems which are testing to the uttermost the wisdom and understanding, the patience and perseverance of our President, our Speaker, and the Members of Congress.

Help us to realize that a greater accumulation of material resources and this world's goods can never be the only remedy to cure and the only means to solve our social, economic, political, moral, and spiritual troubles and difficulties.

Lord, increase our faith in Thee and Thy divine providence and may it be a faith that is strong and steadfast, a growing faith that is large enough to meet with courage all our expanding needs and varied experiences.

In Christ's name, our Lord and Saviour, we bring our petition. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following title:

S. 3605. An act to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under

Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 6725) entitled "An act to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps."

THE LATE SENATOR BLAIR MOODY

The SPEAKER. The Chair recognizes the gentleman from Michigan [Mr. RABAUT].

Mr. RABAUT. Mr. Speaker, I make mention in the House at this time of the death last evening of a great American, a citizen of the State of Michigan, and a very dear friend of mine, former Senator Blair Moody. Physically and mentally he was in the prime of life and his death has come as a shock to those who have known him.

It might be said that the Senator was a victim of his own restless and tireless energies. He was a worker and he was a true friend of the little man. Endowed with a fine mind and an understanding of the workings of government, he added much to the well-being of the country during his tenure in the Senate. His knowledge of world affairs came about as a result of his travels as a newspaperman, and his continuing interest in domestic and foreign problems equipped him well for any of the tasks he undertook, and they were many.

Blair Moody, after meeting defeat in a former election, had determined to run once again for the United States Senate. In the true American tradition, he would not quit. His example and courage and steadfast devotion to purpose are manly attributes which any of us might well emulate. For my part, it has been an inspiration to know him. I was his friend and he was mine.

To Mrs. Moody and the members of his family, I extend my sincere condolences and assurances of my prayers in his behalf.

Mr. Speaker, I ask unanimous consent that all Members have the right to extend their remarks concerning the life and services of Blair Moody at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. RABAUT]?

There was no objection.

Mr. DINGELL. Mr. Speaker, with a heart laden with sorrow I rise to announce to the House the untimely death of Blair Moody, reporter extraordinary, author, world traveler, statesman, and former United States Senator, who so ably performed his duties as the appointive successor to the late United States Senator, Arthur H. Vandenberg, whom he counseled and advised over the years.

Blair Moody was a veritable dynamo of productive, progressive action in both the field of reporting the news and in legislation as a United States Senator. It was a part of his nature to do all things with great energy, promptness, and sincerity. His 52-year span of life he crowded with far-reaching accomplishments. They were always wholesome and desirable.

I have been privileged to know him intimately. Between us there was a deep and abiding friendship dating back to 1933 when the Detroit News assigned Blair Moody to cover the important Washington doings. During the historic days of the New Deal we counseled and confided in each other over the years.

Blair Moody was my one and only choice as the successor to the late Senator Vandenberg. I was among, if not the first, to urge Governor Williams with utmost promptness to designate him to fill the vacancy. After that we continued our consultations and collaborated in all matters pertaining to the welfare of the people.

Blair Moody was a man of prodigious mentality with a physique and productive energy to match. He was as direct and true as an arrow with great impact and penetration at the target. He was honest, sincere, and fearless, and never reckoned upon the consequences of any bold step which he undertook as the champion of any good cause. His name has been connected only with righteousness, patriotism, peace, and progress. For the noble course that he followed he was not always rewarded with friendship; nay, he made enemies too and it was because of his inherent and unshaken virtues that the people of Michigan and all others who knew him loved him so well. While he was aggressive he never forced his views upon nor abused anyone in disagreement.

The untimely death of Blair Moody leaves a void in the Democratic Party, in the newspaper world, and in the field of business and social endeavor which will be difficult, even impossible, to fill for a long time to come.

Blair Moody was born of pioneer American stock. Born to wealth and comfort he lived on the other side of the tracks, in a neighborhood other than mine, but our minds, our feelings, and our philosophies were kindred; they were parallel; they were the same. Blair Moody never judged a man by the amount of his bank balance. Character, ability, and honesty are what he judged as important and compelling in his relationships with his fellow man. Station in life, while respected and deemed important, was not the bond between this late and beloved man and the people. He rubbed elbows and carried on his work for and among the lowliest, for he understood their needs and sought at all times to alleviate their wants.

I remember in the early days of my service in Congress when Blair Moody, the reporter, crossed over into my legislative domain to discuss, advise, and counsel me in matters pertaining to old-age pensions, unemployment compensation insurance, aid to the blind, the handicapped, the crippled, and to widows and orphans. These were always close to his heart. When often the opposition sought to limit the beneficent effect of legislation Blair Mody gave encouragement and substance to those who might vacillate or who might need powerful support in such progressive ventures.

The noble soul of Blair Moody responded to the final and indomitable call of its Creator and the people of Michigan who have benefited so much from his expressed philosophy as a newspaperman and his official actions as a United States Senator bow their heads in silent and everlasting tribute to him.

I want to extend my prayerful sympathies to his beloved wife, Ruth Moody, his mother, his eldest son, Blair, Jr., and his two little sons, all of whom will miss him until the reunion which is sure to take place in a world far more appreciative of a man's character and goodness than the world from which he departed. I console myself with the prayer that God may give him eternal rest and may shed His perpetual light upon my dear friend forever.

Mr. MACHROWICZ. Mr. Speaker, the people of the United States suffered a great loss in the tragic and sudden death of former United States Senator Blair Moody, of Michigan. For those of us who knew him better and were privileged to work with him, it was a tremendous personal blow.

As a newspaperman, editor, radio and television commentator, Blair Moody has established himself as one of the most eminent in his field. But it was in his brief but rich political career that he proved himself to be an outstanding leader and friend of the forgotten man.

Though he was only in the United States Senate a brief time, in that short time he earned the profound respect and admiration of his colleagues for the leadership which he showed in every fight for the cause of the forgotten man.

To his wife and family I express my deepest sympathy. All of us in Michigan will miss him greatly. May his spirit guide us in our future work for the cause which he espoused so dearly.

EIGHTIETH BIRTHDAY OF HON. HERBERT HOOVER

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent for the immediate consideration of House Concurrent Resolution 258.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress of the United States hereby extends to the Honorable Herbert Hoover its greetings and felicitations on the 80th anniversary of his birth, August 10, 1954.

SEC. 2. The Congress expresses its admiration and gratitude to Mr. Hoover for his long years of devoted service to his native land and to the world in general in many different capacities.

SEC. 3. The Congress is especially appreciative of his willingness to accept cheerfully the heavy burden of serving as Chairman of the second Commission on Organization of the Executive Branch of the Government, which is an arm of the Congress, in order to complete the work so well begun a few years ago by a similar commission under his chairmanship.

SEC. 4. The Congress expresses the hope and desire that Divine Providence may permit Herbert Hoover to be spared to give many more productive years of honored service to humanity and to his beloved country.

SEC. 5. A copy of this resolution shall be transmitted to America's elder statesman, the Honorable Herbert Hoover.

Mr. BROWN of Ohio. Mr. Speaker, this House concurrent resolution which I have offered on behalf of Speaker MARTIN and myself, speaks for itself. A similar resolution has been adopted this morning by the Senate. The resolution has the approval of the leadership on both sides of the aisle.

In adopting this resolution honoring Herbert Hoover, the Congress honors itself. Herbert Hoover, our beloved elder statesman, will be 80 years young on August 10. Throughout his many years he has served his Nation and all humanity faithfully and well. Keen of mind and firm of step, he is continuing his public service as Chairman of the Commission on Organization of the Executive Branch of the Government. His inspiring leadership and his great knowledge of governmental matters will, I am sure, make the work of the Commission of great value to our country and a lasting monument to himself.

It is my prayer that our beloved chief, Mr. Hoover, be spared to enjoy many more anniversaries of his birth.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks upon the subject of the birthday of ex-President Hoover, and his services.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

IMPROVEMENT OF RAILROAD RETIREMENT ACT

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, quite some time ago the Committee on Interstate and Foreign Commerce reported H. R. 7840, a bill to amend the Railroad Retirement Act, the Railroad Retirement Tax Act, and the Railroad Retirement Unemployment Insurance Act. As finally reported there was no opposition in the committee to the bill. It was reported by unanimous vote after lengthy study and full hearings.

The bill improves certain benefits to retired railroad employees as well as to widows and dependents of deceased railroad workers. There is great need for these improvements. Interest in the bill is widespread. It is supported by all standard railway unions, including the 4 train and engine service brotherhoods and all 19 organizations affiliated with the Railway Labor Executives' Association.

In considering the bill the committee placed great emphasis on the effect of the proposed amendments on the financial soundness of the railroad retirement account. Members of the committee are of the unanimous opinion that regardless of the desirability of certain proposals for the liberalization of benefits under the Railroad Retirement Act, no amendments to the law should be made which would jeopardize the financial soundness of the retirement system. Before reporting the bill the members of the committee, who are experts on this legislation, assured themselves that the bill would not place the financial soundness of the system in jeopardy.

Considering this assurance and the great need for the improvements, I sincerely hope and urge that the leadership of this Congress will bring the measure to the floor for a vote and in time for it to become law.

This Congress should not be permitted to adjourn without considering this bill.

SPECIAL ORDERS GRANTED

Mr. MADDEN asked and was given permission to address the House on next Wednesday and next Thursday for 30 minutes, following the legislative program of the day and any special orders heretofore entered.

Mr. FEIGHAN asked and was given permission to address the House for 15 minutes today, following the legislative program and any special orders heretofore entered, and to revise and extend his remarks.

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 5 minutes today, following any special orders heretofore entered.

REENGROSSMENT OF A BILL

Mr. HOPE. Mr. Speaker, I offer a resolution (H. Res. 652) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, etc., That the Senate be requested to return to the House the bill numbered H. R. 6399 and the message of the House thereon.

The resolution was agreed to.

Mr. HOPE. Mr. Speaker, I ask unanimous consent that when the bill numbered H. R. 6399 and the message of the House thereon is returned to the House the Clerk be authorized to reengross the bill as H. R. 6393.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

EDUCATION AND TRAINING BENEFITS TO CERTAIN VETERANS

Mr. SPRINGER. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 9888) to amend the laws granting education and training benefits to certain veterans to extend the period during which such benefits may be offered.

The Clerk read as follows:

Be it enacted, etc., That (a) section 212 (a) of the Veterans' Readjustment Assistance Act of 1952 is amended by striking out "two" and inserting "three" in lieu thereof.

(b) Section 213 of such act is amended by striking out "seven" and inserting "eight" in lieu thereof.

SEC. 2. The proviso in paragraph 1 of part VII of Veterans Regulation No. 1 (a) is amended by inserting before the period at the end thereof the following: ", except that 'thirteen years' shall be substituted for 'nine years' in the case of any otherwise eligible person who the Administrator determines to have been prevented from entering or, having entered, from completing, training under this part within such 9 years by reason of one of the following conditions:

"(a) Such person had not attained, retained, or regained medical feasibility for training because of mental or physical disability;

"(b) Such person has not met the nature of discharge requirements of section 1503 of the Servicemen's Readjustment Act of 1944 (38 U. S. C. 697c) prior to a change, correction, or modification of a discharge or dismissal made pursuant to section 301 of the Servicemen's Readjustment Act of 1944, as amended (38 U. S. C. 693h), or the correction of a military or naval record made pursuant to section 207 of the Legislative Reorganization Act of 1946, as amended (5 U. S. C. 191a), or other corrective action by competent authority; or

"(c) Such person had not timely established the existence of compensable disability connected with or aggravated by service.".

SEC. 3. That clause (1) of the act of December 28, 1950, as amended (38 U. S. C. 701a), is amended to read as follows: "(1) Vocational rehabilitation based on service as prescribed in this act may be afforded until 9 years after the enactment of this amendment as to any veteran discharged or released from such service prior thereto, or otherwise until 9 years after discharge or release from such service or 9 years after the aforesaid termination of the period beginning June 27, 1950, whichever date is the earlier; except that '13 years' shall be substituted for '9 years' in the case of any otherwise eligible person whom the Administrator determines to have been prevented from entering or, having entered, from completing, training under this act within such 9 years by reason of one of the following conditions:

"(a) Such person had not attained, retained, or regained medical feasibility for training because of mental or physical disability;

"(b) Such person had not met the nature of discharge requirements of section 1503 of the Servicemen's Readjustment Act of 1944 (38 U. S. C. 697c) prior to a change, correction, or modification of a discharge or dismissal made pursuant to section 301 of the Servicemen's Readjustment Act of 1944, as amended (38 U. S. C. 693h), or the correction of a military or naval record made pursuant to section 207 of the Legislative Reorganization Act of 1946, as amended (5 U. S. C. 191a), or other corrective action by competent authority; or

"(c) Such person had not timely established the existence of compensable disability connected with or aggravated by service."

The SPEAKER. Is a second demanded?

Mr. TEAGUE. Mr. Speaker, I am not opposed to this bill, but in order that we may have some debate on it, I demand a second.

The SPEAKER. Is there any Member opposed to the bill who demands a second? If not, the gentleman from Texas is recognized to demand a second.

Mr. SPRINGER. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SPRINGER. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, may I say to my colleagues of the House that I have a short statement, and as soon as I have finished, I will be glad to answer any questions anyone cares to propound.

Today, a veteran of service on or after June 27, 1950, the Korean war, must initiate a course of training or education under the Veterans' Readjustment Assistance Act of 1952—Korean GI bill of rights—by August 20, 1954, or 2 years after his discharge, whichever is the later. Section 1 of this bill simply extends that period for initiating a course from 2 to 3 years after the date of his discharge. The present law also requires that a course of training be completed within 7 years from the date of discharge, and, to be consistent, this is extended for 1 additional year.

This corresponds with a 4-year period to initiate a course of education or training granted to World War II veterans and a 9-year period for completion.

Sections 2 and 3 relate exclusively to veterans undergoing training under Public Law 16 of the 78th Congress, or Public Law 894 of the 81st Congress, both of which relate to education and training for service-connected disabled veterans.

There is no initiation date as such under Public Law 16 or 894. There is an overall completion date of 9 years after the date of discharge for World War II veterans. This would expire on July 25, 1956. Section 2 would extend this period for completing a course of education and training from 9 years to 13 years for those persons who have not attained rehabilitation because of mental or physical disability or by reason for the type of discharge which they received—the discharge, of course, having been later corrected pursuant to law.

Section 3 extends the same sort of coverage to a veteran training under Public Law 894, the Korean group, and at the same time limits vocational rehabilitation in line with the precedent set for World War II training to 9 years after the enactment of this proposal, or 9 years after the date of discharge of the veteran, whichever is the earlier.

It will be recalled by the Members of this House that June 22 marked the 10th anniversary of what is officially known as the "GI bill." In this legislation we established a new national responsibility for the men and women who had been in the Armed Forces. Formerly, we had taken care of all of those who were injured or hurt, including the widows and orphans of deceased veterans. This bill attempts to do something about those members of the Armed Forces who have lost precious time by virtue of war service. At the time the first bill was passed, there were a great many doubts about the Government going this far in helping with advanced education, granting loans to go into business, and benefits which would allow the veteran to purchase a home under a favorable financial situation.

This bill has been accepted by the public at large and, I believe, by the large number of editorials that have appeared in the newspapers in the past month. The bill has received general public approval.

By the extension of this bill for another year, we seek to assist some of those whose benefits would have expired on August 20, 1954.

I submit, Mr. Speaker, that this is a reasonable bill and one which we can all support.

Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. BECKER].

Mr. BECKER. Mr. Speaker, I am very happy to support the bill, H. R. 9888, as just described by the gentleman from Illinois [Mr. SPRINGER]. I believe the American people are wholeheartedly behind this type of legislation to give our veterans, the veterans of the Korean war, an opportunity because of the many problems and circumstances confronting them on their return from the service. Many of them have not been acquainted with the facts and the laws, and many of them are just catching up and finding out about them today. I believe the Congress today will give those men who have had difficulties on their discharges and with their problems of compensation and so forth an opportunity to take advantage of the law which we passed in 1952. To extend this for 1 year, Mr. Speaker, I think is absolutely justifiable and in the best interests of the veterans of the Korean war.

Mr. SPRINGER. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. DEROUNIAN].

Mr. DEROUNIAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DEROUNIAN. Mr. Speaker, I wish to compliment the gentleman from Illinois [Mr. SPRINGER] for his bill to extend the Korean GI bill. I am wholeheartedly in favor of it.

Mr. TEAGUE. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MCCORMACK. Mr. Speaker, at the outset I want to say I favor this bill, and I am confident the rules will be suspended and the bill now before the House will pass.

Mr. Speaker, on yesterday former Speaker RAYBURN said in relation to the postal pay raise bill and the postal increase bill:

> I do not think while I was either Speaker or majority leader that I ever called up, or allowed to be called up under suspension of the rules, any bill until I had consulted with the minority leader. If my memory serves me correctly, I never recognized any Member to move to suspend the rules unless it was agreeable to the minority leader. This program is not agreeable to me. I think it is a terrible thing that in order to increase the wages or salaries or compensation of postal employees we have to throw two bills together. I want to say now, for myself, although I do not know what might be the course others may take, if the increases in postal salaries and the increase in rates on postage stamps from 3 cents to 4 cents come up together, it certainly shall not have my support.

Mr. Speaker, the situation in relation to that bill when it comes up is the most unusual I have ever seen in the House. It is the use of a rule relating to suspension of the rules I have never witnessed.

During the 10 years I was majority leader and during the time Speaker RAYBURN was majority leader, we never suspended the rules to a situation that will exist in the case that will come up in a short while.

I might say in passing the present leadership has established a precedent. It is a precedent for Democratic leadership to follow in the future, if they desire. I accentuate "if they desire."

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. MCCORMACK. Yes, I yield.

Mr. HALLECK. As far as the precedents are concerned, the postal rates and pay bill was handled in the 80th Congress in exactly the same way.

Mr. MCCORMACK. With an understanding and with an agreement on the part of the leadership on the minority side.

Mr. HALLECK. I do not recall there was any such arrangement. As a matter of fact, I read the debates on it and Members on both sides, particularly on your side, who objected to the manner in which it was brought up, did not even bother to have a rollcall on the measure when it came up.

Mr. MCCORMACK. I am not contradicting anything the gentleman says, and he has not contradicted a word I have said. I said the leadership on the minority side were consulted. Whenever there was a suspension, even on regular Consent Calendar day, when I was majority leader, I always advised the minority leadership what was to be put down, and any time they said they did not want this or that bill I respected their wishes.

Furthermore, today we are, under suspension of the rules whereby unanimous consent had to be obtained in order to do it; and, by implication at least, in those cases there is a further responsibility of letting the minority leadership know what bills are contemplated under suspension of the rules, to ascertain their views.

Mr. HALLECK. Will the gentleman yield further?

Mr. MCCORMACK. Let me ask the gentleman, Did you consult the gentleman from Texas [Mr. RAYBURN] about these bills and get his views?

Mr. HALLECK. I spoke to the gentleman from Texas.

Mr. MCCORMACK. I am speaking about one thing——

Mr. HALLECK. Give me a chance to answer.

Mr. MCCORMACK. If I can get a little more time.

Mr. HALLECK. I spoke to the gentleman from Texas last week about these particular bills to try to find out what the attitude on the other side might be.

It is fair to say that in respect to most of them he was discouraging as to support on that side. But let me point out to the gentleman that the calling of the suspensions today did not involve the creation of an additional date for sus-

pensions, but, I might say to the gentleman from Massachusetts, was a transfer from Monday to Wednesday in order to accommodate the situation.

Mr. McCORMACK. Correct. The gentleman spoke to me.

Mr. HALLECK. I spoke to the gentleman.

Mr. McCORMACK. Yes.

Mr. HALLECK. If it could not have been worked out then we would have had them Monday. I recognize that, of course.

Mr. McCORMACK. Pardon me; that does not deny my statement that it had to be done by unanimous consent.

Mr. HALLECK. That is exactly right.

Mr. McCORMACK. That is right. Then there is a meeting of the minds.

Mr. HALLECK. That is right, but I wanted to explain that it did not include the creation of an extra day for suspensions. All very well. Then I was asked: What do you expect to call up? And I announced what we expected to call up, and you could object or consent to the request, which was simply to transfer suspension day from Monday to Wednesday.

Mr. McCORMACK. May I state to the gentleman from Indiana, the majority leader, that in the 10 years I was majority leader I scrupulously protected what I considered to be the rights of the minority leadership, letting them know before I announced the program what I wanted to call up under suspension; and if there was any objection I would not call up that bill. The majority leadership then was wise in doing that because it avoided calling a bill up under suspension that was going to be defeated. We tried to get the views on the minority side. There was no effort to call up bills as in this case which almost makes us feel justified in asking what might be the motives.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman.

Mr. HALLECK. I want to say to the gentleman that the leadership on this side takes responsibility for this procedure.

Mr. McCORMACK. Certainly, of course; and you are establishing a precedent for the future that the minority side might use if they desire.

Mr. HALLECK. That is right.

Mr. McCORMACK. Should I be majority leader again I shall continue the policy of the past of consulting the minority leadership and letting them know, and getting their views, and respecting their views. I may be unwise in making this commitment, but I think it is the decent thing to do.

Mr. HALLECK. May I say to the gentleman from Massachusetts that I talked to the gentleman from Texas last week about the three suspensions that are of consequence here today, told him that they were coming up.

May I say also that I do not expect that any of these suspensions will be defeated today because I think they all involve——

Mr. McCORMACK. Now, that is making an argument. The gentleman will make that argument in his own time.

May I say I am getting sick and tired of having some Member come down here and every time there is danger, whenever they are in control trying to foist the responsibility upon the minority party. As to a bill the other day, it might have struggled through if a certain thing had not happened.

Here today we are faced with two important bills merged into one with the membership favoring some parts and opposing other parts, but placed in the position of having to accept the bad with the good or having to reject the good with the bad.

It was never intended that the suspension of the rules should be utilized to enact controversial legislation or attempt to lay down to the Members a measure parts of which the Members strongly favor and parts of which they strongly oppose.

If on important legislation such as this which will come up shortly, the leadership wants to prevent amendments being offered to the bill and to prevent it from being riddled to pieces, they could have resorted to a closed rule. That procedure at least would have preserved the right of the minority to offer a motion to recommit.

Under this procedure the right of the minority to offer a motion to recommit is taken away on vitally important legislation involving two important bills.

I favor the Corbett bill, but I am denied the opportunity of voting for it. I am against the increase of the rate on first-class mail from 3 cents to 4 cents as provided for, or as will be, in the bill to come before us.

There are other parts of the postal increase bill I am opposed to but I am denied the opportunity of doing so. A closed rule would enable the minority to offer a motion to recommit, either a general motion to recommit or one with instructions and thereby preserve the time-honored right of the minority.

The Reorganization Act is no precedent for the abdication of congressional power contained in the bill that will soon be before us. The Corbett bill preserves the constitutional rights of Congress because it created a joint commission on reclassification, to look into it and to report back to the Congress and have Congress legislate affirmatively, not negatively, as will be provided in the bill before us in the near future.

I wonder, as I am talking, how the newspapers of the country—at least 85 percent of whom are Republican and 95 percent of whom supported the Republican candidate in 1952—will feel with reference to today's tactics. I wonder if they will still apologize for a leadership, not Members, but a leadership, that attempts to pass such an important bill in this manner.

Everyone of us knows the most pressing kind of lobby possible has been operating against the Corbett bill as well as in favor of the postal rate increase bill. Some of us could tell certain things about the lobby and what the official angle might show.

Mr. Speaker, if this motion to suspend the rules is not carried, the bill will not be defeated. The leadership can bring it before the House through a rule from the Rules Committee, either an open rule or a closed rule. I cannot imagine the Republican leadership refusing to bring up a pay raise bill for the postal employees and for the other Federal employees before this session of the Congress is over.

For the reasons I have stated I shall vote against the motion to suspend the rules and pass that bill.

Mr. SPRINGER. Mr. Speaker, I yield such time as she may require to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Speaker, may I compliment the gentleman from Illinois [Mr. SPRINGER] for the splendid work he has done in connection with the pending bill. I wholeheartedly endorse his efforts and commend him and his subcommittee for the fine work they have done upon this proposal.

Mr. TEAGUE. Mr. Speaker, I yield 5 minutes to the gentleman from California [Mr. HAGEN].

Mr. HAGEN of California. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HAGEN of California. Mr. Speaker, I want to urge approval of this bill under suspension of the rules and say at the same time that we of the Veterans' Committee are not entirely satisfied with respect to the way the legislation we have acted upon has been handled.

I want to compliment the chairman of the Committee on Veterans' Affairs, the able gentlewoman from Massachusetts [Mrs. ROGERS] for her intense concern for the welfare of our veterans. She has had a difficult job in this session of the Congress in spite of the fact she has had almost unanimous support of her committee, both Republican and Democratic members alike.

The legislation represented in the instant motion for approval cannot be looked at separately because it is part of a complex picture of failure of the leadership to accept the judgment of the Veterans' Affairs Committee on a variety of subjects. It is part of a picture of failure of leadership to recognize the legitimate needs of our veterans, a class of citizens who yield to no one in value to this country and deserved fair treatment at the hands of Congress. The legislation posed by the motion before you and by the succeeding motion with respect to H. R. 9020 has the support of none of the great veterans' organizations in the United States. They are frankly disappointed that these proposals are the only ones which could be presented outside the bounds of the Veterans' Affairs Committee itself.

We who serve on the Veterans' Affairs Committee have worked diligently to consider the problems of veterans and to approve legislation which dealt with both the nonveteran taxpayer and the veteran fairly. When we acted we acted almost unanimously and it can be said that the veterans' organizations made no unreasonable demands of us. We are a little

bit disappointed that our hard work has been ignored to the extent that legislation approved by us cannot reach the floor of the House except in an emasculated form.

The proposal before you is a fair example of such emasculation. As it was approved by our committee after extensive hearings it extended to Korean veterans the same educational entitlement period which had been extended to World War II veterans. As presented here that equity has been destroyed and the spokesmen for Korean war vets will have to be back here next year seeking equity.

The proposal to follow is an even more gross example of such emasculation. The subcommittee of our full committee which initially approved a measure dealing with benefits to disabled veterans and the surviving dependents of disabled veterans held extensive hearings on a multitude of proposals covering every class and age of veteran and their dependents. These proposals were examined and a decision was made with respect to all of them, a decision embodied in H. R. 9020 as presented to our full committee. The judgment reflected by such bill was not a radical judgment. It was a judgment that the amounts proposed were fair and that the Government could afford to pay them in the context of many other governmental obligations in a troublesome time with some minor modification by our committee and some minor exceptions a proposal for a 10 percent benefit increase was approved by the committee and submitted to the Rules Committee for a rule. The proposal died there for reasons about which you may speculate, although the total cost was only $232 million, a relatively small amount measured in terms of need and the profligate character of some of the appropriations approved by this House which can best be described as boondoggling for the benefit of a particular Congressman who wants to be reelected in a close district. An attempt was made by our committee to revive H. R. 9020 in the Rules Committee by acceptance of a compromise. We accepted a compromise which cut half of the cost of the legislation. That was not enough; we had to compromise further and accept the legislation offered here which has no value at all for approximately a million of our most needy class of veterans or their survivors.

No one can vote against the amended Springer proposal or the amended Radwan proposal but those here who want to be fair with our heroes can say that they are not enough and can protest the kind of leadership which considers them a sufficient answer to the respective problems with which they deal. A breach of faith has occurred which cannot be explained away in terms of economy. There is a great deal of talk about stimulating our economy by putting money in the hands of those who need it and will spend it for the benefit of all of us. There is no more deserving class of recipients than the persons left out by H. R. 9020 as amended. There is great concern about a growing dearth of educationally qualified young men in this country. There is no better way to provide them than to increase the opportunity of Korean veterans to attend college or to take other training in the skills so necessary to a democracy employing a citizen soldiery.

Ignoring for the moment the veterans who will benefit by this legislation and the much larger group who would have benefited had the action of the Veterans' Affairs Committee prevailed, I may say that there is a fair way to legislate and an unfair way to legislate. We on the committee were informed that the legislation before you was all that we could present to the House. In fact the revised Springer proposal would not be before you in the absence of the revised Radwan proposal.

I wish to recommend to the membership and to the public the reading of the Thursday, July 22, 1954, issue of the Stars and Stripes published here in Washington. Said issue of such paper, which deals exclusively in matters of interest to veterans, bears this big black head across the top, "Republican Party Forsakes Veterans." On the front page of the same issue there is a lead editorial which bears the caption, "The Great Betrayal." In this article and this editorial the writer discusses in great detail some of the things I have mentioned and a great many more including certain broken 1952 campaign promises.

Accept we must the shoddy compromises presented to us, but let us not rest here or express any great happiness or satisfaction over what we do here today.

Mr. SPRINGER. Mr. Speaker, I yield 7 minutes to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I was very much interested in the remarks of my good friend from Massachusetts, the minority whip. Let me just say that suspensions of the rules have been had in the 20 years that I have been here. To pass measures under suspension of the rules affords a fair opportunity to deal with matters expeditiously and to dispose of them. And, as I say, both sides have used this procedure. In the few years that we have been in the majority, we have had suspensions, and I have been on the receiving end of suspensions many times from the then majority side that, if I had my way, I would have said that I preferred they not be used. We understand that there is a certain maneuvering for position, and some of our good friends on the Democratic side have maneuvered a few times this year. And, I do not quarrel about that. The fact of the matter is, as far as I am concerned and all of us over here, we are driving for a July 31 adjournment sine die, and I have no reason to believe, in the Congress overall, that we are not going to make it. But, there are certain things that need to be done, that need to be disposed of.

Now, as we seek to meet our responsibility and get these measures through that deserve attention and action, we have got to think about what may transpire or happen in the other body, and we have got to think about the Executive branch and consider the whole picture in an overall effort to determine what may finally become law and what may not become law.

Now, these particular veterans' bills in all my time have been called up under suspension of the rules. The year extension that is now before us is something of a compromise from what was originally introduced. The bill that will come next is a little less than at one time had been supported, but the committee has reported a revision that I can say to you will benefit the veterans of this country in a very outstanding way, veterans whose disabilities are service-connected. That measure we shall pass here, and I am confident that it will go on and become law when something else might not have gone on and become law.

Particular reference is made to the next suspension that will involve two bills—bear this in mind, two bills that were reported with amendments from the Committee on Post Office and Civil Service by decisive majority votes, one having to do with an increase in rates, first-, second-, and third-class, and the other having to do with pay increases for the postal employees.

Now, just let me say this to you: This is the day that we are either going to vote an increase for the postal employees or we are not.

This is a good, generous pay increase for the employees. We had some negotiations looking to some sort of an arrangement—some called it a compromise, but there were things to be put in a pay increase bill which were not agreed to, according to my lights, but they are in here and come under this suspension. What are they? There is a $200 minimum. There is a 5-percent across-the-board increase. And that is what you are going to vote for these disabled veterans today. There is a $100 additional longevity step. There is a $100 a year item for uniforms. This is going to cost about $153 million a year.

I say that that is a substantial pay raise for the employees. And those Members who have been wanting to do something for the postal employees have their opportunity to do it here today. They may say, "You have a rate increase in here." Let us take a look at that. It is the rate increase, I say again, that was voted by the Committee on the Post Office and Civil Service, and reports have been available for months. Perhaps Members can continue to vote to increase costs in the Post Office Department where, after taking out the subsidies, we have introduced a great many efficiencies in operation, but where we are still running a $300 million to $400 million deficit every year. What is wrong with saying that we are going to give the employees more money but we are going to raise our revenues to help try to bring this operation in balance? It will not be in balance even after this bill is adopted. It will still be $300 million out of balance, and that will have to come out of the taxpayers' pockets. It will affect the whole budgetary situation.

What I am saying is that here is a bill reported by the committee. It is a combination of those bills, that is true. It is exactly the way we handled the matter in the 80th Congress when we gave the postal employees the largest

single raise they ever had at any time. That was $450 a year.

Here is a substantial raise. Here is an opportunity to provide a reasonable rate increase. Here is a good pay raise for the employees. We can send this bill over to the other body and start the legislative process to get a pay raise for the employees and to get some additional revenues into the Post Office Department, additional revenues that are so worked out that they are not going to hurt anyone.

I am inclined to believe that the Members on our side are strongly in support of getting these measures back of us and getting on with our work. Of course, if, on the Democratic side, the Members vote it down, then they have got to take the responsibility for it; not only for defeating rate increases for the department, but for denying the Postal employees a pay raise.

Mr. WITHROW. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. WITHROW. I think we should make it very clear that the pay raise requested under the suspension of the rules will be a permanent pay raise rather than the temporary raise that was suggested.

Mr. HALLECK. That is right. The raise originally proposed was to be a temporary one. This is a permament raise.

There was some question about the reclassification proposal. It is provided that whatever reclassification plan is worked out it must be submitted to the Congress, and it may be rejected, not by a constitutional majority, but by a simple majority. In other words, we have leaned away over backwards to try to work this out in a responsible, fair, reasonable, decent way. The question is, Are we going to stand up and move this legislation and get on with our work?

There is one other bill which surely will be called which has to do with the revocation of citizenship, which bill comes from the Committee on the Judiciary. I am quite sure there will not be very much trouble with respect to that.

Mr. TEAGUE. Mr. Speaker, H. R. 9888 has been reported by the Veterans' Affairs Committee to solve some specific problems which have arisen in connection with the veterans' education and training program.

When we wrote Public Law 550, 82d Congress, the bill providing education and training for Korean veterans, it was decided that it would be to the veteran's best interest to encourage him to reenter training after he returns from the service as promptly as possible. Therefore, we set the period for enrollment at 2 years after the date of the veteran's discharge. Fundamentally, I think this policy is correct. I believe that it is to the veteran's best interest to resume his training promptly when he gets back home from the service. We have encountered a specific problem, however, which this bill deals with.

At the time we passed Public Law 550, there were about 1 million veterans already discharged from the Korean conflict. In order that all veterans would have an equal opportunity to enroll, we set the enrollment period at 2 years after the veteran's date of discharge or 2 years after the effective date of the act, whichever was later. The practical effect of this provision was to give the 1 million veterans discharged before Public Law 550 was enacted 2 years from the date of enactment or until August 20, 1954, in which to enroll. We are now concerned that the August 20 date comes at a very inconvenient time, in that it comes several weeks before the fall enrollment period, and as a practical matter cuts the period of time during which the veteran can enroll. We did not wish to attempt to create an exception in the 2-year rule for this group because of the discriminatory aspect of such an exception and because it would be difficult to administer. Therefore, we have decided that a general extension of 1 year would solve the problem for these 1 million veterans in the most simple, expedient manner possible.

We have also been concerned that an extension of time is necessary for veterans who wish to enter institutional on-the-farm training. In view of the small number of Korean veterans in agricultural areas, many States have not been able to activate their program. As a result, the farm trainee has had no place to go. The agricultural educators tell us that if they have a little more time they hope to get more of these schools going.

There is still another class of veterans who deserve the benefit of this extension. We have a considerable number of veterans experiencing serious illness and unusual family problems, who find it impossible to get enrolled within 2 years. We did not wish to try to deal with these cases individually; therefore, we felt that the one year extension was best.

This bill also solves a very serious problem for disabled veterans. Public Law 16, 78th Congress, and Public Law 894, 81st Congress, provide rehabilitation training for disabled veterans. These bills now have a 9-year statutory limit, which expires, in the case of Public Law 16 for World War II veterans, on July 25, 1956. The Veterans' Administration is now prohibited from setting up a rehabilitation program for veterans of World War II which runs past that date. We have created specific exceptions to the statutory delimiting date so that the Veterans' Administration can provide a full rehabilitation program for the veteran who has been continually sick since his discharge or who has just recently established service-connection for his disability. An exception is also created for those persons who have been prohibited from receiving rehabilitation training until just recently as a result of a dishonorable discharge which they have been successful in correcting to honorable. This group of persons is very small and, of course, to be eligible for rehabilitation training they must also have a service-connected disability.

Mr. Speaker, we have no further requests for time on this side.

Mr. YOUNG. Mr. Speaker, I wish to take this opportunity of commending the gentleman from Illinois and his Subcommittee on Education and Training of the House Veterans Affairs Committee, for their work in bringing out this important piece of legislation concerning the veterans of our country.

This bill performs two important functions: First, it extends for an additional year the periods during which a veteran of service on or after June 27, 1950—that is, a Korean veteran—can commence and pursue a course of education or training. At the present time a Korean veteran must initiate his educational program by August 20, 1954, or by the date 2 years after his discharge, whichever is the later. Moreover, this course of training must be completed within 7 years after such discharge.

The measure which we are now considering would extend these 2- and 7-year periods to 3 and 8 years, respectively. In other words, if this measure becomes law, a Korean veteran must initiate his program of education or training by August 20, 1954, or by the date 3 years after his discharge, whichever is later, and the program must be completed within 8 years after his discharge. While this is not perhaps as favorable a treatment as received by World War II veterans, it does afford Korean veterans an extension of further time allowance of an additional year in which to make all necessary arrangements to commence their program.

The second and third sections of the bill extend the completion dates of training for disabled veterans from the present 9 years to 13 years, where the disabled veterans are basically eligible for the benefits but have been unable to pursue vocational rehabilitation training within the present time limitations because of illness or other compelling reasons.

This legislation is greatly needed by our deserving veterans, and I urge the adoption of this bill.

Mr. WOLVERTON. Mr. Speaker, the bill now pending—H. R. 9888—is worthy in its purpose and should have unanimous approval.

The purpose of the bill is, first, to extend the commencement and completion dates under the Veterans' Readjustment Assistance Act of 1952, and, second, to extend the time for the completion of vocational rehabilitation training of certain disabled veterans of World War II and the Korean service period.

The bill would extend for an additional year the periods during which a veteran of service on or after June 27, 1950—Korean veteran—can initiate and pursue education or training. Today a Korean veteran must initiate his program by August 20, 1954, or by the date 2 years after his discharge, whichever is the later. He must complete it within 7 years after his discharge. The bill now before the House would extend these 2- and 7-year periods to 3 and 8 years, respectively.

Unless the law is amended as proposed, it is anticipated that there will be veterans who, for lack of such an extension, would be deprived of their opportunity to pursue education or training.

The bill also will provide time relief for the service-connected disabled group who take training under existing law. The service-connected group receive training of such character and of such duration to permit them to regain their civilian aptitudes or to create new aptitudes to enable them to overcome the handicaps caused by their service-incurred disabilities and thus regain employability.

There is no initiation date, as such, for such training. However, there is an overall completion date for World War II veterans of July 25, 1956—9 years after the termination of World War II for this purpose—and for Korean veterans of 9 years after the termination by Presidential proclamation or congressional resolution of the basic service period which began June 27, 1950.

The bill now under consideration in the House extends these completion dates from the present 9 years to 13 years in the cases of those disabled veterans who are basically eligible for the benefit but who have been unable to pursue vocational rehabilitation training within the present time limitations because of illness, or because of one of the other two compelling reasons specified in the bill.

Thus, in addition to the mentioned veterans for whom timely persuit of vocational rehabilitation training was not medically feasible, the bill would provide a like extension for the group of veterans who upon leaving the service received a discharge of a character which rendered them ineligible for these benefits but who subsequently have had their discharges corrected by competent authority. A third category concerns the group of veterans who have not met the requirement as to the establishment of a service-connected disability until a date which would not afford sufficient time prior to the existing terminal date in which to complete a course.

The purpose of the bill is readily discernible and certainly is most commendable. I give my wholehearted support to the bill and trust that it will be finally enacted into law. The men who suffered the sacrifices in Korea are entitled to the consideration this legislation seeks to give.

Mr. SPRINGER. Mr. Speaker, there are no further requests for time on this side.

The SPEAKER. The question is on the motion to suspend the rules and pass the bill H. R. 9888.

Mr. SPRINGER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 400, nays 0, not voting 34, as follows:

[Roll No. 109]

YEAS—400

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

Mr. Angell with Mr. Camp.
Mr. Weichel with Mr. Perkins.
Mr. McGregor with Mr. Chatham.
Mr. O'Hara of Minnesota with Mr. Fisher.
Mr. Curtis of Nebraska with Mr. Sikes.
Mr. Short with Mr. Willis.
Mr. Harrison of Wyoming with Mr. Thompson of Louisiana.
Mr. Mailliard with Mr. Regan.
Mr. Kersten of Wisconsin with Mr. Brooks of Louisiana.

Mr. MILLS changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill H. R. 9888.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

COMMITTEE ON GOVERNMENT OPERATIONS

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight Saturday night to file reports on the bills H. R. 9406 and 9835.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CUSHING VA HOSPITAL

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, despite the fact that there are over 1,500,000 veterans in New England and an extremely

large number of disabled and incapacitated veterans, there is unfortunately no domiciliary home for veterans in the area.

That is why Members of the Massachusetts delegation in Congress have been working for the establishment of a domiciliary home at Cushing VA Hospital in Framingham, Mass. Several bills have been filed to authorize the Veterans' Administration to convert the Cushing Hospital into a domiciliary home, including H. R. 548, a bill I first introduced in the House in July of 1952. Congresswoman EDITH NOURSE ROGERS, chairman of the House Committee on Veterans' Affairs, has kindly filed H. R. 9646, a bill to accomplish some of the objectives of H. R. 548, and just recently Members of the Massachusetts congressional delegation appeared before her committee to endorse the domiciliary proposal for Cushing.

The nearest domiciliary home is at Bath, N. Y., which for most New England veterans is a long distance from home. Naturally under these circumstances, many veterans who urgently need domiciliary care, are hesitant and reluctant to seek admission to an institution so far removed from their own homes, loved ones, and friends.

The history of Cushing Hospital in recent years has been replete with change, confusion, and finally inactivation. As in all other matters affecting the veterans, for whom she has done so much, for whom she has worked so tirelessly and unselfishly, the gracious chairlady of our House Committee on Veterans' Affairs, the Honorable EDITH NOURSE ROGERS, has given most energetic attention to the proposal to provide a domiciliary home in New England. In fact, her committee recently held hearings on pending bills dealing with Cushing Hospital.

It is a genuine pity to have the splendid, costly facilities at Cushing going to waste. At the present time, there are a large number of veterans who could be greatly benefited by domiciliary hospitalization and care if it were available in the New England States. They are entitled to consideration. They are entitled to help and assistance. They are entitled to every possible care and treatment.

I would respectfully point out to my colleagues from other States and other sections that our Massachusetts congressional delegation has invariably supported the full implementation of a forward-looking veterans' program on a nationwide basis. It is, therefore, understandable that we should seek support for projects that we deem necessary for the welfare of our own veterans and their dependents in our own area. A domiciliary home at Cushing would be of inestimable value to our veterans. It would help materially to take care of the large number who at present are unable to gain admission to various hospitals, or who are not in a position to go far away from their home in order to secure much needed hospitalization. On the whole, the bill would also enable studies in geriatrics and other special fields, which could be conducted in this facility which is situated ideally regarding physical surroundings, proximity to transportation lines, as well as proximity to outstanding and unexcelled medical services and research of the Boston area of which we are so proud and which, indeed, have contributed so greatly to national health programs, as well as to programs for veterans' rehabilitation, care, and treatment.

I recognize that the Congress will adjourn within a short time. Nevertheless, I believe there is still time left to report this bill favorably and have it presented to the House and passed. It will be a great step in the direction of perfecting the present veterans' program. It will be an indication that, while we of this Congress are concerned with economy, we will never consent to put economy before the true welfare of the veterans and their dependents because we realize the great debt which the Nation owes to this gallant company.

Earlier this month, I requested Admiral Boone, the Chief VA Medical Director, to furnish me with the latest available information regarding the number of eligible veterans who are awaiting admission to VA hospitals in Massachusetts. Very frankly, I was very much surprised and distressed to have word from Admiral Boone that as of May 31, 1954, the latest available date for such a statistical breakdown, we have more than 1,000 veterans in Massachusetts who have applications pending for a hospital bed in one of our VA hospitals. True, these are non-service-connected cases, but the situation is most unfortunate, I feel sure you will agree that this very sizable number of applicants for hospitalization illustrates the need for additional VA hospital beds in Massachusetts despite the contention of the Veterans' Administration that there is no requirement for a domiciliary home to serve our New England veterans.

These figures are for Massachusetts alone:

As of May 31, the Jamaica Plain VA Hospital at Boston, the hospital which absorbed the greater part of the patient load of Cushing when it was closed, had a waiting list of 179 veterans who were in need of hospitalization. The Bedford VA Hospital, which specializes in neuropsychiatric care, had a waiting list of 568 veterans. The Northampton VA Hospital, another neuropsychiatric hospital, had a waiting list of 240 veterans. The new Brockton VA Hospital, our third VA psychiatric hospital in Massachusetts, had a waiting list of 107 veterans. Despite technical legal rulings, what thoughtful, informed person would doubt the connection between these veterans' mental conditions and their service in war to the Nation?

The only two VA hospitals with no waiting lists, as of May 31, are the Rutland Heights Hospital, which is in my district and which specializes in the care of tubercular patients, and the West Roxbury Hospital, the paraplegic center for New England veterans.

At the very outset, the Veterans' Administration felt it had a need for the Cushing facilities as a domiciliary home. In fact, on March 12, 1952, Admiral Boone wrote me as follows:

> With reference to your recommendation that the Veterans' Administration establish a domiciliary program at the Framingham (Cushing) Hospital: We had hoped to do this, but now that the hospital has been turned over to the Department of Defense, some other means of meeting domiciliary needs in the New England area will have to be developed.

In my mind, this letter indicates that the Veterans' Administration recognized the need for a domiciliary home to serve New England veterans in 1952. It is, therefore, difficult to understand the VA position of today, which is—such a domiciliary home is no longer required. Our World War I veterans are not getting any younger. Soon we will be faced with the peakload of World War I cases where domiciliary care is required.

While the VA claims it has no waiting list at the Bath Domiciliary Center in New York, the domiciliary home now providing beds for our New England veterans, it is a source of common knowledge in Massachusetts among veterans organizations and others concerned with the needs of our veterans that there is a waiting period sometimes extending to 2 years at both our State-owned and State-operated Soldiers Homes at Chelsea and Holyoke, Mass. As it is, the Federal Government would be hard pressed indeed in meeting the domiciliary needs of our Massachusetts veterans alone were it not for the beds available at Chelsea and Holyoke. Is the Federal Government doing its full job for disabled veterans? Or is it turning over a major part of this job to the States? The answers are obvious. The Federal Government is not doing its full job for the veterans and it is putting increasing burdens on the State of Massachusetts. That fact is incontrovertible.

My initial proposal for the establishment of a domiciliary home at Cushing, one I took up with the Veterans' Administration way back in September of 1951 when that agency had not fully formulated its plans for the utilization of the new Jamaica Plain Hospital—my initial proposal envisioned a combined domiciliary home and hospital at Cushing. The domiciliary home would serve all our New England veterans. The hospital portion would meet the needs of veterans residing in the central Massachusetts area.

At Cushing, which is as I have already pointed out, so close to the great medical centers and medical institutions of Boston, I had hoped that the Veterans' Administration would put into effect a program whereby the latest advances in geriatrics and other specialties would be utilized in order to provide needed rehabilitation for these aged veterans, a program whereby new skills and new techniques might make it possible for these veterans to return to their home communities equipped adequately to take up life anew. All too often, the veterans who are now in domiciliary homes are simply allowed to vegetate and round out their remaining years in comfort, yes, but with no thought whatever of developing and training them for

the happy, productive activities which would still be theirs. Advancing years alone should not rule out the prospect of happy, productive lives for millions of gallant, intelligent Americans. But all too often our veterans in such homes are forgotten and frustrated—sitting around in a hospital with nothing to do, with no interest or constructive instruction—nothing but a void of institutionalized routine.

This system and method is morally and socially indefensible. We have the chance here perhaps even to set up a new pattern which in time could test and develop realistic modern techniques for complete social and economic readjustment not only for our veterans but conceivably for millions of other older Americans who thereby might well find regained health, new hope, new stimulus and new dedication to useful, constructive endeavors. Let us act on this vital question now.

Naturally, it was a source of pride and gratification to me that our Massachusetts veterans organizations from the very beginning have endorsed the proposal I first made to utilize Cushing as a domiciliary center and I am sure they are behind Mrs. ROGERS' bills. These organizations include the Massachusetts Department of the Veterans of Foreign Wars, the Massachusetts Department of the American Legion, and the Massachusetts Department of the Disabled American Veterans. Individual posts throughout the State have gone on record in favor of such a domiciliary home at Cushing. The General Court of the Commonwealth of Massachusetts has endorsed this proposal.

The foregoing contains in substance my remarks before the Subcommittee on Hospitalization of the Committee on Veterans' Affairs at its recent hearing on Cushing VA Hospital.

COMMITTEE ON RULES

Mr. ALLEN of Illinois. Mr. Speaker, I ask unanimous consent that the Rules Committee may have until midnight tonight to file rules.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

INCREASE IN COMPENSATION AND PENSION TO VETERANS AND THEIR DEPENDENTS

Mr. RADWAN. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 9020) to provide increases in the monthly rates of compensation and pension payable to certain veterans and their dependents.

The Clerk read as follows:

Be it enacted, etc., That (a) all monthly wartime rates of compensation payable under laws administered by the Veterans' Administration for disability, including the special statutory awards except as hereinafter provided, are hereby increased by 5 percent: *Provided*, That such increase shall not apply to dependency allowances, subsistence allowances, or the special awards and allowances provided under subparagraphs (k) and (q), paragraph II, part I, Veterans Regulation No. 1 (a), as amended, or the last paragraph of section 202 (3) and the penultimate paragraph of section 202 (7), World War Veterans' Act, 1924, as amended: *Provided further*, That in any case the rate of compensation, as increased herein, shall be further adjusted upward or downward to the nearest dollar.

(b) In adjusting the rates of peacetime disability compensation pursuant to paragraph II, part II, Veterans Regulation No. 1 (a), as amended, because of the increases provided in subsection (a), such rates shall be further adjusted upward or downward to the nearest dollar.

(c) The maximum rate of compensation of $400 per month set forth in subparagraph (k), paragraph II, part I, Veterans Regulation No. 1 (a), as amended, is hereby increased to $420 per month.

SEC. 2. The monthly rate of death compensation authorized under paragraph IV, part I, Veterans Regulation No. 1 (a), as amended, for a widow but no child is hereby increased from $75 to $87, and the rate of such compensation for a dependent mother or father is increased from $60 to $75, or if both are dependent, from $35 to $40 each.

SEC. 3. This act shall take effect on the first day of the second calendar month following the date of its enactment.

The SPEAKER. Is a second demanded?

Mr. EVINS. Mr. Speaker, I demand a second, although I am not opposed to the bill.

The SPEAKER. Is any Member absolutely opposed to the bill demanding a second?

Mr. RADWAN. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RADWAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the amendment which I submit and which is the only item on which the House will vote today provides for an increase in the rates of service-connected compensation for disabled veterans of 5 percent. In effect this means that a veteran drawing $15.75 monthly rate for a 10-percent disability will be increased to $17. At the other extreme, a man who is totally disabled will be increased from $172 monthly to $181 monthly. That, briefly, Mr. Speaker, explains section 1 of the bill.

Now, section 2 of the bill increases the rate of compensation for widows without children from $75 to $87 monthly and for dependent parents from $60 to $75, and where there are two parents living, from $35 to $40.

I may point out, Mr. Speaker, that the total cost of this bill is $109,854,000, roughly $110 million. The Subcommittee on Compensation and Pensions, which I had the honor to be chairman of, held hearings on this legislation March 31, April 1, 2, and 6 on some 70 bills which would in one way or another increase the rate of compensation or pensions payable to the veterans of our wars. Careful consideration was given to the many proposals pending before the committee and the testimony which was presented to the committee by various interested individuals. The bill which I have the honor to introduce, H. R. 9020, and which the subcommittee recommended favorably to the full committee, would have reestablished the historic relationship of the compensation schedule by setting the 10-percent rate at one-tenth of the total disability rate, which would have provided a monthly compensation payment of $19 for veterans with 10-percent disability and $190 for the veteran suffering total disability.

There has been some reference that the bill before us today is a compromise. Of course, it is a compromise, as is all good legislation. This is a very happy compromise, because I think that in this particular compromise the Committee on Veterans' Affairs and a little later the entire House will have that same opportunity to discharge its responsibility to the veterans of this country as well as to the taxpaying public at large. In this particular bill we are taking care of the veterans, the disabled veterans, and every good citizen in this country wants to see that that particular veteran is taken care of, the one that has service-connected disability. There we give a 5-percent across-the-board increase.

Section 2 of the bill takes care of something that the 82d Congress overlooked in failing to care for the widows, the dependents, and the orphans. We take good care of that group. In section 1 of the bill we are spending an additional $60 million. In section 2 of the bill we are spending an additional $50 million. The Committee on Veterans' Affairs has spent a great deal of time and worked out a great deal of detail on this legislation, and I think that what we have come up with today is a splendid piece of legislation and that we are doing a fine thing for the veterans of this country, who will benefit greatly.

Mr. AUGUST H. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. RADWAN. I yield to the gentleman from Minnesota.

Mr. AUGUST H. ANDRESEN. What is the provision in the bill relating to widows of veterans in non-service-connected cases?

Mr. RADWAN. There is no provision in this amendment for that category.

Mr. AUGUST H. ANDRESEN. They remain the same and the pension is the same as it has been in the past?

Mr. RADWAN. That is correct.

Mr. AUGUST H. ANDRESEN. I felt that they should have had an increase in that category.

Mr. RADWAN. Well, as a matter of fact, the committee felt that there should be some increase in that category, and the Committee on Veterans' Affairs unanimously introduced a separate piece of legislation in that particular class.

Mr. AUGUST H. ANDRESEN. Will they be considered?

Mr. RADWAN. That I cannot answer.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. RADWAN. I yield.

Mr. ALLEN of Illinois. I want to compliment the Committee on Veterans' Affairs. As we all know this is the 15th

bill benefiting veterans that will have passed this House. This will be the 15th bill this session of Congress.

Mr. RADWAN. I thank the gentleman for that observation.

Mr. Speaker, in conclusion, I want to state that I am thankful to members of my subcommittee for the work that they did on this legislation. I am very thankful for the complete cooperation of the Committee on Veterans' Affairs. I am particularly grateful for the leadership of the gentlewoman from Massachusetts [Mrs. ROGERS] who, as chairman of the Committee on Veterans' Affairs, has made possible this piece of legislation today. I want particularly to extend my thanks for the cooperation which we received from the membership of the committee on the other side of the aisle.

Over 2 million veterans, some 68,000 widows as well as 242,000 dependent parents will benefit as shown in the following table:

Veterans	
Korea	135,800
World War II	1,623,700
World War I	213,100
Spanish War	400
Regular:	
Wartime	1,500
Peacetime	61,900
Total	2,036,000
Widows	
Korea	3,300
World War II	26,400
World War I	31,700
Spanish War	975
Regular:	
Wartime	325
Peacetime	6,000
Total	68,700
Parents	
Korea	19,100
World War II	194,400
World War I	20,400
Spanish War	20
Regular:	
Wartime	1,480
Peacetime	7,300
Total	242,700

With that I wish to conclude. The entire membership of the House will have the happy privilege and pleasure of voting on a very fine piece of legislation.

Mr. EVINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the gentlemen stated who just preceded me, the bill, H. R. 9020, to provide increases in monthly rates of compensation and pensions for veterans and their dependents, is a most comprehensive bill. It represents weeks of intensive study by the subcommittee and the full Committee on Veterans Affairs.

I might add, Mr. Speaker, that the old maxim with which we are all familiar that "half a loaf is better than no loaf at all," well applies to this legislation. Yes, it is a compromise bill as it denies a large segment of our veterans' population any increase at all in compensation and pensions.

I think the history of the background of this legislation would be of great interest to the House. The Committee on Veterans' Affairs at the outset of this year heard all of the veterans' organizations. The principal objective which they asked in legislation in this session of Congress was a reasonable cost of living increase to all segments of the veteran population. The testimony of the American Legion, the VFW, the DAV, the Spanish-American War and all the recognized organizations proclaimed this objective.

As the gentleman who just preceded me has stated, there were many bills introduced for this purpose. They provided all the way from 5 percent to 25 percent increase. It was finally decided to provide a 10 percent increase across the board and, in addition, the work of the committee includes a codification of the compensation laws applicable to all veterans.

The full committee, after considering the bill extensively, approved it with several amendments.

We know what happened following the reporting of the bill by the Committee on Veterans' Affairs. It was unanimously reported. The bill then languished in the Committee on Rules for many weeks. A diligent effort was made to bring the bill out to the floor under a rule from the Committee on Rules, but without success.

Here I want to compliment our distinguished chairman, the gentlewoman from Massachusetts [Mrs. ROGERS] for her diligent efforts in bringing this bill before the House. Also I want to compliment Mr. RADWAN, the chairman of the Subcommittee on Compensation and Pensions, and my colleague, Mr. MACK, the chairman of the Subcommittee for Spanish-American War Veterans' Legislation, as well as all other members of the Committee on Veterans' Affairs, for their work in connection with this important legislation.

We know that the discharge petition did not succeed under the time limitation, although 164 names were signed to the petition in 1 day. I was most pleased to sign the discharge petition to endeavor to bring the committee bill from the Rules Committee.

Following the failure of this action, Mr. Speaker, there were several conferences with the leaders, including the Speaker and the majority leader. We were told during these conferences that a 5-percent increase across the board was all that could be considered during this session of Congress. It was indicated that the budgetary situation was such that the administration could not approve legislation in excess of a 5 percent increase across the board.

The committee members deplored this action of the leadership in dictating to the committee the type of veterans' legislation which we of the legislative committee could write. I personally stated that I did not approve of being told what type of legislation would be considered. But the committee was forced to yield to the demands of the leadership for reducing the bill and approved a measure for a 5-percent increase across the board for all veterans presently receiving compensation or pension under existing law. The committee was forced to yield in order to get a bill to the floor.

After this approval, Mr. Speaker, there was a demand that the bill be reduced further before it could be considered by the House. We were told it would be necessary to strike out the entire section 3 of the bill. Section 3 of the bill applies to the Spanish-American War veterans, and provided a 5-percent increase for the non-service-connected veterans, those who are 100-percent disabled, who are unemployable, and who have to meet income limitations.

At this point some members of the committee rebelled against this effort to dictate legislation and stated they would not compromise further. Therefore, the bill was not approved by a unanimous vote, as bills customarily are approved by the committee.

This is now no longer a one-package bill.

After striking out section 3, the committee, in a futile gesture, then reported a separate bill embracing the provisions of section 3 which were stricken and provide an increase for the Spanish-American War veterans—in other words, the committee divided the bill and introduced a separate piece of legislation, which everyone knows and recognizes cannot be considered and cannnot be passed during the remaining days of this session of the Congress.

The cost for the increased compensation to service-connected veterans as now provided in the bill, amounts to $60,045,000. The provision in the bill for an increase for service-connected widows of from $75 to $87 a month amounts to $9,722,000.

I think it is very important, Mr. Speaker, to state what the bill, as amended, does not do. What the bill does not do is significant and, I think, important. The number and class of veterans who have been denied any benefits under this bill should be brought out.

As indicated, the bill strikes out all increases for veterans who are 100-percent disabled where they are nonservice-connected. The amendment to the original bill, H. R. 9020, strikes out disability compensation for the widows and dependents of these veterans, and also compensation for the Spanish-American War veterans and their dependents.

There are approximately 1 million veterans and their dependents who are not taken into consideration in this legislation. To be exact, 975,000 veterans, veterans' widows, and dependents of veterans, according to the Veterans' Administration records, have been deleted from receiving any benefits under the bill. This includes some 482,000 veterans of World War I and World War II and Korean veterans who now receive a part III or nonservice-connected pension. These veterans are a

hundred percent disabled, are unemployable, and subject to an income limitation, under existing law, of $1,400 if single and $2,700 if married. Obviously there is a great need for an increase to this worthy group of veterans. It includes 311,000 dependents of veterans of World War I and World War II and Korean veterans whose husbands or fathers lost their lives in the service of our country. It includes 61,000 Spanish-American War veterans and 82,000 Spanish-American War veterans' dependents. The average age of our Spanish-American War veterans is now 75 years, and they are given no increase. The few remaining Civil War veterans are denied any increase, as well as Indian War veterans and their dependents. A total of approximately 1 million veterans and their dependents are not given any increase under this legislation. I think that is the important thing that should be pointed out at this time.

We all know that immediately following the war the overall budgetary cost for all programs for the veterans of the Nation amounted to approximately $9 billion. This amount was reduced from time to time, until last year the sum appropriated was about $4 billion. For the next fiscal year, 1955, the full amount appropriated for the veterans' program will drop to $3.8 billion. The veterans' costs over the years have been drastically reduced, more than 50 percent. Yet we are required to bow to the inevitable and accept an inadequate bill—take what we have been told is all that will be considered at this time.

I certainly hope that when this bill is passed and reaches the other body, that the Senate will see fit to raise the authorization to the amount of the initial bill reported by the Committee on Veterans' Affairs.

Mr. Speaker, I bow reluctantly to the demands of the situation.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. EVINS. I yield to the gentleman from Indiana.

Mr. MADDEN. Can the gentleman tell the Members what the difference in cost would be comparing this compromise bill with the original bill, H. R. 9020?

Mr. EVINS. I shall be glad to supply that information. The cost of the initial bill as reported by the Subcommittee on Veterans' Affairs was $289 million. This sum was pared down and reduced by the full committee to $231,722,000. Now the cost of the bill as pared down by the leadership is $109,454,000. So there has been a reduction of $121,868,000 from the amount of the original bill as reported by the committee.

Mr. MADDEN. Could the gentleman state as a member of the Committee on Veterans' Affairs whether or not the bill, H. R. 9020, in its original form was reported unanimously by the committee?

Mr. EVINS. Yes, it was reported unanimously.

Mr. MADDEN. The gentleman referred to the Committee on Rules holding up the bill, H. R. 9020, for some period of time. I wish the RECORD to show that as a member of the Committee on Rules, I was very much in favor of the original bill, H. R. 9020, and urged the committee to report the bill out as originally reported by the Committee on Veterans' Affairs.

Mr. EVINS. I thank the gentleman.

Mr. FORAND. Mr. Speaker, will the gentleman yield?

Mr. EVINS. I yield to my friend.

Mr. FORAND. I hold in my hand a copy of the report accompanying this bill. I notice the date is May 28. I take it that this was on the original bill, is that correct?

Mr. EVINS. That was the report on the original bill, yes.

Mr. FORAND. Is a report available to the Members of the revised bill so that we may be brought up to date on it?

Mr. EVINS. I will state to the gentleman that a report has not been published on the new bill as amended on yesterday because the committee met only on yesterday on this new version of the bill, as it is now before the House.

Mr. FORAND. Therefore, the membership cannot depend on this report for a true picture of the bill under consideration?

Mr. EVINS. The blue sheet published up to date would give the gentleman the cost figures.

Mr. FORAND. But that has not been given to us and the report does not contain that blue sheet.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. EVINS. I yield to the distinguished majority leader.

Mr. HALLECK. The gentleman from Rhode Island serves on a very eminent committee, the great Committee on Ways and Means, and he knows as well as I do that frequently committees adopt amendments to legislation as committee amendments after the bill has been reported, and never to my knowledge has there been a seperate report filed because such an amendment was proposed.

Mr. FORAND. The gentleman will admit that, regardless of anything he has said, the fact still remains that this report cannot be relied upon as an up-to-date report on the bill.

Mr. EVINS. The gentleman is correct. Mr. Speaker, I now yield to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE. Do we understand now that this legislation as it comes to the floor completely eliminates Spanish-American War veterans from any increase?

Mr. EVINS. There is no increase in the pending bill provided for Spanish-American War veterans or their widows or dependents or any veteran who has a non-service-connected disability.

Mr. PRICE. No non-service-connected case gets any increase under this legislation?

Mr. EVINS. That is correct; the gentleman is correct.

Mr. HALLECK. Mr. Speaker, will the gentleman yield for a brief question?

Mr. EVINS. I yield once more to the distinguished majority leader.

Mr. HALLECK. I am sure the gentleman will agree with me that since 1952, when the pay or compensation provided for covering the classes in section 1, the increase in the cost of living has been 1.8 percent and here we are today granting a 5-percent increase in compensation, which is 3.2 percent above the increase in the cost of living since the last adjustment, which was made in the last Congress.

Mr. EVINS. The gentleman may be correct in his observations, but it should be pointed out that the cost of living has been going up and veterans with fixed incomes have not been given increases commensurate with the general cost-of-living increase. In other words, every time the cost of living has gone up the veterans have not been raised accordingly, and it also does not negate the fact that veterans' appropriations have been reduced something over 50 percent in the past few years.

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. EVINS. Mr. Speaker, I yield such time as he may require to the gentleman from Ohio [Mr. SECREST].

Mr. SECREST. Mr. Speaker, the first vote I cast in the Congress in March of 1933 was against the economy bill which I felt was a bill which was unfair and which went too far with respect to the veterans of this country. Today I want to commend the chairman of the Committee on Veterans' Affairs and each and every member of that committee whom I consider to be individually honest, sincere, hard-working friends of the veterans of this country. We held hearings in the Committee on Veterans' Affairs which protected the DAV, one of the great veterans' organizatiotns in this country, an organization which we found to be a sincere, hard-working group of men serving not only their own members, but members of other veterans' organizations as well as servicemen who are not members of any veterans' organization. We held hearings for weeks which resulted, with the help of the House, in protecting hospitalization benefits for the non-service-connected veterans of this country.

Now what have we accomplished thus far this year with respect to veterans' legislation? This committee reported out and the House has passed a bill providing $100 million in direct loans for homes to those veterans who cannot get loans from banks. The Senate has increased that amount from $100 million to $200 million, and yesterday our committee unanimously instructed our chairman to accept those amendments and not ask for a conference.

We have passed a bill extending the GI benefits to all Korean veterans for another year, which will give us an opportunity next year, those of you in Congress, if the need exists, to extend it again to meet those requirements.

The SPEAKER. The time of the gentleman from Ohio has expired.

Mr. RADWAN. Mr. Speaker, I yield the gentleman 1 additional minute.

Mr. SECREST. Mr. Speaker, this particular bill will give about 2 million service-connected veterans a 5 percent increase in their compensation. This bill will give to every dependent parent who lost a son upon whom they had to depend for their livelihood an increase of 25 percent in the amount they will receive. It gives to every veteran's widow in this country an increase of 18 percent if the veteran had a service-connected disability. In my opinion that is good veterans' legislation. It does not go as far as our committee originally wanted, it does not go as far as Members of the House might want, but in itself it is good legislation and I hope this Congress will adopt it unanimously.

These will be my last remarks in the House of Representatives, and I am happy I could make them for the veterans and on behalf of this committee, which I consider one of the finest, one of the hardest working committees, one of the most successful committees in this Congress.

Mr. RADWAN. Mr. Speaker, I yield such time as she may desire to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Speaker, I would like first of all to express my deep regret that the gentleman from Ohio [Mr. SECREST] is leaving the Congress of the United States. I have learned to know him and to respect his great ability and his great helpfulness and his nonpartisanship in working for the veterans. He has been invaluable in the formation of rules and regulations. We will miss him more than I can say. He has been helpful in writing this particular bill and in working out some sort of a compromise. I compliment the gentleman from New York for his tremendously fine work, his courtesy, his fine, able, and sincere attitude. He has performed a distinct service to the veterans of this Nation. I want to commend as well all of his subcommittee and all of the main committee and the staff of the committee who worked so hard with us.

I do not believe the entire membership of the House of Representatives has a comprehension of the hours of work that the Committee on Veterans' Affairs have put into their legislation, and their anxiety to be helpful in every way. Our excellent committee is composed of 14 Republicans and 14 Democrats.

Personally I am extremely grateful to the Congress of the United States for this splendid Committee on Veterans' Affairs and I believe the veterans and the people of the country should be grateful. I do not believe there is a member of our committee who is not broken hearted because we had to compromise away section 3 of the bill, providing pensions for certain veterans of World War I and the Spanish-American War veterans and their widows. Our committee was forced to make this compromise in order to get this bill before the House. It was a terrible blow, and I hope that section 3 will be passed in a separate bill and passed in this session of Congress. I deeply believe that when the people come to realize the benefits and help provided in section 3 of this bill, which we were forced to eliminate, the people will want the legislation provided in section 3 passed.

Mr. EVINS. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma [Mr. EDMONDSON].

Mrs. ROGERS of Massachusetts. If the gentleman will permit, may I first just answer a question of the gentleman from Illinois [Mr. O'HARA], the only Spanish American war veteran in the House of Representatives. Did the gentleman have a question?

Mr. O'HARA of Illinois. I have a question. Do I understand that no provision is made for increasing the small pension now received by widows of Spanish-American war veterans?

Mrs. ROGERS of Massachusetts. That is correct. But I will say to the gentleman that the section which was stricken from the bill that contained this provision will be brought up in a separate bill by the gentleman from Washington [Mr. MACK]. I hope this bill will pass. I cannot yield further because I do not have the time. However, I shall attach to my remarks a chart showing the rates of increase under the bill:

INCREASED RATES OF COMPENSATION—PROPOSED SUBSTITUTE FOR H. R. 9020

Veterans' compensation—All wars and peacetime

	Present law war service-connected rates, Veterans Regulation 1 (a), as amended, pt. I	Substitute amendment	Present law peacetime service-connected rates, Veterans Regulation 1 (a), as amended, pt. II	Substitute amendment
(a) 10 percent disability	$15.75	$17.00	$12.60	$14.00
(b) 20 percent disability	31.50	33.00	25.20	26.00
(c) 30 percent disability	47.25	50.00	37.80	40.00
(d) 40 percent disability	63.00	66.00	50.40	53.00
(e) 50 percent disability	86.25	91.00	69.00	73.00
(f) 60 percent disability	103.50	109.00	82.80	87.00
(g) 70 percent disability	120.75	127.00	96.60	102.00
(h) 80 percent disability	138.00	145.00	110.40	116.00
(i) 90 percent disability	155.25	163.00	124.20	130.00
(j) Total disability	172.50	181.00	138.00	145.00
(k) Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, rates (a) to (j) increased monthly by	47.00	47.00	37.60	37.60
Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, in addition to requirement for any of rates in (l) to (n), rate increased monthly for each loss or loss of use by	[1] 47.00	[1] 47.00	[2] 37.60	[2] 37.60
(l) Anatomical loss, or loss of use of both hands, or both feet, or 1 hand and 1 foot, or blind in both eyes with 5/200 visual acuity or less, or is permanently bedridden or so helpless as to be in need of regular aid and attendance, monthly compensation	266.00	279.00	212.80	223.00
(m) Anatomical loss, or loss of use of 2 extremities at a level, or with complications, preventing natural elbow or knee action with prosthesis in place, or suffered blindness in both eyes, rendering him so helpless as to be in need of regular aid and attendance, monthly compensation	313.00	329.00	250.40	263.00
(n) Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthetic appliance, or suffered anatomical loss of both eyes, monthly compensation	353.00	371.00	282.40	297.00
(o) Suffered disability under conditions which would entitle him to 2 or more rates in (l) to (n), no condition being considered twice, or suffered total deafness in combination with total blindness with 5/200 visual acuity or less, monthly compensation	400.00	420.00	320.00	336.00
(p) In event disabled person's service-incurred disabilities exceed requirements for any of rates prescribed, Administrator, in his discretion, may allow next higher rate, or intermediate rate, but in no event in excess of	400.00	420.00	320.00	336.00
(q) Minimum rate for arrested tuberculosis	67.00	67.00	53.60	53.60

[1] But in no event to exceed $420.
[2] But in no event to exceed $336.

Section 2 increases the rate of compensation for widows without children from $75 to $87 monthly. Dependent parents are increased from $60 to $75 and where two parents are living from $35 to $40 each.

Cost:

Veterans	$60,045,000
Widows	9,722,000
Parents	40,087,000
Total	109,854,000

The SPEAKER. The gentleman from Oklahoma [Mr. EDMONDSON] is recognized.

Mr. EDMONDSON. Mr. Speaker, I shall support this bill and vote for it;

but like most members of the Committee on Veterans' Affairs I will vote for it with deep regret that we did not cross the bridge all the way, that we did not do the job and do it right by taking into account in this bill the widows and orphans of totally disabled non-service-connected veterans.

For what it is worth I would like to call to the attention of the membership on the Republican side, who are the ones who blocked the total job being done, the pledge that was given on this subject on board a train known as the Eisenhower campaign special on October 27, 1952, in a letter to Mr. E. K. Inman, editor of the National Tribune—The Stars and Stripes. This is the recommendation of Candidate Eisenhower in 1952:

> No program of economy should overlook the legitimate rights and needs of disabled veterans.

Not limiting it, Mr. Speaker, to service-connected veterans, but to disabled veterans. And he went on to say this:

> As has been clearly stated in the Republican platform, adjustment of compensation and pension payments must be made from time to time with the changes in the costs of living. This responsibility I shall never overlook.

I find it impossible to understand, I find it incredible that it has been decided that this pledge will not be carried out and that the job will not be done for the totally disabled non-service-connected veterans of our country, for their widows and orphans. I regret it, but I will support this bill as half a loaf, for half a loaf is better than none.

The SPEAKER. The time of the gentleman from Oklahoma has expired.

Mr. RADWAN. Mr. Speaker, I yield the gentleman from Oklahoma 1 additional minute to ask him a question:

The statement that the gentleman read includes reference to the cost of living, does it not?

Mr. EDMONDSON. The statement which I read includes the phrase "made from time to time with the changes in the costs of living." Certainly it does.

Mr. RADWAN. And the cost of living since that time has increased 1.8 percent.

Mr. EDMONDSON. But does an increase in the cost of living justify an increase in pensions for service-connected veterans but not for non-service-connected disabled veterans? I see no reason why the cost of living increase should not be granted to all disabled veterans and their widows and orphans.

Mr. RADWAN. But the gentleman must admit that the increase in pensions granted amounts to 2½ times the increase in the cost of living.

Mr. EVINS. Mr. Speaker, I yield such time as he may desire to the gentleman from Alabama [Mr. SELDEN].

Mr. SELDEN. Mr. Speaker, as has been pointed out, H. R. 9020 was reported unanimously by the Committee on Veterans' Affairs on May 28, 1954. This measure was, without question, one of the most important measures reported by the Veterans' Committee during the 83d Congress. As originally reported, H. R. 9020 would have granted a 10-percent increase in compensation to all veterans with service-connected disabilities. Section 2, which is compensation for dependents of deceased veterans who died from service-connected causes, proposed a 16-percent increase for widows without children, a 25-percent increase for dependent parents, and a 14-percent increase for each parent in cases of 2 dependent parents. Section 3 of the original bill would have provided an increase of about 10 percent for veterans' pensions and dependents' pensions.

The chairman of the Committee on Veterans' Affairs, the gentlewoman from Massachusetts [Mrs. ROGERS], has made every effort since H. R. 9020 was reported by our committee to secure a rule on this legislation so that it might be considered on the floor of the House. I have joined with the gentlewoman from Massachusetts, as have other members of the Veterans' Affairs Committee, in her efforts to secure such a rule. Unfortunately, H. R. 9020 was not acceptable to the Republican leadership in its original form and our efforts have been unsuccessful.

After several meetings of the Committee on Veterans' Affairs, a compromise amendment was voted by the committee that is being offered today under a suspension of the rules. This amendment constitutes the best possible compromise that could be worked out with the Republican leadership.

The compromise amendment now under consideration grants a 5-percent increase for veterans drawing compensation for service-connected disabilities. Section 2, which provides compensation for widows and dependent parents of veterans who died from a service-connected cause, remains the same with increases from 14 to 25 percent. The total cost of the compromise amendment is $109,854,000.

Under the compromise, no increase has been granted for 975,000 veterans' widows and children now receiving pensions, although the Committee on Veterans' Affairs made every effort to include a 5-percent increase for non-service-connected veterans and veterans' dependents now receiving pensions. I might state, however, that these provisions have been incorporated in a measure, H. R. 9962, introduced yesterday by Representative MACK of Washington.

I regret that a rule was not granted on H. R. 9020 as I feel this measure should have been brought to the floor of the House as it was originally introduced. Yet I shall join with my colleagues on the Committee on Veterans' Affairs in supporting the compromise amendment before us today as I feel the increases contained in it are both needed and justified. Should H. R. 9962 reach the floor of the House for consideration, I shall also support that measure.

Mr. EVINS. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. MATTHEWS].

Mr. MATTHEWS. Mr. Speaker, I believe that those of us on the House Committee on Veterans' Affairs would unanimously agree that H. R. 9020, which was reported unanimously by our committee, is the most important single piece of legislation recommended by our committee during the 83d Congress. H. R. 9020 is not a bonus bill, but it is an attempt to correct inequities and it recognizes this basic principle that all of our veterans and their dependents who have been receiving compensation and pensions from the Government are entitled to modest increases in these compensations and pensions to meet the increased cost of living. I believe all the Members of the House realize that for many weeks we have been trying to get a rule on H. R. 9020, and various members of our committee many times during the past several weeks have talked here on the floor of the House in an effort to get a rule on this important legislation.

Since we were not able to get a rule, the question that had to be answered by our Committee on Veterans' Affairs was whether or not we should go down with H. R. 9020 in its entirety in a losing battle, or whether we should try to salvage as much as possible out of this bill in order to give some of our veterans and their dependents at least partial relief. I do not believe, Mr. Speaker, the veterans and their dependents who need this relief are too much interested in the mechanics of legislation. I do not believe they are interested in matters of priority and in other technical details that naturally absorb us as Members of the House. I, therefore, answered this question—as did the majority of our Members—by taking the view that we ought to try to get the maximum relief possible for our veterans and their dependents, even though we could not get all of the provisions of H. R. 9020. It should be emphasized here that our committee spent many days deliberating H. R. 9020, and we made many changes in the original bill as we sought to be fair, not only to the beneficiaries of this bill, but to the economy of the Nation as a whole. Our committee felt that H. R. 9020 was an excellent bill, and deserved the consideration of the House. We further felt that if H. R. 9020 were considered by the House, that it would pass by an overwhelming majority.

Now, the legislation that we are discussing today is designed to help service-connected veterans, and the widows and dependents of service-connected veterans. I believe that all of us recognize that certainly this group deserves first claim on the legislation that we might pass. If we pass this legislation, which is presented as an amendment to H. R. 9020, it will first of all increase the rate of compensation to service-connected veterans by 5 percent. This will mean that veterans who have a total disability, and are now receiving $172.50 per month will receive $181. It will mean those veterans with a 50 percent disability who are now receiving $86.25 a month, will receive $91. The passage of this legislation will mean—in the second place—that the widows of service-connected

veterans, without children, will receive a 15-percent increase in their compensation—or those who are now getting $75 a month will receive $87 a month.

In the third place, it means that dependent parents of service-connected veterans will get an increase of 25 percent—or those who are now getting $60 a month will receive $75. This provision applies to those situations where there is only one surviving parent. If there are two parents, each of them will receive $40 a month instead of $35, which is the case at present. Now, it should be pointed out here that this is the only group in the compensation field which comes under income limitations for Social Security, so we can see the desirability of immediate aid to this particular group. There is an urgency here that should be given prompt attention.

The cost of these increases may be itemized as follows: Increases to veterans, $60,045,000; increases to widows, $9,722,000; and increases to parents, $40,087,000, making a total of $109,854,000. I am supporting this legislation, and I hope it passes without a dissenting vote. I believe it is worth while, even if it does not go as far as our committee desired.

Now, there will be other bills introduced to provide for the other features of H. R. 9020, with the specific intent of providing for a 5-percent increase in rates for non-service-connected pensions for dependents and veterans. I intend to support this legislation, and I hope we have an opportunity to pass it before the adjournment of Congress.

Mr. RADWAN. Mr. Speaker, I yield 4 minutes to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Speaker, a question was raised a while ago by the gentleman from Rhode Island concerning information with respect to the pending bill. I believe it was pointed out to him and likewise to any others who may be interested that a blue sheet has been available at the desk here. This sheet contains information relative to the increased rates of compensation in this proposed substitute for H. R. 9020.

Mr. FORAND. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Rhode Island.

Mr. FORAND. The point I was making was that this sheet was not available to us on this side. Nobody had seen it except members of the committee and I thought that in fairness to all Members they should not be misguided by thinking that this is an up-to-date report. I am thankful to the gentleman for calling attention to the fact that we should consult the blue sheet rather than the report itself in order to be up to date.

Mr. ADAIR. The gentleman is correct. The blue sheet supplements the report.

Mr. Speaker, this proposed legislation is really quite simple. A great deal has been said about it, some of which tends to confuse the issue. For example, it has been said that there are no benefits in this bill for the widows of Spanish-American War veterans. That is not the case. For those widows of service-connected disability veterans, there is provision for the same benefits as to any other widow. According to the figures which we have available on that point, there are 975 Spanish-American War veteran widows who will be benefited by this legislation.

Mr. O'HARA of Illinois. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Illinois.

Mr. O'HARA of Illinois. I wish to take issue with the gentleman. I do not believe that this bill does provide for all the widows of service-connected disability veterans of the Spanish-American War.

Mr. ADAIR. I said that this applies to those Spanish-American War cases which are based upon service connection.

Mr. O'HARA of Illinois. If the bill took care of all Spanish-American War widows, as it should, the gentleman's statement would be more accurate. I know that the gentleman wishes to be fair, and I hold him in high esteem. But it is difficult for veterans of later wars to understand the conditions that obtained in the Spanish War period. There is no way under the sun to determine whether disabilities were service connected. There were no records, precious little medicine, everything was haphazard and topsy-turvy. Congress when it first provided pensions for Spanish-American War veterans gave recognition to this fact and that was the reason for the unique character of this pension, unlike that for the veterans of any other war of this country. Because there were no records, and the lack of medicine and proper food was responsible for conditions little short of those of a plague, affecting our entire force, the presumption is that every Spanish War veteran is a service-connected disability case. The surviving widows of these veterans are not young. Most of them will be gone in a few years. I am sick at heart to think that this administration would seek to build a reputation for economy by denying a few paltry dollars to make a little easier the declining years of these aged women.

Mr. ADAIR. Mr. Speaker, it is of importance for the House to be aware of the fact that this proposed measure grants increases in compensation only in cases where there is service connection.

The increases, if enacted into law, would apply to veterans with service-connected disabilities, to the widows of such veterans, and to their dependent parents if the latter can meet the income limitations existing in the present law.

As has been pointed out by previous speakers, a great deal of consideration was given to the matter of increasing the pensions of persons whose claims are nonservice connected. Reluctantly the committee concluded that an increase in non-service-connected pensions was not feasible at this time. Hence this measure is limited to increases in compensation.

As is true with so much legislation which is before the Congress at this time, the question became one of weighing the needs of a deserving group of people, that is, the veterans and their dependents, on the one hand, as against maintaining the sound financial structure of our Federal Government on the other. In proposing this increase, the committee also took into account the increase in the cost of living which has occurred since the last legislation increasing compensation was enacted. According to the best figures available, the cost of living has increased something under 2 percent since August 1, 1952, the date when Public Law 356 of the 82d Congress became effective.

Briefly stated, the measure before us gives a 5 percent increase to veterans with service-connected disabilities, it increases from $75 to $87 a month the compensation paid to childless widows of men whose deaths were service-connected, and increases from $60 to $75 a month the payments to single dependent parents and from $35 to $40 a month each for two dependent parents.

The committee recognizes, with the deepest sympathy, the need that many persons have for increases in pension payments. However, having in mind all the circumstances, it did not seem feasible to press further our desire to give those people readjustments upward at this time. It was felt that the first responsibility of this Congress is to persons who actually have suffered disabilities while in the military service, and to their dependents.

Having in mind all the factors concerned, I do believe that this is good legislation. It provides an increase for a deserving group of citizens and yet at the same time it does not go so far as to jeopardize the sound economic condition of our Government. This proposal is worthy of the wholehearted support of the entire membership of this House.

Mr. HAGEN of California. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from California.

Mr. HAGEN of California. Does the gentleman know of a veterans' organization that approves this legislation?

Mr. ADAIR. I have not been advised as to the attitude of the veterans' organizations with respect to the bill in its present form.

Mr. EVINS. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin [Mr. JOHNSON].

Mr. JOHNSON of Wisconsin. Mr. Speaker, while I expect to support amendment H. R. 9020 which omits section 3 of the original bill, I am doing so only because I am told it is the best the administration will give at this late date of the session. Rather than see the veterans' compensation lose the 5 percent raise granted in the amendment, I am supporting the same.

In view of the sharply declining cost of the veterans' benefit program—a reduction of over 50 percent in 7 years—the attitude of the administration and

the Republican leadership of the House with respect to compensation and pension increases is almost unbelievable.

The administration and congressional leadership fought vigorously for a substantial foreign aid appropriation, but when the disabled veterans asked for an increase, and when the aged and disabled pensioners, widows and orphans asked for an increase, they were given this substitute.

Had the Republican leadership approved the very modest compensation and pension increase unanimously recommended by the House Committee on Veterans' Affairs, the cost of the veterans' benefit program for fiscal 1955 would still be a quarter of a billion dollars less than the cost for fiscal 1954.

I wish to put into the RECORD the chart showing the amount of payments the veterans would have received in the original bill H. R. 9020 and the rates showing how the substitute bill H. R. 9020 decreased the veterans' compensation and omits veterans' pensions and dependents' pensions. The charts follow:

ORIGINAL BILL, H. R. 9020

INCREASED RATES OF COMPENSATION AND PENSION, H. R. 9020

Title: To provide increases in the monthly rates of compensation and pension payable to certain veterans and their dependents.

Mr. RADWAN: Introduced and referred May 5, 1954.

Analysis: Provides the increases in service-connected compensation and non-service-connected pension as indicated in the tables which follow:

Veterans' compensation—all wars

	Present law war service-connected rates, Veterans Regulation 1 (a), as amended, pt. I	H. R. 9020	Present law peacetime service-connected rates, Veterans Regulation 1 (a), as amended, pt. II	H. R. 9020
(a) 10-percent disability	$15.75	$17.00	$12.60	$14.00
(b) 20-percent disability	31.50	35.00	25.20	28.00
(c) 30-percent disability	47.25	52.00	37.80	42.00
(d) 40-percent disability	63.00	69.00	50.40	55.00
(e) 50-percent disability	86.25	95.00	69.00	76.00

Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, in addition to requirement for any of rates in (f) to (n), rate increased monthly for each loss or loss of use by	[1] 47.00	[1] 47.00	[2] 37.60	[2] 37.60
(l) Anatomical loss, or loss of use of both hands, or both feet, or 1 hand and 1 foot, or blind both eyes with 5/200 visual acuity or less, or is permanently bedridden or so helpless as to be in need of regular aid and attendance, monthly compensation	266.00	279.00	212.80	223.00
(m) Anatomical loss, or loss of use of 2 extremities at a level, or with complications, preventing natural elbow or knee action with prosthesis in place, or suffered blindness in both eyes, rendering him so helpless as to be in need of regular aid and attendance, monthly compensation	313.00	329.00	250.40	263.00
(n) Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthetic appliance, or suffered anatomical loss of both eyes, monthly compensation	353.00	371.00	282.40	297.00
(o) Suffered disability under conditions which would entitle him to 2 or more rates in (l) to (n), no condition being considered twice, or suffered total deafness in combination with total blindness with 5/200 visual acuity or less, monthly compensation	400.00	420.00	320.00	336.00
(p) In event disabled person's service-incurred disabilities exceed requirements for any of rates prescribed, Administrator, in his discretion, may allow next higher rate, or intermediate rate, but in no event in excess of	400.00	420.00	320.00	336.00
(q) Minimum rate for arrested tuberculosis	67.00	67.00	53.60	53.60

[1] But in no event to exceed $420.
[2] But in no event to exceed $336.

Section 2 increases the rate of compensation for widows without children from $75 to $87 monthly. Dependent parents are increased from $60 to $75 and where two parents are living from $35 to $40 each.

Cost:

Veterans	$60,045,000
Widows	9,722,000
Parents	40,087,000
Total	109,854,000

Mr. JOHNSON of Wisconsin. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include tables.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. EVINS. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. GREEN. Mr. Speaker, I will support and vote for this bill with a great deal of regret that this bill does not include non-service-connected disability and Spanish-American War Veterans and their widows.

It is deplorable in my opinion that the Veterans Committee headed by that great friend of the veteran, the gentlewoman from Massachusetts [Mrs. ROGERS] has been subjected to pressure by the leadership and forced to accept this compromise.

I served on the Veterans Committee my first term in Congress and so I have firsthand knowledge how hard the com-

mittee works in the interest of all veterans.

For the leadership and the Republican Party this is another nail in their coffin of broken campaign promises.

Mr. PRICE. Mr. Speaker, a few days ago I signed the Radwan discharge petition to bring to the floor H. R. 9020, a bill which would have provided moderate increases in compensation for our disabled veterans and I am confident that had that bill, which was reported out by the House Committee on Veterans' Affairs, been permitted to come to the House by the Committee on Rules, it would have been unanimously passed.

Now, we have only an amendment to consider—an amendment that eliminates almost a million disabled veterans from compensation increases. It completely eliminates Spanish-American War veterans from increases. The gentleman from Tennessee [Mr. EVINS] fully explained the pressure which the administration exerted to cut the Spanish-American War veterans and all non-service-connected veterans from this legislation.

I regret this procedure, which completely disregards the fine work of the Committee on Veterans' Affairs. I want to compliment the chairman of that committee, the gentlewoman from Massachusetts [Mrs. ROGERS] and all those Members who fought to obtain action on H. R. 9020 in the form approved by the committee. I am sincerely hopeful that their efforts will not be in vain and that action in the other body will support their original position. For this reason I know the House will give its unanimous approval to suspending the rules and passing the amendment under consideration. I am certain that to a man the veterans who have been forgotten by the Republican administration in this compromise will support us in this action as it will keep alive an effort to secure an across-the-board increase for all disabled veterans. Since the compromise offers assistance to all service-connected disabled veterans, I know all Members will give it their support, and the great majority of us will look with hope to the other body to extend the increase to the million veterans the administration is ignoring here this afternoon.

Mr. HIESTAND. Mr. Speaker, I have long been in favor of H. R. 9020 as originally submitted. I consider veterans compensations have been inadequate. My feeling on this bill is like that on many bills where previous Congresses have set compensation figures in dollars and immediately thereafter they or their administrations embarked upon programs of deficit financing, resulting in inflation and the increased cost of living. Those dollars shrunk and the purchasing power thereof became seriously impaired. In my judgment this was an unfair deal. In fact a raw deal to those on fixed incomes, pensions and fixed compensations.

If those compensations were fair then, certainly we should do something to adjust them now. Actually, since the last adjustment for veterans in 1950, the cost of living has increased only 1.8 percent. However, that amount of increase would be ridiculous, and I am happy to see the compromise bill eventually coming out of committee, while not as large an adjustment as the original bill still frankly the best we could do.

I think we all must realize, and veterans realize, that to seriously impair our national financial picture by further deficit financing is the last thing we or they want done, that to embark upon a broadcast increasing of compensations and salaries all through the Federal payrolls would cause inflation and increased cost of living which would defeat the very object of the measure and make it ineffective. This measure will increase the Federal expense by $110 million. It will favor the service-connected disabled veterans but it also gives something of a break to their widows and orphans. I am heartily in favor of this bill. It is not what we would like to have done, but frankly, ladies and gentlemen, it is the best we could do. I hope the bill will pass.

Mr. BYRNE of Pennsylvania. Mr. Speaker, the bill before us today to increase the rates of compensation to veterans represents a major tragedy in the history of veterans' legislation. It is not only a disappointment, it is a double-cross, a direct reversal of promises repeatedly made to veterans by President Eisenhower and his leaders in Congress since the campaign of 1952. The increases in compensation provided under the amended H. R. 9020 fall far short of the cost-of-living increase pledged by Republican leaders for almost 2 years. They reduce from 10 percent to 5 percent the increases of the original H. R. 9020. Furthermore, this amended bill excludes from an increase in benefits all veterans who do not have a service-connected disability, and also the dependents of veterans without a service-connected disability. It makes no provision for increasing compensation payable to dependents of veterans who have died with a service-connected disability but not from it. All in all, some 943,000 veterans and their dependents have been left out of the bill.

The total cost of the amended bill, granting a 5 percent compensation increase, is $109,854,000. To include the pensioners and their dependents at the rate of 5 percent would have increased the total by $35 million.

It must be pointed out that the Committee on Veterans' Affairs, under the leadership of the gentlewoman from Massachusetts [Mrs. ROGERS], our esteemed chairman, reported out a bill granting approximately a 10-percent increase in compensation rates to service-connected disabled veterans and their dependents, and an equitable increase in pension rates to all other veterans and their dependents now covered. The Republican leadership of the House refused to grant a rule for this bill to come up on the floor of the House. A discharge petition offered by the gentleman from New York [Mr. RADWAN] failed to get sufficient signatures to be effective. In order to present any bill at all, the committee was forced to go along with the administration and alter its bill to its present form.

I will support the bill in the interest of those veterans who will benefit from it, but must deplore its inequity and injustice.

It has been stressed often, and it is not necessary to repeat, that the ramifications of this attitude on the part of the Republican administration and the leadership in Congress will be felt in the coming elections. The veterans stand together and they do not forget. They will register their protest at this action when they go to the polls in November.

Mr. BRAY. Mr. Speaker, I am disappointed that this bill, as amended, is coming before this body for a vote rather than H. R. 9020 as it was first reported by the Committee on Veterans' Affairs. Action on the original bill was delayed by the Rules Committee, which refused to report it for action by the House. I was one of those who signed the discharge petition to bring this bill to the floor of the House for a vote. This amended bill is being brought to the floor under a suspension of the rules and cannot be amended. The Members of this body now have the choice of either voting for or against it. Although this bill does leave out many needy veterans, widows, and dependents, it is good as far as it goes and is better than no bill at all.

For this reason I am going to support the bill, but I am going to continue my efforts to bring to the floor another bill which would accomplish all of the objectives of H. R. 9020 as originally reported.

Mr. YOUNG. Mr. Speaker, this legislation for a readjustment of benefits for our veterans is long overdue. In essence, H. R. 9020 provides modest increases in the monthly rates in compensation payable to certain veterans and their dependents. In view of the inflationary spiral which has occurred since the last increase in benefits, it is extremely important that these modest increases be allowed at this time.

I am sorry to see that section 3 of the original bill has been omitted. That section provided for increases to the non-service-connected veterans, their widows and children. Apparently the measure before us is the best compromise that can be made at this time, and, rather than see relief denied to a very deserving segment of our population because a desirable portion of the bill has been omitted, I urge the adoption of this bill.

Mr. O'HARA of Illinois. Mr. Speaker, this date of Wednesday, July 21, 1954, will be hard for the veterans of this country to erase from memory. I am afraid it will be known for a long time as the Black Wednesday of Betrayal.

No part of the shame of this day rests upon the charming and beloved chairman of the Veterans' Committee, Mrs. ROGERS. The committee over which the distinguished Congresswoman presides is composed of as fine and hardworking a membership as ever served the Congress. To the everlasting credit of this committee let it be known that the committee unanimously reported out the bill which later someone of the administration in

higher authority mutilated in the false name of economy. The Veterans' Committee sought to increase the pensions for veterans and for the widows of veterans to meet to some extent the increased cost of living.

There is one small group of pensioners, a little group of aged women rapidly diminishing in numbers, the widows of the veterans who fought the Spanish-American War culminating in the surrender of the Spanish land forces in Cuba 56 years ago just last Saturday. These aged women, veterans of a war fought 56 years ago and which started the United States of America on the road to destiny, have been eking out existence on a pittance of $51 a month. The Veterans' Committee, in the bill unanimously reported out by it, and which someone higher up in this administration crushed under heel, increased this pittance by $7 a month. By the standards by which this Congress is spending money and subsidizing every big business and banking interest that is reaching out for help, the amount of money that this increased pittance to these old women would have meant was of the comparative size of an ant alongside Washington's Monument.

At the very time that the false cry of economy was being raised against the veterans those who raised the cry brought to the floor of the House a bill to create another flock of $17,500-a-year Assistant Secretaries of Defense to add to the 26 or more already on the payroll. Fortunately, the gentleman from Iowa [Mr. GROSS] asked some embarrassing questions and the bill was hastily withdrawn from the Consent Calendar.

I am for economy, the right kind of economy, and I always have so voted, but I am not going to remain silent when priority is given to $17,500 payrollers over widows eking out existence on $51 a month.

If the mutilated bill that we are now given an opportunity to vote on took it out only on the widows of Spanish-American War veterans, I could say "that is just another case of someone being neglected when service to country is so long ago as to be forgotten." But this mutilated bill takes it out on the veterans of World War I, World War II, and even the veterans of Korea. I hope that by the time the bill reaches the other body the clear, clean voice of the American people will be heard coming from every corner of this great country of ours.

I shall vote for the bill gladly and joyously because of the benefits in it to the very deserving but very limited numbers who will receive them. I shall vote, however, with a sorrowing heart because of the other deserving veterans and widows who are left out in the cold to make a false record for economy for someone higher up who prefers providing another $17,500 secretary to doing a little decency to a veteran's widow.

When and where will it end? Yesterday the children in the hopeless slums were the targets. Today it is the disabled veterans of our wars and aged widows. What price glory? What price alleged economy?

Mr. ZABLOCKI. Mr. Speaker, it is with keen disappointment that I had learned earlier about the proposal to delete section 3 of H. R. 9020, the bill to grant increases in compensation and pensions to veterans of all wars and to their dependents.

There has been no doubt that veterans' benefits are in need of a fair and equitable revision. I fully concur with the view that the benefits paid to veterans with service-connected disabilities, to their widows and dependent parents, are particularly in need of an adjustment. For that reason, I had actively supported the original bill, H. R. 9020, and signed a discharge petition intended to bring this measure before the House.

The legislation in question, however, also proposed moderate increases in non-service-connected pensions of veterans of all wars and their dependents. This latter proposal is now being deleted from the bill and many of us are very much disappointed with this action. In addition, the so-called compromise amendment suggests that the rates of compensation be raised by only 5 percent rather than by 10 percent.

Many arguments have been advanced in support of the compromise bill. They refer to our budgetary situation and to the necessity of reducing all outlays during this new fiscal year. Such considerations without doubt warrant our careful scrutiny. Nevertheless, it is my hope that a more substantial portion of the recommendations contained in the original bill, H. R. 9020, will be ultimately approved by both Houses.

I am certain that no one wishes to see the legislation before us deadlocked, with the result that possibly no increases should be enacted this year in the benefits paid to our veterans and their dependents and survivors. A favorable decision, even on this very modest compromise amendment, would be preferable to no action at all. I sincerely hope, however, that the Senate will take a more sympathetic view of this issue and restore the cuts being made by the compromise amendment.

Mr. DONOHUE. Mr. Speaker, I am deeply disappointed that this bill, as amended, is being presented now to this body for a vote rather than H. R. 9020 as it was first reported by the House Committee on Veterans' Affairs.

We are prevented from acting on the original bill by the Rules Committee under the leadership instruction, which refused to report it for action by the House. I was one of those who gladly signed a discharge petition to bring this bill to the floor for a vote.

I felt then, and I feel now, that the Veterans' Affairs Committee recommendation providing a reasonable cost-of-living rate increase to all our disabled veterans, both service- and non-service-connected, for their widows, and children, and dependent parents was merely the recognition of justice.

Unfortunately these increased rates, recommended by committee members of their own party, were not acceptable to the leadership here and they have forced out this compromise amendment which sharply and inequitably reduces the compensation increases on the plea of necessary economy. They did this despite the implied pledge of President Eisenhower as a candidate in 1952 when he said, and I quote:

> No program of economy should overlook the legitimate rights and needs of disabled veterans.

Under the compromise we are offered, no increase is being granted for 975,000 veterans' widows and children now receiving pensions, although the Committee on Veterans' Affairs made every effort to include a 5 percent increase for non-service-connected veterans and veterans' dependents now receiving pensions.

However, the high point of injustice in this amended bill is the cold denial of any increase at all to a small group of widows of the veterans of the Spanish American War. These wonderful women of advanced age have been and are trying to eke out a restricted existence on a pittance of $51 a month. The leadership's determination not to recognize and honor these deserving and inspiring women marks a dark day, indeed, on their calendar.

By the standards on which this Congress generously appropriates money for assistance to questionable allies and subsidization of big business, the amount of money that this increased pittance would have meant is infinitesimal.

We may well question the economy cries of those who repudiate these heroic souls while at the same time they ask approval for appointment of another block of $17,500 a year Assistant Defense Secretaries to add to the 26 or more already on the payroll.

I am for economy, the reasonable and right kind of Christian economy, and I have consistently so voted, but I am sad, indeed, and cannot remain silent when priority is given to these $17,500 secretaries over these good women who are suffering such bleak and bare existence.

Nevertheless, this compromise measure, although leaving out so many needy veterans, and widows and dependents, grants some small relief, and since we shall have no other choice, I shall vote for it.

However, I shall not relax my efforts, and I urge you all to rally to the veterans' deserving cause to bring to the floor, before adjournment, another bill which will accomplish all the just and rightful objectives of H. R. 9020, as originally reported.

Mr. WOLVERTON. Mr. Speaker, the bill now before the House (H. R. 9020) is a compromise bill. Consequently, it is not pleasing to many of us who feel that it does not provide sufficient increases in the monthly rates of compensation and pension to veterans and their dependents. Nor, does it provide any increase to many veterans and dependents. However, insufficient though it may be, we who are friends of the veterans will vote for the bill because if we do not do so, then there will be no increases in benefits for anyone during this session of Congress.

In my opinion, it was unfair and unjust to bring this bill before the House under a procedure that does not permit any amendment of the bill. It should

have been brought before us under a rule that would permit amendments. If such had been done the many inequities that now are in the bill would not have been permitted to remain. They would have been eliminated and benefits in the amount fixed by the original bill reported to the Veterans' Committee by its subcommittee would have been adopted.

The original bill would have granted an increase of 10 percent straight across the board for all veterans and dependents now entitled to compensation or pension—and in some cases an even greater increase—was provided for.

This compromise bill now before us not only cuts the increase in benefits down to 5 percent, but eliminates many classes that should have had, and were rightly entitled to have, an increase.

There are approximately 975,000 veterans, veterans' widows, and dependents of veterans, according to the Veterans' Administration records, who have been deleted from receiving any benefits under the bill now before the House. This includes some 482,000 veterans of World War I and World War II and Korean veterans who now receive a non-service-connected pension. This deletion also includes 311,000 dependents of veterans of World War I and World War II and Korean veterans whose husbands or fathers lost their lives in the service of our country. Also 61,000 Spanish-American War Veterans and 82,000 Spanish-American War veterans' dependents. The average of Spanish-American War veterans has reached 75 years, but there is no increase provided for them nor for the few Civil War veterans' beneficiaries who still remain, as well as the few Indian war veterans and their dependents. There is no doubt that each of the classes I have mentioned should have had an increase in benefits to meet the increased cost of living.

The Committee on Veterans' Affairs is still fighting by means of a separate bill to provide increases for those veterans and their dependents that were left out of the bill now before us. I hope we can get such a bill before the House and have it adopted before we adjourn. I regret to say, however, that this is very doubtful because of the pending adjournment so close at hand. However, it is the duty of each of us to fight on in the effort to correct the deficiencies of the bill now before the House. It is hoped that when the bill comes before the Senate the veterans and their dependents will receive more considerate treatment. Nothing can more clearly demonstrate the tremendous cut that has been made in the original bill than to consider the comparative cost of that bill and the present bill. The cost of the initial bill as reported by the Subcommittee on Veterans' Affairs was $289 million. This sum was pared down and reduced by the full committee to $231,722,000. Now the cost of the bill as finally pared down, in order to get it before the House, is only $109,854,000. Thus the total reduction amounts to $121,868,000 from the amount of the original bill reported by the committee.

This is without a doubt an injustice to the men who fought for our country and their dependents. It is not right to cut down the benefits due the defenders of our country and their dependents in this manner. And, yet within a few days before this Congress adjourns we will be called upon to appropriate $3 billion or $3½ billion for foreign aid. It is time America awoke to the obligations we owe to our national defenders. It is time America realizes that our obligations to our servicemen exceeds that which we owe to any foreign nation. It is time we gave first consideration to our veterans and their dependents.

While it is deplorable that so many of our veterans are not included in this pending bill, yet it is gratifying that at least 2 million veterans, some 68,000 widows as well as 242,000 dependent parents will benefit as is shown in the following table:

Veterans:	
Korea	135,800
World War II	1,623,700
World War I	213,100
Spanish War	400
Regular:	
Wartime	1,500
Peacetime	61,900
Total	2,036,400
Widows:	
Korea	3,300
World War II	23,400
World War I	31,700
Spanish War	975
Regular:	
Wartime	325
Peacetime	6,000
Total	63,700
Parents:	
Korea	19,000
World War II	194,400
World War I	20,400
Spanish War	20
Regular:	
Wartime	1,430
Peacetime	7,300
Total	242,700

A more detailed explanation of the categories for which increased benefits have been provided for in the bill, and the amounts thereof is as follows:

INCREASED RATES OF COMPENSATION—PROPOSED SUBSTITUTE FOR H. R. 9020

Veterans' compensation—All wars and peacetime

	Present law war service-connected rates, Veterans Regulation 1 (a), as amended, pt. I	Substitute amendment	Present law peacetime service-connected rates, Veterans Regulation 1 (a), as amended, pt. II	Substitute amendment
(a) 10 percent disability	$15.75	$17.00	$12.60	$14.00
(b) 20 percent disability	31.50	33.00	25.20	26.00
(c) 30 percent disability	47.25	50.00	37.80	40.00
(d) 40 percent disability	63.00	66.00	50.40	53.00
(e) 50 percent disability	86.25	91.00	69.00	73.00
(f) 60 percent disability	103.50	109.00	82.80	87.00
(g) 70 percent disability	120.75	127.00	96.60	102.00
(h) 80 percent disability	138.00	145.00	110.40	116.00
(i) 90 percent disability	155.25	163.00	124.20	130.00
(j) Total disability	172.50	181.00	138.00	145.00
(k) Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, rates (a) to (j) increased monthly by	47.00	47.00	37.60	37.60
Anatomical loss, or loss of use of a creative organ, or 1 foot, or 1 hand, or blindness of 1 eye, having only light perception, in addition to requirement for any of rates in (f) to (n), rate increased monthly for each loss or loss of use by	[1] 47.00	[1] 47.00	[2] 37.60	[2] 37.60
(l) Anatomical loss, or loss of use of both hands, or both feet, or 1 hand and 1 foot, or blind both eyes with 5/200 visual acuity or less, or is permanently bedridden or so helpless as to be in need of regular aid and attendance, monthly compensation	266.00	279.00	212.80	223.00
(m) Anatomical loss, or loss of use of 2 extremities at a level, or with complications, preventing natural elbow or knee action with prosthesis in place, or suffered blindness in both eyes, rendering him so helpless as to be in need of regular aid and attendance, monthly compensation	313.00	329.00	250.40	263.00
(n) Anatomical loss of 2 extremities so near shoulder or hip as to prevent use of prosthetic appliance, or suffered anatomical loss of both eyes, monthly compensation	353.00	371.00	282.40	297.00
(o) Suffered disability under conditions which would entitle him to 2 or more rates in (f) to (n), no condition being considered twice, or suffered total deafness in combination with total blindness with 5/200 visual acuity or less, monthly compensation	400.00	420.00	320.00	336.00
(p) In event disabled person's service-incurred disabilities exceed requirements for any of rates prescribed, Administrator, in his discretion, may allow next higher rate, or intermediate rate, but in no event in excess of	400.00	420.00	320.00	336.00
(q) Minimum rate for arrested tuberculosis	67.00	67.00	53.60	53.60

[1] But in no event to exceed $420.
[2] But in no event to exceed $336.

Section 2 increases the rate of compensation for widows without children from $75 to $87 monthly. Dependent parents are increased from $60 to $75 and where two parents are living from $35 to $40 each.

Cost:	
Veterans	$60,045,000
Widows	9,722,000
Parents	40,087,000
Total	109,854,000

Mr. EVINS. Mr. Speaker, I yield 1 minute to the gentleman from Virginia [Mr. HARDY].

Mr. HARDY. Mr. Speaker, I support this bill, and I think that it ought to pass. However, I think I should call attention of the Members to one aspect of it that I do not think has had adequate consideration, and that is the question of survivors' benefits of military personnel who died on active duty. This bill is a further example of piecemeal legislation. We are authorizing large expenditures and expanding benefits to a large number of people without taking into consideration the fact that other committees have overlapping jurisdictions. We are not taking into consideration the effect which these increases may have on benefits payable under the Social Security Act, under the Federal Employees Compensation Act, the Servicemens Indemnity Act, or perhaps under the Railroad Retirement Act. Mr. Speaker, I introduced a resolution just about a year ago to set up a special committee to coordinate all of these various survivors' benefits, and that ought to be done. We are going to get ourselves into a terrible lot of trouble unless we do, and sooner or later we are going to have to reckon with this problem.

Mr. RADWAN. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. MACK].

Mr. MACK of Washington. Mr. Speaker, I feel very strongly that if a 5-percent increase in wages and salaries is to be granted postal workers and other Government employees, that this 5-percent increase also should be granted to all veterans and the dependents of veterans who draw either compensation or pensions.

This bill does not allow any pension increase for nonservice-connected veterans or nonservice-connected widows or dependents. This I think is a mistake. If one group gets a 5-percent increase, all should receive it.

This bill, however, does carry some very substantial pension increases for veterans. There is about $61 million in the bill in compensation increases for the service connected disabled veteran. This will raise the pensions of these service connected disabled veterans by 80 cents a month for the 10 percent disabled to $8.60 a month for the 100 percent disabled veterans.

The widow who lost her husband in the war or as a result of war injuries now receives $75 a month; under this bill her pension will be increased to $87.

The father or mother whose son was killed in the war or died of war injuries will have his or her $60 a month pension increased to $75. Where there are 2 parents living, each will receive $40 a month instead of the $35 a month such parents now receive.

The cost of these benefits are approximately $110 million.

While I am disappointed that nonservice veterans and the widows of nonservice veterans are granted no increase by this bill, I shall vote for the bill because it carries substantial benefits for all service-connected disabled veterans and parents and widows of service-connected disabled veterans. Half a loaf is better than no bread at all.

Acting on the unanimous instructions of the Veterans' Committee, I have introduced a new bill, H. R. 9962, which provides a 5-percent increase for nonservice veterans and their dependents. I hope the House will act upon it. I recognize that this is unlikely. I, therefore, especially hope the Senate, when it considers the bill now under consideration, will add the text of my bill to the pensions bill adopted in that body so that the non-service-connected disabled and their widows will not be entirely neglected in the raises in salaries, wages, compensations, and pensions which the Congress is making this year.

Mr. RADWAN. Mr. Speaker, I yield the balance of my time to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, first of all I want to say that I agree with the gentleman from Virginia [Mr. HARDY] that the time has come for a complete reappraisal and survey of the whole system and arrangement of payments to veterans. I think it is long overdue, and I would like to see that undertaken.

As far as the original committee position is concerned, I have served here on the majority as well as the minority side, and I have seen it happen many, many times that the committee reports a bill with which they expect to do a little of what we call horse trading out in Indiana. Many times they get a sort of asking price, but they wind up with something pretty good. In this instance, the veterans are winding up with a very, very good bill that goes a very long way. I realize that we would all like to vote more money. We would all like to vote more money for the employees of the Government and for other people whom we would like to help. But there is such a thing as fiscal responsibility. We are in difficulties in managing our finances. Veterans are taxpayers, just like everybody else. As a matter of fact, they are getting to be in the majority. So I say that we have got to be careful. We have provided reasonable benefits for service-connected disabilities. Perhaps it may be argued that there should be no distinction in the treatment accorded a veteran whose disability is service-connected and one whose disability is not service-connected. But I think, by and large, the people of this country expect that there will be some distinction drawn in that regard.

Reference has been made to Republican platform promises concerning increases to meet the cost of living. Permit me to point out again that since the last adjustment, which was in 1952, under a Democratic Congress and a Democratic administration, the cost of living has gone up 1.8 percent. For service-connected cases we have increased that 1.8 percent, which would be the maximum under a cost-of-living increase, to 5 percent. To my mind, that is openhanded, generous treatment which the veterans of this country will appreciate. Let us not depreciate or diminish the consequences of this bill. Let us say that it is what it is—a good bill that is going to cost the taxpayers of this country $110 million a year, but which they will be glad to pay, I am sure, because the bill is reasonable and fair.

Mr. RADWAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on this bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. The question is on suspending the rules and passing the bill.

Mr. RADWAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 399, nays 0, answered "present" 1, not voting 34, as follows:

[Roll No. 110]

NAYS—0

ANSWERED "PRESENT"—1

Williams, Miss.

NOT VOTING—34

Angell	Grant	Powell
Bailey	Harris	Regan
Brooks, La.	Harrison, Wyo.	Short
Buckley	Heller	Sikes
Busbey	Kersten, Wis.	Sutton
Camp	Long	Thompson, La.
Chatham	Lucas	Thompson, Tex.
Condon	Lyle	Weichel
Curtis, Nebr.	McGregor	Wheeler
Davis, Tenn.	Mailliard	Willis
Dodd	Patman	
Fallon	Perkins	

So (two-thirds having voted in favor thereof), the rules were suspended and the bill was passed.

The Clerk announced the following pairs:

Mr. Angell with Mr. Camp.
Mr. Weichel with Mr. Perkins.
Mr. McGregor with Mr. Sikes.
Mr. Curtis of Nebraska with Mr. Willis.
Mr. Short with Mr. Thompson of Louisiana.
Mr. Harrison of Wyoming with Mr. Regan.
Mr. Mailliard with Mr. Brooks of Louisiana.
Mr. Kersten with Mr. Chatham.
Mr. Busbey with Mr. Wheeler.

Mr. WILLIAMS of Mississippi. Mr. Speaker, how am I recorded?

The SPEAKER. The gentleman is recorded as voting "yea."

Mr. WILLIAMS of Mississippi. Mr. Speaker, under rule 8, clause 1, of the Rules of the House of Representatives I do not feel qualified to vote on this particular measure. I therefore withdraw my vote of "yea" and vote "present."

The result of the vote was announced as above recorded.

Mr. WILLIAMS of Mississippi. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WILLIAMS of Mississippi. Mr. Speaker, on the rollcall just completed, I am recorded as voting "present." In view of the fact that I am not recorded as favoring or opposing the measure, I feel that I should take this means to clarify my personal position on the bill just passed.

Clause 1, rule VIII of the Rules of the House of Representatives provides that every Member "shall vote on each question put unless he has a direct or pecuniary interest in the event of such question."

Further, Jefferson's Manual of Parliamentary Practice, paragraph 376, states:

> Where the private interests of a Member are concerned in a bill or question, he is to withdraw.

Mr. Speaker, due to the fact that I would be one of the veterans personally affected by the bill just passed, I felt compelled under the Rules of the House to withdraw from voting and to be recorded as voting "Present."

POSTAL FIELD SERVICE EMPLOYEES

Mr. REES of Kansas. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 9245) to establish a joint committee of Congress to study postal field service reclassification, to increase the rates of basic compensation of postmasters, officers, and employees in the postal field service pending reclassification pursuant to recommendations of such joint committee, and for other purposes, as amended.

The Clerk read the title of the bill.

The Clerk read the bill, as follows:

Be it enacted, etc.—

TITLE I—POSTAL RATES

First-class mail

SEC. 101. (a) The rates of postage on mail matter of the first class (other than postal cards and private mailing or post cards) shall be as follows:

(1) 4 cents for the first ounce or fraction thereof, and 3 cents for each additional ounce or fraction thereof, when mailed for delivery at any destination other than the office of mailing;

(2) Three cents for each ounce or fraction thereof, when mailed for local delivery at the office of mailing, except as prescribed in paragraph (3) of this subsection; and

(3) Two cents for each ounce or fraction thereof, when mailed for local delivery at post offices where free delivery by carrier is not established and when the matter is not collected or delivered by rural or star route carriers.

(b) In the case of first-class matter mailed without prepayment of any postage or without prepayment of the full amount of postage due, the Postmaster General is authorized to prescribe by regulation the conditions under which such matter shall be delivered to the addressee or returned to the sender. The conditions so prescribed shall be stated in such manner as to permit delivery of such mail to the addressee whenever it is practicable to do so consistent with the collection of the charges prescribed in accordance with subsection (c) of this section.

(c) The Postmaster General is authorized to prescribe by regulation from time to time the charges to be collected on delivery in the case of any matter of the first class mailed without prepayment of any postage or without prepayment of the full amount of postage due. In determining such charges, the Postmaster General shall take into consideration the postage actually due, and, to the extent practicable, the additional expense incurred by reason of the failure to pay the applicable postage and the desirability of minimizing the incidence of such mailings.

(d) Regulations issued by the Postmaster General under subsections (b) and (c) shall, to the extent prescribed therein, supersede existing laws, regulations, and orders governing the subject matter covered thereby.

(e) Section 12 (a) of the act of October 30, 1951 (39 U. S. C. sec. 246f (a)), is amended by inserting before the period at the end thereof a semicolon and the following:

"(9) for returning undeliverable letters and parcels of the first class from the dead-letter office to the senders."

Second-class mail

SEC. 102. (a) Section 2 (a) of the Act of October 30, 1951 (39 U. S. C., sec. 289a), is amended by striking out the word "and" immediately following "April 1, 1953," and by inserting before the colon immediately following "April 1, 1954" a comma and the following: "(4) by an additional 10 percent, based on rates now in force, beginning on April 1, 1955, (5) by an additional 10 percent, based on rates now in force, beginning on April 1, 1956, and (6) by an additional 10 percent, based on rates now in force, beginning on April 1, 1957". The term "rates now in force", as used in the amendments made by this subsection to section 2 (a) of such act of October 30, 1951, means the rates in force immediately prior to April 1, 1952.

(b) The rates increased by subsection (a) of this section shall be subject to a minimum charge of one-fourth of 1 cent computed on each individually addressed copy or package of unaddressed copies.

(c) The rates of postage on copies of publications having second-class entry mailed by others than the publishers or authorized news agents, sample copies mailed by the publishers in excess of the 10 percent allowance entitled to be sent at the pound rates, and copies mailed by the publishers to persons who may not be included in the required legitimate list of subscribers, shall be, in the case of publications weighing 8 ounces or less, the applicable rates now or hereafter prescribed by law on third-class matter, and, in the case of publications weighing in excess of 8 ounces, the applicable rates now or hereafter prescribed or authorized by law on fourth-class matter.

Third-class mail

SEC. 103. (a) The rates of postage on third-class matter shall be 3 cents for the first 2 ounces or fraction thereof, and 1½ cents for each additional ounce or fraction thereof up to and including 8 ounces in weight, except that on matter mailed by religious, educational, scientific, philanthropic, agricultural, labor, veterans', or fraternal organizations or associations, not organized for profit and none of the net income of which inures to the benefit of any private stockholder or individual, the rates shall be as follows:

(1) One and one-half cents for each 2 ounces or fraction thereof on books and catalogs of 24 pages or more, seeds, cuttings, bulbs, roots, scions, and plants not exceeding 8 ounces in weight; and

(2) Two cents for the first 2 ounces or fraction thereof, and one cent for each additional ounce or fraction thereof, on all other third-class matter.

(b) Upon payment of a fee of $50 for each calendar year or of $15 for each quarter of a calendar year and under such regulations as the Postmaster General may prescribe for the collection of postage and for facilitating the handling of such matter in the mails, separately addressed identical pieces of third-class matter in quantities of not less than 20 pounds, or of not less than 200 pieces, may be mailed at pound rates of postage applicable to the entire bulk mailed at one time. The rate of postage on third-class matter mailed in bulk under this subsection shall be 16 cents for each pound or fraction thereof with a minimum charge per piece of 1½ cents, except that in the case of books and catalogs of 24 pages or more, seeds, cuttings, bulbs, roots, scions, and plants the rate shall be 10 cents for each pound or fraction thereof with a minimum charge per piece of 1½ cents. The rate of postage on third-class matter mailed in bulk under this subsection but without individual addresses for delivery under regulations prescribed by the Postmaster General shall be subject to a minimum charge per piece of 2 cents. The rates of postage prescribed by this subsection shall not apply with respect to matter mailed by religious, educational, scientific, philanthropic, agricultural, labor, veterans' or fraternal organizations or associations, not organized for profit and none of the net income of which inures to the benefit of any private stockholder or individual, and the existing rates of postage shall continue to apply with respect to such matter.

(c) Pieces or packages of third-class mail of such size or form as to prevent ready facing and tying in bundles and requiring individual distributing throughout shall be subject to a minimum charge of 5 cents each.

Controlled circulation publications

SEC. 104. The rate of postage on the publications defined in section 203 of the act of July 3, 1948 (39 U. S. C., sec. 291b), when mailed by the publisher and regardless of the weight of individual copies, shall be 11 cents for each pound or fraction thereof, computed on the entire bulk mailed at one time, but not less than 1½ cents per piece, which rate shall remain in effect until otherwise provided by Congress; *Provided*, That the rate of postage on copies of such publications when mailed by other than the publishers, or when forwarded to the addressee or returned to the sender, shall be 3 cents for the first two ounces and 1½ cents for each additional ounce.

Domestic airmail

SEC. 105. The rate of postage on domestic airmail as defined in section 2 of the act of August 14, 1946 (39 U. S. C., sec. 462a), weighing 8 ounces or less (except postal cards and private mailing or post cards) shall be 7 cents for each ounce or fraction thereof.

Determination of class of post office and compensation of postmaster and certain employees

SEC. 106.(a) On and after January 1, 1955, 85 percent of the gross postal receipts of all classes of post offices shall be counted for the purpose of determining the class of the post office or the compensation or allowances of postmasters or other employees whose compensation or allowances are based on the annual receipts of such offices. Nothing contained in this subsection shall operate to decrease the compensation or allowances in effect on the effective date of this subsection for postmasters and other employees in the postal field service on such date whose compensation or allowances are based upon the annual receipts of such offices.

(b) In the case of the post office at Washington, D. C., the Postmaster General may, in his discretion, add to the gross receipts of such office counted for the purposes of subsection (a) of this section not to exceed 75 percent of such gross receipts.

(c) Notwithstanding any other provision of law, the salaries of postmasters at fourth-class post offices, as fixed by law, shall be deemed and taken to be full compensation for the clerical labor in the issuance of money orders at such offices.

Repeal of existing provisions of law

SEC. 107. (a) The following provisions of law are hereby repealed:

(1) Section 202 (a) (4) of the act of February 28, 1925, as amended by section 4 of the act of May 29, 1928 (39 U. S. C., sec. 283);

(2) Section 204 of the act of February 28, 1925 (39 U. S. C., sec. 288);

(3) Section 2 (d) of the act of October 30, 1951 (39 U. S. C., sec. 289a (d)).

(b) All laws or parts of laws inconsistent with this title are hereby repealed or modified to the extent of such inconsistency.

Application to Guam

SEC. 108. This title shall have the same force and effect within Guam as within other possessions of the United States.

Effective dates

SEC. 109. This title shall take effect on January 1, 1955, except that section 102 (a) and (b) shall take effect on April 1, 1955.

TITLE II—POSTAL EMPLOYEES PAY AND CLASSIFICATON

SEC. 201. (a) The rates of basic compensation, other than rates referred to in subsection (b) of this section, of postmasters, officers, and employees in the postal field service whose rates of compensation are prescribed by the act entitled "An act to reclassify the salaries of postmasters, officers, and employees of the Postal Service; to establish uniform procedures for computing compensation; and for other purposes", approved July 6, 1945 (Public Law 134, 79th Cong.), as amended, are hereby increased by 5 percent except that no such rate shall be increased by less than $200 per annum.

(b) (1) That part of the compensation schedule headed "Grades and Salaries of Employees in the Automatic Grades" and contained in section 11A of such act of July 6, 1945 (Public Law 134, 79th Cong.), as amended, which provides hourly rates of compensation, is amended to read as follows:

"*Hourly rates*

"Clerks in post offices of the 3d class; carriers in village delivery service	$1.435	$1.485	$1.54	$1.59	----------	----------	----------	----------	----------

(2) The rates of basic compensation of postmasters at post offices of the fourth class are hereby increased by 5 percent.

(c) This section shall not apply to skilled-trades employees of the mail-equipment shops, job cleaners in first- and second-class post offices, and employees who are paid on a fee or contract basis.

(d) The increases in rates of basic compensation provided by this section shall not apply to longevity salary increases.

SEC. 202. Section 16 (r) of such act of July 6, 1945 (Public Law 134, 79th Cong.), as amended, which relates to travel allowances for employees in the Postal Transportation Service who are assigned to road duty, is amended by striking out "$6 per day" and inserting in lieu thereof "$9 per day."

SEC. 203. Section 3867 of the Revised Statutes is hereby amended to read as follows:

"SEC. 3867. The Postmaster General may prescribe a uniform dress to be worn by city and village delivery letter carriers, special-delivery messengers, motor-vehicle employees, custodial guards, elevator operators, and watchmen. The Postmaster General shall furnish uniforms to each such employee for whom a uniform dress is so prescribed, at a cost not to exceed $100 per annum with respect to each employee, except that, in any case where in his judgment it is in the interest of the postal field service, he may authorize any such employee to purchase uniforms, at such times and at such costs, not to exceed $100 per annum, as he may prescribe and shall reimburse such employee purchasing uniforms pursuant to such authorization for the cost thereof. Uniforms furnished to, or purchased by, an employee under this section shall become the property of such employee."

SEC. 204. So much of section 1310 (a) of the Supplemental Appropriation Act, 1952 (Public Law 253, 82d Cong.), as precedes the first proviso therein shall not apply to the total number of permanent employees in the field and departmental service of the Post Office Department; except that no employee shall be given a permanent appointment by reason of the enactment of this section of this act who has not qualified therefor under normal civil service procedures.

SEC. 205. Any increase in rate of basic compensation by reason of the enactment of this title shall not be considered as an "equivalent increase" in compensation within the meaning of section 701 of the Classification Act of 1949, as amended, in the case of postmasters, officers, and employees in the postal field service who transfer or are transferred to positions within the purview of the Classification Act of 1949, as amended.

SEC. 206. In the exercise of the authority granted by section 81 of title 2 of the Canal Zone Code, as amended, the Governor of the Canal Zone is authorized to grant, as of the effective date of this section, additional compensation to postal employees of the Canal Zone Government, based on the additional

compensation granted by this title to similar employees in the field service of the Post Office Department of the United States.

SEC. 207. This title shall have the same force and effect within Guam as within other possessions of the United States.

SEC. 208. (a) Section 7 of the act entitled "An act to reclassify the salaries of postmasters, officers, and employees of the Postal Service; to establish uniform procedures for computing compensation; and for other purposes", approved July 6, 1945 (Public Law 134, 79th Cong.), as amended, is amended to read as follows:

"Method of payment

"SEC. 7. (a) The compensation of postmasters and per annum rate employees shall be paid in 26 installments. Each such installment shall be the compensation for a pay period of 2 weeks. The compensation of hourly rate substitute employees and other hourly rate employees shall be computed for each pay period of 2 weeks on the basis of the number of hours of work performed by such employees during such pay period.

"(b) To compute an hourly rate for postmasters and per annum rate employees, the per annum rate shall be divided by 2080.

"(c) To compute a daily rate for postmasters and per annum rate employees, the hourly rate shall be multiplied by the number of daily hours of service required.

"(d) Subsections (b) and (c) of this section shall not apply to carriers in the rural delivery service. Whenever, for pay computation purposes, it is necessary to convert the basic annual rate of compensation of carriers in the rural delivery service to a basic daily or biweekly rate, the following rules shall govern:

"(1) An annual rate shall be divided by 312 to derive a daily rate.

"(2) A daily rate shall be multiplied by 12 to derive a biweekly rate.

"(e) All rates shall be computed to the nearest cent, counting one-half cent and over as a whole cent.

"(f) When a pay period for any postmaster or employee begins in one fiscal year and ends in another fiscal year, the gross amount of the earnings of such postmaster or employee for such pay period may be regarded as a charge against the appropriation or allotment current at the end of such pay period."

(b) Section 8 of such act of July 6, 1945, as amended, is amended by adding at the end thereof a new subsection (d) to read as follows:

"(d) The salaries of postmasters, assistant postmasters, and supervisors paid under the provisions of this section shall be readjusted at the beginning of the first complete pay period in each fiscal year."

(c) Section 9 (b) of such act of July 6, 1945, as amended, is amended by adding at the end thereof a new sentence to read as follows: "The salaries of superintendents and assistant superintendents of classified stations shall be readjusted at the beginning of the first complete pay period in each fiscal year."

(d) Section 11A of such act of July 6, 1945, as amended, is amended by striking out "and shall be promoted successively at the beginning of the quarter following 1 year's satisfactory service in each grade to the next higher grade until they reach the top automatic grade" and by inserting in lieu thereof "and shall be promoted successively at the beginning of the first complete pay period following 52 weeks of satisfactory service in each grade to the next higher grade until they reach the top automatic grade."

(e) Section 13 of such act of July 6, 1945, as amended, is amended by adding immediately after subsection (a) thereof a new subsection (b) to read as follows:

"(b) The salaries of employees paid under the provisions of this section shall be readjusted at the beginning of the first complete pay period in each fiscal year."

(f) Section 14 of such act of July 6, 1945, as amended, is amended by adding immediately after subsection (a) thereof a new subsection (b) to read as follows:

"(b) The salaries of employees paid under the provisions of this section shall be readjusted at the beginning of the first complete pay period in each fiscal year."

(g) That part of subsection (1) of section 14 of such act of July 6, 1945, as amended, which precedes the first proviso is amended to read as follows:

"(1) Temporary employees in the custodial service paid on an annual basis shall be paid at the rates of pay of grade 1 of the position in which employed and shall, at the beginning of the first complete pay period following 52 weeks of satisfacory service in each pay status, be advanced successively to the rates of pay of the next higher grade of such position; and temporary employees in the custodial service paid on an hourly basis shall be paid at the rates of pay of grade 1 of the position in which employed and shall, at the beginning of the first complete pay period following 52 weeks of satisfactory service in each pay status, be advanced successively to the rates of pay of the next higher grade of such position:".

(h) Section 15 (b) of such act of July 6, 1945, as amended, is amended by striking out "and shall be promoted successively at the beginning of the quarter following 1 year's satisfactory service in each grade until they reach grade 8", and by inserting in lieu thereof "and shall be promoted successively at the beginning of the first complete pay period following 52 weeks of satisfactory service in each grade until they reach grade 8."

(i) That part of section 18 (f) of such act of July 6, 1945, as amended, which precedes the first proviso is amended to read as follows:

"(f) Each temporary employee in the mail equipment shops paid on an annual basis shall be paid at the rate of pay of the lowest grade provided for a regular employee in the same type of position in which such temporary employee is employed, and shall, at the beginning of the first complete pay period following 52 weeks of satisfactory service in each pay status, be advanced successively to the rates of pay of the next higher grade of such position:".

(j) The first section of the act of April 15, 1947 (Public Law 35, 80th Cong.), as amended, is amended by striking out "shall be promoted successively at the beginning of the quarter following 1 year's satisfactory service in each grade" and by inserting in lieu thereof "shall be promoted successively at the beginning of the first complete pay period following 52 weeks of satisfactory service in each grade."

(k) All laws or parts of laws inconsistent with the amendments made by this section are hereby repealed or modified to the extent necessary to carry out the purposes of and conform to such amendments.

SEC. 209. (a) The Postmaster General is authorized and directed to make a thorough investigation and study of various methods for the classification of positions and the determination of salaries in the postal field service and all matters relating thereto (including personnel and pay benefits and administration), in order to provide a plan (to be submitted by the Postmaster General to, and to be subject to review by, the Congress, in accordance with the provisions of this section and section 10) for the establishment of a uniform, integrated, and equitable classification and pay system for all postmasters, officers, employees, and positions in the postal field service. Such classification and pay plan for the postal field service shall provide a method for determining the rates of basic compensation which postmasters, officers, and employees shall receive under which—

(1) the principle of equal pay for substantially equal work shall be followed; and

(2) variations in rates of basic compensation paid to different postmasters, officers, and employees shall be in proportion to substantial differences in the difficulty, responsibility, and qualification requirements of the work performed and to the contributions of postmasters, officers, and employees to efficiency and economy in the postal field service.

Such plan shall contain compensation schedules which set forth the various grades to which positions in the postal field service are to be allocated and provide the rates of basic compensation, and the ranges of such rates, which are to be applicable to such grades. Such plan also shall contain provisions which—

(A) grant to personnel in the postal field service the right to obtain appropriate review by the Civil Service Commission of all classifications of their positions;

(B) prohibit reductions in the rates of basic compensation of personnel on the rolls on the date such plan (or any part thereof) becomes operative, by reason of the institution and operation of such plan (or any part thereof);

(C) prohibit reductions in rates of basic compensation of any personnel, by reason of any classification actions taken at any time under authority of such plan with respect to the positions occupied by such personnel, so long as such personnel remain in the same positions or are assigned to perform and do perform work of the same level of difficulty, responsibility, and qualification requirements as the work which they were performing in such positions; and

(D) preserve for personnel in the postal field service on the rolls on the date such plan (or any part thereof) becomes operative the increases in rates of basic compensation provided by this act.

Such plan also may contain such provisions and proposals consistent with the purposes of this section as the Postmaster General deems advisable in the light of the needs of the Post Office Department, the best interests of personnel in the postal field service, and the public interest.

(b) In the light of and pursuant to the investigation and study made under subsection (a) and in accordance with the purposes of such subsection, the Postmaster General shall transmit to the Congress, on or before March 15, 1955, a classification and pay plan for the postal field service. Such plan shall be prepared with due regard for the legislative forms and procedures of the Congress and shall be accompanied by an appropriate written explanation of the provisions, objects, purposes, and effects thereof. The delivery of such plan and explanation thereof shall be made to both Houses on the same day.

(c) Except as may be otherwise provided pursuant to subsection (e) of this section, the provisions of such classification and pay plan for the postal field service shall take effect upon the expiration of the first period of 60 calendar days of continuous session of the Congress, following the date on which such plan is transmitted to the Congress; but only if, between the date of transmittal and the expiration of such period of 60 days there has not been passed by either of the two Houses, by affirmative vote of a majority, a quorum being present, a resolution stating in substance that that House does not favor such plan.

(d) For the purposes of subsection (c) of this section—

(1) continuity of session shall be considered as broken only by an adjournment of the Congress sine die; but

(2) in the computation of the 60-day period, there shall be excluded the days on which either House is not in session because of an adjournment of more than 3 days to a day certain.

(e) Any provision of the plan may, under provisions contained in the plan, be made operative at a time later than the date on which the plan shall otherwise take effect.

(f) If such classification and pay plan becomes effective, such plan shall be printed in the Statutes at Large in the same volume as the public laws and shall be printed in the Federal Register.

(g) Any increase in rate of basic compensation by reason of the institution and operation of such classification and pay plan for the postal field service shall not be considered as an "equivalent increase" in compensation within the meaning of section 701 of the Classification Act of 1949, as amended, in the case of postmasters, officers, and employees in the postal field service who transfer or are transferred to positions within the purview of the Classification Act of 1949, as amended.

SEC. 210. (a) This section is enacted by the Congress:

(1) As an exercise of the rule-making power of the Senate and the House of Representatives, respectively, and as such it shall be considered as part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in such House in the case of resolutions (as defined in subsection (b) of this section); and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) With full recognition of the constitutional right of either House to change such rules (so far as relating to the procedure in such House) at any time, in the same manner and to the same extent as in the case of any other rule of such House.

(b) As used in this section and section 9, the term "resolution" means only a resolution of either of the two Houses of Congress, the matter after the resolving clause of which is as follows: "That the ---------- does not favor the postal field service classification and pay plan transmitted to Congress by the Postmaster General.", the blank space therein being filled with the name of the resolving House.

(c) All resolutions with respect to the postal field service classification and pay plan shall be referred, by the President of the Senate or the Speaker of the House of Representatives, only to the Committee on Post Office and Civil Service of the Senate or the Committee on Post Office and Civil Service of the House of Representatives, as the case may be.

(d) If the committee to which has been referred a resolution with respect to such postal field service classification and pay plan has not reported such resolution before the expiration of 10 calendar days after its introduction, it shall then (but not before) be in order to move either to discharge the committee from further consideration of such resolution, or to discharge the committee from further consideration of any other resolution with respect to such postal field service classification and pay plan which has been referred to the committee.

(e) Such motion may be made only by a person favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the plan), and debate thereon shall be limited to not to exceed 1 hour, to be equally divided between those favoring and those opposing the resolution. No amendment to such motion shall be in order, and it shall not be in order to move to reconsider the vote by which such motion is agreed to or disagreed to.

(f) If the motion to discharge is agreed to or disagreed to, such motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the plan.

(g) When the committee has reported, or has been discharged from further consideration of, a resolution with respect to the plan, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. No amendment to such motion shall be in order and it shall not be in order to move to reconsider the vote by which such motion is agreed to or disagreed to.

(h) Debate on the resolution shall be limited to not to exceed 10 hours, which shall be equally divided between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to recomit, the resolution shall be in order, and it shall not be in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

(i) All motions to postpone, made with respect to the discharge from committee, or the consideration of, a resolution with respect to the plan, and all motions to proceed to the consideration of other business, shall be decided without debate.

(j) All appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to the plan shall be decided without debate.

SEC. 211. In the exercise of the authority granted by section 81 of title 2 of the Canal Zone Code, as amended, the Governor of the Canal Zone is authorized to adopt the postal field service classification and pay plan, or any part thereof, made operative pursuant to sections 209 and 210 of this title, as of the date or dates such plan, or any part thereof, becomes operative, for postal employees of the Canal Zone Government. The Postmaster General shall make available to the Governor of the Canal Zone copies of such matter relating to such plan as may be necessary to carry out the purposes of this section, including descriptions of positions and rates of compensation provided for therein.

SEC. 212. (a) The first sentence of the first section of the act entitled "An act to provide uniform longevity promotional grades for the postal field service", approved May 3, 1950 (Public Law 500, 81st Cong.), as amended, is amended by striking "out longevity grades A, B, and C" and inserting in lieu thereof "longevity grades A, B, C, and D."

(b) Subsection (b) of the first section of such act of May 3, 1950, as amended, is amended to read as follows:

"(b) Each such postmaster or employee who is serving in a regular position on the date this amendatory subsection takes effect or who is appointed to such a position at any time thereafter, shall be assigned to longevity grade A at the beginning of the first complete pay period following the completion of 13 years of service, to longevity grade B at the beginning of the first complete pay period following the completion of 17 years of service, to longevity grade C at the beginning of the first complete pay period following the completion of 21 years of service, and to longevity grade D at the beginning of the first complete pay period following the completion of 25 years of service."

(c) Section 2 of such act of May 3, 1950, as amended, is hereby amended (1) by striking out the word "quarter" and inserting in lieu thereof "first complete pay period", and (2) by inserting before the period at the end thereof a comma and the following: "and on and after the effective date of this amendatory provision shall be assigned to longevity grade D at the beginning of the first complete pay period following the completion of 25 years of service."

(d) No employee shall be reduce in compensation by reason of the amendments made by this section.

SEC. 213. This title shall take effect as follows:

(1) Sections 207, 209, 210, and 211 and this section shall take effect on the date of enactment of this act;

(2) Sections 201, 205, and 206 shall take effect on the first day of the first pay period which begins after the date of enactment of this act;

(3) Sections 202, 203, and 204 shall take effect on the first day of the first calendar month following the calendar month in which this act is enacted; and

(4) Sections 208 and 212 shall take effect on the first day of the second calendar month following the calendar month in which this act is enacted.

The SPEAKER. Is a second demanded?

Mr. MURRAY. Mr. Speaker, I demand a second.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. MURRAY. I am not, Mr. Speaker.

The SPEAKER. Is any Member opposed to the bill?

Mr. DAVIS of Georgia. Mr. Speaker, I demand a second.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. DAVIS of Georgia. I am, Mr. Speaker.

Mr. REES of Kansas. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. REES of Kansas. Mr. Speaker, I yield myself 7 minutes.

Mr. Speaker, I would like to clear up 2 or 3 matters that have been brought to the attention of the Members of the House. One of them is that both bills now before you, as one bill, have been well considered by our committee. Complete hearings were held on the legislation you are considering at this time. Reports have been filed with the House and any and all Members have had a chance to read those reports, if they so desired. Let there be no misunderstanding, and let no one say that you did not have any chance to know about this legislation. I make that statement in reply to certain criticisms that have been made heretofore.

Our time is limited, of course, but both of these bills and the material in them have been discussed over and over again by Members of the House. So I shall discuss quite briefly the contents of the proposed legislation.

The bill as amended will provide:

First. A permanent 5-percent increase for all postmasters, officers, and employees in the postal field service with a minimum of $200, except in the case of fourth-class postmasters and hourly rate employees.

Second. A fourth longevity grade for personnel of the postal field service.

Third. A reclassification for all postmasters, officers, and employees in the postal field service by requiring that the Postmaster General submit to Congress by March 15, 1955, a proposal for job evaluation of the positions of postal

field service personnel. This proposal must contain schedules which set forth grades and salaries of postal field service positions, and provisions assuring postal employees (a) of the right to appeal their classification to the Civil Service Commission; (b) that those on the rolls when the plan, or any part thereof, becomes operative will not suffer any loss in salary; and (c) that they will not be downgraded. This plan will take effect unless disapproved within 60 days by a majority of either House of Congress, a quorum being present.

Fourth. An increase in the allowable per diem for employees in the transportation service to $9 per day from the present rate of $6 per day.

Fifth. A uniform allowance of $100 annually for those employees required to wear uniforms.

Sixth. A modification of present law which restricts the number of permanent appointments in the Federal service. This will permit the granting of permanent appointments to a large number of temporary and indefinite employees in the postal field service.

Seventh. A biweekly pay period for personnel of the postal field service.

Total cost of the salary increases is $151,533,000.

I want to say to the Members of the House that this legislation is also a compromise. It is a compromise with respect to either part 1 or part 2 of this measure. There is nothing unusual about that. Speaking about precedent, we did this same thing once before in this Congress, and all we are doing is following that same precedent. After all, does not this House control its own precedents. The question as I see it is whether this legislation is right or wrong. Let us not find excuses on the basis of precedents to determine our votes. Why not vote on the question as to whether the legislation is right?

Incidently, since the matter of bringing bills to the floor has been mentioned, I call your attention to four other bills being considered under suspension. No one has offered a word of criticism with respect to the consideration of any of those bills considered under the same rule.

Under my motion, this legislation is being considered under suspension of the rules. As the Members know, this leaves a limited amount of time to discuss the provisions of this legislation. However, there has been so much controversy and so much discussion of both bills that I feel reasonably sure that the Members are as familiar with the effect of this legislation as they are of any bills that have been before this Congress.

My motion provides for approval under suspension of the rules of the provisions of H. R. 9836, recommended unanimously by our committee, relating to pay and classification of postal employees, combined with a readjustment of postal rates, as reported by our committee in H. R. 6052. I believe that the membership is preponderantly in favor of the objectives of this legislation.

The objectives are, first, to provide a salary increase for postal employees commensurate with the cost of living since their last increase, July 1, 1951, and also to provide a beginning on the reclassification of postal employees' salaries. Such an overhauling of the salary structure of postal field service employees has been urged for many years by various responsible groups who have conducted investigations of this problem. At long last it has received the attention of Congress in legislative form.

We also propose to include an increase in postal rates—one recommended by our committee and justified even without a pay raise. Unless the cost of the salary bill is made up by postal rates, it will increase by $150 million the amount of the postal deficit which must otherwise be made up by taxes. These taxes, of course, are levied upon everyone regardless of the amount they use the postal service. When they are met by raising postal rates, they are at least partly paid by individuals who use the postal service in direct proportion to the use made by the individual or business firm concerned.

The need for reclassification in postal service is admitted by postal employees, as well as by postal employee organizations. It is a necessary step in the personnel program in the Post Office Department. Employee groups have expressed concern that Congress continue control over specific salary rates. In order to satisfy that situation, and in order that those who wish to have another look at a reclassification plan before it becomes effective, this bill provides the reclassification proposal of the Postmaster General will be submitted to the Congress, and such plan cannot go into effect if either the House or the Senate disapproves.

The postal employees salary bill includes many other benefits to postal employees—benefits they have sought for a number of years. It includes a fourth longevity grade for personnel of the postal field service. It includes a uniform allowance of up to $100 a year for postal employees required to wear uniforms. It will permit more permanent appointments in the postal field service. It establishes a biweekly pay period. It increases the per diem allowance of employees in the postal field service from the present $6 per day to $9 per day. I believe if the Members of the House will take a searching look at this bill, they will find it has benefits in it that employees have written them about for many years.

I have done my best to let the employees throughout the country know what we are trying to do for them in this bill. I know once this bill is passed and becomes law and they begin to feel the benefits it provides, they will let you know in no uncertain terms that you have done a very generous act by approving this legislation. I feel sure when the reclassification proposal this bill calls for is presented to the Congress, there will be general agreement that it is fair, just, and should be put into effect. I know that when employee groups are aware of the many saving clauses and the protection of their privileges we have written into this bill, they will realize how well we have acted in their interest.

Under the reclassification program provided by this bill, along with their present salary and the 5-percent increase this bill provides, the employees cannot suffer a salary loss. There can be no downgrading of an individual employee now or in the future. All employees will have the right to appeal their classification to the Civil Service Commission. What more could an employee want? It can be challenged, in my judgment, only by those who do not want to have a fair salary standard—those who do not want to receive equal pay for equal work—those who do not want a properly adjusted scale recognizing higher salaries for increased responsibility.

Now, may I turn to the postal-rate features of this bill?

Right at this point I should like to pay a tribute to Postmaster General Summerfield. Many of the opponents of postal rate increases have pointed to the tremendous savings he has made in operating costs and say that with such a reduction in the postal deficit, rate increases should not be necessary. No greater tribute could be paid, although possibly unwittingly, to a man who has given unstintingly and without regard to personal sacrifice of his time and effort, both in the field of postal employees classifications and postal rates.

Mr. Summerfield has, through his own individual efforts and those of the staff he has selected around him and with the cooperation of our committee, brought about economies, and reduced the postal deficit of the Truman administration of $700 million down to $400 million this last year.

The postal deficit is the responsibility of all of us. We cannot expect one man to solve all of it. The Postmaster General has brought about a sharp reduction in the deficit through introduction of good business methods and economies. Our committee has also helped by insisting that departments pay the cost of handling their mail and by insisting that the airmail subsidy be paid by the department charged with the supervision of the airlines.

But there is a limit to the effect economies can have on the postal deficit. A few people have done their share. The responsibility now for increasing postal rates to absorb the cost of the postal salary increase, as well as a small part of the remaining deficit, rests with the 435 Members of this House. I hope they will assume that responsibility and vote favorably for this bill.

To continue with respect to postal rates:

FIRST-CLASS MAIL

The bill as reported increases from 3 cents to 4 cents the rate on the first ounce of first-class letter mail for delivery outside the office of mailing. Only drop-letter mail makes a profit. No change is made on rate on drop-letter mail. It remains at 3 cents.

AIRMAIL

The rate on domestic airmail is increased from 6 cents to 7 cents an ounce.

SECOND-CLASS MAIL

First. In addition to the 10-percent increase due April 1, 1954, under existing

law, this bill will increase the rates on second-class mail in 3 increments of 10 percent, effective April 1, 1955, April 1, 1956, and April 1, 1957. These increases are based on the rates in effect prior to Public Law 233, 82d Congress, and are applied on the portion of publications for delivery outside of the county of publication. The increases do not affect publications of nonprofit religious, educational, scientific, philanthropic, agricultural, labor, veterans', or fraternal organizations or associations.

Second. The publication, or portions thereof, delivered outside the county of publication on which rates are increased as explained in paragraph (1) above, will be subject to a minimum charge of one-fourth cent per copy, compared to the present charge of one-eighth cent. The one-eighth cent minimum remains the same as at present for publications of the nonprofit associations or organizations listed above.

Third. The present transient second-class mail is eliminated and in the future these mailings will be carried at the third-class rate for those publications of 8 ounces or less and at fourth-class rate for those publications weighing over 8 ounces.

THIRD-CLASS MAIL

First. The rate for individual pieces of third-class mail is increased from 2 cents for the first 2 ounces, plus 1 cent for each additional ounce—or, in some cases, 1½ cents for each 2 ounces—to 3 cents for the first 2 ounces, plus 1½ cents for each additional ounce or fraction thereof.

Second. The rate on third-class matter mailed in bulk is increased from 14 cents per pound and 1½ cents minimum per piece to 16 cents per pound and 1½ cents minimum per piece.

Third. The fee for a permit to send third-class mail under the bulk mailing rate is increased from $10 a year to $50 a year, with the privilege of purchasing a 3-month permit at $15.

Fourth. Odd-sized pieces of third-class mail will be subject to a minimum charge of 5 cents, representing an increase of 2 cents per piece.

Fifth. The minimum charge on third-class matter mailed at bulk rates without individual addresses, for delivery under regulations prescribed by the Postmaster General, will be 2 cents per piece.

Sixth. No increases will be made in bulk rates on third-class mailings of books and catalogs of 24 pages or more, seeds, cuttings, bulbs, roots, scions, and plants not exceeding 8 ounces in weight, or on mailings of nonprofit religious, educational, scientific, philanthropic, agricultural, veterans', or fraternal organizations or associations.

CONTROLLED-CIRCULATION PUBLICATIONS

Controlled - circulation publications will be subject to a rate of 11 cents per pound, with a minimum charge of 1½ cents per piece.

BOOKS

The committee struck from the bill the provision which would have increased postage on books by $4 million, or approximately 25 percent.

INCREASED REVENUE

Following is the estimated total increase in postal rates when all the rates are in effect:

Estimate of revenues from each section of H. R. 6052 (as reported)

[Based on 1953 volume and assuming no loss in volume due to higher rates]

Section	
1. 1st-class mail (1st ounce of nonlocal)	$159,000,000
2. Domestic airmail	15,600,000
3. 2d-class mail (publishers' 2d class)	13,500,000
Transient 2d-class at 3d- and 4th-class rates	900,000
4. 3d-class mail:	
Increase in piece rates	29,000,000
Increase in pound rates 14 to 16 cents	3,200,000
Bulk fee $10 to $50 year or $15 quarter	8,000,000
Pieces of odd size or form	1,000,000
2-cent minimum on unaddressed 3d class	3,000,000
Total	44,200,000
5. Controlled-circulation publication (up to 8 ounces)	80,000
Total increase	233,280,000

The major postal rate increase in this bill is first-class mail. First-class mail has not been increased since the depths of the depression in 1932 when a Democratic Congress raised the 2-cent rate to 3 cents and it should be noted that first-class mail was more than paying its way then. Since that time costs have nearly tripled in the postal service. We have rolled up a collective deficit in the postal service of nearly $4 billion. Meanwhile, we have placed substantial increases on other classes of mail.

I have heard it said that this increase for first-class mail is another tax which places the cost of this class of mail on individuals to pay for the other classes of mail. It tells you categorically, that a piece of first-class mail sent outside the office of mailing costs more than 3 cents to handle. This first-class mail, sent nonlocal, will be carried at a substantial loss if we approve a postal employee pay bill without approving an increase in first-class mail.

May I point out further that the salary increase in this bill will go into effect 5 to 6 months in advance of the increase in the first-class rate which this bill schedules as January 1 of next year.

This bill provides a second series of three 10-percent increases for second-class mail following a similar series of 10-percent increases authorized by the last postal rate increase bill. Even with this increase, second-class mail will still be carried at a substantial loss.

With respect to the advertising matter that is sent by third-class mail, in the last postal increase we increased the minimum rate per piece by 33⅓ percent. We are not increasing that particular rate by this bill but we did increase the rate on mailing which do not have a specific address. We recommended that rate be increased to 2 cents per piece as compared to the present rate of 1½ cents per piece.

Fourth-class mail does not appear in this bill. The reason is that the rates are required to be set by present law by a procedure between the Postmaster General and the Interstate Commerce Commission at rates which will return sufficient revenue to pay the cost of handling. Under this procedure, fourth-class mail has had a tremendous increase in rates as compared to other classes of mail. In fact, no other single class of mail has experienced as great an increase as fourth-class mail.

May I summarize the provisions of these two bills, while at the same time, I urge you to listen to this summary to evaluate it and I am sure you will come to the same opinion as our committee, the leadership, and of the President. I know you will find that this is the only solution to the problem involving the financial structure of our entire Government and, at the same time, providing a desirable cost of living increase to postal employees.

Before completing my statement, I want to pay tribute to each and every member of our committee who worked on the problems of postal employee pay and classification and the problems of postal rates. In my judgment, no committee in this Congress, or in any other Congress, has worked harder or longer in an attempt to bring to the floor a bill which would receive a vote of confidence from the membership.

Mr. CORBETT. Mr. Speaker, a point of order or parliamentary inquiry, whichever is proper.

The SPEAKER. The gentleman will state it.

Mr. CORBETT. Mr. Speaker, I find that the bill which is presently before us, H. R. 9245, has the title and the enacting clause of the bill which I introduced and which was passed out of the committee.

I also find that it deals not merely with postal salaries but contains an entirely different title on postal rates, which action was never taken by the House committee. I do not believe that this bill can properly be before the House; certainly not with my name on it.

Mr. REES of Kansas. Mr. Speaker, the legislation that is before us is an amended bill, that is true. But all the legislation that we are considering was considered by the committee and reported favorably by our committee.

The SPEAKER. The business before the House is a motion of the gentleman from Kansas [Mr. REES].

Mr. CORBETT. Mr. Speaker, the bill was never reported from the committee as amended and I was not even notified that my name would be on the legislation.

The SPEAKER. The Chair knows nothing about that. That is of no concern to him except as an individual Member of the House.

The gentleman from Kansas [Mr. REES] has made a motion to suspend the rules and to pass the bill with an amendment. That is what the House is considering.

Mr. DAVIS of Georgia. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, in the short time that we have, this bill, of course, cannot be properly debated. There are some facts which I wish to bring to the attention of

the membership regarding these postal rates. It is true that we have a deficit in the Post Office Department. But if you look at it from the deficit standpoint, we have a deficit in all the other departments of our Government.

The deficit in the Post Office Department for 1954 was estimated at $437 million.

I should like to state where these deficits exist.

In second-class mail the estimated deficit is $232 million. Does this bill propose to change the rates on second-class mail sufficient to take care of the deficit? It does not. It would provide an increase on second-class mail not of $232 million which is said to be the deficit, but of $14,400,000, leaving still a deficit on second-class mail of over $200 million.

The third-class deficit is said to be $153 million. This bill would increase the third-class revenues only $44,200,000, leaving a deficit there of $109 million.

In first-class mail there is no deficit whatever. First-class mail now pays a profit. It pays its own way and pays a profit of $105 million. This bill proposes to add 1 cent to the postal rate on nonlocal first-class letter mail running up the rate on nonlocal first-class mail for the first ounce from 3 cents to 4 cents. That will provide an additional profit of $159 million on first-class mail, which already pays a profit of $105 million. The effect of this bill is simply to transfer the deficit in second- and third-class mail to the users of first-class mail, which is not equitable, which is not fair, and which I do not think we, as Members of Congress, ought to enact into law.

I think the post-office organization is a service organization. It has been considered so throughout the years. There is not another department of our Government which is called upon to finance its own operations. That is not done in Health, Education, and Welfare; that is not done in Labor; that is not done in Agriculture or any of the departments. The Post Office Department is a service department, and I think should be so treated.

If we are going to undertake to put it on a paying basis and make it pay for its operations, then I do not think it is fair and just to saddle the entire cost, or practically the entire cost, upon the users of one class of mail.

Whatever may be said about tying the two bills together, the real purpose of tying them together is to make the pay raises of postal employees contingent upon the passage of this rate bill. No other bills have been tied together in this way. I think the pay bill is entitled to come to the floor on its own merits.

It has been said here today that if we vote down the suspension, then we will have killed the chance of the postal employees to get a pay raise. If that is the case, then the responsibility for that will rest upon the leadership and it will not rest upon us who are opposing this motion. This pay bill can be brought up either on a rule or under a motion to suspend the rules, and it will pass overwhelmingly by either method.

Mr. Speaker, I urge that the motion be voted down.

The SPEAKER. The time of the gentleman from Georgia has expired.

Mr. DAVIS of Georgia. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. HAGEN].

Mr. HAGEN of Minnesota. Mr. Speaker, first of all, I want to say it is difficult to oppose the leadership of any issue or legislation. However, I believe I am right and that it is my obligation as a Republican to speak out on this matter.

In the few minutes that I have there will be little opportunity to discuss the provisions of the two bills. The postal pay bill—H. R. 9836—provides a small pay increase for postal employees and they are happy to accept and to receive it, although it is long overdue and it is not sufficient. But they do not approve or like this procedure.

In a letter to me today, E. C. Hallbeck, legislative representative of the National Federation of Post Office Clerks, wrote me as follows:

> We believe it is unfair to bring those questions before the House in a single package and consider it a subterfuge to defeat adequate postal salary legislation at this session of Congress.

In a telephone conversation with Jerome Keating, executive vice president of the National Association of Letter Carriers, he stated:

> The postal organizations have always opposed coupling postage rate increases with postal pay.

However, the postal rate bill is not acceptable in my opinion. Postage rate increases at this time would upset our economy, now back on the road to a stable prosperity. It is completely discriminatory and I would suggest, if time were available, many pertinent questions.

There are a lot of discriminations and bad features in this postal-rate bill and it certainly should be discussed fully and freely before it is voted on. Many of you will be voting for this so-called package bill because you like the postal-pay part of it. However, you are now pressured into accepting the postal-rate-increase bill along with it.

It has been reported to us that this is the only way that this postal-pay bill can come up in the House for a vote. Why is this so? There are many other ways in which this postal-pay bill can be brought up. I, for one, do not like a whip or club over my head with the threat that if we do not approve of this motion there will be no postal-pay legislation, even though 90 percent or more of this House favor a postal-pay bill.

It might be said by some that it is a lack of leadership to admit there is no other way to bring up a postal-pay bill which would pass on its own merits by a vote of 20 to 1 or more. Some even would say it leans toward a dictatorship policy. I cannot agree to these statements. I have every confidence in our House leader, CHARLIE HALLECK, one of the strongest, aggressive, and able leaders in the history of this House. I am sure he can, if he wants to, give the Members of the House an opportunity to vote on a postal workers' pay-increase bill. I am sure he himself will see to it that the House membership can vote on such a bill and a great majority of Republicans will support him.

Yet why are these two bills brought up this way? I would like to know the answers.

The postal-rate bill has been resting in the Rules Committee since early this year. Are those who are anxious to get a postal-rate bill approved afraid that their measure will not pass on its own merits?

I ask, is this going to be a new technique for legislating?—that is, to couple up a popular bill with one which is not popular? Is it going to be a policy, henceforth, to handle any pay adjustment or pay increase for postal workers only when rate-increase bills are considered? This is the first time, to my knowledge, that a pay bill and a rate bill have been combined on the floor of the House.

There have been 31 postal-pay bills of some kind or another since 1920. None were vetoed by the President. In 1943 our Post Office Committee reported a combined pay raise and postal-pay increase measure.

At any rate, there are other ways in which this bill or any bill can be brought up if the leadership so desires.

First, there is a policy or rule whereby the chairman of the Rules Committee can put it on his agenda and ask for consideration.

Secondly, my discharge petition No. 9 can be signed, and perhaps it will be later today. By adding six additional names, it will assure consideration of the Corbett pay bill, H. R. 9245, later on this session, if we are here long enough.

Thirdly, the postal bill can be brought up on a suspension of the rules, if the leadership so desires.

Fourthly, the Senate can and probably will add a postal-pay bill to some bill already passed by the House.

Now, we have just voted here for a 5-percent increase in veterans pensions. Our committee has reported out and this House will no doubt approve a 5-percent pay increase for Federal employees and workers. The leadership apparently feels that the money is available for these two bills.

Furthermore, this House just yesterday deducted and saved from so-called administration supplemental budget requests a total of more than $765 million. In other words, the administration believes that they had $765 million more that could be spent, than that which was voted by this House. Cannot $150 million of that be used to pay this postal pay increase bill without some arbitrary rule or policy which insists on a postal rate bill to pay for the postal pay increase?

Here is another picture of the situation.

We were asked to support a revised version of the veterans pension increase bill with a 5-percent increase. I gladly voted for it.

This administration, according to all reports, endorses a 5-percent pay increase for all Federal workers. I supported it in our committee.

So now will the postal workers be told? No; we will give everyone 5 percent or

more, but you cannot have anything at all.

Now the statement has been made, or will be made, perhaps, that the responsibility lies with the opposition to this motion in case there is not a postal pay bill approved. The only ones you could convince of that false charge would be morons or one who does not know that 2 and 2 makes 4. Anyone knows that the postal pay bill can be brought up in this House at any time if the leadership so desires.

This method of legislating is certainly a bad policy, and I would believe that every chairman of this House would be unhappy and would join me in this fight if the two major bills of this committee were suddenly brought up under a suspension of the rules with little or no opportunity for discussion of the merits or demerits of the legislation.

Our Post Office and Civil Service Committee had 14 days of hearings on the postal rate bill and also 10 executive sessions. We spent 24 days of hearings on the postal pay bill and held 7 executive sessions.

Therefore, the number of days of hearings on postal rate and postal pay bills totaled 55 days.

This legislation is now going to be disposed of in 40 minutes.

Now as to the postal employees, as bad as they need a pay raise, they do not want to be a party to setting a new policy in putting a yoke around their necks which would deny them in the future any salary adjustments until postal rate increases were voted.

I would like to ask this question? Will the Postmaster General come up here next winter with a program of increasing postal rates to pay for the increased cost of his new reclassification program which would liberally increase the pay of postal employees in the higher brackets?

It was reported here today, contrary to previous statements, that the Post Office Department now wants a postal rate increase tied in with a postal pay bill. However, this new policy is apparently only directed to the House since I understand that the Senate is not, and will not, tie a postal rate bill to a postal pay bill.

Yes, I say this is no way to legislate. Each of these bills should have a minimum of 4 hours of discussion, consideration, and debate. Here should be available the printed hearings on both bills—four volumes with hundreds of pages of testimony. You won't even have time to read the reports on these bills, and there is an excellent majority and minority report on the postal rate bill. The postal pay bill was approved unanimously by our committee.

It is my prediction that this motion will fail, and it should.

I might say that the postal pay bill is quite acceptable. It is of course a compromise and no one is too happy about it. But at least, it is a small increase for the postal workers and it should be and will be approved by a big vote if the House is given an opportunity to vote on it.

It may be reported here that some of the magazines and newspapers of the country get a subsidy on their second-class mailing charges. This is not at all true. The so-called subsidy is one to the people of the country—the subscribers to the magazines and newspapers. It is they who get the benefit of the low rates—it is the American people. Supporting my statement on this is the National Education Association which in its report to the Senate study committee on postal affairs stated as follows:

> Benefits derived from the use of the mail consist primarily in benefits to the consumer or recipient of the mail rather than to the producer.

If postal rates are increased, subscription rates will be increased and most of the increases will go to the small weeklies, small dailies, small magazines, farm publications, etc. It won't be so harmful to the big magazines and newspapers which use their own distribution system and the newsstands, and do not use the mails to the extent or degree as the smaller magazines and the smaller newspapers do.

Finally, my appeal is that we decide here today that henceforth we legislate in a proper and normal manner on these important bills. Our House leadership will lose this fight and I will be unhappy about it even though I will be on the winning side. It is so unnecessary to do things this way when the right way would be better.

The membership of this House can hardly say that they know what they will vote for in this postal rate bill. There will be no opportunity to debate or discuss it.

This motion should be defeated. I shall vote against it.

Mr. REES of Kansas. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, I have said upon several occasions that I am deeply concerned about the deficit of this Government. We owe $275 billion and we are continuing to increase that deficit. That means inflation, and inflation means millionaires become billionaires, and in the end the poor man pays the bill. This House is determined to raise the salaries of postal employees. The Post Office Committee has conducted extensive hearings and they say that the employees are entitled to a 5-percent increase. So far as I am concerned, if I had my way, every time we appropriate money, I would provide for the money not only with reference to postal employees, but I would do it in the case of veterans and everyone else because I think the time has come when the people of this country ought to understand when money is spent, it has to be raised by taxes. The practice of adopting and pursuing the dishonest and destructive policy of passing on the deficit to our children and to their children means that in the end democracy will be destroyed in the United States. Since 1945, we have accumulated a deficit of $4 billion in the operation of the postal system—a complete monopoly—and yet the Government cannot operate it and break even. And the interest on that deficit since 1945 is $100 million annually. Therefore, I am going to vote for this legislation because it does couple the two together, and recognizes an important principle, and if I had my chance I would vote tomorrow either to cut all appropriations or to raise taxes to balance the budget because I say to you that the greatest danger which confronts this Nation is the growing deficit of our Government. You are literally destroying the middle-class people. The organized groups can come in here and get increases every year or two because they have the votes. But what about the people who put their money in Government bonds? They have already lost 50 percent in purchasing power. Does anyone propose to make good that loss? Does anyone propose to take care of the unorganized fixed-income groups of this country who day by day are suffering losses from inflation? No; they are not organized. They do not send representatives to Washington to buttonhole Members. They do not flood Congress with telegrams and letters. They are unable to exert organized pressure. Consequently they are the forgotten people.

I am supporting this legislation because the principle of coupling the method of raising the money with the pay increase is right and sound. If we are going to raise postal salaries, we ought to have the courage and the honesty to provide some means to pay for the increase. It is dishonest and dangerous to borrow the money to pay the increase. There is no reason that the postal system should not earn enough money to pay its way and provide for necessary increases in salaries and other costs. I do not like the way this bill seeks to raise the additional revenue. I am convinced that if Congress would stop the abuse of the franking privilege now enjoyed by the various branches of Government, we could reduce materially the cost of operating the Post Office Department. Every branch of our Government is flooding the mails with franked matter, much of which finds its way into wastebaskets and incinerators. I believe that there is more justification for increasing second- and third-class mail than there is to increase the rates on first-class mail, because the record shows that first-class mail is paying its way and, in most instances, showing a profit. You know why this is not done. The second- and third-class mail is protected by a strong lobby. However, Mr. Speaker, I had rather vote for the rate increase provided in this bill than to authorize the salary increase without providing any way of paying for it.

The SPEAKER. The time of the gentelman from Texas has expired.

Mr. DAVIS of Georgia. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. Moss].

Mr. MOSS. Mr. Speaker, I want to compliment my very eloquent colleague from Texas [Mr. DIES] for being concerned with those who are not organized in their appearance before Congress. I refer to the people who use first-class mail, the only group of mail users who were not represented before our committee, a group which today pays a profit of $105 million. Yet it is proposed by this legislation to saddle them with an

additional burden of $159 million, because they do not have the voice or the representatives to come here and lay their case before the Congress.

You say there is a deficit in the Post Office Department. Certainly there is, a deficit for which the Congress itself is responsible; a deficit arising because the Congress has chosen, over the years, to create subsidized classes of mail. There have been subsidies since 1945 of $3,800,000,000, subsidies which make aid to agriculture insignificant. Yet it is proposed today to continue that subsidy and to say to the postal workers that because of our policy you are going to suffer the consequences for any failure of this House to live up to its responsibility.

If we want to deal with the question of the deficit in the postal establishment, let us then proceed in an orderly fashion. Let the Department recommend the amount of that deficit which is properly chargeable to public service. After that determination has been made, then let us require each and every class of mail to pay its own way. Then we can say to the employees that we must have an efficiently operated department. We must make a profit. But today that is not their responsibility. It is ours. We considered this bill on postal rates and reported it to the Rules Committee on the 25th of February, under great pressure. Why was it not acted upon? Perhaps it is because the majority does not want to acknowledge to the people that they are asking for something which is eminently unfair. They moved the effective date from before the fall elections up to the first of the year so they would not have to explain to the people before the election why they increased the rate on the first-class mail. They were not proud of what they had done. There was no reason why it could not have been brought to the floor in an orderly fashion, brought to the floor with time for debate and opportunity to offer amendments. But no. It remained in the Rules Committee for some 5 months. Then, after great consideration of the salary increase legislation, a compromise was worked out—a compromise where the proponents of an increase gave in on every single point, and at no point did the administration give one iota. We would not have made that compromise if we were told that the bill would be considered on this floor under suspension of the rules, with a gag upon Members and a gag upon the House to work its will. I think it is a reprehensible manner of handling legislation to which the House Post Office and Civil Service Committee has given such diligent attention. I personally have been in attendance at very single session of that committee. I have tried to act responsibly, but I cannot say that you are acting responsibly today. When you are considering a rate increase of $233 million and a salary increase of $122 million, you are not acting responsibly when you act in 40 minutes.

The SPEAKER. The time of the gentleman from California has expired.

Mr. REES of Kansas. Mr. Speaker, I yield 2 minutes to the gentlewoman from New York [Mrs. ST. GEORGE].

Mrs. ST. GEORGE. Mr. Speaker, I think it is quite abundantly clear that there is a great difference of opinion in the committee on both sides of the aisle; in other words, this is not a partisan matter, it is a matter of theory; it is a matter of whether the Post Office Department has got to run on bigger and bigger deficits—the last one it checked up was $700 million—or if this legislation takes effect it will not only give a very necessary raise to the postal employees, but the Post Office Department may get by with a $300 million deficit. I say that, to those who seem to feel that the Post Office Department should be more or less of a charitable or eleemosynary institution—that is a $64 word, by the way. I would like to point out to the House at this time that this is the only country in the world where the Post Office does not pay its way. Canada, our neighbor to the north, has recently raised first-class rates. There has been no trouble about it at all, yet before they raised those rates they were already showing a profit every year. England does the same, so does Belgium, so does France, so does every other member of the International Postal Union. We are the only ones who have gone on this opposite theory.

Of course we know that the postal employees deserve and need a raise, and we want to see them get it. For that reason I certainly hope that at this time the House, regardless of some of their feelings about the postal rates will pass this bill.

I, too, am one of those who would far prefer second- and third-class mail to be made to pay their way. They certainly are not doing it. Great newspaper empires and great magazine empires have been built up on the second- and third-class rates charged and maintained by law in our Post Office Department.

Mr. DAVIS of Georgia. Mr. Speaker, I yield 1 minute to the gentleman from Louisiana [Mr. MORRISON].

Mr. MORRISON. Mr. Speaker, as a member of this committee, I am sure that in urging you to vote down this suspension of the rules it will be the best thing as far as the postal workers themselves are concerned and as far as the taxpayers of this country are concerned. I have supported all pay increases for postal employees for the many years I have been on this committee. This present attempted consolidation of both bills has caused confusion even among the members of the committee. As the distinguished gentleman from California said, the postal rate increase bill could have been brought up here and acted on or amended at any time since last February, but that has not been done. Why, then, lump the two together when even the committee is not in agreement and is split wide open? You cannot get what you are driving at in the way of postal pay raises to which the employees are entitled by such method as you are voting on today. Vote this down and you will get the postal workers the pay raise that they want and that they are entitled to.

Mr. REES of Kansas. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. CORBETT].

Mr. CORBETT. Mr. Speaker, I took this time because I wanted to make it abundantly clear to the Members of this House, and certainly to the 212 who have signed the discharge petition on H. R. 9245, that the bill presently before us under the number H. R. 9245 is not that bill.

This present procedure, I am sure, is parliamentarily in order, but I must point out that when all of the features of this bill are added to the salary features they are very decidedly changed.

Very frankly, I was flabbergasted to find my name and the number of my bill on this particular compromise. However, having said that, I do believe that the most expeditious procedure that we can use to get this necessary legislation moving on toward final enactment is to send this particular bill over to the Senate. I am afraid we have been operating too much on the theory that this is a single House legislature. The Senate can and I think will make the proper corrections.

I was party to an agreement trying to get the best salary legislation that we possibly could get with some assurance of passage and because of that and despite this rather unusual procedure, I feel compelled to vote in the affirmative.

Mr. DAVIS of Georgia. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. RHODES].

Mr. RHODES of Pennsylvania. Mr. Speaker, it is unfortunate and most unfair that a motion of this kind is made to rush through two very important bills with no opportunity for amendments or ample discussion and debate.

I have sponsored and supported pay-increase legislation for postal employees. Federal salaries are lagging behind the cost of living, and there is a dire need, particularly among the lower income groups, for more adequate income to meet their everyday needs. I believe there is justification for increasing postage rates, and I believe that reclassification is necessary in the postal service. But I am opposed to the unfair procedure to force through the Congress this bill, which includes provisions over which there has been sharp controversy and a wide difference of opinion.

It is quite apparent to me that the chief objective is to give the Postmaster General the excessive power he seeks and to increase postage rates in such classifications which would put an additional burden on those who now pay more than their proportionate share. I am frightened at some of the things that have been happening in the past 2 years. It makes me wonder how far we can go in yielding to the pressure of the executive department without grave consequences to follow.

This is not a partisan matter. Some of the victims of unfair pressure, abuse, and even smear were prominent and outstanding members of our committee on the other side of the aisle.

The pressure of the Department for this legislation has created tremendous discord and dissension in the postal service. The test of loyalty, and whether or

not jobs are secure, depends, not on service that is performed but whether employees conform and "heil" the man at the top. It matters not whether one be a Republican or a Democrat, so long as he is willing to accept without question the philosophy of the man on top.

This reclassification attempt, in my mind, is nothing more than a clever gimmick to give excessive power to a man who believes he has all the answers. The provision on reclassification is a modified version of the first reclassification bill proposed. The other was much worse, but it reflects the thinking behind this legislation.

The Post Office Department propagandists have said for the past 2 years that rates should be adjusted so that those who use the service will pay for a greater share of the cost.

What the rate provision in this bill does is to put a heavier burden on those who already pay more than their proportionate share of the postal service.

I have personally favored adequate salaries for Federal employees. Never have I been influenced by those who see national bankruptcy and disaster whenever a proposal is made to lift the level of living for the average citizen. Nothing justifies the increase in living standards for postal and Federal employees, and for the average American citizen at this time, more than the tremendous surpluses, not only of food but of other essentials of life which fill the Nation's warehouses.

If this motion is defeated as I hope it will be, and it is the will of the majority and of the administration to grant a modest increase for postal and Federal employees, then it can and will be done. It is the responsibility of the administration. Even though I wholeheartedly favor pay increase legislation, I feel I would be unfaithful to my trust to postal employees, and to other Federal workers, and to my own conscience if I voted for this package which contains so much evil. Postal workers need and want a pay increase, but they don't want it if they must yield to the lash and sacrifice self respect and dignity. They know that under such conditions all that is gained and more will be lost. I hope the motion will be defeated and that a proper rebuke be given to those who want to make Congress a rubberstamp and to force conformity, regardless of its consequences.

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent that all Members may have permission to extend their remarks at this point in the RECORD on the bill under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. WITHROW. Mr. Speaker, inasmuch as Congress is planning to adjourn August 1 or shortly thereafter, it must be apparent to all that the only realistic approach to the question of giving relief to the postal employees and to other Federal classified employees is to pass the compromise measure under consideration at this time.

The lodestone under which the Civil Service System is now laboring is a wage scale that keeps employees living on a marginal basis year in and year out. Unless and until the Congress gets squarely behind specific legislation to increase all Federal salaries any statement about strengthening the civil service system is nothing more than another meaningless promise. It is my belief that a majority of the Members of Congress are in favor of such an adjustment. Thinking varies, however, as to the amount and application.

During the present hearings on this legislation, 32 Congressmen have appeared before the committee in support of pay legislation, and 112 have filed statements in favor of the legislation. This is the largest number that have actually participated in any hearings I can remember of, and indeed, is symbolic of the terrific interest and the necessity for this type of salary relief.

There are some who argue that as long as the Post Office budget shows a deficit, we should be very cautious in raising postal salaries. In their minds there is a direct relationship between postal salaries and the postal deficit, when, as a matter of fact, there should be no relationship. If there was we would apply that same process of reasoning to all the other departments of our Government, namely, the Justice Department, the Interior Department, the Agriculture Department, the Department of State, etc.

It would be well to go back just prior to the last wage increase, as of July 1, 1951. Former Congressman Ramspeck, who at that time was Chairman of the Civil Service Commission, when testifying on the pay-increase legislation at that time, testified as follows:

> From August 1939 to March 1951 the consumers' price index advanced from 98.6 to 184.5, an increase of 87.1 percent. To attempt to meet this rise by a corresponding rise in scheduled rates would require a current average pay increase of about 21 percent.

Commissioner Ramspeck was referring to classified Federal employees. However, during the same hearing Postmaster General Donaldson testified as follows:

> It would take a 20 percent increase in salary for postal employees to catch up with the cost of living.

So you can readily see that Federal and postal employees were in the same boat with the same rate of salary lag prior to the pay increase of July 1, 1951.

The pay increase as of July 1951 amounted to approximately 12 percent. It, therefore, must be obvious to anyone with an open mind that at the time the last pay increase was granted postal employees and Government employees alike were at least 9 percent behind the cost of living index. Since 1951, according to the Bureau of Labor Statistics, there has been a 4 percent increase in the cost of living. In addition to that, we must take into consideration the question of productivity. For the 5-year period from 1947 to 1952 the Post Office Department handled an increase in volume of 33 percent in the number of pieces and 29 percent in weight with an increase in personnel of only 9 percent. These figures are from the annual report of the Postmaster General. On page 276 of the Treasury-Post Office Department appropriation for 1955, the Department proposes to handle an increase of 3.14 percent in mail volume with a 1.4 percent reduction in manpower. Certainly postal employees are entitled to a 6 or 7 percent increase on the basis of this spectacular production record. Other governmental employees have likewise made comparable productivity records.

I believe the Federal employees, in common with our citizens generally, are entitled to the improvements in their own increased efficiency and productivity. This has been continually reflected in increased man-hour output. It is proper that this productivity be rewarded in public employment as it is in private employment. The average employee will need a salary increase of $800 to bring him anywhere near the purchasing power of his salary in 1939. Certainly the measure under consideration is far below that amount.

In addition, the Bureau of Labor Statistics cost-of-living index ignores one particular item which is of great importance to classified and postal employees. That is the fact that in 1939 the average Federal employee with a family of five paid no income tax. In 1953 that same employee paid a Federal income tax of approximately $385.

It seems rather obvious that today's wage scale is not geared to today's high cost of living and is wholly unrealistic. Such a wage scale adversely affects the morale of this loyal group of employees and in the long run increases the costs of operating the Departments.

May I quote one brief passage from the President's Economic Report, delivered to the Congress on January 28, 1954:

> Our economic goal is an increasing national income, shared equitably among those who contribute to its growth and realized in dollars of stable buying power.

A recent study of the McGraw-Hill department of economics makes a contrast in prosperity in nations of the free world. One of the conclusions reached is that—

> The real income of the average American has almost doubled since 1939.

This surely does not pertain to Federal classified employees and postal workers.

The tragic results of a substandard wage is probably best illustrated by the poll that was taken by the letter carriers president, William Doherty, of the members. The number of carriers polled was 73,000 plus. Number of answers received was 80 percent or more than 59,000 of those polled. The number of carriers doing part-time work, in addition to regular postal duties, was 26,000 plus or 45 percent. Number of carriers whose wives are working was 22,000 plus or 38 percent of those answering the poll. Number whose debts increased since last pay increase of July 1, 1951, was 41,000 plus or more than 70 percent of those answering polls. The average debt of those polled was $842 plus and this is exclusive of home mortgages.

It is indeed shocking that 81.7 percent of those answering these surveys were forced to report loans on their insurance,

from credit unions, banks, and other tangible assets. This is the tragic picture. In addition to that, and in considering this tabulation, you must take into consideration the fact that these people are not businessmen and when they borrow on their insurance it is more for business reasons. That makes the tabulation all the more shocking.

As to fringe benefits: Employees in industry, in most cases, have pension systems to which they make no direct contribution. That is not true of the civil service employee. They contribute 6 percent of their gross earnings to the retirement fund. In addition to the above, civil service employees have no unemployment insurance.

The cost of the compromise postal pay bill, including committee amendments, amounts to approximately $151 million. This is a considerable sum of money, but when we take into consideration the lavishness of expenditures for foreign aid, it pales into insignificance.

From July 1, 1940, through December 31, 1951, the United States sent foreign aid to the value of $84,795,000,000 to other nations. This consisted of $49,224,000,000 during World War II years, and $35,571,000,000 since World War II. Following is a breakdown of American financial assistance abroad:

[In millions]

Austria	$920
Belgium-Luxembourg	847
Denmark	281
France	7,213
Germany	3,659
Greece	1,526
Iceland	22
Italy	2,746
Netherlands	1,323
Norway	344
Portugal	39
Sweden	116
Switzerland	2
Trieste	46
Turkey	420
United Kingdom	36,001
Rest of ERP areas	2,458
Albania	20
Czechoslovakia	222
Finland	145
Hungary	18
Poland	465
Spain	19
U. S. S. R.	11,242
Yugoslavia	475
American Republics	1,501
Australia	925
Bahrein	17
Canada	176
China	3,161
Egypt	20
India	898
Indonesia	159
Israel	105
Iran	56
Japan	476
Korea	561
Liberia	24
New Zealand	256
Philippines	839
Ryukyu Islands	71
Saudia Arabia	39
Union of South Africa	95
All other countries	70
International Organizations	775
Various overall programs	1,885
Total foreign aid	84,795

There are countries listed above that I never heard of before but, believe me, they were all in for the kill.

The above huge expenditures represent $589.42 for every man, woman, and child in the United States.

It seems to me that the loyal civil-service employees of our Government are entitled to an increase at this time that would measure up with the cost-of-living index and to our present standard of living, especially in view of the extravagant treatment we have been giving our neighbors abroad as shown in the above table.

Mr. BROYHILL. Mr. Speaker, too much emphasis cannot be placed on the fact that the measure we have under consideration today is a compromise measure. I think I can state without fear of contradiction that a substantial majority of the members of our committee were in hearty accord with a greater pay increase for postal employees than that contained in this bill. I, personally, feel that they are entitled to much more in recognition of their faithful and efficient services to their Government and to the American people.

But, Mr. Speaker, many of us were well aware that to grant them what they richly deserve would, in the final analysis, result in no increase at all. We were well aware that higher pay scales, even if passed by the Congress, would run into the certainty of a Presidential veto and that it would be virtually impossible to muster a two-thirds vote in both Houses of the National Legislature to override that veto. Thus we were faced with the prospect of a half loaf or none. We either had to agree to this compromise or deny the postal employees any increase in wages. And while these workers of Uncle Sam will be disappointed that they will not receive what they had every right to expect, I am convinced that they would be more disappointed if they received no pay increase at all. I am convinced that they will see the wisdom of their friends in the Congress in accepting the compromise measure we have before us today.

Frankly, many differences existed respecting the Corbett amendment. They were honest differences of opinion. But they were differences that had to do with method rather than objective. The objective of all of us, I am sure, was to obtain for the postal employees the largest pay increase possible under the circumstances. When I say "under the circumstances" I mean a pay increase that will pass the Congress and win the approval of the President. The compromise before us meets that objective. It contains the maximum pay scales consistent with that objective. In reporting this measure we have made certain that some pay relief—though not as much as we would like—will be provided to the postal workers this year. We have removed the certainty of a Presidential veto.

For my part I have labored diligently both in committee and in high-level conferences with the Postmaster General to reach a common ground. I honestly and conscientiously supported the demands of the postal workers for wages higher than are provided in this bill until it became apparent to me that those demands would never be accepted by the executive branch. From that time on I worked industriously and determinedly in committee and with the Postmaster General to effect the most advantageous compromise. I believed and I still believe that the postal worker would rather have that half loaf than no bread at all.

But I say to the postal workers, hundreds of whom I have the honor to represent, that this is only the first battle—that the war is not over. The passage of this measure by the Congress and its signing by the President represents a distinct and substantial advance on the pay front. The friends of the postal employees have not been stymied or compelled to make a major withdrawal. We have made gains—important gains.

Perhaps next year circumstances and the economic climate will change to our advantage. Perhaps we can consider and pass another pay measure which will extend to the vast army of post office employees the recognition they seek and have a right to expect. Certainly the action we take here today does not foreclose further action in the early months of 1955. I am certain that the President, the Postmaster General, and the Congress are cognizant of the pay situation as it affects postal employees. I am certain that all agree that the pay scales, even with the increase we will probably approve today, are miserably low and that additional legislation is necessary to correct gross injustice. I certainly do not rule out the possibility that both the President and the Postmaster General will see eye to eye with Congress in the foreseeable future; that the fiscal situation will became such that they will not only approve additional pay but will instigate pay increase legislation in the Congress. It goes without saying that Congress will wholeheartedly approve.

POSTAL PAY, POSTAL RATES, POSTAL PROPAGANDA AND POSTAL POPPYCOCK

Mr. LESINSKI. Mr. Speaker, "Summerfieldism" has not gotten nearly the publicity in the newspapers that certain other isms named in similar fashion have received, but I believe it has caused this Congress more trouble than any of the others.

For nearly 2 years, we have been running around in circles over the matters of postal pay, postal rates, and postal appropriations. We have been running around in circles on these matters because the Postmaster General, Arthur Summerfield, a distinguished Michigan automobile dealer and Republican leader, believes the function of Congress is to enact whatever he proposes, without changing a comma or semicolon.

Members of Congress who have spent years on the Post Office and Civil Service Committee or on the Appropriations Subcommittee handling the Treasury-Post Office appropriation bill each year, are pushed aside by the Postmaster General as not knowing what it is all about and told to take his recommendations without question.

Well, of course, Congress does not work that way as a general rule, and I trust it will not work that way this year, either, on these questions. Nevertheless, the pressure out of the administration down-

town to force on Congress decisions which congressional leaders of both parties on postal matters consider very unwise is so intense that it has made all postal legislation look like a pinwheel in the breeze.

We are rushed into reporting out a bill to increase postal rates, as if it were an emergency matter, and then the bill sits on the House Calendar for months because the leadership does not dare call it up for debate.

We study carefully the need for pay increases for postal workers and other Government employees, examine all of the facts at great length in many days of committee sessions, and finally report out a bill which we think is the answer—the Corbett bill. But the Postmaster General hits the roof over this bill and gets the whole administration steamed up and the Republican National Committee turns on the heat. Consequently, the committee has a hurry-up session and hastily reports out another bill, and the Corbett bill is sidetracked.

Then along comes the House Republican leadership and puts the postal rate and postal pay bills together in one package and says: "If you want to raise postal pay for workers entitled to pay increases, then you have to pass the Postmaster General's bill to raise the rates on first-class mail from 3 cents to 4 cents."

This is a kind of legislative blackmail which Congress should never pay. Bills should be considered on their own merits, and not on deals and swaps. We should not have to pass an unfair bill hitting hard at all the users of the postal service just because pay rates for postal workers have fallen behind the cost of living.

On its own, the 4-cent rate for first-class letters could never pass. Then it should not pass either as part of any deal.

First-class mail is about the only kind of mail that pays its way in full and returns a profit to the post office. Why punish the taxpayer and consumer by raising those rates again? It is unfair in the extreme.

THE POSTAL POPPYCOCK

Summerfieldism is a philosophy which believes in juggling a lot of incomprehensible figures in such a way as to make them prove the opposite of the facts. If the Postmaster General had tried to run his own successful automobile business in that manner, he would never have gotten to be the biggest Chevrolet dealer in the country.

A private business never fools itself by juggling its books to make things look better than they are. Some business sharpsters may try that on other people—on creditors and so on—but they do not fool themselves. And reputable businesses do not do it at all.

But the Postmaster General as a public official has tried to juggle the books to make it look as if he and his business methods have saved the Government hundreds of millions of dollars.

His figures are phony, and his facts are all wrong. Instead of reducing the postal deficit by efficient business management, he has actually rolled up a bigger deficit than before. It may not show in his juggled books, but it is a fact, nevertheless.

The Congress took out of the postal deficit such things as airmail subsidies, free franked mail sent out by all Government agencies, and then raised rates besides. This has, of course, on paper, made the postal deficit look smaller.

Actually, however, it still costs the Government as much—and in fact more—to conduct the operations of delivering the mail as it did before. The only difference is that the books are set up in a different way.

But all the costs are still in there and more besides.

In other words, we raised the rates by $240 million a year, but Summerfield, even with these higher rates, has cut the deficit by only about $231 million. So the same postal operations now cost $9 million more than they did before he took over.

The Detroit Times, in a news story last June by Don O'Connor, pointed out that if Congress had changed the bookkeeping for former Postmaster General Donaldson in the same way it has been done for Postmaster General Summerfield, the Truman deficit on post office operations would have shown up as $348 million instead of $727 million. Summerfield's deficit, however, is about $400 million.

So it is all a lot of poppycock that Summerfield has brought such tremendous businesslike savings to postal operations. All he has brought to the job, it appears, is a passion for juggling figures to make them look better than they are. And the overall cost of mail operations to the taxpayers remains just as high if not higher than it was before he took over.

DOES THAT MEAN WE MUST RAISE RATES?

Now, Mr. Speaker, I am not saying that the postal deficit situation is a cause for alarm. We have always operated the postal service at a deficit because it is a Government service that private enterprise could never provide—and it is a necessary service on which our whole economy and society are dependent.

Do we find alarm in the fact that we do not get back into the Treasury in fees every cent the Government spends for other services—for public health, for censuses, for patents, for defense, for flood control, for rivers and harbors work, for any of the other essential services of the Government intended to help all of the people and the whole country? I do not think so.

Raising postal rates to 4 cents on a first-class letter is gouging the public by 33 percent—and unnecessarily, for this kind of mail already pays its own way. You are asking the average citizen to subsidize the other mail services used largely by business. That is not fair.

Raising postal pay to reasonable levels and raising Government pay for the classified workers too is necessary to maintain fairness to these conscientious employees who serve all the people. Would you require a police officer to make enough arrests to collect enough fines to pay his salary? Would that be good governmental practice? Then why deny postal workers their fair pay and other Government workers their fair pay if they earn it and are entitled to it?

True, we are running a Government deficit. But we are making these tremendous tax handouts to the wealthy. If the situation is so bad we cannot afford to let the Government pay decent wages, then we certainly cannot afford these tax windfalls to business.

A businessman, by the way, will always go out of his way to keep good employees, even when profits are down. For he is looking to the future. He knows that unless he has skilled employees on tap, he cannot handle the work when business does pick up. He loses more in the long run by starvation-wage policies. He gains by good pay scales, for he keeps his best employees that way.

If we are so anxious to copy good business methods in Government, then this is the kind of business policy we should adopt—not one of cheating the best customers by making them pay more than a fair share, in order to grant fair raises and fair pay to the best employees.

It would be cheating the public to raise mail rates to 4 cents. It would also be cheating the public not to give postal workers and other Government workers fair pay.

If we need more money in the Treasury to make out, then we certainly cannot afford to give tax money away to big business.

I include as part of my remarks Don O'Connor's story of Sunday, June 13, 1954, in the Detroit Times entitled "Postal Chief Facing Blast on Savings."

The article follows:

POSTAL CHIEF FACING BLAST ON SAVINGS—DEMOCRATS ASSAIL CLAIMS OF ECONOMY BY SUMMERFIELD

(By Don O'Connor)

WASHINGTON, June 12.—Administration of the Post Office Department is in for scathing criticism next fall from Democrats who believe they have riddled Postmaster General Summerfield's claims of great savings.

Democratic Senators have poked so many holes in Summerfield's repeated assertions of saving taxpayers up to $1,500,000 every working day that he thus far has refused to support his position publicly.

* * * * *

CPA SUPPORT

To sift the finer arguments advanced by both sides requires the mind of a certified public accountant—a fact of which the Democrats are well aware. One of their chief arguments is supported by no less an authority than the highly respected accounting firm of Price Waterhouse Co.

But the Democrats have offered a simple version of their case which is as easy to understand as the Summerfield explanation—still not announced—is complex. Here are the statistics the Democrats rely on.

The amount appropriated to run the post office in fiscal 1955 is only about $16 million under 1954, which doesn't reflect anything like the savings Summerfield claims.

GOT RELIEF

Within the past year, the post office has been relieved of more than $100 million in obligations by other government agencies.

Summerfield is the beneficiary of mail rate increases which on an annual basis will add between $200 million and $270 million in revenues to his agency. The exact amount seems to be in dispute.

Briefly, Democrats contend that Summerfield's claimed savings are the result of

fast bookkeeping and higher rates. During Senate debate on the 1955 post office appropriation MONRONEY accused Summerfield of doubletalk, declaring:

"Perhaps there are some fine weasel words, which are used by the high-powered publicity writers, which have a different meaning from their ordinary meeting. But certainly the public has been led to believe that there was a saving of many millions of dollars in the post office last year."

SCANS UTTERANCES

"I have been trying my best to keep in alinement the utterances of the Postmaster General through his highly skilled, highly paid, and highly organized press corps, in stating that he has been saving the country a million dollars a day.

"Once in a while he makes it a million dollars a day for every working day. Something has been said about $200 million. I find that the $200 million about which we have been reading has shrunk to about $16 million for the whole year."

In reply, Summerfield uses the deficit approach—an argument that doesn't stand up under close scrutiny. This gimmick compares a 1954 deficit of $746 million projected by Summerfield's predecessor, Democratic Postmaster General Donaldson, with the present estimate.

NOT THE CASE

Summerfield says that when the book is closed on June 30, the actual deficit will be about $400 million. On the surface, it appears that Summerfield has pared spending by $346 million. But this is not the case.

In the first place, the Truman Budget Bureau shaved $78 million from the Donaldson budget and Summerfield cut it down another $72 million when he took over.

To this is added the fact that the Post Office no longer is liable for payment of $79 million annually in airmail subsidies and $36 million in franked mail, both obligations having been transferred to other agencies.

RATES HIKED

Then the rate increases figure in. While it's true that the full impact of the shifted expenses and increased revenue hasn't been felt, the major portion took effect this year.

A study of postal operations undertaken by Price Waterhouse showed that had Donaldson had the benefits enjoyed by Summerfield on an annual basis the 1952 deficit would have shrunk from an actual $727 million to $348,350,000.

This study was made for the Senate Post Office Committee. It appears to be the most damaging evidence against the Summerfield claim.

Mr. GUBSER. Mr. Speaker, I rise in support of the proposal before us which would grant a much needed pay raise to postal employees and at the same time provide through increased postal rates the money to pay for it.

I can find complete moral justification for the linking of these two bills into one package. Too long have we followed the irresponsible fiscal policy of spending money with no consideration as to where that money was coming from.

Fortunately, today we do not have a war going on which can be used as justification for deficit financing. Instead, we are working toward the achievement of a peacetime economy where the control of inflation and the elimination of deficit financing are of paramount importance to the average American. We are dangerously close to our debt limit. To exceed it will mean more inflation and higher prices. It therefore behooves us as responsible representatives of the people to use businesslike methods and pay our bills as we go along.

There is no doubt that a pay raise for postal employees is justified. The American people almost unanimously believe it is justified and will gladly pay increased postage provided the increased revenue is primarily devoted to higher pay for our hardworking postal employees.

For the first time in many years we will, when spending money, answer the question, "where is it coming from?" Tying these two bills together will be hailed by the American people as an end to fiscal irresponsibility and the beginning of a "common horse sense" approach to a business problem.

To devote my attention to the rate increase for a moment, may I say, Mr. Speaker, that I consider the provisions of this bill to be justified and fair. Ample testimony was presented before our committee to prove that second- and third-class rates were too low. Surely when one realizes that certain individual business houses receive millions of dollars in subsidies through preferential mailing rates, certainly when one finds examples of publishers who pay only $1 in postage for each $4 paid by the taxpayer, he cannot argue the justification of this second-class increase.

Anyone who views the great volume of third-class mail which is carried at a loss by the Post Office Department cannot argue that the third-class boost is unfair.

The principal opposition seems to be to first-class increases. May I point out, Mr. Speaker, that this increase applies only to nonlocal letters of less than 1 ounce. There has been no increase in this category since 1933 despite the fact that since that time the costs of carrying the mail have increased by over 100 percent. It should be pointed out that the greater majority of nonlocal first-class mail is business mail and does not originate from the so-called little fellow. For the first time the little fellow will not be asked when he pays his tax bill to make up the deficit which business has created when the Post Office Department carries nonlocal first-class mail.

I cannot emphasize too strongly that the only category which is being raised is currently losing money. It is estimated by the Post Office Department that each first-class letter of less than 1 ounce is carried at a loss of $0.0018 per piece.

Our neighbor to the north, Canada, has recently increased its rate on such mail from 4 to 5 cents. They made this increase at a time when their postal establishment was showing a profit. Certainly we can justify a much lesser raise at a time when our postal establishment is operating at a deficit in excess of $300 million per year.

Now to devote my remarks exclusively to the pay raise portion of the bill. I believe that the raise as voted by our Committee on Post Office and Civil Service is justified and fair. I personally wish the pay raise could have been 7 percent, but, again, fiscal responsibility ruled out a higher increase. The principal objection to the bill seems to be in the provision which calls for a reclassification by the Postmaster General. The basic issue which underlies this controversy is whether reclassification should be an administrative or a legislative matter. I believe this is purely an administrative matter and that Congress should only be responsible for setting up an overall policy that it expects the executive branch to enforce. The actual details of a job description and a pay scale are matters of administrative detail which should be arrived at by the executive branch within the confines of overall policy set by the Legislature.

In past years, Congress has been able to do this work because the Postal Department was not as large as it is today and problems of Government were not as complex. With the many problems confronting legislators today, it is senseless to expect them to be authorities on job descriptions and pay scales, just as it is senseless to expect the board of directors of a large corporation to handle every detail in the administration of that corporation.

The trouble with the Post Office Department in the past has been that we charge the Executive with the responsibility of running an efficient department but we allow Congress, which is subject to political pressure, to make all the decisions. If you want business methods in the post office, you certainly will not get it by making the Postmaster General the errand boy of Congress.

But, at the same time, the employees have a right to certain safeguards against unfair dictation by the executive department. This bill provides those safeguards and I am happy to have had a part in drafting them.

First, the bill provides positive assurance against any downgrading or pay cuts as a result of reclassification. Secondly, it provides for an appeal to the Civil Service Commission if an employee feels he has been indiscriminately reclassified. This is a right which the nonveteran postal employee does not have today. Thirdly, any plan proposed by the Postmaster General for reclassification can be vetoed by a simple majority of one House of Congress. In light of this, how can anyone say that Congress cannot move to protect the postal worker?

Mr. Speaker, I strongly believe that the postal employees have not been given the full information regarding the reclassification features of this bill. It has been said that the administration has used undue pressure to get its way. I will not argue for or against that point. But, pressure is a two-edged sword, and who can deny that the leaders of the postal unions have brought pressure to bear on their members who, in turn, have exerted pressure against the Members of this House? I do not resent this pressure. I am not concerned as some Members are with alleged violations of the Hatch Act. I am happy that postal workers have utilized their American right to petition their Congress. I commend the union leaders for organizing the postal workers to exercise that basic American right. But I do feel that this pressure has been misguided.

This reclassification will not harm the employees. Instead, it will help them.

True, it will remove the opportunity for union leaders to exert political pressure upon individual Members of Congress, but political pressure never has been and never will be the right way to run an efficient business. The employees, through their leaders, will still have the right to petition the Congress. They will have the weapon of the ballot to use as a check against the legislative as well as the executive branch. With these rights and weapons, I can hardly think that the welfare of 500,000 postal employees will ever be ignored. Mr. Speaker, this is a good bill, a fair bill—fair to the postal workers, fair to the taxpayer. It is a bill conceived after long hours of hard labor by our committee, under the guidance of one of the most noble and patient men I have ever known—the Honorable EDWARD REES, of Kansas. I urge the House to approve it.

Mr. OSTERTAG. Mr. Speaker, while I am in favor of salary increases for postal workers, as provided in the bill before us, and while a reasonable rate increase is certainly in order if we are to overcome the deficit in the postal budget, I dislike being a party to tying the two together in one package. However, it apears that there is no alternative.

In my judgment, each should be considered on its merits, and approved or disapproved on its merits. It is expected that other classified employees in the Federal Government will be given salary increases, but there is no plan or disposition, so far as I know, to tie these increases to revenue measures. I question the precedent we are establishing here, and feel that it is particularly unfair to single out the postal workers for such treatment.

During the past year and a half, signal improvements have been made in the postal service under the guidance of Postmaster General Arthur Summerfield. A staggering deficit, amounting to almost three-quarters of a billion dollars has been reduced to $437 millions, through better accounting, great efficiency and better housekeeping methods generally. I am confident that greater strides will be made in the future under the Postmaster General's direction. One absolutely essential factor in striving toward that goal, however, is high morale among the employees. We tend to defeat our own ends, therefore, when we enact legislation in such a way that, rightly or wrongly, it connotes a punitive frame of mind toward the employees on our part. I regret that these two bills are tied together and trust that their twin goals, when realized, will offset the bad taste left by this method of enacting them. Even more do I trust that what we are doing here today will not become a precedent, but that salary and revenue bills will, in the future as in the past, be enacted independently and on their merits.

Mr. DOWDY. Mr. Speaker, I am opposed to several parts of this bill, but my greatest objection is based upon the increased first-class rate of postage.

I do not feel that a tax should be placed upon the writer of a letter to pay postal department's deficit. When the Department proposed its rate increases, our committee was informed by the Department's representatives that the proposed rates were not based on a fair, just, and equitable plan, but merely to raise money.

The Department proposed that rates be raised because it was not making enough profit on first-class mail to pay the loss on other classes. They proposed that nearly all of its increase be placed on first-class users. Legitimate reason was not given as to how and why the amount of each proposed raise was determined.

The users of first-class mail, being the average citizens, are not organized, and consequently had no voice in the hearings, other than those of us who feel that their letters to their loved one and concerning their business affairs and personal matters should not be taxed to pay for the cost of the Post Office Department incurred in other operations.

In demanding the increased letter rate, the Postmaster General stated that under the 3-cent rate, first-class mail is paying a profit of $105 million per year, and that with the increase the writers of letters would be taxed $264 millon per year over and above the cost to the Post Office Department to deliver their letters. The argument does not, to me, justify the proposed increase of the first-class rate contained in this bill; to the contrary, it condemns the increase.

Mr. REAMS. Mr. Speaker, I rise to state that I will vote to support the motion to suspend the rules and pass the version of H. R. 9245 that is before us today. I will support this motion because I am in favor of a pay raise for the postal employees at this session of Congress. In the Post Office Committee I voted in favor of H. R. 9245, the Corbett bill. It would not be fair to the postal employees in my district and in the Nation to let this bill die and the postal employees go without an increase just because we do not like the method by which this bill has been brought to the floor of the House.

However, I cannot refrain from saying that the way in which this bill was brought to the floor lacks something in candor. It is my understanding that the original Corbett bill, which was voted out of the Post Office and Civil Service Committee under number H. R. 9245, was amended and the provisions for postal rates added to it, as well as certain other changes, all without the knowledge or consent of the Committee on Post Office and Civil Service or of the gentleman from Pennsylvania [Mr. CORBETT]. He was the original author of the bill and should have been consulted when these changes were made which appear in the committee print before us.

The Post Office and Civil Service Committee has spent weeks on testimony and days in executive session to bring out a postal pay-raise bill. This was reported unanimously by the committee. Surely we were entitled to consideration before such a drastic change was made. This committee is composed of able and diligent Members of this House. There was not always agreement in our committee but there has been sincere effort and hard work. Its membership was entitled to greater confidence than has been shown them in this proceeding. But lack of agreement on method will not prevent me from voting for this measure which will bring some much-needed help to the postal workers of my district.

Mr. MILLER of Kansas. Mr. Speaker, it has been a privilege to listen to the arguments for and against the passage of the motion to suspend the rules and tie together the bills to increase the postal rates and to make proper adjustment of the salaries of postal employees. After listening attentively to arguments on both sides, I am thoroughly convinced that this motion should not pass. The postal rate bill provides for an increase on first-class matter from 3 cents to 4 cents on weights up to 1 ounce, notwithstanding the fact that first-class mail is making a profit of more than $100 million per year. It provides for only a slight increase in postal rates for third- and fourth-class mail; not nearly enough to make up for the loss now sustained in those categories. Now, is it reasonable and just to increase the postal charge against the part paying its way for the benefit of the section that is not paying its way? To do so is to make every man, woman, and child, rich and poor alike, pay tribute of 1 cent to the users of third- and fourth-class mail every time they drop a letter in the mail box. It is not fair, and it is unjust to try to put the Members of Congress in a position where they would have to vote for this injustice in order to support a well-deserved increase in the salaries of postal employees.

Mr. Speaker, the point has been made here that these bills have been under discussion for several weeks; that hearings have been held and committee reports published; that for this reason every Congressman has had opportunity to know the contents of these bills and cannot reasonably object to strict limitation of debate. Let me say, Mr. Speaker, that it is just because we do know the contents of these bills that we object to having them tied together in such a way as to force us to adopt a measure that is unjust in order to support one that is just and equitable. For this reason, I shall vote against the motion to suspend the rules. If we defeat this motion it is quite likely that the petition to bring the Corbett bill before the House will receive the eight additional signatures which it now lacks and there may be time to do justice by the postal employees without at the same time levying unjust tribute upon every man, woman, and child in the United States every time they buy a postage stamp.

Mr. BYRNE of Pennsylvania. Mr. Speaker, I have followed with interest the progress of the bills providing a salary increase and other benefits to postal employees and providing for an increase in postal rates.

Since I took office 1 year and a half ago, I have received letter after letter pleading with me to work for a pay raise for postal workers. Many of my constituents are in this category and have explained to me the vital need for legislation of this type. I have promised them that I would support wholeheartedly fair and equitable legislation in this matter. It was a great disappointment

to me, and, I am sure, to many of my colleagues, when the House Committee on Post Office and Civil Service reported out H. R. 9836. I cannot, in justice, give my vote to this bill which is an insult to the many fine and loyal employees of the Post Office Department.

H. R. 9836 proposes to grant a permanent 5 percent increase, with a minimum of $200, to all employees in the postal field service, with the exception of fourth-class postmasters and hourly rate employees. It also includes a provision for a reclassification of these workers which would have to be completed by March 15, 1955. This latter clause necessitates the examination and evaluation of all jobs in the postal field service. Other provisions of this bill are a per diem allowance increase from $6 to $9, and the institution of the biweekly pay period for all postal personnel.

The latter provisions mentioned above are laudable and will prove a boon to those affected. However, I do not feel that a 5 percent increase in pay is sufficient to establish the salaries of the postal workers on a par with other people doing work of a similarly strenuous nature.

Our postal employees have not received a pay raise for 3 years. In the interim, the cost of living has gone up considerably. The salaries of workers in private industry have increased accordingly. It is a fact that postal workers' incomes are so low that 44 percent of the postal carriers find it necessary to hold down part-time jobs in addition to their regular employment. Forty thousand postal workers' wives are employed, principally in order to maintain a decent family standard of living. I believe that it is only right and proper that we refuse to consider H. R. 9836 until it contains provisions for a fair and equitable raise for the postal workers.

Let me also remark at this time on the proposed legislation raising rates on all classes of mail. When this legislation was first proposed, it was understood that the increased revenue from the new postal rates would be sufficient to cover the salary increases to the postal workers. H. R. 6052 fails miserably in this respect. Furthermore, I do not feel that it is necessary at this time to increase postal rates. Nor do I believe that it is fair to our people to ask them to pay such rates as 4 cents an ounce to mail a letter first class to another city, when it is the second- and third-class mail that should carry the burden. I also object to the way in which this legislation was brought in. In order for us to vote on a salary increase for postal workers, we had to cast our votes at the same time on raising the postal rates. These matters should be considered separately.

It is my sincere wish that the House reject both of these bills and ask for legislation which will be fair to our postal employees and to all the people that it affects.

Mr. GROSS. Mr. Speaker, as one who has opposed the postal rate increase bill since it first came before the House Post Office and Civil Service Committee in July 1953, I certainly cannot swallow this attempt today to ride it through the House of Representatives on the back of a bill to provide a pay increase for postal workers.

I am for a reasonable pay increase for the men and women in the postal service, but I am not for one moment impressed by the specious arguments of some speakers that a pay increase for these workers must be predicated upon higher rates for those who use the mails.

A pay increase for some 1,500,000 persons in the classified Federal service is due to come before the House in a matter of days. It will be interesting to note which one of the speakers who today glibly advocates increased postal rates offers an amendment to that bill to provide for increased taxes to finance the cost of a pay raise for those people.

I am opposed to the postal-rate increase first of all because it provides for a 4-cent letter rate, a category of the postal service which is already returning a profit of more than $100 million. The transportation of a letter is a service that is available to every person in the United States who is able to write—from youngsters to the aged. An increase in the letter rate, already showing a real profit, simply becomes another tax levied indirectly.

I repeat that I am opposed to predicating the salaries of postal workers on revenue obtained by the Post Office Department. No other agency of Government is operated on that basis. It is unfair both to postal workers and users of the mails.

In addition, Mr. Speaker, I resent the manner in which this legislation comes to the floor of the House. The postal rate increase bill was reported out of committee last February. It could have been considered many, many weeks ago in regular order and with ample time for debate and amendment had the leadership desired. The pay increase bill for postal workers was approved by the committee several days ago and there has been ample time to consider that measure.

These bills should have been considered separately, on their merits and in conformance with normal procedure. The procedure proposed today can only be explained as an effort to bludgeon legislation through the House.

I am opposed to this unthinkable procedure and most certainly will vote against a suspension of the rules.

Mr. ELLIOTT. Mr. Speaker, I am for giving postal, legislative, and executive employees a reasonable raise in salary, and have so expressed myself on numerous occasions during the past several months. These employees have not had a raise since 1951, and the cost of living has continued to rise since then. Employees of most industries have had a raise since then.

Some time ago I signed a discharge petition in an effort to bring the Corbett bill before the House providing for a 7-percent raise in pay for postal employees.

I am willing and ready to vote for the 5-percent raise for all employees, as proposed in the bill before us.

However, Mr. Speaker, I cannot vote to raise the price of postage for letter mail from the present cost of 3 cents to 4 cents as proposed in this bill. Letter mail not only pays its own way, but in addition, last year it paid an additional $105 million into the Post Office Department.

Post-office losses today center primarily around cost to the Government of handling second- and third-class mail.

Why should users of 3-cent stamps be taxed an additional 33⅓ percent by having the price of those stamps raised to 4 cents to make up deficits caused by other classes of mail?

The majority leader has said today that this will be our only chance to vote a raise for Federal employees. I hope he will reconsider this position. I feel certain that a majority of the Members of this House are willing to give a reasonable raise to all Federal employees. I do not believe that a two-thirds majority, as will be required to suspend the rules, are willing to raise the cost of mailing a letter from 3 cents to 4 cents.

I feel that both matters of raises for Federal employees and postal rates should be considered separately on their merits. My vote this afternoon will reflect that conviction.

A lot is said about the deficit in the Post Office Department. A lot should also be said about the deficits in all the Government departments. Deficits throughout the Government should be done away with as soon as possible. I personally feel that the Post Office Department should be operated primarily as a service institution for the American people, but that it should be operated on as nearly a break-even basis as is reasonably possible. There should not be any large deficit in the handling of any one of the various classes of mail. An equitable mail rate structure is badly needed. It should not be a political structure. It should be a realistic economic structure. It should not be reached under the type of political compulsion present here today.

Mr. BARRETT. Mr. Speaker, as pointed out by the minority leader yesterday, it is a terrible thing for the majority side to demand that the House consider two different bills at the same time under the suspension of the rules. This maneuver to try to force postal pay increase supporters to vote for an increase in postal rates is an insult to the Members as well as to the postal employees and the public generally.

Certainly each of the subjects at issue—pay increases and postal rates—are important enough to be considered separately and on the merits of the provisions of each bill. The Republican majority leaders are in effect telling the public that they will be penalized with higher postal rates if postal employees get the pay increase which has been long overdue them. The House Post Office and Civil Service Committee held hearings on postal rate increases for several weeks last summer. It is apparent that the Republican minority leaders deliberately delayed scheduling the postal rate increase bill, H. R. 6052, for consideration by the House until the committee made a definite move on the matter of postal pay increases. They know that a majority of Democrats are opposed to increasing postage for first-class letters

from 3 cents to 4 cents, and airmail from 6 cents to 7 cents.

It is doubtful that there ever was a stronger effort made to go against the wishes of the persons to be affected by proposed legislation. Duly elected and competent representatives of the various postal groups testified before the committee regarding their needs and wishes. There was nothing in that testimony that was unreasonable or unsound. Despite the fact that the first so-called compromise bill, H. R. 9245, fell far short of the recommendations of the postal employee representatives, the latter urged its approval so as to avoid any further delay in beginning the adjustment of postal salaries to the increased cost of living in recent years. However, the voice of the Postmaster General was soon heard and this bill was not reported out of the House Rules Committee.

A number of bills were introduced in the House and Senate, including one by myself, H. R. 7431, providing for a flat $800 per annum increase. The first bill reported by the committee, H. R. 9245, provided for a 7 percent increase, with a minimum of $240 and a maximum of $480. The second compromise bill, H. R. 9836, which is before us today in a package deal with the postal rate increase, provides only a 5 percent—approximately 10 cents per hour—with a minimum of $200. The Postmaster General regards this as a compromise on his part because he originally recommended only 5 cents per hour or $100 per year. He also has insisted that any pay-increase bill include the recommendations of the Fry report, which amounts to a declassification of postal positions and salaries rather than reclassification.

Representatives of the postal organizations—clerks, carriers, mail handlers, transportation workers, maintenance personnel, and so forth—have testified repeatedly that these employees are almost unanimously opposed to the Summerfield-Fry plan. They do not want area wage or graduated scale increases any more than Members of Congress would want to be remunerated according to the geographical location of their districts. I can appreciate their attitude toward the presumptuousness of the Postmaster General in attempting to usurp the prerogative of Congress in setting the salaries and determining the grades for postal employees.

The difficult time the postal employees are having in achieving a salary increase has naturally resulted in further resentment and deterioration of morale. In his state of the Union message the President strongly emphasized the importance of building up the morale of all Federal employees and making their compensation adequate to attract and retain efficient, competent citizens.

Some of the other features of H. R. 9836 which have been advertised as specials for postal employees amount to bringing per diem rates up to $9 from $6; other Federal classified employees and officers of the armed services have long been receiving $9 per day. The $100 per year uniform allowance is an obligation to employees required to wear them that has been long overdue.

The total cost to the Government for all features of H. R. 9836 is $151,533,000 per year. The increase in annual revenue from the increases in postal rates proposed by H. R. 6052 totals $233,280,000.

Mr. Speaker, I have gone on record many times as being in favor of a substantial pay increase for postal employees. I am strongly opposed to increasing postal rates. I feel that we should be given an opportunity to vote for the pay increase without being hoodwinked into voting for an increase in postal rates. I therefore am voting against the suspension of the rules in this instance.

Mr. SPRINGER. Mr. Speaker, I intend to vote today for H. R. 9245 to increase the rates of basic compensation of postmasters, officers, and employees in the postal field service.

This is one bill in which there has not been complete agreement. I will admit the bill does not satisfy me entirely. However, all of us have seen legislation in the past few weeks come to the floor of this House to which we had individual objections. To me the test of this legislation is—does it serve the overall purpose which is intended when it is brought to the floor of the House. I believe this bill does have some things which will receive general approval and for those reasons it should be enacted. Let me point those out briefly:

First. This bill provides a permanent 5-percent increase for all postal employees with a minimum of $200 per year and a maximum of $400 for any employee except fourth-class postmasters and hourly employees.

Second. A much-needed uniform allowance annually for those employees required to wear uniforms is provided in this bill.

Third. A fourth longevity grade for all personnel in post offices.

Fourth. An increase is made allowable per diem for employees in the transportation service up to $9 per day from the present rate of $6 per day.

Fifth. This legislation will modify the existing law which restricts the number of permanent appointees in the Federal service. This has merit in permitting more permanent appointments to a large number of temporary and indefinite employees in the field service. This makes for better stabilization and a greater attraction to better personnel.

Sixth. There will now be provided a biweekly pay period for all postal personnel in the field service.

To me these are much-needed improvements for the personnel in the postal field generally. It has been 3 years since there has been any increase of salary to postal people. This increase is needed at this time, and something should be done about it before this Congress adjourns.

I do not know whether or not we are going to vote on any other bill during this session at all, but I do know that these provisions of this bill are needed sufficiently by postal personnel who deserve our consideration today.

I think all of the Members of the House have realized for some time that in the civil service system there exists a wage scale that keeps employees living on a marginal basis from year to year. This is now one of the more important matters under consideration by personnel boards here in an attempt to work out some equity in the situation. I believe that a majority of the Members of Congress believe that such an adjustment is fair and should be brought about.

As all of us know, both parties have been desiring an adjournment on August 1, or shortly thereafter. If we are to bring any realism into this situation we are going to have to give relief to the postal employees before we adjourn. It appears that this may be the only opportunity we will have for such a vote. These are my reasons for supporting this bill today.

Mr. REES of Kansas. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Speaker, the main reason that has been given today for not voting for this bill is that it combines the postal pay raise with the rate raise. To me that is one of the biggest reasons why we should vote for it. That is the responsible way to deal with our business—providing increased income to go along with increased outgo. Why should the rates not go up? Why should not all of us who use the mails pay the increased amounts the pay raise will add to the costs of the service rendered? We do not like it that we are paying twice as much for our automobiles as we did 10 years or so ago. A businessman probably does not like it that he pays twice as much for his labor and most everything else he buys. But he does it just the same. Why should we not pay more also for our mail service, another legitimate expense?

First-class mail that is not local is not now making a profit and that is the first-class mail on which the rate is raised. To be sure, the bill raises more from some classes of mail than from others. I do not like some parts of it either. But if it is said that to raise the rate on first-class mail penalizes the unorganized users of that mail, then not to raise the rates will penalize the unorganized taxpayers. Someone has to pay for the wage increase which we ought to grant. It is our responsibility to put the two together in as fair a way as possible. Nobody is wholly satisfied with the bill. But it is a comprehensive and a responsible way to deal with the problem—one that will permit us to respect ourselves, and in my opinion, will command the respect of the country.

Mr. Speaker, this bill is not a means of denying or defeating the long overdue and deserved postal pay increase. To vote for this bill today is the way to get such legislation. It will actually put money into the pockets of the postal workers. You cannot be sure any other way will. You are playing fast and loose with them if you vote against this bill and take the chance of not getting any bill enacted into law this session. And only a law will give them the benefits they need.

Mr. DAVIS of Georgia. Mr. Speaker, I yield the remaining time to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Speaker, there are several reasons why I take the floor. In the first place, I am utterly opposed to this method of legislating on as vital a question as this. I might say also now that I do not believe, when I was majority leader, or the gentleman from Massachusetts [Mr. McCORMACK] was majority leader, that I ever or that we ever brought up a bill under suspension of the rules that I did not consult or we did not consult with the minority leader and clear it with him. That has not been done in this instance, because I told the gentleman from Indiana that I did not think this bill ought to come up in this fashion.

Another reason why I take the floor is I am anxious again to hear my very beloved friend, the gentleman from Indiana [Mr. HALLECK], make another speech, which I feel sure he will. I am and always have been proud of the House of Representatives since being a Member of it, and I wonder sometimes if we have lost our courage from a parliamentary standpoint. Do we not trust ourselves? Do we not have confidence in the opinions and in the votes of a majority of the Members of this House? Do we have to bring in a bill, in order to pass it, in order to please somebody or a little group of somebodies, and not allow the House to express itself upon it?

Now, my friends on my left, that is fundamental. Suppose we had a majority or any party had a majority like the one in which I served. After the election in 1936 there were 334 Democrats in the House, 89 Republicans, and 12 others. Suppose we had determined then to do what you intend to do today, that is, not allow this House to express itself except on bills wherein we could control the committee and not allow the House to express itself on anything, not even offer an amendment, not even have an hour's debate on great questions. We could have done it then, but we did not, and as long as I live I will never be a party to this trend of denying the representatives of the people the right to express themselves and vote on the measure. That is democracy, and nothing less is democracy. I have faith in you. I do not believe you will run away and be crazy. They talk about the unorganized group. Well, the great unorganized group in this country is the average taxpayer, that great middle class that somebody was talking about.

Now, the first-class mail brings into the Treasury $105 million in profit. Now you are going to lay on those unorganized people by your vote today another $159 million. I am not going to do it, and that is all there is to it. And let me tell you something else. It matters not what the gentleman from Indiana may say in reply to what has been said in this debate here. You, in my opinion, will have another opportunity to vote on a postal pay increase before this Congress adjourns about August 15. I am in favor of an increase in pay for postal employees. I have been around here a long time, and I usually guess about 6 weeks after some hopeful people begin to talk about Congress adjourning. In my opinion, there is no chance for this Congress to adjourn on the 31st day of July. So we will have that opportunity.

The gentleman from Indiana [Mr. HALLECK] is a man of great courage, personal and political courage. But if we vote this motion down today, he will not have the courage to deny this House the opportunity of voting on a postal increase, in my humble opinion.

Mr. REES of Kansas. Mr. Speaker, I yield the remainder of the time on our side, 5 minutes, to the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, the gentleman from Texas [Mr. RAYBURN] complains about this procedure. The gentleman just voted on two suspensions dealing with veterans' legislation. As a matter of fact, everybody voted for it. The gentleman talks about courage and about working the will of the House. Veterans' bills have been brought in under suspension right along. And we have had a lot of other bills brought in under suspension. We might as well be frank about it; once in a while we would rather demonstrate a lack of courage by saying that we are for this or for that or for some other thing, but I want to say very quickly here a word concerning some of the things that I think are important in this matter.

The first one is that these are two balanced bills that have been reported by the great Committee on the Post Office and Civil Service. The measure that is now before you, as amended, contains the amendments to which the committee has agreed. It raises pay and it raises rates. There is no reason why that should not be done. And may I say at this point, if the Members are interested, that the program of the President in respect to the Post Office Department contains an increase in rates as well as an increase in pay. That is what this bill seeks to do.

Some have argued here, Why increase the rates along with the pay, in the bill? My answer to that is another question. Why not? Is there not some relationship between the costs that are constantly mounting in the Post Office Department and the rates that represent the revenues to the Department? As a matter of fact the representatives of the employees' organizations went before the committee and approved the rate increase bill. To my mind, that is a clear indication of their readiness to accept a measure of the responsibility for increasing rates. If they are not ready to take some of the responsibility, who is supposed to take it? Are we supposed to take it on our own responsibility? I do not think we are.

The gentleman from Texas [Mr. RAYBURN] has always said that he would like to vote to adjourn a Republican Congress any time. He is going to have the opportunity to vote to adjourn the latter part of next week, make no mistake about that.

Mr. RAYBURN. That will be one time when I will be glad to follow the leadership of the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. I appreciate that. This session of Congress is coming to a close. We have a lot of work to do. Let me say to you as we say out in Indiana, "This is it." Here we present a balanced bill. It provides for pay raises for the employees. Many of the Members signed the petition. They want the employees to have a pay increase. That is all right with me. But just remember this: You have a 5-percent increase across the board and you just voted a 5-percent increase for disabled veterans. That was a unanimous vote. In this bill there is provided a minimum increase of $200. In this bill there is provided a $100 allowance for uniforms. There is provided a longevity step that is worth $100 to a great many of the postal employees. Are you going to throw that out the window? I do not believe you are. Are you going to go back home and tell your postal employees that you voted against giving them a pay increase because you did not like the procedure? That will be a bit difficult to understand.

Let me say this further thing. The matter of fiscal responsibility should be uppermost in the minds of all of us. We hear talk about the Post Office Department being a service department. Where is it supposed to be a service department? For the dissemination of information. And that properly in some part is charged to the taxpayers. That is where the second-class rates come in. But as far as the rate increase is concerned, let me point this out to you: The last increase in first-class rates was under a Democratic Congress back in 1932 or 1933. It was raised to 3 cents. The 3-cent rate has been in effect since that time. Costs in the Post Office Department have gone up 100 percent since that time. The average family spends about $1.50 a year on first-class postage. Let me assure you, if you are getting the buck ague about voting for that, and I am afraid some of you are, that I do not think anybody is going to be very much upset about it. We raised postcards from 1 cent to 2 cents, and I never got the first note complaining against it. We raised first-class rates back in the 80th Congress under a procedure exactly like this. The only rate increase we did not have in there was second-class rates. We had third-class in the measure. We passed it under suspension of the rules, with the two bills tied together, and there was not even a record vote on it.

May I say to the gentleman from Texas I have discussed with him all the matters coming before the House. I told him last week what we proposed to do here. But I do not think it is incumbent upon the majority party in power to grant to the minority an absolute veto on anything that is completely within the rules. There is nothing unfair about this procedure. Everybody has known what was going to take place here since last week. The matter was announced with the program for this week. No one has been taken by surprise. You can debate here from now until doomsday and you will not know anything more about what is in this bill. As a matter of fact, the time has come, I think, to take care of the postal employees with the pay increase that they deserve to have, and at the same time demonstrate a little courage, a little courage, if you please, and vote for the increase in the rates which is completely justified.

The SPEAKER. The time of the gentleman from Indiana has expired. All time has expired.

The question is, Shall the rules be suspended and the House pass the bill H. R. 9245 with an amendment?

Mr. RAYBURN. On that, Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 228, nays 171, not voting 35, as follows:

[Roll No. 111]

YEAS—228

So, two-thirds not having voted in favor thereof, the motion was rejected.

The Clerk announced the following pairs:

Mr. Angell with Mr. Chatham.
Mr. Curtis of Nebraska with Mr. Regan.
Mr. Harrison of Wyoming with Mr. Willis.
Mr. Kersten of Wisconsin with Mr. Thompson of Louisiana.
Mr. McGregor with Mr. Lucas.
Mr. Mailliard with Mr. Camp.
Mr. Robsion of Kentucky with Mr. Brooks of Louisiana.
Mr. Weichel with Mr. Sikes.
Mr. Short with Mr. Thompson of Texas.

The result of the vote was announced as above recorded.

LOSS OF NATIONALITY OF PERSONS CONVICTED OF CERTAIN CRIMES

Mr. GRAHAM. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 7130) to provide for the forfeiture of the citizenship of persons convicted of advocating or conspiring to advocate the overthrow of the Government by force or violence.

The Clerk read as follows:

Be it enacted, etc., That this act may be cited as the "Expatriation Act of 1954."

SEC. 2. Paragraph (9) of subsection (a) of section 349 of the Immigration and Nationality Act (66 Stat. 163, 268; 8 U. S. C. 1481 (a) (9)) is amended to read as follows:

"(9) committing any act of treason against, or attempting by force to overthrow, or bearing arms against, the United States, violating or conspiring to violate any of the provisions of section 2383 or section 2385 of title 18, United States Code, or violating section 2384 of said title by engaging in a conspiracy to overthrow, put down, or to destroy by force the Government of the United States, or to levy war against them, if and when he is convicted thereof by a court-martial or by a court of competent jurisdiction; or".

The SPEAKER. Is a second demanded?

Mr. CELLER. Mr. Speaker, there is no second demanded on this side.

Mr. WALTER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KEATING. Mr. Speaker, I have given this measure my wholehearted support from the very outset. It is one of the bills specifically recommended by President Eisenhower as a necessary change in our laws with respect to the Communist and subversive plotters in our midst.

The amendment proposed by H. R. 7130 will add a new ground for expatriation, to the present grounds contained in the laws such as voluntary renunciation, taking an oath of allegiance to a foreign power, serving in the armed forces of a foreign country, and so forth. I would like to direct the attention of the House to something that is sometimes not appreciated about this law and the concept which underlies it.

The right of expatriation is itself something that distinguishes a slave-state from a free people. None of the dictatorships, including the vicious tyranny that is now settled upon so much of mankind for the Kremlin, has ever recognized the right of citizens or subjects to emigrate and renounce their ties. No tyranny could stand the enunciation and implementation of such a right. Yet we have always observed it fully. Long ago, early in our history, Congress recognized the right of American citizens—if they chose for some reason to do so—to leave this country and expatriate themselves by a simple declaration. Our borders are still open outward, as it were, and I hope that they shall always be so.

In this light, it is nothing less than fair, that those who are convicted of trying to destroy this very structure of freedom, including the right to leave our midst, should be deprived of their nationality. Surely it is as inimical to the welfare of our Nation to plot its violent overthrow from within, as to take an oath adhering to some foreign power on the outside, or even to bear arms in a foreign army.

The technical distinction between losing one's rights of citizenship, which is an automatic consequence of conviction for most felonies, and being expatriated, is that the former loss is only partial and

temporary, subject to restoration by pardon at any time. A person who is expatriated becomes an alien, finally and irrevocably, for all purposes. His status can never be changed except by act of Congress. This is a simple law and a just one. I am happy to have been associated with it while it was pending before our committee and I shall support it enthusiastically here.

Mr. FEIGHAN. Mr. Speaker, while I support the bill, I wish to point out that I am the author of a bill which includes not only the provisions of the bill under consideration, but it would also include to the same extent, those convicted of espionage, sabotage, and other subversive crimes. I see no difference between a spy and a saboteur from one convicted of violating the Smith Act. In each instance they have demonstrated their disloyalty to this country.

Mr. Speaker, the bill H. R. 7265, which I introduced, amends paragraph 9 of section 349 (a) of the Immigration and Nationality Act to provide for the loss of nationality by any citizen convicted of violating certain specified sections of title 18 of the United States Code.

At the present time paragraph 9 of section 349 (a) of the Immigration and Nationality Act provides that any citizen loses his nationality if he is convicted of committing any act of treason against or attempting to overthrow or bearing arms against the United States.

In his address to the Congress on the state of the Union, the President recommended the enactment of legislation to provide for the loss of nationality after a citizen has been convicted of conspiring to advocate the overthrow of this Government by force or violence. I am heartily in accord with that recommendation, and have so provided in my bill.

My study of this problem has convinced me, however, that not only is the existing law inadequate, but also, that the proposal of the President would leave loopholes in the law whereby citizens could be convicted of certain crimes which endangered our national defense and national security and still retain their citizenship with all its rights and privileges.

The rationale of this law is that a citizen who has been convicted of crimes of a treasonable or seditious nature no longer holds allegiance to the United States. Now on our statute books are several crimes in that category which are not included as grounds for loss of nationality, either in existing law or in the President's proposal. My bill includes all such crimes that are contained in title 18 of the United States Code.

I can find no logical basis to provide for loss of nationality for treason and not to so provide after a conviction for espionage or sabotage. A convicted spy, or traitor, or saboteur, or seditionary have beyond any doubt one quality in common and that is by their own voluntary acts they have demonstrated that they bear no allegiance to the Government of the United States. Therefore I believe that all such convicted traitors should suffer the same penalty so far as their nationality is concerned.

Thus, my bill provides for the loss of nationality by both native born or naturalized citizens upon conviction of any one of the following crimes: a violation of section 794, relating to the gathering or delivering of defense information to aid a foreign government, violation of sections 2153, 2154, 2155, 2156 which involve sabotage of war and defense materials, violation of section 2381, the crime of treason, of section 2383 relating to rebellion or insurrection, of section 2384 involving seditious conspiracy, of section 2385 advocating the overthrow of the Government by force or violence, violating sections 2387 or 2388 which relate to acts involving the morale, loyalty, and discipline of the Armed Forces.

A violation of each and every one of those sections of title 18 of the United States Code involves activities that are in and of themselves hostile and injurious to our Government. Those actions evince a criminal intent on the part of the perpetrators to betray the Government of the United States and so violates their allegiance to this Government. A combination of such acts and criminal intent can lead to but one conclusion, namely, that such a person has renounced his allegiance to the Government of the United States.

By requiring that the citizen must have been found guilty of one of these crimes by a court of competent jurisdiction before the additional penalty of loss of nationality can be imposed my bill adheres to those fundamental principles of American criminal jurisprudence such as a fair trial, the presumption of innocence, and all the other safeguards of a defendant's rights.

Under the provision of my bill the loss of nationality would be automatic after the conviction. By predicating the grounds for loss of nationality upon specific sections of title 18 of the United States Code any problems of unconstitutionality for vagueness or generality are obviated. Then, too, the need for any additional litigation is avoided.

There may be some who might question the constitutionality of this bill particularly as it applies to native-born citizens. The question is asked, "Does Congress possess the power to revoke the nationality of a native-born citizen?"

I have no fear in that regard. Under my bill Congress does not revoke the nationality of a native-born citizen, instead Congress merely recognizes the right of expatriation and defines the acts to effect it.

Congress recognized the right of expatriation in 1868: It is the voluntary renunciation or abandonment of nationality or allegiance to this Government that had been acquired at birth.

This doctrine of expatriation is not new to this Government. I refer to the Civil War Statute—Revised Statutes, section 1996—1865:

> All persons who deserted the military or naval service of the United States and did not return thereto or report themselves to a provost marshal within 60 days after the issuance of the proclamation by the President, dated March 11, 1865, are deemed to have voluntarily relinquished and forfeited their rights of citizenship, as well as the rights to become citizens and such deserters shall be forever incapable of holding any office of trust or profit under the United States, or of exercising any rights of citizens thereof.

In 1907 Congress enacted a general expatriation statute — Thirty-fourth United States Statutes at Large, page 1228. Today, section 349 (a), paragraphs 7, 8, 9, and 10, of the Immigration and Nationality Act provide for loss of nationality by such acts as the making of a formal written renunciation of nationality in time of war, desertion in time of war, acts of treason, or attempts to overthrow the United States by force or bearing arms against it and by departing from or remaining outside the jurisdiction of the United States in time of war or national emergency in order to avoid military service. The same acts were formerly found in the Nationality Act of 1940—title 8 United States Code, page 801.

If one keeps clearly in mind that the loss of nationality results from voluntary action of a renunciative nature by the citizen himself in conformity with applicable principles—and is not a revocation of nationality by Congress itself—the fear of unconstitutionality should abate.

Those criminals whose very crimes subvert their allegiance to our form of government and at the same time weaken our national security should forfeit the rights and privileges of the citizenship which they have betrayed. No avenue should be left open to them to pursue their schemes as citizens. All opportunity for them to pursue their subversive activities should be blocked.

My bill will effectuate such objectives with dispatch, under a procedure that is consistent with those rights and privileges conferred upon these traitors by the very Constitution and Government which they seek to destroy.

My bill is designed to preserve and protect the Government from the traitorous acts of those who seek to destroy it while at the same time it permits the self-destruction of the nationality—including the rights and privileges—of those who betray their allegiance to it.

Mr. REED of Illinois. Mr. Speaker, I hope that this legislation is passed and that we may have a unanimous vote. The Members of the House will certainly remember that when the President recommended the enactment of this legislation, we all responded with prolonged and vigorous applause. The President's recommendation was actually adopted by every one of us now and then.

Mr. Speaker, this country is now the prime target of the worldwide Communist conspiracy directed by a foreign power. Participants in this conspiracy have, by their mere participation in it, transferred their allegiance from the United States to Soviet Russia and they have by their own action forfeited their American nationality.

This legislation does not represent a problem entirely new in the field of our legislation pertaining to nationality. The basic concept of expatriation has been accepted by our laws and sustained by the highest courts of the land since 1868 and restated in every important enactment pertaining to nationality, such as the acts of 1907, 1940, and 1952. All of these statutes have been upheld

by the courts who have always recognized the power of Congress to provide the grounds for the forfeiture of United States nationality, whether acquired at birth or by naturalization. The basic decision in that field is the one entered in the case of *Perkins* v. *Elg* (307 U. S. 327). I may add, incidentally, that that decision was written by none other than Chief Justice Charles Evans Hughes.

Section 349 (a) of the Immigration and Nationality Act, which we are about to amend, provides in subdivision (9) that nationality shall be deemed to have been lost by native-born or naturalized citizens for committing any act of treason against the United States. By passing today H. R. 7130, as amended by the Committee on the Judiciary, the House would simply place the voluntary stooges of the international Communist conspiracy in the category of traitors to their own country. They are already in that category by the force of fact—let us place them there by the force of law.

Mr. Speaker, I want to clarify one misunderstanding. Very often this legislation has been referred to as providing for loss of citizenship. In this bill, we avoid using the word "citizenship" and we use the word "nationality." A man who loses his citizenship under the terms of a penal statute remains an American. He does not become an alien although he is not entitled to participate in political or other activities. However, a person who loses nationality under the Immigration and Nationality Act becomes an alien, not necessarily subject to deportation but an alien subject to all the rights and also to all the limitations that our laws impose on aliens.

To paraphrase the words of the President—let us recognize by law a fact that is plain to everybody—that when a citizen knowingly participates in the Communist conspiracy, he no longer holds allegiance to the United States.

Mr. GRAHAM. Mr. Speaker, I wish to add but a few words of explanation to what the distinguished chairman of our committee, the gentleman from New York [Mr. REED], has just said. It is necessary to stress that loss of nationality would occur under this bill only after conviction by court of proper jurisdiction, which means that the constitutional due-process clause would be fully complied with. Another question often raised in the public discussion of this legislation has been the problem of deportation of persons who would lose their nationality, not only in the event that this measure is enacted, but also under the existing law, namely, subdivisions (8), (9), and (10) of section 349 (a) of the Immigration and Nationality Act.

In this connection, I wish to inform the House as follows:

The bill under consideration does not provide for the deportation of persons who would become aliens by the operation of law. However, a similar measure pending now in the other body specifically provides that such persons should be deported from the United States, in accordance with sections 242 and 243 of the McCarran-Walter Act. Section 243, among other things, lists countries to which a deportable alien might be deported and also prescribes forms of supervision of a deportable alien. However, it is important to remember that a person who would lose nationality under this legislation, as we have it before us today, would not per se become deportable unless such person, following the loss of United States nationality, brings himself within the purview of the deportation statutes.

Mr. ROBSION of Kentucky. Mr. Speaker, the Eisenhower administration fully recognizes the danger to our national security of Communist activity and infiltration in the United States, and since assuming office on January 20 of last year has taken executive and legislative action to put an end to this evil.

Through the Federal Bureau of Investigation and Department of Justice, many traitors and subversives have been apprehended, tried, and convicted. Hundreds of security risks have been located and separated from their jobs in the Federal Government and in the Armed Forces. Most of this has been accomplished with little publicity and fanfare and without violating the rights provided by the Constitution for American citizens.

In addition to the successful efforts of the executive branch in eliminating subversives from the Federal Government, Congress has been active through its investigating and legislative committees in doing its part to provide the additional laws that may be required by the law-enforcement branch of the Government to complete the job of rooting out and punishing those who would destroy the country which has been so good to them. In this respect, the Attorney General has recommended to the Congress the enactment of several bills he feels are necessary in our fight against traitors and subversives. One of these bills was specifically referred to in the state of the Union address by President Eisenhower on January 7, at which time he asked the Congress to provide for the forfeiture of citizenship by those who seek to destroy us.

Several bills to carry out the recommendation of the President were introduced and referred to the House Committee on the Judiciary. One of these bills, H. R. 7130, introduced by me, was reported favorably by the unanimous vote of the House Judiciary Committee, and is the present subject of consideration by this body. And at this time I want to pay tribute to the careful consideration given this bill and the many other antitraitor bills by the members of Judiciary Subcommittee No. 1, and its distinguished chairman, Judge GRAHAM, of Pennsylvania. Also, I want to point out that much of the language in the bill now under consideration was taken by committee amendment from a similar bill introduced by the able and distinguished chairman of our House Judiciary Committee, the Honorable CHAUNCEY REED of Illinois.

H. R. 7130, before us, proposes to amend the Immigration and Nationality Act to provide for the loss of nationality of persons convicted of certain crimes involving conspiracy to commit treasonable acts against the United States.

There has been much confusion and misunderstanding in the news accounts and discussions of this matter. Much of the difficulty is caused by thinking and talking in terms of citizenship, instead of nationality. The term "citizenship" has different meanings and different connotations in the various States of the Union. But nationality, the broader term of which citizenship is a part, has a definite meaning in our Federal laws which does not differ from State to State. Citizenship can be easily lost and restored. For example, a person can lose his citizenship by being convicted of a felony which carries a sentence in a penitentiary. And, in Kentucky, the governor can restore citizenship to a person even though he may have lost it through conviction of a Federal offense. On the other hand, the loss of nationality is much more serious and is punishment more in keeping with the heinous crimes denounced in H. R. 7130. Even the President of the United States cannot restore lost nationality by Presidential pardon. It can only be restored by an act of Congress.

Section 349 of the Immigration and Nationality Act (66 Stat. 267, 8 U. S. C. 1481) provides that a person who is a national of the United States by birth or naturalization may lose his nationality after conviction by a court of competent jurisdiction in 1 of 10 ways. The bill before us would amend that section to provide the following additional grounds for loss of nationality:

First. Inciting or engaging in or conspiring to incite or engage in any rebellion against the United States or giving aid or comfort thereto;

Second. Violating the terms of section 2385 of title 18 of the United States Code, commonly referred to as the Smith Act; or

Third. Engaging in a conspiracy to overthrow, put down, or to destroy by force the Government of the United States, or to levy war against them.

We believe that the forfeiture of nationality, and the possibility of deportation for the treasonable acts and conspiracies denounced in this bill, will be a strong deterrent to those who may contemplate engaging in activities which would bring about the overthrow of the United States by force and violence. The possibility of a prison term if caught is not nearly as frightening to traitors as the possibility of a prison term and loss of all nationality privileges.

In addition to other punishments provided by existing law, this bill, if enacted, would provide additional punishment for traitors by taking away the rights and privileges of nationality and citizenship in this great free Nation which they seek to destroy.

We believe that the bill should be passed without a dissenting vote.

Mr. DONOHUE. Mr. Speaker, I urge and hope for unanimous approval of the House on this patriotic measure, now under consideration, providing for the forfeiture of citizenship of persons convicted of advocating or conspiring to advocate the overthrow of the United States Government by force or violence.

I am of course mindful of the basic constitutional guaranties of free speech

and peaceful assembly. We, and all other officers and agencies of government, are and should be vitally concerned in the preservation of these great democratic liberties for our individual citizens. Our entire judicial system and procedure is set up precisely to protect the innocent and prevent any prejudgment of the accused until proved guilty beyond reasonable doubt after trial by jury. These are among the traditional blessings of this great and free country, and God forbid us from ever abandoning them.

However the grant of a personal right does not carry with it the unlimited privilege of abuse, and perversion leading to the contradiction and repudiation of the original purpose of the right. That is the morality, as well as the patriotism, involved in this legislation.

We have documentary evidence that the Communist doctrine is pledged to the accomplishment of the subjugation of all free peoples and it is openly stated they will conspire to overthrow any government by force or violence if that becomes necessary to their objective.

The proof of this fanatical and immoral Communist determination to gradually enslave the free world through infiltration, false propaganda, fear, persecution, all types of devilish deception and finally by force is terribly clear on the face of the world today. Slowly and fiercely deliberate, they have stamped their tyrannical heel upon nation after nation all over the globe, suffocating the free spirit of ever-increasing millions of peoples.

America is the last and grandest prize in their plans. It has been too long obvious their intention and hope is to achieve our enslavement by the perverted use of the very freedoms and liberties we so proudly acclaim. How foolish we would be to continue to lend our assistance to their aims in that fashion.

The time has come to publicly and legally recognize the Communist scourge for what it really is: a menacing threat and persistent thrust at the heart of American freedom. The hour has come to impress upon the dreamers, the hesitators, the doubters, and the intentional enemies within, that we recognize the serious nature of this contest for survival.

There is no loyal American who is afraid to stand up and be counted. Nothing in this legislation will embarrass or infringe upon their rights. We must indeed dedicate ourselves to their protection by expelling from privileged citizenship those who use the cloak of freedom to make dagger strikes against our liberties. Let us, in this critical time, be extremely vigilant in safeguarding our security rather than permit, through misguided leniency, traitors to take destructive advantage of our democratic blessings. In that patriotic spirit let us enact this preserving legislation without further delay.

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include my statement supporting H. R. 7130 providing for a necessary change in our laws with respect to Communists.

There is no sane or plausible reason why anyone living here should plot to destroy our Government. For then he woud be destroying himself, killing opportunity, closing the door on those flexible means by which all individuals and groups have made great and visible progress because we are building upon the foundations of self-government and representative government.

How can people ever think of betraying freedom?

Because they are sick with the strange malady that can do so much harm to others as well as themselves. It is diagnosed as the fanatical fever of communism. How do they become its victims? In many ways. Perhaps through carelessness, not understanding the danger, as some unfortunates take to narcotics. Maybe their resistance was weak in the first place. Or possibly because they have a hidden and unsatisfied compulsion to revenge themselves upon others by dominating their lives.

Whether they are impractical and misguided idealists, or the type who are incapable of meeting freedom's responsibilities and must have others live their lives for them, or whether they lust for absolute power, the end result is the same—they are a menace to the security of the United States and a danger to all of its people.

Traitors and spies?

Inconceivable, you say.

Maintaining that they exist only in novels and movies or in some dusty pages of history.

So it was, until the Communist international conspiracy started its network throughout the world.

Reaching into confidential positions within our own Government, slanting policies so that they would work to our disadvantage, and stealing defense secrets for the enemy headquarters at Moscow.

Some have been apprehended, tried, convicted, and punished.

Others, having gone underground, continue their subversion.

There are a few calling themselves Americans who boldly avail themselves of the very constitutional protections they would eventually liquidate to hide their disloyalty. By this technicality they escape, but not without earning the contempt of all who are Americans not only in name, in spirit, and in conduct.

The Reds are diabolical and cunning.

Communists want American citizenship so that they can use the rights and protections its confers to continue, unhampered, in their conspiracy to weaken and overthrow the Government of the United States.

We have never been challenged by such "worming-in" tactics to weaken our domestic security before.

We must therefore enact new laws to put down this threat, to checkmate and eliminate those conditions which permit Communists to exploit our principles and our institutions for the purpose of betrayal.

We must close the loopholes.

We must deprive convicted Communists of any further opportunity to bore at us from within.

The most effective cloak used by these plotters who put loyalty to a foreign power above loyalty to the land they are pledged to defend is their United States citizenship.

They think we are so concerned about the appearance of freedom, its slogans instead of its substance, that we are paralyzed by words and incapable of taking those honest, just, and forthright steps to defend outselves from those who prefer to the enemy.

The issue is clear and compelling.

Communism is a deadly international conspiracy.

In dogma and in action it is committed to our destruction or enslavement.

No person can serve it in anyway and still pretend loyalty to the United States and to the principles for which it stands.

As far as we within the United States are concerned there is no possibility of coexistence.

When Red Russia was recognized by the United States it solemnly promised not to interfere in our internal affairs.

That pledge was cynical and utterly faithless, as subsequent events have proved time and again.

This mockery must end.

Treason and subversion have already weakened the power to defend ourselves from aggression. They have stolen vital military secrets. They have been responsible for the loss of American lives.

As representatives of the people of the United States it is our duty to pass laws, and to check up on the enforcement of laws, designed to protect the public from those dangers that they cannot combat themselves.

There are signs that the people are not satisfied with present security measures.

They believe that more vigorous action, consistent with our basic beliefs, is not only advisable but imperative.

They are worried by the extent of Communist activity which assumes that the Constitution grants it "the freedom to destroy."

And they insist that we strike at the very center of this Communist deceit by stripping convicted Communists of the citizenship that they employ to undermine our sovereignty as a people and as a nation.

Article 3, section 3, of the Constitution expressly declares that "treason against the United States, shall consist only in levying war against them, or, in adhering to their enemies, giving them aid and comfort."

It also provides that "the Congress shall have the power to declare the punishment of treason."

To the end that the techniques used by communism to take over other democracies by subversion shall not prevail here the House of Representatives approved in Judiciary Committee last week H. R. 7130. Under its provisions, anyone convicted of conspiring to overthrow the Government would thereby forfeit the honor and the privileges of United States citizenship.

At last we are waking up to the danger and are taking effective measures to eliminate it.

H. R. 7130 is but the start of a program to protect our Nation from the enemies within.

The get-tough policy is the only way to squelch Communist treachery.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

The title was amended so as to read: "A bill to amend the Immigration and Nationality Act to provide for the loss of nationality of persons convicted of certain crimes."

AMENDING THE MINERAL LEASING ACT OF FEBRUARY 25, 1920

Mr. MILLER of Nebraska. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2380) to amend the Mineral Leasing Act of February 25, 1920, as amended.

The Clerk read as follows:

Be it enacted, etc., That the act of February 25, 1920, as amended (30 U. S. C. 226), is further amended as follows:

(1) Strike out the second paragraph of section 17 and insert the following language in lieu thereof:

"Any lease issued under this act which is subject to termination by reason of cessation of production shall not terminate if within 60 days after production ceases, reworking or drilling operations are commenced on the land under lease and are thereafter conducted with reasonable diligence during such period of nonproduction. No lease issued under the provisions of this act shall expire because operations or production is suspended under any order, or with the consent, of the Secretary of the Interior. No lease issued under the provisions of this act covering lands on which there is a well capable of producing oil or gas in paying quantities shall expire because the lessee fails to produce the same, unless the lessee is allowed a reasonable time, but not less than 60 days after notice by registered mail, within which to place such well on a producing status: *Provided*, That after such status is established production shall continue on the leased premises unless and until suspension of production is allowed by the Secretary of the Interior under the provisions of this act."

(2) Srike out the third paragraph of section 17 and insert in lieu thereof:

"Upon the expiration of the initial 5-year term of any noncompetitive lease maintained in accordance with applicable statutory requirements and regulations, the record titleholder thereof shall be entitled to a single extension of the lease, unless then otherwise provided by law, for such lands covered by it as are not on the expiration date of the lease withdrawn from leasing under this section. A withdrawal, however, shall not affect the right to an extension if actual drilling operations on such lands were commenced prior to such withdrawal becoming effective and were being diligently prosecuted on such expiration date. No withdrawal shall be effective within the meaning of this section until 90 days after notice thereof shall be sent by registered mail, to each lessee to be affected by such withdrawal. A noncompetitive lease, as to lands not within the known geologic structure of a producing oil or gas field, shall be extended for a period of 5 years and so long thereafter as oil or gas is produced in paying quantities. A noncompetitive lease, as to lands within the known geologic structure of a producing oil or gas field, shall be extended for a period of 2 years and so long thereafter as oil or gas is produced in paying quantities. Any noncompetitive lease extended under this paragraph shall be subject to the rules and regulations in force at the expiration of the initial 5-year term of the lease. No extension shall be granted, however, unless within a period of 90 days prior to such expiration date an application therefor is filed by the record titleholder or an assignee whose assignment has been filed for approval, or an operator whose operating agreement has been filed for approval."

(3) Strike out the fifth paragraph of section 17 and insert the following language in lieu thereof:

"Whenever it appears to the Secretary of the Interior that lands owned by the United States are being drained of oil or gas by wells drilled on adjacent lands, he is hereby authorized and empowered to negotiate agreements whereby the United States, or the United States and its lessees, shall be compensated for such drainage, such agreements to be made with the consent of the lessees affected thereby, and the primary term including any extensions thereof of any lease for which compensatory royalty is being paid shall be extended for the period during which such compensatory royalty is paid and for a period of 1 year from discontinuance of such payment and so long thereafter as oil or gas is produced in paying quantities: *Provided*, That the Secretary of the Interior shall report to Congress at the beginning of each regular session, all such agreements entered into during the previous year which involve unleased Government lands."

(4) Strike out the second sentence of the fourth paragraph of section 17 (b) and insert in lieu thereof the following language: "Any other lease issued under any section of this act which has heretofore or may hereafter be committed to any such plan that contains a general provision for allocation of oil or gas, shall continue in force and effect as to the land committed, so long as the lease remains subject to the plan: *Provided*, That production is had in paying quantities under the plan prior to the expiration date of the term of such lease. Any lease hereafter committed to any such plan embracing lands that are in part within and in part outside of the area covered by any such plan shall be segregated into separate leases as to the lands committed and the lands not committed as of the effective date of unitization: *Provided, however*, That any such lease as to the nonunitized portion shall continue in force and effect for the term thereof but for not less than 2 years from the date of such segregation and so long thereafter as oil or gas is produced in paying quantities."

(5) Strike out the words "and regardless of acreage limitations provided for in this act," in the fifth paragraph of section 17 (b) and insert the following sentence at the end of that paragraph: "All leases operated under such approved operating, drilling, or development contracts, and interests thereunder, shall be excepted in determining holdings or control under the provisions of any section of this act."

(6) Strike out the last sentence of section 30 (a) and insert the following in lieu thereof: "Assignments under this section may also be made of parts of leases which are in their extended term because of any provision of this act. The segregated lease of any undeveloped lands shall continue in full force and effect for 2 years and so long thereafter as oil or gas is produced in paying quantities."

(7) Insert the following sentence immediately after the second paragraph of section 31: "Notwithstanding the provisions of this section, however, upon failure of a lessee to pay rental on or before the anniversary date of the lease, for any lease on which there is no well capable of producing oil or gas in paying quantities, the lease shall automatically terminate by operation of law; *Provided, however*, That when the time for payment falls upon any day in which the proper office for payment is not open, payment may be received the next official working day and shall be considered as timely made."

The SPEAKER. Is a second demanded?

Mr. ASPINALL. Mr. Speaker, there is no second demanded.

The SPEAKER. The question is on suspending the rules and passing the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

TO PROMOTE DEVELOPMENT OF OIL AND GAS ON THE PUBLIC DOMAIN

Mr. MILLER of Nebraska. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2381) to amend section 27 of the Mineral Leasing Act of February 25, 1950, as amended, in order to promote the development of oil and gas on the public domain.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 27 of the act of February 25, 1920, as amended (30 U. S. C. 184), is further amended as follows:

(1) Strike out all of the language preceding the semicolon of the second sentence of section 27, and insert the following in lieu thereof: "No person, association, or corporation, except as herein provided, shall take or hold at one time oil or gas leases exceeding in the aggregate 46,080 acres granted hereunder in any one State, except that in the Territory of Alaska no person, association, or corporation, except as herein provided, shall take or hold at one time oil or gas leases exceeding in the aggregate 100,000 acres granted hereunder;".

(2) Strike out sentences 5 and 6 of section 27 and insert the following in lieu thereof: "The interest of an optionee under a nonrenewable option to purchase or otherwise acquire one or more oil or gas leases (whether then or thereafter issued), or any interest therein, shall not, prior to the exercise of such option, be a taking or holding or control under the acreage limitations provisions of any section of this act. No such option shall be entered into for a period of more than 3 years, without the prior approval of the Secretary of the Interior, and no person, association, or corporation shall hold at one time such options of more than two hundred thousand acres in any one State.".

The SPEAKER. Is a second demanded?

Mr. ASPINALL. Mr. Speaker, there is no second demanded.

The SPEAKER. The question is on suspending the rules and passing the bill, S. 2381.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

FEDERAL AID FOR SUPPORT OF DISABLED SOLDIERS, SAILORS, AND AIRMEN OF THE UNITED STATES

Mrs. ROGERS of Massachusetts. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 8180) to increase the amount of Federal aid to State or Territorial homes for the support of disabled soldiers, sailors, and airmen of the United States.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act to provide aid to State or Territorial homes for the support of disabled soldiers and sailors of the United States," approved August 27, 1888, as amended (U. S. C. 1946 edition, title 24, sec. 134), is amended by striking out in the first paragraph thereof "$500 per annum from the effective date of this amendment through June 30, 1956, and $300 per annum thereafter" and inserting in lieu thereof "$700 per annum from the effective date of this amendment."

SEC. 2. The amendment made by this act shall apply to payments with respect to the care given to disabled soldiers, sailors, and airmen on and after the first day of the month next following the month during which this act is enacted: *Provided*, That said payments shall be made regardless of whether said veteran may be receiving domiciliary care or hospitalization in said home and the appropriations of the Veterans' Administration for medical, hospital, and domiciliary care shall be available for this purpose: *Provided further*, That no such payment to a State or Territory shall be made until the Administrator of Veterans' Affairs determines that the veteran, on whose account such payment is requested, is eligible for such care in a Veterans' Administration facility, and after such determination of eligibility such payment shall be made covering the period of eligibility from the date such care commenced, except that no such payment shall be made effective prior to the date of receipt by the Veterans' Administration of an appropriate request for determination of eligibility in the case of any eligible veteran with respect to whom such request is not received within 10 days following the date such care commenced.

Mrs. ROGERS of Massachusetts. The purpose of this bill is to increase from $500 to $700 a year the Federal aid to States for the support of veterans domiciled or hospitalized in State homes who are eligible for such care in Veterans' Administration hospitals or domiciliaries.

At the present time the rate is $500 per year and is restricted to June 30, 1956. This bill would increase the rate to $700 a year and make this latter rate permanent.

It should be pointed out, however, that no contribution shall exceed half of the cost to the States, or a maximum of $700. Thus if the maximum cost in one State is $1,000, the total amount which the Veterans' Administration would pay would be $500.

This legislation has a long and honorable history. The first contribution was authorized by the act of August 27, 1888. The program has always worked well, and I am sure that the enactment of this proposal will provide another step forward in this program.

A total of 31 State homes in 27 States now receive contributions from the Veterans' Administration for veterans who are hospitalized there.

I ask to insert at this point a list of the homes now in operation throughout the country and other pertinent data which has been supplied to the committee.

Hearings were held on this bill on March 2 and it was unanimously reported by the committee.

On the item of cost, the Veterans' Administration estimates that it will cost approximately $6,090,000 for the fiscal year 1955.

The gentleman from New York, General KEARNEY, the able chairman of the Subcommittee on Hospitals, has been most helpful in this matter and I wish to express my appreciation to him.

I hope, Mr. Speaker, that this matter may be speedily enacted into law.

The SPEAKER. Is a second demanded?

Mr. MATTHEWS. Mr. Speaker, there is no second demanded on this bill. The minority party unanimously favors the passage of this bill.

The SPEAKER. The question is on the motion to suspend the rules and pass the bill.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

NATIONAL DEFENSE RESERVE OF TANKERS

Mr. TOLLEFSON submitted a conference report and statement on the bill (S. 2408) to amend the Merchant Marine Act, 1936, to provide a national defense reserve of tankers and to promote the construction of new tankers, and for other purposes.

AUTHORIZING SECRETARY OF COMMERCE TO SELL CERTAIN WAR-BUILT PASSENGER-CARGO VESSELS

Mr. TOLLEFSON. Mr. Speaker, I call up the conference report on the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2298)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment and the House agree to the same.

THOR C. TOLLEFSON,
JOHN J. ALLEN, Jr.,
JOHN H. RAY,
HERBERT C. BONNER,
JOHN F. SHELLEY,
Managers on the Part of the House.

JOHN M. BUTLER,
CHARLES E. POTTER,
WARREN G. MAGNUSON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the joint resolution (H. J. Res. 534) to authorize the Secretary of Commerce to sell certain war-built passenger-cargo vessels, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommend in the accompanying conference report:

The Senate amendment would require the purchaser to pay interest charges twice, i. e., 3½ percent for the duration of the charter and also would require the payment of 3½ percent interest from April 1, 1954, on a vessel it does not own. The Senate recedes.

THOR C. TOLLEFSON,
JOHN J. ALLEN, JR.,
JOHN H. RAY,
HERBERT C. BONNER,
JOHN F. SHELLEY,
Managers on the Part of the House.

The conference report was agreed to, and a motion to reconsider was laid on the table.

HOSPITAL AND HEALTH FACILITIES FOR INDIANS

Mr. MILLER of Nebraska submitted a conference report and statement on the bill (H. R. 303) to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes.

FOSTER CREEK DIVISION, CHIEF JOSEPH DAM PROJECT, WASHINGTON

Mr. MILLER of Nebraska. Mr. Speaker, I call up the conference report on the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek Division of the Chief Joseph Dam project, Washington, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (REPT. No. 2274)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate and agree to the same with an amendment as follows: In lieu of the matter inserted by the Senate insert the following: "That, as an initial step in supplementing the Act of July 17, 1952 (Public Law 577, Eighty-second Congress), and in order to provide water for the irrigation of approximately six thousand acres of land along the Columbia and

Okanogan Rivers in the vicinity of Chief Joseph Dam, Washington, the Secretary of the Interior is authorized to construct, operate, and maintain the Foster Creek division of the Chief Joseph Dam project substantially in accordance with the report of the Secretary of the Interior dated January 7, 1954, and printed as House Document numbered 374, Eighty-third Congress.

"SEC. 2. In the construction, operation and maintenance of the Foster Creek division, the Secretary shall be governed by the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) except that (a) the period provided in subsection (d), section 9, of the Reclamation Project Act of 1939 (53 Stat. 1187), for repayment of construction costs properly chargeable to any block of lands and assigned to be repaid by the irrigators may be extended to fifty years, exclusive of a development period, from the time water is first delivered to that block or to as near that number of years as is consistent with the adoption and operation of a variable payment formula as hereinafter provided; (b) any repayment contract entered into may provide that the amounts to be paid annually thereunder shall be determined in accordance with a formula, mutually agreeable to the parties, which reflects economic conditions pertinent to the irrigators' payment capacity; and (c) all construction costs which are beyond the ability of the irrigators to repay as hereinbefore provided shall be charged to, and returnable to the reclamation fund from, net revenues derived from the sale of power from the Chief Joseph Dam project which are over and beyond those required to amortize the power investment in said project and to return interest on the unamortized balance thereof. Power and energy required for irrigation pumping for the Foster Creek division authorized shall be made available by the Secretary from the Chief Joseph Dam powerplant and other Federal plants interconnected therewith at rates not to exceed the cost of such power and energy from the Chief Joseph Dam taking into account all costs of the dam, reservoir, and powerplant which are determined by the Secretary under the provisions of the Federal reclamation laws to be properly allocable to such irrigation pumping power and energy.

"SEC. 3. Reports on additional reclamation units in the vicinity of the Chief Joseph Dam project proposed to be constructed as units of the project shall be submitted by the Secretary from time to time in accordance with the provisions of the Act of July 17, 1952, supra.

"SEC. 4. There are hereby authorized to be appropriated out of any moneys in the Treasury not otherwise appropriated, $4,798,000 plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in the cost of said type of construction without endangering the economic feasibility of the Foster Creek division of the Chief Joseph Dam project, Washington."

And agree to the same.

WESLEY A. D'EWART,
JOHN J. RHODES,
CRAIG HOSMER,
CLAIR ENGLE,
WAYNE N. ASPINALL,
Managers on the Part of the House.

GUY CORDON,
EUGENE D. MILLIKIN,
G. C.
ARTHUR V. WATKINS,
CLINTON P. ANDERSON,
H. M. J.
HENRY M. JACKSON,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 4854) to authorize the Secretary of the Interior to construct, operate, and maintain the irrigation works comprising the Foster Creek division of the Chief Joseph Dam project, Washington, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report, namely:

The amendments of the Senate to H. R. 4854 were not of a major character and no difficulty was experienced in reaching agreement. The action agreed upon and recommended leaves H. R. 4854, as it passed the House, unchanged with respect to the works authorized to be constructed and the operation of and repayment plan for such works.

WESLEY A. D'EWART,
JOHN J. RHODES,
CRAIG HOSMER,
CLAIR ENGLE,
WAYNE N. ASPINALL,
Managers on the Part of the House.

The conference report was agreed to, and a motion to reconsider was laid on the table.

MULTIPLE MINERAL DEVELOPMENT

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3344) to amend the mineral leasing laws to provide for multiple mineral development of the same tracts of the public lands, and for other purposes, with a House amendment thereto, insist on the House amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. WHARTON, D'EWART, DAWSON of Utah, YOUNG, ENGLE, ASPINALL, and Mrs. PFOST.

CONTRIBUTION OF ATOMIC ENERGY TO MEDICINE

Mr. SCHENCK. Mr. Speaker, by direction of the Committee on House Administration, I submit a privileged resolution (H. Con. Res. 257) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed for the use of the Joint Committee on Atomic Energy 10,000 additional copies of the hearings relative to the contribution of atomic energy to medicine, held by the said joint committee during the current Congress.

The concurrent resolution was agreed to, and a motion to reconsider was laid on the table.

APPOINTMENT OF CERTAIN OFFICERS OF REGULAR NAVY AND MARINE CORPS

Mr. ARENDS submitted a conference report and statement on the bill (H. R. 6725) to reenact the authority for the appointment of certain officers of the Regular Navy and Marine Corps.

AUTHORIZING APPOINTMENT OF MAJ. GEN. FRANK H. PARTRIDGE, UNITED STATES ARMY RETIRED TO CIVILIAN POSITION

Mr. ARENDS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 9804) to authorize the appointment in a civilian position in the Department of Justice of Maj. Gen. Frank H. Partridge, United States Army, retired, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That notwithstanding the provisions of section 2 of the act of July 31, 1894 (28 Stat. 205), as amended (5 U. S. C. 62), or any other provision of law, Maj. Gen. Frank H. Partridge, United States Army, retired, may be appointed to and accept and hold a civilian position in the Department of Justice.

SEC. 2. Major General Partridge's appointment to, and acceptance and holding of, a civilian position in the Department of Justice shall in no way affect any status, office, rank, or grade he may occupy or hold as a retired officer in the United States Army, or any emolument, perquisite, right, privilege, or benefit incident to or arising out of any such status, office, rank, or grade: *Provided, however*, That during his incumbency in a civilian position in the Department of Justice he shall receive the compensation appertaining to such position in lieu of the retired pay to which he is entitled as a retired officer of the Army: *Provided, further*, That upon the termination of such civilian employment the payment of his retired pay shall be resumed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONSTRUCTION OF NAVAL VESSELS

Mr. ARENDS. Mr. Speaker, I call up the conference report on the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2275)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes, having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate numbered 2 and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted

by the Senate amendment insert the following: "To the extent that any ships authorized under this Act are constructed in private shipyards, such contract shall be awarded to the lowest responsible bidder insofar as national security requirements will permit and such award is practical, and is not inconsistent with the provisions of the Armed Services Procurement Act of 1947 or the Act of March 27, 1934 (ch. 95, 48 Stat. 503), as amended."

And the Senate agree to the same.

LESLIE C. ARENDS,
J. P. S. DEVEREUX,
CARL VINSON,
Managers on the Part of the House.

LEVERETT SALTONSTALL,
STYLES BRIDGES,
RICHARD B. RUSSELL,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8571) to authorize the construction of naval vessels, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

LEGISLATION IN CONFERENCE

On May 20, 1954, the House passed H. R. 8571, a bill to authorize the construction of naval vessels, and for other purposes. On June 9, 1954, the Senate considered the House bill and amended it in two respects.

The first amendment would have required that all contracts for the construction of ships in private shipyards pursuant to the act would be awarded to the lowest responsible bidder, so far as national security requirements would permit and such award was practical. This amendment was modified by the addition of a provision that this limitation would obtain only so far as such would not be inconsistent with the provision of the Armed Services Procurement Act of 1947 or the act of March 27, 1934, known as the Vinson-Trammel Parity Act. Thus, the House receded with an amendment.

The second amendment related to the act of August 8, 1950 (64 Stat. 420), wherein it was authorized that appropriations might be made to carry out the purposes of that act, but not in a sum to exceed $350 million. It later developed that the ship construction authorized by that act could not be carried out within that limitation and in the House version of H. R. 8571 the limitation was raised to $500 million. The Senate reduced this amount to $450 million. The House receded.

LESLIE C. ARENDS,
J. P. S. DEVEREUX,
CARL VINSON,
Managers on the Part of the House.

Mr. ARENDS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The conference report was agreed to and a motion to reconsider was laid on the table.

SPECIAL COMMITTEE TO INVESTIGATE CAMPAIGN EXPENDITURES OF CANDIDATES FOR HOUSE OF REPRESENTATIVES

Mr. NICHOLSON. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 439) providing for the appointment of a special committee of the House of Representatives to investigate the campaign expenditures of the various candidates for the House of Representatives, and for other purposes, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That a special committee of five Members be appointed by the Speaker of the House of Representatives to investigate and report to the House not later than January 3, 1955, with respect to the following matters:

1. The extent and nature of expenditures made by all candidates for the House of Representatives in connection with their campaign for nomination and election to such office.

2. The amounts subscribed, contributed, or expended, and the value of services rendered, and facilities made available (including personal services, use of advertising space, radio and television time, office space, moving-picture films, and automobile and other transportation facilities) by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, to or on behalf of each such candidate in connection with any such campaign or for the purpose of influencing the votes cast or to be cast at any convention or election held in 1954 to which a candidate for the House of Representatives is to be nominated or elected.

3. The use of any other means or influence (including the promise or use of patronage) for the purpose of aiding or influencing the nomination or election of any such candidates.

4. The amounts, if any, raised, contributed, and expended by any individual, individuals, or group of individuals, committee, partnership, corporation, or labor union, including any political committee thereof, in connection with any such election, and the amounts received by any political committee from any corporation, labor union, individual, individuals, or group of individuals, committee, or partnership.

5. The violations, if any, of the following statutes of the United States:

(a) The Federal Corrupt Practices Act.

(b) The act of August 2, 1939, as amended, relating to pernicious political activities, commonly referred to as the Hatch Act.

(c) The provisions of section 304, Public Law 101, 80th Congress, chapter 120, first session, referred to as the Labor Management Relations Act, 1947.

(d) Any statute or legislative act of the United States or of the State within which a candidate is seeking nomination or reelection to the House of Representatives, the violation of which Federal or State statute, or statutes, would affect the qualification of a Member of the House of Representatives within the meaning of article I, section 5, of the Constitution of the United States.

6. Such other matters relating to the election of Members of the House of Representatives in 1954, and the campaigns of candidates in connection therewith, as the committee deems to be of public interest, and which in its opinion will aid the House of Representatives in enacting remedial legislation, or in deciding contests that may be instituted involving the right to a seat in the House of Representatives.

7. The committee is authorized to act upon its own motion and upon such information as in its judgment may be reasonable or reliable. Upon complaint being made to the committee under oath, by any person, candidate, or political committee, setting forth allegations as to facts which, under this resolution, it would be the duty of said committee to investigate, the committee shall investigate such charges as fully as though it were acting upon its own motion, unless, after a hearing upon such complaint, the committee shall find that the allegations in such complaint are immaterial or untrue. All hearings before the committee, and before any duly authorized subcommittee thereof, shall be public, and all orders and decisions of the committee, and of any such subcommittee shall be public.

For the purpose of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized to hold such public hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the 83d Congress, to employ such attorneys, experts, clerical, and other assistants, to require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, and to take such testimony as it deems advisable. Subpenas may be issued under the signature of the chairman of the committee or any subcommittee, or by any member designated by such chairman and may be served by any person designated by any such chairman or member.

8. The committee is authorized and directed to report promptly any and all violations of any Federal or State statutes in connection with the matters and things mentioned herein to the Attorney General of the United States in order that he may take such official action as may be proper.

9. Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default, or who having appeared, refuses to answer any question pertinent to the investigation heretofore authorized, shall be held to the penalties prescribed by law.

That said committee is authorized and directed to file interim reports whenever in the judgment of the majority of the committee, or of a subcommittee conducting portions of said investigation, the public interest will be best served by the filing of said interim reports, and in no event shall the final report of said committee be filed later than January 3, 1955, as hereinabove provided.

The SPEAKER. Under the rule, the gentleman is recognized for 1 hour.

Mr. NICHOLSON. Mr. Speaker, I yield one-half the time to the gentleman from Virginia [Mr. SMITH].

Mr. Speaker, this resolution would provide for the appointment of a special committee of the House of Representatives to investigate the campaign expenditures of the various candidates for the House of Representatives, and for other purposes.

Mr. Speaker, House Resolution 439 is the usual resolution that we adopt in an election year and as a matter of fact the language of the resolution before us today is identical with the language contained in House Resolution 558 of the 82d Congress.

At that time a rather full discussion of the merits of the wording of this resolution took place, and it was generally conceded that as long as the spirit and intent implicit in this resolution was wisely recognized and followed that the provisions contained in it were satisfactory.

I hope that the House will adopt the resolution and thus provide for the appointment of this special committee.

Mr. Speaker, this is the usual resolution that is passed in every election year and we have to do it.

Mr. SMITH of Virginia. Mr. Speaker, however regrettable it may be, I agree with the gentleman from Massachussetts [Mr. NICHOLSON] that we have to do it. It is the usual thing. There is no use pursuing the matter any further.

Mr. NICHOLSON. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to, and a motion to reconsider was laid on the table.

VOCATIONAL REHABILITATION AMENDMENTS OF 1954

Mr. McCONNELL. Mr. Speaker, I call up the conference report on the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes; and I ask unanimous consent that the statement be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2286)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following: "That this Act may be cited as the 'Vocational Rehabilitation Amendments of 1954.'

"AMENDMENTS TO THE VOCATIONAL REHABILITATION ACT

"SEC. 2. The Vocational Rehabilitation Act (29 U. S. C. ch. 4) is amended to read as follows:

"'AUTHORIZATION OF APPROPRIATIONS FOR GRANTS; PURPOSES FOR WHICH AVAILABLE

"'SECTION 1. For the purpose of assisting the States in rehabilitating physically handicapped individuals so that they may prepare for and engage in remunerative employment to the extent of their capabilities, thereby increasing not only their social and economic well-being but also the productive capacity of the Nation, there are hereby authorized to be appropriated for the fiscal year ending June 30, 1955, the sum of $30,000,000, for the fiscal year ending June 30, 1956, the sum of $45,000,000, for the fiscal year ending June 30, 1957, the sum of $55,000,000, for the fiscal year ending June 30, 1958, the sum of $65,000,000, and for each fiscal year thereafter such sums as Congress may determine, for grants to carry out the purposes of this Act. The sums so appropriated for any fiscal year shall be available for—

"'(1) grants to States under section 2 to assist them in meeting the costs of vocational rehabilitation services;

"'(2) grants to States under section 3 to assist them in initiating projects for the extension and improvement of their vocational rehabilitation services; and

"'(3) grants to States and to public and other nonprofit organizations and agencies under section 4 to assist in meeting the costs of projects for research, demonstrations, training, and traineeships, and special projects, which hold promise of making a substantial contribution to the solution of vocational rehabilitation problems common to a number of States, including temporary assistance in initiating a substantial nationwide expansion of vocational rehabilitation programs in the States.

The portion of such sums which shall be available for each of such three types of grants shall be specified in the Act appropriating such sums, except that the first $23,000,000 of the aggregate sums so appropriated for any fiscal year shall be available for grants to States under section 2 to assist them in meeting the costs of vocational rehabilitation services.

"'GRANTS TO STATES FOR VOCATIONAL REHABILITATION SERVICES

"'SEC. 2. (a) (1) From the sums available for any fiscal year for grants to States to assist them in meeting the costs of vocational rehabilitation services, each State shall be entitled to an allotment of an amount which bears the same ratio to such sums as the product of (A) the population of the State and (B) the square of its allotment percentage (as defined in section 11 (h)) bears to the sum of the corresponding products for all the States.

"'(2) The allotment to any State for any fiscal year, as computed under the provisions of paragraph (1), which is less than such State's base allotment, shall, notwithstanding such provisions, be increased to the amount of such base allotment.

"'(3) For the purposes of this section, a State's base allotment is an amount equal to the amount allotted to such State for expenditures, under its State plan approved under this Act, for the fiscal year ending June 30, 1954 (which, in the case of the District of Columbia, shall be the amount appropriated to the Secretary for such fiscal year for providing rehabilitation services in the District of Columbia), increased by a uniform percentage which, if applied to the amounts so allotted to all the States, would increase the total of such allotments to $23,000,000.

"'(4) The allotment to any State, as computed under the provisions of paragraph (1) for any fiscal year, which is greater than such State's base allotment by a percentage in excess of one and one-half times the percentage by which the sums available for allotments under this section for such year exceed $23,000,000, shall be reduced by the amount of such excess.

"'(5) Sums equal to the reduction effected under paragraph (4) for any fiscal year shall be added to the allotments of other States as computed under paragraph (1) for such year as follows:

"'(A) The allotment of any State as so computed which is less than such State's base allotment, shall be increased to the amount of such base allotment.

"'(B) The remainder of such sums shall be used to increase by a uniform percentage the allotment of each of the State whose allotments were not subject to reduction under paragraph (4), but with such adjustments as may be necessary to prevent the allotment of any of such States from being so increased as to require reduction under paragraph (4).

"'(b) (1) From each State's allotment under this section for any fiscal year ending after June 30, 1962, the Secretary shall pay to such State an amount equal to the Federal share (determined as provided in section 11 (i)) of the cost of vocational rehabilitation services under the plan for such State approved under section 5, including expenditures for the administration of the State plan.

"'(2) From each State's allotment under this section for any fiscal year ending prior to July 1, 1962, the Secretary shall make payments to such State, with respect to the cost of vocational rehabilitation services under the plan of such State approved under section 5, including expenditures for the administration of the State plan, determined as follows:

"'(A) A portion of such allotment equal to the State's base allotment shall be available for payments to such State of its adjusted Federal share of such cost of vocational rehabilitation services.

"'(B) After such portion has been paid in full, any remaining portions of a State's allotment shall be available for payment to such State of an amount equal to its Federal share (determined as provided in section 11 (i)) of such cost for which payments have not been made under subparagraph (A).

"'(3) For the purposes of this subsection—

"'(A) a State's adjusted Federal share for any fiscal year means—

"'(i) in the case of any fiscal year ending prior to July 1, 1959, the 1954 Federal share for such State; and

"'(ii) in the case of the fiscal year ending June 30, 1960, June 30, 1961, or June 30, 1962, the Federal share for such State for such year increased (if it is less than such State's 1954 Federal share) or decreased (if it is greater than such State's 1954 Federal share) by 75 percentum, 50 percentum, and 25 percentum, respectively, of the difference between such Federal share for the year involved and the 1954 Federal share.

"'(B) A State's 1954 Federal share means the percentage which (i) the base allotment of such State is of (ii) the sum of such allotment and the amount of 1954 State funds.

"'(C) The 1954 State funds for any State shall be the amount of State and other non-Federal funds available for expenditures, under such State's plan approved under this Act, for the fiscal year ending June 30, 1954, as estimated by the Secretary for purposes of determining such State's allotment for such year for such expenditures, except that the 1954 State funds for the District of Columbia shall be the amount appropriated for such fiscal year out of the general fund of the District of Columbia for vocational rehabilitation.

"'(c) If in any State there is, during the fiscal year ending June 30, 1954, a State agency administering or supervising the administration of the part of the State plan under which vocational rehabilitation services are provided for the blind, separate from the State agency administering or supervising the administration of the remainder of the State plan—

"'(1) for each consecutive fiscal year during which there are such separate agencies, the portion of such State's allotment which is equal to such State's base allotment shall be divided between the two agencies in the same proportion as the amount allotted to the State under this Act for expenditures during the fiscal year ending June 30, 1954, was divided between such agencies;

"'(2) for each such consecutive fiscal year ending prior to July 1, 1962, separate Federal shares shall be established for such agencies for purposes of subsection (b) (2), and for such purposes—

"'(A) the 1954 Federal share for each shall be the percentage which (i) the portion of the State's allotment for the fiscal year ending June 30, 1954, which was made available to each, is of (ii) the portion of the sum of such allotment and the amount of 1954 State funds available to each for expenditures, under the State plan approved under this Act, during such year; and

"'(B) the portion of the allotment referred to in subsection (b) (2) (A) for each shall be the portion of the State's allotment

allocated to each pursuant to paragraph (1) of this subsection.

"'GRANTS TO STATES FOR EXTENSION AND IMPROVEMENT PROJECTS

"'SEC. 3. (a) (1) From the sums available for any fiscal year for grants to States to assist them in initiating projects for the extension and improvement of vocational rehabilitation services, each State shall be entitled to an allotment of an amount bearing the same ratio to such sums as the population of such State bears to the population of all the States. The allotment to any State under the preceding sentence for any fiscal year which is less than $5,000 (or such other amount as may be specified as a minimum allotment in the Act appropriating such sums for such year) shall be increased to that amount, the total of the increases thereby required being derived by proportionately reducing the allotments to each of the remaining States under the preceding sentence, but with such adjustments as may be necessary to prevent the allotment of any of such remaining States from being thereby reduced to less than that amount.

"'(2) From each State's allotment under this section for any fiscal year, the Secretary shall pay to such State a portion of the cost of approved projects for the extension and improvement of vocational rehabilitation services (including their administration) under the State plan. The Secretary shall approve any project for purposes of this section only if the plan of such State approved under section 5 includes such project or is modified to include it and only if he finds the project constitutes an extension or improvement of vocational rehabilitation services under the State plan or will contribute materially to such an extension or improvement.

"'(b) Payments under this section with respect to any project may be made for a period of not to exceed three years beginning with the commencement of the first fiscal year for which any payment is made with respect to such project from an allotment under this section. To the extent permitted by the State's allotment under this section, such payments with respect to any project shall be equal to 75 per centum of the cost of such project, except that, at the request of the State, such payments may be less than such percentage of the cost of such project.

"'(c) No payment may be made from an allotment under this section with respect to any cost with respect to which any payment is made under section 2.

"'GRANTS FOR SPECIAL PROJECTS

"'SEC. 4. (a) From the sums available therefor for any fiscal year, the Secretary shall make grants to States and public and other non-profit organizations and agencies (1) for paying part of the cost of projects for research, demonstrations, training, and traineeships, and projects for the establishment of special facilities and services, which, in the judgment of the Secretary, hold promise of making a substantial contribution to the solution of vocational rehabilitation problems common to all or several States, and (2) for planning, preparing for, and initiating, during the fiscal year ending June 30, 1955, and the fiscal year ending June 30, 1956, a substantial nationwide expansion of vocational rehabilitation programs in the States. No grant shall be made under clause (1) or clause (2) of this subsection for furnishing to an individual any one course of study extending for a period in excess of two years. Any grant of funds under this subsection which will be used for direct services to physically handicapped individuals or for establishing facilities which will render direct services to such individuals must have the prior approval of the appropriate State agency.

"'(b) The Secretary shall be authorized to cooperate in assisting with the financing of a pilot demonstration rehabilitation center in the metropolitan Washington area to be used as a guide for rehabilitation centers which may be set up later in other parts of the country. Sums made available for such a pilot demonstration center in the Washington area may be used during such initial period as the Secretary may determine for such services as hospitalization, domiciliary care, and rehabilitation training, including costs of board and room of trainees and other services essential to the program, as in the discretion of the Secretary deems desirable. The services of such a pilot demonstration rehabilitation center in the metropolitan Washington area shall be made available to area civil service employees as well as to other patients.

"'(c) Payments under this section may be made in advance or by way of reimbursement for services performed and purchases made, as may be determined by the Secretary; and shall be made on such conditions as the Secretary finds necessary to carry out the purposes of this section.

"'(d) (1) There is hereby established in the Department of Health, Education, and Welfare a National Advisory Council on Vocational Rehabilitation, consisting of the Secretary, or his designee, who shall be Chairman, and twelve members appointed without regard to civil-service laws by the Secretary. The twelve appointed members shall be leaders in fields concerned with vocational rehabilitation or in public affairs, and six of such twelve shall be selected from leading medical, educational, or scientific authorities who are outstanding for their work in the vocational rehabilitation of physically handicapped individuals. Three of the twelve appointed members shall be persons who are themselves physically handicapped. Each appointed member of the Council shall hold office for a term of four years, except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor is appointed shall be appointed for the remainder of such term and except that, of the members first appointed, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. None of such twelve members shall be eligible for reappointment until a year has elapsed after the end of his preceding term.

"'(2) The Council is authorized to review applications for special projects submitted to the Secretary under this section and recommend to the Secretary for grades under this section any such projects or any projects initiated by it which it believes show promise of making valuable contributions to the vocational rehabilitation of physically handicapped individuals. The Secretary is authorized to utilize the services of any member or members of the Council in connection with matters relating to the administration of this section, for such periods, in addition to conference periods, as he may determine.

"'(3) Appointed members of the Council, while attending meetings of the Council or while otherwise serving at the request of the Secretary, shall be entitled to receive compensation at a rate to be fixed by the Secretary, but not exceeding $50 per diem, and shall also be entitled to receive an allowance for actual and necessary traveling and subsistence expenses while so serving away from their places of residence.

"'(4) The Secretary shall transmit to the Congress annually a report concerning the special projects initiated under this section, the recommendations of the National Advisory Council on Vocational Rehabilitation, and any action taken with respect to such recommendations.

"'STATE PLANS

"'SEC. 5. (a) To be approvable under this Act, a State plan for vocational rehabilitation services shall—

"'(1) designate the State agency administering or supervising the administration of vocational education in the State, or a State rehabilitation agency (primarily concerned with vocational rehabilitation), as the sole State agency to administer the plan, or to supervise its administration in a political subdivision of the State by a sole local agency of such political subdivision, except that where under the State's law the State blind commission, or other agency which provides assistance or services to the adult blind, is authorized to provide them vocational rehabilitation services, such State blind commission or other State agency may be designated as the sole State agency to administer the part of the plan under which vocational rehabilitation services are provided for the blind (or to supervise the administration of such part in a political subdivision of the State by a sole local agency of such political subdivision) and the State vocational education agency or the State rehabilitation agency shall be designated as the sole State agency with respect to the rest of the State plan;

"'(2) provide that the head of the vocational rehabilitation bureau, division, or other unit of a State vocational education agency designated pursuant to paragraph (1), shall be subject only to the supervision and direction of such agency or its executive officer;

"'(3) provide for financial participation by the State, and provide that the plan shall be in effect in all political subdivisions of the State;

"'(4) show the plan, policies, and methods to be followed in carrying out the work under the State plan and in its administration and supervision, and in case vocational rehabilitation services cannot be provided all eligible physically handicapped individuals who apply for such services, show the order to be followed in selecting those to whom vocational rehabilitation services will be provided;

"'(5) provide such methods of administration, other than methods relating to the establishment and maintenance of personnel standards, as are found by the Secretary to be necessary for the proper and efficient administration of the plan;

"'(6) contain (A) provisions relating to the establishment and maintenance of personnel standards, including provisions relating to the tenure, selection, appointment, and qualifications of personnel, and (B) provisions relating to the establishment and maintenance of minimum standards governing the facilities and personnel utilized in the provision of vocational rehabilitation services, but the Secretary shall exercise no authority with respect to the selection, method of selection, tenure of office, or compensation of any individual employed in accordance with such provisions;

"'(7) provide that, in addition to training, maintenance, placement, and guidance, physical restoration services will be provided under the plan;

"'(8) provide that the State agency will make such reports, in such form and containing such information, as the Secretary may from time to time reasonably require to carry out his functions under this Act, and comply with such provisions as he may from time to time find necessary to assure the correctness and verification of such reports;

"'(9) provide for cooperation by the State agency with, and the utilization of the services of, the State agency administering the State's public assistance program, and the Bureau of Old-Age and Survivors Insurance (Department of Health, Education, and Welfare) and of other Federal, State, and

local public agencies providing services relating to vocational rehabilitation services;

"'(10) provide for entering into cooperative arrangements with the system of public employment offices in the State and the maximum utilization of the job placement and employment counseling services and other services and facilities of such offices; and

"'(11) provide that vocational rehabilitation services provided under the State plan shall be available to any civil employee of the United States disabled while in the performance of his duty on the same terms and conditions as apply to other persons.

"'(b) The Secretary shall approve any plan which the Secretary finds fulfills the conditions specified in subsection (a) of this section.

"'(c) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of the State plan approved under this section, finds that—

"'(1) the plan has been so changed that it no longer complies with the requirements of subsection (a) of this section; or

"'(2) in the administration of the plan there is a failure to comply substantially with any such provision;

the Secretary shall notify such State agency that no further payments will be made to the State under section 2 or 3 (or, in his discretion, that further payments will not be made to the State for projects under or parts of the State plan affected by such failure), until he is satisfied that there is no longer any such failure. Until he is so satisfied the Secretary shall make no further payments to such State under section 2 or 3 (or shall limit payments to projects under or parts of the State plan in which there is no such failure).

"'(d) If any State is dissatisfied with the Secretary's action under subsection (c) of this section, such State may appeal to the United States district court for the district where the capital of such State is located and judicial review of such action shall be on the record in accordance with the provisions of the Administrative Procedure Act.

"'METHOD OF COMPUTING AND MAKING PAYMENTS

"'SEC. 6. The method of computing and paying amounts pursuant to section 2 or 3 shall be as follows:

"'(1) The Secretary shall, prior to the beginning of each calendar quarter or other period prescribed by him, estimate the amount to be paid to each State under the provisions of such section for such period, such estimate to be based on such records of the State and information furnished by it, and such other investigation, as the Secretary may find necessary.

"'(2) The Secretary shall pay, from the allotment available therefor, the amount so estimated by him for such period, reduced or increased, as the case may be, by any sum (not previously adjusted under this paragraph) by which he finds that his estimate of the amount to be paid the State for any prior period under such section was greater or less than the amount which should have been paid to the State for such prior period under such section. Such payments shall be made prior to audit or settlement by the General Accounting Office, shall be made through the disbursing facilities of the Treasury Department, and shall be made in such installments as the Secretary may determine.

"'ADMINISTRATION

"'SEC. 7. (a) In carrying out his duties under this Act, the Secretary shall—

"'(1) make studies, investigations, demonstrations, and reports with respect to abilities, aptitudes, and capacities of physically handicapped individuals, development of their potentialities, and their utilization in gainful and suitable employment;

"'(2) cooperate with and render technical assistance to States in matters relating to the vocational rehabilitation of physically handicapped individuals;

"'(3) provide short-term training and instruction in technical matters relating to vocational rehabilitation services, including the establishment and maintenance of such research fellowships and traineeships, with such stipends and allowances (including travel and subsistence expenses), as he may deem necessary, except that no such training or instruction (or fellowship or scholarship) shall be provided any individual for any one course of study for a period in excess of two years; and

"'(4) disseminate information as to the studies, investigations, demonstrations, and reports referred to in paragraph (1) and other matters relating to vocational rehabilitation services, and otherwise promote the cause of rehabilitation of physically handicapped individuals and their greater utilization in gainful and suitable employment.

"'(b) The Secretary is authorized to make rules and regulations governing the administration of this Act, and to delegate to any officer or employee of the United States such of his powers and duties, except the making of rules and regulations, as he finds necessary in carrying out the purposes of this Act.

"'PROMOTION OF EMPLOYMENT OPPORTUNITIES

"'SEC. 8. The Secretary of Labor and the Secretary of Health, Education, and Welfare shall cooperate in developing, and in recommending to the appropriate State agencies, policies and procedures which will facilitate the placement in employment of handicapped individuals who have received rehabilitation services under State vocational rehabilitation programs, and, together with the chairman of the President's Committee on Employment of the Physically Handicapped, shall develop and recommend methods which will assure maximum utilization of services which that committee, and cooperating State and local organizations, are able to render in promoting job opportunities for such individuals.

"'REPORTS

"'SEC. 9. Annual reports shall be made to the Congress by the Secretary as to the administration of this Act.

"'AUTHORIZATION OF APPROPRIATION FOR ADMINISTRATION

"'SEC. 10. There are hereby authorized to be included for each fiscal year in the appropriations for the Department of Health, Education, and Welfare such sums as are necessary to administer the provisions of this Act.

"DEFINITIONS

"'SEC. 11. For the purposes of this Act—

"'(a) The term "vocational rehabilitation services" means diagnostic and related services (including transportation) incidental to the determination of eligibility for and the nature and scope of services to be provided; training, guidance and placement services for physically handicapped individuals; and, in the case of any such individual found to require financial assistance with respect thereto, after full consideration of his eligibility for any similar benefit by way of pension, compensation, and insurance, any other goods and services necessary to render such individual fit to engage in a remunerative occupation (including remunerative homebound work), including the following physical restoration and other goods and services—

"'(1) corrective surgery or therapeutic treatment necessary to correct or substantially modify a physical or mental condition which is stable or slowly progressive and constitutes a substantial handicap to employment, but is of such a nature that such correction or modification may reasonably be expected to eliminate or substantially reduce such handicap within a reasonable length of time;

"'(2) necessary hospitalization in connection with surgery or treatment specified in paragraph (1);

"'(3) such prosthetic devices as are essential to obtaining or retaining employment;

"'(4) maintenance, not exceeding the estimated cost of subsistence, during rehabilitation;

"'(5) tools, equipment, initial stocks and supplies (including equipment and initial stocks and supplies for vending stands), books, and training materials, to any or all of which the State may retain legal title; and

"'(6) transportation (except where necessary in connection with determination of eligibility or nature and scope of services) and occupational licenses.

"'Such term also includes—

"'(7) the acquisition of vending stands or other equipment and initial stocks and supplies for use by severely handicapped individuals in any type of small business the operation of which will be improved through management and supervision by the State agency; and

"'(8) the establishment of public and other nonprofit rehabilitation facilities to provide services for physically handicapped individuals and the establishment of public and other nonprofit workshops for the severely handicapped.

"'(b) The term "physically handicapped individual" means any individual who is under a physical or mental disability which constitutes a substantial handicap to employment, but which is of such a nature that vocational rehabilitation services may reasonably be expected to render him fit to engage in a remunerative occupation.

"'(c) The term "rehabilitation facility" means a facility operated for the primary purpose of assisting in the rehabilitation of physically handicapped individuals—

"'(1) which provides one or more of the following types of services:

"'(A) testing, fitting, or training in the use of prosthetic devices;

"'(B) prevocational or conditioning therapy;

"'(C) physical or occupational therapy;

"'(D) adjustment training; or

"'(E) evaluation or control of special disabilities; or

"'(2) through which is provided an integrated program of medical, psychological, social, and vocational evaluation and services under competent professional supervision: *Provided*, That the major portion of such evaluation and services is furnished within the facility and that all medical and related health services are prescribed by, or are under the formal supervision of, persons licensed to practice medicine or surgery in the State.

"'(d) The term "workshop" means a place where any manufacture or handiwork is carried on and which is operated for the primary purpose of providing remunerative employment to severely handicapped individuals who cannot be readily absorbed in the competitive labor market.

"'(e) The term "nonprofit", when used with respect to a rehabilitation facility or a workshop, means a rehabilitation facility and a workshop, respectively, owned and operated by a corporation or association, no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual and the income of which is exempt from taxation under section 101 (6) of the Internal Revenue Code.

"'(f) Establishment of a workshop or rehabilitation facility means—

"'(1) in the case of a workshop, the expansion, remodeling, or alteration of existing buildings, necessary to adapt such buildings to workshop purposes or to increase the employment opportunities in workshops,

and the acquisition of initial equipment necessary for new workshops or to increase the employment opportunities in workshops; and

"'(2) in the case of a rehabilitation facility, the expansion, remodeling, or alteration of existing buildings, and initial equipment of such buildings, necessary to adapt such buildings to rehabilitation facility purposes or to increase their effectiveness for such purposes (subject, however, to such limitations as the Secretary may by regulations prescribe in order to prevent impairment of the objectives of, or duplication of, other Federal laws providing Federal assistance to States in the construction of such facilities) and initial staffing thereof (for a period not exceeding one year).

"'(g) The term "State" includes Alaska, the District of Columbia, Hawaii, the Virgin Islands, and Puerto Rico, and for purposes of section 4, includes also Guam.

"'(h) (1) The "allotment percentage" for any State shall be 100 per centum less that percentage which bears the same ratio to 50 percentum as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the allotment percentage shall in no case be more than 75 per centum or less than 33⅓ per centum, and (B) the allotment percentage for Hawaii shall be 50 per centum, and the allotment percentage for Alaska, Puerto Rico, and the Virgin Islands shall be 75 per centum.

"'(2) The allotment percentages shall be promulgated by the Secretary between July 1 and August 31 of each even-numbered year, on the basis of the average of the per capita incomes of the States and of the continental United States for the three most recent consecutive years for which satisfactory data are available from the Department of Commerce. Such promulgation shall be conclusive for each of the two fiscal years in the period beginning July 1 next succeeding such promulgation: *Provided*, That the Secretary shall promulgate such percentages as soon as possible after the enactment of the Vocational Rehabilitation Amendments of 1954, which promulgation shall be conclusive for the three fiscal years in the period ending June 30, 1957.

"'(i) The "Federal share" for any State for any fiscal year (other than the fiscal year ending June 30, 1954) shall be 100 per centum less that percentage which bears the same ratio to 40 percentum as the per capita income of such State bears to the per capita income of the continental United States (excluding Alaska), except that (A) the Federal share shall in no case be more than 70 per centum or less than 50 per centum, and (B) the Federal share for Hawaii and Alaska shall be 60 per centum, and the Federal share for Puerto Rico and the Virgin Islands shall be 70 per centum. In computing the Federal share of a State for a year, the Secretary shall use the same figures for per capita incomes of the States and of the United States as he used in computing the allotment percentage of such State for such year.

"'(j) The population of the several States shall be determined on the basis of the latest figures furnished by the Department of Commerce.

"'(k) The term "Secretary", except when the context otherwise requires, means the Secretary of Health, Education, and Welfare.

"'TRANSITION PROVISIONS

"'SEC. 12. (a) In the case of any State which, immediately prior to July 1, 1954, was carrying on a vocational rehabilitation program under a State plan approved under this Act, such State plan shall be deemed to be a State plan approved under section 5 of this Act until (1) the Secretary finds, after reasonable notice and opportunity for a hearing to the State agency, that such plan has been so changed that it no longer complies with any provision required to be included in such plan under this Act as in effect prior to the enactment of the Vocational Rehabilitation Amendments of 1954, or in the administration of such plan there is a failure to comply substantially with any such provision, or (2) the plan is superseded by a plan approved under section 5 of this Act, or (3) July 1, 1955, whichever occurs first.

"'(b) Sums appropriated for grants to States for the fiscal year ending June 30, 1955, pursuant to the Vocational Rehabilitation Act in effect prior to the enactment of the Vocational Rehabilitation Amendments of 1954 (including the portion of sums made available to the Secretary for rehabilitation services in the District of Columbia) shall be deemed to have been made available for grants to States under section 2 of this Act. Payments made from such sums to a State prior to the enactment of the Vocational Rehabilitation Amendments of 1954 (including payments made from such sums before or after such enactment for vocational rehabilitation services in the District of Columbia) shall be deemed to have been paid under this Act from the State's allotment under such section 2.

"'SHORT TITLE

"'SEC. 13. This Act may be cited as the "Vocational Rehabilitation Act."'

"VOCATIONAL REHABILITATION PROGRAM IN THE DISTRICT OF COLUMBIA

"SEC. 3. (a) The personnel, property, and records which the Director of the Bureau of the Budget determines relate primarily to the provisions of vocational rehabilitation services in the District of Columbia or the performance of functions of a State licensing agency under the Act of June 20, 1936 (20 U. S. C., ch. 6A), shall be transferred, within ninety days after the enactment of this Act, from the Department of Health, Education, and Welfare to the municipal government of the District of Columbia for use in providing such services and performing such functions in the District of Columbia.

"(b) The Board of Commissioners of the District of Columbia is hereby authorized, within available appropriations and allotted funds, to take such action as may be necessary to secure for the District of Columbia the benefits of the Vocational Rehabilitation Act, as amended by this Act, and the Act of June 20, 1936 (20 U. S. C., ch. 6A).

"(c) Notwithstanding anything to the contrary in section 2 or any other provision of this Act, the Secretary of Health, Education, and Welfare is authorized to continue the performance of functions relating to the provision of vocational rehabilitation services in the District of Columbia and to use appropriations available therefor until completion of the transfer provided in subsection (a) in like manner as such functions were being performed and appropriations used by such Secretary immediately prior to the enactment of this Act.

"AMENDMENTS TO THE RANDOLPH-SHEPPARD VENDING STAND ACT

"SEC. 4. (a) The first section of the Act entitled 'An Act to authorize the operation of stands in Federal buildings by blind persons, to enlarge the economic opportunities of the blind, and for other purposes', approved June 20, 1936, as amended (20 U. S. C., sec. 107), is amended to read as follows: 'That for the purpose of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and stimulating the blind to greater efforts in striving to make themselves self-supporting, blind persons licensed under the provisions of this Act shall be authorized to operate vending stands on any Federal property where such vending stands may be properly and satisfactorily operated by blind persons. In authorizing the operation of vending stands on Federal property, preference shall be given, so far as feasible, to blind persons licensed by a State agency as provided in this Act; and the head of each department or agency in control of the maintenance, operation, and protection of Federal property shall, after consultation with the Secretary, and with the approval of the President, prescribe regulations designed to assure such preference (including assignment of vending machine income to achieve and protect such preference) for such licensed blind persons without unduly inconveniencing such departments and agencies or adversely affecting the interests of the United States.'

"(b) (1) Section 2 (a) of such Act of June 30, 1936, as amended (20 U. S. C., sec. 107a), is amended by striking out 'in Federal and other buildings' where it appears in paragraph (1) and inserting in lieu thereof 'on Federal and other property', and by amending paragraph (4) to read as follows:

"'(4) Designate as provided in section 3 of this Act the State commission for the blind in each State, or, in any State in which there is no such commission, some other public agency to issue licenses to blind persons who are citizens of the United States and at least twenty-one years of age for the operating of vending stands on Federal and other property in such State for the vending of newspapers, periodicals, confections, tobacco products, articles dispensed automatically or in containers or wrapping in which they are placed before receipt by the vending stand, and such other articles as may be approved for each property by the department or agency in control of the maintenance, operation, and protection thereof and the State licensing agency in accordance wih the regulations prescribed pursuant to the first section: *Provided*, That (A) effective four years after the enactment of the Vocational Rehabilitation Amendments of 1954, in any State having an approved plan for vocational rehabilitation pursuant to the Vocational Rehabilitation Act, the licensing agency to be designated hereunder shall be the State agency designated pursuant to section 5 (a) (1) of such Act as the sole State agency with respect to vocational rehabilitation of the blind; and (B) prior to such time, no license shall be granted except upon certification by a vocational rehabilitation agency that the individual is qualified to operate a vending stand.'

"(2) Paragraph (5) of such subsection is amended by inserting ', including the issuance of rules and regulations,' after 'steps'.

"(c) Section 2 (b) of such Act of June 20, 1936, as amended, is amended by striking out the third sentence thereof.

"(d) Section 2 (c) of such Act of June 20, 1936, as amended, is amended to read as follows:

"'(c) The State licensing agency designated by the Secretary is authorized, with the approval of the head of the department or agency in control of the maintenance, operation, and protection of the Federal property on which the stand is to be located but subject to regulations prescribed pursuant to the first section, to select a location for such stand and the type of stand to be provided.'

"(e) Section 3 of such Act of June 20, 1936, as amended (20 U. S. C., sec. 107b), is amended to read as follows:

"'SEC. 3. A State commission for the blind or other State agency desiring to be designated as the licensing agency shall, with the approval of the chief executive of the State, make application to the Secretary and agree—

"'(1) to cooperate with the Secretary in carrying out the purpose of this Act;

"'(2) to provide for each licensed blind person such vending stand equipment, and adequate initial stock of suitable articles to

be vended therefrom, as may be necessary: *Provided, however,* That such equipment and stock may be owned by the licensing agency for use of the blind, or by the blind individual to whom the license is issued: *And provided further,* That if ownership of such equipment is vested in the blind licensee, (A) the State licensing agency shall retain a first option to repurchase such equipment and (B) in the event such individual dies or for any other reason ceases to be a licensee or transfers to another vending stand, ownership of such equipment shall become vested in the State licensing agency (for transfer to a successor licensee) subject to an obligation on the part of the State licensing agency to pay to such individual (or to his estate) the fair value of his interest therein as later determined in accordance with regulations of the State licensing agency and after opportunity for a fair hearing.

"'(3) that if any funds are set aside, or caused to be set aside, from the proceeds of the operation of the vending stands such funds shall be set aside, or caused to be set aside, only to the extent necessary for and may be used only for the purposes of (A) maintenance and replacement of equipment; (B) the purchase of new equipment; (C) management services; and (D) assuring a fair minimum return to operators of vending stands: *Provided, however,* That in no event shall the amount of such funds to be set aside from the proceeds of any vending stand exceed a reasonable amount which shall be determined by the Secretary;

"'(4) to make such reports in such form and containing such information as the Secretary may from time to time require and to comply with such provisions as he may from time to time find necessary to assure the correctness and verification of such reports;

"'(5) to issue such regulations, consistent with the provisions of this Act, as may be necessary for the operation of this program;

"'(6) to provide to any blind licensee dissatisfied with any action arising from the operation or administration of the vending stand program an opportunity for a fair hearing'."

"(f) Section 6 of such Act of June 20, 1936, as amended (20 U. S. C., sec. 107e), is amended by adding at the end thereof the following new subsections:

"'(d) The term "Federal property" means any building, land, or other real property owned, leased, or occupied by any department or agency of the United States or any instrumentality wholly owned by the United States, or by any department or agency of the District of Columbia or any Territory or possession of the United States.

"'(e) The term "Secretary" means the Secretary of Health, Education, and Welfare.'"

"(g) Such Act of June 20, 1936, as amended, is amended by renumbering section 7 as section 8, and by inserting immediately after section 6 the following new section:

"'SEC. 7. In the case of any State which, immediately prior to July 1, 1954, was performing the functions of a State licensing agency pursuant to an application for designation approved under this Act, such application shall be deemed to be an application approved under section 3 of this Act, as amended by the Vocational Rehabilitation Amendments of 1954, until (1) the Secretary finds, after reasonable notice and opportunity for a hearing to the State licensing agency, that the provisions contained in such application have been changed so that it no longer complies with any provisions required to be included in such application under this Act, as in effect prior to July 1, 1954, or that in the administration of the program there is a failure to comply substantially with any such provision, or (2) the application is superseded by an application approved under section 3 of this Act after July 1, 1954, or (3) July 1, 1955, whichever first occurs.'

"PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE PHYSICALLY HANDICAPPED

"SEC. 5. The joint resolution entitled 'Joint resolution authorizing an appropriation for the work of the President's Committee on National Employ the Physically Handicapped Week', approved July 11, 1949 (63 Stat. 409), is amended by striking out '$75,000' and inserting in lieu thereof '$225,000'.

"UNITED STATES EMPLOYMENT SERVICES

"SEC. 6. (a) The first sentence of subsection (a) of section 3 of the Act of June 6, 1933, as amended (29 U. S. C., sec. 49b), is hereby amended by inserting after 'gainful occupations' the following: 'including employment counseling and placement services for handicapped persons'.

"(b) Section 8 of such Act, as amended (29 U. S. C., sec. 49g), is further amended by inserting after the first sentence thereof a new sentence to read as follows: 'Such plans shall include provision for the promotion and development of employment opportunities for handicapped persons and for job counseling and placement of such persons, and for the designation of at least one person in each State or Federal employment office, whose duties shall include the effectuation of such purposes.'

"HOMEBOUND PHYSICALLY HANDICAPPED INDIVIDUALS

"SEC. 7. The Secretary of Health, Education, and Welfare shall make a thorough study of existing programs for teaching and training handicapped persons, commonly known as shut-ins, whose disabilities confine them to their homes or beds, for the purpose of ascertaining whether additional or supplementary programs or services are necessary, particularly in rural areas, in order to provide adequate general ameliorative and vocational training for such handicapped persons. The Secretary shall report to the Congress not later than six months after the date of enactment of this Act the results of such study, together with such recommendations as may be desirable.

"EFFECTIVE DATE

"SEC. 8. The amendments made by this Act shall become effective July 1, 1954."

And the House agree to the same.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2759) to amend the Vocational Rehabilitation Act so as to promote and assist in the extension and improvement of vocational rehabilitation services, provide for a more effective use of available Federal funds, and otherwise improve the provisions of that act, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment strikes out all of the Senate bill after the enacting clause. Except for the changes discussed below, and minor, technical, and conforming changes, the agreement reached in conference is the same as the House amendment.

AUTHORIZATION OF APPROPRIATIONS

The Senate bill authorized the appropriation of such sums as the Congress determines for grants to carry out the purposes of the act. The House bill provided authorizations in terms of specific dollar figures as follows: $30,000,000 for fiscal 1955; $45,000,000 for fiscal 1956; $55,000,000 for fiscal 1957; and $65,000,000 for fiscal 1958 and each fiscal year thereafter. The conference agreement is the same as the House amendment, except that for fiscal years after 1958 the amendment authorizes the appropriation of such sums as the Congress may determine.

FINANCING PROVISIONS

Both the Senate bill and the House amendment contained provisions designed to assure each State that it would receive out of any year's Federal appropriation an allotment of Federal funds at least equal to the amount it received during the fiscal year 1954, and to assure each State that in order to earn this "base allotment" it would not have to increase its 1954 expenditures from State or local funds. The Senate bill limited this assurance to a 5-year period while the House amendment would have extended it indefinitely into the future.

The conference substitute, like the House amendment, gives permanent assurance to each State that its allotment of Federal funds out of any year's Federal appropriations will never fall below its "base allotment," but adopts the matching provisions of the Senate bill. Under these matching provisions, for a 5-year period each State's Federal-State matching ratio on the portion of its allotment equal to its "base allotment" will be the same as its Federal-State matching ratio in 1954. Over the next 3 years (fiscal 1960, 1961, and 1962) this ratio will be adjusted gradually upward and downward, 25 percent a year, to the Federal-State matching ratio that applies to the portion of its allotment which exceeds its 1954 or "base allotment." During and after fiscal 1963 each State will have a single Federal-State matching ratio computed in the manner described below which will apply to its entire allotment of Federal funds for any year.

Both the Senate bill and the House amendment based their new formulas for Federal-State matching of funds in excess of the base allotments on the matching formula in the Hill-Buton Hospital Survey and Construction Act, under which the Federal-State matching ratios varied inversely with the per capita income of each State. Under the Senate bill the Federal ratio in a State with a per capita income exactly equal to the national per capita income would have been 55 percent; that is, 55 percent Federal and 45 percent State. Under the House amendment, the Federal share in such a State would have been 62 percent (62 percent Federal and 38 percent State). The conference substitute provides for a Federal share of 60 percent in the State whose per capita income exactly equals the national per capita income. As under both the Senate bill and House amendment, the maximum and minimum Federal shares are 10 percent above and below the Federal share of the 60 percent State, resulting in a maximum of 70 percent and a minimum of 50 percent.

In all other respects the conference substitute follows the allotment and matching provisions in the House amendment in the case of section 2 grants.

GRANTS FOR EXTENSION AND IMPROVEMENT PROJECTS

Both the Senate bill and the House amendment provided that from sums available in any fiscal year for such purposes, grants would be made to States to assist them in initiating projects for the extension and improvement of their vocational

rehabilitation services each State being entitled to an allotment based on population, but not less than $5,000 for any one State. However, the Senate bill provided that payments with respect to any such project would be equal to 75 percent of the cost of the project for the first biennium, 50 percent of the cost for the second biennium, and 25 percent of the cost for the third biennium, whereas the House amendment provided that payments with respect to any such project would be equal to 75 percent of the cost of the project for a period not to exceed 2 years. The conference agreement provides that payments with respect to such projects shall be equal to 75 percent of the cost of the project for a period of not to exceed 3 years.

PILOT DEMONSTRATION REHABILITATION CENTER

The Senate bill contained a provision, not included in the House amendment, authorizing the Secretary to cooperate in assisting with the financing of a pilot demonstration rehabilitation center in the metropolitan Washington area. It was provided that sums made available for the center could not exceed $1,000,000 a year. This provision is retained in the conference substitute, with one change. The change deletes the provision that sums made available for the center could not exceed $1,000,000 a year, and inserts in lieu thereof a provision that sums made available for the center may be used during such initial period as the Secretary may determine. The inclusion of specific authority for this project is not intended to imply that the Secretary lacks authority to grant similar assistance for comparable projects located in other areas.

NATIONAL ADVISORY COUNCIL ON VOCATIONAL REHABILITATION

The Senate bill established a National Advisory Council on Vocational Rehabilitation to advise the Secretary in connection with special projects under the act. The Council would consist of the Secretary and 12 members appointed by the Secretary from among leaders in fields concerned with vocational rehabilitation or in public affairs, 6 of whom would be required to be leading medical, educational, or scientific authorities who are outstanding for their work in the vocational rehabilitation of handicapped individuals. Three of the twelve would be required to be persons who are themselves physically handicapped.

The House amendment contained no corresponding provision.

The conference substitute adopts the provisions of the Senate bill establishing the Advisory Council.

It is the desire of the conferees that in making appointments to the Advisory Council the Secretary should give appropriate recognition to representatives of both labor and management.

TRAINING OF PERSONNEL

The Senate bill, in section 4 (a), provided that among the purposes for which special project grants might be made is that of paying part of the cost of training and traineeships. The Senate bill also provided, in section 8 (a) (3), that the Secretary should provide such short-term training and instruction in technical matters relating to vocational rehabilitation services, including the establishment and maintenance of such research fellowships and traineeships, as he might deem necessary. In both instances the House amendment limited this authority so that it could not be exercised after June 30, 1956. The House amendment further limited such authority by providing that no special project grant could be made for the purpose of providing training or traineeship for any individual for a period exceeding 12 months, and that the Secretary could not provide an individual any training or instruction (or fellowship or scholarship) for a period in excess of 1 year. The conference substitute is the same as the Senate bill, except that under it no training, traineeship, or instruction (or fellowship or scholarship) could be provided any individual for any one course of study extending for a period in excess of 2 years.

UTILIZATION OF EXISTING STATE AGENCIES

The Senate bill provided that to be approvable a State plan must provide, among other things, for cooperation by the State agency with, and the utilization of the services of, the State agency administering the State's public assistance program, the Bureau of Old-Age and Survivors Insurance of the Department of Health, Education, and Welfare, and of other Federal, State, and local agencies providing services relating to vocational rehabilitation services. The House amendment required that the plan provide for cooperation with those agencies, including the State workmen's compensation agency, and that it provide for utilization of the services of such agencies insofar as practicable.

The conference agreement adopts the Senate provisions because of the stronger language relating to the utilization of other agencies. The omission of reference to the State workmen's compensation agency should not be construed as showing an intention on the part of the conferees to preclude cooperation with and the utilization of this agency. The conferees believe that the general language of the Senate provision adequately covers this agency to the extent that it provides services relating to vocational rehabilitation and that specific reference to it is unnecessary.

CAPITAL ADVANCES FOR VENDING STAND OPERATORS

The House amendment provided in the definition of "vocational rehabilitation services" for the advancing of working capital, in amounts not to exceed $500, to licensed vending stand operators. No comparable provision was included in the Senate bill. The House recedes.

TRANSFER OF DISTRICT OF COLUMBIA REHABILITATION PROGRAM TO DISTRICT GOVERNMENT

Both the Senate bill and the House amendment provided for the transfer, within 90 days following enactment of the bill, of the District of Columbia vocational rehabilitation program from the Department of Health, Education, and Welfare (which now operates it) to the municipal government of the District of Columbia. The conference substitute contains similar provisions but with perfecting amendments designed to clarify the application of the base allotment and matching provisions to the District, and to assure the uninterrupted operation of the program by the Department of Health, Education, and Welfare during the interim period of 90 days or less, between the enactment of the bill and the completion of the transfer arrangements.

AMENDMENTS TO RANDOLPH-SHEPPARD ACT

The House amendment contained extensive amendments to the Randolph-Sheppard Act for the purpose of providing blind persons with remunerative employment, enlarging the economic opportunities of the blind, and generally improving the vending stand programs in the States. An amendment in the Senate bill provided that preference for the installation and/or operation of vending machines within Federal buildings should be given to blind operators of vending stands within such buildings.

The Senate accepted the House amendments to the Randolph-Sheppard Act, with the exception of one which provided that if any funds are set aside from the proceeds of the operation of the vending stands for the purpose of assuring a fair minimum return to operators of vending stands, such funds could be used for this purpose only for a period of not to exceed 1 year following (1) the date of approval of the State's application submitted under the bill, or (2) the initial establishment of the stand, whichever occurs later. With respect to this amendment the conference agreement provided that if funds are set aside for the purpose of assuring a fair minimum return to operators of vending stands, no time limits with respect to the use of the funds should be imposed.

HOMEBOUND HANDICAPPED INDIVIDUALS

The House amended the Senate bill so as to provide for an appropriation of $5,000,000 for the fiscal year ending July 1, 1955, and $2,000,000 annually thereafter, to be used for making grants, upon recommendation of the State agency, to local school boards and local nonprofit educational groups providing special services to the handicapped, for the purpose of providing general ameliorative and vocational training to handicapped persons, commonly known as shut-ins, whose disabilities confine them to their homes or beds. At least 20 percent of the grants would be required to be made in rural areas.

In lieu of this provision, the conference agreement, in section 7, provides for a study to be made of existing programs for teaching and training these individuals, for the purpose of ascertaining whether additional or supplementary programs or services are necessary, particularly in rural areas, in order to provide general ameliorative and vocational training to these persons. The Secretary is required to report to the Congress within 6 months after date of enactment of the bill the results of the study, together with any appropriate recommendations.

WORKSHOPS

Another subject which was discussed by the conference committee was the definition of the term "workshop." The committee was in agreement that the workshops to be aided under the bill are those which are operated principally as facilities for preparing handicapped persons for employment in the competitive labor market, or for providing interim remunerative employment for handicapped individuals for whom no other employment opportunities in the competitive labor market exist. In other words, the type of workshop that would qualify under the bill is a shop in which severely handicapped individuals who cannot be readily absorbed into the competitive labor market are given remunerative employment as an interim step in the rehabilitation process, or which provide remunerative employment for severely handicapped individuals during such time as employment opportunities in the competitive labor market do not exist.

SAMUEL K. McCONNELL, Jr.,
RALPH GWINN,
WINT SMITH,
AUGUSTINE B. KELLEY,
CLEVELAND M. BAILEY,
Managers on the Part of the House.

Mr. TRIMBLE. Mr. Speaker, will the gentleman yield?

Mr. McCONNELL. I yield.

Mr. TRIMBLE. Mr. Speaker, I have received the following telegram from a constituent:

Hon. JAMES TRIMBLE,
Member of Congress:

Request legislative remarks from floor of Congress indicating that the omission of phrase "corrective therapy" from Vocational Rehabilitation Act amendments, S. 2759, H. R. 9640, does not imply exclusion of our specialty as an available integral and diametric discipline essential in total physical rehabilitation.

WM. R. HORNSBY.
900 VANDEVENTER, FAYETTEVILLE, ARK.

I wish to ask the gentleman from Pennsylvania [Mr. McCONNELL] if this legislation takes care of the request of Mr. Hornsby.

Mr. McCONNELL. The omission of the phrase "corrective therapy" from the bill amending the Vocational Rehabilitation Act does not imply an exclusion of that type of physical rehabilitation treatment specialty. It is the intent of the bill, as I understand it, for those in charge of the program to have available various types of treatment for use in physical rehabilitation activities.

Mr. TRIMBLE. I thank the gentleman.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

COOPERATIVE RESEARCH IN EDUCATION

Mr. McCONNELL. Mr. Speaker, I call up the conference report on the bill (H. R. 9040) to authorize cooperative research in education, and ask unanimous consent that the statement of the managers on the part of the House may be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2287)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 9040) to authorize cooperative research in education, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "That (a) in order to enable the Office of Education more effectively to accomplish the purposes and to perform the duties for which it was originally established, the Commissioner of Education is authorized to enter into contracts or jointly financed cooperative arrangements with universities and colleges and State educational agencies for the conduct of research, surveys, and demonstrations in the field of education.

"(b) No contract or jointly financed cooperative arrangement shall be entered into under this section until the Commissioner of Education has obtained the advice and recommendations of educational research specialists who are competent to evaluate the proposals as to the soundness of their design, the possibilities of securing productive results, the adequacy of resources to conduct the proposed research, surveys, or demonstrations, and their relationship to other similar educational research already completed or in process.

"(c) The Commissioner of Education shall transmit to the Congress annually a report concerning the research, surveys, and demonstrations initiated under this Act, the recommendations made by research specialists pursuant to subsection (b), and any action taken with respect to such recommendations.

"SEC. 2. There are hereby authorized to be appropriated annually to the Office of Education, Department of Health, Education, and Welfare, such sums as the Congress determines to be necessary to carry out the purposes of this Act."

And the Senate agree to the same.

SAMUEL K. McCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

H. ALEXANDER SMITH,
JOHN SHERMAN COOPER,
ROBERT W. UPTON,
JAMES E. MURRAY,
LISTER HILL,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 9040) to authorize cooperative research in education, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted new provisions which differ from the House bill in some respects.

In the first section the Senate amendment provided that the Commissioner of Education could enter into contracts or arrangements with public and other nonprofit colleges and universities. The conference agreement omits the requirement that the college or university be a public or nonprofit one.

The Senate amendment also added to the House bill a requirement that the Commissioner of Education, before entering into any contract or arrangement under the Act for research, surveys, or demonstrations in the field of education, must obtain the advice and recommendations of educational-research specialists. It also requires that the Commissioner of Education report annually to the Congress with respect to operations under the Act. The conference substitute retains these provisions.

The Senate amendment added a new section to the House bill, which authorizes the appropriation of such sums as may be necessary to carry out the purposes of the Act. The provision is retained in the substitute agreed upon in conference.

SAMUEL, K. McCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

WHITE HOUSE CONFERENCE ON EDUCATION

Mr. McCONNELL. Mr. Speaker, I call up the conference report on the bill (H. R. 7601) to provide for a White House Conference on Education, and ask unanimous consent that the statement of the managers on the part of the House may be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2288)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7601) to provide for a White House Conference on Education, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 2 and 4 and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "city of Washington, District of Columbia, before November 30, 1955, a conference broadly representative of educators and other citizens from all parts of the"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 2. (a) To assist each State to bring together, prior to the White House Conference on Education, educators and other interested citizens to discuss educational problems in the State and make recommendations for appropriate action to be taken at local, State, and Federal levels, there is hereby authorized to be appropriated the sum of $1,000,000. Sums appropriated pursuant to this section shall be allotted to the States on the basis of their respective populations according to the latest figures certified by the Department of Commerce, except that no State's allotment shall be less than $15,000."

And the Senate agree to the same.

SAMUEL K. McCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

H. ALEXANDER SMITH,
JOHN SHERMAN COOPER,
ROBERT W. UPTON,
JAMES E. MURRAY,
LISTER HILL,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7601) to provide for a White House Conference on Education, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

Amendment No. 1: The House bill authorized appropriations to enable the President to hold in the City of Washington, District of Columbia, a conference of educators and "interested laymen" from all parts of the nation to be called the White House Conference on Education, to consider and report to the President on significant and pressing problems in the field of education before November 30, 1955. The Senate amendment provided that the President hold in the City of Washington, District of Columbia, before November 30, 1955, a conference broadly representative of educators and "lay citizens" from all parts of the nation to be called the White House Conference on Education. The substitute provides that the conference be broadly representative of educators and "other interested citizens" from all parts of the nation.

Amendment No. 2: The Senate amendment places the words "before November 30, 1955" directly after the words "City of Washington, District of Columbia" rather than at the end of the paragraph as it appeared in the House bill. The House recedes.

Amendment No. 3: The House bill provided that each State be requested to bring together, prior to the White House Conference on Education, educators and interested citizens to discuss educational problems in the State and make recommendations for appropriate action to be taken at local, State and Federal levels, and that each State be requested to make a report of the findings and recommendations of the State conference for use of the White House Conference on Education. The Senate amendment authorized an appropriation in the sum of $1,500,000 to assist each State to bring together prior to the White House Conference on Education educators and lay citizens to discuss educational problems in the State and make recommendations for appropriate action to be taken at local, State and Federal levels and that sums appropriated would be allotted to the States on the basis of their respective populations, except that no State's allotment would be less than $15,000 and not more than $75,000. It also provided that the Commissioner of Education would pay through the disbursing facilities of the Treasury Department its allotment to each State which, through its Governor or other State official designated by the Governor, undertakes to accept and use the funds so paid exclusively for the purpose of holding the State conference, and to make a report of the findings and recommendations of the State conference for use of the White House Conference on Education. The sums appropriated would remain available until December 31, 1955 and any such sums remaining unpaid to the States or unobligated by them as of that date would be returned to the Treasury.

The substitute amendment strikes out "lay citizens" in the Senate amendment and substitutes the phrase "other interested citizens". It also strikes out the figure $1,500,000 and inserts in lieu thereof $1,000,000, and strikes out the figure $75,000. In all other respects the Senate amendment was agreed upon.

Amendment No. 4: The House bill provided an authorization for an additional appropriation to the Commissioner of Education for the fiscal years ending June 30, 1954, June 30, 1955, and June 30, 1956, of such sums as Congress determines to be necessary for the administration of the Act and for other expenses of the Office of Education in planning for and holding the White House Conference on Education and in making available to the public the findings and recommendations of the conference. The Commissioner of Education is also authorized to accept, use and dispose of funds, equipment and facilities donated for purposes of the conference and to the extent consistent with such purposes to use the same in accordance with the wishes of the donors.

The Senate amendment provides for the authorization of an appropriation to the Commissioner of Education for the fiscal years ending June 30, 1955, and June 30, 1956, of such sums as Congress determines to be necessary for the administration of the Act including the expenses of the Office of Education in making available to the public the findings and recommendations of the conference. It also authorizes the Commissioner of Education to accept funds, equipment and facilities donated for purposes of the conference and to use them in accordance with such purposes.

The House recedes.

SAMUEL K. MCCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

NATIONAL ADVISORY COMMITTEE ON EDUCATION

Mr. MCCONNELL. Mr. Speaker, I call up the conference report on the bill (H. R. 7434) to establish a National Advisory Committee on Education, and ask unanimous consent that the statement of the managers on the part of the House may be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2289)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7434) to establish a National Advisory Committee on Education, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 5.

That the House recede from its disagreement to the amendment of the Senate numbered 3 and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "a majority of whom shall be other than professional educators"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 5. Members of the Committee shall receive no compensation for their services, but while traveling to or from or attending meetings of the Committee shall be paid travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U. S. C. 73b–2) for persons in the Government service employed intermittently."

And the Senate agree to the same.

SAMUEL K. MCCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

H. ALEXANDER SMITH,
JOHN SHERMAN COOPER,
ROBERT W. UPTON,
JAMES E. MURRAY,
LISTER HILL,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7434) to establish a National Advisory Committee on Education, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

Amendment No. 1: The House bill establishes a National Advisory Committee on Education in order to secure for the Secretary of Health, Education, and Welfare the advice of a group of representative citizens. The Senate amendment deletes "citizens" and inserts "lay and professional persons". The Senate recedes.

Amendment No. 2: The Senate amendment inserts in the House bill a requirement that a majority of the members of the Advisory Committee on Education be lay persons. The substitute agreed upon in conference requires a majority of such members to be other than professional educators.

Amendment No. 3: The House bill provided that the Advisory Committee on Education should report annually to the House and Senate Committees on Education and Labor. The Senate amendment requires the Secretary to report annually to the Congress concerning the studies initiated under this Act, the recommendations made by the Committee, and any action taken with respect to such recommendations. The House recedes.

Amendment No. 4: The House bill provided that Members of the Committee should be paid traveling expenses while traveling to or from or attending meetings of the Committee. Under the Senate bill the members would receive compensation at a rate to be fixed by the Secretary, but not exceeding $50 per diem, and would be paid travel expenses, including per diem in lieu of subsistence, as authorized by law for persons in the Government service employed intermittently. The amendment agreed upon in conference retains the Senate provision with respect to travel expenses, but provides that the members will receive no compensation for their services.

Amendment No. 5: The Senate amendment added a provision to the House bill which authorizes the appropriation of such sums as may be necessary to carry out the Act, including expenses of professional, clerical, and stenographic assistance, and making such appropriations available for services as authorized by section 15 of the Act of August 2, 1946. The Senate recedes.

SAMUEL K. MCCONNELL, Jr.,
RALPH GWINN,
AUGUSTINE B. KELLEY,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

JURISDICTION OF THE DISTRICT COURTS IN SUITS TO RECOVER TAXES

Mr. KEATING. Mr. Speaker, I call up the conference report on the bill (S. 252) to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2276)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 252)

to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments.

KENNETH B. KEATING,
S. J. CRUMPACKER,
E. E. WILLIS,
Managers on the Part of the House.

PAT MCCARRAN,
ARTHUR V. WATKINS,
HERMAN WELKER,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 252) to permit all civil actions against the United States for recovery of taxes erroneously or illegally assessed or collected to be brought in the district courts with right of trial by jury, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate bill would permit a taxpayer to sue the United States in the district court of the district in which the taxpayer resides, to recover internal revenue taxes erroneously or illegally assessed or collected, and to have the right of trial by jury.

The House amendment would have stricken from the bill the provisions authorizing a trial by jury in such actions at the request of either party. This amendment was predicated primarily, if not exclusively, upon the historical ground that it would be a departure from long-standing precedents if a jury trial were permitted in an action against the Government itself.

On the same day it amended and passed S. 252, however, the House approved another bill (H. R. 4401) which would permit actions to recover such taxes against former collectors or against directors or former directors of Internal Revenue to be brought in the district of the taxpayer's residence. Inasmuch as jury trials have always been permitted in such actions, and as the Government of the United States defends those suits and pays any judgment entered against the defendant therein, the effect of the enactment of H. R. 4401 would be similar to that of S. 252. That is, each bill would permit actions for the recovery of taxes erroneously or illegally assessed or collected to be brought in the district court of the taxpayer's residence, with right of trial by jury.

The House conferees have concluded that to accomplish this desirable result through continued preservation of the fiction that the action is against an individual (i. e., the director or former director or former collector of Internal Revenue)—rather than against the Government itself—is unwarranted. The conferees believe it to be the better practice to grant taxpayers a direct action against the United States, as the Senate bill provides, without compelling taxpayers to forego the right of trial by jury, which they now can obtain in an action against a former collector or director. While it is most unlikely that juries in such cases are fooled into thinking the defendant collector or director himself is required to pay any such judgment out of his own funds, any legal fiction which might result in placing such an unfair burden upon the taxpayer-plaintiff deserves to be stricken from our law. The House conferees have therefore discarded the reasoning that it would be a harmful precedent to permit jury trials in cases of this class. There appears to be no more danger of excessive jury verdicts in cases where the Government itself is sued than in cases where the collecting officer of the Government is sued. In either case recovery is limited to the amount of taxes erroneously or illegal collected. It is therefore the conclusion of the House conferees that the Senate bill, in granting jury trials in actions of this nature by express statutory provisions rather than by use of a legal fiction, is the more desirable method.

Although the conference committee did not have before it the bill H. R. 4401, in view of the approval given by the House through its action on that bill to the principle of a jury trial in actions by taxpayers to recover income taxes illegally or erroneously collected, the managers on the part of the House feel further justified thereby in acceding to the Senate bill which applies this accepted principle of a jury trial to similar actions authorized therein to be brought against the Government itself.

KENNETH B. KEATING,
S. J. CRUMPACKER,
E. E. WILLIS,
Managers on the Part of the House.

The SPEAKER. The question is on the conference report.

The conference report was agreed to, and a motion to reconsider was laid on the table.

MAKING BAIL JUMPING A SEPARATE CRIME

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 633 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 8658) to amend title 18, United States Code, to provide for the punishment of persons who jump bail, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes of my time to the gentleman from Virginia [Mr. SMITH], and at this time I yield myself such time as I may consume.

Mr. Speaker, I rise to urge the adoption of House Resolution 633 to provide for the consideration of the bill H. R. 8658, to amend title 18, United States Code, to provide for the punishment of persons who jump bail.

House Resolution 633 provides for an open rule, waiving points of order and 1 hour of general debate.

H. R. 8658 proposes to make bail jumping a separate Federal offense and to provide adequate and appropriate penalties for bail jumping. It is hoped that by making bail jumping a separate Federal offense that this will act as a deterrent to the practice itself.

Specifically, H. R. 8658 would set up a new section in title 18 of the United States Code which would provide that whoever having been admited to bail fails to appear at the specified time and continues to fail to appear for 30 days following the forfeiture of the bail shall incur the penalties provided for in this bill.

The report on this bill indicates that the 30 days during which the bail jumper may appear is a period of grace, and would eliminate the possibility of failure to appear because of misunderstanding, accident or sickness.

The bill would provide different penalties for bail jumping, depending upon the seriousness of the offense involved. For example, if the bail was granted in connection with a charge of a felony or pending appeal or certiorari after conviction of an offense, the penalty for jumping bail would be a fine of not more than $5,000 or imprisonment for more than 5 years, or both.

On the other hand if the bail was given in connection with a charge of a misdemeanor or for appearance as a witness, the person jumping bail shall be fined not more than $1,000 or imprisonment of not more than 1 year, or both.

I think that we all will recognize that in recent years there has been a flagrant abuse of the privilege of obtaining bail. Many people have abused it by either hiding out for long periods of time before they were recaptured, fleeing the country entirely or just evading capture for a short time. In any event it seems to me that something should be done to make sure that this practice of bail jumping will be kept down to the bare minimum and I think this should be a very effective way to do just that.

I hope that the rule will be adopted and that the bill itself will pass.

Mr. SMITH of Virginia. Mr. Speaker, I know of no opposition to the rule or to the bill.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. KEATING. Mr. Speaker, I ask unanimous consent that the bill, H. R. 8658, be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. KEATING]?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That chapter 207 of title 18, United States Code, is amended by inserting, immediately following section 3145 of such chapter, a new section to be designated as section 3146 and to read as follows:

"§ 3146. Jumping bail

"Whoever, having been admitted to bail for appearance before any United States commissioner or court of the United States, incurs a forfeiture of the bail and willfully fails to surrender himself within 30 days following the date of such forfeiture, shall, if the bail was given in connection with a charge of felony or pending appeal or certiorari after conviction of any offense, be fined

not more than $5,000 or imprisoned not more than 5 years, or both; or, if the bail was given in connection with a charge of committing a misdemeanor, or for appearance as a witness, be fined not more than $1,000 or imprisoned not more than 1 year, or both.

"Nothing in this section shall interfere with or prevent the exercise by any court of the United States of its power to punish for contempt."

SEC. 2. The analysis of chapter 207 of title 18, United States Code, immediately preceding section 3141 of such title, is amended by adding the following new item:

"3146. Jumping bail."

Mr. KEATING. Mr. Speaker, I heartily support this bill, and I was very much surprised when it was pointed out to our committee on behalf of the Department of Justice that there has been no Federal statute on this subject heretofore. The bill is patterned more or less on our bail-jumping statute in the State of New York which has been in force for more than a quarter of a century.

We have recently had several dramatic demonstrations that the mere posting of cash bond is not enough to hold important members of the Communist conspiracy. Four of the eleven Communist big shots who were convicted in the Dennis case jumped their bail pending the appeal to the Supreme Court, and two of them are still at large. And, of course, it will be remembered that if he had not jumped bail, Gerhardt Eisler would probably be serving a sentence in this country instead of holding the very high post he is now supposed to have in the Communist hierarchy in East Germany.

And these notorious cases are by no means the whole problem, Mr. Speaker. Bail is a very useful and proper substitute for holding an accused person, or a convict pending his appeal, in confinement. It is valuable in the ordinary course of administering justice in our courts, and it often prevents unnecessary hardship on persons who are ultimately vindicated and found to be not guilty. It is thus really a concession, or a favor, extended by the authority of the courts. And thus when anybody who has the benefit of it turns around and breaks faith and disappears, he ought to be punished. He has certainly committed a separate crime, in offending the dignity of the court and taking advantage of the laws. It seems entirely proper to make him answerable for this, as a separate offense, punishable in direct relation to the gravity of the primary offense in the case.

Mr. POFF. Mr. Speaker, the bill before the committee for debate, in its simplest terms, would make it a separate crime for a Federal criminal to jump bail. If a Federal defendant, having been admitted to bail for appearance before a Federal court or commissioner, fails to appear, forfeits that bail and willfully fails to surrender himself within 30 days, he will be subject to certain criminal penalties specifically described in the bill. If bail was originally given in connection with a felony charge, the penalty is up to but not more than $5,000 and imprisonment up to but not more than 5 years, either or both. The same penalty would apply if the defendant jumped bail after conviction of any offense, whether a felony or misdemeanor. If bail was given in connection with a misdemeanor charge, the penalty would be up to but not more than $1,000 or imprisonment up to but not more than 1 year, either or both. The same penalty would attach to a defaulting witness under bail in a Federal criminal case. The punishment fixed by this act would not in any way restrict the power of the court to punish for contempt.

A law very similar in nature has been on the statute books of the State of New York at the recommendation of the State Crime Commission since the year 1928, and section 189 (c) of the Criminal Code of Canada is very similar in purport and effect. Experience under these two statutes has proved that their existence operates as a decided deterrent to prisoners who are otherwise willing to forfeit their money bond in exchange for their personal freedom.

The bill before the committee today has the full approval and recommendation of the Attorney General and the Department of Justice. Their records disclose that during the first 10 months of fiscal year 1954, a total of 141 Federal criminals at liberty under bail chose to forfeit their bond and avoid justice. Of this number, only 36 were later apprehended. But the case which immediately pointed up the desirability of such legislation was the case of *Dennis et al.* v. *United States* (341 U. S. 494). After conviction of all of the 11 principal defendants in the Dennis case, 4 of them were set at liberty pending appeal and certiorari to the Supreme Court on bail of $20,000 each. After their convictions were affirmed by the Court in 1951, they failed to surrender themselves to custody. One of them, Gus Hall, was captured about 3 months later near the Mexican border at Laredo, Tex., and another, Robert Thompson, was not apprehended until August 1953, when the FBI found him in a remote hideout in the Sierra Nevada Mountains in California. The $80,000 bond posted by the Communist Party meant nothing to the Reds compared with the value of their trained henchmen. Had this law been on the books, these American traitors, with a penitentiary sentence staring them in the face, would not have been so eager to forfeit their bonds and flee justice. The deterrent would be even more effective with respect to Federal defendants under indictment awaiting trial in the district courts.

Another case of recent occurrence which would have been affected by this act was that of Gerhardt Eisler, who, after being convicted in a New York court and a Washington court, forfeited his bail and stowed away on the Polish steamer *Batory*. When he landed in England, extradition proceedings were instituted but it was determined that the substantive offense of which Eisler had been convicted did not come within the extradition treaty with England.

It will be seen that the bill provides a period of grace of 30 days after forfeiture of the bond. Frequently, by reason of honest mistake or uncontrollable physical circumstances, there may be justifiable delay in a particular case. To make the offense mature upon the instant of the forfeiture of the bond would work an undue hardship on the defendant and might possibly load the court's docket with frivolous cases. Moreover, the running of the 30-day period will create a legal presumption of criminal intent which could be overthrown only by proof on the part of the defendant that his failure to appear was not willful. In other words, even after passage of the 30-day period, the district attorney will have to bear the burden of proving that the defendant willfully and knowingly failed to surrender himself at the proper time in accordance with the provision of his bill.

During the course of the committee hearings, the constitutional question of double jeopardy was raised. The committee is definitely of the opinion that the defense of double jeopardy to a bail-jumping charge could not be successfully maintained. The legislative body has the power to create as many separate and distinct types of crime and as many gradations thereof as it, in its wisdom, deems advisable. The offense of bail jumping would be whole and complete unto itself and, except for the determination of the gravity of the penalty, entirely disassociated from the substantive charge in connection with which bail was granted. Conviction of the separate crime of bail jumping would require probative evidence of a separate and distinct criminal intent to violate the terms of a separate and distinct statute, together with proof of separate and distinct overt criminal acts. Disposition by the court of the two separate offenses would be mutually exclusive, one of the other. Conviction of one would not necessarily result in conviction of the other and acquittal of one would not necessarily result in acquittal of the other. More succinctly, our whole body of criminal law is necessarily founded upon the premise that every citizen is presumed to have knowledge of the existence of all criminal statutes and violates them at his own risk.

With respect to the question of double jeopardy, this new crime of bail jumping has a close analogy in the law in the so-called escape statute, title 18, chapter 35, United States Code, section 751:

Whoever escapes or attempts to escape from the custody of the Attorney General or his authorized representative, or from any institution in which he is confined by direction of the Attorney General, or from any custody under or by virtue of any process issued under the laws of the United States by any court, judge, or commissioner, or from the custody of an officer or employee of the United States pursuant to lawful arrest, shall, if the custody or confinement is by virtue of an arrest on a charge of felony, or conviction of any offense, be fined not more than $5,000 or imprisoned not more than 5 years, or both; or if the custody or confinement is for extradition or by virtue of an arrest or charge of or for a misdemeanor, and prior to conviction, be fined not more than $1,000, or imprisoned not more than 1 year, or both (June 25, 1948, ch. 645, sec. 1, 62 Stat. 734, effective Sept. 1, 1948).

This statute in effect provides that a Federal defendant incarcerated pending

trial or following a conviction shall be subject to certain penalties if he escapes or attempts to escape from custody. The crime of escaping from custody, while in some degree associated with the substantive offense which brought about imprisonment, is a completely separate and distinct crime. Prosecution under the escape statute has never been subject to the defense of double jeopardy, and there is no reason to assume that prosecution under this new bail-jumping statute would be subject to that defense.

Incidentally, it will be noticed that the penalties provided in the escape statute are identical with those specified in the bail-jumping statute and are graduated according to the gravity of the substantive offense to which the secondary offense is related.

In committee, the question was also raised as to whether the act would be applicable to bail jumpers in cases within the jurisdiction of the municipal court of the District of Columbia. The Department of Justice and the Judiciary Committee have concluded that this new bail-jumping statute would not apply to such cases. The bill applies only to persons admitted to bail for appearance before any United States commissioner or court of the United States. Section 451 of title 28, United States Code, provides that the term "court of the United States" includes "any court created by act of Congress, the judges of which are entitled to hold office during good behavior." Under District of Columbia Code, 1951, sections 11–952 and 11–953 et sequentes, judges of the municipal court of the District of Columbia are appointed, not during good behavior, but for a term of years. Moreover, in the case of *United States* v. *Mills* (11 App. D. C. 500, 507), the court held as follows:

> The police court of the District of Columbia * * * although a court of the United States, is not a court of the United States in the sense of the Federal Constitution—

That is a constitutional court under article III as distinguished from a legislative court—

> and there is no reason for giving to the same expression in a statute a broader meaning than is given to it in the Constitution. In fact, when there is mention of the courts of the United States in any statute, we may certainly assume that only the courts of general jurisdiction intended by the Constitution are meant, unless there is special reason to be deduced from the context of the statute for giving to the expression a different meaning.

Accordingly, inasmuch as the municipal court for the District of Columbia is not a court of the United States, bail orders for appearance before the municipal court for trial of an offense cognizable before it are not within the terms of the bill. However, a bail order of the municipal court for appearance in the district court of the District of Columbia does come within the terms of the bill.

With respect to traffic violations in the District of Columbia, the present practice is for the defendant to post collateral in the police precinct covering the fine which will likely be imposed. Instead of appearing for trial, the traffic violator simply forfeits his collateral in payment of the fine. It was feared that this practice might invoke application of the new bail-jumping statute. The Department of Justice and the committee have concluded otherwise. Under section 23–101 of the District of Columbia Code, 1951, violations of police or municipal ordinances—where the maximum penalty is a fine or imprisonment for less than 1 year—are prosecuted not in the name of the Federal Government, but in the name of the District of Columbia by the Corporation Counsel. Moreover, in the case of *District of Columbia* v. *Moyer* (68 App. D. C. 98, 93 F. 2d 527), it was held that all prosecution for violation of the District of Columbia Traffic Act should be prosecuted in the name of the District by the Corporation Counsel. This, together with the fact that the municipal court is not a court of the United States, as discussed above, means that the defendant is not strictly a Federal defendant and traffic violations within the District of Columbia do not come within the purview of the new bail-jumping statute.

The question was also raised as to whether the new statute would apply to offenses tried before National Park Commissioners. The terms of the bill relate only to felony or misdemeanor charges. National Park Commissioners have trial jurisdiction only over small crimes embraced within the terms of the "petty offenses" statute, section 3401, title 18, United States Code. A petty offense is one carrying a penalty of less than 6 months in jail—without hard labor—or a fine less than $500, or both. For that reason, the bill does not apply to bail for appearances before a National Park Commissioner for trial of a petty offense. However, it would apply to appearances before a Commissioner sitting as a committing magistrate on a felony or misdemeanor charge and to a bail order of a Commissioner requiring appearance on a felony or misdemeanor charge in a District Court.

The question has also been raised as to the extent of the penalty on a bail-jumping offense when the original substantive charge to which the bail was related was a felony, such as burglary, and the conviction on that charge was a misdemeanor, such as petty larceny. Assuming that all of the components of the bail-jumping offense can be established, the penalty on the bail-jumping offense would be up to $5,000 or imprisonment for not more than 5 years, or both. This would be true even if, in the hypothetical case, the defendant should be completely acquitted on the substantive charge. His bond was posted "in connection with a charge of felony" and was fixed only after a prima facie case on the felony charge had been made. Having knowledge of the existence of the bail-jumping statute and its penalties and having wilfully violated its terms, he has committed a crime even though he may actually be innocent on the original substantive charge.

Mr. Speaker, this legislation is a small but a vitally important part of the Attorney General's overall antisubversion program. I hope that the committee will see fit to provide him with this new tool to do his job.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. McCULLOCH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

EXTENSION OF REMARKS

Mr. VURSELL. Mr. Speaker, I ask unanimous consent that in my withheld speech of yesterday I may include certain statistics and that they may be printed in tabular form as indicated in the manuscript.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

CUSTOMS DUTY ON HARDBOARD

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 650 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9666) to amend section 1001, paragraph 412, of the Tariff Act of 1930, with respect to hardboard, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Ways and Means now in the bill. No other amendment to the bill or committee substitute shall be in order except amendments offered by direction of the Committee on Ways and Means, and said amendments shall be in order, any rule of the House to the contrary notwithstanding, but such amendments shall not be subject to amendment. At the conclusion of such consideration, the Committee shall rise and report the bill to the House, with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi [Mr. COLMER], and I yield myself such time as I may require.

Mr. Speaker, I rise to urge the adoption of House Resolution 650 which will make in order the consideration of the bill H. R. 9666, to amend section 1001, paragraph 412, of the Tariff Act of 1930, with respect to hardboard.

House Resolution 650 provides for a closed rule, waiving points of order, and would provide for the consideration of the committee substitute amendment without the intervention of any point of

order. No amendment may be ordered to the bill or the committee substitute except amendments offered by direction of the Committee on Ways and Means. One hour of general debate is allowed on the bill.

H. R. 9666 proposes to classify what has become generically known as hardboard under paragraph 412, the "Wood and manufactures of" schedule, of the Tariff Act of 1930.

Specifically, Mr. Speaker, this bill contains a simple description of hardboard which will be easier to administer and more clearly cover hardboard in all its forms.

The second major provision in this bill would be to provide that the 16⅔ percent ad valorem rate, which is the reduced rate in the Tariff Act of 1930 for similar articles, would apply in the case of hardboard instead of the 33⅓ percent rate which is the full rate specified for similar articles in the tariff act.

Mr. Speaker, this bill, however, specifies that Communist countries will not be able to take advantage of this reduced rate, but will have the full 33⅓ percent ad valorem rate applied to their exports.

The last major provision in this bill is that the effective date provision is changed to make it conform with the customary effective date provision for bills of this type.

Mr. Speaker, the members of the Committee on Ways and Means have given a great deal of attention to this subject and I hope that the rule will be adopted by the House membership.

Mr. COLMER. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, in view of the lateness of the hour and the apparent desire of the House to adjourn, I shall not make any extended remarks on this resolution making in order the consideration of H. R. 9666. I am very happy to handle the resolution on the minority side because of my keen and intense interest in the bill. In fact, Mr. Speaker, while this bill was reported out in the name of the gentleman from California [Mr. UTT], companion bills were introduced by the gentleman from California [Mr. SCUDDER] and myself. Since the gentleman from California [Mr. UTT] is a member of the Ways and Means Committee which reported this bill, it was quite proper and appropriate and in line with custom that his bill be reported. It is not a question of authorship. The pride I take in the bill is that it secures the end sought.

Briefly, Mr. Speaker, the bill would amend section 1001, paragraph 412 of the Tariff Act of 1930 with respect to hardboard. Its purpose is threefold.

First, it would take hardboard out of the classification of paperboard and pulpboard where it is now classified for tariff purposes and place it under its proper classification of wood and wood products.

Second, since paper and paper products are under a lower tariff or duty than wood and wood products, the bill would raise the tariff on hardboard.

Thus, thirdly, the domestic hardboard industry would be given protection from the importation of competing hardboards from foreign countries which are currently flooding the domestic market. The result of this flooding is that our domestic industry is having its own production curtailed with the resultant loss to the manufacturer, the wage earner, and the general economy of our country.

Specifically, under the present classification of paperboard and pulpboard, the duty on imports is $7.25 per short ton, but not less than $7.50 nor more than 15 percent ad valorem. Under our bill, the duty would be 16⅔ percent with the limitation that this rate may not be reduced through trade agreements. It is further provided that hardboard produced in any nation or area designated under section 5 of the Trade Agreements Extension Act of 1951 as being Communist-dominated or controlled will, however, be dutiable at the rate of 33⅓ percent.

Mr. Speaker, the following table shows the total United States imports from the three countries of Sweden, Finland, and Canada of all types of board under the paperboard and pulpboard classification for the years 1952 and 1953. The first-quarter 1954 statistics are segregated as indicated in the source note.

Paperboard, pulpboard not elsewhere specified, cardboard, and leatherboard or compress leather, plate-finished, supercalendered, or friction calendered, laminated by means of an adhesive substance, coated, surface stained or dyed, lined or vatlined, embossed, printed, decorated, or ornamented in any manner: United States imports for consumption, by principal countries, 1952 to January–March 1954

Country	Quantity	Foreign value
	Pounds	
Sweden:		
1952 [1]	4,200,157	$278,691
1953 [1]	18,207,300	788,591
1954 (January–March): [1]		
Hardboard	4,571,001	178,171
Other	759,883	36,230
Finland:		
1952 [1]	5,961,920	372,544
1953 [1]	14,486,333	746,970
1954 (January–March): [1]		
Hardboard	2,426,067	79,915
Other	1,315,176	88,252
Canada:		
1952 [1]	13,627,437	1,106,409
1953 [1]	14,566,204	1,129,577
1954 (January–March): [1]		
Hardboard	1,009,405	76,687
Other	363,062	32,973
All other countries:

1953 [1]	48,217,048	2,737,883
1954 (January–March): [1]		
Hardboard	8,017,933	335,285
Other	2,463,631	164,437

[1] Preliminary.

Source: Official statistics of the U. S. Department of Commerce, except that separation of hardboard and other board for month of January 1954 is based on invoice analysis by Tariff Commission.

These large imports have affected the American production considerably. In fact, it has resulted in the curtailment of American production for the domestic market. This, of course, has resulted in a substantial loss to our economy in the way of profits, wages, the purchasing power of our people, not to mention a substantial loss of revenue to the Federal Government in the form of taxation. Mr. Speaker, in my own congressional district where the finest quality of all the hardboards, Masonite, originated, the effects of these imports have been substantial. The whole economy of Jones and several adjoining counties in south Mississippi have been the losers as a result of these imports. I realize the importance of good and friendly relations with foreign nations, the argument always advanced by the State Department and the internationalists when these questions arise. I have only the kindliest feeling for the people of these countries, but I call your attention to the fact that we have contributed untold millions to these people in the way of foreign aid. But, I ask you, my colleagues, how in the name of commonsense we can continue indefinitely to give these countries financial aid and at the same time permit them to flood our American market with competitive products produced with cheap labor? Certainly no sane person can argue that we can keep sending the taxpayers' money to these countries, while at the same time destroying our own industries who produce the tax money to be sent them. Moreover, how can we maintain the high standard of the American wage earner by permitting these products, the result of cheap foreign labor, to destroy our domestic markets? It just does not make sense.

Mr. Speaker, there is no opposition on this side of the aisle to the adoption of this rule. I certainly hope that when the bill is considered tomorrow or the next day that there will be no opposition to the bill itself. There certainly should not be. I repeat—it is a simple bill to correct an erroneous classification while at the same time granting protection sorely needed by our American industry.

Mr. COLMER. Mr. Speaker, I have no further requests for time.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PUBLIC WORKS ON RIVERS AND HARBORS

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 643 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9859) authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill

and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi [Mr. COLMER] and yield myself such time as I may consume.

Mr. Speaker, I rise to urge the adoption of House Resolution 643, which will make in order the consideration of the bill H. R. 9859, authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes.

House Resolution 643 provides for an open rule, waiving points of order with 2 hours of general debate.

Mr. Speaker, as the report on H. R. 9859 points out this is the first omnibus river and harbor and flood control bill that the Congress has had before it since 1950. The Committee on Public Works has conducted hearings on more than 85 river and harbor projects, 22 beach erosion projects and more than 40 flood control projects.

Naturally since quite a period of time has elapsed since the last bill of this nature was before us, the Committee on Public Works had a great many projects up for consideration. The Corps of Engineers, Department of the Army, testified on all the projects that have been included in H. R. 9859.

Mr. Speaker, the total of the present bill is less than $1 billion and the report makes a point of stating that all previous bills on this subject, except for the emergency bill of 1948, authorized considerably more than $1 billion. I should point out that this applies to the bills during the last 10 years only.

I do not think that there can be any serious opposition to the general ideas contained in this bill. Every Member here knows that the continuation of an orderly program of public works is vital to the conservation and improvement of our national resources. Over the years some tremendously successful projects have been initiated and carried through to the advantage of the whole country. When you consider the value of these projects in the light of the economic wealth that they have created throughout the Nation, the price seems small indeed.

I hope that the House membership will see fit to adopt the rule and that the bill will pass.

Mr. COLMER. Mr. Speaker, I have no requests for time.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to. A motion to reconsider was laid on the table.

DAMAGE CLAIMS AT TEXAS CITY, TEX.

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 651 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9785) to provide a method for compensating claims for damages sustained as the result of the explosions at Texas City, Tex., and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I rise to urge the adoption of House Resolution 651 which will make in order the consideration of the bill H. R. 9785, to provide a method for compensating claims for damages sustained as the result of the explosions at Texas City, Tex.

House Resolution 651 provides for an open rule, waiving points of order with 1 hour of general debate.

Specifically H. R. 9785 would, if enacted into law, direct the Secretary of the Army to investigate and settle claims insofar as they relate to the determination of the amount of damages suffered by each claimant because of property damage, death, or personal injury or because of subrogated insurance payments resulting from the explosions.

The bill also requires claimants to submit their claims in writing to the Secretary of the Army within 180 days and on the other side the Secretary of the Army is required to prescribe rules of procedure within 60 days thereafter and to adjudicate and determine the individual claims within 12 months of their submission.

H. R. 9785 also specifies that the law of Texas, unless otherwise provided for in the bill, shall govern the Secretary in carrying out his duties under the provisions of the act. No claim is to be approved for payment in an amount in excess of $10,000.

In addition to the above-mentioned provisions the bill specifies that amounts paid on death claims shall not, because of the limitation of $10,000 in section 4, be subject to insurance subrogation claims in any respect.

According to the report on this bill, however, the Secretary when determining the payments to be made to compensate for injury or personal property losses, will take into consideration the insurance benefits previously paid on these losses by insurance companies. The Secretary, if the bill becomes law, would also approve for payment, claims of subrogated insurers in sums not to exceed 50 percent of the amounts paid out by said companies to beneficiaries.

The bill finally provides that all settlements made under the terms laid down in H. R. 9785 shall be in full discharge of all claims against the Government of the United States.

Mr. Speaker, I have very briefly outlined some of the major provisions contained in this bill. There are numerous other smaller points which, no doubt, will be brought out later. However, the point I want to make here, and the only point I want to make, is that the Government of the United States was definitely at fault and definitely negligent in the handling of these highly dangerous fertilizers. I think that there can be little disagreement that the United States should make some settlement on the people who were the unfortunate and innocent victims of this disaster. I hope that the rule will be adopted on this bill and that the bill will pass.

Mr. Speaker, I yield the gentleman from Virginia [Mr. SMITH] 30 minutes.

Mr. SMITH of Virginia. Mr. Speaker, I have no objection to the passage of the rule and I have no desire to consume any time.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

INCREASING BORROWING POWER OF COMMODITY CREDIT CORPORATION

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 644 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 9756) to increase the borrowing power of Commodity Credit Corporation. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH], and yield myself such time as I may desire.

Mr. Speaker, I rise to urge the adoption of House Resolution 644, which will make in order the consideration of the bill, H. R. 9756, to increase the borrowing power of Commodity Credit Corporation.

House Resolution 644 provides for an open rule with 1 hour of general debate on the bill.

Mr. Speaker, H. R. 9756 proposes to increase the borrowing authority of the Commodity Credit Corporation from $8.5 to $10 billion, in order that the corporation may be able to carry out existing commitments that the Government has made for price supports on 1954 crops until at least January 1955.

As we all know, the Commodity Credit Corporation also operates a storage facilities program, a commodity export program, and a supply and foreign purchase program.

According to the report on this bill, Mr. Speaker, a number of factors have contributed to the present situation. First of all prices of farm products declined sharply from May to June of this year. However it is anticipated that they will remain relatively stable for the rest of the year.

Secondly, another big crop is expected to be harvested in the United States this year, and the reductions in cotton, corn and wheat allotments did not cause any appreciable diversion of acreage out of crops.

A third very important factor in this Commodity Credit Corporation problem is that we still have not developed a sufficiently comprehensive plan for disposing of butter, cheese, and dried nonfat milk without having it entail large expenditures and losses.

The final important factor is that larger percentages of the 1953 crops of several major commodities were placed under price support than had been anticipated.

I think these developments in recent months explain just why this increase in the borrowing power of the Commodity Credit Corporation is felt to be necessary. I hope that the House membership will see fit to adopt the rule on this bill.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. BROWN].

Mr. BROWN of Georgia. Mr. Speaker, H. R. 9756 would increase the borrowing power of the Commodity Credit Corporation by $1.5 billion to $10 billion. The Commodity Credit Corporation is perhaps the most important of all the agencies of the United States Government in maintaining the economic health of the Nation, and, of course, particularly that of the farmers. It is the instrumentality through which the Government extends price support on farm commodities, in accordance with existing legislation, by making loans, purchase agreements, and purchases.

At the present the Corporation has a borrowing power of $8.5 billion. This means that Congress has placed a limit of $8.5 billion on the amount the Corporation may owe the United States Treasury or banks at any one time. The limit applies to the sum of actual borrowings and obligations on the part of the Corporation to reimburse banks for CCC loans. Such banks make loans with their own funds as lending agencies of the Corporation.

Although we placed this limit on the Corporation's financial resources, we have by laws which we have passed directed the Corporation to carry out price-support operations for farmers. We have said that the Corporation shall carry out these operations because we recognize clearly the key importance of a sound and prosperous farm economy to the prosperity of the Nation as a whole.

Increased borrowing power of the Corporation is necessary to provide a margin of safety to assure continuance of its operations. If it is not needed, it will not be used.

Larger percentages of the 1953 crops of several major commodities were placed under price support than expected. In several instances the percentage was higher than ever before.

For the major crops, for which the larger part of the borrowing power is used, the level of support prices applicable to the 1954 crop price-support operations are those fixed by existing law. The Corporation has no control over the quantity that may be offered to it for price support.

A good deal of unfavorable publicity has been given both as to the cost of the price-support program and the size of our agricultural surplus. It is true that the Federal Government has loaned out between $6 and $7 billion to farmers who have pledged their crops as security. Much of this money will be returned to the Government when the farmers sell their crops. These crops consist of about a year's supply of wheat, a few months' supply of corn and cotton, some cottonseed oil, and a few weeks' supply of butter, cheese, and dried milk. Viewed against a background of 165 million Americans, these stocks are not large—only about $40 per capita. Two or three years of drought—as in the 1930's—would wipe out our surpluses. Twice in 15 years similar surpluses have proven strategic reserves in a national emergency.

Over a span of more than 20 years, from October 17, 1933, to December 31, 1953, the losses suffered in connection with the price-support program for basic commodities—cotton, corn, wheat, rice, peanuts, and tobacco—were $63,567,684. By supporting cotton the Government made a profit of $268,267,506. Tobacco netted a profit of $1,688,874. Relatively small losses, considering the size of the program, were experienced on corn, wheat, and peanuts.

The large losses experienced by the Commodity Credit Corporation in its price-support program have been experienced on supporting the nonbasic commodities. The loss on the nonbasic commodities was approximately $1,250,000,000. Almost half of a billion dollars was lost in supporting Irish potatoes. This is a program on which I always had a great deal of reservation. As you know, this program was terminated several years ago. Price supports on eggs cost the Government almost $200 million. Eggs are no longer being purchased. During the war, as an emergency wartime program, the Commodity Credit Corporation undertook to stimulate production of flax in order to assure this country of an adequate supply of linseed oil. The cost of this program amounted to approximately $100 million. I believe that the results of the flax program justified this expenditure for national defense.

Even with losses on these items, the actual cost to the American taxpayer of the farm-support program since its inception has averaged only 35 cents per person per year. This is mighty cheap famine insurance.

Now, Mr. Speaker, I should like to address my remarks to some of my urban colleagues who have been critical of the price-support program. For the past 3 years the American farmer has experienced a steady decline in income. In 1953 net farm income was about 7.5 percent below that of 1952. The welfare of the American economy is directly related to the prosperity of the American farmer. The farmer is one of the largest consumers of the products of industry. Farmers, for example, use annually more steel than the passenger-automobile industry—7 million tons of finished steel; more petroleum than any other industry—16½ billion gallons of crude; rubber enough to put tires on 6 million automobiles—320 million pounds of raw rubber; and enough electric power to supply Chicago, Detroit, Baltimore, and Houston.

Throughout our history economic downturns in our economy have first appeared upon the farm. When farm prices fall, farmers tighten their belts. They cut their purchases of household goods, of farm equipment, and supplies. Business on a thousand small-town main streets languishes. Soon manufacturers of goods used by farmers start to cut back. They lay off workers, who have to tighten their belts. They buy less bread and milk, fewer shirts and sheets. And farm prices go still lower. I fear that we may now be following this tragic pattern. Industry production, as measured by the Federal Reserve Board index, has declined from 136 in June 1953 to 124 in June 1954. Unemployment has reached 3.5 million. Much of this business decline and unemployment is centered in industries which must depend on the farmers for a substantial percentage of their market. In light of these facts, I believe that it was exceedingly shortsighted for this House to vote to end 90-percent mandatory price supports. I feel that the stand of the Secretary of Agriculture against mandatory price supports is exceedingly unwise.

It is the contention of the opponents of mandatory price supports that they raise prices for the consumers. That is not the case. Farm prices bear little relation to retail food prices. Since 1947 farm prices have fallen from 115 percent of parity to 90 percent of parity. Retail food prices have not retreated at all. In 1947, the farmer received 51 cents of the consumer's food dollar; in 1953, his share was 44 cents. The difference was absorbed by middlemen.

Despite price supports, an average city worker can buy more food with an hour's wages today than in 1914. A few comparisons:

	1914	1953
Bread.....pounds..	3.5	10.7
Butter.....do....	.6	2.2
Pork chops.....do....	1.0	2.0
Eggs.....dozens..	.6	2.7
Potatoes.....pounds..	12.8	31.8
Round steak.....do....	.9	2.0

In closing I should like to quote from the unanimous bipartisan report of the Joint Committee on the Economic Report:

Whatever the merits of flexible supports and modern parity may or may not be as a long-run program it is questionable whether their contribution at this time will act to sustain farm income in the months immediately ahead when the threat to our economic stability is so generally recognized.

On the contrary, it seems more likely that the proposed shift to "Modernized parity" at this particular time would be an unnecessary disrupting factor.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

EXPORT-IMPORT BANK OF WASHINGTON

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 645, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 3589) to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the Bank on the National Advisory Council on International Monetary and Financial Problems and to increase the Bank's lending authority. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking and Currency, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 30 minutes to the gentleman from Virginia [Mr. SMITH], and yield myself such time as I may desire.

Mr. Speaker, I rise to urge the adoption of House Resolution 645 which will make in order the consideration of the bill, S. 3589, to provide for the independent management of the Export-Import Bank of Washington under a Board of Directors, to provide for the representation of the bank on the National Advisory Council on International Monetary and Financial Problems and to increase the bank's lending authority.

House Resolution 645 provides for an open rule with 1 hour of general debate on the bill itself.

Mr. Speaker, S. 3589 reaffirms the status of the Export-Import Bank as an independent agency of the United States.

The bill would provide for the appointment of a president and a first vice president of the Export-Import Bank by the President by and with the advice and consent of the Senate. The president of the bank would receive a salary of $17,000 annually and the vice president would receive $16,000.

In addition to the above provisions a five-man board of directors would be created and this board would have the full responsibility for the policies and management of the bank.

A nine-member advisory committee, chosen by the Board of Directors from production, commerce, finance, agriculture and labor is created by the bill to advise with the bank on its program.

The bill also provides that the President of the Export-Import Bank will become a member of the National Advisory Council on International Monetary and Financial Problems.

Finally the present lending authority of $4½ billion is increased by $500 million which brings the loan limit up to $5 billion.

Mr. Speaker, the report on this bill emphasizes the points that the bank is designed to give to businesses of the United States, no matter what their size, adequate facilities for financing and facilitating our trade in world markets, and it specifies that there should be no limitation upon the lending authority of the bank with regard to the term of loans or the authority of the bank to make loans for development purposes.

Mr. Speaker, this bill is designed to help the business interests in the United States acquire a larger share of the world trade market. It has been carefully and thoroughly studied by the members of the Committee on Banking and Currency and I think it deserves the favorable consideration of the House. I hope that the rule will be adopted and that S. 3589 will be enacted into law.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. BROWN].

Mr. BROWN of Georgia. Mr. Speaker, I wish to make a few remarks in support of this bill to strengthen the Export-Import Bank. The 24-year history of this great American institution in the banking field is without parallel as a success story. Over this 24-year period the bank has authorized from its own resources loans or credits to 56 countries to the extent of some $6.5 billion. Of the total loans made, large repayments have been received, and currently I understand that the outstanding loans approximate $2.9 billion in some 47 countries.

Losses by the bank have been negligible. With the exception of a few development loans made to the Republic of China before the Communists took over on the continent of Asia, the bank's experience in international finance has been remarkable. It is my understanding that, even though the repayments by the Nationalist Chinese are not current, the outstanding balance on these loans is not yet considered to be completely unrecoverable.

The unanimous endorsement for the proposed reorganization of the Export-Import Bank by the Senate, by the House Banking and Currency Committee, by the administration, and by the various business and agricultural groups testifying on this bill before the Senate and House Banking and Currency Committees indicates a strong feeling that this legislation will give substance to the concept of "trade—not aid." A strengthened Export-Import Bank, with additional lending power and with the mandate of congressional approval for more vigorous international financing of worthy economic development projects, should serve as a "shot in the arm" for free enterprise in international trade. Increased availability of funds for foreign investment should help curb the pressure for the type of direct economic aid programs we have authorized in the past, and should substitute a more business-like approach among businessmen that will continue to help our friends abroad to improve their economic position and attain a more secure status in the family of free nations.

As our dollar appropriations for grants-in-aid are being curtailed, it is incumbent upon us to develop alternative means of financing to continue a high level of international trade.

Government action to expand the basis for international financing certainly is not a substitute for private banking institutions in extending foreign credits, but rather it is a necessary adjunct to our private banking system which, by nature, must be more restrictive and selective in making foreign loans; neither is it the intent of Congress that the expanded program of the Export-Import Bank be in conflict with the lending policies of the International Bank for Reconstruction and Development, which concentrates on long-term development loans; rather, it is intended to supplement the World Bank's activities. We must remember that, by its organization and membership, the World Bank is truly an international bank of many nations. The Export-Import Bank, on the other hand, is an American institution, serving directly the needs of the United States economy. Without it, our interests could not be adequately served.

Not to be overlooked are the beneficial effects that this expansion in foreign lending authority will have in our own domestic economy. It will benefit all segments of our economy—industry, labor, and agriculture. It has a vital role to play in building our international trade to a high level.

I am wholeheartedly supporting this legislation, which returns the Export-Import Bank to independent status, restores the bank to membership on the National Advisory Council, reestablishes its Board of Directors, and increases its lending authority by $500 million. On the whole, all of these changes are desirable, and without question the new organization should be much stronger and infinitely more capable of performing its function than under its present direction of a Managing Director, as set forth under Reorganization Plan No. 5 late last year.

Although the bill before the House at this time provides for an advisory committee of nine members, representative of all segments of the economy—industry, labor, and agriculture—I am keenly disappointed that this legislation does not provide a provision for placing the Secretary of Agriculture on the National Advisory Council.

It has been argued that agricultural representation on the bank's advisory committee will give adequate representation to agriculture. I wish that this might be so. It may be, insofar as the operations of the bank itself are concerned.

What is more important, however, is that the Secretary of Agriculture has a very important contribution to make in the development of overall policy in

this whole field of international financial and monetary problems, which is done only by the National Advisory Council. A great proportion of the development loans made by the Export-Import Bank and the International Bank fall directly in the field of agriculture. Many other projects are indirectly related to agricultural development. It seems to me that exclusion of the Secretary of Agriculture from membership on this Nation's principal policy group in the field of international finance is a grave mistake. His judgment and experience should prove of great help to the National Advisory Council, not only in determining Export-Import Bank policy, but in the coordination of our overall policy in all other matters of international finance.

I was interested in an amendment to do just this, but in the rush to push this legislation through before this session is over, it now appears desirable to wait until a latter date. We should give our thoughts to this matter, and since there is apparently no opposition to including the Secretary of Agriculture on this top policy board, we should consider this in future legislation which may be considered.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

HOUR OF MEETING TOMORROW

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 10 o'clock tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. RAYBURN. Reserving the right to object, and I shall not, of course, many Members would like to know the program for tomorrow. What bills are to be called up?

Mr. HALLECK. I have just had a discussion with the chairman of the Committee on Appropriations, the gentleman from New York [Mr. TABER], and I think they will be ready to go on tomorrow with the further consideration of the supplemental appropriation bill. How long it will take to conclude that I do not know.

There is some report in the press that the other body might complete action tonight on the atomic energy bill, and that of course is a matter we want to pass on.

Also, the Committee on Public Works has reported out an omnibus river and harbor bill, in respect to which there is much interest, and that will be on the agenda for consideration.

Of course, the bills made in order by the rules that have just been adopted will also be up for consideration.

Mr. RAYBURN. Which specific bill does the gentleman think will be called after the appropriation bill is disposed of? Will that be the atomic energy bill?

Mr. HALLECK. I cannot say definitely in respect to the atomic energy bill because it is still under consideration in the other body. I should say if action is concluded on that tonight I would prefer to proceed with it immediately following the appropriation bill.

Mr. RAYBURN. If it is not possible to consider the atomic energy bill then, what would be next?

Mr. HALLECK. My present inclination would be to call up the omnibus river and harbor bill. In any event, I shall keep in touch with the gentleman from Texas and keep him informed as best I can of what will be called up.

Mr. RAYBURN. Of course I know the gentleman will do that, but other Members would like to know what may come up.

Mr. HALLECK. I appreciate that, too.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CARDINAL WYSZYNSKI AND RELIGIOUS PERSECUTION

The SPEAKER. Under previous order of the House, the gentleman from Indiana [Mr. MADDEN] is recognized for 30 minutes.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include a letter.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. MADDEN. Mr. Speaker, the morning papers announce an armistice entered into by France and the Communists involving Indochina wherein 13 million more human beings in southeast Asia pass under the yoke of Communist slavery. The people of the world are aware that one of the main weapons used by the Communist leaders in the Kremlin is their insidious and well organized attacks against all religions. Communism is fundamentally atheistic and antigod. Communism cannot endure and expand where freedom of religious worship thrives.

As a member of the special committe authorized by this Congress a year ago to investigate Communistic aggression, we have taken testimoney of several hundred witnesses both in this country and Europe, a great number of whom were priests, nuns, ministers, and rabbis, representing all religious denominations. The revelations recorded by our committee outlined in detail the inhuman treatment given leaders of religion by the Communists. Imprisoned clergy received more barbaric brain washing and torture than any atrocities committed in world history.

This week I have received hundreds of petitions containing approximately 20,000 signatures from citizens of East Chicago, Ind., and adjoining area, asking that the case of His Eminence Stefen Cardinal Wyszynski and other priests and religious coworkers under arrest in Poland, be presented to and investigated by the United Nations. The 20,000 signatures of citizens making this request refiect the minds and desires of all freedom loving Christian Americans in the hope that the delegates to the United Nations representing the United States when they meet in New York on September 17, take up for consideration the case of Cardinal Wyszynski as well as other leaders of religion now under arrest in Communist Poland and other countries behind the Iron Curtain.

Whenever the Communists take over a country, they proceed to destroy the old order and systematically and cruelly inflict their tyranny upon leaders of religion. In all representative countries, their main opposition and difficulty has been to curtail and abolish religious thought. Cardinal Wyszynski of Poland along with other church leaders like Cardinal Mindszenty of Hungary, Cardinal Stepinac of Yugoslavia, and hundreds of priests, ministers, and nuns have endured untold torture, brain washing, and communistic cruelty in their fight to preserve their church and religion in these captive countries. Up to now, the representatives of the free countries in the United Nations have neglected and omitted to charge the Communist members of the United Nations with their crimes against representatives of religion. I am today asking the State Department and United Nations Ambassador Henry Cabot Lodge that one of the first things to be considered at the September meeting by the United Nations membership is the unlawful arrest and criminal torture inflicted upon representatives of the church in communistic countries.

In 1948, Archbishop Stefen Wyszynski became the Roman Catholic primate of Poland. Under his church leadership he was polite but firm with civil authorities; he was uncompromising on principles. On the other hand, Communist authorities did not relax their rigid control over the church and their close surveillance over the activities of the church leaders was intensified. Under flimsy pretext or trumped up charges, church leaders were arrested, imprisoned, and in some cases, condemned to death and executed. Six bishops and several hundred priests were imprisoned from Cardinal Wyszynski's diocese. In a sermon denouncing the actions of the Communist police, he narrated the true conditions under which the church was struggling; where priests were not allowed to visit patients in hospitals or prisons. He asked that all true Poles demand justice and fairness in the practice of their religion. This sermon led to the Cardinal's arrest and incarceration. The usual trumped-up charges of spying for the United States, the Vatican and antistate activities were preferred against him. Years ago when the Roman Catholic Primate of Yugoslavia, Cardinal Stepinac and Cardinal Mindszenty of Hungary were arrested and imprisoned on ridiculous and unfounded charges by Communist regimes of those countries, then it was thought that these primates were but two of many religious leaders in their respective countries and therefore at the time, it was assumed by some, more or less naively, that other religious leaders were free and their leadership remained unchallenged. Unfortunately, this simple assumption was misleading, for the deadly Communist police state

extended its ruthless treatment to other religious leaders. The arrest and imprisonment of Bishop Nastitch of the Eastern Orthodox Chuch of Serajevo in Yugoslavia in 1948, the removal and arrest of Calvinist Bishop Ravasz and that of Lutheran Bishop Ordass in Hungary on some trumped-up charges and the wholesale elimination of both Protestant and Catholic leadership in all Baltic countries is definite proof that Communists regard all religions as heresies and religious leaders as arch-traitors to their totalitarian regime. On September 22, a military court in Warsaw sentenced the Most Reverend Czeslaw Kaczmarek, Bishop of Kielce, to 12 years imprisonment, while 3 priests drew prison terms ranging up to 12 years "on charges of spying for the Vatican and the United States." And the arrest and forced "retirement" of Cardinal Wyszynski clearly proves that even the highest spiritual leader voicing the united opinion of more than 25 million faithful Poles cannot be safe and free to speak the truth about the dreadful and deadening Communist police state in Poland today. My wholehearted sympathy goes to all those innocent souls suffering under totalitarian tyranny until the Communist oppressor is overthrown with the aid of the free world by the righteous wrath of patriotic and freedom-loving Poles, and once more may they enjoy physical and spiritual freedom in their beloved homeland. Let us all hope that that day is not far off.

I do hope that Secretary of State John Foster Dulles and United Nations Ambassador Henry Cabot Lodge will bring about, through our representatives at the United Nations, a complete investigation of religious persecution behind the Iron Curtain and a demand of Communist leaders that false arrests and inhuman tortures inflicted upon religious leaders under their domination, be terminated, and further that those now under political arrest be granted their freedom.

JULY 21, 1954.

Hon. JOHN FOSTER DULLES,
The Secretary of State,
Washington, D. C.

DEAR MR. SECRETARY: I received approximately 20,000 signatures from members of 14 Roman Catholic churches in East Chicago, Ind., and adjoining area, asking that the case involving the arrest and persecution of His Eminence Stefan Cardinal Wyszynski and other priests and coworkers under arrest in Poland be presented to the United Nations.

Under separate cover I am forwarding the petitions with the above-mentioned signatures.

I believe that our United Nations Ambassador Henry Cabot Lodge and our United States delegates to the United Nations General Assembly should take this urgent matter of religious persecution of Cardinal Wyszynski and others up on the floor of the United Nations for investigation and determination immediately upon convening September 17, 1954.

You will find enclosed a copy of the speech I have this day delivered to the Congress, outlining in further detail the unfortunate barbaric persecution of religious leaders behind the Iron Curtain. By presenting these facts to the United Nations, it would further arouse the people of the free world as well as those now behind the Iron Curtain regarding the true facts of the communistic threat to wipe out all religions in their aim to enslave the world.

Sincerely yours,

RAY J. MADDEN,
Member of Congress.

Mr. MACHROWICZ. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Michigan.

Mr. MACHROWICZ. I wish to compliment the gentleman and associate myself with his remarks. As the gentleman knows, the Committee on Communist Aggression, of which both he and I are members, has heard testimony from various witnesses, showing almost unbelievable artocities against priests and nuns, that have shocked the conscience of the entire world, yet there is no official action taken in protest. I certainly hope that the recommendation the gentleman is making will be given consideration at the next meeting of the United Nations.

Mr. MADDEN. I thank the gentleman from Michigan. He was also a member of the Katyn Massacre Committee which investigated the Katyn Forest massacres in the 82d Congress. He is also a member of the special committee created by the Congress in this session to investigate communistic aggression.

Mr. SAYLOR. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Pennsylvania.

Mr. SAYLOR. I would like to congratulate the gentleman on the stand which he has taken. The persecution of the clergy and religious people of all faiths behind the Iron Curtain has been such as to shock the conscience of Christians everywhere in the world. I hope, as a result of your statement, that official action is taken, so that free worship of Almighty God anywhere in the world may become a reality. I commend the gentleman and those who associate themselves with him.

Mr. MADDEN. I wish to thank the gentleman from Pennsylvania.

Mr. FEIGHAN. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Ohio.

Mr. FEIGHAN. I wish to congratulate the distinguished gentleman from Indiana [Mr. MADDEN], who has a very keen perception of the diabolical schemes of the madmen of the Kremlin. I feel that your disseminating these views to the people of this country and the free world will make it possible to establish a firm and positive policy by which we will be able to bring liberation, freedom, independence, and peaceful existence, only after we have destroyed the demonical schemes of the madmen of the Kremlin.

Mr. MADDEN. I thank the gentleman from Ohio, who is also a member of the special committee created by this Congress to investigate Communist aggression.

The SPEAKER pro tempore (Mr. SHEEHAN). The time of the gentleman from Indiana has expired.

TO AMEND CERTAIN PROVISIONS OF THE SECURITIES ACT OF 1933, AS AMENDED, THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED, TRUST INDENTURE ACT OF 1933, AND INVESTMENT COMPANY ACT OF 1940

Mr. WOLVERTON submitted a conference report and statement on the bill (S. 2846) to amend certain provisions of the Securities Act of 1933, as amended, the Securities Exchange Act of 1934, as amended, the Trust Indenture Act of 1939, and the Investment Company Act of 1940.

WHAT THEN OF HORSEPOWER AND THE 30:1 RATIO?

Mr. SIEMINSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SIEMINSKI. Mr. Speaker, in Korea, the Reds learned that firepower overwhelmed manpower.

What now of horsepower? It outpulls manpower.

What steps are the Reds taking to close the power gap between their world and ours?

At the moment, for each person in Asia, there is available, on the average, less than one horsepower. In America, for each person, the average is around 30 horsepower. Thus, the gap in horsepower between East and West could be expressed as 30:1 in favor of the West.

To dominate the world in peace as well as in war, it would appear that the Reds must first close the power gap, then pass the West, with a ratio in their favor.

In what way will the Reds power the East, before attempting to blanket the West?

A clear answer to that question might well guide the Congress in its vote on the use of atomic power. One or two observations might be helpful.

I am told that there is little water power in the East, that Russia has only four great rivers and China fewer than that.

Thus, factors of strategy, tactics and economics lead one to conclude that the Reds will power their lands with atomic plants.

It took the blood of Korea to reaffirm the superiority of firepower to manpower.

What treasure will the future require, before the superiority of atomic power for peacetime pursuits is established, if ever?

What then of horsepower and the 30:1 ratio?

SPECIAL ORDER GRANTED

Mr. HOFFMAN of Michigan asked and was given permission to address the House for 5 minutes today following the special orders heretofore entered.

THE DIXON-YATES CONTRACT

The SPEAKER. Under the previous order of the House the gentleman from California [Mr. HOLIFIELD] is recognized for 60 minutes.

Mr. HOLIFIELD. Mr. Speaker, I hold in my hand some excerpts from the news ticker dated as of today, July 21. At this time I will read the first one. It says:

President Eisenhower today stood firm on his controversial plan for the AEC to buy private power through TVA.

And the second one:

A bitter fight has been touched off in the Senate by Mr. Eisenhower's recent order to the Atomic Energy Commission to sign a long-term contract with the Dixon-Yates private utility group to supply power to the TVA to replace TVA power to be furnished to the AEC.

Senators from the TVA area have contended Mr. Eisenhower had no right to order the AEC to sign such a contract.

At his weekly news conference Mr. Eisenhower rejected the contention that the AEC is an independent agency over which he has no direct control. The President said the AEC could not be classed as independent in the way that some other Government commissions are. He said there are times when he is compelled to exercise his authority over the Commission.

This was in reference to the President having directed the AEC to sign a contract for private power, over the objections of the majority of the five Commissioners who held that the contract exceeded AEC authority.

Mr. Speaker, I could hardly believe my eyes when I read this excerpt from the news ticker tape today. I do not know who is advising the President in regard to the independence of the Atomic Energy Commission, and I would be the first to say that the President had been conferred certain authority in the Atomic Energy Act of 1946 as amended. But that authority is specifically spelled out in the Atomic Energy Act, and it goes to the point of granting to the President the right to appoint the members of the Commission and to designate one of them as chairman.

I want to comment at this time that the members of the Atomic Energy Commission must be confirmed by the Senate and that they serve for terms of 5 years. At the beginning these terms were staggered so that none of the 5 terms would expire at any one time.

Then there are certain prerogatives in the act. The President can appoint a general advisory committee for terms of 6 years each, and this committee is usually composed, has been in the past, of scientists. The scientists, of course, act in an advisory capacity.

Then there is another section of the Atomic Energy Act of 1946 which provides that once each year the President shall set for production purposes, the amount of special nuclear material. That is the substance from which atomic hydrogen weapons are made. He sets the amount.

Then there is still another section of the bill which grants to the President the authority to transfer from civilian hands to the military atomic weapons when they are needed to be transferred for the defense of the Nation. That particular provision was written in especially so that no trigger-happy general could take one of these atomic bombs and start dropping it anywhere in the world and start an atomic war.

We wrote that provision in because we realized that the atomic weapon so far exceeds in capacity to destroy normal weapons that we must put a solemn obligation on the President that the President and the President alone can designate when and where an atomic weapon is to be used. But the general provisions of the act were written by the Congress to guide the Atomic Energy Commission and with these exceptions I have noted, with possibly 1 or 2 other minor exceptions, they apply to the Atomic Energy Commission as an independent commission set up just like any other independent commission is set up under the statutes enacted by the legislative body into law. I think that this is one of the most astounding statements I have ever heard of to cast a reflection upon whether the Atomic Energy Commission is an independent commission or not.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman and after he makes his remarks I have still another excerpt I want to read.

Mr. JONES of Alabama. As I understand the proposition, the President by the exercise of his Executive authority if he had a mind to could order all Executive functions to be handled by the Atomic Energy Commission. If he could tell them to make a contract with the Tennessee Valley Authority why could he not say, "Carry out all other Executive directives and fiats."

Mr. HOLIFIELD. As far as I can see, that statement would apply equally to other duties and responsibilities of the Atomic Energy Commission as outlined in the statute. But if we are to accept the President's statement it would go far beyond that, and allow the President to also order them to do things which are not outlined in the statute, such as the negotiation of the definitive contract with the Dixon-Yates people.

Mr. JONES of Alabama. I read from the press release:

There are times when he is compelled to exercise his authority over the Commission.

Is not that statement within itself an acknowledgment that there is no authority for AEC to make a contract with the Tennessee Valley Authority?

Mr. HOLIFIELD. Well, it might apply to that.

Mr. JONES of Alabama. If they did not make a contract with TVA would they be derelict in any responsibility that the AEC has under existing law?

Mr. HOLIFIELD. Not that I know of, especially in view of the fact that 3 out of the 5 commissioners stated that this is an awkward and unbusinesslike thing for them to do and that it went far beyond the original purpose of the act, and involves them in extraneous matters over which they thought they should not be concerned.

Mr. JONES of Alabama. An extraordinary function which they never realized they would be called upon to carry out?

Mr. HOLIFIELD. I think the gentleman quotes some of the reasons that they gave.

Mr. JONES of Alabama. The legal justification was not based upon a hypothesis such as contained in the Dixon-Yates agreement, was it?

Mr. HOLIFIELD. The general manager, Mr. Boyer, in his testimony before the Joint Committee on Atomic Energy when this legislation was requested, specifically limited it, and I am using his words when I say he limited it, in its application to the three existing atomic energy facilities—Oak Ridge, Portsmouth, and Paducah.

Mr. JONES of Alabama. He was not differentiating then the proposal that they are now considering, the Dixon-Yates proposal?

Mr. HOLIFIELD. That was unheard of at that time.

Mr. JONES of Alabama. The legal analysis for the opinion which was considered by the AEC was based upon an examination of the three existing contracts and not some hypothetical contract that Dixon-Yates brought in later on?

Mr. HOLIFIELD. That is right.

Mr. JONES of Alabama. I may say to the gentleman from California that I want to make a study of that proposal and examine it thoroughly myself.

Mr. HOLIFIELD. I want to read another excerpt from the ticker tape that goes as follows:

The President said it had long been his policy to change his plans if someone showed him a better way of accomplishing his purpose.

I will come back to that sentence later.

He then said that his action on the power contract was motivated by fear of the consequences of continued Government power development in one area of the country without providing similarly for the redevelopment of other river basins. As for anyone saying he wanted to destroy the TVA, the President said the politest way he could answer that was that such an interpretation was in error. On the contrary he said he was prepared to support the TVA with all his heart. A reporter said that one of the principal objections to his position stemmed from the fact that 3 AEC members opposed signing the power contract but had to do so on Presidential orders. Mr. Eisenhower was then asked whether he felt he could order independent agencies to execute administrative policies to which they were opposed. The President said in the first place that he was governed by the recommendation of the Attorney General. He added that someone must exercise responsibility when the chips are down. He said that was his position in this power contract, adding that he did not believe the AEC could be classed in the same independent group with, for example, the ICC.

Now, this is in addition to the first excerpt that I read, further confirmation of an amazing position which the President finds himself in. In the first sentence he said that it had long been his policy to change his plans if someone showed him a better way of accomplishing his purpose. Well, I certainly believe that a better way of accomplishing his purpose would be for the President to exercise executive authority in the

executive field and allow the independent commissions set up by statutes enacted by the Congress to exercise their functions under those statutes which were passed by the legislative body.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. Could the gentleman from California tell us how many proposals the AEC considered other than the Dixon-Yates proposal?

Mr. HOLIFIELD. The AEC only considered one tentative proposal by the Burch-Von Tresckow group, and I believe that was given a very short study and an immediate rejection without what I would call due consideration.

Mr. JONES of Alabama. And did that same group later on resubmit a subsequent proposal?

Mr. HOLIFIELD. I understand that they did.

Mr. JONES of Alabama. Was it considered?

Mr. HOLIFIELD. Not that I know of.

Now, I find it hard to reconcile the President's actions and his words. We know that when he was in the campaign, in a speech at Memphis, Tenn., he indicated that the Tennessee Valley Authority was an indication of how Government could work its will for the benefit of the citizens. Maybe the gentleman from Tennessee [Mr. PRIEST] could more properly quote his words in that speech.

Mr. PRIEST. Mr. Speaker, if the gentleman will yield, I cannot quote his words exactly in that speech. The gentleman is correct in the interpretation he has put upon what he said, including, at the same time, I believe, the statement that if he were elected President, the Tennessee Valley Authority would continue to be operated at maximum efficiency. But, before that statement, he did, as I recall, emphasize that relationship that existed between the local area and the Federal Government and used it as an example of how Government could work its will for the benefit of a region or for the people of a region.

Mr. HOLIFIELD. How the Federal Government and the local bodies could operate together for the benefit of the people of the area.

Mr. PRIEST. The gentleman is correct.

Mr. HOLIFIELD. Now, is it not true that after the President was elected he issued a statement in which he labeled the Tennessee Valley Authority "creeping socialism"?

Mr. PRIEST. He cited it as an example of what he would call creeping socialism.

Mr. HOLIFIELD. And this happened to be, as I remember, on June 17, 1953, when he labeled the Tennessee Valley Authority creeping socialism. And, this may be partly incidental, but on June 16 or 17, 1954, a letter came up from Mr. Hughes of the Budget Bureau directing the Atomic Energy Commission to proceed to negotiate a definitive contract with the Dixon-Yates group. Is that not true?

Mr. PRIEST. That is correct. I believe it was 1 year to the day from the time the press comment with reference to creeping socialism was made.

Mr. HOLIFIELD. Is it not true that the site for the Dixon-Yates powerplant is across the Mississippi River on the Arkansas side; and it is generally considered completely outside of the Tennessee Valley area?

Mr. PRIEST. Certainly it is outside of the Tennessee Valley area. And since the gentleman has mentioned it, that has been one rather interesting phase of this question to me. It has been argued even on the floor of the House, as the gentleman will recall, that the proposed site of the Fulton steam plant was outside of the Tennessee Valley area. That has been argued here. Yet, the site of that plant is in the State of Tennessee on the east side of the Mississippi River and certainly is much more closely related to the Tennessee Valley area than a site across the Mississippi River, West Memphis, Ark., which is in another State. It has been a little difficult for me to reconcile arguments that this is part of the Tennessee Valley area and that the site proposed for the Fulton steam plant was outside of that area.

Mr. HOLIFIELD. Pursuing that point one step further, the Dixon-Yates proposal plans to build a 600,000-kilowatt plant and transmit the energy to the middle of the Mississippi River, thereby retaining its complete jurisdiction under the Arkansas Utilities Commission—whatever may be its name. Then the 600,000 kilowatts are picked up by a transmission-line connection in the middle of the river which the TVA is directed to construct at a cost of $9 million to bring that current into the Tennessee Valley area and to the people of Memphis, Tenn.; is that not so?

Mr. PRIEST. That is correct.

Mr. HOLIFIELD. So this is in no sense an extension of the TVA territory, but it is an invasion from across the river in the State of Arkansas of a 600,000-kilowatt block of power into the TVA area. Therefore it is a direct attack upon the recognized area of distribution which is generally considered the Tennessee Valley area.

Mr. PRIEST. I think the gentleman used a very apt word when he referred to it as an invasion of that territory.

Mr. HOLIFIELD. And therefore it might well be termed, as the President of the United States is well acquainted with military terms, an invasion of the public power area which the Tennessee Valley Authority has been serving and is seeking to serve in the State of Tennessee.

Mr. PRIEST. And an invasion which the Tennessee Valley Authority is directed to accept, even to assist in its completion, by building a power line halfway across the river, so that the invasion can be consummated.

Mr. HOLIFIELD. That is right. Now, reading again from the excerpt:

Mr. Eisenhower was then asked whether he felt he could order independent agencies to execute administrative policies to which they were opposed. The President said in the first place that he was governed by the recommendations of the Attorney General.

I want to comment upon that. This is the first information that the Attorney General has interpreted section 12 (d) of the Atomic Energy Act of 1946, as giving the President authority to direct the Atomic Energy Commission—in this Dixon-Yates matter and this is a very important statement, if the President has been correctly quoted. I read the words from the excerpt, because he said in the first place he is governed by the recommendations of the Attorney General. I suppose he means as to the legality of this action. Heretofore the only legal authorities who have said that the Atomic Energy Commission was entitled to do this, to negotiate this Dixon-Yates contract, were the legal minds within the Commission itself. Now apparently for the first time we have the Attorney General recommending it.

I understand that the gentleman from Alabama [Mr. JONES] directed an inquiry to the Attorney General some time ago on this point. Is that a fact?

Mr. JONES of Alabama. It was last week. I directed an inquiry raising certain legal points with respect to the President's authority to use the Atomic Energy Commission to execute contracts for the Tennessee Valley Authority. This morning I received a letter from the Attorney General stating that that type of service was not for the legislative branch of the Government but was an executive function. Therefore, he felt constrained not to give opinions to Members of the House and Senate. This was the substance of the letter. He did not state that he had not advised the President on his legal authority, and I presume that the advice had been given by the Attorney General to the President in advance of the Attorney General's letter to me.

Mr. HOLIFIELD. This is the first time we have had any indication that the President has been acting upon the Attorney General's recommendation. It would certainly be interesting to me as a Member of Congress and as a member of the Joint Committee on Atomic Energy to see the Attorney General's opinion on that particular authorization, because in appearances before our committee this section, section 164 of the pending Cole-Hickenlooper bill, which is a verbatim carryover from section 12 (d) of the Atomic Energy Act, has been pointed to as giving them authority to consummate such a contract.

Let me say that there is a provision in this bill which, in my opinion, the President of the United States could use under certain circumstances for this purpose, and that is the provision in the bill which gives the President the right to exempt the Atomic Energy Commission from ordinary contract provisions when it is an emergency and when it is in furtherance of national defense needs. This section has never been referred to by any member of the Commission as their authority because the President must make a finding that it is necessary in the national defense.

Mr. JONES of Alabama. The President already has those inherent rights to use extraordinary measures in time of peril or distress or when the security of this country is involved.

Mr. HOLIFIELD. That is right. Let me read this section 162:

The President may in advance exempt any specific action of the Commission on any particular matter from the provisions of law relating to contracts whenever he determines that such action is essential in the interest of the common defense and security.

There has never been any appeal to that section because they know this is valid only for defense purposes. The Dixon-Yates power is for the commercial, residential, and industrial uses of the people in the Memphis area. It is not for an Atomic Energy Commission defense plant or any other defense plant.

Mr. JONES of Alabama. So that fact is not even under consideration.

Mr. HOLIFIELD. That fact is not even under consideration. So the Attorney General must be relying, if he has made an opinion, on section 12 (d) of the Atomic Energy Act of 1946 as amended, which is now the law governing the Atomic Energy Commission's actions.

Mr. PRIEST. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Tennessee.

Mr. PRIEST. Has the Attorney General or any representative of the Department of Justice made any statement before the Joint Committee on Atomic Energy with reference to the legality of the question we are here discussing?

Mr. HOLIFIELD. No; neither the Attorney General or any of his representatives have appeared on this point before the joint committee. We have only had the testimony of the commission and the testimony of their lawyers that they are authorized to go ahead on the basis of their interpretation of the words "in connection with" which are used in section 164, which is, in my opinion, straining the English language beyond the point of forbearance.

Mr. PRIEST. And is it not true that the legal staff as well as the commission previously had stated that the authority to sign such contracts applied only in the case of Paducah, Oak Ridge, and Portsmouth under section 12 (d) of the act?

Mr. HOLIFIELD. Mr. Boyer, speaking for the AEC, made such a statement.

Mr. JONES of Alabama. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. JONES of Alabama. The gentleman from Tennessee a moment ago stated that the President said the TVA was an example of creeping socialism, and at the same time he stated, as I understand it, that TVA was a historical fact. Does the gentleman from California know that at that time the United States Government, that is this administration, had representatives in Israel and in Jordan trying to reconcile those two States to the construction of a project of the Tennessee Valley type to resolve the tremendous and delicate question of water rights in those countries?

Mr. HOLIFIELD. That is right, the gentleman has stated it perfectly.

Mr. JONES of Alabama. It was not a demonstration or an example of creeping socialism so far as those two countries are concerned, was it?

Mr. HOLIFIELD. No; I think it was exporting one of our tried and true American procedures.

Mr. JONES of Alabama. And it was a forceful, dynamic demonstration of democracy at work as far as those two countries are concerned, was it not?

Mr. HOLIFIELD. I presume it was a part of the President's "dynamic" foreign policy because he authorized it, and he has stated on several occasions, that is either the President or his Secretary of State, Mr. Dulles, that they are advocating a "dynamic" foreign policy.

Mr. JONES of Alabama. Does the gentleman know whether or not there is pending with any committee here any authorization for the expenditure or a request for expenditure for the construction of a Tennessee Valley Authority type project in those countries?

Mr. HOLIFIELD. I am not aware of it. I would suggest that the gentleman scrutinize very carefully the items provided for in the foreign aid bill. He might find some money appropriated for that kind of engineering project along the lines of the project that he has spoken of in those foreign countries, but I am not aware of it personally.

Mr. Speaker, I am not going to take the time of the Members of the House at this late hour, but at this point I ask unanimous consent to place in the RECORD my own remarks and some extracts from official documents under the title "The Dixon-Yates Contract Contains a Boobytrap for TVA."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The statement referred to is as follows:

DIXON-YATES CONTRACT CONTAINS A BOOBYTRAP FOR TVA

(By Hon. CHET HOLIFIELD, Member of Congress)

Among the many boobytraps in the proposed Atomic Energy Commission-Dixon-Yates contract is a possible development which has not as yet been discussed.

A letter under date of April 10, 1954, signed by Mr. E. H. Dixon, president of the Middle South Utilities, and Mr. J. M. Barry, chairman of the executive committee of the Southern Co., was sent to the Atomic Energy Commission, attention of Gen. K. D. Nichols, General Manager. The concluding paragraph of the letter reads as follows:

"The attached appendix sets forth an outline of additional matters in our proposal, including the more important provisions which will be embodied in a contract growing out of it. We are ready to negotiate a definitive contract at your early convenience."

On page 5 of the appendix referred to, under paragraph (7), entitled "Termination," subparagraphs (a) and (b), the following language occurs:

"(a) After commencement of full-scale operation, termination will be allowed on 3 years' notice, during which period assignment may be made to another governmental agency, at contract rates, including all taxes and other adjustments.

"(b) Upon termination seller shall be entitled to and will absorb capacity at least as rapidly as load growth will permit, but in any event in the amount of at least 100,000 kilowatts in each year, absorbing associated proportions of costs. Buyer may assign any balance to another governmental agency at an increased price to be approved by FPC, such price to include recognition of any increased costs then encountered or foreseen by seller. To extent such capacity is not used by buyer or assignee, buyer will reimburse seller for pro rata proportion of base capacity charge, as adjusted, and taxes."

Note that in subparagraph (a), that after the new plant starts full-scale operation, the Dixon-Yates group grants to the Atomic Energy Commission (1) the right to give a 3-year termination notice; and (2) the Atomic Energy Commission is given the right during the 3-year termination notice period to assign to "another Government agency, at contract rates, including all taxes and other adjustments."

Now we turn to subparagraph (b). After the 3-year termination notice period has expired, several privileges and obligations are in order.

(1) Dixon-Yates "shall be entitled to and will absorb capacity as rapidly as load growth will permit"; this could allow Dixon-Yates to absorb, for its own use, the complete capacity of its plant (600,000 kilowatts) in the 4th year of its full-scale operation, with Atomic Energy Commission concurrence.

(2) "But in any event," it will absorb 100,000 kilowatts in the fourth year and 100,000 kilowatts per year for 5 successive years. This formula permits legally complete recapture of plant capacity in one fell swoop, immediately after the end of the 3-year notice period—or gradual absorption of capacity from the 4th to the 9th year by Dixon-Yates.

(3) During this absorption period, of from 1 to 6 years, the Atomic Energy Commission is permitted to assign the unabsorbed capacity to another Government agency (obviously the TVA, as no other Government agency could use such residue), but not at contract prices—"at an increased price to be approved by the FPC." The FPC, in setting this increased price, must "include recognition of any increased costs then encountered or 'foreseen'" by Dixon-Yates. This is an amazing provision, in view of the fact that "other conditions" clause on page 3 of the appendix would allow additional increases authorized by the Arkansas Public Utilities Commission, as well as any increase coming under the vague clause "other conditions."

This means, in effect, that TVA can be put in the position of building a $9 million transmission line from the Dixon-Yates terminal to its distributive area; use the 600,000-kilowatt capacity for 3 years, and then have a gun placed to its head through legal right to withdraw the 600,000 kilowatts, unless TVA would agree to pay the increased rates allowed under the wide-open clause noted heretofore in the contract.

Surrender to the threat would force the costs of the TVA and its customers upward, and would destroy the yardstick on rates.

Once the TVA yardstick is padded upward and destroyed, the private utilities throughout the South would reap millions of dollars out of the pockets of electric energy users.

You may say that such a development is unlikely, and that it would involve another collusive agreement on the part of the Atomic Energy Commission and Dixon-Yates.

My comment is that the contract makes it possible legally. The policy of the administration is anti-TVA, and I believe the independence of the Atomic Energy Commissioners is no longer to be relied on—when they are directed by the President to carry out his policy. This is evident by the testimony given before the Joint Committee on Atomic Energy, which, in my opinion, shows a lack of courage to object to a clear viola-

tion of the language and legislative history pertaining to section 12 (d) of the Atomic Energy Act of 1946, as amended.

This procedure is indicated, not only by legal provision, but by Commission intent; and as proof of my charge, I call your attention to a letter dated April 15, 1954, addressed to Joseph M. Dodge, Director, Bureau of the Budget, and signed by Lewis L. Strauss, Chairman of the Atomic Energy Commission. On page 2, paragraph (4) under the heading "Cancellation Is Provided as Follows," subparagraph (a):

"(a) For TVA to continue to receive and AEC to pay power at the contract rates during a 3-year notice period. This period should be sufficient to permit TVA to make other arrangements for the meeting of the requirements of the Memphis area."

It is obvious that when the 3-year notice period is announced, TVA is put on notice "to make other arrangements for meeting the requirements of the Memphis area."

What arrangements could TVA make? Could TVA come to Congress during this anti-public-power-administration, and obtain authorization for the originally contemplated Fulton steam plants? Would TVA not be told that it had better "negotiate a definitive contract with Dixon-Yates"?

This is the boobytrap designed for TVA by cunning legal minds.

Afraid to come out in the open and make a frontal attack, they, like all cowards, have resorted to devious and tricky methods to accomplish their end.

Their end is to prevent TVA building the Fulton plant; use the credit and administrative devices of the Government to subsidize a favorite private utility; pad upward the TVA yardstick rate; and thereby extort from the pockets of the American people many hundreds of millions of dollars annually for the benefit of private utility groups operating under monopoly franchises.

Mr. HOLIFIELD. Mr. Speaker, there is another subject which requires some real consideration, and that is the subject of the international provisions of the atomic energy bill which is pending. An attempt is being made to sell the people of the United States on the idea that there are provisions in that bill which will strongly strengthen the President's hand in dealing with the international peacetime use of atomic energy. There is a section in the bill, section 124, I believe, which is entitled "The International Atomic Pool." I make the statement tonight that this international atomic pool section 124 is as phony as a $3 bill. It reads as follows:

The President is authorized to enter into an international arrangement with a group of nations providing for international cooperation in nonmilitary applications of atomic energy, and he may thereafter cooperate with that group of nations pursuant to sections 54, 57, 64, 82, 103, 104, or 144 (a): *Provided, however,* That the cooperation is undertaken pursuant to an agreement for cooperation entered into in accordance with section 123.

And I have made an extensive study of this international section 123 and 124. I have come to the conclusion that in place of facilitating the President, it puts restrictions and curbs him in the negotiation with these foreign nations.

There are three methods in this bill of international cooperation. One is called an agreement for cooperation. And that is on a very low level and it has many obstructions to exchanging information or material.

The next one is what is known as an international agreement. The "international agreement," if it comes up to that stage, has to come to the Congress of the United States for approval. The President has the right now to send any kind of an international agreement to us for approval. Therefore, you cannot give him the authority. The administration has that authority.

The third and highest level of cooperation is the treaty level. The Constitution of the United States gives to the President the treaty power, and the Congress cannot add to that treaty power. The Constitution gives it to him. But, mark you well, that when the President now comes to negotiate a treaty or an international agreement or an agreement for cooperation, his hands are not untied. He is not free to negotiate. And remember this, the President, in his message of February 17, stated that there would be conferences with these other nations, and following the conferences he would call upon the Congress for additional legislation to implement those conferences. Those conferences have been taking place, as I understand, but the President has not yet sent up any recommendations to help him make this international pool arrangement. So I maintain that section 124 in this bill, with the title "International Atomic Pool" is put in the bill strictly from the standpoint of propaganda value, and to make the people of the United States think that this bill is implementing the President; it is something the President has not asked for and has not sent up a legislative draft for; something which is being prematurely inserted at this point because it is being inserted without the President's request. Therefore, I say it must be in there for a purpose. If the purpose is not to help the President and to add to his powers, it must be to tie his hands, to put curbs around him, to put provisions around his negotiations which will direct those negotiations into a certain channel, a channel which the sponsors of this bill must be interested in. I say it should not even be in the bill. The President has not asked for it. He has not sent up a list of advice to follow to formulate legislation to help him form an international pool; and, as I say, Congress is premature in trying to consider it. I point to the President's address of February 17, as an indication of what I am talking about.

At this time, Mr. Speaker, I am going to put an extended analysis on this particular subject in the RECORD. The title of it is "The Atomic Pool Is Empty." I ask unanimous consent that my remarks on that subject be extended at this point in the RECORD.

The SPEAKER pro tempore (Mr. SHEEHAN). Is there objection?

There was no objection.

THE ATOMIC POOL IS EMPTY

Mr. HOLIFIELD. Mr. Speaker, there are many phantoms dancing around the atomic energy bill before the Senate, and I want to bring one of them to earth right now.

The belief that the atomic energy bill would implement President Eisenhower's proposal for an international atomic pool is completely unfounded. This is one pool that has no water, so far as the legislation is concerned.

Section 124 of the bill has the caption "International Atomic Pool." It is a phoney. That section would confer no new authority on the President and, in fact, would take away some he has now. The President's hands would be tied in negotiating with other countries on atomic pool arrangements.

When the President sent a message to the Congress on February 17 of this year, asking for revisions in the atomic energy law, he included this statement:

These recommendations are apart from my proposal to seek a new basis for international cooperation in the field of atomic energy as outlined in my address before the General Assembly of the United Nations last December. Consideration of additional legislation which may be needed to implement that proposal should await the development of areas of agreement as a result of our discussions with other nations (83d Cong., 2d sess., H. Doc. 328, p. 4).

We have heard nothing more from the President on legislative implementation of the atomic pool plan. In fact there is no plan, only the original proposal, couched in the vaguest terms, which the President made in an address to the United Nations General Assembly.

According to the accounts we read in the press, in the first blush of worldwide enthusiasm over the atomic pool proposal, the President directed Secretary of State Dulles to confer with Soviet representatives. So far as I know, nothing came of it. The Soviet bear did not change into a lamb.

Perhaps the Soviet bear will never learn peaceful habits, but that dismal prospect is no excuse for closing the door completely to future negotiations on peaceful uses of atomic energy in which all nations participate. Section 124 of the atomic energy bill, however, would close that door. The security guarantees and other conditions it would impose on other nations as the price of our cooperation would never be fulfilled by some nations in a hundred years. And this cooperation, mind you, is supposed to be "in the nonmilitary applications of atomic energy."

Let us take a closer look at the spurious authorization for an international atomic pool contained in section 124 of the atomic energy bill.

First of all, it would authorize the President to enter into an international arrangement. That much of the authorization certainly is superfluous. Under the Atomic Energy Act of 1946—the McMahon Act—the President's authority to enter into international arrangements was recognized. International arrangement was defined in the McMahon Act as "any treaty approved by the Senate or international agreement hereafter approved by the Congress, during the time such treaty or agreement is in full force and effect." Under his constitutional power as head of the United States, the President can enter into treaties or international agreements, the latter requiring, in atomic energy matters, concurrence by both Houses of Congress.

The pending atomic energy bill accepts the McMahon Act definition of "international arrangement," and so confers no new authority on that score. However, the new bill evolves a lesser species of international transaction called an "agreement for cooperation." Agreements of this sort stand separate and apart from international arrangements, according to the definition of the latter in section 11k of the bill, and yet section 124 requires that an international arrangement for an atomic pool be carried out by agreements for cooperation as prescribed in section 123.

In other words, the President's existing authority to make treaties or international agreements relating to the peacetime uses of atomic energy would be narrowed, not broadened, by the terms of this bill. Presumably, he could go ahead and make the treaty or international agreement, but it would remain a scrap of paper unless and until the other nation or nations involved could fulfill to our satisfaction the stringent conditions leading to agreements for cooperation.

Since an "agreement for cooperation" is excluded by definition from "international arrangements," the confusion is compounded by the terms of section 121, carried over from the McMahon Act. Section 121 says that any provision of the bill or any action of the Commission which conflicts with the provision of an international arrangement shall be of no force or effect. An agreement for cooperation certainly is a provision of the bill or an action of the Commission. If an international arrangement is made which conflicts with a subsequent agreement for cooperation, the latter is nullified according to the wording of section 121. And yet section 124 requires the agreement for cooperation to follow through on the international arrangement. This means again that the President, in making international arrangements, must not go beyond the restrictive conditions of agreements for cooperation, or else sections 121 and 124 contradict each other, and section 124 contradicts itself.

The confusing and contradictory wording of section 124 is brought out in relation to section 123. The international arrangement could be entered into with a "group of nations" but the agreements for cooperation are to be made with individual nations—except a Department of Defense agreement with a regional defense organization. The Senator from Rhode Island [Mr. PASTORE] has said a great deal on this point. He would strike section 124 as so much "eyewash" and amend the sections involving agreements for cooperation to enable the President to enter an international atomic pool arrangement without the need for obtaining further congressional approval.

I believe the Senator from Rhode Island is overoptimistic in the expectation that section 123 would encourage the formation of an atomic pool. In the first place, as I stated, it would shut the door in the face of the Soviet Union, even though the purposes of the cooperation are to be nonmilitary. Secondly, the number of nations fulfilling the guaranties would be so small that for all practical purposes the pool would be a droplet.

Let us look now at the fields in which agreements for cooperation could be made, and what conditions they must fulfill.

The Atomic Energy Commission would be authorized to cooperate with other nations by distributing special nuclear material, section 54; permitting the production of special nuclear material by persons outside the United States, section 57; distributing source material, section 64; distributing byproduct material, section 82; permitting the importation or exportation of atomic production or utilization facilities, section 103; permitting the exportation of utilization facilites used in medical therapy or of production and utilization facilities used in research and development, section 104; communicating restricted data relating to reactor development and other applications of atomic energy for peaceful purposes, section 144a; and, through the Department of Defense, communicating restricted data in certain limited military aspects, section 144b.

For cooperation to be exercised on any of those fields just listed, "agreements for cooperation" would have to be made with each of the nations involved or permissibly with a regional defense organization on the military aspects. These agreements for cooperation must include, first, a description of the terms, conditions, and so forth, of the cooperation; second, guarantees that security safeguards and standards will be maintained; third, guarantees that material transferred will not be used for atomic weapons or other military purposes; and fourth, guarantees that material or restricted data transferred will not be used and get into the hands of unauthorized or outside parties.

Before proposed agreements, including terms and guarantees as described above, can become effective, they must be, first, approved by the Atomic Energy Commission, or the Department of Defense in certain cases; second, approved by the President with a written finding that they constitute no unreasonable risk to our defense and security; and third, submitted to the Joint Committee on Atomic Energy for a 30-day period.

Although none of us is prepared to argue that restricted information shall be communicated freely, without any safeguards, whatever, still it is evident that the old, stale notion of an atomic bomb monopoly still dominates the approach in section 123. It proceeds on the assumption that atomic information is a one-way street, that we have everything and other nations have nothing. This is the sheerest self-delusion and it is a self-delusion that is self-defeating. In trying to protect ourselves we may hurt ourselves.

Suppose Great Britain, or one of the many other countries actively engaged in conducting atomic research comes up with a crucial invention or discovery that would be of strategic significance to the military phases of our own atomic energy program. That supposition is neither absurd nor far-fetched. It is entirely within the realm of possibilities. Under section 123 of the bill, could Great Britain be expected to communicate her findings to us when we lay down a condition that any material we transfer to her will not be used for atomic weapons or even for research and development in the military field?

Under section 144b, the President could authorize the Department of Defense with the assistance of the Atomic Energy Commission, to cooperate with any other nation or regional defense organization to which the United States is a party and to communicate to that nation or organization restricted data necessary to first, development of defense plans; second, training of personnel in use of, and defense against, atomic weapons; and third, evaluation of capabilities of potential enemies in atomic warfare. But any activity under this section again is subject to the conditions for agreements for cooperation laid down in section 123.

One of those conditions is "that any material to be transferred pursuant to such agreement will not be used for atomic weapons, or for research or development of atomic weapons, or for any other military purpose." It says "material," not "special nuclear material." In other words, as I read the section, any data or possibly training equipment transferred under section 144b to allies engaged in mutual-defense activities, could not be used for the military purposes intended. Frankly, like some other parts of the bill already discussed, it doesn't make sense to me.

I will propose a series of amendments designed to remedy the serious defects in the international activities section of the bill and to untie the President's hands in this field without at the same time surrendering congressional prerogatives.

First I propose, on page 52, in line 12, that the word "approved" be stricken and the words "submitted to the President" inserted in lieu thereof. This will have the effect of preserving the President's authority to initiate and undertake agreements for cooperation without being subject to a veto by the Atomic Energy Commission or the Department of Defense.

As the bill now stands, both the Commission and the Department must approve proposed agreements for cooperation.

Surely the President should obtain their advice on the sufficiency of the guaranties, but it should remain with him to decide whether the Nation ought to take the calculated risk of entering such agreements in certain cases where the guaranties may not be as adequate as we may wish. In our system of government, the President is in the best position to weigh the international factors and to balance the risks. Technical and professional personnel in the Atomic Energy Commission and the Department of Defense are not in that position.

Secondly, I propose on page 52, in line 22, after the word "purpose" and before the semicolon, to insert the following: "except where the President determines that such uses will bring reciprocal benefits and be otherwise advantageous to the United States." This would allow the President, in very special and rare circumstances, to allow material to be

transferred for atomic weapons research and development or for other military purposes when our country would gain benefits therefrom, whether in achieving mutual defense objectives or in getting valuable atomic discoveries or other information from other countries.

Thirdly, I propose on page 53, in line 16, before the period, that the following be inserted: "after which period of time the agreement shall take effect." This is a technical amendment which would allow the President to make changes in proposed agreements for cooperation when the Joint Committee on Atomic Energy has signified disapproval in any particular, before the 30-day period expires in which the proposal lies before the committee. The amendment would remove doubt as to the time the agreement takes effect while allowing some flexibility for modifications within the 30-day period.

Next, I propose that section 124 be completely rewritten as follows:

SEC. 124. International Atomic Pool: The President is authorized to enter into an international arrangement with any nation or number of nations or with an organization representing any or all of such nations providing for international cooperation in the nonmilitary applications of atomic energy. The President is further authorized to request the cooperation of or the use of the services and facilities of the United Nations, its organs, its specialized agencies, or other international organizations in carrying out the purposes of this section. Any agreements made by the United States under the authority of this section with other governments and with international organizations shall be registered with the Secretariat of the United Nations in accordance with the provisions of article 102 of the United Nations Charter. In the event further legislation is necessary to implement an international arrangement authorized by this section, the President shall transmit recommendations therefor to the Congress.

This amendment would meet in part the objections of both the Senator from Rhode Island [Mr. PASTORE] and the Senator from Ohio [Mr. BRICKER]. It would authorize the President to negotiate an international atomic pool arrangement with one or more nations or with all nations, or with an organization representing them, without the binding restrictions of section 123. At the same time, being an international arrangement, the proposal would have to get approval from both Houses of Congress, according to the stipulation in section 11k.

Furthermore, the President would be authorized to call on the United Nations or any of its agencies in working out the international atomic pool. The precedent for such authorization is to be found in mutual aid legislation.

It is strange that so little has been said about the United Nations in debate on the international activities sections of the bill. The President made the proposal originally before the United Nations General Assembly, yet the authors of this bill look upon the idea as strictly a bilateral proposition between the United States and individual nations under the terms of section 124 as modified by section 123. I believe we should enlist the help of the United Nations and utilize its resources in attempting to promote peaceful concerted endeavor in applying atomic energy for the common benefit of mankind.

Finally, any agreement made under the amendment would have to be registered with the U. N. secretariat pursuant to article 102 of the United Nations Charter.

My final amendment proposes, on page 58, in line 18, after the word "That", to insert the following: "unless the President determines that the common defense and security will be endangered thereby." The purpose of this amendment is to allow the President the necessary minimum of discretion in determining that our own defense and security might be jeopardized unless our allies, in certain conceivable circumstances could have more information than that relating to the external characteristics of atomic weapons.

Mr. Speaker, I hope the Members will support these amendments and give some real assistance to the President. If they do not accept these amendments I hope they will join me in striking section 124 from the bill in the interest of not placing additional curbs on the President in his vital international negotiations on an international atomic pool.

THE NEW RED COLONIAL EMPIRE

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. FEIGHAN] is recognized for 15 minutes.

Mr. FEIGHAN. Mr. Speaker, since a number of Members of the House have asked me for the details of my statement made Monday in New York, and because a number of other interested organizations and individuals have also been seeking some of the details made in my statement, I am taking this occasion to acquaint the Members of the House and others interested with the major conclusions I have reached as a member of the Select Committee to Investigate Communist Aggression.

I quote:

Having just returned from a 5-week mission to Europe as a member of the Select Committee to Investigate Communist Aggression, I am all the more firmly convinced that communism is an international criminal conspiracy. This international criminal conspiracy is planned and directed in every detail by a despotic gang of tyrants now holding forth in the Moscow Kremlin. The Russion Communists today, just as in the days of Lenin and Stalin, form the elite group sustaining the conspiracy. That elite group utilizes a supporting cast of local puppets and quislings to control the largest and most brutal slave empire ever known to mankind.

There can be no doubt, based on the evidence put before our committee in hearings held in London, Munich, and Berlin, that the plan of the Kremlin criminals is to colonize the world. By this process, they expect to destroy all the remaining free and independent nations and to make them completely subservient to the autocratic will of Moscow. As their evil plan unfolds, it becomes increasingly clear that the Russian Communists are cast in a super role, thus playing the customary place of "drones." All the other peoples of the enslaved non-Russian nations are forced to labor and die for the glorification of the new Red Colonial empire. That new colonial empire now imprisons 28 distinct nations and parts of 4 other nations containing over 800 million human beings. In addition, it has completely disseminated or destroyed three other nations.

The Committee, under the able chairmanship of Congressman CHARLES J. KERSTEN, of Wisconsin, conducted its business in accordance with the highest bipartisan tradition. The singular goal of the committee was to get the hard, cold facts about Communist aggression; its strategy, tactics, and final objectives. To that end a large number of witnesses from practically every nation and area within the Red colonial empire presented testimony before the committee. All of these witnesses gave evidence based upon their own personal experience under Communist tyranny, and most of them suffered unbelievable torture at the hands of the criminal conspirators. These witnesses came from every walk of life—clergymen, laborers, businessmen, diplomats, farmers, soldiers, policemen, teachers, journalists, border guards and even children. In addition we heard several former participants in the criminal conspiracy who revealed some startling facts concerning the part the key figures in the Moscow Kremlin play in the ruthless slaughter of those who oppose the design of the Red colonial empire. The sum total of the evidence presented to the committee by these victims of Communist aggression leads me to these basic conclusions:

1. That the madmen of the Moscow Kremlin are working overtime to attain their goal of a world colonial empire.

2. That in all our dealings with them, we must recognize them as the leaders of a ruthless criminal conspiracy and accordingly must discard any notion that we, as a free and independent nation, can coexist with this conspiracy.

3. That the leaders of this criminal conspiracy regard the United States as the principal roadblock to the fulfillment of their plan for a world colonial empire and will attempt a sneak attack on the United States as soon as they feel they have a 50-50 chance of winning an all-out war.

4. That our best chance for national survival, while avoiding world war III, rests on our all-out support of the principle of national independence for all the nations now held captive within the Red colonial empire. The burning aspirations of 90 percent of the people of all the nations so enslaved is for national independence—complete separation from Moscow tyranny and a rightful place in a community of free and peaceful nations. By placing our moral and political support behind the natural aspirations of 90 percent of the enslaved people, we can strike a death blow at the plan and timetable of the Red colonial empire. As a first step in that direction, I strongly recommend to President Eisenhower that he immediately establish the national military units, long advocated by Chairman KERSTEN, to be made up of escapees from communism and attached to the forces of the North Atlantic Treaty Organization.

Who are the 28 enslaved nations? They are Estonia, Latvia, Lithuania, Byelorussia, Ukraine, Georgia, Armenia, Azerbaidzhan, North Caucasia, Idel-Ural, Cossackia, Poland, Slovakia, Czechia, Hungary, Romania, Bulgaria, Albania, China, Manchuria, Inner Mongolia, Outer Mongolia, Tibet, Kassakstan, Turkestan, Uzbeck, Tirgish, and Kirgish.

Four partly occupied are North Korea, East Germany, East Austria, northern Indochina.

The three disseminated or destroyed are Crimean Tatars, Kalmuchs, and Chechin-Ingush. These are the three nations which Colonel Burlitski testified about, the way in which they were forcibly deported by Stalin after World War

II. Colonel Burlitski is a former lieutenant colonel of the MKVD who defected within the past year.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Appendix of the RECORD, or to revise and extend remarks, was granted to:

Mr. HILLINGS.

Mr. BYRD.

Mr. DOYLE and to include appropriate material.

Mr. GUBSER.

Mr. SCUDDER.

Mr. HOFFMAN of Michigan and to include a newspaper article.

Mr. HALE.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. VINSON for an indefinite period on account of official business.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 10 minutes on tomorrow, following the legislative program and any special orders heretofore entered.

SENATE ENROLLED BILLS SIGNED

The Speaker announced his signature to enrolled bills of the Senate of the following titles:

S. 95. An act for the relief of Mrs. Donka Kourteva Dikova (Dikoff) and her son Nicola Marin Dikoff;

S. 98. An act for the relief of (Mrs.) Betty Thornton or Jozsefne Toth;

S. 102. An act for the relief of Francesco Cracchiolo;

S. 110. An act for the relief of Christopher F. Jako;

S. 203. An act for the relief of Yvonne Linnea Colcord;

S. 222. An act for the relief of Mrs. Dean S. Roberts (nee Braun);

S. 246. An act for the relief of Gerrit Been;

S. 267. An act for the relief of Pantelis Morfessis;

S. 278. An act for the relief of Szyga (Saul) Morgenstern;

S. 308. An act for the relief of Filolaos Tsolakis and his wife, Vassiliki Tsolakis;

496. An act for the relief of Dr. Samson Sol Flores and his wife, the former Cecilia T. Tolentino;

S. 552. An act for the relief of Anna Urwicz;

S. 587. An act for the relief of Carlos Fortich, Jr.;

S. 661. An act for the relief of Nino Sabino Di Michele;

S. 790. An act for the relief of Irene J. Halkis;

S. 794. An act for the relief of Paulus Youhanna Benjamen;

S. 795. An act for the relief of Josef Radziwill;

S. 830. An act for the relief of Samuel, Agnes, and Sonya Lieberman;

S. 841. An act for the relief of Dionysio Antypas;

S. 843. An act for the relief of Rabbi Eugene Geigelstock;

S. 855. An act for the relief of Kirill Mihailovich Alexeev, Antonia Ivanovna Alexeev, and minor children, Victoria and Vladimir Alexeev;

S. 891. An act for the relief of Albina Sicas;

S. 912. An act for the relief of Bruno Ewald Paul and Margit Paul;

S. 915. An act for the relief of Augusta Bleys (also known as Augustina Bleys);

S. 917. An act for the relief of Stefan Burda, Anna Burda, and Nikolai Burda;

S. 937. An act for the relief of Virginia Grande;

S. 945. An act for the relief of Moshe Gips;

S. 986. An act for the relief of Mrs. Ishi Washburn;

S. 1129. An act for the relief of Jozo Mandic;

S. 1267. An act for the relief of Irene Kramer and Otto Kramer;

S. 1313. An act for the relief of Olga Balabanov and Nicola Balabanov;

S. 1362. An act for the relief of Rev. Ishai Ben Asher;

S. 1477. An act for the relief of Gerhard Nicklaus;

S. 1490. An act for the relief of David Maisel (David Majzel) and Bertha Maisel (Berta Pieschansky Majzel);

S. 1841. An act for the relief of Carlo (Adiutore) D'Amico;

S. 1850. An act for the relief of Dr. John D. MacLennan;

S. 1860. An act for the relief of Amalia Sandrovic;

S. 1954. An act for the relief of Anthony N. Goraieb;

S. 2036. An act for the relief of Joseph Robin Groninger;

S. 2065. An act for the relief of Mr. and Mrs. Hendrik Van der Tuin;

S. 2677. An act for the relief of Michio Yamamoto;

S. 2820. An act for the relief of Mrs. Erika Gisela Osteraa;

S. 2960. An act for the relief of Barbara Herta Geschwandtner;

S. 3197. An act to authorize the acceptance of conditional gifts to further the defense effort; and

S. 3605. An act to abolish the offices of Assistant Treasurer and Assistant Register of the Treasury and to provide for an Under Secretary for Monetary Affairs and an additional Assistant Secretary in the Treasury Department.

BILLS PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H. R. 130. An act to amend the act approved June 27, 1947 (61 Stat. 189);

H. R. 5185. An act for the relief of Klyce Motors, Inc.;

H. R. 6642. An act for the relief of Mrs. Augusta Selmer-Andersen;

H. R. 6786. An act authorizing the Secretary of the Interior to purchase improvements or pay damages for removal of improvements located on public lands of the United States in the Palisades project area, Palisades reclamation project, Idaho;

H. R. 7466. An act to authorize the Secretary of the Interior to execute an amendatory repayment contract with the Pine River irrigation district, Colorado, and for other purposes;

H. R. 8026. An act to provide for transfer of title to movable property to irrigation districts or water users' organizations under the Federal reclamation laws;

H. R. 8983. An act to provide for the conveyance of certain lands by the United States to the city of Muskogee, Okla.; and

H. R. 9005. An act to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177).

ADJOURNMENT

Mrs. ROGERS of Massachusetts. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 12 minutes p. m.), under the previous order of the House, the House adjourned until tomorrow, Thursday, July 22, 1954, at 10 o'clock a. m.

MOTION TO DISCHARGE COMMITTEE

JUNE 30, 1954.

To the CLERK OF THE HOUSE OF REPRESENTATIVES:

Pursuant to clause 4 of rule XXVII, I, HAROLD C. HAGEN, of Minnesota, move to discharge the Committee on Rules from the consideration of the resolution (H. Res. 590) entitled, "A resolution providing for the consideration of the bill H. R. 9245," which was referred to said committee June 17, 1954, in support of which motion the undersigned Members of the House of Representatives affix their signatures, to wit:

This motion was entered upon the Journal, entered in the CONGRESSIONAL RECORD with signatures thereto, and referred to the Calendar of Motions to Discharge Committees, July 21, 1954.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1759. A letter from the Deputy Postmaster General, transmitting a report of the claims paid by the Post Office Department during the fiscal year 1954, pursuant to the Federal Tort Claims Act; to the Committee on the Judiciary.

1760. A letter from the Secretary of Commerce, transmitting a draft of a proposed bill entitled "A bill to fix the salary of the Commissioner of Patents, and for other purposes"; to the Committee on Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MILLER of Nebraska: Committee on Interior and Insular Affairs. H. R. 9630. A bill to authorize the Secretary of the Interior to execute an amendatory contract with the Black Canyon Irrigation District, Idaho, and for other purposes; with amendment (Rept. No. 2348). Referred to the Committee of the Whole House on the State of the Union.

Mr. TOLLEFSON: Committee on Merchant Marine and Fisheries. H. R. 9786. A bill to give effect to the International Convention for the High Seas Fisheries of the North Pacific Ocean, signed at Tokyo, May 9, 1952, and for other purposes; with amendment (Rept. No. 2360). Referred to the Committee of the Whole House on the State of the Union.

Mr. ALLEN of California: Committee on Merchant Marine and Fisheries. H. R. 9397, A bill to authorize the Secretary of the Treasury to transfer certain property to the Panama Canal Company, and for other purposes; with amendment (Rept. No. 2427). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOPE: Committee on Agriculture. House Joint Resolution 550. Joint Resolution to permit the United States of America to release reversionary rights in a thirty-six and seven hundred and fifty-nine one-thousandths acre tract to the Vineland School District of the county of Kern, Calif.; with amendment (Rept. No. 2428). Referred to the Committee of the Whole House on the State of the Union.

Mr. VAN PELT: Committee on Merchant Marine and Fisheries. H.R. 9434. A bill to amend section 216 (b) of the Merchant Marine Act, 1936, as amended, to provide for the maintenance of the Merchant Marine Academy; with amendment (Rept. No. 2429). Referred to the Committee of the Whole House on the State of the Union.

Mr. D'EWART: Committee of conference. H. R. 303. A bill to transfer the administration of health services for Indians and the operation of Indian hospitals to the Public Health Service (Rept. No. 2430). Ordered to be printed.

Mr. TOLLEFSON: Committee of conference. S. 2408. An act to amend the Merchant Marine Act, 1936, to provide a national defense reserve of tankers and to promote the construction of new tankers, and for other purposes; without amendment (Rept. No. 2431). Ordered to be printed.

Mr. ARENDS: Committee of conference. H. R. 6725. A bill to extend the authority for the appointment of certain officers in the Regular Navy and Marine Corps (Rept. No. 2432). Ordered to be printed.

Mr. WOLVERTON: Committee of conference. S. 2846. An act to amend certain provisions of the Securities Act of 1933, as amended, the Securities Exchange Act of 1934, as amended, the Trust Indenture Act of 1939, and the Investment Company Act of 1940 (Rept. No. 2433). Ordered to be printed.

Mr. VORYS. Committee on Foreign Affairs. H. R. 9910. A bill to amend section 413 (b) of the Foreign Service Act of 1946; without amendment (Rept. No. 2434). Referred to the Committee of the Whole House on the State of the Union.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 653. Resolution for consideration of H. R. 8498, a bill authorizing construction of works to reestablish for the Palo Verde Irrigation District, Calif., a means of diversion of its irrigation water supply from the Colorado River, and for other purposes; without amendment (Rept. No. 2435). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 654. Resolution for consideration of H. R. 8384, a bill to authorize the Secretary of the Interior to construct, operate, and maintain the Talent division of the Rogue River Basin reclamation project, Oregon; without amendment (Rept. No. 2436). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 655. Resolution for consideration of H. R. 3534, a bill to authorize the extension of patents covering inventions whose practice was prevented or curtailed during certain emergency periods by service of the patent owner in the Armed Forces or by production controls; without amendment (Rept. No. 2437). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 656. Resolution for consideration of H. R. 9413, a bill to reorganize the Capitol Police force in order to increase its efficiency in the performance of its duties; without amendment (Rept. No. 2438). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 657. Resolution for consideration of H. R. 9390, a bill to extend certain civilian-internee and prisoner-of-war benefits under the War Claims Act of 1948, as amended, to civilian internees and American prisoners of war captured and held during the hostilities in Korea; with amendment (Rept. No. 2439). Referred to the House Calendar.

Mr. ALLEN of Illinois: Committee on Rules. House Resolution 658. Resolution for consideration of S. 3137, an act to make the provisions of the act of August 28, 1937, relating to the conservation of water resources in the arid and semiarid areas of the United States, applicable to the entire United States, and to increase and revise the limitation on aid available under the provisions of the said act, and for other purposes; without amendment (Rept. No. 2440). Referred to the House Calendar.

Mr. HOFFMAN of Michigan: Committee on Government Operations. H. R. 9835. A bill to provide for the termination of Government operations which are in competition with private enterprise; with amendment (Rept. No. 2441). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BURDICK: Committee on the Judiciary. H. R. 1156. A bill for the relief of William H. Barney; without amendment (Rept. No. 2349). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 1785. A bill for the relief of Herman E. Mosley; with amendment (Rept. No. 2350). Referred to the Committee of the Whole House.

Mr. LANE: Committee on the Judiciary. H. R. 5125. A bill for the relief of the children of the late Mateo Ortiz Vazquez; with amendment (Rept. No. 2351). Referred to the Committee of the Whole House.

Mr. HYDE: Committee on the Judiciary. H. R. 9512. A bill for the relief of Mrs. Franziska (Han) Rigau; with amendment (Rept. No. 2404). Referred to the Committee of the Whole House.

Mr. CELLER: Committee on the Judiciary. H. R. 9844. A bill for the relief of Gabriella Sardo; without amendment (Rept. No. 2405). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H. R. 9953. A bill for the relief of Mr. Fu-Ho Chan and Mrs. Fu-Ho Chan; without amendment (Rept. No. 2406). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 232. An act for the relief of Hugo Kern; without amendment (Rept. No. 2407). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 354. An act for the relief of Inger Larsson; without amendment (Rept. No. 2408). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 447. An act for the relief of Vasiliki Tountas (nee Vasiliki Georgion Karoumbali); without amendment (Rept. No. 2409). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 810. An act for the relief of Jan E. Tomczycki; without amendment (Rept. No. 2410). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 974. An act for the relief of certain Chinese children; without amendment (Rept. No. 2411). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1798. An act for the relief of Charles Peroulas; without amendment (Rept. No. 2412). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 1940. An act for the relief of Michela Aurucci; without amendment (Rept. No. 2413). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2135. An act for the relief of Fernando A. Rubio, Jr., without amendment (Rept. No. 2414). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2214. An act for the relief of Peter James Copses, Beatrice Copses, Victoria Copses, and James Peter Copses; without amendment (Rept. No. 2415). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2363. An act for the relief of Dr. Mien Fa Tchou and his wife, Li Hoei Ming Tchou; without amendment (Rept. No. 2416). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2411. An act for the relief of Ruth Berndt; without amendment (Rept. No. 2417). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2456. An act for the relief of Martin Genuth; without amendment (Rept. No. 2418). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2510. An act for the relief of Paul Lewerenz and Margareta Ehrhard Lewerenz; without amendment (Rept. No. 2419). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2594. An act for the relief of Paolino Berchielli, his wife Leda, and daughter Alba; without amendment (Rept. No. 2420). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2607. An act for the relief of Faustino Achaval Aldecoa and his wife, Carmen Achaval (nee Cortabitarte); without amendment (Rept. No. 2421). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 2635. An act for the relief of Nadeem Tannous and Mrs. Jamile Tannous; without amendment (Rept. No. 2422). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 3126. An act for the relief of Waltraut Claassen; without amendment (Rept. No. 2423). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. Senate Concurrent Resolution 83. Concurrent resolution favoring the suspension of deportation in the case of certain aliens; without amendment (Rept. No. 2424). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. Senate Concurrent Resolution 92. Concurrent resolution favoring the suspension of deportation in the case of certain aliens; with amendment (Rept. No. 2425). Referred to the Committee of the Whole House.

Mr. GRAHAM: Committee on the Judiciary. S. 231. An act for the relief of Otmar Sprah; without amendment (Rept. No. 2426). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BENTLEY:

H. R. 9980. A bill to make certain increases in the annuities of annuitants under the Foreign Service retirement and disability system; to the Committee on Foreign Affairs.

By Mr. ENGLE:

H. R. 9981. A bill to provide for the construction of distribution systems on authorized Federal reclamation projects by irrigation districts and other public agencies; to the Committee on Interior and Insular Affairs.

By Mr. FOGARTY:

H. R. 9982. A bill to amend section 1 (d) of the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mr. MASON:

H. R. 9983. A bill to amend section 723 of the Internal Revenue Code; to the Committee on Ways and Means.

By Mr. PILCHER:

H. R. 9984. A bill to provide for adjustments in the lands or interests therein acquired for the Jim Woodruff Reservoir, Ga., by the reconveyance of certain lands or interests therein to the former owners thereof; to the Committee on Public Works.

By Mrs. ST. GEORGE:

H. R. 9985. A bill to amend the Trading With the Enemy Act; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Mississippi:

H. R. 9986. A bill to provide Federal assistance to business enterprises, communities, and individuals injured by tariff reductions; to the Committee on Ways and Means.

By Mr. TOLLEFSON:

H. R. 9987. A bill to amend certain provisions of title XI of the Merchant Marine Act, 1936, as amended, to facilitate private financing of new ship construction, and for other

purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FULTON:

H. R. 9988. A bill for the relief of the Federal Republic of Germany; to the Committee on Foreign Affairs.

By Mr. JACKSON:

H. J. Res. 565. Joint resolution to amend the joint resolution providing for the membership of the United States in the Pan American Institute of Geography and History and authorize appropriations therefor; to the Committee on Foreign Affairs.

By Mr. FULTON:

H. J. Res. 566. Joint resolution to provide for increasing the salary and allowances of the present Chief of the United States Mission to Guatemala; to the Committee on Foreign Affairs.

By Mr. WOLCOTT:

H. Con. Res. 259. Concurrent resolution to provide for the Joint Committee on Tin; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LANE:

H. R. 9989. A bill for the relief of Thomas F. Harney, Jr., doing business as the Harney Engineering Co.; to the Committee on the Judiciary.

By Mr. COLE of New York:

H. R. 9990. A bill for the relief of Mrs. Emmy Rothe Hirsch; to the Committee on the Judiciary.

By Mr. GUBSER:

H. R. 9991. A bill for the relief of Irma Fontanini Citti; to the Committee on the Judiciary.

By Mr. REED of Illinois:

H. R. 9992. A bill for the relief of Hans Kuzura; to the Committee on the Judiciary.

By Mr. SCUDDER:

H. R. 9993. A bill for the relief of Joseph Righetti and Marjorie Righetti; to the Committee on the Judiciary.

By Mr. SMITH of Mississippi:

H. R. 9994. A bill for the relief of Riley Aircraft, Inc.; to the Committee on the Judiciary.

By Mrs. SULLIVAN (by request):

H. R. 9995. A bill for the relief of Walter Oppenheim; to the Committee on the Judiciary.

By Mr. WALTER:

H. R. 9996. A bill for the relief of Susan Ellen Heiney; to the Committee on the Judiciary.

By Mr. BURDICK:

H. Res. 659. Resolution providing for sending to the United States Court of Claims the bill (H. R. 9334) for the relief of Walter W. Flora and Mildred L. Flora, doing business as Flora Engineering Co.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1111. By Mr. DEROUNIAN: Petition of Mrs. Mary E. Wind of Bayville, N. Y., and approximately 125 other signers, urging favorable action by the Congress on the bill (H. R. 9434) to place the United States Merchant Marine Academy at Kings Point on a permanent basis; to the Committee on Merchant Marine and Fisheries.

1112. By the SPEAKER: Petition of the chairman, Kushiro Municipal Assembly, Kushiro, Japan, requesting that efforts may be taken to prohibit the experiment of A- and H-bombs as soon as possible; to the Joint Committee on Atomic Energy.

EXTENSIONS OF REMARKS

The Late Honorable Joe Farrington

EXTENSION OF REMARKS

OF

HON. ROBERT HALE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 21, 1954

Mr. HALE. Mr. Speaker, Maine had its primary election on June 21, and so I was not on the floor on that day to join in the eulogies to my friend Joe Farrington, the late Delegate from Hawaii. I shall always regret this. No one could have been fonder of Joe Farrington than I was, and no one could have had a greater admiration for his capacity and character as a legislator.

There was no Member of our body better qualified to render a decision on any question that can arise here than Joe Farrington. Yet, under the peculiar terms on which he served, he was disqualified from voting on any question even if it was one of vital importance to the people whom he represented. I often wondered how he endured a situation which to me would be so humiliating and galling. But he did endure it with the utmost cheerfulness as he endured all the vicissitudes and frustrations of his service here.

Back in the year 1931 I first met Joe Farrington's father, the Honorable Wallace Rider Farrington, then Governor of Hawaii. His family came from the town of Brewer in Penobscot County, Maine. The Farringtons have always been a good Maine family. Joe and his father took the utmost pride in their Maine ancestry and were always deeply interested in all the affairs of the State. It was on that account that I first got to know Joe Farrington and so to become fond of him, when we arrived here together in the 78th Congress in January 1943.

As everyone knows, Joe's ambition was to make Hawaii the 49th State of the Union and all his labors in this vineyard were with that ultimate objective in mind. He could not have conducted this struggle with more dignity, more intelligence, and more ability. Statehood bills actually passed the House in June 1947 and in March 1950, but these triumphs were in vain because in each of these sessions the Senate failed to act. In the present Congress the House passed the statehood on March 7, 1953, and the Senate passed a statehood bill on April 1, 1954, but tied Alaska up with Hawaii, and up to this point they have not been disentangled. I should like to say with all possible emphasis that Hawaii should be given statehood before the present Congress adjourns. Joe Farrington needs no monument for his services, but Hawaii deserves justice, and I am convinced that statehood is no more than justice for this great and progressive Territory.

Joe Farrington was a good man and a reasonable man. He had Yankee shrewdness. He also had a tolerance and a temperateness which must have been his birthright as a citizen of those beautiful islands where, more than anywhere else in the entire world, people from all nations and of all races have learned to work together in democratic association for the common good.

Joe had Yankee culture behind him. He had the training of a famous American university. But he also was a product of Polynesian culture which is more remarkable than many of our people realize.

I particularly agree with what Walter Judd has said about Joe Farrington. He had great vision. He realized that this country could not hope to lead the world in the cause of freedom if its own institutions were defaced by racism and intolerance. He knew from earliest youth in Hawaii that to be a human being did not necessarily mean to be a Caucasian; and that, as far as Asia is concerned, the Asians would accept Communist supremacy rather than white supremacy. He knew that to be a good American did not depend on the color of the skin. To judge Joe Farrington's life work one must realize the spiritual greatness of his concept of America.

Mr. Speaker, you did me the honor to appoint me a member of the official delegation which went from this House to accompany our colleague's ashes to their last resting place in Nuuanu Cemetery, Honolulu, and to attend the memorial services which were held for him in the constituency which he represented so worthily.

That visit to Hawaii, though it could not have been sadder, was deeply revealing to me and I shall always be happy that I was able to make the journey. People in Hawaii told me that not since the end of the Hawaiian monarchy in 1893 has there been such an outpouring of affection, respect, and grief as was manifested for our colleague. This I can readily believe.

In addition to the funeral services held in the Congregationalist Church, our delegation attended the ceremonies where our colleague's ashes lay in state in the throne room of the Iolani Palace. That was one of the most extraordinary tributes to a man that I can imagine. Hour after hour the people of the Territory came to do reverence to Joe's memory while various groups of his people sang chants and funeral music in

his honor. Nothing could have been more moving.

Quite apart from Joe Farrington's character and achievements as a legislator I would pay tribute to him as a human being. A delightful host, a selfless friend, convivial in the best sense, sharing in the joys of life, one could never find a more charming companion. It is hard to understand that we shall not see him again in the flesh.

I want to take this occasion to express my sympathy to Betty Farrington his devoted wife, the very able partner in all his work, and to his two children of whom he was so fond who owe so much to his devotion.

Defense Contracts With General Motors Corp.

EXTENSION OF REMARKS
OF
HON. CHARLES S. GUBSER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. GUBSER. Mr. Speaker, I recently received a request from one of my constituents to obtain for him information regarding defense contracts placed by this Government with the General Motors Corp. "Is it true," my constituent inquired, "that the United States has cancelled defense contracts with many industrial firms, but not a single one with General Motors?"

In order to reply, I requested the Department of Defense to release statistics showing the status of such contract cancellations, and I believe the answer to be of sufficient general interest to bring it to public attention.

I have in my possession a table showing cumulative net totals of military prime contract awards of $10,000 or more to all business firms in the United States in one column, and to the General Motors Corp. in another column, at 6-month intervals since Korea and through April 1954. The table shows that contract cancellations since June 1953 reduced the General Motors total from $7,095,800,000 to $6,728,900,000 in contracts of $10,000 or more. It also shows that the ratio of General Motors to all United States contracts of that size is now lower than at the end of any fiscal or calendar year since Korea. While at the end of June 1951, General Motors' ratio was 8 percent of the total, and stood at 7.2 percent at the end of the 1953 fiscal year, it dropped to 6.4 percent of the total by April 30, 1954.

According to the Defense Department, these General Motors figures include all contracts with subsidiaries and divisions of that corporation.

Mr. Speaker, there has been a considerable amount of loose talk and insidious rumor mongering on this subject, and to my knowledge, this is the first time that a clear-cut refutation has been furnished by authoritative sources, citing dollars and cents to set the record straight.

I believe that my constituent has performed a public service by posing the question which prompted my research and finally induced the Defense Department to release the information so that the people may know.

Net value of military prime contracts of $10,000 or more, with all business firms and with General Motors Corp.,[1] cumulative from July 1950 through specified dates

[In millions]

	United States total	General Motors Corp.[2]	
		Amount	Percent of total
June 30, 1951	$29,687.0	$2,372.5	8.0
Dec. 31, 1951	43,961.0	2,907.2	6.6
June 30, 1952	73,849.8	5,489.5	7.8
Dec. 31, 1952	80,331.8	5,285.2	6.6
June 30, 1953	98,723.0	7,095.8	7.2
Apr. 30, 1954	104,875.5	6,728.9	6.4

[1] Army, Navy, and Air Force supply, service and construction contracts awarded in continental United States, excluding all contracts of less than $5,000, excluding Army and Air Force contracts of less than $10,000 since Dec. 31, 1950, and excluding Navy contracts of less than $10,000 since June 30, 1951.
[2] Includes all contracts with subsidiaries and divisions.

Morality by Arithmetic

EXTENSION OF REMARKS
OF
HON. ROBERT C. BYRD
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. BYRD. Mr. Speaker, it is with a heaviness of spirit that I feel compelled to make these remarks bearing upon the frenzied diplomatic activities of our country and the other members of the coalition, Britain and France.

In the face of all evidence, and almost in defiance of reason, I, like so many million other Americans, have been hoping against hope that the situation in Indochina could be retrieved. Against our better judgment, we have let ourselves believe that the flurry of diplomatic activities these last several weeks could somehow change the essentials of a sorry situation. Eagerly we have snatched up the latest newspaper and hopefully listened to the last word on the broadcasts, devoutly wishing, in our souls, for some miraculous extraction from the pit into which weak, vacillating policy has plunged the Western World.

To be sure, a dramatic effort has been made to put substance into froth, as is evidenced by the abstention of America from Geneva, by the winging of Secretary Dulles to Paris, and by the dispatch of Under Secretary Smith to Geneva, I am not unmindful of the efforts of the Department of State or the administration to establish and hold a firm policy relative to Communist aggression in Asia. I acknowledge, and not grudgingly, that Mr. Dulles has been energetic and zealous in this pursuit. But the fact remains, Mr. Speaker, that when the last headline has been made, when the last broadcast has been completed, when the last flight has been checked in, the net result of all of this show is another and a substantial victory for the Communists—a victory that is not going to be contained within its present dimensions, but one that will spill over into other parts of Asia to be felt around the entire world.

What happens, Mr. Speaker, between the high-sounding, avowed purpose of our diplomacy and the regrettable accomplished result? The words are phrased in one way, but they come out as an entirely different record. This, the case of Indochina, is not an isolated example of how our morally proclaimed foreign policy comes to a shabby end. In fact, Mr. Speaker, not only is it not an isolated example, but it is, in fact, the pattern.

What disturbs me enormously—and I know that I largely speak the sentiments of this body—is the official thinking, as reflected in end-official policy, that it is an all-right arrangement to assent to carving up the world into zones to be handed over to the Communists at the price of an alleged armistice. This, it would seem to me, is appeasement by partition.

We are aghast at the notion that we should allow the Communists, at this stage of the game, to take over a whole country. This would be aggression; this could constitute imperialism; this would be repugnant to the West's moral code. But, somehow, it becomes all right to countenance, if not to actually assist in, the division of a country into two parts. Just how does it become a right and moral proposition to consign 2 million people to Communist slavery if it is an unthinkable thing to allow Communist conquest of 10 million people? Are morals divisible by arithmetic, Mr. Speaker? Can a moral principle be halved or separated into quarters? Does the application of a percentage table, applied to human slavery, make it palatable to the world?

I have said it before, and I shall say it often, the Lord willing, that what is morally wrong can never be politically right, and no amount of transoceanic flights or communiques or highly touted unity can make it right.

That which is going on, that which is being covered up with a shower of diplomatic language, Mr. Speaker, is a negotiation of conditional surrender in Indochina. Despite the mumbo-jumbo which pretends that great new starts are in the making along the diplomatic front, a country is being halved in such a way and under such circumstances that the Communists will be in position to gain full control ultimately.

This did not need to happen. It may be a convenient expedient for our State Department at this stage of the game to pretend that the United States is merely an onlooker, to give off with that hands-off statement, "I'm only waiting for a streetcar," but the fact remains, Mr. Speaker, that we footed the big end of the war costs in Indochina—something like 70 percent of the French expenditures—and, to make matters worse, it looks very much as though the Communists are about to fall heir to a most

valuable cache of military loot—armament and supplies that will equip them well for new aggressions.

This is the same thing that happened in Korea. Do not we ever learn? Where is the coordination between our diplomats, our intelligence services, and the military? We should have been informed as to what French intentions were; we ought to have been apprised of the way the fighting was going; we should have known what the ultimate prospect was. But, above all, we should have been cognizant of the point at which it became advisable to plug the military pipeline.

But all of these considerations, important as they are, are swallowed up in the larger question: When, where, and how will the West stop falling back before the onpressing Communist tide?

As I have said before, Mr. Speaker, none but the whole world will suffice to satisfy the aggressive appetite of Communist imperialism. Each day brings evidence of that anew. As for ourselves, we must decide when we are going to cease being sold on successive retreats and we must decide to look the full threat of Communist imperialism in the face. We can no longer afford the luxury of wishful thinking. It has already started the free world down the road to defeat.

Today Is a Black Day for Freedom

EXTENSION OF REMARKS
OF
HON. PATRICK J. HILLINGS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. HILLINGS. Mr. Speaker, Communist tyrants across the world are rejoicing today. At dawn this morning in Geneva 12 million human beings were sold into Communist slavery by the action of leaders of the free world with the exception of the United States. The boundary line of the Iron Curtain was moved forward to include 77,000 square miles of territory in Indochina. This is, indeed, a black day for those who believe in the principles of human freedom and the dignity of man. This is a day which has strengthened the Communist hand immeasurably and which has undoubtedly advanced the date when we may be faced with world war III.

Mr. Speaker, as a member of the Select Committee on Communist Aggression, I have just returned from hearings conducted in Europe. I listened to scores of witnesses who had escaped from behind the Iron Curtain and who told us in graphic detail of conditions there and of what it means to live under the Communist heel. In addition, I visited the Soviet zone of Germany to briefly inspect that area and I talked with a large number of individuals in other parts of Europe in an effort to understand the situation. Last month, prior to joining the Committee on Communist Aggression in Europe, I was in Guatemala on the eve of the successful revolution which overthrew the Red regime.

As a result of my service on this committee, I am completely convinced that the more the free world surrenders to the Communists, the greater the chances are of a third world war. The stronger we allow the Reds to become the sooner they will proceed with their plans to destroy the United States and all remaining free nations.

The best allies the free world has today are the millions of people behind the Iron Curtain who know and understand the terrible consequences of communism. The Soviet Union and her Communist satellites do not dare risk war today for fear that the Communist world would collapse and that the enslaved peoples would turn on the Soviet masters. Just as the Guatemalan Army refused to defend the Red regime against the anti-Communist forces attempting to overthrow it, the satellite armies of the Soviets would not defend their Communist masters today if war should come. However, a few years from now the Reds hope to consolidate their gains by ruthless liquidation of leaders of anti-Communist movements behind the Iron Curtain. When that time comes, the Soviet Union and other Communist nations will be ready for all-out war.

It is essential that the leaders of the free world understand this basic fact: The Russians do not want war today. They are not prepared for it. If we are willing to risk war in order to stand firm against Communist demands and pressures, the Reds will have no choice but to back down in the face of such a determined position on the part of the free peoples. If we are not willing to take such a strong stand, the Communists will continue to gain in their plans for world conquest until such time as they are prepared for all-out conflict.

Those who talk of peaceful coexistence with Communists are making a terrible mistake. There can be no peaceful coexistence with the devil. Peaceful coexistence means giving the Communists time to gather the necessary strength to destroy us. It is my sincere hope and prayer that the leaders of the free world will awaken to this fact.

We must remember that time is on the Communists' side. They are constantly building their strength and increasing their war potential and indoctrinating the young people of the new generation. Eventually they will be in a position to overtake us.

Mr. Speaker, Premier Mendes-France returns to his country today and Mr. Anthony Eden returns to his to proclaim peace in our time. They will return to their countries from Geneva where they sat at the conference table with ruthless murderers of innocent people who represented the Communist nations. They will not mention the great moral principles which they surrendered at Geneva. They will place no significance on the fact that Communist Poland and pro-Communist India will control the so-called free elections which are scheduled for Vietnam under the terms of the Geneva agreement. This means there will be no free elections but only a Communist victory. Today is indeed a black day for freedom.

General Agreement on Trade and Tariff

EXTENSION OF REMARKS
OF
HON. HUBERT B. SCUDDER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. SCUDDER. Mr. Speaker, I am very much interested in the operation of GATT. The reason for my interest lies in the fact that my district is one that is much affected by the tariff question. We grow wine and wool in my district. We grow cherries and walnuts and hops. We have lumber, shingles, and hardboard production. We have tuna fisheries.

These products are all sensitive to import competition and unless proper protection is provided, imports can drive any of these producers to the wall. For this reason the tariff and how it is administered is of the greatest importance to us. That accounts for my interest in the operation of GATT.

This is an international body that meets once a year, usually in Geneva, Switzerland, and it concerns itself with questions arising from the General Agreement on Tariffs and Trade. GATT wields a great many powers over tariff and trade matters that I do not recall Congress giving up. It is something of a mystery how GATT came into possession of these powers. We in Congress did not deliver them.

If the Tariff Commission makes a recommendation to the President to raise a duty under the escape clause and if the President complies with the recommendation, GATT reviews the case to determine whether the action was justified. This has happened in every case that has been approved by the President to date when a protest was lodged by a GATT member.

Also when Congress in 1951 passed a law calling on the President to withdraw trade agreement concessions from Communist-controlled countries, we were not free to do so with respect to Czechoslovakia although that country had gone behind the Iron Curtain. Why were we not free after Congress passed and the President approved a law that we do so? It was because Czechoslovakia is a member of GATT. We therefore had to ask that body at its next meeting in Geneva whether we could withdraw from our trade agreement with Czechoslovakia.

After debating the issue GATT decided that we were free to make the withdrawal.

It is my opinion that the entire tariff issue should be discussed by the Congress and a law passed for the guidance of those who affect our trade agreements. I am not one who would exclude trading, nor do I believe in excessively high tariffs. I believe that we should live and let live, but that our trade negotiations should be realistic.

There is a great difference in the standard of living between various countries. There are climatic conditions that alter the customs of various places which should be taken into consideration. I believe that there is a solution to the entire trade program, but

it should not be dependent upon international politics.

Too often small industries and specialized agricultural crops have been ruthlessly sold down the river as a concession in making agreements. I do not believe that any industry that is useful and beneficial to our civilization should be sacrificed for the sake of a trade negotiation.

It is my understanding that the representatives of foreign countries negotiating trade agreements have with them representatives of the industries being considered for trade negotiation. I am also informed that the American negotiators do not extend this same privilege to American interests. I believe this situation should be corrected by the administrative agencies, or Congress should act to see that the procedure is corrected. I believe that Congress should set up the rules in order to protect the economy of our own country.

The time has come when this whole situation must be brought into the open.

GATT has its next annual meeting in Geneva in October. Why should Congress not have an observer at that session? Why should our State Department delegation not report to Congress? Why should anything like GATT activities be carried on without prior authorization by Congress? These questions have been left hanging too long. They should be answered without further delay.

Imperative Educational Needs of Youth

EXTENSION OF REMARKS
OF
HON. CLYDE DOYLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. DOYLE. Mr. Speaker, by reason of unanimous consent heretofore granted me so to do, I am pleased to herewith present for your cordial attention and benefit, as well as the same for all of my distinguished colleagues the text of 10 points entitled "Imperative Educational Needs of Youth." This list was furnished me by one of the distinguished public school educators in the great 23d District, which I represent this my 8th year in the House. It came to me from Prof. Jack Robinson, superintendent of the Paramount Unified School District at Paramount, Los Angeles County, Calif. The communication from Professor Robinson called my attention also to an article in Collier's magazine, June 11, 1954, by Dr. Paul Elicker entitled "How Good Are Our Schools?"

Mr. Speaker, believing I have a right to assume you and all my other colleagues fundamentally agree with the 10 points listed and enumerated herewith, I wish to emphasize that I think we in Congress, together with the legislators at the State level of public responsibility, as well as at most other levels of public and official responsibility, are not yet paying sufficient heed to the necessity of more intelligently and more adequately doing constructive things in the area of juvenile delinquency. When I make this comment I, of course, wish to be understood as believing that one of the very material factors entering into juvenile delinquency is parental delinquency.

Mr. Speaker, I do not make this statement without bearing in mind the very enriching and enlightening experiences I had several years before I came to this great legislative body when I had the responsibility of being the chief juvenile county officer for a time in the Los Angeles Juvenile Court, and then later also having the benefit of enriching and enlightening experiences by reason of membership on the California State Board of Education. My recital of these experiences on my part are made primarily so that you and my colleagues may be further enabled to appraise my strong approval of these 10 points, and of my own remarks at this time made in connection therewith.

Here, for instance, is the text of two important telegrams I have received from the State of California. The first is from Roy E. Simpson, superintendent of public instruction at Sacramento, and is as follows:

Have been advised House Appropriations Committee has eliminated all Federal appropriations for State and White House Conferences on Education, Advisory Committee on Education and Cooperative Research in Education. Because of need to study vital educational problems I urge your support of Federal funds for these purposes.

The second is from Hon. John Anson Ford, chairman, Los Angeles County Board of Supervisors, and is as follows:

Understand the House Appropriations Committee deleted $165,000 for support of juvenile delinquency project of the Children's Bureau. This is the only Federal activity we know of that attempts to bring together law enforcement, juvenile courts, probation, and welfare on a national level to combat the growing tide of juvenile delinquency. Certainly hope that this relatively insignificant sum can be restored to continue this important work. This special project has made a real contribution during the last 3 years. Will you please do what you can to have the appropriation restored?

And following is the text of the 10 points which I have heretofore referred to and which are considered by the National Education Association as imperative educational needs of American youth.

IMPERATIVE EDUCATIONAL NEEDS OF YOUTH

(EDITOR'S NOTE.—Much of the program planning in high schools throughout the country today is based on the following 10 imperative educational needs of youth. The list was drawn up by the educational policies commission of the National Educational Association.)

1. All youth need to develop salable skills and those understandings and attitudes that make the worker an intelligent and productive participant in economic life. To this end, most youth need supervised work experience as well as education in the skills and knowledge of their occupations.

2. All youth need to develop and maintain physical fitness and mental health.

3. All youth need to understand the rights and duties of the citizens of a democratic society, to be diligent and competent in the performance of their obligations as members of the community and citizens of the State and Nation, and to have an understanding of the nations and people of the world.

4. All youth need to understand the significance of the family for the individual and society and the conditions conducive to successful family life.

5. All youth need to know how to purchase and use goods and services intelligently, understanding both the values received by the consumer and the economic consequences of their acts.

6. All youth need to understand the methods of science, the influence of science on human life, and the main scientific facts concerning the nature of the world and of man.

7. All youth need opportunities to develop their capacities to appreciate beauty in literature, art, music, and nature.

8. All youth need to be able to use their leisure time well and to budget it wisely, balancing activities that yield satisfactions to the individual with those that are socially useful.

9. All youth need to develop respect for other persons, to grow in their insight into ethical values and principles, to be able to live and work cooperatively with others, and to grow in the moral and spiritual values of life.

10. All youth need to grow in their ability to think rationally, to express their thoughts clearly, and to read and listen with understanding.

What Could He Expect?

EXTENSION OF REMARKS
OF
HON. CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 21, 1954

Mr. HOFFMAN of Michigan. Mr. Speaker, if Syngman Rhee, a true patriot, has been aware of current events, just what did he expect when he came to America on his last visit?

He must have known that for several years a group of Americans, whatever may have been their intentions, are doing their utmost, by entangling us in the affairs of other nations, to destroy American independence.

They have succeeded in letting other nations shape our foreign policy, insisted that as the years went by, we build up the strength of potential enemies, one of whom, the Communists, they now say threaten world domination. We have given billions of dollars to other nations, more than a million American casualties to contain communism abroad, while here at home, through positions in the Federal Government, we have subsidized Communists in policymaking positions, in our National Government, fed, clothed, and sheltered them—yes, as American boys died all over the world allegedly fighting communism, until today it is doubtful if there is a country in the whole world where the body of some mother's son does not lie, the bones of some wife's husband lie buried in the sea—here in Washington the National Government has coddled, protected, and encouraged them.

Well do I recall the days when Martin Dies, Joe Starnes, yes, and the present Vice President, Richard Nixon, were fighting Communists; when members of

House committees were bitterly, unceasingly and viciously assailed by the pro-Communist press and many an internationalist—by a press apparently financed by individuals and organizations which harvested fool's gold from the wars in which they involved us.

Today the picture is no different. A man from Wisconsin coming to Washington on a crusade against the Reds as came Dr. Wirt from Indiana some years ago, is, as was Wirt, most shamefully attacked.

Today the issue is the same as it was in Dr. Wirt's day. It is, are you for or against those who would destroy our form of government? Are you today for or against communism? The present real issue is, who in the Army promoted a man charged with being a Communist, gave him an honorable discharge, a man who took refuge behind the fifth amendment when asked whether he was a Communist or was affiliated with Communist organizations?

Yes, we may cry out against methods but we cannot becloud the basic issue. Are we for or are we against communism and the Communists?

Just as a committee of the House sent Dr. Wirt back to his home in disgrace where he died of a broken heart, so today, another man is being pilloried by the press, by some in authority who should know better.

And what have they against this man from Wisconsin? And who appointed anyone a judge over him or his conduct? He is for his country, his homeland. Oh, but he is rough and he is tough—so they say.

Assume that he is. Are the Communists who hold our men as prisoners of war, some 8,000 of them in Siberia or only God knows where, kind, generous and charitable in their treatment of our sons, fathers and husbands?

I know two wrongs do not make a right but when you fight evil, if you would win, there is no need of clothing the iron fist in a velvet glove.

Syngman Rhee, I repeat, if he was aware of current events in America, had no reason to expect that he would receive whole-hearted, all-out support in his efforts to protect the independence of his country. That you may know an accurate observer's and a truthful narrator's opinion of the situation, read the following by David Lawrence:

THE DISILLUSIONMENT OF A PATRIOT—KOREAN PRESIDENT RHEE, WRITER SAYS, CAN'T UNDERSTAND CALLS FOR PEACEFUL COEXISTENCE WITH RED KILLERS OF AMERICANS

They finally announced last Monday the official casualty list of Americans in Korea—the dead: 33,417.

And Syngman Rhee came to Washington the same day to express his gratitude for the help the American people gave his country.

That's a lot of American boys—33,417—who gave their lives, and there also were 108,650 wounded, many of whom will be maimed for the rest of their lives.

Nobody but Syngman Rhee seemed last week to have these American boys on his conscience. It is true he came in a bitter mood. For nearly 2 million of his countrymen—civilians as well as soldiers—have been killed. But, coming from the battle zone to calm, peaceful, forgetful Washington, it was, indeed, a realistic if not an inexplicable, contrast.

For while Washington was polite and gracious to the President of the Republic of Korea, it was somewhat annoyed that he brought up the subject of what happens when you start to repel an attack in a war, kill and wound 142,067 of your young men, and then fail to finish the war or to do anything which gives the impression that you really care about the sacrifices that have been made.

This week Syngman Rhee will pay his respects at Kansas City to former President Truman, who ordered the American Army, Navy, and Air Force in June 1950, to help defend the Republic of Korea. It was a magnificent action and Mr. Truman deserves the greatest credit for this step. But then, after a few months, Mr. Truman faltered—he listened to the timid voices of the European governments who feared that a war in Asia might endanger the safety of Europe.

Instead of taking the calculated risks of a battle already begun, Mr. Truman acceded to the request of the allies and would not allow pursuit of the Chinese bombers to their bases in Manchuria. He refused to order a blockade of the coast of China, whose government had intervened in Korea with more than 2 million soldiers, and he failed to let the troops of Chiang Kai-shek, still the recognized head of the Nationalist Government of China, go to the mainland of China to fight against the Reds. Then he summarily fired General MacArthur—the Commander in Chief—for daring to advocate such a stern course. Mr. Truman has a lot to answer for in history.

Negotiations for an armistice had been begun under the Truman administration, so President Eisenhower felt it his duty to consummate them, because a commitment had been made to our allies to end the fighting. The plausible argument was advanced that aggression had been "repelled" and that the Communists had learned a lesson and that a third world war had been averted. Significant warnings against further aggression were then released by Washington in the hope of restraining the Communists from enlarging the war in Indochina. But the warnings went unheeded and the Indochina war was enlarged, with aid from Red China. The western countries in due time capitulated to the aggressor.

The 33,417 dead, moreover, are forgotten or ignored in Great Britain. Yet this is more than half the number of persons killed by the bombing of Britain during all of World War II. In spite of the fact that the United Nations has declared the Red Chinese government an "aggressor," the London government and almost the entire Parliament and the press want to accept the aggressor as a peace-loving member of the United Nations with a seat in the Security Council. Admission of Red China, of course, means that the Republic of Korea will be forfeited to the Communists.

Syngman Rhee, who has lived the last four years in an atmosphere of great sacrifice, in which the blood of the soldiers of many allied nations has been shed in the cause of human freedom, can't understand what's come over the free world, especially America. He has studied American history and has read of such patriots as Patrick Henry who said they preferred death to loss of liberty. He has read of how Abraham Lincoln said the Union couldn't survive half slave and half free. Yet he hears of "peaceful coexistence" with the murderers of his countrymen.

But it didn't take long for the Korean President last week to be disillusioned—to discover that official Washington is far more interested in finding ways and means of curbing MCCARTHY'S "methods" than it is in restraining the methods of the Communists in Asia. Even when they have already killed 33,417 American boys and have tortured tens of thousands of others. He must have wondered about all this as he read of the debates in Congress where it seems more important to worry about whether some "Pinko" may possibly get a tongue-lashing before a congressional committee hereafter than whether 33,417 American boys died in vain in Korea.

Those 33,417 American boys had mothers and fathers and maybe sisters and brothers. Perhaps that's still a small number compared to the rest of the population, but there are millions of others who have been drafted to serve in the Armed Forces and are now in reserve. Will they be taught that America fights for an ideal—or just begins a fight and then quits when other governments, who send only token forces into the fray, get frightened and call quits?

It is going to be hard to indoctrinate the troops of the future and to convince them that the American flag stands for the idealism the officers will try to tell them it does. It is going to be hard to persuade many American parents that the several divisions of our troops now in Europe aren't being jeopardized. For all around them today in Europe and Asia are "peace-at-any-price" governments which are unwittingly telling the aggressor that aggression will not be punished.

The 33,417 American dead may not be on anybody's conscience in Europe, but what's much worse it is beginning to look as if they aren't on anybody's conscience here in Washington, either. What a way to destroy the morale of our Armed Forces in a world where aggressors hold sway.
